☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)

Lots will be purchased as much below top bids as possible.

☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.

☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 800-872-6467

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment

Dear Bidder:

Welcome to Long Beach! For the last big Expo of the year, we have made our auctions bigger and better across every numismatic category, and this U.S. Coin catalog is no exception. With close to 4000 lots in our Floor Sessions, including nearly 800 items in our largest Premier Session ever, you will find a wide range of important collectibles between the covers.

In addition to two pedigreed collections, The Strawberry Fields Collection and The Teich Family Collection, we have several Featured Collections for this auction. We invite you to read about them below.

The COL Steve Ellsworth Die State Collection

COL Steve Ellsworth is noted for his expertise in Civil War history and numismatic security among other fields. This collection of large cents in unusual and important die states, formed over more than four decades, will give early copper aficionados a chance to own pieces in seldom-seen states of die progression. Among the collection's many highlights are a 1793 S-5 Wreath cent in unbroken Die State I, VF25 PCGS; a 1799 S-189 cent in Die State IV, ex: Naftzger with a pedigree stretching back to 1890, VF25 PCGS; an 1800 80 Over 79 S-194 cent with Style Two Hair, Breen Die State III with a distinguished pedigree, AU55 PCGS; and an 1809 S-280 cent, Breen Die State II, AU58 NGC.

The Noblesse Collection

The rare early proof silver coins in The Noblesse Collection have been the property of a family of European nobility since the mid-19th century, when an ancestor collected them while visiting the United States. New to U.S. numismatics, they are making their market debut in our Premier Session. In addition to an 1830 half dime of the V-10/LM-1.1 variety, PR66 ★ NGC, and an 1831 Large Letters quarter, B-5 variety, PR66 NGC, a remarkable sequence of proof Bust and Reeded Edge half dollars are available: 1826 O-101, PR65+ NGC; 1827 O-121, PR62 NGC; 1829 O-108, PR65 NGC; 1831 O-103, PR64 NGC; and 1838 GR-13, PR64 ★ NGC.

The New York Collection of 1864 Indian Cents

Among proof Indian cents, the undisputed key is the 1864 bronze cent with designer James Longacre's initial L on Liberty's ribbon. Fewer than two dozen specimens are known, making it far rarer than any other issue in the series. The New York Collection of 1864 Indian Cents brings together three proof 1864 With L bronze cents, including a PR65 Red NGC specimen obtained directly from the famed Norweb Collection, plus a pattern of the 1864 With L design struck in aluminum.

The Joan Carroll Collection

This wide-ranging and eclectic collection takes in the full date range of U.S. federal coinage. Key dates are present in multiples, including Chain cents (XF Details and AU Details NGC) and 1916 Standing Liberty quarters (two in MS62 Full Head and one in MS64 Full Head NGC). A 1968 No S dime, PR68 NGC, is an important modern highlight, while two MS64 NGC Panama-Pacific fifty dollar commemoratives, one round and the other octagonal, are the collection's literal and figurative heavyweights.

The Owen Collection, Part II

The Owen Collection continues from our Chicago event with more Barber rarities and other coins. Highlights include a 1901-S quarter, MS65 NGC; an 1893 quarter, PR8 PCGS; a 1904-S half dollar, MS63 NGC; and a 1910 half dollar, PR67 Cameo PCGS.

The Searight Collection

Another broad-based collection, The Searight Collection is most noteworthy for its silver and gold coins but has significant copper and nickel examples as well. Top Searight highlights in the Premier Session include an 1807 quarter eagle, BD-1 die pair, AU58 PCGS; an 1881 three dollar, PR63 Cameo PCGS; an 1859 Seated dollar, PR63 Cameo PCGS; and an 1873 Seated dollar, PR64 Cameo PCGS.

A 1912 Gold Proof Set Acquired Directly From The Mint

A complete four-piece gold proof set from 1912. According to our consignor, his maternal grandfather was a prosperous financier who held a seat on the New York Stock Exchange. When the financier's daughter (the consignor's mother) was born in 1912, he purchased a proof set to commemorate the joyous occasion, just as many families do today (albeit not in gold). The coins were held together in the consignor's family from 1912 until this auction.

Heritage's Seven Ways to Bid are open for this event. Pre-auction bidding is available through HA.com, mail, fax, and e-mail before the auction. Real-time bidding by Heritage Live!™ and telephone will let you win the item of your dreams wherever you are in the world. If you are attending the Long Beach Expo, you are of course invited to bid from the floor, the most time-honored way to win the item of your dreams. Remember to visit our booth at the Bourse and say hello.

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

Wednesday, September 25, 2013 | 1:00 PM PT | Long Beach | Lots 3001 - 3408

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

To view full descriptions, enlargeable images and bid online, visit HA.com/1189

FLYING EAGLE CENTS

- 3001 1857 MS64 PCGS.** Dusky orange and pink-violet hues prevail on this pleasing near-Gem. The design is all-around sharp, though a few scattered flyspecks are visible. NGC ID# 2276, PCGS# 2016
- 3002 1857 MS64 PCGS.** Peach and salmon shadings prevail on this near-Gem from the first official small cent issue. A few small flyspeck areas are hidden on the margins. NGC ID# 2276, PCGS# 2016
- 3003 1857 MS64 PCGS.** Reddish-orange and salmon shadings with blue-influenced splashes at the upper obverse. Softly struck on the tailfeathers and much of the wreath, though there is no trace of wear. NGC ID# 2276, PCGS# 2016
- 3004 1857 MS64 NGC.** A lovely walnut-brown near-Gem, this coin exhibits sweeping luster and smooth surfaces. Closer examination reveals orange and red color, primarily on the obverse. The shallow strike-throughs near the denomination are of mint origin, but deny an even finer grade. NGC ID# 2276, PCGS# 2016
- 3005 1857 MS64+ PCGS. CAC.** This high-end Choice specimen is well-detailed, with just a touch of softness on the wreath. The lightly marked copper-red surfaces are free of serious distractions, and show slightly subdued mint luster. NGC ID# 2276, PCGS# 2016
- 3006 1858 Large Letters MS64 PCGS.** Low Leaves Reverse. A thoroughly lustrous near-Gem. The obverse has apricot toning while the reverse is straw-gold. The reverse is unabraded and the obverse displays faint marks. NGC ID# 2277, PCGS# 2019
- 3007 1858 Small Letters MS63 PCGS.** High Leaves, Closed E in ONE. A moderately prooflike type coin with iridescent lime-green and rose-red toning. Nearly unabraded though the cotton leaves and the eagle's extremities are incompletely brought up. *From The Joan Carroll Collection.* NGC ID# 2279, PCGS# 2020
- 3008 1858 Small Letters MS64 PCGS.** Low Leaves Reverse. Open E in ONE. The scarcer reverse subtype of this plentiful final-year date. A sharply struck caramel-gold Choice cent with prevalent luster and a virtually mark-free appearance. *From The Searight Collection.* NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3009 1859 MS64 PCGS.** The obverse of this delightful Choice example is sharply detailed, but some softness is evident on the reverse wreath. The obverse displays light nickel-gray and pink patina, while the reverse shows hints of bronze and lavender. Both sides exhibit vibrant mint luster and ample eye appeal. *From The Searight Collection.* NGC ID# 227E, PCGS# 2052
- 3010 1859 MS64 PCGS.** Appealing wheat-gold color along with splashes of vibrant orange, plum, and ice-blue provide this near-Gem example with a strong degree of eye appeal. The coin exhibits a bold level of design detail. Very few abrasions are present and they are extremely minor. A few flyspecks of carbon are seen. This lovely coin has a nicer appearance than the grade might imply. *From The Strawberry Fields Collection.* NGC ID# 227E, PCGS# 2052

- 3011 1862 MS65 PCGS.** A pleasing Gem example of this collector favorite, the Indian Head cent was the primary coin used during the Civil War. This piece displays lovely caramel-gold color and is pristine aside from a small spot of as-made struck-in grease on the neck. The feather tips exhibit a minor incompleteness of strike. *From The Searight Collection.* NGC ID# 227H, PCGS# 2064
- 3012 1863 MS65 PCGS. CAC.** An amazing Gem with lovely pale violet toning on golden-olive surfaces. Satin luster accompanies sharp details on both sides. PCGS has only certified 41 finer examples (8/13). NGC ID# 227J, PCGS# 2067
- 3013 1864 L On Ribbon MS64 Red and Brown NGC.** Reddish-orange luster prevails at the margins and parts of the reverse interior, but the obverse's core is deep brown with a faint blue overtone. Overall, a pleasing example of this challenging variant. NGC ID# 227M, PCGS# 2080
- 3014 1867 MS64 Red PCGS.** The 1867 Indian cent is seldom encountered in high grade, with original red surfaces. This attractive Choice example exhibits well-detailed design elements and vibrant mint luster with outstanding eye appeal. Population: 66 in 64 Red, 22 finer (8/13). NGC ID# 227R, PCGS# 2090
- 3015 1869 MS64 Red PCGS. CAC. Snow-4.** The 69 in the date is lightly repunched north. The lower mintage 1869 cent is scarce in all grades. This fully red near-Gem displays bright orange-gold luster. Well struck and unabraded. A few minute flecks limit the numerical grade. Population: 42 in 64 Red, 34 finer (8/13). *Ex: Long Beach Signature (Heritage, 2/2010), lot 118, which realized \$2,530.* NGC ID# 227T, PCGS# 2096

1870 Cent, MS65 Red Scarce Semikey

- 3016 1870 MS65 Red PCGS.** Bold N in ONE. The low mintage 1870 cent has long been a semikey date. The present orange-red Gem is fully struck and unabraded with vibrant cartwheel luster. The high points exhibit slight mellowing to lilac, and we note a trace of carbon on the reverse border at 8:30. Population: 38 in 65 Red, 5 finer (8/13). NGC ID# 227U, PCGS# 2099
- 3017 1871 MS63 Red and Brown PCGS. FS-901.** Shallow N in ONE. This sharply detailed Select specimen displays mingled shades of original red, lilac, and crimson toning on the lightly marked surfaces. Traces of prooflike reflectivity linger in protected areas. NGC ID# 227V, PCGS# 2101
- 3018 1872 MS64 Red and Brown NGC.** Bold N. Olive-green, cherry-red, and straw-gold invigorate the obverse. The reverse is golden-brown, plum-mauve, and gunmetal-gray. A well struck near-Gem with vibrant luster and a smooth appearance. NGC ID# 227W, PCGS# 2104

3019 1875 MS65 Red and Brown PCGS. CAC. Rich orange and violet-brown shadings mingle on this Red and Brown Gem. Smooth luster and a four-diamond strike add to the eye appeal. Population: 96 in 65 (2 in 65+) Red and Brown, 3 finer (8/13). NGC ID# 2282, PCGS# 2122

3020 1877 Fine 15 PCGS. Die Pair 1, 18 just touch in date. A solid amount of deep detail remains on this chocolate-brown key date, with the diagnostic shallow N and reverse die clashing still visible even at this grade level. NGC ID# 2284, PCGS# 2127

3021 1877 — Environmental Damage — NGC Details. XF. Shallow N. The principally chocolate-brown surfaces are smooth aside from a couple of trivial obverse hairlines near 12 o'clock. The borders display a whisper of charcoal toning that is much consequential than implied by the NGC designation.
From The Joan Carroll Collection. NGC ID# 2284, PCGS# 2127

3022 1877 XF45 NGC. A striking streak of orange at the lower left obverse adds brightness to otherwise deep violet-brown surfaces. Lightly worn yet still well-defined with few serious abrasions. NGC ID# 2284, PCGS# 2127

3023 1877—Whizzed—NGC Details. AU. Shallow N. This momentarily circulated key date cent is recolored orange-gold and fire-red. The surfaces are minutely granular and exhibit a subdued satin sheen.
From The Joan Carroll Collection. NGC ID# 2284, PCGS# 2127

1877 Cent, AU55 A Cornerstone Specimen

3024 1877 AU55 PCGS. CAC. The collector who seeks to form a matched set of Choice AU Indian cents would do well to start with this specimen as the cornerstone piece and build the set from that beginning. Both sides have mark-free chocolate-brown surfaces with the expected trace of wear on the high points. NGC ID# 2284, PCGS# 2127

1877 Cent, Uncirculated Details

3025 1877 — Questionable Color — PCGS Genuine. Unc. Details. Shallow N. Though likely recolored, the present key date cent will satisfy many collectors. The obverse is lilac-red and orange. The reverse is peach-gold with a number of minute carbon flecks. The strike is sharp at the borders though the portrait is incompletely brought up. Marks are minimal aside from a faint abrasion on the neck.

3026 1886 Type Two MS64 Red and Brown PCGS. Lowest feather points between CA. More orange around the peripheries and brown on the high points, showing some die erosion at the margins that produces a pebbled effect. The strike is marginally weak in the central reverse. NGC ID# 228E, PCGS# 92155

3027 1888/7 — Damage — PCGS Genuine. VG Details. Snow-1, FS-301. The base of the 7 is evident beneath the left curve of the third 8. The diagnostic rim cud near the E in UNITED confirms the key variety. The peripheral legends are bold on this mildly luminous olive-green and walnut-tan cent. Distributed moderate marks are strictly assessed by PCGS. NGC ID# 228G, PCGS# 2169

1889 Cent, MS65 Red Conditionally Scarce

3028 1889 MS65 Red PCGS. As with other dates of this era, the 1889 Indian cent was a workhorse coin in the channels of commerce. Consequently, high-grade specimens survived only by chance. The Red Gem offering in this lot is one of the lucky survivors. Both sides are awash in copper-orange luster, and the design elements are sharply struck. A minute toning spot in the lower-right reverse margin is mentioned for complete accuracy, as well as a rim-to-rim die crack on the obverse. Housed in a prior generation holder. Population: 34 in 65 Red, 7 finer (8/13). NGC ID# 228H, PCGS# 2174

3029 1890 MS66 Red and Brown PCGS. Even a quick glance at this Premium Gem reveals the lovely eye appeal this piece possesses. The obverse displays attractive orange color, with small splashes of darker hues at the outer edges. The reverse is particularly appealing, with splashes of orange, red, and pink also appearing. A lovely, well struck coin. This is the sole PCGS-graded Red and Brown example in MS66, with none finer (8/13). NGC ID# 228J, PCGS# 2176

1894 Doubled Date Cent, MS65 Brown FS-301, Guide Book Variety

3030 1894 Doubled Date MS65 Brown PCGS. CAC. Snow-1, FS-301. One of the most dramatic repunched date varieties in the Indian cent series, FS-301 is listed in the *Guide Book* with a considerable premium over its normal date counterpart. The date logotype was initially entered with a steep upward slant, then corrected. This nicely struck Gem offers coruscating luster and unabraded surfaces. Apple-green, orange-red, and gunmetal-blue toning contributes further to the eye appeal. PCGS# 92187

3031 1894 MS66 Red and Brown PCGS. The reverse in particular exhibits gorgeous, blazing orange-red surfaces. This lovely Premium Gem exhibits a bold strike and pleasing luster. The few abrasions present are minor and not worthy of individual mention. A few tiny flyspecks of carbon appear. This is a wonderful coin with this color designation, as it has no rivals at PCGS. Population: 1 in 66 Red and Brown, 0 finer (8/13). NGC ID# 228N, PCGS# 2188

- 3032 1895 MS66 Red PCGS.** Gorgeous copper-orange color provides this satiny lustrous coin with strong visual appeal. A few tiny marks on the jawbone provide little distraction, if any. This is a wonderful example. Population: 38 in 66 (1 in 66+) Red, 3 finer (8/13). NGC ID# 228P, PCGS# 2192
- 3033 1897 MS65+ Red PCGS. CAC.** A few trivial carbon flecks are visible in the fields of this brilliant pale orange Gem. The design motifs are virtually full and only show slight weakness at the reverse periphery. Population: 54 in 65+ Red, 16 finer (8/13). NGC ID# 228S, PCGS# 2198
- 3034 1899 MS66 Red PCGS.** Rich orange luster rolls across each side of this Red Premium Gem. The strike is four-diamond and only the smallest flyspecks are visible. Population: 87 in 66 (1 in 66+) Red, 12 finer (8/13). NGC ID# 228U, PCGS# 2204
- 3035 1903 MS66 Red PCGS.** Cherry-red and olive-gold endow this lustrous and boldly struck high grade type coin. Marks are nearly absent, and a loupe reveals only a few pinpoint flecks. Certified in a green label holder. NGC ID# 228Y, PCGS# 2216
- 3036 1903 MS66 Red PCGS. CAC.** A gorgeous peach-red Premium Gem that boasts booming luster and no evidence of contact. Infrequent tiny specks are all that preclude perfection. Certified in a green label holder. Population: 72 in 66 (3 in 66+) Red, 5 finer (8/13). NGC ID# 228Y, PCGS# 2216

**1903 Cent, MS67 ★ Red
Among the Finest Certified**

- 3037 1903 MS67 ★ Red NGC.** Booming luster and an exemplary strike proclaim the quality of this splendid Superb Gem. Generally peach-red, although the centers have hints of aqua-blue. Nearly pristine save for a few pinpoint flecks in the date area. Census: 2 in 67 ★ Red, none finer (8/13).
Ex: St. Louis Central States (Heritage, 5/2007), lot 1131, which realized \$6,325. NGC ID# 228Y, PCGS# 2216

**1908-S Cent, MS66 Red
First-Year S-Mint Cent**

- 3038 1908-S MS66 Red NGC.** A primarily pumpkin-gold Premium Gem of this popular and low-mintage introductory branch mint issue. The strike is crisp aside from blending on the uppermost feather tips, as always. A few small areas of sea-green or light russet are noted on the obverse field. Certified in a prior generation holder. Census: 24 in 66 Red, none finer (8/13).
Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 187. NGC ID# 2296, PCGS# 2234

- 3039 1909 MS65+ Red PCGS. CAC.** Gorgeous pumpkin-gold color and shimmering luster provide this high-end Gem with a tremendous degree of eye appeal. A few small splashes of violet and purple color appear near the bottom of the wreath. There are very few abrasions and they are inconsequential. A few tiny flecks of carbon are present. NGC ID# 2297, PCGS# 2237
- 3040 1909-S MS63 Red and Brown PCGS.** Shades of lilac and light brown toning mix with the original red on the lustrous surfaces of this well-detailed Select example. The 1909-S is a low-mintage key and the final date of the series. NGC ID# 2298, PCGS# 2239
- 3041 1909-S MS64 Red and Brown PCGS. CAC.** Tiny splashes of gold, wheat, and russet intermingle on both sides of this near-Gem, providing an attractive appearance. The design elements are generally well impressed on this key-date representative. Only a couple of tiny abrasions are present. NGC ID# 2298, PCGS# 2239
- 3042 1909-S MS64 Red and Brown PCGS. CAC.** From a low final-year mintage of just 309,000 pieces, the 1909-S Indian cent is a key date in the series. This well-detailed Choice example is brightly lustrous with mixed original red and light brown patina. NGC ID# 2298, PCGS# 2239
- 3043 1909-S MS65 Red and Brown PCGS. CAC.** The first of three 1909-S cent varieties for the year, the Indian actually has a lower mintage than the more famous VDB Lincoln. Copper-orange and mahogany overtones account for the Red and Brown designation. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

- 3044 1862 PR64 Cameo PCGS. CAC.** Eagle Eye Photo Seal, card not included. A satiny and needle-sharp Cameo near-Gem whose butter-gold surfaces display a few faint gray obverse flecks. A scant proof mintage of 550 pieces. PCGS# 82259

**1862 Indian Cent, PR66 Cameo
Popular Copper-Nickel Date**

- 3045 1862 PR66 Cameo NGC.** From a mintage of 550 pieces, the 1862 proof Indian cent is an available date in lower grades, but PR66 Cameo coins are elusive. The present coin possesses brightly reflective, orange fields, with sharply impressed, frosty devices. Census: 19 in 66 Cameo, 7 finer (8/13). PCGS# 82259

1862 Cent, PR66 ★ Cameo
Rare with Star Designation

- 3046 1862 PR66 ★ Cameo NGC.** A butter-gold Civil War specimen with flashy fields and an intricate strike. Carbon is minimal, though we note faint field marks near the T in UNITED and the F in OF. A scant 550 proofs were produced. Census: 2 in 66 ★ Cameo, none finer with a Star designation (8/13). PCGS# 82259

1864 Indian Cent, PR63 Ultra Cameo
Copper-Nickel Type

- 3047 1864 Copper Nickel PR63 Ultra Cameo NGC.** Despite the presence of a few faint hairlines and trivial contact marks, this sensational Indian cent presents amazing eye appeal through its iridescent toning over the light tan surfaces. The devices are fully lustrous within a deeply mirrored frame. Census: 1 in 63 Ultra Cameo, 6 finer (8/13). PCGS# 92265

1866 Cent, PR65 Cameo
Exceptional Color and Contrast

- 3048 1866 PR65 Cameo PCGS.** Orange-gold fields surround olive-tinted devices and legends. This fully struck Gem has unmarked surfaces, and only a solitary fleck atop the shield precludes an even finer grade. The fields are exceptionally deep and provide excellent background for the noticeably frosted devices. Just 725+ proofs were struck. Population: 8 in 65 Cameo, 3 finer (8/13).
Ex: FUN Signature (Heritage, 1/2007), lot 577.
From The Searight Collection. PCGS# 82287

- 3049 1867 PR64 Red NGC.** A needle sharp specimen with a reddish-golden appearance overall. Only a small percentage of proofs from this year have survived in a Choice, relatively unblemished state of preservation. Census: 11 in 64 Red, 17 finer (8/13).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5174. NGC ID# 229K, PCGS# 2290

- 3050 1870 PR64 Cameo PCGS.** The design elements of this attractive Choice specimen are sharply detailed throughout and the original red surfaces are deeply mirrored, contrasting boldly with the frosty devices. Population: 6 in 64 Cameo, 3 finer (8/13). PCGS# 82299

1880 Cent, PR66 Red
Fully Struck

- 3051 1880 PR66 Red PCGS. CAC.** Proof Indian cents are readily collectible but most have lost their initial mint red over the past 100 to 150 years. The present specimen is an exception, since its orange-gold color is undiminished. In addition, the strike is intricate. We note only a tiny spot above the T in CENT. Housed in an old green label holder. NGC ID# 229Z, PCGS# 2329

1880 Cent, Lovely PR66 Red Cameo
Snow-PR1 Variety With Defective Date

- 3052 1880 PR66 Red Cameo NGC. Snow-PR1.** This interesting variety shows a defective date punch with broken 8s over regular 8s; this same die was later used to coin business strikes. This splendid Cameo proof Gem shows sharply contrasting devices against the deeply mirrored fields. Even red color dominates the surfaces of this high-end example. Fantastic eye appeal. Census: 1 in 66 Cameo, 1 finer (8/13). PCGS# 82329

- 3053 1882 PR65 Red PCGS.** Gorgeous shades of color emanate from this brilliant Gem and include brilliant straw-gold, sunset-orange, and fiery red. Small carbon flecks appear near the center of the reverse. The coin exhibits a bold strike and has tremendous eye appeal. Population: 18 in 65 Red, 18 finer (8/13). NGC ID# 22A3, PCGS# 2335

1885 Indian Cent, PR68 Brown
Tied With One Other for Finest Known

3054 1885 PR68 Brown NGC. A coin with an extraordinary degree of eye appeal, this piece exhibits unimprovable quality for a proof 1885 cent with this color designation. The surfaces display a glossy-brown sheen with a rich steel-blue patina covering almost the entire coin. Splashes of rich pink appear in the headdress. The lower reverse border reveals a swath of crimson color. This example shows an exacting strike, with all of the design elements displaying bold detail. The only mark is a tiny area above the E in ONE and it is as-made. A minuscule copper spot appears near the front of the headdress. The Population has not changed in the almost twelve years since we offered this coin in Long Beach, remaining at 2 in 68, 0 finer (8/13).

Ex: Long Beach Signature (Heritage, 10/2001), lot 5379. NGC ID# 22A6, PCGS# 2342

3055 1885 PR66 Red and Brown PCGS. CAC. Peach-gold satin luster dominates this needle-sharp high grade specimen. Slightly mellowed on the cheek and left reverse border, all that precludes a full Red assessment. Housed in an old green label holder. NGC ID# 22A6, PCGS# 2343

3056 1894 PR66 Red PCGS. From left to right, the obverse displays honey-gold, lime-green, and cherry-red. The reverse has similar shades though only the right margin is green. Housed in an old green label holder. NGC ID# 22AG, PCGS# 2371

3057 1895 PR65 Red PCGS. Both sides of this Gem display tremendous eye appeal. The gorgeous coloring includes rich yellow-gold with accents of rose, pink, and red. A few tiny flecks of carbon are present. Population: 28 in 65 Red, 18 finer (8/13). NGC ID# 22AH, PCGS# 2374

3058 1897 PR65 Red NGC. Even a quick glance at this Gem reveals what a beauty it is. Fiery orange color predominates, with tiny splashes of violet, dark powder-blue, plum, and teal also appearing on this brilliant and flashy piece. A retained lamination is present near the U in UNITED. Census: 8 in 65 Red, 2 finer (8/13). NGC ID# 22AK, PCGS# 2380

3059 1899 PR66 Red and Brown PCGS. CAC. The gleaming obverse has bold peach and magenta shadings, while the reverse is more low-key and tends toward violet. An attractive Premium Gem proof. Population: 37 in 66 (1 in 66+) Red and Brown, 6 finer (8/13). NGC ID# 22AM, PCGS# 2385

3060 1906 PR66 Red and Brown Cameo NGC. CAC. The olive-gold motifs indeed exhibit impressive cameo contrast with the minimally mellowed apricot-gold and fire-red fields. Very close to a full Red designation. Fully struck and flashy with occasional pinpoint flecks. NGC ID# 22AV, PCGS# 2406

3061 1909 PR66 Red PCGS. The lower obverse and central reverse are butter-gold, and the remainder of this final year Indian cent is ruby-red. Precisely struck and flashy with one minor spot confined to the field between the CE in CENT. Housed in a green label holder. Population: 14 in 66 Red, 2 finer (8/13). NGC ID# 22AY, PCGS# 2416

LINCOLN CENTS

3062 1909 VDB Doubled Die Obverse, DDO-002 MS66 Red PCGS. CAC. FS-1102. A delightful Premium Gem example of this popular doubled-die obverse, with the doubling most evident on the letters of LIBERTY and the date. This well-detailed specimen offers vibrant mint luster and blazing original red surfaces. PCGS# 37636

3063 1909 VDB Doubled Die Obverse, DDO-002 MS66+ Red PCGS. CAC. FS-1102. This high-end Premium Gem exhibits marked thickening on the letters of LIBERTY and a die chip shows in the loop of the R, identifying the popular doubled-die obverse FS-1102. Well-detailed and lustrous, this coin offers original red surfaces with no sign of carbon. PCGS# 37636

3064 1909-S VDB XF40 PCGS. A midgrade specimen of this important key date, with light brown surfaces that show hints of original red color. The design elements retain most of their original detail and the fields are lightly abraded. NGC ID# 22B2, PCGS# 2426

3065 1909-S VDB AU50 NGC. A problem-free representative of this famous key date. Medium-brown surfaces show glimpses of lighter gold. Modest wear on the portrait is consistent with the grade. *Ex: Dallas Signature (Heritage, 11/2007), lot 126. NGC ID# 22B2, PCGS# 2426*

3066 1909-S VDB — Scratched — PCGS Genuine. Unc. Details. Two straight horizontal pinscratches, one above the date and the other above Lincoln's neck, correspond to the PCGS notation. The sharply struck and lustrous peach-red and steel-gray surfaces are void of other detractors. NGC ID# 22B2, PCGS# 2426

3067 1909-S VDB — Improperly Cleaned — NGC Details. Unc. This sharply struck and lustrous key date cent is likely recolored, but the wheat-gold and lavender surfaces are nonetheless attractive. *From The Joan Carroll Collection.*

3068 1909-S VDB MS62 Brown PCGS. Considerable amounts of mint luster and original red color show on the technically brown surfaces of this sharply detailed Lincoln cent. Only minor signs of contact are evident, with no trace of carbon. NGC ID# 22B2, PCGS# 2426

3069 1909-S VDB MS62 Brown PCGS. Golden-wheat color, along with hints of pale green, yellow, and orange, adds to the visual appeal of this example on both sides. The strike is pleasing, with only minor incompleteness present at the V.D.B. initials. A few hair thin marks on both sides along with a few minor abrasions on Lincoln's face held this lovely piece from a higher grade. NGC ID# 22B2, PCGS# 2426

3070 1909-S VDB MS63 Brown PCGS. Light golden-brown and tan color overall with subtle glimmers of muted orange visible on the reverse. A well-defined and pleasing example of this famous Lincoln cent key. *Ex: Long Beach Signature (Heritage, 9/2009), lot 156. NGC ID# 22B2, PCGS# 2426*

3071 1909-S VDB MS64 Brown PCGS. CAC. The glossy light brown surfaces of this sharply detailed Choice specimen retain traces of original red color and bright mint luster. A few microscopic specks of carbon show on the reverse. NGC ID# 22B2, PCGS# 2426

3072 1909-S VDB MS63 Red and Brown PCGS. The design elements of this important key issue are well-detailed and the surfaces exhibit elements of light brown and original red patina, with a few minuscule specks of carbon. NGC ID# 22B2, PCGS# 2427

3073 1909-S VDB MS64 Red and Brown NGC. Large areas of fiery orange color are present on the obverse while the reverse includes shades of red-orange, fiery orange, and hints of green. Small scattered carbon spots are present. Other than a diagonal mark between the C and E in CENTS, the few abrasions present are not noteworthy. NGC ID# 22B2, PCGS# 2427

3074 1909-S VDB MS64 Red and Brown PCGS. A sharply detailed Choice example of this famous Lincoln cent, with lightly marked surfaces that show a mix of original red and light brown patina, with a few microscopic specks of carbon on the reverse. NGC ID# 22B2, PCGS# 2427

3075 1909-S VDB MS64 Red and Brown PCGS. A pleasing Choice specimen of this low-mintage key, with sharply detailed design elements and traces of mint luster. The surfaces display a mix of light brown and original red toning. NGC ID# 22B2, PCGS# 2427

3076 1909-S VDB MS64 Red and Brown PCGS. The lustrous surfaces of this first-year key show a mix of original red and light brown patina, with only minor signs of contact. The design elements are sharply rendered and the designer's initials are bold. NGC ID# 22B2, PCGS# 2427

3077 1909-S VDB MS64 Red and Brown PCGS. A mix of original red and light brown patina blankets the surfaces of this attractive Choice specimen, with sharply detailed design elements and significant traces of mint luster. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown Bright Mint Frost

3078 1909-S VDB MS65 Red and Brown NGC. Hints of light blue patina resided on the mellow orange surfaces of this boldly detailed 1909-S VDB cent, one of the most famous 20th century numismatic issues. This Gem is fully lustrous with satiny surfaces and it is devoid of the pesky carbon flecks that are usually found on these coins. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown Spectacular Multicolor Toning

3079 1909-S VDB MS65 Red and Brown PCGS. Gorgeous toning in shades of plum, violet, denim-blue, electric-blue, and rich golden-yellow provides this Gem with a tremendous degree of eye appeal. The piece displays strong details, including the V.D.B. initials. Very few abrasions are present and they are minor in nature. A truly wonderful coin. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent MS65 Red and Brown

3080 1909-S VDB MS65 Red and Brown NGC. An orange-gold and lime-green Gem. Precisely struck and nearly mark-free with only minor carbon. Victor D. Brenner's initials on the lower reverse were deemed too prominent shortly after issue, and were removed from the dies of cents struck later that year. After the death of Chief Engraver Barber, the initials returned to the cent, though less conspicuously located on the bust truncation. Certified in a former generation holder. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown Famous Lincoln Key

3081 1909-S VDB MS65 Red and Brown PCGS. A few splashes of light olive toning appear on the reverse, with a single noticeable spot over the second Tin STATES on otherwise pristine coppery-orange surfaces. This Gem has bold design elements and excellent eye appeal. The current sale provides ample opportunities for collectors to acquire this famous key Lincoln cent. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent MS65 Red and Brown

3082 1909-S VDB MS65 Red and Brown PCGS. Though protected areas are orange-red, the open fields and motifs are brown. The strike is bold, especially on the VDB initials, which are sometimes indistinct. The 1909-S VDB has been a want list favorite for generations of cent collectors. Certified in an old green label holder. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Gorgeous Iridescent Toning**

- 3083 1909-S VDB MS65 Red and Brown PCGS.** Rich, streaky shades of crimson-magenta, gunmetal-blue, and tan-brown collide on each side of this otherwise unspotted Gem example. Well defined overall with no mentionable carbon or abrasions. A “must-see” example for the toning enthusiast, made that much more desirable by its key date status.. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Attractively Toned**

- 3084 1909-S VDB MS65 Red and Brown PCGS. CAC.** Scattered splashes of pink and bright yellow-gold color add to the eye appeal of the obverse on this lovely well-struck Gem. The reverse displays attractive deep wheat-gold color with accents of red, ice-green, and orange. A dark spot appears on the bridge of Lincoln’s nose and a few flyspecks of carbon are present. PCGS has awarded higher numeric grades to only 32 examples in this color designation (8/13). NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Only Slightly Mellowed Color**

- 3085 1909-S VDB MS65 Red and Brown PCGS. CAC.** The brilliant orange mint surfaces of this frosty and sharply struck Gem exhibit slight mellowing that precludes a full Red designation to this lovely Gem. Ideal for the collector who seeks a high quality representative with the associated price savings of the Red and Brown designation. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Delicate Olive Toning**

- 3086 1909-S VDB MS65 Red and Brown PCGS. CAC.** All aspects of this impressive Gem exhibit bold design motifs and the surfaces display brilliant orange and gold mint color with frosty luster. Traces of pale olive-brown toning prevent assignment of the Red color designation to this beauty. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, Gem Red and Brown

- 3087 1909-S VDB MS65 Red and Brown NGC. CAC.** Sun-gold lingers in design recesses while the open fields are olive-brown. Well struck and thoroughly lustrous. The VDB initials are crisp. Void of contact aside from a small tick on the field near the nose. Though the low mintage issue was hoarded upon issue, demand for examples has long been insatiable. Housed in a prior generation holder. NGC ID# 22B2, PCGS# 2427

- 3088 1909-S VDB MS63 Red PCGS.** Brass-yellow and copper-orange shadings with scattered flyspecks but no truly “Brown” shadings. This Select Red example will make a fitting cap for a similarly graded set of Lincoln cents. NGC ID# 22B2, PCGS# 2428

- 3089 1909-S VDB MS64 Red PCGS.** A well-detailed Choice example of this famous key, with bold designer’s initials and softly frosted mint luster. The original red surfaces show only minor signs of contact. NGC ID# 22B2, PCGS# 2428

- 3090 1909-S VDB MS64 Red PCGS.** Both sides of this lovely near-Gem example display variegated surfaces that include shades of gold and deep orange providing the coin with a very attractive appearance. The coin exhibits a well executed strike aside from minor softness on the VDB initials. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS64+ Red
A Beautiful Near-Gem Specimen**

- 3091 1909-S VDB MS64+ Red PCGS.** Don't expect to buy this beauty at the MS64 price guide levels, as this fiery orange key-date cent will likely bring closer to "MS65 money." This near-Gem exhibits brilliant orange mint luster and only a few scattered spots on each side. A splendid specimen. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS64 Red
Sharp Design Motifs**

- 3092 1909-S VDB MS64 Red PCGS. CAC.** A sharply defined example of this famous and important first-year Lincoln cent, this piece has brilliant gold and orange mint color with frosty luster that combines to present exceptional eye appeal. Full Red examples are always in high demand. NGC ID# 22B2, PCGS# 2428

**MS65 Red 1909-S VDB Cent
Strong V.D.B. Initials**

- 3093 1909-S VDB MS65 Red PCGS.** All of the design motifs, including the V.D.B. initials, are sharply detailed on this gorgeous Gem. Both sides are frosty with brilliant orange luster showing minimal spots are trivial surface marks. An excellent candidate for the advanced Registry collector. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red
Bold Central Details**

- 3094 1909-S VDB MS65 Red PCGS.** Although the V.D.B. initials are a trifle weak, the design features of this fiery red Gem are boldly defined. Hints of plum and rose add to the eye appeal, and the trivial spots fail to diminish the overall appearance of this impressive specimen. NGC ID# 22B2, PCGS# 2428

- 3095 1909-S MS66 Red PCGS.** The 1909-S Lincoln cent without VDB is popular at the Gem level and still obtainable for a price at the Premium Gem level, although that is as good as it gets for most collectors, unless they want to vie for the tiny handful of MS67 Red specimens certified. This MS66 Red piece proffers bold eye appeal, with mellow sunset-orange surfaces accented by hints of olive on the obverse and cherry-red at the lower reverse. There is no hint of carbon or contact, and the strike is essentially full. PCGS has graded four numerically finer examples (7/13). NGC ID# 22B4, PCGS# 2434

**1909-S Lincoln Cent, MS66 Red
Only Four Finer at PCGS**

- 3096 1909-S MS66 Red PCGS. CAC.** This Premium Gem is an outstanding example with fully brilliant yellow-orange mint luster and precise design details on both sides. Microscopic toning spots are mostly limited to the obverse of this attractive cent. PCGS has only certified four finer Red examples (8/13). NGC ID# 22B4, PCGS# 2434

- 3097 1911-D MS65 Red PCGS.** Despite a circulation mintage of 12,672,000, Mint State survivors are seldom encountered, with PCGS having assigned higher numeric grades to only 21 examples (3/13). This Gem is well-struck and impressively preserved, displaying even color on both sides along with satiny, slightly granular surfaces. The piece was struck from slightly rotated dies. A few tiny flyspecks are scattered over the upper obverse and a few minor abrasions are present.
Ex: Long Beach Signature (Heritage, 9/2003), lot 5624. NGC ID# 22B8, PCGS# 2446

- 3098 1913 MS66 Red PCGS.** Magnificent pumpkin-gold color along with small splashes of red provides attractive eye appeal for this early Lincoln cent, with the obverse being particularly pleasing. Tiny carbon spots are present on the reverse along with a portion of a faint fingerprint at the stem of the right wheat ear. Population: 63 in 66 Red, 6 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2009), lot 168, which realized \$2,070. NGC ID# 22BD, PCGS# 2461

3099 1913-S MS64+ Red PCGS. This issue of just over 6.1 million pieces is surprisingly elusive in Mint State. This softly struck example has gently rolling apricot luster with flyspecks at the right reverse. PCGS has graded only 49 pieces as MS65 Red or finer (8/13). NGC ID# 22BF, PCGS# 2467

3100 1914-D AU50 NGC. A lightly circulated example of this popular key, with pleasing medium brown surfaces that show only minor abrasions and no trace of carbon. From a low mintage of 1.1 million pieces. NGC ID# 22BH, PCGS# 2471

1914-D Lincoln Cent, MS63 Brown Low-Mintage Key

3101 1914-D MS63 Brown NGC. Glossy dark brown surfaces exhibit splashes of blue toning and traces of faded red mint color on both sides of this pleasing Denver Mint rarity. This Select Mint State piece has weak details on the cheek and beard, with bold design elements elsewhere. NGC ID# 22BH, PCGS# 2471

1914-D Cent, MS63 Red and Brown Elusive Denver Issue

3102 1914-D MS63 Red and Brown PCGS. An elusive Denver Mint issue, the 1914-D is the rarest Lincoln cent from that mint. This Select Mint State piece has trivial splashes of dark bluish-brown toning on the obverse resembling a flock of birds flying through the field. The reverse toning resembles a fingerprint. NGC ID# 22BH, PCGS# 2472

3103 1914-S MS64 Red PCGS. Lustrous medium orange surfaces display otherwise sharp striking detail that softens a little in select areas toward the rims. There are a few swirls of variegated color over the upper left obverse, these perhaps explaining this coin's failure to secure an even higher grade.
Ex: Central States Signature (Heritage, 4/2001), lot 5858; Central States Signature (Heritage, 5/2003), lot 5468. NGC ID# 22BJ, PCGS# 2476

1914-S Lincoln Cent, MS64+ Red Outstanding Eye Appeal

3104 1914-S MS64+ Red PCGS. CAC. Gorgeous bright fiery-orange color covers most of the obverse, creating outstanding eye appeal for this near-Gem representative. Although not quite as spectacular, the reverse is pleasing as well with attractive shades of orange and a hint of red. Aside from the top of the O in ONE, this coin exhibits a strong degree of detail. Population: 1 in 64+ Red, 35 finer (8/13). NGC ID# 22BJ, PCGS# 2476

3105 1915-D MS65 Red PCGS. The well-preserved original red surfaces of this delightful Gem show no mentionable distractions and just a few microscopic specks of carbon on the reverse. The design elements are sharply detailed throughout. PCGS has certified 23 examples as MS66 Red or better (8/13). NGC ID# 22BL, PCGS# 2482

3106 1915-S MS64 Red and Brown PCGS. A needle-sharp strike and vibrant luster combine with mark-free surfaces to ensure the eye appeal. Deeply variegated brick-red and orange. One minor spot on the ME in AMERICA. Encapsulated in an old green label holder. NGC ID# 22BM, PCGS# 2484

1917-S Cent, MS64+ Important Condition Rarity

3107 1917-S MS64+ Red PCGS. Hints of delicate bluish toning appears on the brilliant orange surfaces of this frosty near-Gem. Both sides are fully lustrous with only trivial marks and spots of no consequence. This is an important condition rarity in the Lincoln cent series. Population: 59 in 64+ Red, 17 finer (8/13). NGC ID# 22BU, PCGS# 2503

**1918-D Cent, MS65 Red
First Generation Holder**

- 3108 1918-D MS65 Red PCGS.** The 1918-D, like its sibling 1918-S, is very rare at the Gem Red level. This lovely piece shows radiant luster over orange-gold surfaces. The strike is sharp, particularly on Lincoln's shoulder and the O in ONE, though the right reverse border exhibits moderate die wear. Certified in a first generation holder. Population: 27 in 65 Red, 7 finer (8/13).
Ex: Brenda John Collection (Heritage, 6/2010), lot 123, which realized \$4,312.50. NGC ID# 22BW, PCGS# 2509

- 3109 1918-S MS65 Red and Brown PCGS.** Generally fire-red though blushes of apple-green visit the obverse margin and much of the reverse. Lustrous and nicely struck with smooth fields and a faint hair-thin line on the cheek. Certified in an old green label holder. NGC ID# 22BX, PCGS# 2511

- 3110 1919 MS67 Red PCGS. CAC.** A Lincoln cent of rare beauty, this Superb Gem combines pale yellow-gold luster with deeper reddish-orange toning. The pristine surfaces show a few trivial carbon flecks of no consequence. Population: 61 in 67 (1 in 67+) Red, 15 finer (8/13). NGC ID# 22BY, PCGS# 2515

- 3111 1921-S MS65 Red and Brown PCGS.** A gorgeous, unabraded Gem that exhibits a crisp strike and glossy walnut-brown and lilac surfaces. A challenging branch mint issue. Encased in an old green label holder. NGC ID# 22C7, PCGS# 2535

- 3112 1921-S MS64 Red NGC.** The 1921-S is among the scarcest Lincoln issues in full Red. However, the present near-Gem retains its initial fire-red and sun-gold wood-grain color. The right obverse field displays faint marks, and the lower reverse has minor laminations. Encased in a former generation holder. Census: 24 in 64 Red, 3 finer (8/13). NGC ID# 22C7, PCGS# 2536

- 3113 1922 No D Strong Reverse VF30 PCGS. FS-401. Die Pair 2.** A golden-brown key date cent with pleasing sharpness on the wheat ears. TRUST and the second 2 in the date are sharp, characteristic of the famous variety. The fields are smooth though a slender diagonal mark is above the ear. NGC ID# 22C9, PCGS# 3285

- 3114 1922 No D Strong Reverse VF30 NGC. FS-401. Die Pair 2.** Clear lines within the wheat ears and a sharp second 2 in the date confirm the key No D variety. A lightly abraded example with mauve, rose, and aqua undertones across deep brown surfaces. NGC ID# 22C9, PCGS# 3285

- 3115 1922 No D Strong Reverse VF35 ANACS. FS-401. Die Pair 2.** A deep golden-brown representative of the popular lapped die mint error. The wheat ears are sharp though Lincoln's cheekbone is worn, characteristic of middle-grade examples of the *Guide Book* variety. The left obverse field displays minor gray verdigris. NGC ID# 22C9, PCGS# 3285

- 3116 1922 No D Strong Reverse XF40 NGC. FS-401. Die Pair 2.** Olive-green and medium brown compete for territory, with the former most prevalent on the obverse, and the latter dominating the reverse. No marks are of any import, and the eye appeal is attractive.
Ex: Dallas Signature (Heritage, 11/2007), lot 153; Paul J. Seaton Collection (Heritage, 1/2012), lot 4353. NGC ID# 22C9, PCGS# 3285

**1922 No D Cent, AU53
Strong Reverse, FS-401**

- 3117 1922 No D Strong Reverse AU53 NGC. FS-401. Die Pair 2.** Ideal for the grade, this chocolate-born cent is without any carbon or mentionable marks. TRUST and the 22 in the date are sharp, as is the LIB in LIBERTY, characteristics of better grade examples of the famous key variety. The Philadelphia Mint failed to strike cents in 1922 since the facility was too busy coining silver dollars. But the Denver mintmark was inadvertently lapped away late during one die's life, creating the present rarity. NGC ID# 22C9, PCGS# 3285

- 3118 1924-D MS65 Red and Brown PCGS. CAC.** This delightful Gem Lincoln cent displays well-detailed design elements and vibrant mint luster, with original red surfaces that show a few hints of light brown toning. Population: 25 in 65 Red and Brown, 0 finer (8/13). NGC ID# 22CD, PCGS# 2553

- 3119 1925 MS67 Red PCGS.** A sharply detailed Superb Gem, with blazing mint luster, original red surfaces, and terrific eye appeal. No trace of carbon is evident. Population: 58 in 67 Red, 0 finer (7/13). NGC ID# 22CF, PCGS# 2560

- 3120 1926-S MS64 Red and Brown PCGS.** Considerable original red mint luster remains on both sides of this piece, blended with rich chocolate-brown and blue toning on each side along with hints of lilac and cherry-red. This near-Gem exhibits a pleasing level of design detail. A few scattered marks are present, primarily on the reverse. PCGS has awarded higher numeric grades to only 14 examples (8/13). NGC ID# 22CL, PCGS# 2574

- 3121 1929 MS67 Red PCGS. CAC.** Magnificent peach-gold color ensures the eye appeal of this carbon-free and precisely struck Superb Gem. The sole imperfection is trivial abrasion near AMERICA. Population: 51 in 67 Red, 0 finer (8/13). NGC ID# 22CU, PCGS# 2596

**1931 Lincoln Cent, MS67 Red
Among the Finest Certified**

- 3122 1931 MS67 Red NGC.** A beautiful Superb Gem, this piece displays attractive yellow color primarily, with areas of golden-orange and cherry-red color at the obverse peripheries. The outer edges of the reverse are particularly lovely and include hues of cherry-red, fuchsia, apple-green, denim-blue, and violet. The coin is well struck and exhibits only a few scattered minor abrasions. A whisper of carbon is present on the lower left obverse. Extraordinary quality for this lower mintage issue. Census: 10 in 67 Red, 0 finer (8/13).
Ex: FUN Signature (Heritage, 1/2009), lot 503. NGC ID# 22D2, PCGS# 2614

- 3123 1935-S MS66+ Red PCGS. CAC.** Fresh apricot-gold luster is largely uniform on the obverse but shows streaks on the reverse. Detail is pleasing by the standards of this often-weak issue. PCGS has graded just seven pieces as MS67 Red or finer (8/13). NGC ID# 22DD, PCGS# 2647
- 3124 1948-D MS67 Red PCGS. CAC.** Vibrant orange color and rich luster provide this piece with outstanding eye appeal. A thin die crack appears in Lincoln's hair. Population: 48 in 67 Red, 0 finer (8/13). NGC ID# 22ET, PCGS# 2764
- 3125 1950-D MS67 Red PCGS.** Blazing red-orange color and rich luster provide this piece with a tremendous level of eye appeal. A few small translucent spots are present and include hints of green and blue. The strong level of design detail adds to the attractiveness. Both sides reveal a few tiny abrasions. Population: 34 in 67 (1 in 67+) Red, 0 finer (8/13). NGC ID# 22EZ, PCGS# 2782
- 3126 1954 MS66+ Red PCGS. CAC.** Coruscating luster and rich orange-red color are present on this Premium Gem. As the plus designation indicates, this coin has strong visual appeal. The coin exhibits minor incompleteness of strike, as is generally the case with this issue. Population: 5 in 66+ Red, 3 finer (8/13). NGC ID# 22FC, PCGS# 2815
- 3127 1954-D MS67 Red PCGS. CAC.** Vibrant orange-red color and rich luster produce tremendous visual appeal for this Superb Gem. A few minuscule carbon spots are present. Population: 48 in 67 Red, 0 finer (8/13). NGC ID# 22FD, PCGS# 2818
- 3128 1955 Doubled Die Obverse — Corroded — ANACS. Unc. Details, Net AU50. FS-101.** Toned mahogany-brown overall with olive-gold high points. This example is minimally abraded but the wood-grain surfaces have a matte appearance from environmental exposure. NGC ID# 22FG, PCGS# 2825
- 3129 1955 Doubled Die Obverse AU55 PCGS. CAC. FS-101.** A medium brown key date cent with minimal high point wear and noticeable mint gloss. Each side has a few slender marks. The strongest doubled die variety of the Lincoln series. NGC ID# 22FG, PCGS# 2825
- 3130 1955 Doubled Die Obverse AU58 NGC. FS-101.** A coruscating golden-brown and sea-green example of this famous and blatantly die doubled variety. Sharply struck and lightly abraded with a fingerprint trace on the upper right obverse field. *From The Joan Carroll Collection.* NGC ID# 22FG, PCGS# 2825
- 3131 1955 Doubled Die Obverse AU58 ANACS. FS-101.** A glossy deep chocolate-brown example of this legendary mint error, the strongest doubled die of the small cent denomination. Devoid of spots, and each side has only a few unimportant marks. NGC ID# 22FG, PCGS# 2825
- 3132 1955 Doubled Die Obverse AU58 PCGS. CAC. FS-101.** This lustrous near-Mint key date cent is well struck. The medium brown surfaces are smooth aside from a few small marks on the right obverse field and a small number of minute flecks on the portrait. *Ex: Long Beach Signature (Heritage, 9/2009), lot 201, which realized \$1,955.* NGC ID# 22FG, PCGS# 2825
- 3133 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. Unc. FS-101.** This key date doubled die cent has been recolored orange-gold but displays unbroken cartwheel sheen. The strike is sharp and visible marks are confined to thin lines on Lincoln's shoulder and jaw. NGC ID# 22FG, PCGS# 2825
- 3134 1955 Doubled Die Obverse MS61 Brown NGC. FS-101.** Among the most dramatic doubled dies in U.S. numismatics. This satiny chocolate-brown representative is well preserved aside from a few faint marks near AMERICA. Minor retained laminations near the date are of little import. NGC ID# 22FG, PCGS# 2825
- 3135 1955 Doubled Die Obverse MS61 Brown NGC. FS-101.** A smooth and satiny chocolate-brown example of the desirable and prominent variety. Well struck and nearly carbon-free with a hint of blending on the high points of the portrait. NGC ID# 22FG, PCGS# 2825
- 3136 1955 Doubled Die Obverse MS62 Brown PCGS. FS-101.** A beautiful chocolate-brown example of this remarkably strong doubled die variety. The satiny surfaces have a few minute ticks but will please the experienced Lincoln collector. NGC ID# 22FG, PCGS# 2825
- 3137 1955 Doubled Die Obverse MS62 Brown PCGS. FS-101.** Deep walnut-brown toning graces satiny and sharply struck surfaces. Marks are unworthy of comment aside from a hair-thin field line between the nose and the 9 in the date. The most impressive doubled die of the Lincoln series. NGC ID# 22FG, PCGS# 2825

**1955 Doubled Die Cent, MS63 Brown
Modern Lincoln Cent Rarity**

- 3138 1955 Doubled Die Obverse MS63 Brown PCGS. FS-101.** This well-struck Select key date cent is virtually free from contact. Olive-green, rose-red, and caramel-gold shades encompass lustrous surfaces. The left obverse field exhibits moderate carbon, and the top of Lincoln's coat displays a thin layer of apple-green residue. NGC ID# 22FG, PCGS# 2825

**1955 Doubled Die Obverse Cent
MS64 Brown, Traces of Mint Red**

- 3139 1955 Doubled Die Obverse MS64 Brown PCGS. CAC. FS-101.** Most examples of this famous key variety, including those in Uncirculated grades, have lost most of their initial mint red. Though the present near-Gem is designated as Brown, ample fire-red color remains on both sides, along with glimpses of steel-blue toning. The high points of the portrait are olive-green. NGC ID# 22FG, PCGS# 2825

**1955 Doubled Die Obverse Cent
MS63 Red and Brown**

- 3140 1955 Doubled Die Obverse MS63 Red and Brown NGC. FS-101.** The legends display mint orange-gold throughout, though the borders and high points are olive-brown. This unabraded and satiny representative is free from abrasions or spots, and will charm the advanced Lincoln cent collector. The 1955 FS-301 was the first widely recognized doubled die variety since the spread between letters can be seen by the unaided eye. NGC ID# 22FG, PCGS# 2826

**1956 Lincoln Cent, MS67 Red
Tied for the Finest Certified**

- 3141 1956 MS67 Red PCGS.** With the advent of third-party grading and the Set Registry programs, the condition-rarity of many recent issues is finally recognized. The 1956 cent is an example, with a mintage of nearly half a billion coins, yet only 14 examples are certified as Superb Red Gems with none finer at PCGS (8/13). This piece has frosty orange luster with lighter gold wisps at the right obverse and reverse. NGC ID# 22FK, PCGS# 2836
- 3142 1956-D MS67 Red PCGS. CAC.** Lovely peach-gold color adds to the attractiveness of this Superb Gem. Additional attributes include rich luster and a strong strike. Population: 33 in 67 Red, 0 finer (8/13). NGC ID# 22FL, PCGS# 2839
- 3143 1957-D MS67 Red PCGS. CAC.** A gorgeous Superb Gem, this cent displays vibrant orange-red color and potent luster. Pink and violet highlights also appear. A few die polish lines are present in the left obverse field. Population: 30 in 67 Red, 0 finer (8/13). NGC ID# 22FN, PCGS# 2845
- 3144 1957-D MS67 Red PCGS. CAC.** Pleasing light pumpkin-gold color and shimmering luster are attributes of this wonderful example. A lovely, well struck piece. Population: 30 in 67 Red, 0 finer (8/13). NGC ID# 22FN, PCGS# 2845

**1960-D Large Date Cent, MS67 Red
Among the Finest Known**

- 3145 1960-D Large Date MS67 Red PCGS.** Although the Large Date coins were produced in much-larger numbers than their counterparts, they are condition rarities at the upper grade levels. This Superb Gem Red example is one of only five at this grade level at PCGS, with none finer (8/13). The medium orange-red surfaces are free of all but the tiniest contact marks. Two tiny flecks are present on the upper reverse. A great representative for a Registry Set. NGC ID# 22FY, PCGS# 2866
- 3146 1960-D Small Date MS67 Red PCGS.** The more available of the 1960 Small Date varieties, the 1960-D Small Date is nevertheless difficult to find as a Superb Gem and unknown any finer. Rich luster and attractive orange-gold color add to the appeal of this piece. Population: 17 in 67 Red, 0 finer (8/13). NGC ID# 22FX, PCGS# 2869
- 3147 1968-D MS67 Red PCGS.** Rich satin luster and a pleasing strike are present on this Superb Gem. The orange-red color is delightful. Tiny carbon spots appear on the reverse. Population: 18 in 67 Red, 0 finer (8/13). NGC ID# 22GD, PCGS# 2908
- 3148 1970-S Large Date MS67 Red PCGS.** Orange-red color and gleaming mint luster provide this Superb Gem example with a high degree of visual appeal. The piece exhibits the typical bold definition. Population: 20 in 67 Red, 0 finer (8/13). NGC ID# 22GN, PCGS# 2939
- 3149 1971 MS67 Red PCGS.** Small splashes of orange color are present, primarily on the obverse, of this appealing Superb Gem displaying peach-orange color. Potent luster and a pleasing strike are additional attributes. Population: 32 in 67 Red, 0 finer (8/13). NGC ID# 22GP, PCGS# 2941
- 3150 1972 Doubled Die Obverse MS66 Red PCGS. CAC. FS-101.** Exquisite cherry-red centers are framed by peripheral olive-green. Lustrous and sharply struck. Only a pair of tiny obverse flecks deny perfection. The obverse die doubling is dramatic and surpassed only by its 1955 predecessor. NGC ID# 22GU, PCGS# 2950
- 3151 1973-D MS67 Red PCGS.** Copper-orange surfaces have considerable reddish fire through the obverse fields. The palest copper color is on the portrait. Minimally marked. Population: 6 in 67 Red, 0 finer (8/13). NGC ID# 22GY, PCGS# 2962
- 3152 1974-S MS67 Red PCGS.** An excellent coin for the Registry collector, this is an appealing Superb Gem with vibrant peach luster and few obverse marks. Population: 14 in 67 Red, 0 finer (8/13). NGC ID# 22H5, PCGS# 2978
- 3153 1978 MS67+ Red PCGS.** Satiny with fierce eye appeal thanks to rolling reddish-orange luster. Sharply struck and carefully preserved, a great coin for the Registry enthusiast. Population: 38 in 67 (1 in 67+) Red, 0 finer (8/13). NGC ID# 22HB, PCGS# 2992

PROOF LINCOLN CENTS

- 3154 1909 PR65 Red and Brown NGC. CAC.** A well-defined specimen that is more Red than Brown, particularly on the yellow-influenced reverse. Aside from a spot to the right of the chin, carbon is minimal. NGC ID# 22KS, PCGS# 3304
- 3155 1909 PR65 Red PCGS.** A stunning Gem matte proof first-year Lincoln cent, this piece combines light gold and reddish-orange mint color with satin luster. A highly appealing specimen for a type collector or Lincoln specialist. NGC ID# 22KS, PCGS# 3305
- 3156 1909 PR65 Red PCGS. CAC.** This razor-sharp Gem is void of contact and has only a few minuscule specks. Most of the obverse and the central reverse are olive-gold, while cherry-red is also evident, particularly near the rims. An outstanding specimen of this scarce matte issue. Certified in a first generation holder. Population: 60 in 65 (1 in 65+) Red, 47 finer (8/13). NGC ID# 22KS, PCGS# 3305
- 3157 1910 PR65 Red and Brown NGC. CAC.** This impressive Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces retain most of their original red color, with a few hints of light brown toning and no trace of carbon. Census: 42 in 65 Red and Brown, 9 finer (8/13). NGC ID# 22KT, PCGS# 3307

1911 Lincoln Cent, PR65 Red Lovely Matte Proof

- 3158 1911 PR65 Red PCGS.** Splashes of rose toning appear on the brilliant orange surfaces of this satiny Gem matte proof Lincoln cent. The strike is exquisite and the surfaces are mark-free with only a few microscopic carbon flecks on each side. Population: 22 in 65 Red, 12 finer (8/13). NGC ID# 22KU, PCGS# 3311

1913 Lincoln Cent, PR66 Red and Brown Conditionally Scarce

- 3159 1913 PR66 Red and Brown PCGS. CAC.** Both sides of this Premium Gem representative display pleasing toning. The reverse is arguably the more attractive of the two. Shades of bright orange, deep pink, and denim-blue appear on the obverse. The reverse reveals hues of hot-pink, rich orange, plum, violet, and blue-green. The coin exhibits a sharp strike. Population: 15 in 66 (1 in 66+) Red and Brown, 4 finer (8/13). NGC ID# 22KW, PCGS# 3316

1915 Cent, PR65 Brown Small 1,150-Coin Mintage

- 3160 1915 PR65 Brown PCGS. CAC.** This fully struck matte proof Lincoln cent carries a Brown designation, but likely should be called Red and Brown in our opinion. An impressive Gem, this piece exhibits outstanding faded orange luster with sea-green and iridescent toning. Population: 21 in 65 Brown, 18 finer (8/13). NGC ID# 22KY, PCGS# 3321
- 3161 1915 PR64 Red and Brown PCGS.** Proof cents of 1915 are of the matte style. Considerable reddish-orange luster shows on this Red and Brown near-Gem. The design elements are crisply struck, including sharp detail on Lincoln's hair and beard, due to the enhancement of the obverse master hub (Lange, 2005). Well-preserved surfaces reveal just a few minor flecks in the lower-right reverse field. Population: 62 in 64 Red and Brown, 64 finer (8/13). NGC ID# 22KY, PCGS# 3322
- 3162 1915 PR65 Red PCGS.** The needle-sharp strike, fine-grained surfaces, and mattelike appearance immediately qualify this piece as a proof. Almond-gold centers yield to peach near the rims. The reverse is fire-red with traces of lavender. Certified in an old green label holder. Population: 18 in 65 Red, 8 finer (8/13). NGC ID# 22KY, PCGS# 3323
- 3163 1936 Type Two — Brilliant Finish PR64 Red NGC.** Following a two decade gap, proof cents mintages resumed in 1936. The first delivery had a satin finish, while subsequent deliveries exhibit the more familiar brilliant finish. A pink-red and olive-green Gem with a few tiny field flecks. Certified in a former generation holder. *From The Joan Carroll Collection.* NGC ID# 22L3, PCGS# 3335
- 3164 1936 Type Two — Brilliant Finish PR65 Red NGC.** This delightful Gem displays the all-brilliant finish used on proofs in the later part of the year. The design elements are sharply detailed and the deeply mirrored fields show only minor signs of contact. NGC has graded 20 numerically finer examples (7/13). NGC ID# 22L3, PCGS# 3335
- 3165 1936 Type Two — Brilliant Finish PR65 Red PCGS.** A beautiful orange-gold Gem that dazzles with strong reflectivity and fiery color. The glossy portrait shows a touch of weakness from overzealous die polishing. *Ex: New York Signature (Heritage, 7/2002), lot 6235.* NGC ID# 22L3, PCGS# 3335
- 3166 1938 PR67 Red PCGS.** A spectacular Superb Gem, with sharply detailed design elements and deeply mirrored fields. The original red surfaces show no mentionable distractions and eye appeal is tremendous. NGC ID# 22L5, PCGS# 3341
- 3167 1938 PR66 Red Cameo NGC. CAC.** Although the 1936 to 1942 proof issues of all denominations are frequently seen in a wide range of grades, examples with any degree of contrast are rare. This Premium Gem Cameo proof has bright, even red luster with exceptional cameo contrast, featuring satin devices over fully and deeply mirrored fields. Census: 15 in 66 Red Cameo, 2 finer (8/13). NGC ID# 22L5, PCGS# 83341
- 3168 1939 PR67 Red PCGS. CAC.** *Ex: Tom Mershon Collection.* A magnificent pumpkin-gold Superb Gem that boasts a full strike and a near-absence of carbon. The eye appeal is immense. *Ex: Long Beach Signature (Heritage, 2/2003), lot 5463; which realized \$3,220.* NGC ID# 22L6, PCGS# 3344

3169 1960 Small Date PR68 Deep Cameo PCGS. The sharply detailed design elements of this incredible PR68 specimen show unusually rich mint frost, providing stark cameo contrast with the deeply mirrored fields. Population: 37 in 68 Deep Cameo, 0 finer (8/13). NGC ID# 22LL, PCGS# 93392

3170 1960 Large Over Small Date PR68 Red NGC. FS-101. The Large over Small Date variety is actually a doubled die, receiving an impression from the Small Date hub first, followed by an impression from the Large Date hub. A pristine canary-gold specimen with an exemplary strike and radiant mirrored fields. PCGS# 3410

SHIELD NICKELS

3171 1866 Rays MS65 PCGS. A well-detailed Gem, with design elements that show the slight softness that led to the removal of the rays in 1867. Shades of golden-brown and lavender-gray patina blanket the lustrous surfaces. NGC ID# 22NX, PCGS# 3790

3172 1867 No Rays MS66 NGC. This Premium Gem example from the initial No Rays Shield nickel issue is better-defined than most examples, though still a trifle soft on certain reverse stars. Modestly toned with sizable die cracks (as struck) affecting both sides. *Ex: Long Beach Signature (Heritage, 2/2003), lot 5630.* NGC ID# 22NZ, PCGS# 3794

3173 1867 No Rays MS66 PCGS. The Rays were removed from the reverse in 1867 to improve striking quality and increase die life. This sharply detailed Premium Gem displays vibrant mint luster and attractive shades of champagne-gold toning. Population: 12 in 66, 0 finer (8/13). NGC ID# 22NZ, PCGS# 3794

3174 1868 MS65+ PCGS. CAC. This high-end Gem displays well-preserved nickel-gray surfaces with vibrant mint luster and a few hints of champagne-gold toning. The design elements are sharply detailed and an extensive network of die cracks is evident on the obverse. Population: 72 in 65+, 25 finer (8/13). NGC ID# 22P2, PCGS# 3795

1869 Shield Nickel, MS66 Conditionally Rare

3175 1869 MS66 PCGS. A lovely Premium Gem example, this issue is surprisingly challenging at the upper grade levels, with PCGS having graded no finer examples than this coin. This piece displays a strong degree of eye appeal, with brilliant surfaces and pleasing satin luster. Light, wispy die cracks are noted on the obverse, particularly at the date, and numerous die polish lines appear on both sides. A few tiny flyspecks are present. Population: 11 in 66, 0 finer (8/13). NGC ID# 22P3, PCGS# 3796

3176 1876 Tripled Die Obverse MS65 ANACS. FS-101. *Ex: Sunnywood / Bowers.* The pickup point is the annulet, which has secondary impressions to the northwest and southeast. Splashes of peach-gold and cherry-red toning grace this lustrous, fully struck, and smooth Gem. NGC ID# 22PB, PCGS# 3805

3177 1882 MS66+ PCGS. CAC. This Shield nickel issue was clearly struck from late-state dies. The indications include the last digit in the date is a virtual blob, much of the motto IN GOD WE TRUST exhibits signs of die erosion, and spidery die cracks appear around the peripheries of both sides. The strike as produced by the dies is nonetheless excellent on this beautifully preserved Premium Gem representative. Population: 2 in 66+, 6 finer (8/13). NGC ID# 22PC, PCGS# 3812

3178 1883/2 — Cleaning — PCGS. Unc. Details. FS-302. A sharply defined but somewhat subdued example of this scarce final year overdate. The blended golden-brown and jade-green surfaces are smooth except for reverse field hairlines. NGC ID# 22PD, PCGS# 3814

3179 1883 MS66 PCGS. A delightful Premium Gem from the final date of the design, this coin displays vibrant mint luster and sharply detailed design elements, with attractive highlights of champagne-gold toning. PCGS has graded nine numerically finer examples (8/13). NGC ID# 22PE, PCGS# 3813

PROOF SHIELD NICKELS

3180 1866 Rays PR63 PCGS. A light golden-gray Select specimen of this briefly issued proof type. Satiny, unabraded, and void of cracks with moderate blending of detail at the centers. Encapsulated in an old green label holder. *From The Searight Collection.* NGC ID# 276G, PCGS# 3817

1866 Rays Nickel, PR66 Cameo Only Eight Finer NGC Examples

3181 1866 Rays PR66 Cameo NGC. The first-year of issue for the five-cent nickel denomination, this spectacular piece will appeal to type collectors and series specialists. A lovely Premium Gem Cameo proof, this light gray specimen has excellent contrast between its deeply mirrored fields and lustrous devices. Hints of pale blue-violet toning appears on both sides. Census: 27 in 66 Cameo, 8 finer (8/13). PCGS# 83817

3182 1867 No Rays PR65 Cameo NGC. Delicate champagne toning appears on both sides of this Gem Cameo proof, with that toning concentrated at the borders. The obverse and reverse exhibit deeply mirrored fields behind the lustrous nickel-gray devices with bold design definition. Census: 17 in 65 Cameo, 9 finer (8/13). PCGS# 83821

3183 1868 PR65 Cameo PCGS. CAC. Light green-gold hints on the obverse thicken and turn streaky on the reverse, though that side's contrast is equally strong. A well-preserved beauty. Population: 33 in 65 (1 in 65+) Cameo, 11 finer (8/13). PCGS# 83822

3184 1870 PR66 PCGS. Delicate green-gold tints at the margins fade into pale blue on wide interiors. The reflectivity is watery and there is even a bit of a swirl to the luster in places, but the boldness of the reverse stars makes this coin's proof status unmistakable. Population: 7 in 66, 0 finer (8/13). NGC ID# 276L, PCGS# 3824

3185 1872 PR66 Cameo PCGS. The deeply mirrored fields of this exquisite Premium Gem contrast boldly with the sharply detailed frosty design elements to create a startling cameo effect when the coin is tilted in the light. Population: 27 in 66 (1 in 66+) Cameo, 2 finer (8/13). PCGS# 83826

3186 1875 PR65 PCGS. A wonderful Gem proof, this Shield nickel has deeply mirrored fields and lustrous devices beneath delicate gold toning. Eye appeal is outstanding. Population: 62 in 65, 12 finer (8/13). NGC ID# 276S, PCGS# 3829

3187 1875 PR65 NGC. CAC. This delightful Gem displays hazy reflective surfaces with hints of pale gold and lavender toning and no mentionable signs of contact. The sharply detailed design elements add to the considerable eye appeal. Census: 63 in 65 (1 in 65+), 25 finer (8/13). NGC ID# 276S, PCGS# 3829

3188 1875 PR66 PCGS. CAC. Delicate shades of golden-brown toning blanket the flawless surfaces of this delightful Premium Gem. The design elements are sharply detailed and eye appeal is terrific. Population: 12 in 66, 0 finer (8/13). NGC ID# 276S, PCGS# 3829

1876 Shield Nickel, PR67 Cameo Lovely Centennial Issue

3189 1876 PR67 Cameo NGC. An extraordinary Superb Gem Cameo proof centennial Shield nickel, this piece has deeply mirrored fields around boldly defined and fully lustrous devices, displaying exceptional eye appeal. Microscopic strike doubling is evident on the obverse. Census: 4 in 67 Cameo, 1 finer (8/13). PCGS# 83830

1876 Nickel, PR66 Deep Cameo One of Five Deep Cameos at PCGS

3190 1876 PR66 Deep Cameo PCGS. Few Deep or Ultra Cameo 1876 proof nickels are known from the surviving numbers of proofs. Indeed, of the 450 1876 proof nickels certified by PCGS a scant five (1%) are Deep Cameos. The deeply mirrored fields of the present Premium Gem strongly highlight the frosted motifs, all of which exhibit sharp design detail. Both sides have been very well cared for. Population: 1 in 66 Deep Cameo, 1 finer (8/13). PCGS# 93830

1877 Shield Nickel, PR64 Important Proof-Only Issue

3191 1877 PR64 PCGS. The first of two consecutive proof-only Shield nickel issues, the 1877 is an integral part of a complete set and enjoys demand from a wide range of collectors. This piece has light gray surfaces with fully mirrored fields around lustrous devices. Scattered microscopic spots are noted on both sides. NGC ID# 276U, PCGS# 3831

3192 1878 PR64 NGC. CAC. A lovely near-Gem example of the second and final proof-only date, this coin displays pleasing color and luster. Tiny carbon flyspecks appear on both sides, but provide little distraction. NGC ID# 276V, PCGS# 3832

3193 1878 PR66 NGC. CAC. The second 8 in the date is repunched. This highly satiny apple-green and apricot-gold proof-only nickel has an intricate strike and nearly immaculate preservation. In a former generation holder. *From The Strawberry Fields Collection.* NGC ID# 276V, PCGS# 3832

3194 1881 PR67 Cameo NGC. This delightful Superb Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply reflective fields to produce an attractive cameo effect. A few hints of pale gold toning add to the considerable eye appeal. Census: 27 in 67 Cameo, 1 finer (7/13). PCGS# 83836

LIBERTY NICKELS

1885 Liberty Nickel, MS62 Elusive Key Date Issue

3195 1885 MS62 PCGS. Splashes of gold toning appear on the light nickel-gray surfaces of this splendid Mint State Liberty nickel key. Both sides have brilliant mint luster with frosty surfaces. Trivial hairlines and surface marks are evident. Mint State examples of the 1885 are substantially rarer than proofs, and this piece will certainly generate considerable bidding interest. NGC ID# 2773, PCGS# 3846

1885 Liberty Nickel, MS63
Elusive Key Date Issue

3196 1885 MS63 PCGS. The 1885 V nickel is one of the best known key dates in the entire series of federal coinage. Only 1.47 million pieces were minted and few were saved in any grade. This coin will prove a welcome addition to a collection of this popular series. The overall brilliant surfaces display pleasing mint luster and a strong strike other than portions of the wreath detail. A few flecks of carbon are present along with scattered faint toning.
From The Strawberry Fields Collection. NGC ID# 2773, PCGS# 3846

3197 1886 AU58 PCGS. CAC. This well-detailed near-Mint example shows just a trace of wear on the high points of the design and retains significant amounts of mint luster under shades of pink and gray toning.
From The Strawberry Fields Collection. NGC ID# 22PK, PCGS# 3847

3198 1891 MS66 PCGS. CAC. A frosty and fully brilliant Premium Gem, this conditionally scarce Liberty nickel has a splash of pale champagne toning. Population: 20 in 66 (1 in 66+), 2 finer (8/13). NGC ID# 2776, PCGS# 3852

3199 1893 MS65 PCGS. Light peach and gold overtones cross pale gray surfaces. Unevenly struck on the peripheral stars with a shallow scrape on Liberty's neck. NGC ID# 2778, PCGS# 3854

3200 1896 MS65 PCGS. Cartwheel luster on both sides adds to the eye appeal of this lovely Gem representative. Light champagne toning is present along with a few streaks of golden-brown. Scattered freckles appear. The piece is well struck overall, revealing only minor incompleteness primarily on the reverse. The 1896 Liberty nickel has long been one of the underrated dates in the circulation strike series. Population: 71 in 65 (3 in 65+), 10 finer (8/13). NGC ID# 277B, PCGS# 3857

3201 1909 MS66 PCGS. This impressive Premium Gem exhibits well-detailed design elements, with a touch of softness on the wreath. Vibrant mint luster shines through light shades of gold and lavender toning. Population: 24 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 277K, PCGS# 3870

3202 1912-D MS65 PCGS. Gold, peach, and orange shades are present on this Gem along with small windows of gray in the centers. A nicely struck coin overall, this is a lovely survivor from the only Denver Liberty nickel issue. Tiny flyspecks appear on both sides.
From The Strawberry Fields Collection. NGC ID# 277P, PCGS# 3874

3203 1912-D MS65 PCGS. Low-key olive and rose-gray shadings complement the understated yet elegant luster on this mintmarked Liberty nickel. Softly struck on the lower stars and the left ear of corn, as usually seen.
From The Strawberry Fields Collection. NGC ID# 277P, PCGS# 3874

3204 1912-S MS63 NGC. San Francisco waited until 1912 to strike nickels, though cents were coined there beginning in 1908. The scant mintage of only 238,000 makes the 1912-S a key date. This lovely Select example displays satin luster and dusky apricot toning. Several dark flecks are present on each side. NGC ID# 277R, PCGS# 3875

1912-S Nickel, MS65
Only S-Mint Liberty Nickel

3205 1912-S MS65 PCGS. The only S-Mint Liberty nickel, the 1912-S has a distinctive look unlike any Philadelphia Mint nickel. Typical of the issue, this piece has a sharp strike with weakness on Liberty's hair. The surfaces exhibit satiny luster beneath olive and blue-gray patina. PCGS has only certified 10 finer examples (8/13). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3206 1883 No Cents PR66 Cameo NGC. CAC. The cameo contrast is evident on this pleasing Premium Gem representative. The devices display attractive mint frost and the fields exhibits bold reflectivity. A few tiny, light freckles appear on the reverse. Census: 65 in 66 (2 in 66+) Cameo, 19 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83878

1883 Liberty Nickel, PR66 Deep Cameo
Controversial No CENTS Issue

3207 1883 No Cents PR66 Deep Cameo PCGS. CAC. The Liberty nickel series began with the controversial 1883 No CENTS issue that was sometimes gold-plated to pass as a half eagle. An impressive Premium Gem Deep Cameo proof, this example is fully brilliant with highly lustrous devices and deeply mirrored fields. Population: 5 in 66 (1 in 66+) Deep Cameo, 1 finer (8/13). PCGS# 93878

3208 1883 With Cents PR66 Cameo NGC. CAC. Subtle pastel sky-blue and almond-gold toning embraces this fully struck high grade proof type coin. An as-made lint mark appears near star six. Census: 36 in 66 Cameo, 2 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83881

3209 1884 PR66 Cameo PCGS. This delightful Premium Gem exhibits sharply detailed design elements, with rich mint frost that contrasts dramatically with the deeply reflective fields. Only a few minor signs of contact are evident. Population: 40 in 66 (3 in 66+) Cameo, 3 finer (8/13). PCGS# 83882

3210 1884 PR66 Cameo PCGS. This Premium Gem is well deserving of the Cameo designation as it sports strong contrast on both sides. A solid strike leaves razor-sharp definition on the devices enhancing even more the coin's outstanding eye appeal. Population: 40 in 66 (3 in 66+) Cameo, 3 finer (8/13). PCGS# 83882

3211 1884 PR66 Cameo NGC. CAC. The fields display a tremendous degree of reflectivity on this Cameo example, adding to the eye appeal. The boldly defined design elements further enhance the attractiveness of this piece. Census: 32 in 66 Cameo, 17 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83882

3212 1885 PR65 PCGS. Lilac-red and orange-gold colors emerge when this patinated Gem is rotated beneath a light. The 1885 is key to the business series, which contributes to demand for proof specimens. Certified in a green label holder. NGC ID# 277T, PCGS# 3883

3213 1885 PR66 PCGS. CAC. Cartwheel luster and lightly toned surfaces add to the eye appeal of this piece. Striking weakness on the left ear of corn, located on the lower reverse just to the left of the ribbon bow, is noted, as is frequently the case. A tiny surface anomaly appears to the right of the V. PCGS has awarded higher numeric grades to only 13 pieces (8/13). NGC ID# 277T, PCGS# 3883

1885 'V' Nickel, PR66 Cameo An Affordable High-Grade Alternative

3214 1885 PR66 Cameo PCGS. CAC. A pleasing degree of cameo contrast is present on this attractive Premium Gem representative. The piece displays attractive toning in varying shades of light golden color. A strong level of design detail is present, with only minor incompleteness on the wreath. Only a few tiny abrasions are present. Population: 47 in 66 Cameo, 7 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83883

1886 Nickel, PR67 Tied for Finest Certified

3215 1886 PR67 PCGS. CAC. A gorgeous Superb Gem proof, this 1886 nickel is fully brilliant with faint champagne toning over its mirrored fields and lustrous devices. Both sides are boldly defined with pristine surfaces. Neither PCGS nor NGC has certified a finer proof example. Population: 19 in 67, 0 finer (8/13). NGC ID# 277U, PCGS# 3884

3216 1886 PR65 Cameo NGC. CAC. Subtle champagne toning appears on this Gem along with faint hints of blue. The cameo contrast is lovely. A small as-made lint mark is present below Liberty's ear. Census: 13 in 65 Cameo, 26 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83884

3217 1887 PR65 Cameo PCGS. CAC. The design elements of this attractive Gem are sharply detailed and richly frosted, creating intense cameo contrast with the deeply reflective fields. Population: 9 in 65 Cameo, 9 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83885

3218 1888 PR65 Cameo NGC. CAC. Despite a large mintage of 4,582 pieces, the 1888 proof Liberty Head nickel is an available date. This attractive Gem features sharply detailed devices and deeply reflective fields. The obverse includes areas of light golden-brown toning and both sides reveal tiny flyspecks of carbon. Census: 9 in 65 Cameo, 3 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83886

3219 1890 PR65+ Cameo PCGS. A gold-green overtone adds color but does not interfere with the clear contrast on each side. A shallow planchet fault is visible at the lower right part of the V on the reverse. Population: 36 in 65 (3 in 65+) Cameo, 13 finer (8/13). PCGS# 83888

3220 1890 PR65+ Cameo PCGS. CAC. Pleasing contrast is present on both sides of this Gem 1890 Liberty nickel exhibiting an almost full strike. The piece is silver-white with some light charcoal-gray accents at the rims on each side. Population: 36 in 65 (3 in 65+) Cameo, 13 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83888

1891 Liberty Head Nickel, PR66+ Cameo Outstanding Eye Appeal

3221 1891 PR66+ Cameo PCGS. The 1891 Liberty nickel in proof format can be located with relatively little difficulty through near-Gem, but higher grade pieces are difficult, especially with a Cameo finish. The current high-end Premium Gem Cameo is thus an important find. Crisply struck frosted motifs stand out against the mirrored fields. Impeccable preservation over both sides further enhances the outstanding eye appeal. Population: 15 in 66 (2 in 66+) Cameo, 1 finer (8/13). PCGS# 83889

3222 1892 PR66 Cameo PCGS. Boldly reflective and contrasting. The obverse has a small dot of cloudy toning at the left obverse, while the reverse shows an inner streak of peach. Population: 25 in 66 (1 in 66+) Cameo, 0 finer (8/13). PCGS# 83890

3223 1893 PR66 Cameo NGC. The frosted texture of the fully struck design elements creates profound cameo contrast with the deeply mirrored fields of this spectacular Premium Gem. The surfaces are visited by streaky greenish-gold toning. Census: 28 in 66 (1 in 66+) Cameo, 7 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83891

3224 1893 PR66 Cameo PCGS. A wonderful Premium Gem, this piece displays pleasing white-on-black contrast. The upper obverse reveals a wisp or two of silver-gray patina. The design elements display a bold level of detail. This piece has tremendous eye appeal. Population: 27 in 66 (1 in 66+) Cameo, 11 finer (8/13).

Ex: ANA National Money Charlotte Signature (Heritage, 3/2003), lot 5398. PCGS# 83891

3225 1894 PR66 Cameo NGC. Possibly the most attractive 1894 proof nickel that could be envisioned, this Premium Gem has fully brilliant nickel-gray surfaces with extremely deep mirrored fields that surround the lustrous devices. A few faint planchet flakes are evident, as almost always on these proofs. Census: 10 in 66 Cameo, 6 finer (8/13).

From The Strawberry Fields Collection. PCGS# 83892

3226 1895 PR66 PCGS. CAC. The devices are boldly defined with satin luster, showing slight contrast with the mirrored fields on this delicately gold toned Premium Gem. Population: 14 in 66, 0 finer (8/13). NGC ID# 2785, PCGS# 3893

- 3227 1895 PR65 Cameo NGC. CAC.** Fully struck, with richly frosted devices that create stark cameo contrast with the pristine mirrored fields, this coin possesses extraordinary eye appeal. Census: 17 in 65 Cameo, 6 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83893

**1897 Nickel, PR67
Old Green Label Holder**

- 3228 1897 PR67 PCGS. CAC.** Both sides have lime-green margins, but the obverse center is pastel lilac while the central reverse is apricot-gold. A fully struck and lustrous Superb Gem with mark-free surfaces. Only minuscule carbon denies perfection. Encapsulated in an old green label holder. NGC ID# 2787, PCGS# 3895
- 3229 1898 PR66 Cameo NGC. CAC.** Incredible contrast appears between the deeply mirrored light gray fields and frosty, sharply defined devices. No toning appears on either side. Census: 18 in 66 Cameo, 1 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83896

**1898 Liberty Nickel
PR65 Deep Cameo**

- 3230 1898 PR65 Deep Cameo PCGS. CAC.** Fully brilliant nickel-gray surfaces appear on both sides of this Gem Deep Cameo proof Liberty nickel. The sharply defined devices exhibit frosty and untuned luster over fully and deeply mirrored fields. Population: 1 in 65 Deep Cameo, 4 finer (8/13). PCGS# 93896
- 3231 1899 PR65+ Cameo PCGS.** This high-end Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. Population: 12 in 65 (1 in 65+) Cameo, 10 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83897
- 3232 1900 PR66 Cameo PCGS.** A turn-of-the-century Premium Gem proof, this 1900 nickel boasts well-contrasted silver-white surfaces with deep mirrors and light golden accents. Population: 21 in 66 (3 in 66+) Cameo, 10 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83898
- 3233 1901 PR66 Cameo PCGS. CAC.** Liberal splashes of golden-yellow color, particularly on the reverse, provide this piece with an attractive look. The cameo contrast is pronounced, with the flashy mirrored fields adding to the eye appeal of this example. A few scattered flyspecks of carbon appear and a few as-made die polish lines are present on the reverse. Population: 16 in 66 (2 in 66+) Cameo, 6 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83899

- 3234 1901 PR67 Cameo NGC.** Vivid shades of emerald-green and lavender toning blanket the well-preserved surfaces of this delightful Superb Gem. The sharply detailed frosty design elements contrast distinctly with the deeply mirrored fields. Census: 7 in 67 Cameo, 0 finer (7/13). PCGS# 83899

- 3235 1902 PR65 Cameo PCGS. CAC.** Appreciable cameo contrast provides both sides of this Gem example with a strong degree of visual appeal. The coin exhibits well defined design elements. Light toning is present. Population: 7 in 65 Cameo, 14 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83900

- 3236 1903 PR67 PCGS.** Attractive champagne toning adds to the eye appeal of this beautifully struck Superb Gem example. A tiny spot appears in the left obverse field. Population: 17 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 278D, PCGS# 3901

- 3237 1903 PR66 Cameo NGC. CAC.** A delightful Premium Gem with deeply mirrored fields and frosty devices that create a startling black-on-white cameo flash when this coin is tilted in the light. Census: 27 in 66 (3 in 66+) Cameo, 13 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83901

- 3238 1905 PR65 Cameo PCGS. CAC.** This delightful Gem Cameo displays some incipient light tan color on the obverse, and is well impressed, save for the usual softness in the leaves and corn ear left of the bowknot. Both sides are well preserved. Population: 5 in 65 Cameo, 7 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83903

**1907 Liberty Nickel, PR66
Elusive Cameo Example**

- 3239 1907 PR66 Cameo PCGS Secure. CAC.** The mirrored fields display bold reflectivity on this pleasing Cameo example. Light golden toning with small splashes of golden-brown and a strong strike further add to the eye appeal. The reverse is particularly attractive, with streaks of violet and denim-blue. Population: 12 in 66 Cameo, 4 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83905

**1908 Nickel, PR66 Cameo
Elusive Contrasted Proof**

- 3240 1908 PR66 Cameo PCGS. CAC.** Almond-gold toning provides both sides of this Premium Gem Cameo with a pleasing appearance. Scattered hints of golden-brown are also present. The contrast between the fields and devices is clearly evident, adding to the eye appeal. At a mere 1,620 pieces, the mintage of proof Liberty nickels was the second-lowest of the series in 1908. Population: 16 in 66 Cameo, 4 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83906

- 3241 1909 PR66 Cameo PCGS. CAC.** Largely nickel-white but with substantial golden toning at the lower reverse. Clearly contrasted and better-preserved than often seen. Population: 61 in 66 Cameo, 17 finer (8/13). PCGS# 83907
- 3242 1909 PR67 Cameo NGC. CAC.** Frosted devices are highlighted by mirrored fields on this Superb Gem Cameo. A solid strike imparts strong definition to the design features. Impeccably preserved and displaying outstanding eye appeal. Census: 23 in 67 (1 in 67+) Cameo, 6 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83907
- 3243 1909 PR66 Deep Cameo PCGS.** Mostly brilliant throughout, the fields display illimitable depth of mirrored reflectivity and the devices are heavily frosted which provides the coin with a stark cameo contrast. Small scattered splashes of honey-brown color are present. One small field mark appears to the left of the V on the reverse. Population: 6 in 66 Deep Cameo, 1 finer (8/13).
From The Searight Collection. PCGS# 93907
- 3244 1910 PR66 Cameo NGC. CAC.** A razor-sharp and virtually untuned Premium Gem that remains as immaculate today as it was one century ago. A trio of faint retained obverse laminations are seen near stars 1, 4, and 7. Census: 17 in 66 (1 in 66+) Cameo, 16 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83908
- 3245 1911 PR66 Cameo NGC. CAC.** Delicate pink accents grace the portrait, while the rest of the piece showcases subtle canary-gold shadings. Strongly mirrored and immensely appealing. Census: 16 in 66 Cameo, 7 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83909
- 3246 1912 PR66 Cameo PCGS. CAC.** The devices display thick mint frost on this lovely, well-struck piece, contrasting nicely with the mirrored fields. A few tiny spots are present. Population: 23 in 66 (2 in 66+) Cameo, 4 finer (8/13).
From The Strawberry Fields Collection. PCGS# 83910

BUFFALO NICKELS

- 3247 1913 Type One MS67 PCGS. CAC.** A magnificent Superb Gem of this single year design subtype. Light olive-green with blushes of rose-red near the rims. A good strike with occasional minor incompleteness on peripheral elements. PCGS has graded 12 numerically finer examples (7/13). NGC ID# 22PW, PCGS# 3915
- 3248 1913 Type One MS67 PCGS. CAC.** A wonderful example of the popular Type One Buffalo, this piece exhibits close to a full strike with the rough, pebbly field texture that James Earle Fraser designed for the subtype. Several different shades of gold decorate each side of this pleasing Superb Gem, with only a couple of minor contact marks present along with a small gray spot below the Indian's chin. Only 12 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 22PW, PCGS# 3915
- 3249 1913-S Type One MS66 PCGS. CAC.** Medium powder-blue, olive-green, and lavender toning endows coruscating and exemplary surfaces. The strike is good though the mintmark and denomination show softness. Certified in a green label holder.
Ex: Orlando FUN Signature (Heritage, 1/2013), lot 3454, which realized \$1,527.50. NGC ID# 22PY, PCGS# 3917
- 3250 1913 Type Two MS66 PCGS. CAC.** Attractive gold-green patina appears on both sides of this Premium Gem representative along with a few scattered flyspecks of darker color. This coin is well struck for the issue, with only minor peripheral weakness at LIBERTY. Rich satin luster adds to the eye appeal. PCGS has awarded higher numeric grades to only 18 examples (8/13). NGC ID# 22PZ, PCGS# 3921
- 3251 1913-D Type Two MS65 PCGS. CAC.** A well-detailed Gem, with satiny mint luster and shades of pale gold and lavender toning. The Type Two design recessed the denomination and mintmark on the reverse to prevent excessive wear. NGC ID# 22R2, PCGS# 3922
- 3252 1913-D Type Two MS66 PCGS.** A blend of gold, apricot, and peach patina gives the luminous surfaces of this well struck Premium Gem a warm appearance. Two tiny carbon spots are noted on the reverse. Fewer Type Two 1913 nickels were saved than Type One pieces, and the former can be elusive today. Population: 56 in 66, 11 finer (7/13).
Ex: FUN Signature (Heritage, 1/2007), lot 2233. NGC ID# 22R2, PCGS# 3922
- 3253 1913-S Type Two MS62 PCGS.** Rich toning in shades of gold, orange, rose, and pink create a strong level of eye appeal for this lustrous coin. An interesting die break appears between the rim and the top portion of the bison's head. The issue is known for weak central details as well as peripheral weakness. This coin exhibits the weak centers along with LIBERTY displaying incompleteness. NGC ID# 22R3, PCGS# 3923
- 3254 1913-S Type Two MS64 PCGS. CAC.** The Type Two mintmarked issues are among the lowest-mintage and most challenging in the Buffalo nickel series. The San Francisco issues are known for weakness at the peripheries as well as weak central details. That is the case with this near-Gem example aside from the reverse periphery, which displays a pleasing level of detail. Golden accents and rich luster provide this lovely piece with pleasing eye appeal. NGC ID# 22R3, PCGS# 3923

1913-S Type Two Nickel, MS65 High-End and Nicely Toned

- 3255 1913-S Type Two MS65 PCGS. CAC.** The surfaces are fully lustrous and highly reflective on this delightful Gem key date, a coin that is underrated in this grade. Glints of gold and pink abound, and only a single tick on the Indian's hair at the cheekbone and one on the 3 in the date possibly preclude an even finer grade. This high-end piece is notable in that it lacks the "beard die clash" under the chin often seen on this issue. PCGS has certified 34 submissions finer (8/13). NGC ID# 22R3, PCGS# 3923
- 3256 1914 MS66 PCGS.** Although the toning is more pronounced on the reverse, both sides display areas of gold. Hints of rose-pink and ice-blue also appear. Rich satin luster adds to the visual appeal. Scattered tiny flyspecks of gray are present on both sides. Only 21 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 22R4, PCGS# 3924
- 3257 1914/3 AU50 PCGS. FS-101.** The crossbar of a 3 is faintly evident on each side of the top of the 4. This lightly circulated nickel is toned slate-gray and golden-brown. Neither side displays marks but a slender vertical retained lamination is noted above the Indian's braid. NGC ID# 22R4, PCGS# 93924
- 3258 1914/3 AU50 PCGS. FS-101.** Traces of the upper crossbar of a 3 bookend the top of the 4 in the date. The date is moderately strike doubled. A caramel-gold and stone-gray representative of the scarce *Guide Book* variety. NGC ID# 22R4, PCGS# 93924

1914/3 Nickel, Near-Mint

- 3259 1914/3 AU58 PCGS. FS-101.** The upper right corner of the 3 underdigit confirms the scarce overdate variety. An almond-gold and stone-gray near-mint nickel. The satiny surfaces are unmarked and display only a few tiny flecks. The hair above the braid is incomplete, typical for the series, and the date is lightly strike doubled. NGC ID# 22R4, PCGS# 93924

- 3260 1914-D MS66 NGC.** A delightful Premium Gem, this Denver Mint nickel is popular in part due to the importance of the similar Lincoln cent issue. This piece is brilliant with hints of gold toning. Census: 20 in 66 (1 in 66+), 1 finer (8/13). NGC ID# 22R5, PCGS# 3925

- 3261 1915 MS67 PCGS.** A flawless Superb Gem whose lustrous and precisely struck surfaces display caramel-gold, rose-red, and ice-blue patina. No carbon or contact is readily evident. Rolls of the 1915 were set aside by forward-thinking numismatists such as Wayte Raymond, but the date is unquestionably rare with MS67 quality. Population: 37 in 67, 0 finer (7/13). NGC ID# 22R7, PCGS# 3927

- 3262 1915-S MS64 NGC. CAC.** The 1915-S was a well-produced issue and this delightful Choice example exhibits sharply detailed design elements and especially vibrant mint luster, with outstanding eye appeal. NGC ID# 22R9, PCGS# 3929

1916 Doubled Die Obverse Nickel Fine Details, FS-101

- 3263 1916 Doubled Die Obverse — Scratch — PCGS Genuine. Fine Details. FS-101.** The doubled date 1916 is the key to a *Guide Book* collection of Buffalo nickels. FS-101 is an extraordinary example of Class V or pivoted hub doubling. The left-side design elements, such as the date and feather tips, exhibit broad doubling. The Indian's lips and chin are also die doubled but to a lesser degree. The present cream-gray nickel has a fully readable date but the portrait has a few faint but lengthy pinscratches. NGC ID# 2TSS, PCGS# 3931

- 3264 1917 MS66 PCGS.** Delicate pink, gold, blue, and violet overtones converge on this satin-smooth Premium Gem. The reverse has above-average detail with only minor softness at shoulder and tail. NGC ID# 22RD, PCGS# 3934

- 3265 1917 MS66+ PCGS. CAC.** The design elements of this high-end Premium Gem are sharply detailed throughout and the flawless surfaces radiate vibrant mint luster through shades of ice-blue and champagne-gold toning. PCGS has graded only 15 numerically finer examples (8/13). NGC ID# 22RD, PCGS# 3934

- 3266 1917-D MS65 PCGS.** Attractive shades of ice-blue and champagne-gold toning blanket the surfaces of this delightful Gem, with well-detailed design elements and vibrant mint luster on both sides. PCGS has graded 16 numerically finer examples (7/13). NGC ID# 22RE, PCGS# 3935

- 3267 1917-S MS64 PCGS.** Faint traces of greenish-gold toning appear on the satiny gray surfaces of this lustrous Choice Mint State 1917-S nickel. A glass is necessary to make out the few minuscule carbon flecks. NGC ID# 22RE, PCGS# 3936

- 3268 1917-S MS64 PCGS.** Large areas of golden-orange toning appear on this example, particularly on the reverse. Attractive satin luster is present. Late-state dies were used to produce this piece as the orange peel texture indicates. Though not fully struck, this coin does display a pleasing level of detail. NGC ID# 22RE, PCGS# 3936

- 3269 1917-S MS64 PCGS.** Light, intermingled pastel shades of blue, green, gold, yellow, and red provide this near-Gem example with a strong degree of eye appeal. The coin is well struck and pleasing. NGC ID# 22RE, PCGS# 3936

- 3270 1917-S MS64 PCGS. CAC.** This impressive Choice specimen is sharply detailed in many areas, with just a touch of softness above the braid and on the bison's tail. Satiny mint luster is evident, with a few hints of ice-blue and pale gold toning. NGC ID# 22RE, PCGS# 3936

- 3271 1918 MS65 PCGS.** Attractive toning provides this lustrous Gem with strong visual appeal. The colors on the obverse include shades of orange, gold, ice-blue, ice-green, lilac, and soft pink. The reverse is largely golden-orange. Although areas of incompleteness of strike are noted, the level of detail is pleasing. Only 56 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 22RG, PCGS# 3937

- 3272 1918/7-D Fine 12 PCGS. FS-101.** The horizontal crossbar of the underdigit 7 is obvious, as is its broad downstroke within the 8. This pearl-gray key date nickel appears unabraded aside from a solitary unobtrusive pinscratch within the Indian's hair. Missing from most sets of this distinctly American series.
Ex: Milwaukee Central States (Heritage, 4/2010), lot 1131, which realized \$2,530. NGC ID# 22RJ, PCGS# 3939

- 3273 1918/7-D — Improperly Cleaned — NGC Details. Fine Details.** Wispy hairlines emerge when this stone-gray key date nickel is rotated beneath a light. Nonetheless, abrasions and carbon are minimal, and the shape of the underdigit 7 is apparent.
From The Joan Carroll Collection.

1918/7-D Nickel, XF Details

- 3274 1918/7-D — Environmental Damage — PCGS Genuine. XF Details. FS-101.** The corner, crossbar, and downstroke of the underdigit 7 are evident on this key date nickel. The sea-green and lilac-gray surfaces are evenly granular but are without any marks or carbon. The bison's hip shows moderate wear though the tip of the horn is distinct. NGC ID# 22RJ, PCGS# 3939

- 3275 1918-D MS64 PCGS.** Light beige-gold and powder-blue patina coats the lustrous surfaces of this near-Gem. The coin displays a nice strike overall, with some minor softness present in the hair over the bison's forehead.
Ex: Long Beach Signature (Heritage, 9/2008), lot 746. NGC ID# 22RH, PCGS# 3938

- 3276 1918-S MS62 PCGS.** Although not well struck, this coin retains appeal. Clash marks appear on the obverse, including a large portion of PLURIBUS under the Indian's chin. Marks from the bison appear between the lowest feather tip and the date as well as in other areas. Light gold and orange toning are present. NGC ID# 22RK, PCGS# 3940

1919-D Nickel, MS64
Remarkably Sharp Definition on the Reverse

- 3277 1919-D MS64 PCGS.** Scarce in almost all grades and especially so in mint condition. Strike is always a consideration on the 1919-D, and this coin is curiously mismatched from obverse to reverse. The obverse shows the usual softness on the hair above the Indian's braid. But the reverse is remarkably sharp, especially notable on the bison's head. The bright, satiny luster shows just the faintest hints of iridescence when closely examined. NGC ID# 22RM, PCGS# 3942

- 3278 1919-D MS64 PCGS.** A number of shades of gold and light brown are present on this near-Gem example. Attractive highlights include shades of violet, light blue, ice-green, orange, and cherry-red. The reverse exhibits a slight counter-clockwise rotation. The reverse displays strike doubling. NGC ID# 22RM, PCGS# 3942

- 3279 1919-D MS64 PCGS.** As with the majority of 1919-D nickels, this piece displays a degree of softness on the higher portions of the design elements. Bright, satiny mint luster underlies the almost opaque gray and rose patina that covers each side. A few thin die breaks appear on the obverse. Minimally abraded, with a tiny bright-green speck on the back of the bison's closer front leg.
Ex: *FUN Signature (Heritage, 1/2001)*, lot 6623; *Palm Beach Signature (Heritage, 3/2005)*, lot 5363; *Long Beach Signature (Heritage, 5/2008)*, lot 1287. NGC ID# 22RM, PCGS# 3942

- 3280 1919-S MS62 NGC.** Like most examples seen, this well-detailed MS62 specimen shows just a touch of softness on the bison's shoulder. Satiny mint luster shines beneath shades of ice-blue, gray, and champagne-gold toning. NGC ID# 22RN, PCGS# 3943

- 3281 1919-S MS64 NGC.** The 1919-S is one of the most highly respected issues in the Buffalo nickel series. It is scarce in all grades above VF and examples in the upper Mint State grades are very challenging to locate. This near-Gem exhibits the lack of strong design details this issue is known for. Beautifully toned in variegated shades of crimson and emerald-green, the surfaces reveal strong underlying mint frost. NGC has awarded higher numeric grades to only 20 examples (8/13).
Ex: *ANA Charlotte Signature (Heritage, 3/2003)*, lot 5434, which realized \$2,645. NGC ID# 22RN, PCGS# 3943

- 3282 1920-D MS64 NGC.** Solidly struck with above-average luster and quality. The key to this near-Gem is the patina, deep peach and magenta with lighter green-gold at the centers.
Ex: *Long Beach Signature (Heritage, 2/2010)*, lot 269; *Fort Worth Signature (Heritage, 3/2010)*, lot 498. NGC ID# 22RR, PCGS# 3945

- 3283 1920-S MS63 PCGS.** This well-detailed Select example exhibits some of the usual softness on the bison's shoulder and tail. The lightly marked surfaces display satiny mint luster under shades of ice-blue and champagne-gold toning. NGC ID# 22RS, PCGS# 3946

- 3284 1921 MS66 PCGS.** An impressive Premium Gem with fully brilliant and frosty nickel-gray surfaces. Quality such as this is seldom exceeded, with just 18 finer PCGS pieces graded to date (7/13). A hint of champagne toning adds to the aesthetic appeal. NGC ID# 22RT, PCGS# 3947

- 3285 1921 MS66 PCGS.** Rich satin luster and bright surfaces provide this Premium Gem with immediate eye appeal. Closer examination reveals a strong level of detail. Only a couple of tiny abrasions are present and none of them is distracting. This is a gorgeous coin. PCGS has awarded higher numeric grades to only 18 examples (8/13). NGC ID# 22RT, PCGS# 3947

- 3286 1921 MS66 PCGS.** Intermingled toning, in shades of ice-blue, ice-pink, and gold, is present on this Premium Gem. This piece displays rich satin luster. As is generally the case with this issue, the design elements display a strong level of detail. A small mark in the field below the bison's midsection provides little distraction, if any. Only 18 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 22RT, PCGS# 3947

1921-S Buffalo Nickel, MS63
Bright, Satiny Surfaces

- 3287 1921-S MS63 PCGS. CAC.** The mintage of only 1.5 million pieces explains the scarcity of the 1921-S in all grades. The usual lack of full details also makes it a major strike rarity in the series. This piece shows the expected bluntness on the bison's head, but the obverse is much sharper by contrast. Pale golden-yellow toning covers the bright, satiny mint luster, and the only visual distractions are a few scattered carbon specks. NGC ID# 22RU, PCGS# 3948

1921-S Nickel, MS64
Remarkably Clean

- 3288 1921-S MS64 PCGS.** Rich golden-brown, plum-mauve, and powder-blue patina adorns this lustrous and unmarked near-Gem. The obverse is nicely struck from a fresh die, while the reverse die had been long in use and shows diminished definition on the mintmark and bison's hair. The 1921-S is a low-mintage semikey. Housed in a green label holder.
Ex: *Long Beach Signature (Heritage, 9/2008)*, lot 770, which realized \$2,990. NGC ID# 22RU, PCGS# 3948

- 3289 1923-S MS63 PCGS. CAC.** An unmarked and coruscating slate-gray example. Long in use dies cause blended detail and an orange-peel texture on the fields near the rims. An early and lower mintage branch mint issue. Encapsulated in a green label holder. NGC ID# 22RW, PCGS# 3950

- 3290 1923-S MS64+ NGC.** Light nickel-gray appears at the centers within a frame of gold toning along the borders. Traces of reflectivity appear on both sides of this near-Gem. NGC ID# 22RW, PCGS# 3950

- 3291 1924-D MS64 PCGS.** Attractive almond-gold toning provides this near-Gem with lovely eye appeal. A few small splashes of violet and golden-brown appear on the obverse. The piece displays lovely satin luster. A die break is present on the bison near the tail. NGC ID# 22RY, PCGS# 3952
- 3292 1924-D MS64 PCGS.** Shimmering satin luster adds to the eye appeal of this near-Gem representative. The obverse exhibits strike doubling. Golden toning, including hints of orange, appears on both sides. Minor carbon flecks are present. The coin is nicely struck and attractive. NGC ID# 22RY, PCGS# 3952
- 3293 1924-D MS64 PCGS. CAC.** Pleasing gray-gold toning subdues the frosty luster of this Choice Mint State piece. Both sides are attractive, with only a few trivial marks. The strike is strong on the obverse and somewhat weaker on the reverse as is generally the case with this issue. The date and LIBERTY exhibit strike doubling.
Ex: *Houston Signature* (Heritage, 12/2009), lot 281. NGC ID# 22RY, PCGS# 3952

**1924-S Nickel, MS63
Bright Surfaces, Even Toning**

- 3294 1924-S MS63 PCGS. CAC.** The bright, satin-like mint luster has an even layer of golden-brown toning over each side. While the 1924-S is not known as other better-known issues from the 1920s, the strike is notably soft on each side of this piece. The 1924-S is much better known as an absolute rarity from VF on up. Minimal marks are evident. NGC ID# 22RZ, PCGS# 3953

- 3295 1925-D MS64 NGC.** A sharply detailed Choice specimen of this popular better date, with satiny mint luster under shades of bluish-gray and champagne-gold toning. NGC has graded 60 numerically finer examples (8/13). NGC ID# 22S3, PCGS# 3955

**1925-S Buffalo Nickel, MS64
Elusive in Finer Grades**

- 3296 1925-S MS64 PCGS.** A glass is required to see the myriad tiny carbon flecks on this Choice Mint State Buffalo nickel. The strike is typical with peripheral and central weakness. The surfaces are highly lustrous with lovely light gold and pale blue toning. PCGS has only certified 26 finer examples (8/13). NGC ID# 22S4, PCGS# 3956

- 3297 1925-S MS64 PCGS.** Softly impressed, as usual, this near-Gem displays glowing satiny surfaces. Toned a pale golden-gray color overall, there are noticeable accents of rose on each side. Virtually free of marks or abrasions, with scattered carbon flyspecks. This is a very attractive example of this scarce issue. PCGS has awarded higher numeric grades to only 26 examples (8/13).
Ex: *Long Beach Signature* (Heritage, 6/2004), lot 5701; *Long Beach Signature* (Heritage, 5/2008), lot 1312. NGC ID# 22S4, PCGS# 3956

- 3298 1925-S MS64 PCGS. Ex:** The George Gee Collection of Buffalo Nickels. This near-Gem displays vibrant luster. Delicate gold-orange and nickel-blue shadings enrich the attractive and well-preserved surfaces. The coin exhibits the overall usual lack of detail these are known for, however the mintmark is well defined. Only 26 examples have achieved higher numeric grades from PCGS (8/13).
Ex: *Summer FUN West Palm Beach* (Heritage, 6/2008), lot 451. NGC ID# 22S4, PCGS# 3956

**1926-S Nickel, Near-Mint Example
Slight High-Point Friction**

- 3299 1926-S AU58 NGC.** Here is a coin that is going to please some lucky bidder. The 1926-S is the key to the regular series, and examples are scarce or rare in all grades. This particular coin shows just a bit of high-point friction, yet retains noticeable portions of mint luster. Softly struck, as always, each side is lightly toned. NGC ID# 22S7, PCGS# 3959

- 3300 1927-S MS62 NGC.** Glossy with golden overtones in the peripheries and largely nickel-white interiors. Light abrasions and wispy slide marks combine to account for the grade. NGC ID# 22SA, PCGS# 3962

- 3301 1927-S MS64 PCGS.** The 1927-S is more of an absolute rarity than a strike rarity. And speaking of strike, this piece is close to showing full definition on each side. The reddish-golden patina is enlivened by strong underlying, lightly frosted mint luster. Each side is remarkably free from any noticeable abrasions. NGC ID# 22SA, PCGS# 3962

- 3302 1927-S MS64 PCGS.** Hints of gold and rose are present on this near-Gem example. Rich satin luster provides this piece with an attractive appearance. The design elements exhibit a nice level of detail. PCGS has awarded higher numeric grades to only 22 examples (8/13). NGC ID# 22SA, PCGS# 3962

- 3303 1927-S MS64 PCGS.** The 1927-S five cent, with a mintage of 3.4 million pieces, is scarce in Mint State. Blazing luster adorns this near-Gem specimen, and a blend of low-intensity powder-blue, golden-orange, and lavender bathes each side. Only 22 examples have been awarded higher numeric grades by PCGS (8/13).
Ex: *FUN Signature* (Heritage, 1/2008), lot 783. NGC ID# 22SA, PCGS# 3962

**1927-S Buffalo Nickel, MS64
Conditionally Rare in Higher Grades**

- 3304 1927-S MS64 PCGS. CAC.** The 1927-S is a scarcer mintmarked issue from the 1920s with a mintage of only 3.4 million pieces. This is a well struck example displaying bright, satiny mint luster beneath rich golden-rose and lilac toning, providing this coin with a lovely appearance. A pleasing, high-end coin with problem-free surfaces. PCGS has awarded higher numeric grades to a mere 22 examples (8/13).

Ex: Central States St. Louis Signature (Heritage, 5/2005), lot 6179, which realized \$2,760. NGC ID# 22SA, PCGS# 3962

- 3305 1928-S MS64 PCGS.** The design elements of this attractive Choice Buffalo nickel exhibit razor-sharp definition throughout and vibrant mint luster shines through highlights of ice-blue and champagne-gold toning. Eye appeal is extraordinary. NGC ID# 22SD, PCGS# 3965
- 3306 1928-S MS64 PCGS.** A luminous, predominantly golden-tan example of this desirable S-mint Buffalo nickel issue, well struck overall with a measure of the usual softness at the centers. Splashes of orange and pink color are also present. Minimally marked for the grade with quicksilver luster and a touch of streakiness at the top of the portrait.
Ex: Dallas Signature (Heritage, 11/2007), lot 306. NGC ID# 22SD, PCGS# 3965
- 3307 1928-S MS64 PCGS.** The quicksilver surfaces are generally nickel-gray, though occasional pewter and violet accents visit parts of the margins. Surprisingly sharp detail on each side, particularly at the portrait and the bison's head and shoulder. A diagonal lamination extends through the Indian's portrait. Clash marks from UNUM appear below the chin.
Ex: ANA Baltimore Signature (Heritage, 7/2008), lot 1360. NGC ID# 22SD, PCGS# 3965
- 3308 1930 Doubled Die Reverse MS65 PCGS. FS-801.** Called the "Five-Legged" variety, FS-801 exhibits doubling on the left front leg of the bison. The rise of Registry Sets places added importance to such mint errors as they enter standard references. Lustrous and mark-free with pastel gold and lilac toning. PCGS# 38462
- 3309 1930-S MS66 PCGS. CAC.** Powder-blue, pale gold, and delicate lilac toning add to the eye appeal of this Premium Gem with frosty surfaces and brilliant mint luster. Scattered tiny flyspecks of gray are present. PCGS has only certified four finer (8/13). NGC ID# 22SJ, PCGS# 3970
- 3310 1931-S MS66 PCGS. CAC.** This satiny Premium Gem has an above average strike with brilliant light gray luster beneath its delicate gold toning. PCGS has only certified three finer examples (8/13). NGC ID# 22SK, PCGS# 3971
- 3311 1931-S MS66 PCGS. CAC.** A sharply detailed Premium Gem with vibrant mint luster and terrific eye appeal. The well-preserved surfaces show hints of ice-blue and champagne gold patina. PCGS has graded three numerically finer examples (8/13). NGC ID# 22SK, PCGS# 3971
- 3312 1935 MS67 NGC.** Striking ice-blue and golden iridescence is the first feature that greets the viewer whose eyes behold this radiant Superb Gem. As befits the grade, the devices are expertly impressed and the surfaces are devoid of bothersome abrasions. Census: 29 in 67, 0 finer (7/13). NGC ID# 22SN, PCGS# 3974

- 3313 1935 MS67 PCGS.** A gorgeous Superb Gem example, this coin displays brilliant silver surfaces and rich mint luster. Subtle hints of gold and pink are present. The coin exhibits a pleasing degree of design detail. PCGS has awarded a higher numeric grade to only one example (8/13). NGC ID# 22SN, PCGS# 3974
- 3314 1935-D MS66+ PCGS. CAC.** Sharply defined with wisps of blue and champagne toning over its frosty light gray surfaces. Fully lustrous and highly attractive, PCGS has graded five numerically finer examples (8/13). NGC ID# 22SP, PCGS# 3975
- 3315 1936 MS67 PCGS. CAC.** Rich golden-orange color adorns the majority of the surfaces on this pleasing Superb Gem representative. The strong level of design detail and attractive luster are additional attributes of this wonderful coin. The few marks present are minuscule. PCGS has not awarded a single example with a higher numeric grade (8/13). NGC ID# 22SS, PCGS# 3977
- 3316 1936 Doubled Die Obverse MS65+ PCGS. FS-101. LIBERTY** and the date exhibit obvious die doubling. Sharply struck and close to brilliant. The reverse displays minor flecks. Die varieties for Buffalo nickels have become increasingly popular over the past few years. Population: 5 in 65 (1 in 65+), 1 finer (7/13). PCGS# 38469
- 3317 1936-D MS67 PCGS. CAC.** This lovely Superb Gem is immaculately preserved and intensely lustrous, with light toning and bold striking details. Faint doubling is observed on the 1 in the date. Nearly unimprovable quality in a 1936-D Buffalo nickel. Population: 62 in 67, 2 finer (8/13).
Ex: Long Beach Signature (Heritage, 5/2007), lot 577. NGC ID# 22ST, PCGS# 3978
- 3318 1936-D MS67 NGC. CAC.** Both sides are richly and identically toned in concentric bands of apple-green, rose-red, and sun-gold. Lustrous and essentially pristine with a good strike except on the tail and the tops of LIBERTY. NGC ID# 22ST, PCGS# 3978
- 3319 1936-S MS67 PCGS.** An impressive Superb Gem, this Buffalo nickel exhibits fully brilliant surfaces with frosty mint luster and only the slightest possible champagne toning on the reverse. Population: 67 in 67, 0 finer (8/13). NGC ID# 22SU, PCGS# 3979
- 3320 1937 MS67+ PCGS. CAC.** Hints of gold and rose are present on this brilliant, gorgeous Superb Gem example. As the plus designation indicates, this piece has a strong degree of eye appeal. Potent satin luster adds to the attractiveness. This piece exhibits a bold level of design detail. Population: 9 in 67+, 5 finer (8/13). NGC ID# 22SV, PCGS# 3980
- 3321 1937-D Three-Legged AU53 NGC. FS-901.** 3 1/2 legged varieties are known for several dates, but only the 1937-D FS-901 claims three-legged status. Toned cream-gray and olive-gold with pleasing surfaces. A quality collector coin of this perpetually popular variety.
From The Joan Carroll Collection. NGC ID# 22SX, PCGS# 3982
- 3322 1937-D Three-Legged AU53 ANACS. FS-901.** Rich powder-blue and autumn-gold toning embraces this satiny and lightly worn nickel. Free from relevant contact. A sharp example of the coveted abraded dies mint error. NGC ID# 22SX, PCGS# 3982
- 3323 1937-D Three-Legged AU55 PCGS.** A pleasing pearl-gray example of the famous lapped die mint error, this piece retains pleasing luster. Scattered splashes of golden-orange highlights are present on the reverse. The highpoints of the designs exhibit light wear. A few trivial marks are found on both sides, but the overall eye appeal is pleasing. A couple of tiny flecks of aqua appear, primarily on the obverse.
From The Searight Collection. NGC ID# 22SX, PCGS# 3982
- 3324 1937-D Three-Legged AU55 PCGS.** A Choice AU specimen of this famous die polishing error, with just a trace of wear on the design elements and satiny mint luster shining through delicate shades of ice-blue and pale gold patina. NGC ID# 22SX, PCGS# 3982

3325 1937-D Three-Legged AU58 PCGS. FS-901. Luminous and scarcely worn under light gold-gray toning. An old horizontal pinscratch crosses the cheek. Housed in a green label holder. From *The Strawberry Fields Collection*. NGC ID# 22SX, PCGS# 3982

3326 1937-D Three-Legged AU58 NGC. FS-901. Lime-green, lilac-red, and butter-gold toning illuminates this lustrous and momentarily circulated key date nickel. Marks are absent save for a single thin diagonal line on the flank. NGC ID# 22SX, PCGS# 3982

3327 1937-D Three-Legged MS62 PCGS. FS-901. Wheat-gold and dove-gray blend across this satiny and unmarked key date representative. Excellent quality for the MS62 level. The most dramatic and best known of the various missing foreleg *Cherrypickers'* varieties. NGC ID# 22SX, PCGS# 3982

3328 1937-D Three-Legged MS62 PCGS. CAC. FS-901. One wonders how Walter Breen discovered his story, possibly apocryphal, concerning Mr. Young and his infamous emery stick, the supposed source for this popular variety. Mint State coins are in much demand, numbering far less than the collectors desiring an example. This piece shows generous eye appeal for the grade, between the attractive rose and pink patina and relatively few marks. NGC ID# 22SX, PCGS# 3982

3329 1937-D Three-Legged MS62 PCGS. CAC. FS-901. Butter-gold and plum-mauve toning adorns coruscating, crisply struck, and unmarked surfaces. This key date nickel shows all variety diagnostics, such as the textured back leg and, of course, the missing foreleg. NGC ID# 22SX, PCGS# 3982

1938-D Buffalo Nickel, MS68 Tied for Finest Certified

3330 1938-D MS68 NGC. Peach, ice-blue, sun-gold, cherry-red, and lime-green shades provide this lustrous Superb Gem with a pleasing appearance. Only the curve of the tail lacks completeness of strike. All other design elements exhibit exceptional definition. A few tiny flecks of carbon are present. Census: 8 in 68, 0 finer (8/13). Ex: *FUN Signature* (Heritage, 1/2010), lot 588. NGC ID# 22SZ, PCGS# 3984

PROOF BUFFALO NICKELS

1913 Buffalo Nickel, PR65 Type One

3331 1913 Type One PR65 PCGS. CAC. The first Buffalo nickel issue, and a one-year subtype of the design. This Gem matte proof is an exquisite representative with brilliant satin luster and bold design features as expected. Both sides have lovely gold toning with a splash of violet at the lower reverse. NGC ID# 278R, PCGS# 3988

1913 Type Two Buffalo Nickel, PR66 Ex: Eliasberg

3332 1913 Type Two PR66 PCGS. CAC. The matte proof 1913 Type Two Buffalo Nickel claims a mintage of 1,514 pieces. Collectors prize the matte proof issues today, but they were less popular with collectors of the early 20th century, and many examples were not saved. The present coin is a magnificent Premium Gem specimen with an illustrious pedigree. The coin is fully struck and exhibits pleasing chestnut-gold and lavender toning. One tiny spot beneath the chin. Housed in a green label holder. Ex: *Louis E. Eliasberg, Sr. Collection* (Bowers and Merena, 5/1996), lot 811; *Stanford Coinfest* (Heritage, 10/2010), lot 4029, which realized \$2,990. NGC ID# 278S, PCGS# 3990

3333 1914 PR65 NGC. CAC. Only 1,275 matte proof Buffalo nickels were coined in 1914, but the issue is surprisingly available today, even at the Gem level. The present coin is exquisitely detailed, as expected with the matte format. The surfaces are satiny and untoned, with no visible distractions. Overall visual appeal is terrific. Ex: *Milwaukee Signature* (Heritage, 4/2010), lot 2811. NGC ID# 278T, PCGS# 3991

3334 1915 PR66 NGC. CAC. Fully struck, with exquisite detail on all design elements, this delightful Premium Gem displays flawless matte proof surfaces with ample mint luster and a few accents of champagne-gold and ice-blue toning. Census: 97 in 66 (1 in 66+), 37 finer (8/13). NGC ID# 278U, PCGS# 3992

**1916 Buffalo Nickel, PR66
Final Matte Proof Issue**

- 3335 1916 PR66 PCGS. CAC.** This boldly defined Premium Gem matte proof has exceptional eye appeal with vivid greenish-yellow toning and splashes of delicate lavender. This was the final matte proof issue in the series, with a two decade intermission until the final two proofs were struck. PCGS has certified just 35 finer examples (8/13. NGC ID# 278V, PCGS# 3993
- 3336 1936 Type One—Satin Finish PR61 PCGS.** An impressively detailed satin proof, this piece displays delicate gold toning across both sides. Moderate hairlines account for the grade. Minor carbon is present. NGC ID# 278X, PCGS# 3994
- 3337 1936 Type One—Satin Finish PR66 NGC.** The Satin proofs were replaced by an all-brilliant finish later in the year. This sharply detailed Premium Gem displays satiny mint luster under highlights of champagne-gold and ice-blue toning. NGC ID# 278X, PCGS# 3994
- 3338 1936 Type One—Satin Finish PR66 NGC.** After a two-decade gap, proof production resumed in 1936 in both satin and brilliant format. This Premium Gem displays pristine preservation and excellent eye appeal. Splashes of toning appear and include shades of orange. The strike is intricate, though not completely full. A few small flecks of carbon are present.
From The Joan Carroll Collection. NGC ID# 278X, PCGS# 3994
- 3339 1936 Type One—Satin Finish PR66 PCGS.** Gold, pink, and blue overtones are light but distinct on this satin proof Buffalo nickel. The satin proofs of 1936 saw only limited output before collector concerns brought back the mirror-finish style of yore. NGC ID# 278X, PCGS# 3994
- 3340 1936 Type One—Satin Finish PR66 PCGS. CAC.** An immaculate and satiny specimen whose sharply struck surfaces show rich rose-red, dove-gray, and lime-green patina. Outstanding quality for this scarce and popular proof type. Encapsulated in an old green label holder.
Ex: Boston ANA Signature (Heritage, 8/2010), lot 4331, which realized \$1,437.50. NGC ID# 278X, PCGS# 3994
- 3341 1936 Type Two — Brilliant Finish PR66 NGC.** Fully struck and deeply reflective, this delightful Premium Gem displays the all-brilliant finish employed by the Mint on the second proof variant of 1936. Eye appeal is tremendous. NGC ID# 278Y, PCGS# 3995
- 3342 1936 Type Two — Brilliant Finish PR66 PCGS. CAC.** A gorgeous example with the brilliant finish, this Premium Gem displays attractive surfaces with splashes of golden toning and hints of rose-pink. The design elements exhibit a strong degree of detail. A few flyspecks of gray are present on both sides. NGC ID# 278Y, PCGS# 3995
- 3343 1936 Type Two — Brilliant Finish PR66 PCGS. Gold CAC.** Delicate lilac, ice-blue, and straw-gold toning adorns this dazzling proof type coin. The strike is incomplete only on the hair above the braid. Only a couple of pinpoint flecks deny technical perfection. Housed in an old green label holder. NGC ID# 278Y, PCGS# 3995

**1936 Brilliant Finish Nickel, PR67
Impeccable Preservation**

- 3344 1936 Type Two — Brilliant Finish PR67 NGC.** Luminous surfaces are bathed in a veneer of champagne-gold patina imbued with hints of rose and yellow-green. The design elements are boldly impressed, and each side is impeccably preserved. The Brilliant proof is collected as a separate variety from the Satin proof.
Ex: Long Beach Signature (Heritage, 5/2009), lot 350. NGC ID# 278Y, PCGS# 3995
- 3345 1937 PR65 PCGS.** This gorgeous Gem displays brilliant, lustrous surfaces and only faint hints of toning. A few scattered minuscule gray flyspecks are present on both sides. The 1937 issue was the last proof Buffalo nickel. NGC ID# 278Z, PCGS# 3996
- 3346 1937 PR66 PCGS.** Gold is the most prominent overtone on this gleaming Premium Gem, though significant hot-pink accents also are present. Crisply appealing. NGC ID# 278Z, PCGS# 3996
- 3347 1937 PR66 PCGS. CAC.** A bold strike and rich gold toning add to the tremendous visual allure of this Premium Gem. This is a gorgeous piece. Although business strikes were coined at Denver in 1938, 1937 was the final year of the proof type.
From The Strawberry Fields Collection. NGC ID# 278Z, PCGS# 3996
- 3348 1937 PR66 NGC. CAC.** A delightful Premium Gem, with fully struck design elements and deeply reflective fields. The completely brilliant surfaces show no mentionable signs of contact. Eye appeal is terrific. NGC ID# 278Z, PCGS# 3996
- 3349 1937 PR67 PCGS.** Fully struck and pristine, this Superb Gem displays a noticeable cameo effect on each side—even if not enough to warrant a Cameo designation on the holder. Entirely untuned with glassy “black” fields and frosted white devices. PCGS has graded 13 numerically finer (7/13). NGC ID# 278Z, PCGS# 3996
- 3350 1937 PR67 NGC.** A gorgeous Superb Gem representative, this piece presents immediate eye appeal. Gold and apricot highlights add to the visual appeal of both sides of this deeply lustrous and well struck coin.
From The Joan Carroll Collection. NGC ID# 278Z, PCGS# 3996
- 3351 1937 PR67 PCGS. CAC.** A brilliant Superb Gem, this is the second of only two brilliant proof Buffalo nickel issues. Both sides are bright gray with no toning evident on the pristine surfaces. The devices display satin luster and contrast with the fields, although that contrast is insufficient for the Cameo designation. PCGS has certified just 13 finer examples (8/13). NGC ID# 278Z, PCGS# 3996
- 3352 1937 PR67 PCGS. CAC.** Butter-gold toning dominates though the margins offer pastel gunmetal-blue. Well struck and immaculate with outstanding eye appeal. Encased in an old green label holder.
Ex: Chicago Central States Signature (Heritage, 4/2012), lot 3694, which realized \$4,600. NGC ID# 278Z, PCGS# 3996
- 3353 1937 PR67 PCGS. CAC.** A magnificent Superb Gem proof Buffalo nickel, with razor-sharp definition on all design elements and deeply reflective fields. A few hints of light gold and ice-blue toning enliven the unmarked surfaces. Housed in a green label holder. NGC ID# 278Z, PCGS# 3996

- 3354 1937 PR67 PCGS. CAC.** A lovely Superb Gem proof, and only the second year of brilliant proof Buffalo nickel coinage. This light gray example has a bold strike and pristine surfaces with a hint of champagne toning. NGC ID# 278Z, PCGS# 3996
- 3355 1937 PR62 Cameo NGC. CAC.** Although the Mint used an all-brilliant finish on proof coins in the 1930s, this example displays considerable mint frost on the sharply detailed devices, contrasting boldly with the brightly mirrored fields. Cameo proofs are very rare. Census: 1 in 62 Cameo, 6 finer (8/13). PCGS# 83996

**1937 Buffalo Nickel, PR64 Cameo
Extremely Rare With Cameo Finish**

- 3356 1937 PR64 Cameo PCGS.** The Mint used an all-brilliant finish on proof coins in the 1930s. This near-Gem Buffalo nickel, however, displays considerable mint frost on the sharply detailed devices, contrasting boldly with the brightly mirrored fields. Cameo proofs are exceedingly rare; of the nearly 2,350 1937 nickel proofs graded by PCGS, a mere 12 are designated Cameos! Population: 2 in 64 Cameo, 10 finer (8/13).
From The Searight Collection. PCGS# 83996

JEFFERSON NICKELS

**1941 Jefferson Nickel, MS68
Tied With One Other for Finest Known**

- 3357 1941 MS68 NGC.** Rich satin luster and faint gold color provide this exceptional example with strong eye appeal. A small area of die polish is present near 10 o'clock on the reverse. This piece is tied with only one other as the finest graded by NGC, while PCGS has yet to assign an MS68 grade or higher to a single example (8/13). NGC ID# 22TG, PCGS# 4010
- 3358 1942-P Type Two MS67 Full Steps PCGS.** Monticello exhibits five-and-a-half steps on this Full Steps Superb Gem. Both sides have brilliant silver luster with satin surfaces and exceptional eye appeal. Population: 32 in 67 Full Steps, 0 finer (8/13). NGC ID# 22TM, PCGS# 84016
- 3359 1945-P MS67 PCGS.** Bold violet, magenta, gold, and green hues give this war nickel Superb Gem a wild and delightful appearance. Smoothly preserved and rewarding. Population: 38 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 22TX, PCGS# 4025

- 3360 1945-D MS67+ Full Steps PCGS.** This high-end Superb Gem exhibits razor-sharp definition on all design elements and the well-preserved lustrous surfaces are blanketed in attractive shades of golden-brown and ice-blue toning. Population: 68 in 67+ Full Steps, 0 finer (8/13). NGC ID# 22TY, PCGS# 84026
- 3361 1964 MS66 Five Full Steps NGC.** Lightly gold-toned with softly frosted underlying luster. A small cut under Jefferson's eye is the only fault warranting individual mention. NGC ID# 22VG, PCGS# 84075

PROOF JEFFERSON NICKELS

- 3362 1952 PR69 Cameo NGC.** Not surprisingly given the grade level and Cameo designation, this piece displays tremendous visual appeal. This stunning coin exhibits a razor-sharp strike with liquid mirrors and mint frost on the devices. Census: 17 in 69 Cameo, 0 finer (8/13). NGC ID# 27A6, PCGS# 84184
- 3363 1955 PR69 Ultra Cameo NGC.** Here is an amazing Superb Gem, equal to the finest that has ever been certified. This piece has incredible field to device contrast with brilliant light gray surfaces. Census: 7 in 69 Ultra Cameo, 0 finer (7/13).
Ex: Fort Worth Signature (Heritage, 3/2010), lot 549. NGC ID# 22YE, PCGS# 94187
- 3364 1971-S Proof Set Featuring No S Nickel.** This extra-special 1971 proof set features a nickel without the required S mintmark, a popular and valuable error. Toning is generally light and eye appeal high. *From The Joan Carroll Collection.* (Total: 5 coins)

MERCURY DIMES

- 3365 1916 MS67 Full Bands PCGS. CAC.** An attractive first-year Mercury dime, this lustrous coin exhibits a sharp strike. Small areas of golden-brown and rose-brown color are present, primarily at the rims. Only 9 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 23GX, PCGS# 4905
- 3366 1916-D VG8 PCGS.** A well-worn example of this low-mintage first-year key, with all lettering and date legible and major design elements complete in outline. The problem-free surfaces show pleasing light gray patina. NGC ID# 23GY, PCGS# 4906
- 3367 1916-D VG8 PCGS. CAC.** This well circulated piece displays ice-blue and cream-gray color, with deeper toning on the olive branch. The mintmark is lightly repunched north. All legends are bold and there are no marks of any importance. A majority of survivors of this key date are well worn.
Ex: October Signature (Heritage, 10/2009), lot 436. NGC ID# 23GY, PCGS# 4906
- 3368 1916-D Fine 12 NGC.** Both sides show considerable patina, from the contrast between pearl-gray and blue-violet on the obverse to the general colorful dusk of the reverse. Well-worn but fundamentally pleasing, a quality capstone coin for a collection of similar grade. NGC ID# 23GY, PCGS# 4906
- 3369 1916-D — Improperly Cleaned — NGC Details. VF.** A large majority of 1916-D dimes are in AG to VG grades, and examples that show most lines in the fasces are desirable. The present stone-gray piece is mildly glossy but acceptable to many collectors. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, VF25
Excellent Choice for a Mercury Dime Set

- 3370 1916-D VF25 NGC.** The 1916-D Mercury dime is in demand in any level of preservation. The present mid-grade example offers prospective bidders an exceptional collecting opportunity. First, its surfaces display a pleasing soft grayish patina. Second, the design features exhibit relatively strong detail, including most of the lines in the fasces. Third, the rim is full. And fourth, both sides are free of the disturbing marks that often plague low- and mid-grade specimens. This key-date representative is the perfect choice for a lower-grade Mercury dime collection. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, Key-Date AU Details
Crisply Defined and Free of Mentionable Abrasions

- 3371 1916-D — Improperly Cleaned — NGC Details. AU.** Most 1916-D dimes are heavily worn. In Fine and VF grades this issue becomes scarce, and finer examples are very difficult to locate. About Uncirculated examples are a great find, even those that have been cleaned, such as the present AU Details offering. Its design features are crisply defined. Even the middle bands, though not quite fully separated, are nicely delineated. Neither side reveals mentionable marks. All in all, this key-date representative deserves serious consideration as it will fit comfortably in a high-grade Mercury dime collection.

1920-D Mercury Dime, MS65 Full Bands
Above Average Strike

- 3372 1920-D MS65 Full Bands PCGS.** The lower part of the 0 in the date is a trifle weak as almost always on this issue. Both sides exhibit otherwise bold details with a sharp split of the central bands. This lovely Gem has light gold toning on the obverse with a hint of peripheral gold on the brilliant reverse. Population: 43 in 65 Full Bands, 21 finer (8/13). NGC ID# 23HC, PCGS# 4931

1921 Mercury Dime, MS64 Full Bands
One of Five Keys to the Set

- 3373 1921 MS64 Full Bands NGC.** The 1921 and 1921-D Mercury dimes are keys to this set along with the 1916-D and the two overdates. Once those five coins are acquired, the balance of the set is comparatively easy. This sharply struck near-Gem has full satin luster beneath dappled gold and russet toning. NGC ID# 23HE, PCGS# 4935

- 3374 1921-D MS63 Full Bands ANACS.** Silver centers with gold rim-toning that is a touch more visible on the obverse. Clearly separated bands make this Select semikey even more desirable. NGC ID# 23HE, PCGS# 4937

- 3375 1923-S MS65+ PCGS. CAC.** An attractive high-end Gem, this example exhibits toning on both sides, including an area of rainbow colors at the outer edge to the right of Mercury. Population: 17 in 65 (1 in 65+), 7 finer (8/13). NGC ID# 23HH, PCGS# 4940

- 3376 1925 MS67 Full Bands PCGS.** Streaks of caramel-gold confirm the originality of this lustrous and immaculate Superb Gem. Fully struck and seemingly unimprovable. The 1925 dime will never be rare, but examples of the present superlative quality will always be in demand from advanced collectors. Population: 24 in 67 Full Bands, 3 finer (7/13).
Ex: Central States Signature (Heritage, 4/2010), lot 1196. NGC ID# 23HM, PCGS# 4949

- 3377 1925-D MS64 Full Bands PCGS. CAC.** This brightly lustrous near-Gem possesses tremendous eye appeal, with brilliant surfaces displaying champagne toning. The design elements are sharply detailed in the centers, but some peripheral devices display the typical softness. The reverse exhibits a slight clockwise rotation. NGC ID# 23HN, PCGS# 4951

- 3378 1927-S MS64 Full Bands PCGS.** Light silver with hints of blue in the fields and touches of gold on the rims and in dots down the reverse. Well-defined everywhere, not only the bands. Population: 43 in 64 (1 in 64+) Full Bands, 49 finer (8/13). NGC ID# 23HW, PCGS# 4965

- 3379 1928-S MS65 Full Bands PCGS.** A boldly detailed Gem, this 1928-S dime has brilliant silver surfaces with frosty luster and no toning on either side. Population: 58 in 65 Full Bands, 36 finer (8/13). NGC ID# 23HZ, PCGS# 4971

- 3380 1929 MS67 Full Bands PCGS.** Delicate ice-blue and straw-gold shades encompass this lustrous and well struck high grade dime. An area of prooflike surface is noted above the date. Encased in a green label holder. Population: 61 in 67 Full Bands, none finer (7/13). NGC ID# 23J2, PCGS# 4973

- 3381 1929-D MS67 Full Bands PCGS.** This highly lustrous and sharply struck Superb Gem has faint gold and blue accents near the devices. A small luster break is noted to the left of the tip of the bust, and another appears just above the date. Only a handful of minuscule marks prevent an even higher grade. Population: 36 in 67 Full Bands, 1 finer (8/13). NGC ID# 23J3, PCGS# 4975

- 3382 1929-S MS66 Full Bands PCGS.** Blues and green-golds are the main colors on this well-defined Premium Gem, though splashes of brown and silver also make appearances. Pleasingly preserved with a clear line between the bands. NGC ID# 23J4, PCGS# 4977

- 3383 1930-S MS66 Full Bands PCGS. CAC.** A lustrous Premium Gem with light yellow-gold color and an exquisite strike. The fields are virtually immaculate, and just a handful of ticks are visible on the fascies. A light vertical die crack wanders up Liberty's cap. Population: 79 in 66 (3 in 66+) Full Bands, 13 finer (8/13).
Ex: Long Beach Signature (Heritage, 2/2001), lot 5726; Long Beach Signature (Heritage, 5/2003), lot 5869; Palm Beach Signature (Heritage, 6/2008), lot 779. NGC ID# 23J6, PCGS# 4981

**1931-S Dime, MS66 Full Bands
Only Six Finer at PCGS**

- 3384 1931-S MS66 Full Bands PCGS.** Rich satin luster and brilliant surfaces provide this piece with strong eye appeal. Subtle toning appears in shades of champagne, golden-orange, and light ice-blue. A few scattered pinpoint flecks are present. Population: 45 in 66 Full Bands, 6 finer (8/13). NGC ID# 23J9, PCGS# 4987
- 3385 1938-S MS67+ Full Bands PCGS. CAC.** A stunning high-end Superb Gem, this dime exhibits a sharp strike with full bands on the reverse. This brilliant piece displays subtle hints of color when examined closely further enhancing the excellent eye appeal. Population: 2 in 67+ Full Bands, 6 finer (8/13). NGC ID# 23JP, PCGS# 5015
- 3386 1939-D MS68 Full Bands PCGS. CAC.** A delightful Superb Gem, this lovely specimen has orange, apple-green, and iridescent toning over brilliant silver surfaces with bold design elements.
From The Strawberry Fields Collection. NGC ID# 23JS, PCGS# 5019
- 3387 1942/1 AU53 NGC. FS-101.** Luster illuminates protected areas of this briefly circulated key date dime. Lightly toned caramel-gold. The right reverse field has a couple of unimportant marks. The underdigit 1 is obvious. NGC ID# 23K4, PCGS# 5036
- 3388 1942/1 AU53 NGC. FS-101.** Luster fills protected areas of this unblemished and lightly toned key date dime. Like the 1942/1-D, the cause was different dated hubs used to form the die. Perhaps the position fell to a novice after regular Mint staff volunteered for military service following Pearl Harbor.
From The Joan Carroll Collection. NGC ID# 23K4, PCGS# 5036
- 3389 1942/1 AU58 NGC. FS-101.** Among the keys to the series, this hubbing error is prominent and easily recognized by the overlapping last numerals in the date. This sharply detailed near-Mint dime displays good mint luster and pastel powder-blue and caramel-gold toning.
Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3826, which realized \$1,150. NGC ID# 23K4, PCGS# 5036
- 3390 1944 MS67 Full Bands PCGS.** The design elements of this magnificent Superb Gem are sharply detailed throughout, including Full Bands definition on the fascies. Vibrant mint luster radiates from the well-preserved surfaces which show a few hints of golden-tan toning. Population: 82 in 67 Full Bands, 1 finer (8/13). NGC ID# 23KB, PCGS# 5051
- 3391 1944 MS67 Full Bands PCGS.** This spectacular Superb Gem exhibits sharply detailed design elements with Full Bands definition on the fascies. The well-preserved surfaces show a few areas of shiny mint polish in the obverse field, with vibrant mint luster throughout. Population: 82 in 67 Full Bands, 1 finer (8/13). NGC ID# 23KB, PCGS# 5051

**1944 Mercury Dime, MS67+ Full Bands
Only One Finer at PCGS**

- 3392 1944 MS67+ Full Bands PCGS. CAC.** A well-executed strike, brilliant surfaces, light champagne toning, and rich mint luster provide this high-end Superb Gem representative with tremendous eye appeal on both sides. PCGS and NGC have each only awarded a higher numeric grade to a single example. Population: 82 in 67+ Full Bands, 1 finer (8/13). NGC ID# 23KB, PCGS# 5051

PROOF MERCURY DIMES

- 3393 1936 PR65 PCGS.** Well-defined and reflective with hints of gold on each side. Just 4,130 specimens were struck for this initial proof Mercury dime issue. NGC ID# 27DG, PCGS# 5071
- 3394 1936 PR66 NGC.** A gleaming Premium Gem specimen from the first year of Mercury dime proofs, faintly toned silver-blue over strong mirrors. Boldly impressed and carefully preserved. NGC has graded 65 examples as PR67 or finer (8/13). NGC ID# 27DG, PCGS# 5071
- 3395 1936 PR66 NGC.** A lustrous Premium Gem example of this first proof Mercury dime issue, one of only 4,130 pieces struck. Both sides exhibit a hazy patina of golden-brown and blue color. The strike is pleasing.
From The Joan Carroll Collection. NGC ID# 27DG, PCGS# 5071
- 3396 1936 PR66 NGC.** A beautifully struck Premium Gem example, this gorgeous coin displays brilliant, gleaming surfaces. A wonderful key date proof representative. NGC ID# 27DG, PCGS# 5071
- 3397 1936 PR66 PCGS. CAC.** A distinctly toned Premium Gem proof from the first year of such coinages for the Mercury dime. Deep golden-brown and rose toning at the rims gives way to dotted white on the interiors. Pleasingly preserved. NGC ID# 27DG, PCGS# 5071

**1936 Ten Cent, PR67
First Mercury Dime Proof Issue**

- 3398 1936 PR67 NGC.** The 1936 is the first proof issue in the Mercury dime series. It has the lowest-mintage (4,130 pieces) of the seven-year run of proof Mercury dimes and is continuously in high demand. This Superb Gem displays reddish-brown hues and fully struck design elements. Both sides are impeccably preserved. Census: 84 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 27DG, PCGS# 5071

ROOSEVELT DIMES

1951-S Dime, MS68 Full Bands Tied For Finest Known

3399 1951-S MS68 Full Bands PCGS. Few representatives have achieved this grade level, with PCGS and NGC combined having graded only seven examples at the MS68 level, with none finer (8/13). The centers remain primarily brilliant and untoned, with large portions of the peripheries displaying shades of yellow, gold, and green. A few tiny marks appear above the ear. NGC ID# 23L4, PCGS# 85099

3400 1952-S MS68 ★ NGC. Arcs of rich peach-red patina on the right obverse and left reverse have coaxed the elusive Star designation from NGC. Crisply struck and essentially pristine. Census: 3 in 68 ★, none finer with a Star designation (8/13). NGC ID# 23L7, PCGS# 5102

3401 1953-D MS67 Full Bands PCGS Secure. This delightful Superb Gem displays dark shades of sea-green and lavender-gray toning, with vibrant mint luster and Full Bands definition on the fascies. Population: 51 in 67 (5 in 67+) Full Bands, 0 finer (8/13). NGC ID# 23L9, PCGS# 85104

1955 Dime, MS67 Full Bands Spectacular Obverse Toning

3402 1955 MS67 Full Bands PCGS. The obverse in particular displays rich variegated toning on this Superb Gem example with Full Bands. The hues on that side include golden-orange, cherry-red, apple-green, plum, and yellow-gold. The reverse displays shades of green-gray, steel-gray, blue-gray, and small splashes of plum-gray. Population: 5 in 67 Full Bands, 0 finer (8/13). NGC ID# 23LE, PCGS# 85109

1963-D Dime, MS67 Full Band Tied For Finest Known

3403 1963-D MS67 Full Bands PCGS. Rich satin luster and brilliant surfaces provide tremendous eye appeal for this Superb Gem Full Bands example. Neither PCGS nor NGC has assigned a higher numeric grade to a single example, adding to the desirability of this piece. This would be a wonderful addition for Registry Set collectors. Population: 3 in 67 Full Bands, 0 finer (8/13). NGC ID# 23LZ, PCGS# 85127

3404 1968 MS67 Full Bands PCGS. Pale champagne toning appears on both sides of this highly lustrous and satiny Superb Gem. Full torch bands are evident on the reverse of this conditionally rare issue. Population: 6 in 67 Full Bands, 0 finer (8/13). NGC ID# 23M7, PCGS# 85133

SMS ROOSEVELT DIME

3405 1965 SMS MS69 Full Torch NGC. Complete details and near-perfect preservation make this first-year clad Roosevelt dime a gorgeous example. Minimally toned with maximum eye appeal. NGC ID# 27EY, PCGS# 5240

PROOF ROOSEVELT DIMES

3406 1950 PR69 ★ NGC. As of (8/13), the present lot is the single highest graded 1950 dime with a Star designation. Fully brilliant and precisely struck with moderate cameo contrast between the portrait and the glassy obverse field. NGC ID# 27EJ, PCGS# 5225

3407 1954 PR69 Cameo NGC. Not surprisingly given the grade, this technically near perfect piece has tremendous visual appeal. A well-executed strike and lovely contrast between devices and fields are among the attributes this example possesses. Faint streaks of plum toning appear on the obverse. Census: 14 in 69 Cameo, 0 finer (8/13). NGC ID# 27EN, PCGS# 85229

3408 1983 No S PR69 Deep Cameo PCGS. Not surprisingly given the grade and Deep Cameo designation, this No-S Roosevelt dime exhibits a tremendous degree of visual appeal. The central devices display a significant degree of mint frost. That, along with the glassy mirrored fields, provides this piece with white-on-black contrast. NGC ID# 27FJ, PCGS# 95265

TWO CENT PIECES

- 3409 1864 Large Motto MS66 Brown NGC.** A fair amount of coppery-orange luster competes for territory with light blue and brown patination. The design elements are sharply struck, and no mentionable marks or unsightly spots are evident. This is an excellent type coin. Census: 35 in 66 (2 in 66+) Brown, 0 finer (8/13). NGC ID# 22N9, PCGS# 3576
- 3410 1864 Large Motto MS65 Red PCGS.** Copper-orange and peach hues are most prominent, the color deepest at a streak on the left obverse. Smooth eye appeal with only minor flyspecks. A solid type coin. NGC ID# 22N9, PCGS# 3578
- 3411 1864 Large Motto MS65 Red PCGS.** This sharply detailed Gem displays vibrant mint luster and original red surfaces with a few microscopic specks of carbon on the reverse. An important first-year type issue, with the more prevalent Large Motto design. NGC ID# 22N9, PCGS# 3578
- 3412 1864 Large Motto MS65 Red PCGS.** A spectacular Gem specimen of the more available Large Motto variant from the first year of the denomination. The design elements are sharply detailed and the original red surfaces radiate vibrant mint luster. NGC ID# 22N9, PCGS# 3578
- 3413 1866 MS64+ Red PCGS.** Copper-orange overall with areas of deeper peach. The top obverse shows an area of carbon near the rim and flyspecks are scattered elsewhere, partly accounting for the grade. Despite these faults, the piece presents well. NGC ID# 274R, PCGS# 3590

1866 Two Cent, MS65 Red Great Color, Strong Eye Appeal

- 3414 1866 MS65 Red PCGS.** A gorgeous well struck coin; this Gem reveals lovely shades of orange, wheat, and red. This lustrous representative exhibits a strong degree of visual appeal. Tiny scattered flyspecks of gray are present. Population: 50 in 65 (2 in 65+) Red, 7 finer (8/13). NGC ID# 274R, PCGS# 3590

1866 Two Cent Piece, MS65 Red Very Rare Any Finer

- 3415 1866 MS65 Red PCGS.** Despite a substantial mintage of more than 3.1 million pieces, the 1866 two cent piece is seldom encountered in high grade, with original red surfaces. This delightful Gem displays sharply detailed design elements and vibrant mint luster throughout and the surfaces show only a few minor contact marks. Population: 50 in 65 (2 in 65+) Red, 7 finer (8/13). NGC ID# 274R, PCGS# 3590

1866 Two Cent, MS65 Red Conditionally Rare in Higher Grades

- 3416 1866 MS65 Red PCGS.** The 1866 two cent piece is an elusive issue in Gem condition, and finer examples are very rare. This impressive Gem displays lustrous well-preserved surfaces, with original red color. A small carbon spot near D in UNITED the only mentionable blemish. Population: 50 in 65 (2 in 65+) Red, 7 finer (8/13). NGC ID# 274R, PCGS# 3590
- 3417 1867 MS64 Red PCGS. CAC.** The original copper-red surfaces of this attractive Choice specimen show vibrant mint luster on both sides, with a short vertical mark above C in CENTS the only flaw of note. Population: 36 in 64 Red, 22 finer (8/13). NGC ID# 22NB, PCGS# 3593

**1867 Two Cent, MS65 Red
Top Condition for the Issue**

- 3418 1867 MS65 Red PCGS.** Except for the 1864 Small Motto, the first few years of the two cent series, from 1864-68, are among the most frequently seen issues of the series, but Gem Red examples are still fairly elusive and much sought after. This 1867 is certified in an old green-label holder with consistent orange-red surfaces throughout and no mentionable distractions. The two cent series in Mint State is completable but challenging, and all but the most deep-pocketed numismatists will have to make some compromises between grade/quality, color, and price. This is *not* one of them. Population: 22 in 65 (1 in 65+) Red, 0 finer (8/13). NGC ID# 22NB, PCGS# 3593

- 3419 1868 MS64 Red PCGS.** The obverse ranges from light yellow to deep peach, while the reverse is uniformly pale. A pleasing Red near-Gem from this issue of just over 2.8 million pieces. Population: 28 in 64 Red, 14 finer (8/13). NGC ID# 22NC, PCGS# 3599

- 3420 1869 MS64 Red PCGS.** An attractive Choice two cent piece, with sharply detailed design elements and partially prooflike original red surfaces. Population: 29 in 64 Red, 26 finer (8/13). NGC ID# 22ND, PCGS# 3605

- 3421 1870 MS64+ Red and Brown PCGS. CAC.** Intermingled hues of wheat-gold color and bright, lustrous surfaces provide this piece with lovely eye appeal, earning it the plus designation from PCGS. Areas of orange and red color are also present. Scattered flyspecks of carbon appear on both sides. Only 26 examples have been awarded higher grades by PCGS (8/13). NGC ID# 22NE, PCGS# 3607

**1872 Two Cent, MS62 Brown
Last Circulating Series Issue**

- 3422 1872 MS62 Brown ANACS.** Mint State examples of the 1872 are high on the want lists of series specialists, due to their low mintage and the extensive circulation the few survivors show — the average grade for certified pieces is a tad below Choice VF. This even-colored chocolate-brown piece shows excellent eye appeal and minimal distractions for the grade assigned. The 1873-dated coins that would end the series were all proofs. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

**1866 Two Cent, PR66 Red and Brown
Boldly Struck**

- 3423 1866 PR66 Red and Brown PCGS. CAC.** Just 725 proof two cent pieces were struck in 1866. This Red and Brown Premium Gem is one of the 24 finest certified by PCGS and NGC. Considerable orange-gold luster shows on both sides especially on the motifs which are partially accentuated by the medium brown fields. The design elements are crisply struck, and bothersome spots or marks are absent. Population: 10 in 66 (1 in 66+) Red and Brown, 0 finer (8/13). NGC ID# 274V, PCGS# 3631

- 3424 1867 PR64 Red and Brown PCGS.** More Red than Brown, this piece is predominantly copper-orange but has mahogany and walnut spotting at lower obverse and upper reverse. Visibly contrasted but modestly hairlined. NGC ID# 274W, PCGS# 3634

- 3425 1869 PR64 Red PCGS. CAC.** Both sides of this near-Gem proof display highly attractive copper-gold color. A few small carbon spots are present. Approximately 600 proof two cent pieces were struck in 1869. Population: 40 in 64 (1 in 64+) Red, 51 finer (8/13). NGC ID# 274Y, PCGS# 3641

- 3426 1870 PR66 Red and Brown NGC.** Splendid wheat-gold and olive-green colors are present on this appealing Premium Gem example. Additional splashes of color include cherry-red, plum, violet, and cobalt-blue. The design elements display strong definition. Housed in a former generation holder. Census: 21 in 66 Red and Brown, 0 finer (8/13). NGC ID# 274Z, PCGS# 3643

- 3427 1870 PR63 Red PCGS.** This crisply struck and predominantly pumpkin-gold proof type coin is free from contact though a few specks are noted near the S in CENTS. Certified in an old green label holder. NGC ID# 274Z, PCGS# 3644

- 3428 1870 PR64 Red PCGS.** Predominantly copper-gold with touches of peach and one significant flyspeck just right of 12 o'clock on the reverse rim. A pleasing specimen that is surprisingly unmellowed. *From The Searight Collection.* NGC ID# 274Z, PCGS# 3644

- 3429 1871 PR64 Red and Brown PCGS. CAC.** The obverse is predominantly wheat-gold while the reverse displays rich peach-red shades. A sharply struck near-Gem with only minor obverse carbon. TRUST and the right arrowhead are die doubled, as always on this scarce proof date. NGC ID# 22NH, PCGS# 3646

- 3430 1871 PR66 ★ Red and Brown NGC.** Lovely cherry-red, jade-green, orange-gold, and lemon toning graces both sides and is especially attractive on the reverse. Intricately struck and flashy. Moderate carbon near the large 2 limits the grade. TRUST and the right arrow are die doubled, as always on this scarce proof date. The sole Red and Brown specimen at NGC with a Star designation, though a PR67 ★ Red Cameo is also certified (8/13). NGC ID# 22NH, PCGS# 3646

**1871 Two Cent Piece, PR65+ Red
Rare Any Finer**

3431 1871 PR65+ Red NGC. It is estimated that about 960 proof two cent pieces were struck in 1871 and the date is quite rare in grades above the Gem level. The original orange-red surfaces of this high-end Gem display an occasional light brown freckle, and show minimum signs of contact. The design elements are sharply detailed throughout and the fields are deeply reflective. Census: 30 in 65 (1 in 65+) Red, 8 finer (8/13). NGC ID# 22NH, PCGS# 3647

3432 1872 PR65+ Red and Brown NGC. CAC. Rich luster along with attractive gold and brown color provide this Gem with a strong degree of visual appeal. Scattered flyspecks of carbon are present. A pleasing, well struck example. Census: 1 in 65+ Red and Brown, 39 finer (8/13). NGC ID# 2752, PCGS# 3649

**1872 Two Cent, PR66 Red and Brown
Vibrant Toning**

3433 1872 PR66 Red and Brown PCGS. Vivid colors emanate from the obverse of this Premium Gem, including bright pink, cherry-red, lemon-lime, apple-green, and yellow. The same colors appear on the reverse, though they are smaller and more scattered. Bright, lustrous surfaces and boldly defined design elements add to the appeal of this tremendous example. Population: 17 in 66 Red and Brown, 1 finer (8/13). NGC ID# 2752, PCGS# 3649

**1873 Two Cent Piece, PR63 Red
Closed 3 Original**

3434 1873 Closed 3 PR63 Red PCGS. The 1873 is a proof-only date that ended the denomination. The mintage consisted of 600 Closed 3 proofs and 500 Open 3 pieces, with the latter delivery regarded as a restrike, though they could also have been struck in 1873. The present Closed 3 specimen is fully struck with flashy orange-gold and cherry-red surfaces. A few flecks are noted within the shield. Certified in a first generation holder. NGC ID# 2753, PCGS# 3653

**1873 Open 3 Two Cent, PR64 Red and Brown
Gorgeous Toning**

3435 1873 Open 3 PR64 Red and Brown PCGS. The Open 3 strikings are generally considered to be restrikes, and are easily identified by weakness in the center of the shield. Attractive intermingled shades of apple-green, vibrant orange, cherry-red, and golden-brown provide this near-Gem coin with a strong degree of visual appeal. Pleasing luster and a sharp strike are additional attributes of this piece. A few tiny, scattered marks are present. Housed in a first-generation holder. Population: 61 in 64 (1 in 64+) Red and Brown, 25 finer (8/13). NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

3436 1851 MS65 PCGS. CAC. An attractive Gem specimen from the first year of the denomination, this coin displays well-preserved surfaces with vibrant mint luster and vivid shades of lavender-gray, ice-blue, and greenish-gold toning. NGC ID# 22YX, PCGS# 3664

3437 1851-O MS63 PCGS. CAC. A lovely Select representative, this coin displays light toning in shades of gold, olive-green and peach along with a few gray freckles. The outer edges of the reverse include cherry-red, lime-green, orange, and golden-brown. A small piece of lint was encapsulated with the coin, as viewed on the obverse. Encased in a first generation holder. NGC ID# 22YY, PCGS# 3665

3438 1852 MS66+ PCGS. CAC. Light silver-blue and gold colors with touches of deeper rose near the rims grace this carefully preserved second-year three cent silver. Frosty underlying luster has soft and pleasing swirls. NGC ID# 22YZ, PCGS# 3666

3439 1853 MS66 PCGS. CAC. Shades of silver, champagne, violet, and ice-blue appear on this Premium Gem representative of the no outline to star design. Splashes of darker gray-green color are present on both sides, primarily at the peripheries. As-made strike-throughs are present on both sides, particularly on the central reverse. Population: 55 in 66 (1 in 66+), 6 finer (8/13). NGC ID# 22ZZ, PCGS# 3667

3440 1855 MS63 PCGS. CAC. This attractive Select specimen shows well-detailed design elements with slightly subdued mint luster under dusky lavender-gray and champagne-gold toning. Population: 16 in 63, 64 finer (8/13). NGC ID# 22Z4, PCGS# 3671

3441 1856 MS64 PCGS. Lightly toned gold and dotted blue over pale silver surfaces. Broadly swirling luster makes for an appealing near-Gem, though peripheral details are soft.
Ex: CSNS Signature (Heritage, 4/2007), lot 1361; Summer FUN (Heritage, 7/2007), lot 240.
From The Searight Collection. NGC ID# 22Z5, PCGS# 3672

**1858 Three Cent Silver, MS66
Elusive Final Type Two Issue**

- 3442 1858 MS66 PCGS. CAC.** An attractively toned Premium Gem with light, icy toning that includes hues of emerald-green, mint-green, copper-brown, and red. This is a very pleasing representative of the scarce Type Two three cent silver coinage. Minor clash marks appear on the reverse. Population: 32 in 66, 11 finer (8/13). NGC ID# 2227, PCGS# 3674

**1858 Three Cent Silver, MS66
Bold Clash Marks**

- 3443 1858 MS66 PCGS. CAC.** This is an interesting example of the scarce Type Two three cent silver coinage, showing bold clash marks on both sides. This piece also shows a small planchet lamination to the right of the date, as made. Pinkish-gold patina predominates, and the strike is better than normal for this strike-challenged issue. Population: 32 in 66, 11 finer (8/13). NGC ID# 2227, PCGS# 3674

- 3444 1859 MS65 PCGS.** Rich satin luster along with bright centers accented by peripheral toning provides this nicely detailed Gem with a lovely appearance. The toning on the obverse is particularly attractive and includes shades of red, orange, yellow, and green. Population: 27 in 65, 15 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 2228, PCGS# 3677

- 3445 1859 MS65 PCGS.** An impressive Gem trime, with well-detailed design elements and satiny mint luster under dark shades of pink, blue, gray, and sea-green toning. Population: 27 in 65, 15 finer (8/13). NGC ID# 2228, PCGS# 3677

- 3446 1860 MS65 NGC.** Dappled green-gold, blue, and gray shadings embrace this softly frosted Gem. The upper reverse stars are soft but detail is better elsewhere. Census: 21 in 65, 5 finer (8/13). NGC ID# 2229, PCGS# 3678

- 3447 1862 MS65 NGC. CAC.** The reverse is ocean-blue, as is the right obverse margin. The remainder of the obverse is peach-gold and stone-gray with splashes of plum-red and navy-blue on the star. This Civil War Gem is lustrous and unabraded. Housed in a pre-hologram holder. NGC ID# 222B, PCGS# 3680

- 3448 1862 MS66 PCGS. CAC.** Light olive-gold toning adorns this pristine and lustrous Premium Gem. An incomplete strike is all that limits the grade. Coined from clashed dies and housed in a green label holder. NGC ID# 222B, PCGS# 3680

- 3449 1862 MS66 PCGS. CAC.** Intermingled shades of sea-green, teal, and copper-brown are present on both sides of this Premium Gem coin. The design elements exhibit bold definition, adding to the eye appeal. Only 11 examples have been awarded higher numeric grades by PCGS (8/13).
From The Strawberry Fields Collection. NGC ID# 222B, PCGS# 3680

- 3450 1862 MS66 PCGS. CAC.** A well-detailed Premium Gem from the early days of the Civil War, this coin offers vibrant mint luster under shades of golden-brown and lavender-gray toning. PCGS has graded 11 numerically finer examples (8/13). NGC ID# 222B, PCGS# 3680

- 3451 1864 MS62 NGC.** Peach interiors are broad with blue and green bands around. An uncommon example of a Mint State three cent silver coin struck after 1862, as most such pieces from the last decade of the design were melted. NGC ID# 22ZE, PCGS# 3684

- 3452 1869 MS61 NGC.** A faint touch of blue visits watery silver fields. An unusual late-date Mint State three cent silver from the mass-melted era. Census: 3 in 61, 38 finer (8/13). NGC ID# 22ZK, PCGS# 3689

- 3453 1870 MS66 PCGS.** A visibly reflective Premium Gem from a heavily melted circulation-strike issue of just 3,000 pieces. Golden overtones are more prominent on the obverse. Population: 7 in 66, 1 finer (8/13). NGC ID# 22ZL, PCGS# 3691

PROOF THREE CENT SILVER

- 3454 1865 PR62 PCGS.** This low-mintage date had a proof emission limited to only 500 pieces. Intermingled shades of yellow-gold, teal, copper, and violet appear on this pleasing example along with a few darker spots of toning. A couple of small die cracks extend from the rim to the left of the date. NGC ID# 27CB, PCGS# 3715

- 3455 1867 PR66 NGC.** The obverse of this piece is particularly appealing, with the patina including hues of apple-green, cherry-red, yellow-green, electric-blue, jade, and grape. The reverse primarily displays champagne, green, and red colors. Areas of reflectivity remain evident beneath the toning. This Premium Gem also exhibits a strong degree of design detail. Census: 25 in 66, 9 finer (8/13). NGC ID# 27CD, PCGS# 3717

- 3456 1867 PR64 Cameo PCGS. CAC.** The sharply detailed design elements of this delightful Choice specimen display rich mint frost that contrasts dramatically with the deeply reflective fields. Population: 16 in 64 Cameo, 23 finer (8/13). PCGS# 83717

**1867 Three Cent Silver, PR66 Cameo
Only 625 Pieces Struck**

- 3457 1867 PR66 Cameo PCGS.** Only 625 proof three cent silver coins were struck in 1867, making the issue very rare in high grade today. This remarkable Premium Gem exhibits sharply detailed frosty design elements that create distinct cameo contrast with the deeply mirrored fields. Population: 7 in 66 Cameo, 4 finer (8/13). PCGS# 83717

1868 Three Cent Silver, Beautifully Toned PR67
Low Availability in High Grades

3458 1868 PR67 NGC. Proof three cent silver pieces from the 1860s are popularly used as type coins. Few are actually available as Superb Gem proofs, but lesser grades can be obtained with some searching. This brightly reflective proof shows superior toning on each side with lovely shades of pinkish-rose and sky-blue present. A nearly flawless proof striking. Census: 5 in 67, 0 finer (8/13). NGC ID# 27CE, PCGS# 3718

3459 1871 PR64 Cameo PCGS. Gold-to-tan overtones are prominent on this late three cent silver proof. A touch of striking weakness at the lower reverse is typical. Wispy hairlines in the fields contribute to the grade. Population: 16 in 64 (1 in 64+) Cameo, 13 finer (8/13). *From The Searight Collection.* PCGS# 83722

1872 Three Cent Silver, Toned PR67
Among the Finest Known

3460 1872 PR67 NGC. This was the final year business strike three cent silver pieces were struck, and those are seldom available as only 1,000 pieces were produced. However, 950 proofs were minted, and this is among the finest. Each side displays mottled sea-green and pinkish-rose toning with brightly reflective mirrors evident in the fields. Only seven others have been so graded by NGC, none are finer at that service (8/13). NGC ID# 27CH, PCGS# 3723

3461 1873 PR50 ANACS. An unusual lightly rubbed example of this proof-only issue that finished the three cent silver series. The deep green-gold and lavender-blue shadings of the obverse have lighter echoes on the reverse. Housed in a small-format holder. NGC ID# 27CJ, PCGS# 3724

3462 1873 PR65 PCGS. Final year of the series with only 600 pieces believed struck, all proofs. Deep, variegated blue and golden toning is seen in equal measure over each side, and equally deep mirrors are present in the fields. A strong presence of mint frost is evident over the devices, and were it not for the depth of color this piece would merit consideration as a Cameo. Population: 52 in 65, 13 finer (8/13). NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKELS

1866 Three Cent Nickel, MS66
Interesting Clash Marks

3463 1866 MS66 PCGS. CAC. The design elements of this spectacular Premium Gem were strongly impressed, but the ribbon bow shows incomplete detail due to excessive die polishing. The well-preserved surfaces show interesting clash marks and die breaks but no mentionable signs of contact. Population: 25 in 66 (2 in 66+), 2 finer (8/13). NGC ID# 22NK, PCGS# 3732

3464 1873 Closed 3 MS65 PCGS. CAC. All proofs are of the Closed 3 type. This sharply detailed Gem exhibits slightly reflective surfaces with hints of pale gold toning. Population: 33 in 65, 10 finer (8/13). NGC ID# 2758, PCGS# 3739

3465 1873 Open 3 MS64 PCGS. CAC. An attractive Choice example of the 1873 three cent nickel, with the Open 3 in the date. This lustrous well-detailed specimen shows interesting clash marks on both sides. Population: 38 in 64, 24 finer (8/13). PCGS# 3740

3466 1873 Open 3 MS64+ PCGS. CAC. Gold-green, pale blue, and nickel-white shadings converge on this three cent nickel with Open 3 logotype in the date. A small flyspeck is noted to the left of Liberty's lips. PCGS# 3740

3467 1874 MS65 PCGS. CAC. Few contemporary collectors bothered to save examples of the 1874 three cent nickel and Gem specimens are rare today. This lustrous Gem displays well-detailed design elements and well-preserved nickel-gray surfaces. Population: 34 in 65 (2 in 65+), 12 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 2759, PCGS# 3742

3468 1876 MS65 NGC. The 1876 three cent nickel had a low-mintage production of only 160,000 pieces, and Gems are elusive. Satiny pewter-gray surfaces provide both sides of this piece with attractive eye appeal. Minor clash marks are present on the obverse along with a few small as-made strike-throughs. A few carbon flyspecks appear, primarily on the reverse. Census: 18 in 65 (2 in 65+), 4 finer (8/13). NGC ID# 275A, PCGS# 3744

3469 1880 MS66 PCGS. This sharply detailed Premium Gem exhibits well-preserved nickel-gray surfaces with accents of champagne-gold toning and vibrant mint luster on both sides. Population: 57 in 66 (3 in 66+), 32 finer (8/13). NGC ID# 275C, PCGS# 3748

**1880 Three Cent Nickel, MS67
None Finer at PCGS**

3470 1880 MS67 PCGS. CAC. From a low mintage of just 21,000 pieces, this spectacular Superb Gem exhibits sharply detailed design elements and vibrant mint luster throughout. Close inspection with a loupe reveals no mentionable distractions on the well-preserved nickel-gray surfaces. Population: 32 in 67, 0 finer (8/13). NGC ID# 275C, PCGS# 3748

3471 1887 MS66 PCGS. CAC. From a minuscule mintage of just 5,001 pieces, the 1887 three cent nickel is very rare in MS66 condition. This well-detailed example displays vibrant mint luster and traces of pale gold and lavender toning. Population: 10 in 66, 1 finer (8/13). NGC ID# 22NU, PCGS# 3755

PROOF THREE CENT NICKELS

3472 1866 PR65 PCGS. CAC. The sharply impressed design elements show incomplete detail on the ribbon bow due to lapping. The well-preserved surfaces display slightly hazy reflectivity with accents of pale gold toning. Population: 51 in 65, 24 finer (8/13). NGC ID# 275L, PCGS# 3762

3473 1866 PR65 Cameo PCGS. CAC. The design elements of this delightful Gem are sharply detailed throughout and the deeply reflective fields contrast starkly with the frosty devices. A few hints of champagne-gold toning add to the outstanding eye appeal. Population: 31 in 65 Cameo, 14 finer (8/13). PCGS# 83762

3474 1867 PR66 Deep Cameo PCGS. CAC. The fully struck frosty design elements of this spectacular Premium Gem contrast dramatically with the deeply mirrored fields and attractive shades of champagne-gold toning add to the terrific eye appeal. Population: 4 in 66 Deep Cameo, 0 finer (8/13). PCGS# 93763

3475 1869 PR65 Deep Cameo PCGS. Remarkably well-contrasted for a proof three cent nickel, including deep "black" mirrors and intensely frosted devices, particularly the portrait. Great all-around eye appeal. Population: 18 in 65 Deep Cameo, 6 finer (8/13). *Ex: Long Beach Signature (Heritage, 2/2005), lot 5788. From The Searight Collection.* PCGS# 93765

3476 1869 PR65 Deep Cameo PCGS. CAC. Pronounced mint frost and deeply mirrored fields confirm the Deep Cameo designation. This lustrous Gem is virtually untuned. A few tiny flyspecks of carbon are present on the reverse. A small as-made strike-through appears in Liberty's hair and a few small lint marks are seen at her neck. Population: 18 in 65 Deep Cameo, 6 finer (8/13). PCGS# 93765

3477 1870 PR65 Cameo PCGS. CAC. This spectacular Gem displays razor-sharp definition on all design elements and the deeply reflective fields are blanketed in shades of champagne-gold toning. Population: 33 in 65 Cameo, 9 finer (8/13). PCGS# 83766

3478 1873 Closed 3 PR66+ NGC. CAC. Gleaming nickel-white fields show faint glimmers of gold. Softly frosted devices lend an air of contrast, though neither side rises to the Cameo level. Census: 27 in 66 (1 in 66+), 5 finer (8/13). NGC ID# 275U, PCGS# 3769

3479 1873 Closed 3 PR66 Cameo PCGS. Hints of golden color grace this Closed 3 specimen of the 1873 three cent nickel. Light frost punches above its weight in creating contrast. Population: 13 in 66 (1 in 66+) Cameo, 1 finer (8/13). PCGS# 83769

3480 1875 PR66 PCGS. This delightful Premium Gem exhibits sharply detailed design elements and slightly reflective fields with a few hints of pale gold and lavender toning. Population: 15 in 66, 0 finer (8/13). NGC ID# 22NV, PCGS# 3771

3481 1875 PR66 NGC. CAC. Vivid shades of sea-green, champagne-gold, and lilac toning blanket the well-preserved reflective surfaces of this spectacular Premium Gem. From a mintage of 700 pieces. Census: 16 in 66 (2 in 66+), 0 finer (8/13). NGC ID# 22NV, PCGS# 3771

3482 1876 PR65 Deep Cameo PCGS. CAC. Profound cameo contrast is evident between the deeply mirrored fields of this spectacular Gem and the sharply detailed frosty design elements. A few hints of champagne-gold toning accent the well-preserved surfaces. Population: 7 in 65 Deep Cameo, 2 finer (8/13). PCGS# 93772

**1877 Three Cent Nickel, PR65
Key, Proof-Only Date**

3483 1877 PR65 PCGS. Only 510 pieces are believed to have been struck of the 1877 three cent nickel, all proofs. Quality varies from deeply mirrored to shallowly mirrored, a trait shared by the following year, also a proof-only run. This is a deeply reflective example, but the surfaces appear somewhat dim because of the moderate streaks of golden-rose and lilac toning seen over each side. No obvious flaws are seen. NGC ID# 275X, PCGS# 3773

3484 1878 PR66 Cameo PCGS. Lightly tinted green over much of the otherwise nickel-white surfaces. Subtly contrasted with a solid cameo effect for this proof-only issue. PCGS# 83774

3485 1878 PR66 Cameo PCGS. The radiant silver-white surfaces of this Premium Gem display only the slightest hint of patina, with bold contrast present between frosty devices and mirrored fields. Scattered minuscule as-made strike-throughs are present. Population: 86 in 66 (4 in 66+) Cameo, 20 finer (8/13). PCGS# 83774

3486 1878 PR66 Cameo PCGS. CAC. In 1878, only proofs were struck with a mintage of just 2,350 pieces. Essentially untuned, this is a pleasing Premium Gem coin with frosted devices and pleasingly mirrored fields. The 1878 is the second scarcest date in the series. Population: 86 in 66 (4 in 66+) Cameo, 20 finer (8/13). PCGS# 83774

- 3487 1879 PR66+ Cameo PCGS. CAC.** A splendid Premium Gem Cameo proof, this piece has strong eye appeal as the plus designation indicates. This well defined coin exhibits frosty luster and hints of champagne toning, particularly on the reverse. Population: 65 in 66 (2 in 66+) Cameo, 35 finer (8/13). PCGS# 83775

**1880 Three Cent, PR67 Cameo
Among the Finest Certified**

- 3488 1880 PR67 Cameo PCGS. CAC.** A fair number of the nearly 4,000 proof three cent nickels struck in 1880 have survived to the present day. PCGS has graded more than 1,100 pieces, fewer than 70 of which they have designated Cameos (6%). This Superb Gem Cameo is one of the eight finest seen at both PCGS and NGC. Mirrored fields highlight the sharply struck devices. An exquisitely preserved specimen. Population: 4 in 67 Cameo, 0 finer (8/13). PCGS# 83776
- 3489 1883 PR67 PCGS.** Green-gold overtones grace surfaces with watery luster. The reverse detail is crisp, though minor softness affects the portrait. This Superb Gem specimen illustrates the difficulty sometimes found in telling proofs from business strikes for an issue where the former outnumber the latter. Population: 63 in 67, 4 finer (8/13). NGC ID# 2765, PCGS# 3779
- 3490 1884 PR67 Cameo PCGS. CAC.** Sharply detailed in most areas, this spectacular Superb Gem shows slightly incomplete detail on the ribbon knot, due to die lapping. The frosty devices contrast boldly with the mirrored fields and eye appeal is outstanding. Population: 21 in 67 Cameo, 2 finer (8/13). PCGS# 83780
- 3491 1886 PR67 PCGS. CAC.** A lovely Superb Gem representative of this popular proof-only issue, the last such date in the proof three cent nickel series. Faint almond-gold toning appears on both sides. The lower portion of the wreath reveals a few flyspecks of green. Population: 47 in 67, 3 finer (8/13). NGC ID# 2768, PCGS# 3782
- 3492 1887/6 PR66 PCGS. FS-302.** Clear remnants of the underlying 6 are visible on the lower left side of the 7. Both 8s are repunched. Straw-gold toning adorns this satiny and well struck Premium Gem. Exemplary despite a small strike-through near the E in UNITED. Population: 55 in 66, 4 finer (8/13). NGC ID# 276A, PCGS# 3784
- 3493 1888 PR67 ★ NGC.** Although not designated as a Cameo, this coin shows distinct elements of contrast between the sharply detailed frosty design elements and the deeply mirrored fields. A few hints of pale gold toning add to the outstanding eye appeal. Census: 2 in 67 ★, 2 in 67 ★ Cameo, none finer (8/13). NGC ID# 276B, PCGS# 3785

EARLY HALF DIMES

1794 V-4, LM-4 Half Dime VF Details

- 3494 1794 — Altered Surfaces — PCGS Genuine. VF Details. V-4, LM-4, R.4.** This scarce die marriage is actually one of the two most frequently seen die combinations for 1794 half dimes, as the other two varieties are substantially rarer. The lighter to medium gray surfaces show some areas of light silver-gray with minor marks and a few trivial to moderate scratches.
- 3495 1795 — Cleaning — PCGS Genuine. VF Details. V-5, LM-8, R.3.** LM-8 is familiar to specialists and often attributed by the slender die crack from Liberty's nose to the rim at 1:30. The present lightly cleaned representative displays deep gunmetal toning and has a shallow strike-through on the portrait. NGC ID# 22ZV, PCGS# 4251
- 3496 1796 LIBERTY — Damage — PCGS Genuine. Fine Details. V-1, LM-1, R.3.** Liberty's hair and the eagle's wings are nicely detailed, but this deep gunmetal-gray half dime has areas of dark residue and both sides display a number of wispy thin abrasions. NGC ID# 22ZX, PCGS# 94254
- 3497 1797 16 Stars — Obverse Scratched — NGC Details. VF. V-4, LM-2, R.4.** A thin vertical pinscratch across the portrait confirms the NGC notation. Otherwise, this stone-gray and charcoal representative displays only trivial marks. Peripheral elements are sharp though the centers are lightly impressed, as usual for the variety. NGC ID# 22ZZ, PCGS# 4259
- 3498 1800 — Cleaned — ANACS. AU53 Details. V-1, LM-1, R.3.** This Jefferson-era half dime has caramel-gold, slate-gray, and aquamarine toning. Marks are absent save for a line above the hair ribbon and moderate contact on Liberty's face. Hairlines are present but inoffensive. NGC ID# 2326, PCGS# 4264

1803 V-2, LM-3 Half Dime, VF25 Large 8 Obverse

- 3499 1803 Large 8 VF25 PCGS. V-2, LM-3, R.3.** The Large 8 obverse is recognized by the size of the 8 that is taller than the adjacent 1, and the digit 3 that is distant from 180. Two die marriages are known for this obverse die. Intermingled olive-gray and charcoal patina appear on both sides of this moderately worn Draped Bust half dime. Trivial scratches and surface marks are mostly evident on the obverse. From The Searight Collection. NGC ID# 2329, PCGS# 4269

BUST HALF DIMES

- 3500 1830 MS63 PCGS. CAC. V-1, LM-14, R.3.** This exquisite Select Capped Bust type coin exhibits dynamic luster and pleasing surfaces. Dashes of walnut-brown toning visit the central obverse, but the coin is otherwise brilliant save for dark patina near OF and UNUM. Certified in a green label holder. NGC ID# 232C, PCGS# 4277
- 3501 1831 MS64 PCGS. CAC. V-1, LM-6, R.1.** Light to medium almond-gold toning graces coruscating and sharply struck surfaces. The surfaces are clashed but essentially unabraded. A charming near-Gem Bust type coin. NGC ID# 232D, PCGS# 4278
- 3502 1832 MS64 PCGS. V-2, LM-12, R.2.** Delicate gold toning graces lustrous and carefully preserved surfaces. Traces of charcoal patina visit reverse peripheral letters. Well struck, since blending on the horizontal shield lines is characteristic of the variety. *From The Searight Collection.* NGC ID# 232E, PCGS# 4279
- 3503 1832 MS64 PCGS. V-9, LM-7, R.2.** Cherry-red, orange-gold, and jade-green toning blankets this lustrous and sharply struck Choice type coin. The reverse is pristine and the obverse has only unimportant marks. The reverse is lightly strike doubled. NGC ID# 232E, PCGS# 4279

1833 V-8, LM-6 Half Dime, AU53 Rare Die Marriage

- 3504 1833 AU53 PCGS. V-8, LM-6, R.6.** The final 3 is above the base line for the other digits, and the final A joins the arrowhead on the heavily lapped reverse. The lower reverse shows extensive lapping with thin arrow shafts and the lower arrow feathers almost entirely absent. The berries are absent and other details are attenuated. Only two or three finer examples of this variety are known. Both sides show light wear with delicate gold and iridescent toning over the satiny silver surfaces. A small scrape in the right obverse field is the only significant blemish. NGC ID# 232F, PCGS# 4280
- 3505 1837 Large 5C MS64 NGC. V-1, LM-5, R.1.** A well-detailed Choice example of the popular LM-5 variety, with a recut first A in AMERICA, this coin displays sparkling mint luster and shades of green, turquoise, and amber toning. Census: 38 in 64, 18 finer (8/13). NGC ID# 232K, PCGS# 4289

SEATED HALF DIMES

1837 Half Dime, Lustrous MS65 No Stars, Small Date Variant

- 3506 1837 No Stars, Small Date (Flat Top 1) MS65 PCGS. CAC.** Glowing luster radiates from surfaces covered with a mix of light to medium-intensity cobalt-blue, violet-gray, reddish-gold, and yellow-gold patina. The design elements are sharply impressed, as is typical for the issue. Well preserved, with just a few grade-consistent marks. Population: 24 in 65, 14 finer (8/13). *Ex: Central States Signature (Heritage, 4/2008), lot 526.* *From The Searight Collection.* NGC ID# 232M, PCGS# 4312
- 3507 1840-O No Drapery MS62 PCGS.** Small O, Closed Bud. Star 5 is widely repunched. This satiny straw-gold and dove-gray New Orleans representative has a typical strike and only minor field marks. *Ex: Dallas Signature (Heritage, 7/2006), lot 555, which realized \$1,897.50.* *From The Searight Collection.* NGC ID# 232V, PCGS# 4322
- 3508 1845 MS65 PCGS.** The 1845 Seated Liberty half dime is seldom encountered in Gem condition. This attractive specimen is well-detailed and lustrous, with vivid cobalt-blue and golden-brown toning. Population: 18 in 65, 24 finer (8/13). NGC ID# 2337, PCGS# 4335
- 3509 1849 MS65 NGC.** A quick first glance at this stunning, brilliant Gem might suggest a proof strike, as the fields are fully reflective around boldly detailed and lustrous devices. Closer examination reveals that it is, in fact, a wonderful business strike. A minuscule spot is present in the field near Liberty's right shoulder, but it is not distracting. Census: 9 in 65, 9 finer (8/13). *Ex: Long Beach Signature (Heritage, 10/2000), lot 6104; FUN Signature (Heritage, 1/2009), lot 2103.* NGC ID# 233D, PCGS# 4341
- 3510 1853 Arrows MS65 PCGS.** Close inspection reveals several clash marks on both sides of this spectacular Gem, with sharply detailed design elements and vibrant mint luster under shades of champagne-gold and cerulean-blue toning. Population: 54 in 65, 41 finer (8/13). *From The Searight Collection.* NGC ID# 233Y, PCGS# 4356
- 3511 1853 Arrows MS66 NGC.** An impeccably preserved Premium Gem specimen of this popular short-lived design, this coin offers well-detailed design elements and vibrant mint luster, with highlights of pale gold and ice-blue toning. Census: 47 in 66 (2 in 66+), 14 finer (8/13). NGC ID# 233Y, PCGS# 4356
- 3512 1853 Arrows MS66 NGC.** A well struck, colorfully toned Premium Gem representative, this coin has a strong degree of eye appeal. Gold, cherry-red, and frosty green-blue color appear. Clash marks are present on both sides. Encapsulated in a prior generation holder. Census: 47 in 66 (2 in 66+), 14 finer (8/13). NGC ID# 233Y, PCGS# 4356
- 3513 1856 MS66+ PCGS. CAC.** This high-end Premium Gem is well-detailed and lustrous under dusky shades of silver-gray and golden-brown toning. Population: 11 in 66 (2 in 66+), 0 finer (8/13). NGC ID# 233P, PCGS# 4363

3514 1858-O MS66 PCGS. CAC. Several die cracks appear on this piece, including one that extends from the obverse rim near 12 o'clock, through Liberty's face and down to the back of her right knee. Intermingled shades of multicolor toning are present on both sides. The colors include champagne, cherry-red, golden-brown, red-brown, and green. The obverse also displays clash marks. An interesting and attractive coin. Population: 6 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 233V, PCGS# 4369

3515 1860 MS66 PCGS. CAC. The first date with UNITED STATES OF AMERICA on the obverse, this attractive Premium Gem displays well-detailed design elements and satiny luster under shades of pale gold and lavender toning. Population: 56 in 66 (3 in 66+), 40 finer (8/13). NGC ID# 2347, PCGS# 4377

3516 1861 MS66 PCGS. CAC. Considerable silver brilliance appears alongside vivid cobalt-blue, violet, and gold toning on this frosty and lustrous Premium Gem. Great eye appeal. Population: 23 in 66 (1 in 66+), 2 finer (8/13). NGC ID# 2349, PCGS# 4379

3517 1868 MS65 PCGS. A lovely satiny Gem, this piece displays full luster beneath a blend of sky-blue and yellowish-gold toning. Splashes of copper color are also present. The design motifs exhibit a pleasing level of detail. A few minor marks appear near the top portion of the central design on the obverse. Population: 12 in 65, 11 finer (8/13). NGC ID# 234N, PCGS# 4392

PROOF SEATED HALF DIMES

3518 1859 PR64 NGC. The hollow-centered stars was a Paquet subtype used only on 1859 Philadelphia half dimes and the 1860 and 1861 Transitional patterns. Well struck and satiny with smooth surfaces beneath rich tobacco-brown and navy-blue toning. NGC ID# 235P, PCGS# 4438

3519 1864 PR64 Cameo PCGS. Exquisitely struck, with bright reflective surfaces that are minimally marked and contrast dramatically with the frosty design elements. Population: 7 in 64 (1 in 64+) Cameo, 11 finer (8/13).
From The Searight Collection. PCGS# 84447

3520 1865 PR67 Cameo NGC. Peach-gold interiors with blue at the rims, the band wider on the obverse. Distinctly contrasted with obvious reflectivity and eye appeal in spades. PCGS# 84448

1869 Half Dime, PR66 Cameo Significantly Toned With Strong Proof Mirrors

3521 1869 PR66 Cameo PCGS. Only 600 proofs were struck of this Legend Obverse half dime. Of that number, surprisingly few have survived in high grade and with cameo contrast. The fields seen here are brightly mirrored, but each side is covered with a significant amount of deep reddish patina accented by sky-blue. Population: 3 in 66 Cameo, 0 finer (8/13). PCGS# 84452

3522 1871 PR65 Cameo PCGS. CAC. The cameo contrast is apparent on this pleasing Gem representative displaying highly reflective fields. Toning is present in rich colors that include teal, copper, and plum. The upper left portion of the wreath exhibits incompleteness of strike. Population: 7 in 65 Cameo, 8 finer (8/13). PCGS# 84454

3523 1872 PR64 Cameo NGC. CAC. Faint champagne toning appears on both sides of this appealing near-Gem Cameo example. The coin exhibits strong visual appeal and a bold level of design detail. Areas of sea-green toning are present on portions of the obverse rim. Census: 6 in 64 Cameo, 18 finer (8/13).
From The Strawberry Fields Collection. PCGS# 84455

EARLY DIMES

1796 JR-2 Dime, XF Details

3524 1796 — Mount Removed — NGC Details. XF. JR-2, R.4. This Small Eagle dime has substantial design definition and exhibits luster within the curls, wreath, and legends. Dipped but lightly retoned almond-gold. Liberty's neck is granular and the edge is discolored near the 7 in the date.
From The Joan Carroll Collection.

3525 1802 Fair 2 PCGS. JR-2, R.5. A dove-gray example of this rare Heraldic Eagle date. Three-quarters of the date is sharp, though only the IB in LIBERTY is clear. The bust is mostly outlined. The reverse appears Good except for the lower right quadrant, which is well worn. NGC ID# 236K, PCGS# 4472

3526 1802 Good 6 PCGS. JR-4, R.4. Cream-gray devices contrast slightly with lavender fields. All letters are distinct from the rim save for the CA in AMERICA. Obverse stars 10 to 12 are also partly faded, and a thin mark passes through the 18 in the date. A rare date, since PCGS and NGC combined have certified only 97 examples (8/13).
Ex: Beau Clerc Collection (Heritage, 9/2007), lot 921, which realized \$2,530.
From The Searight Collection. NGC ID# 236K, PCGS# 4472

1805 JR-2 Dime, AU50 Four Berries Reverse

3527 1805 4 Berries AU50 NGC. CAC. JR-2, R.2. The two known 1805 dime varieties are easily identified by the berry count on the reverse, either four or five berries, and both are listed in the Guide Book. The Four Berries reverse is seen more frequently. This lovely example has beautiful sea-green and gold toning over satin luster with slight wear on the high points. Scattered marks on both sides are inconsequential. A splendid example for the variety specialist or the date collector.
From The Joan Carroll Collection. NGC ID# 236S, PCGS# 4477

BUST DIMES

- 3528 1821 Large Date MS62 NGC. JR-5, R.3.** Stars 3 and 6 are repunched, and the M is defective on this important Capped Bust dime variety. Both sides have frosty silver luster beneath pleasing gold and iridescent toning. A splendid specimen for the date collector or variety specialist. NGC ID# 236Y, PCGS# 4496
- 3529 1822 Good 6 PCGS. JR-1, R.4.** The sole dies for this elusive date. A few letters in E PLURIBUS UNUM are worn but LIBERTY and all peripheral legends are readable. Sea-green, mauve, and peach-gold toning aids the eye appeal. Certified in a green label holder. NGC ID# 236Z, PCGS# 4497
- 3530 1831 MS62 PCGS. JR-1, R.1.** A frosty Mint State example of the plentiful JR-1 variety, ideal for date or type collectors. This piece has brilliant silver luster with hints of light gray toning. NGC ID# 237B, PCGS# 4520

1831 JR-1 Dime, MS64 Popular Type Coin

- 3531 1831 MS64 NGC. JR-1, R.1.** The six known varieties of 1831 dimes are rated R.1 through R.3, so the most difficult varieties are only slightly scarce. This Choice Mint State piece has a bold strike and satin luster that shines through the lovely magenta and blue toning. Census: 53 in 64 (1 in 64+), 41 finer (8/13) for all 1831 varieties. NGC ID# 237B, PCGS# 4520

1832 JR-1 Dime, Near-Gem Multicolor Patination

- 3532 1832 MS64 NGC. JR-1, R.2.** The repunched C in AMERICA is diagnostic for the die marriage. The obverse has an aquamarine border and a dove-gray center. The reverse is primarily russet-brown despite a forest-green margin. Satiny and minimally abraded with a precise strike and good eye appeal. NGC ID# 237C, PCGS# 4521
- 3533 1835 MS62 NGC. JR-4, R.2.** An untoned and crisply struck Capped Bust type coin. There are no noticeable marks, and luster is particularly bright at the borders. Though earlier die states of JR-4 have a clearly repunched date, the 83 show only faint recutting on the present piece. NGC ID# 237F, PCGS# 4527
- 3534 1835 MS63 NGC. JR-1, R.1.** Both Mint State and proof coins were struck from this die pair, and the present Select Mint State specimen is an early die state with slightly prooflike surfaces, likely struck just after the proofs were minted. Both sides exhibit a sharp strike and satin luster under magenta and gold toning. NGC ID# 237F, PCGS# 4527

1835 JR-1 Dime, MS64 Ideal Type Coin

- 3535 1835 MS64 PCGS. JR-1, R.1.** Only two of the nine 1835 dime varieties are truly common and rated R.1. They are JR-1 with a Fancy 8 date style, and JR-5 with a Block 8. Those two varieties are ideal for date or type collectors, while still a necessary part of a specialized variety collection. The additional demand counteracts the plentiful supply of these coins. This Choice Mint State specimen is a lovely example of the JR-1 with the Fancy 8 featuring frosty luster, excellent design definition, and delicate gold toning on the reverse. Population: 71 in 64 (1 in 64+), 20 finer (8/13) for all 1835 varieties. NGC ID# 237F, PCGS# 4527

SEATED DIMES

- 3536 1838-O No Stars AU58 PCGS.** This is an attractive near-Mint survivor that does not show any large marks or any obvious highpoint wear on either side. The fields have a mildly granular appearance, and dappled earth tones predominate over both sides. This was the only No Stars Seated dime produced at the New Orleans Mint. Population: 17 in 58, 34 finer (8/13). *From The Searight Collection.* NGC ID# 237T, PCGS# 4564
- 3537 1838 Large Stars MS64 NGC.** This is a lovely near-Gem representative of the first year of the Obverse Stars design type. An impressive specimen, this dime exhibits sharply detailed design elements along with subtle satiny mint luster. The surfaces are attractively patinated in shades of gray and gold. A thin streak of as-made struck-in grease appears near 3 o'clock on the reverse. *From The Joan Carroll Collection.* NGC ID# 237U, PCGS# 4568
- 3538 1839 No Drapery MS64 NGC.** Even when held at a distance, this near-Gem coin displays a pleasing appearance. Closer examination only adds to the appeal, with attractive toning that includes shades of lemon-yellow, sea-green, gold, copper, and plum. In addition, the devices exhibit a bold level of detail. Census: 37 in 64 (1 in 64+), 63 finer (8/13). NGC ID# 237X, PCGS# 4571
- 3539 1839-O No Drapery MS62 PCGS. Fortin-105.** Large O. Light almond-gold toning accompanies lustrous and crisply struck early New Orleans dime. The few minor field grazes are unimportant for the grade. Population: 7 in 62, 15 finer (8/13). *From The Searight Collection.* NGC ID# 237Y, PCGS# 4572
- 3540 1856-O Repunched Date AU55 PCGS. Fortin-104.** Large O. The date is repunched with a pronounced upward slope. Vestiges of the initial logotype are beneath the 56 in the date. A problem-free almond-gold Choice AU example. Despite a fairly high mintage, the 1856-O is elusive in better circulated grades. Population: 11 in 55, 25 finer (8/13). NGC ID# 238V, PCGS# 4612
- 3541 1857 MS65 NGC.** This golden jewel is well-struck save for softness on stars 12 and 13 on the obverse rim, where there is also a tiny patch of circular scrapes in the field as well, an apparent attempt at effacing a couple of small flaws. Pleasing otherwise. Census: 34 in 65, 13 finer (8/13). NGC ID# 238X, PCGS# 4614
- 3542 1860-O Fine 12 PCGS.** Though this antebellum dime has sustained considerable wear, all letters of LIBERTY remain clear. Light gray surfaces show a faint gold-orange overtone. Population: 6 in 12, 53 finer (8/13). NGC ID# 239E, PCGS# 4632

- 3543 1862 MS65 PCGS.** Light toning in shades of champagne and golden-brown adds to the eye appeal of this Gem representative. The surfaces are satiny overall, but possess a hint of flash. Population: 16 in 65, 17 finer (8/13). NGC ID# 239H, PCGS# 4635
- 3544 1862 MS65 NGC.** The 1862 Seated Liberty dime was hoarded during the Civil War but high-grade specimens are rare in today's market. This well-detailed Gem shows slightly subdued mint luster under dusky champagne-gold and lavender-gray toning. Census: 30 in 65, 16 finer (8/13). NGC ID# 239H, PCGS# 4635
- 3545 1865 VF30 NGC.** This midrange piece has a range of gray shadings, pearl at the worn areas with sage and charcoal through the fields. The reverse adds a touch of tan. From an important issue of just 10,000 business strikes. NGC ID# 239P, PCGS# 4641
- 3546 1867-S AU53 PCGS. CAC.** Golds and reds add color to otherwise medium-gray surfaces. A subtly lustrous S-mint from early in the post-Civil War era and conditionally rare. Population: 2 in 53, 16 finer (8/13). NGC ID# 239V, PCGS# 4646
- 3547 1876 MS66 PCGS. CAC.** Type One Reverse. A lustrous, lightly toned, and well preserved Seated type coin. The upper left reverse has an area of prooflike finish, as made. Struck from clashed dies. Population: 20 in 66 (2 in 66+), 3 finer (8/13). NGC ID# 23AH, PCGS# 4679

**1876 Dime, Superb Gem
Finest CAC Example**

- 3548 1876 MS67 NGC. CAC.** Type One Reverse. Vibrant walnut-brown, ocean-blue, and plum-mauve toning encompasses coruscating and pristine surfaces. 1876 was the peak date of Seated dime production, as the three mints then in operation coined more than 30 million pieces during the Centennial year. Superb Gems are nonetheless rare. The sole CAC example at the MS67 level. Census: 6 in 67, 1 as 67 ★, none finer (8/13). NGC ID# 23AH, PCGS# 4679
- 3549 1877 MS66+ NGC. CAC.** Type Two Reverse. An essentially brilliant and high grade Seated type coin with potent luster and and exemplary preservation. The strike is sharp at the centers though Liberty's head and foot are soft. Census: 24 in 66 (1 in 66+), 6 finer (8/13). NGC ID# 23AL, PCGS# 4682
- 3550 1877-CC MS64 PCGS. CAC. Fortin-118.** Type Two Reverse. The base of the first 7 in the date is repunched. A prooflike and intricately struck near-Gem with deep orange-gold and lilac-red toning. Sharply struck and unmarked. *From The Strawberry Fields Collection.* NGC ID# 23AM, PCGS# 4683
- 3551 1879 MS66 NGC.** A sharply detailed Premium Gem with remarkable prooflike fields and a few hints of pale gold toning. Census: 39 in 66 (2 in 66+), 30 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 23AS, PCGS# 4687
- 3552 1879 MS66 PCGS. CAC.** This impressive Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are blanketed in shades of lavender-gray, pale gold, and amber toning. Population: 63 in 66 (4 in 66+), 26 finer (8/13). NGC ID# 23AS, PCGS# 4687

- 3553 1881 MS66 PCGS.** Only 24,000 Seated Liberty dimes were struck at the Philadelphia Mint in 1881 and Premium Gem survivors are very rare. This remarkable coin is well-detailed, with satiny mint luster and a few hints of pale gold toning. Population: 7 in 66, 1 finer (8/13). NGC ID# 23AU, PCGS# 4689
- 3554 1884 MS66 PCGS. CAC.** The outer edges exhibit areas of golden-brown, rose, and jade-green color on this Premium Gem example. A number of tiny die cracks are visible on the reverse. Population: 36 in 66 (1 in 66+), 23 finer (8/13). NGC ID# 23AX, PCGS# 4692
- 3555 1890 MS66 NGC.** Fortin-117a. The obverse diagnostics for this Fortin variety include a high date with a downward slope along with a die crack through portions of STATES OF AMERICA. The reverse diagnostic point is a retained cud between 7 and 9 o'clock. Colorful toning appears on both sides of this Premium Gem representative. The hues include yellow, green, rose-red, and plum. Census: 59 in 66 (2 in 66+), 10 finer (8/13). NGC ID# 23BB, PCGS# 4704
- 3556 1890 MS66+ NGC. CAC.** Dappled patina, gold-orange at the centers and blue-influenced at the margins, is loosely concentric. An impressively preserved example from this penultimate Philadelphia Seated dime issue. NGC ID# 23BB, PCGS# 4704
- 3557 1890-S MS65 NGC.** A well-struck coin, this Gem displays a pleasing level of design detail. Dark, mottled toning covers large portions of this piece and includes shades of jade-green and plum-gray. Census: 15 in 65, 7 finer (8/13). NGC ID# 23BC, PCGS# 4705

PROOF SEATED DIMES

- 3558 1858 PR64 PCGS.** A well-detailed Choice example, from the first year of commercial proof set offerings, this coin displays reflective surfaces under attractive shades of cerulean-blue and pale gold toning. Population: 27 in 64 (1 in 64+), 13 finer (8/13). *From The Searight Collection.* NGC ID# 23CC, PCGS# 4747

**1858 Dime, PR66
Borderline Cameo**

- 3559 1858 PR66 PCGS. CAC.** A silver proof set of 1858 is an attainable goal, and this Premium Gem proof dime would provide a nice starting point. Both sides are deeply mirrored beneath blue-green and iridescent toning with lightly frosted devices. Although undesignated, this borderline Cameo specimen has nice contrast beneath the toning. Population: 4 in 66, 0 finer (8/13). NGC ID# 23CC, PCGS# 4747
- 3560 1859 PR64 PCGS.** Lovely autumn-gold, navy-blue, and plum-red toning endows the margins of this flashy and nicely struck proof dime. Undisturbed and attractive. Certified in an old green label holder. NGC ID# 23CD, PCGS# 4748
- 3561 1859 PR65 PCGS. CAC.** Sharply detailed design elements and deeply reflective fields are the hallmarks of this attractive Gem, with vivid shades of lavender-gray, cerulean-blue, and champagne-gold toning. Population: 28 in 65, 20 finer (8/13). NGC ID# 23CD, PCGS# 4748
- 3562 1860 PR65 Cameo PCGS.** The mostly brilliant surfaces of this Gem Cameo display profound contrast, along with exquisitely struck design elements. Both sides lack mentionable marks. Population: 6 in 65 Cameo, 11 finer (8/13). PCGS# 84753

**1860 Seated Liberty Dime, PR67 Cameo
Brilliant Surfaces, Frosty Devices**

- 3563 1860 PR67 Cameo NGC.** This spectacular Superb Gem exhibits sharply detailed design elements, with a frosty texture that contrasts intensely with the deeply mirrored brilliant fields. The well-preserved surfaces show some interesting clash marks on both sides. Census: 6 in 67 (1 in 67+) Cameo, 3 finer (8/13). PCGS# 84753

- 3564 1863 PR65 PCGS. CAC.** This richly toned Civil War-era proof Gem dime has green-gold outer toning with fade-through to blue, violet, and rose on each side. The reverse adds skeins of the peripheral color within the wreath as well. Population: 9 in 65, 11 finer (8/13). NGC ID# 23BS, PCGS# 4756

1864 Dime, Brilliant PR66 Cameo

- 3565 1864 PR66 Cameo PCGS. CAC.** An important Civil War date with a low mintage for both business strikes and proofs. Only 11,000 coins were struck for circulation purposes, and 470 proofs were produced. Undoubtedly because of the low production run of proofs, a higher percentage of the remaining population show some degree of contrast. This is a brilliant coin that has strong contrast between the deeply reflective fields and the frosted devices. Essentially defect-free except for a couple of squiggly lint marks that were struck into the obverse at the time of manufacture. Population: 6 in 66 Cameo, 2 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2007), lot 991. PCGS# 84757

- 3566 1868 PR65 Cameo PCGS. CAC.** The deeply mirrored fields of this delightful Gem contrast boldly with the sharply detailed frosty design elements and the well-preserved surfaces show a few hints of champagne-gold toning. Population: 7 in 65 Cameo, 4 finer (8/13). PCGS# 84761

- 3567 1870 PR65 PCGS. CAC.** Deeply toned with green-gold and olive outer bands surrounding broad blue-to-violet centers. A lovely Gem proof from an issue of 1,000 specimens. Population: 22 in 65, 10 finer (8/13). NGC ID# 23CU, PCGS# 4763

- 3568 1871 PR66 NGC.** Both sides of this Premium Gem reveal splashes of toning in several shades. The colors include gold, moss-green, and jade-green on the obverse. The reverse displays hues of copper-gold, cobalt-blue, and plum. Scattered marks are present, primarily on the reverse. Census: 12 in 66, 4 finer (8/13). NGC ID# 23CV, PCGS# 4764

- 3569 1872 PR66 NGC.** This spectacular Premium Gem exhibits sharply detailed design elements throughout, with deeply mirrored fields under shades of champagne-gold and cerulean-blue toning. Census: 6 in 66, 2 finer (8/13). NGC ID# 23CW, PCGS# 4765

- 3570 1873 No Arrows, Closed 3 PR65 Cameo PCGS.** The sharply detailed frosty design elements of this delightful Gem exhibit intense cameo contrast with the deeply mirrored fields. A few wisps of pale gold toning enhance the mostly brilliant surfaces. Population: 9 in 65 (1 in 65+) Cameo, 3 finer (8/13).
From The Searight Collection. PCGS# 84766

1874 Arrows Dime, Richly Toned PR65

- 3571 1874 Arrows PR65 PCGS. CAC.** The Arrows coinage of 1873-1874 is a significant and highly collectible type for collectors, especially as proofs. Only 700 proof dimes were struck in this second (and final) year of the type. Few Gem proofs remain today. PCGS has only certified 17 others with nine finer (8/13). Relatively deep blue-gray and golden-rose toning is seen in varying degrees over each side with strong mirroring in the fields. Population: 18 in 65, 9 finer (8/13). NGC ID# 23DJ, PCGS# 4770

- 3572 1875 PR65 PCGS.** The obverse of this Gem proof has deep green-gold and gray concentric toning. On the reverse, the margins have strong yellow color while the interiors are reflective and only faintly patinated. Population: 13 in 65, 7 finer (8/13). NGC ID# 23CY, PCGS# 4772

- 3573 1875 PR66 NGC. CAC.** Beautiful orange-gold, fire-red, and aquamarine patina endows this well struck and flashy high grade type coin. One of just 700 proofs issued. Certified in a prior generation holder. NGC ID# 23CY, PCGS# 4772

**1878 Seated Liberty Dime, PR66
Colorful Toning**

- 3574 1878 PR66 PCGS.** Only 800 proof Seated Liberty dimes were minted in 1878, and examples in Premium Gem condition are very rare today. Bright, colorful toning appears at the obverse rim. The colors include cobalt-blue, fuchsia, cherry-red, violet, and orange. The reverse is primarily light gold and sea-green. A tiny as-made lint mark is present in the field between Liberty's neck and her left hand. Encased in an old green label holder. NGC ID# 23D3, PCGS# 4775

- 3575 1879 PR66 NGC.** This well-mirrored Premium Gem proof appears close to a Cameo designation despite the moderate color, rose-gold and aqua prevailing on each side, fully struck and free of mentionable marks. Census: 24 in 66, 15 finer (8/13). NGC ID# 23D4, PCGS# 4776

- 3576 1879 PR65 Cameo PCGS.** Champagne and golden-rose colors are present on this Gem along with sea-green along large portions of the rims. The piece is well struck and exhibits a pleasing degree of contrast between the fields and devices. Population: 15 in 65 Cameo, 6 finer (8/13). PCGS# 84776

1881 Dime, PR67 Cameo
None Certified Finer at PCGS

- 3577 1881 PR67 Cameo PCGS.** An unsurpassable, well-mirrored specimen with frosty devices and hints of antique-golden patina at the margins on each side. The low proof mintage of this issue, at only 975 examples, has long made it a favorite with collectors. Population: 6 in 67 Cameo, 0 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2006), lot 1327; Central States Cincinnati Signature (Heritage, 4/2009), lot 175. PCGS# 84778

- 3578 1882 PR66 PCGS. CAC.** The obverse of this sharply detailed Premium Gem is blanketed in delicate shades of cerulean-blue toning and the reverse shows champagne-gold hues. Population: 18 in 66 (1 in 66+), 11 finer (8/13). NGC ID# 23D7, PCGS# 4779

- 3579 1882 PR66+ Cameo PCGS. CAC.** The 1882 dime had one of the larger proof mintages with 1,100 pieces struck. A couple of dozen high-grade proofs are known. This is one of the more visually interesting ones. Blue-green patina is scattered irregularly over each side, and the cameo contrast is strongly evident even through the substantial toning. The strike is pinpoint-sharp and there are no obvious contact marks on either side. Population: 14 in 66 (1 in 66+) Cameo, 4 finer (8/13). PCGS# 84779

- 3580 1885 PR66 Cameo PCGS.** Only 930 proof Seated Liberty dimes were struck in 1885 and few Gem examples survive with Cameo contrast. The present coin is sharply detailed throughout with mirrored fields and iridescent pale green and violet toning. Population: 16 in 66 Cameo, 10 finer (8/13). PCGS# 84782

1886 Dime, PR66 Cameo
One of the Seven Finest at PCGS

- 3581 1886 PR66 Cameo PCGS. CAC.** Only 886 proof Seated Liberty dimes were minted in 1886, and examples in Premium Gem condition with Cameo contrast are quite rare. Indeed, PCGS and NGC have seen a combined total of 18 such coins and 13 finer. Both sides display strong field-device contrast despite medium-intensity toning, and all design features are sharply struck. This well-preserved piece deserves the CAC sticker. Population: 7 in 66 Cameo, 0 finer (8/13). PCGS# 84783

- 3582 1887 PR65 PCGS.** Fantastically mirrored beneath rich toning. This Gem specimen has bold blue-to-violet central toning that yields to bright emerald-green close to the rims. Population: 30 in 65, 10 finer (8/13).
EX; Milwaukee Signature (Heritage, 4/2010), lot 575. NGC ID# 23DC, PCGS# 4784

BARBER DIMES

- 3583 1892 MS66 PCGS. CAC.** This Premium Gem offers exceptional eye appeal. Full mint frost is visible beneath the blue-green and gold toning with bold central motifs. A lovely piece destined for a high-grade date or type set. Population: 68 in 66, 9 finer (8/13). NGC ID# 23DK, PCGS# 4796

- 3584 1892 MS66 PCGS. CAC.** A delightful Premium Gem from the first year of the Barber design, this coin exhibits well-detailed design elements and vibrant mint luster, under dark shades of violet, gray, and greenish-gold toning. Population: 68 in 66, 9 finer (8/13). NGC ID# 23DK, PCGS# 4796

- 3585 1892-S MS63 PCGS. CAC.** This attractive first-year branch-mint type coin displays well-detailed design elements and satiny mint luster with only minor signs of contact and some light gold toning. Housed in an old green label holder. Population: 24 in 63, 44 finer (8/13). NGC ID# 23DM, PCGS# 4798

- 3586 1894-O MS60 PCGS.** This low mintage Barber dime displays satiny and smooth stone-gray surfaces. Crisply struck from clashed dies, and certified in an old green label holder. Among the scarcest issues in Uncirculated grades. NGC ID# 23DU, PCGS# 4804

- 3587 1895-O Fine 12 PCGS. CAC.** The 1895-O dime has a challengingly small mintage of just 440,000 pieces. This Fine 12 example is significantly worn but fundamentally pleasing with few abrasions on surfaces with a range of gray shadings save for a mark on the bridge of the nose. NGC ID# 23DW, PCGS# 4807

- 3588 1895-S MS63 PCGS.** Caramel-gold toning adorns this thoroughly lustrous and precisely struck scarcer date dime. The fields are smooth save for a mint-made lint mark above the hair ribbon. Certified in an old green label holder. Population: 24 in 63, 38 finer (7/13). NGC ID# 23DX, PCGS# 4808

- 3589 1896-O MS63 NGC.** Attractive color and rich mint luster provide this coin with exceptional eye appeal for the grade. The hues include golden-brown, rose, teal, and plum. A small piece of hair was encapsulated with the coin. It extends from the second S in STATES to the F in OF. Very few abrasions are present and they are all minor. Census: 3 in 63, 18 finer (8/13). NGC ID# 23DZ, PCGS# 4810

- 3590 1897-O MS64 NGC.** Beautiful bands of navy-blue and golden-brown endow this prooflike and sharply struck Choice better date dime. Void of remotely relevant contact. Housed in a former generation holder and a prize for the specialist. Census: 19 in 64, 15 finer (7/13). NGC ID# 230000, PCGS# 4813

- 3591 1897-S MS64 NGC. CAC.** Aquamarine and chestnut-gold toning embraces this lustrous, crisply struck, and impressively preserved Choice dime. Housed in a former generation holder. Census: 18 in 64, 8 finer (8/13). NGC ID# 2300000, PCGS# 4814

- 3592 1898-O MS63 PCGS. CAC.** Coruscating and nicely struck with medium stone-gray toning. Only trivial contact is detected. The 1898-O is scarcer in Mint State than its generous mintage implies. Encased in an old green label holder. NGC ID# 230000000, PCGS# 4816

- 3593 1898-O MS64 PCGS. CAC.** An attractively toned near-Gem, this piece displays intermingled shades of chestnut-gold and sea-green on the obverse and copper-brown and orange on the reverse. A few small splashes of cherry-red appear on both sides. This example displays a pleasing degree of design detail. Interesting rim cud are seen near 11 o'clock on the obverse. Population: 15 in 64, 14 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 230000000, PCGS# 4816

- 3594 1898-S MS63 Prooflike NGC.** A beautifully struck coin, this Select example reveals a strong degree of design detail. Areas of faint gold patina are present. Moderate hairlines were a grade-limiting factor. Census: 6 in 63, 14 finer (8/13). NGC ID# 2300000000, PCGS# 4817

- 3595 1899-S MS64 PCGS.** Splashes of russet patination is deeper and more extensive on the obverse of this near-Gem, and a solidly struck throughout. A few minuscule obverse marks do not detract. Lustrous surfaces exhibit nice eye appeal. Population: 31 in 64, 27 finer (8/13). NGC ID# 23EB, PCGS# 4820
- 3596 1899-S MS64 NGC. CAC.** Rich forest-green and walnut-brown toning encompasses this lustrous and unmarked Gem. Precisely struck, beautiful, and certified in a prior generation holder. Census: 15 in 64 (1 in 64+), 7 finer (8/13). NGC ID# 23EB, PCGS# 4820
- 3597 1901-S MS63 PCGS. CAC.** A coruscating and well struck almond-gold representative. Only inconsequential contact is present. Very scarce in Uncirculated grades, and certified in an old green label holder. NGC ID# 23EH, PCGS# 4826
- 3598 1902 MS66 NGC.** Autumn-gold, rose, and sea-green embrace this satiny Premium Gem, although the centers are untuned. This is a sharply struck, high grade example. The Census has increased by only 1 since this coin was offered by us over five years ago, now standing at 11 in 66, 0 finer (8/13).
Ex: *FUN Signature (Heritage, 1/2008)*, lot 1032. NGC ID# 23EJ, PCGS# 4827
- 3599 1905-O Micro O AU55 ANACS.** Much rarer than the usual Large O variety. Substantial luster shimmers across unmarked aquamarine and autumn-gold surfaces. Housed in an older generation holder. PCGS# 94836
- 3600 1906-O MS66 NGC.** The obverse of this sharply detailed Premium Gem is patinated in light shades of gold and ice-blue toning, while the reverse displays darker golden-brown and violet hues. Census: 12 in 66 (1 in 66+), 7 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 23EZ, PCGS# 4840
- 3601 1909-D MS63 PCGS. CAC.** This well struck Barber dime provides potent luster and excellent eye appeal. Marks are minimal and the margins offer light golden-brown and ocean-blue toning. Certified in an old green label holder. NGC ID# 23FC, PCGS# 4851
- 3602 1909-S MS65 PCGS.** This faintly toned Gem is sharply struck and exhibits vibrant cartwheel sheen. Pristine aside from a faint thin mark above the O in ONE. Certified in an old green label holder. Population: 5 in 65, 9 finer (8/13). NGC ID# 23FE, PCGS# 4853

PROOF BARBER DIMES

- 3603 1892 PR64 Cameo PCGS. CAC.** The design elements exhibit bold definition on this beautiful example. Shimmering reflective fields contrast nicely against the lightly frosted devices. This piece has a strong degree of visual appeal. Population: 18 in 64 Cameo, 39 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 84875
- 3604 1893 PR66 PCGS. CAC.** Vivid shades of champagne-gold and violet toning blanket the well-preserved surfaces of this delightful Premium Gem. The design elements are sharply detailed and eye appeal is outstanding. Population: 23 in 66, 15 finer (8/13). NGC ID# 23G4, PCGS# 4877
- 3605 1894 PR64 Deep Cameo PCGS.** Subtle hints of light golden-brown toning appear on this near-Gem representative. The flashy, reflective fields and lightly frosted devices provide this piece with appreciable cameo contrast. An as-made lint mark is present in the right obverse field. Several as-made strike-throughs appear on the reverse. Population: 1 in 64 Deep Cameo, 0 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 94878
- 3606 1895 PR65 NGC.** Fully struck and flashy with substantial (but undesignated) cameo contrast. The margins provide light honey toning.
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005)*, lot 1367, which realized \$1,265.
From *The Strawberry Fields Collection*. NGC ID# 23G8, PCGS# 4879

- 3607 1895 PR65 PCGS. CAC.** A fully struck Gem with vibrant peach-gold, ocean-blue, and lilac-red patina. The flashy surfaces appear flawless. Encapsulated in an old green label holder.
Ex: *Orlando FUN Signature (Heritage, 1/2009)*, lot 8028, which realized \$1,840.
From *The Strawberry Fields Collection*. NGC ID# 23G8, PCGS# 4879
- 3608 1895 PR65 Cameo PCGS.** The level of contrast between the fields and devices, along with attractive toning, provides this Gem with a strong degree of eye appeal. The obverse exhibits a light copper-gold color, while the reverse includes shades of peach, apricot, orange, and red at the outer edges along with streaks of blue-green at center. Population: 13 in 65 (1 in 65+) Cameo, 27 finer (8/13). PCGS# 84879
- 3609 1896 PR65 NGC.** Although this Gem proof displays dark color overall, it has an appealing appearance, due in part to razor-sharp design elements. The toning includes deep ruby-red, cobalt-blue, and gunmetal-gray. Examination under a loupe reveals only minor imperfections. Only 762 proofs were produced. Census: 37 in 65, 63 finer (8/13). NGC ID# 23G9, PCGS# 4880
- 3610 1896 PR65 PCGS.** Intermingled hues of yellow, gold, and green are present on this Gem. Tiny golden-brown flecks appear on the obverse. This is a beautifully struck coin. Population: 35 in 65, 43 finer (8/13). NGC ID# 23G9, PCGS# 4880
- 3611 1896 PR64 Cameo PCGS. CAC.** A beautifully struck example, this near-Gem representative exhibits a strong degree of design detail. Appreciable contrast exists between the reflective fields and frosted devices. A few splashes of light gray patina appear near the center of the reverse. The obverse displays a few minor abrasions. Population: 12 in 64 Cameo, 38 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 84880
- 3612 1896 PR64 Deep Cameo PCGS.** Dazzling field reflectivity and obvious white-on-black contrast ensure the eye appeal of this appealing proof near-Gem. Struck from lightly rotated dies. Population: 3 in 64 Deep Cameo, 8 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 94880
- 3613 1897 PR66 NGC.** Mottled shades of emerald-green, lavender-gray, and amber toning blanket the well-preserved deeply mirrored surfaces of this sharply detailed Premium Gem. Census: 34 in 66, 19 finer (8/13). NGC ID# 23GA, PCGS# 4881
- 3614 1897 PR65 Cameo NGC.** Well-contrasted silver interiors with gold-orange elements at the margins, more obviously on the reverse. Crisp detail and generous eye appeal go hand-in-hand. Census: 9 in 65 Cameo, 33 finer (8/13). PCGS# 84881
- 3615 1897 PR66 Cameo NGC.** Icy devices and glassy fields ensure the eye appeal of this high grade proof dime. The strike is intricate and the sole imperfection is a tiny strike-through (as coined) at 12 o'clock on the reverse.
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005)*, lot 1369, which realized \$2,185.
From *The Strawberry Fields Collection*. PCGS# 84881
- 3616 1897 PR65 Deep Cameo PCGS.** Boldly struck, frosty devices provide pronounced contrast against the deeply mirrored fields. Splashes of golden-brown toning appear on Liberty. The bright, flashy surfaces are virtually devoid of abrasions. Population: 3 in 65 Deep Cameo, 2 finer (8/13).
Ex: *Dallas Signature (Heritage, 12/2004)*, lot 5789, which realized \$1,753.75.
From *The Searight Collection*. PCGS# 94881
- 3617 1900 PR64 Cameo PCGS.** Even a quick glance at this near-Gem example confirms the Cameo designation. This brilliant piece reveals pronounced contrast. A few small spots appear on portions of the letters on the obverse. A few tiny hair thin marks are present on Liberty's cheek. The reverse exhibits a few tiny spots of as-made struck-in grease. Population: 23 in 64 Cameo, 37 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 84884

- 3618 1902 PR64 PCGS. CAC.** A lovely near-Gem example, this piece displays a largely brilliant obverse and a lightly champagne-toned reverse with areas of rose-brown color at the lower portion. The coin reveals pleasing luster and a few minor hairlines that prevent a Gem designation. This attractive coin nonetheless has a high degree of appeal. Population: 76 in 64, 46 finer (8/13).
Ex: Central States Signature (Heritage, 4/2006), lot 1339. NGC ID# 23GF, PCGS# 4886
- 3619 1902 PR64+ PCGS. CAC.** This high-end near-Gem representative displays strong eye appeal. Rich golden-orange color appears at the upper portion of the obverse and on a small portion of the lower reverse, with the remainder of the coin being gleaming white. A couple of hair thin marks extend from below TED in UNITED toward the rim when the coin is examined closely. Population: 76 in 64+, 46 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 23GF, PCGS# 4886
- 3620 1902 PR65 NGC.** Mostly brilliant, though the margins exhibit a hint of golden patina. Frost on the motifs appears to merit a Cameo designation, though NGC disagrees. Minor contact noted behind the cap. Just 777 proofs struck.
Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1374, which realized \$1,495.
From The Strawberry Fields Collection. NGC ID# 23GF, PCGS# 4886
- 3621 1904 PR64 PCGS. CAC.** Light champagne color and a well executed strike provide this near-Gem with a pleasing appearance. A few small as-made strike-throughs are present. Population: 88 in 64, 71 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 23GH, PCGS# 4888
- 3622 1905 PR64 Cameo PCGS.** Pronounced contrast between the nicely frosted devices and brilliant mirrored fields provides this piece with instant eye appeal. A hint of champagne-rose toning is present on the obverse and the 5 in the date exhibits repunching at the top portion. Liberty's cheek exhibits an abrasion. The mark on the jaw appears to be an as-made lint mark. Population: 13 in 64 (2 in 64+) Cameo, 33 finer (8/13).
From The Strawberry Fields Collection. PCGS# 84889
- 3623 1907 PR66 PCGS.** Exquisitely struck design elements stand out on this Premium Gem proof. Luminous surfaces display medium-intensity aqua-blue and reddish-purple coloration and have been well cared for. From a mintage of 575 pieces. Population: 27 in 66, 12 finer (8/13). NGC ID# 23GM, PCGS# 4891
- 3624 1908 PR64 PCGS. CAC.** A sharply detailed Choice example with deeply mirrored fields that display delicate champagne-gold toning. Housed in a green label holder. Population: 46 in 64, 48 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 23GN, PCGS# 4892

**1908 Barber Dime, PR67
Only Four Finer Coins at PCGS**

- 3625 1908 PR67 NGC.** Only 545 proof Barber dimes were struck in 1908. This spectacular Superb Gem displays razor-sharp definition on all design elements and deeply reflective fields that are blanketed in attractive shades of champagne-gold and cerulean-blue toning. Census: 18 in 67, 4 finer (8/13). NGC ID# 23GN, PCGS# 4892

- 3626 1908 PR65 Cameo NGC.** Attractive contrast between the fields and devices led to the Cameo designation and provides this Gem with a high degree of eye appeal. Areas of light golden-brown toning are present, primarily near the outer edges of the obverse. Several tiny, as-made strike-throughs are located near the center of the reverse. Census: 6 in 65 Cameo, 6 finer (8/13). PCGS# 84892
- 3627 1909 PR66 NGC.** This impressive Premium Gem proof has a splash of silver at the center of both sides, with a frame of iridescence consisting largely of orange, fuchsia, electric-blue, and plum around the outer edges. A lovely example. Census: 45 in 66, 24 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 23GP, PCGS# 4893
- 3628 1910 PR65 PCGS.** Intermingled shades of champagne and sea-green are present on the obverse. Additional colors include electric-blue, plum-brown, and copper. The central reverse is primarily golden-champagne, with a thin ring of sea-green around the outer edges along with splashes of copper, violet, and electric-blue. Population: 25 in 65, 24 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 23GR, PCGS# 4894

**1911 Dime, Superb Gem Proof
Low-Mintage Date**

- 3629 1911 PR67 PCGS. CAC.** This fully struck and flawless Superb Gem displays vibrant sea-green centers and olive-gold peripheries. In addition, the portrait and lower reverse margin displays glimpses of plum-mauve toning. The devices demonstrate modest contrast despite the rich palette of colors. A scant 543 proofs were produced. NGC ID# 23GS, PCGS# 4895
- 3630 1913 PR66 PCGS.** Although not designated as a Cameo, this spectacular Premium Gem displays definite elements of contrast between the frosty devices and the deeply mirrored fields. Population: 14 in 66 (1 in 66+), 6 finer (8/13). NGC ID# 23GU, PCGS# 4897
- 3631 1913 PR66 Cameo PCGS. CAC.** The majority of proof 1913 dimes display a brilliant finish with little, if any, field-motif contrast. This Premium Gem offering is a significant exception. The sharply struck design elements stand out against the mirrored fields on both sides, each of which is very nicely preserved. The CAC sticker affirms the coin's gorgeous eye appeal. Population: 10 in 66 Cameo, 3 finer (8/13). PCGS# 84897
- 3632 1914 PR64 Cameo PCGS. CAC.** The frosty design elements of this spectacular Choice specimen contrast boldly with the reflective fields. Multi-colored patina, including shades of greenish-gold and cerulean-blue appears on both sides. Population: 8 in 64 Cameo, 12 finer (8/13). PCGS# 84898

TWENTY CENT PIECES

- 3633 1875-S MS64 PCGS. FS-301.** One of a number of minor misplaced date varieties identified for this popular type issue. A lustrous near-Gem with dappled autumn-tan and stone-gray toning. Nicely struck and well preserved. NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent Piece, MS65 Misplaced Date, FS-301

- 3634 1875-S MS65 PCGS. CAC. FS-301.** A misplaced date variety with the top of an 8 in the dentils beneath the 8 in the date. This lustrous Gem type coin is exceptionally preserved and exhibits dusky and variegated golden-tan, steel-gray, and apple-green toning. The dies were slightly misaligned, since the upper obverse and lower reverse are incompletely impressed while other areas are intricate. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR64 Deeply Toned and Well-Preserved

- 3635 1875 PR64 PCGS.** Deep copper-colored patina on each side of this first-year proof twenty cent piece does not diminish the overall sharp strike and excellent preservation, a coin showing minimal signs of contact. The twenty cent pieces as a denomination were a failure from the start, and 1875 would see the largest proof mintage by far. Population: 59 in 64, 32 finer (8/13). NGC ID# 27GZ, PCGS# 5303

1876 Twenty Cent, PR64 Boldly Struck Second-Year Issue

- 3636 1876 PR64 NGC.** This near-Gem example is the second-year proof in the twenty cent series, one that lasted four years in its entirety, the last two proof-only. Surfaces offer alternating areas of silver-gray and copper-rose with a bold strike, although a couple of ticks appear on Liberty's right (facing) arm and wrist. Census: 74 in 64 (1 in 64+), 36 finer (8/13). NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

- 3637 1805 VF35 PCGS. B-3, R.1.** Tompkins Die State 5/3. This pearl-gray and almond-gold Choice VF representative has pleasing definition and no individually mentionable marks. The obverse displays faint hairlines. NGC ID# 23RC, PCGS# 5313

1805 B-3 Quarter, XF Scarcer Variety

- 3638 1805 XF40 NGC. B-3, R.1.** Tompkins Die State 5/3. A late dies example of this collectible but conditionally scarce Draped Bust variety. Deep gunmetal-gray, plum-mauve, and apple-green patina embraces attractively detailed surfaces. The reverse is unabraded while the obverse has faded thin marks near star 9 and on the cheek. NGC ID# 23RC, PCGS# 5313

1806/5 B-1 Quarter, XF40 Previously Used Obverse Die

- 3639 1806/5 XF40 NGC. B-1, R.2.** This plentiful overdate variety has a previously used obverse die of 1805 B-4 that was overdated and placed back into service. A splendid lightly worn specimen, this piece has light gray surfaces with iridescent toning and excellent eye appeal. Census: 7 in 40, 33 finer (8/13). NGC ID# 23RD, PCGS# 5315

- 3640 1806 VG8 PCGS. B-10, R.5.** A much better die pairing. B-2, B-3, and B-9 are the usually encountered non-overdate 1806 quarter marriages. This Very Good example has ocean-blue fields and stone-gray devices. All stars and peripheral legends are bold, although a worn area obscures all but the stem of the olive branch.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3560, which realized \$862.50. NGC ID# 23RD, PCGS# 5314

**1806 B-9 Quarter, XF45
Bisecting Obverse Crack**

- 3641 1806 XF45 PCGS. B-9, R.1.** This important quarter has a bisecting obverse crack from the rim through the 1 and hair to the E in LIBERTY. Heavy clash marks are evident on both sides. The reverse presumably has several small rim breaks that are not visible due to the holder or centering of the strike. This piece has traces of luster with light to medium gray patina and lilac overtones. NGC ID# 23RD, PCGS# 5314

BUST QUARTERS

**1820 B-3 Quarter, AU58
Seventh Finest Known**

- 3642 1820 Medium 0 AU58 PCGS. CAC. B-3, R.3.** This lovely near-Mint specimen has deep gray and gold toning over frosty luster with only a trace of high-point wear. The surfaces exhibit the usual scattered marks on each side that are expected for the grade. The obverse is cracked from the 8 to the 1 and all stars on the left, as always on this die marriage. Only six Mint State examples of the 1820 B-3 are known. PCGS# 5329
- 3643 1824/2 Good 6 PCGS. B-1, R.3.** The sole 1824-dated die variety of a scarce and underappreciated issue. The present piece is principally cream-gray with deeper charcoal toning at the borders. The peripheral stars and letters are distinct from the rim, and most of LIBERTY is clear, though the LI is faint. NGC ID# 23RR, PCGS# 5335

**1825/4 Quarter, Uncirculated Details
Browning-2 Variety**

- 3644 1825/4 — Cleaning — PCGS Genuine. Unc Details. B-2, R.2.** Specialists disagree on the underdigits for the 1825-dated quarters, but B-1 is the very scarce 1825/2 Guide Book listing, while B-2 and B-3 share the more available 1825/4 entry. The present piece is nearly fully struck and displays luster throughout the legends and motifs. Moderately hairlined and mildly glossy.
- 3645 1828 25/50C VG10 PCGS. B-3, R.5.** A blundered denomination reverse die first used to strike the 1822 B-2 was resurrected to produce this very scarce Browning marriage. Deeply patinated olive-brown and powder-blue. Marks are of no consequence save for a small obverse rim nick at 10 o'clock and a hair-thin line on the chin. NGC ID# 23RV, PCGS# 5343
- 3646 1833 AU53 PCGS. B-1, R.2.** Attribution of the two known 1833 varieties is simple. B-1 has a period after 25 C and B-2 has no period after that C. This lovely 1833 quarter has frosty silver luster with delicate gold toning and peripheral splashes of charcoal. Trivial marks and light wear account for the grade. NGC ID# 23RY, PCGS# 5352

**1834 B-4 Quarter, MS63
Shattered Reverse Die**

- 3647 1834 MS63 PCGS. B-4, R.1.** The reverse has several die cracks that are usually seen on even the earliest die states of this plentiful variety. As the only use of the reverse die, some of the reverse cracks probably occurred during the hardening stage before the die actually saw use. This Select Mint State example has satin luster with untuned ivory surfaces and scattered grade-consistent marks. NGC ID# 23RZ, PCGS# 5353

SEATED QUARTERS

- 3648 1838 No Drapery MS62 NGC.** The Seated Liberty design was employed on the quarter denomination for the first time in 1838. This lustrous MS62 example displays well-detailed design elements and shades of champagne-gold and lavender toning. Census: 16 in 62, 56 finer (8/13). NGC ID# 23SE, PCGS# 5391
- 3649 1839 No Drapery AU55 PCGS.** Silvery surfaces display traces of luster in the protected areas of this Choice AU survivor and the design elements exhibit a pleasing level of definition. Encapsulated in a green label holder.
*Ex: Dallas Signature (Heritage, 11/2005), lot 1250.
From The Joan Carroll Collection. NGC ID# 23SF, PCGS# 5392*

3650 1839 No Drapery — Improperly Cleaned — NGC Details. Unc. Open Claws Reverse. This lustrous and minimally abraded No Drapery Seated quarter displays rich peripheral golden-brown toning. The strike is sharp except on Liberty's foot and the eagle's head. The upper reverse field is mildly bright.
From The Joan Carroll Collection. NGC ID# 23SF, PCGS# 5392

3651 1839 No Drapery MS61 NGC. Open Claws Reverse. Hints of gold appear at portions of the dentils on this otherwise untoned example. This issue often comes poorly struck, especially on Liberty's head, the stars, and the eagle's head and legs. Although the reverse is well struck, the obverse displays incompleteness at Liberty's head, the cap, and several of the stars at right. Census: 5 in 61, 31 finer (8/13).
From The Joan Carroll Collection. NGC ID# 23SF, PCGS# 5392

3652 1842-O Large Date — Improperly Cleaned — NGC Details. VF. LIBERTY is bold on this better date New Orleans quarter. Mostly slate-gray though protected areas display dark patina. The obverse has a few tiny spots and the surfaces are mildly subdued. NGC ID# 23SP, PCGS# 5402

3653 1847 MS62 NGC. Luminous under pink-gray toning laced with gold and blue. The reverse has striking softness on the interior but the all-around eye appeal is pleasing. NGC ID# 23SX, PCGS# 5410

3654 1849-O — Damaged — NGC Details. VF. A challenging New Orleans issue with an unknown mintage. Quarters were infrequently struck at the facility between 1845 and 1849 though half dollars had large emissions. A nicely detailed piece with cream-white motifs and dark gray fields. A dig near star 13 and two scratches near OF explain the NGC notation. NGC ID# 23T3, PCGS# 5414

3655 1853 Arrows and Rays MS61 PCGS. A well-detailed Mint State example of this popular short-lived design type, with pleasing shades of lavender and gray patina over lustrous lightly marked surfaces.
From The Searight Collection. NGC ID# 23U4, PCGS# 5426

**1854-O Quarter, VF20
Huge O, FS-501**

3656 1854-O Huge O VF20 PCGS. Briggs 1-A, FS-501. The high relief, square-shaped mint mark on this famous Seated variety has been compared to a Yap stone. That may overstate matters, but the mint mark's size is dramatic. Likely, a reverse die reached New Orleans from Philadelphia without the requisite mint mark, and one was entered by hand on the die by an unskilled worker. Blended gunmetal-gray and tan toning encompasses evenly circulated and moderately worn surfaces. NGC ID# 23U7, PCGS# 5434

3657 1855 Arrows MS63 PCGS. Brightly lustrous, lightly marked surfaces stand out beneath a thin film of light-gold toning on this attractive Select specimen. Population: 26 in 63 (2 in 63+), 26 finer (8/13).
From The Searight Collection. NGC ID# 23U8, PCGS# 5435

3658 1856 MS65 NGC. Although the 1856 No Motto seated quarters had a mintage exceeding 7 million coins, only a few dozen coins have achieved the Gem grade or higher at the two major services. This conditionally rare example displays brilliant surfaces on both sides along with satin luster and delicate champagne toning. The strike is uneven, with the upper obverse and lower reverse showing considerably less detail than elsewhere. Census: 13 in 65, 7 finer (8/13). NGC ID# 23TB, PCGS# 5438

3659 1860-S Good 6 PCGS. Only 56,000 Seated Liberty quarters were struck in 1860 at the San Francisco Mint. Accordingly, the issue is rare in all grades and collectors prize even low-grade examples. This well-worn specimen offers pleasing gray surfaces with hints of sea-green toning and the letters IBERT in LIBERTY still legible. Population: 8 in 6, 38 finer (8/13). NGC ID# 23TS, PCGS# 5453

3660 1860-S — Cleaning — PCGS Genuine. Fine Details. A stone-gray and caramel-gold example of this challenging early San Francisco issue. Faintly hairlined and mildly granular but without distracting marks. There were no West Coast collectors in 1860, and only one Mint State example is known from the low mintage of 56,000 pieces. NGC ID# 23TS, PCGS# 5453

**1860-S Quarter Dollar, Fine 15
Remarkably Clean Surfaces
Rare in All Grades**

3661 1860-S Fine 15 PCGS. The 1860-S quarter dollar is rare in all grades. Indeed, PCGS and NGC have certified a total of only 70 coins, a number of which are probably resubmissions. Only one Uncirculated specimen is known, an NGC MS61. The obverse surfaces of this Choice Fine display light gray patina imbued with blushes of light tan, while the gray reverse fields highlight the lighter devices. The letters in LIBERTY are strong, and most of the shield lines are clear on both obverse and reverse. A good amount of detail is visible in the central devices, save for the always weak-strike detail on Liberty's head. Both rims are full and show some of the dentils, including on the reverse lower-left quadrant from 4 to 9 o'clock, an area that is typically devoid of detail. Most of the peripheral lettering, including the mintmark, is strong. For a coin with moderate circulation, the surfaces of both sides are remarkably free of mentionable marks. This is an infrequent opportunity to acquire one of the rarest issues in the Seated Liberty quarter series. Population: 4 in 15, 18 finer (8/13). NGC ID# 23TS, PCGS# 5453

3662 1861 MS64 PCGS. CAC. Type Two Obverse and Reverse. This lightly toned near-Gem is well struck except for the final three stars. Smooth aside from minor contact near the first S in STATES. Coined from clashed dies. NGC ID# 23TT, PCGS# 5454

**1862-S Seated Liberty Quarter, MS62
Scarce in Uncirculated**

- 3663 1862-S MS62 NGC.** Unlike the Philadelphia Mint coinage produced during the Civil War, the S-Mint coins were produced in larger quantities. However, nearly all of those coins entered circulation in a commerce starving for small change. The result was an extremely limited survival of high grade pieces. For example, the average grade of the 1862-S barely reaches XF40. This pleasing Mint State piece is an important condition rarity with full satin luster under wispy champagne toning with only a few marks on each side. Census: 5 in 62, 7 finer (8/13). NGC ID# 23TW, PCGS# 5457

- 3664 1867 — Smoothed — PCGS Genuine. XF Details.** This low mintage Reconstruction-era quarter offers pleasing design detail and displays attractive apricot-gold toning. Pinscratched on the outline of the eagle and the top of the 7 in the date is tooled and smoothed. A mere 20,000 pieces were produced. NGC ID# 23UD, PCGS# 5470

**1867-S Seated Quarter, XF40
Rare Low-Mintage Issue**

- 3665 1867-S XF40 PCGS.** From a low mintage of 48,000 pieces, the 1867-S Seated Liberty quarter is elusive in all grades today. This pleasing XF specimen retains most of its original design detail and the lightly abraded surfaces display natural dove-gray patina. Population: 3 in 40, 11 finer (8/13). NGC ID# 23UE, PCGS# 5471

- 3666 1869-S AU50 NGC.** Dusky shades of lavender-gray, sea-green, and amber patina blanket the surfaces of this lightly circulated Seated quarter. Traces of mint luster shine through the toning. Census: 5 in 50, 7 finer (8/13). NGC ID# 23UJ, PCGS# 5475

- 3667 1873 Open 3, No Arrows MS62 NGC.** Appealing satin luster and faintly toned surfaces provide this piece with a strong degree of eye appeal. Clash marks are present on both sides. A few hair thin marks appear on the reverse. Census: 2 in 62, 16 finer (8/13). *From The Joan Carroll Collection.* NGC ID# 23UV, PCGS# 5485

- 3668 1873 Arrows MS63 NGC.** Hints of gold appear on this Select representative. The 1873 Arrows quarter is scarce in Uncirculated condition, and often reveals striking weakness. This example is generally well impressed, with just a touch of softness on parts of Liberty's head, and weakness in the centers of some of the stars along the upper obverse border. Minor clash marks appear on both sides. Census: 25 in 63, 48 finer (8/13). *From The Joan Carroll Collection.* NGC ID# 23VU, PCGS# 5491

**1874-S Quarter, MS65+
Two-Year With Arrows Type**

- 3669 1874-S Arrows MS65+ NGC.** Satiny with gold and faint blue overtones on the obverse and more overt areas of peach-rose color on the reverse. This is an appealing high-end Gem representative of the short-lived Arrows, With Motto type. Census: 35 in 65 (1 in 65+), 29 finer (8/13). *From The Joan Carroll Collection.* NGC ID# 23VY, PCGS# 5495

- 3670 1878-CC MS62 ANACS.** Generous swirling luster is key to the eye appeal. Though the obverse's silver interior shows a luster scrape in the right field, the gold-orange margins and the similarly toned reverse are better-preserved. Housed in a small-format holder. NGC ID# 23V9, PCGS# 5509

- 3671 1878-CC MS62 PCGS. CAC.** Pearl and pewter-gray surfaces and pleasing luster provide this Carson City quarter with an attractive look. Contact marks are present, primarily on the reverse. NGC ID# 23V9, PCGS# 5509

- 3672 1880 AU58 PCGS. CAC.** Type Two Reverse. The Philadelphia Mint achieved a small mintage of 13,600 Seated Liberty quarters in 1880. Large areas of golden-copper color are present on this lovely near-Mint representative, with flyspecks of gray toning also appearing. NGC ID# 23VC, PCGS# 5512

- 3673 1891 MS66 PCGS.** A well-detailed Premium Gem example from the last year of the Seated Liberty design, this coin displays vibrant mint luster under shades of lavender, blue, and champagne-gold toning. Population: 26 in 66 (1 in 66+), 3 finer (8/13). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

- 3674 1860 PR64 PCGS.** Milky reflective surfaces with well-detailed design elements that show incomplete definition on some stars and a few light contact marks and hairlines. Population: 42 in 64, 20 finer (8/13). *From The Searight Collection.* NGC ID# 23WM, PCGS# 5556

**1860 Quarter, PR64 Cameo
Slightly Contrasted**

- 3675 1860 PR64 Cameo PCGS.** Type Two Obverse, Type One Reverse. Frosty motifs rise above glassy fields. Peach-gold dominates the borders though hints of cherry-red and navy-blue adorn the obverse periphery. The strike is full except on the initial three stars. Population: 13 in 64 Cameo, 10 finer (8/13). PCGS# 85556

**1864 Quarter Dollar, PR65 Cameo
Only One Finer PCGS Example**

- 3676 1864 PR65 Cameo PCGS.** The cameo contrast is evident on this well struck Gem representative, with the devices exhibiting a pleasing degree of frost against the brilliant and reflective fields. In addition, this Gem displays large portions of rich golden toning along with areas of sea-green, electric-blue, purple, and russet at the outer edges. A few hair thin lines are present in the left obverse field and a small area of residue appears on the left reverse field. Population: 6 in 65 Cameo, 1 finer (8/13). PCGS# 85560

**1864 Quarter Dollar, PR65 Cameo
Sharply Struck**

- 3677 1864 PR65 Cameo NGC.** NGC has graded close to 200 proof quarter dollars of 1864, only 25 of which are designated as Cameos (12%). The motifs of the present Gem stand out against the mirrored fields despite the relatively heavy layer of burgundy and champagne-gold patination. An excellent strike sharpens the design elements. Census: 7 in 65 Cameo, 5 finer (8/13).
From The Strawberry Fields Collection. PCGS# 85560

**1865 Quarter, Nicely Toned PR65
Final Year of the No Motto Type**

- 3678 1865 PR65 NGC.** Only 500 proofs were struck in 1865, a paltry addition to the 58,800 strikes for circulation. Few were preserved in high grade, and this is one of only 18 near-Gem proofs certified by NGC (8/13). Light rose toning is seen over each side with a rim of deeper blue at the margins. The mirrored fields still flash brightly, unimpeded by the presence of the toning. A small planchet flaw is noted in the right obverse field.
From The Strawberry Fields Collection. NGC ID# 23WT, PCGS# 5561

- 3679 1870 PR64 PCGS.** This sharply struck near-Gem proof displays mottled patina in shades of dove-gray and copper-gray on both sides. Additional colors appear on the reverse, among them sea-green, teal, and plum. Areas of reflectivity remain below the patina. From a proof mintage reported at 1,000 pieces. Population: 34 in 64, 13 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 23X3, PCGS# 5569

**1870 Quarter, PR66 Cameo
Lovely Patina and Excellent Contrast**

- 3680 1870 PR66 Cameo NGC.** Silvery-pink centers with thick mint frost mingle with a considerable amount of iridescent color around the peripheries, chiefly copper-gold and steel-blue hues. This piece is sharply struck as expected, but the deep field-device contrast and lovely patina are definitely in its favor. Census: 5 in 66 (1 in 66+) Cameo, 1 finer (8/13).
From The Strawberry Fields Collection. PCGS# 85569

**1874 Arrows Quarter, PR64
Attractively Toned**

- 3681 1874 Arrows PR64 PCGS.** This well struck near-Gem reveals a host of colors when examined closely. The hues include copper, cobalt-blue, sea-green, electric-blue, orange, and plum. Areas of reflectivity remain beneath the patina. Only 700 proof Seated Liberty quarters were struck in 1874. Population: 73 in 64 (1 in 64+), 47 finer (8/13). NGC ID# 23XS, PCGS# 5575

**1874 Arrows Quarter, PR64
Brightly Mirrored, Slightly Toned**

- 3682 1874 Arrows PR64 PCGS.** Second year of the highly collectible Arrows type, first adopted in 1873 when the Mint went on the metric system. Dozens of near-Gem and even better examples survive, but nowhere near enough to satisfy collector demand. This near-Gem has remarkably bright, mirrored fields on each side. A slight dusting of reddish-gold patina is seen overall, slightly deeper around the margins. Minimal marks and hairlines.
From The Strawberry Fields Collection. NGC ID# 23XS, PCGS# 5575

3683 1876 PR65 Cameo PCGS. Type Two Reverse. Blatant white on black contrast confirms the Cameo designation. The mirrored fields display minor lint marks (as made) but are free from post-strike detractors.

From The Strawberry Fields Collection. PCGS# 85577

3684 1877 PR63 NGC. Attractive shades of emerald-green, cobalt-blue, and lavender-gray toning blanket the surfaces of this sharply detailed Seated Liberty quarter. Census: 28 in 63, 67 finer (8/13). NGC ID# 23X9, PCGS# 5578

3685 1877 PR65 PCGS. CAC. Type Two Reverse. A low-mintage proof date with only 510 pieces issued. A blanket of ocean-blue, peach-gold and ruby-red toning enriches each side. The obverse field displays only faint marks. The strike is unimprovable.

Ex: Long Beach Signature (Heritage, 2/2010), lot 1078, which realized \$2,070. NGC ID# 23X9, PCGS# 5578

3686 1877 PR65 Cameo PCGS. Wide rings of toning appear at the outer edges of both sides, beautifully framing the bright white centers. The colors include shades of teal, plum, and cherry-red. The cameo contrast remains evident and the design elements are well defined. Population: 4 in 65 Cameo, 6 finer (8/13).

From The Strawberry Fields Collection. PCGS# 85578

1880 Quarter, PR67 Delicate Multicolor Patina

3687 1880 PR67 NGC. Type One Reverse. Delicate shades of champagne-gold and cerulean-blue toning enhance the pristine surfaces of this delightful Superb Gem. The design elements are well-detailed and the fields are deeply mirrored, with outstanding visual appeal. From a generous proof mintage of 1,355 pieces. Census: 11 in 67, 5 finer (8/13). NGC ID# 23XC, PCGS# 5581

3688 1880 PR65 Cameo PCGS. Type Two Reverse. An obscure rarity, since most 1880 proofs have a Type One Reverse. The present sharply struck specimen has frosty devices and smooth, glassy fields. Attractively toned in powder-blue, wheat-gold, orange-red, and lime-green shades with the richest toning on the reverse. PCGS# 85581

3689 1880 PR65 Cameo NGC. Type One Reverse. The toning present on this Gem Cameo example includes golden-champagne overall with splashes of copper, electric-blue, golden-brown and violet also appearing. Appreciable contrast exists between the lightly frosted devices and the reflective fields. Census: 10 in 65 Cameo, 35 finer (8/13).

From The Strawberry Fields Collection. PCGS# 85581

3690 1881 PR66 Cameo PCGS. A beautifully contrasted example, this Premium Gem Cameo displays a strong degree of visual appeal. The brilliant piece exhibits only a hint of champagne patina. Both 8s in the date are prominently recut, a feature that sets true proofs apart from the many prooflike business strikes sometimes offered as proofs. Population: 23 in 66 (3 in 66+) Cameo, 7 finer (8/13). PCGS# 85582

3691 1881 PR66 Cameo PCGS. The design elements of this spectacular Premium Gem exhibit pinpoint definition throughout. The devices display rich mint frost, providing pronounced contrast against the deeply mirrored fields. An area of light patina is present near the lower obverse. The surfaces are free of mentionable distractions and the eye appeal is terrific. Population: 23 in 66 (3 in 66+) Cameo, 7 finer (8/13). PCGS# 85582

1883 Quarter, PR66 Cameo Well-Contrasted, Virtually Untoned

3692 1883 PR66 Cameo PCGS. The achievement of parity in the United States between gold, silver, and paper currency in December 1879 brought a glut of previously hoarded silver coinage out of the woodwork both domestically and from Canada, reducing the need for the Mint to strike circulating silver coinage for the better part of a decade. The 1883 quarters are a case in point — 14,400 circulation strikes complementing 1,039 proofs. This silver-white Premium Gem proof is well-contrasted and impeccably sharp, showing only a trace of color on the reverse. Excellent eye appeal. Population: 6 in 66 Cameo, 3 finer (8/13).

From The Strawberry Fields Collection. PCGS# 85584

3693 1884 PR63 PCGS. Green-gold toning overall with variations in blue and violet. This well-struck Select proof has light hairlines under the patina, accounting for the grade. NGC ID# 23XG, PCGS# 5585

3694 1886 PR65 Cameo NGC. At first glance, the surfaces appear considerably finer than the PR65 grade assigned, with much appeal generated by the silver-white coloration lightly kissed with gold on the reverse, and generous field-device contrast. Even under a loupe, the obvious allure becomes even greater, with the only mentionable distraction a tiny reverse planchet flaw just beyond the last A in AMERICA, clearly as-made. Census: 13 in 65 Cameo, 35 finer (8/13).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 621.

From The Strawberry Fields Collection. PCGS# 85587

1886 Seated Quarter, PR66 Cameo Startling Obverse Contrast

3695 1886 PR66 Cameo PCGS. This beautiful Premium Gem proof is untoned on a portion of the central figure of Liberty; while draped in ocean-blue at her outside portions, the rest of the obverse and all of the reverse displays a panoply of variegated colors. Pink and amber prevail against jade on the reverse, and both sides retain excellent reflectivity beneath the moderate patina. No mentionable marks appear. Population: 6 in 66 Cameo, 6 finer (8/13). PCGS# 85587

3696 1890 PR64 Cameo PCGS. The faint gold patina does not reduce the eye appeal of the impressive cameo contrast. Well struck and exquisitely preserved. A pair of strike-throughs (as minted) affect the N in UNITED and the L in DOL. Population: 12 in 64 (1 in 64+) Cameo, 12 finer (8/13).

From The Seairight Collection. PCGS# 85591

- 3697 1890 PR65 Cameo PCGS.** Appreciable contrast between the fields and devices provides this Gem example with a strong degree of visual appeal. A couple of minuscule as-made strike-throughs and flyspecks are present on the obverse. Population: 4 in 65 Cameo, 8 finer (8/13). PCGS# 85591

**1890 Seated Quarter, PR66 Cameo
Only Four Finer Coins at PCGS**

- 3698 1890 PR66 Cameo PCGS.** The well-detailed design elements of this spectacular Premium Gem display especially thick mint frost and the brilliant fields are deeply reflective, creating intense cameo contrast. Population: 4 in 66 Cameo, 4 finer (8/13).
From The Strawberry Fields Collection. PCGS# 85591

**1890 Seated Quarter, PR66 Deep Cameo
Low Mintage of 590 Pieces**

- 3699 1890 PR66 Deep Cameo PCGS.** Brilliant virtually untuned surfaces and bold contrast between the richly frosted devices and deeply mirrored fields provide this Premium Gem representative with outstanding visual appeal. As-made strike-throughs appear on both sides. Population: 2 in 66 Deep Cameo, 6 finer (8/13). PCGS# 95591

- 3700 1891 PR66 Cameo NGC.** A captivating and crisply contrasted Premium Gem specimen, this is a desirable representative of the last proof Seated quarter issue. Both sides are minimally toned, and the rich frost blanketing the well-defined devices stands out from the gleaming silver-white of the mirrors. Undeniably appealing. Census: 24 in 66 Cameo, 10 finer (8/13).
Ex: Summer FUN West Palm Beach Signature (Heritage, 7/2009), lot 496.
From The Strawberry Fields Collection. PCGS# 85592

BARBER QUARTERS

- 3701 1892 MS66 PCGS.** Type One Reverse. Golden-brown and apple-green margins frame the cream-gray centers. A fully struck and essentially immaculate first year type coin. Die breaks are noted beneath Liberty's shoulder and on the upper loops of both S in STATES.
Ex: Milwaukee Signature (Heritage, 8/2007), lot 7960, which realized \$1,035. NGC ID# 23XT, PCGS# 5601

- 3702 1892 MS66 PCGS.** CAC. Type Two Reverse. Ocean-blue, caramel-gold, and rose-red toning invigorates this lustrous and needle-sharp first year Premium Gem. Impressively devoid of abrasions, and ideal for the advanced type collector. NGC ID# 23XT, PCGS# 5601

- 3703 1892 MS66 NGC.** CAC. Type Two Reverse. The reverse peripheral legends are die doubled. This intricately struck and coruscating introductory year Barber quarter possesses lovely apple-green, cream-gray, and plum-mauve toning. Pristine aside from a single hair-thin line on the cheek. NGC ID# 23XT, PCGS# 5601

- 3704 1896 MS65 PCGS.** CAC. Toning, in a number of shades, including soft pink, sea-green, golden-brown is present on both sides of this Gem. Lovely satin luster and a strong strike add to the attractiveness. Population: 33 in 65, 11 finer (8/13). NGC ID# 23Y7, PCGS# 5613

- 3705 1896-O AU58 NGC.** The 1896-O Barber quarter is an elusive issue in high grade. This attractive near-Mint example retains almost all of its original mint luster and design detail. Census: 8 in 58, 59 finer (8/13). NGC ID# 23Y8, PCGS# 5614

1896-S Quarter, AU Details

- 3706 1896-S — Improperly Cleaned — NGC Details.** AU. Most key date 1896-S quarters are heavily worn, but the present example exhibits full design detail with no obvious evidence of circulation. However, the luster is diminished, the obverse is lightly hairlined, and the peach-gold, lilac-red, and navy-blue toning appears artificial. Nonetheless, a desirable example of this important issue. NGC ID# 23Y9, PCGS# 5615

- 3707 1897-S AU55 NGC.** The 1897-S Barber quarter is a challenging date in the series from a mintage of 542,229 pieces. This lustrous Choice AU specimen shows the mintmark placed far to the right, the last date this occurred on Barber quarters. One variety is known with the mintmark in the center. Census: 4 in 55, 50 finer (8/13). NGC ID# 23YC, PCGS# 5618

**1898 Quarter, MS65+
Fully Struck and Beautifully Toned**

- 3708 1898 MS65+ PCGS.** CAC. This beautifully toned MS65+ 1898 Barber quarter offers glints of jade-green and pinkish-gold throughout each side, more predominantly on the obverse. The CAC sticker and excellent eye appeal are not the only bonuses: The strike is also full throughout both sides. Population: 29 in 65+, 29 finer (8/13). NGC ID# 23YD, PCGS# 5619

**1898-S Quarter Dollar, MS64
Conditionally Rare**

- 3709 1898-S MS64 PCGS.** The obverse of this near-Gem displays frosty luster and areas of light golden-brown toning. The reverse in particular exhibits a strong degree of visual appeal, with gleaming white surfaces and bold cartwheel luster. The coin has a bold strike, with strongly defined design details. A few tiny carbon spots are present on each side. Population: 10 in 64, 8 finer (8/13). NGC ID# 23YF, PCGS# 5621

- 3710 1901-O MS62 NGC.** Areas of light olive-green and tan-gold patina appear on the obverse of this piece. Hints of gold and violet are present on the reverse. The right obverse field reveals a few marks. Census: 3 in 62, 15 finer (8/13). NGC ID# 23YP, PCGS# 5629

- 3711 1901-O MS63 PCGS.** Gold-orange at the rims with broad silver interiors. Liberty's portrait shows several long scrapes, but the lustrous reverse is comparatively clean. Population: 6 in 63, 26 finer (8/13). NGC ID# 23YF, PCGS# 5629

**1901-S Barber Quarter, Good 4
Sought-After Key Issue**

- 3712 1901-S Good 4 NGC.** As the series key, the 1901-S Barber quarter is desirable at any grade level. The mintage was a mere 72,664 pieces. Most of the 1901-S issue slipped into circulation before there was widespread interest in collecting mintmarks, which did not generally begin until 1909. This specimen retains an attractive appearance for the grade.
From The Joan Carroll Collection. NGC ID# 23YR, PCGS# 5630

- 3713 1902-S MS64 PCGS.** Glimmers of watery reflectivity add to the eye appeal of this gold-tinged silver near-Gem. A few small red marks on Liberty's neck account for the grade. Population: 21 in 64, 22 finer (8/13). NGC ID# 23YU, PCGS# 5633

- 3714 1905-O MS63 PCGS. CAC.** A very pleasing product of the New Orleans Mint, this quarter retains attractive surfaces and displays areas of light toning. A few small, wispy die cracks appear on the obverse. The 1905-O Barber quarter is one of the most difficult and underrated issues in the series. Population: 10 in 63, 43 finer (8/13). NGC ID# 23Z3, PCGS# 5640

- 3715 1907 MS65 PCGS.** Shades of pale gold toning enhance the lightly marked surfaces of this impressive Gem, with sharply detailed design elements and vibrant mint luster under the patina. Population: 41 in 65, 17 finer (7/13). NGC ID# 23Z8, PCGS# 5645

- 3716 1907-D MS64 PCGS.** Gold and russet toning covers large portions of both sides of this near-Gem example along with smaller areas of sea-green and plum. Despite a mintage figure of 2,484,000, few examples survive at this grade level and higher. This issue is often weakly struck, as illustrated by this piece. Population: 34 in 64 (1 in 64+), 14 finer (8/13). NGC ID# 23Z9, PCGS# 5646

- 3717 1909-O — Improperly Cleaned — NGC Details. Unc.** The final New Orleans quarter issue, the 1909-O is a semikey even scarcer than its low mintage suggests. The present unworn example displays faint powder-blue and tan-gold toning with iridescent lilac and lime shades at the reverse periphery. NGC ID# 23ZJ, PCGS# 5655

**1909-O Quarter, Slightly Toned MS62
Last Year of Production From New Orleans**

- 3718 1909-O MS62 NGC.** The 1909-O is notable as the last of its kind, the final year of production in the New Orleans mint. As with most O-mint coinage produced, local needs in the channels of commerce meant almost all of the mintage was circulated, and very few were set aside as mementos. This is a satiny example, as usually seen, that is better struck on the reverse than the obverse. Almost brilliant, there is a slight accent of golden color around the margins on each side. Census: 5 in 62, 34 finer (8/13). NGC ID# 23ZJ, PCGS# 5655

- 3719 1909-S MS64 NGC.** An impressive Choice example of this popular date, with well-detailed design elements and vibrant mint luster on both sides. Eye appeal is outstanding. Census: 26 in 64 (1 in 64+), 25 finer (7/13). NGC ID# 23ZK, PCGS# 5656

**1911 Quarter, Rim-Toned MS66
Top-Notch Example**

- 3720 1911 MS66 PCGS. CAC.** This appealing Premium Gem 1911 Barber quarter offers silver-white centers framed by deep russet-brown on the obverse and by lighter copper-orange on the reverse, showing minimal signs of contact amid generous luster. A top-notch example of this underrated date. Population: 10 in 66, 1 finer (8/13). NGC ID# 23ZN, PCGS# 5659

- 3721 1913-S — Scratches — NGC Details. VG.** A few long thin scratches appear on the lower obverse, but this evenly worn key is otherwise problem free. From a mintage of just 40,000 pieces.
From The Joan Carroll Collection.

- 3722 1913-S — Scratch — PCGS Genuine. VG Details.** A well-worn example of this key date that retains all major design features in outline and some interior detail intact. A deep scratch through the eagle's leg and tail constitutes the noted damage. NGC ID# 23ZW, PCGS# 5666

3723 1914 MS65 PCGS. Toning is present on both sides of this Gem, among the colors are gray, gold, olive-green, and golden-brown. Tiny flyspecks of gray dot both sides. Attractive luster emerges beneath the patina. Encased in a first generation holder. Population: 66 in 65 (1 in 65+), 22 finer (8/13). NGC ID# 23ZX, PCGS# 5667

3724 1914 MS66 PCGS. The obverse of this Premium Gem is particularly attractive, with large splashes of copper-gold, red-orange, violet, plum, and turquoise-blue colors. The reverse is largely almond-gold. Both sides exhibit rich frosty luster. Population: 20 in 66, 2 finer (8/13). NGC ID# 23ZX, PCGS# 5667

3725 1915 MS66 PCGS. CAC. A brilliant, virtually untoned Premium Gem example that many will no doubt find appealing. Minuscule marks and tiny areas of color are present on the obverse. A lovely high-end survivor from the next-to-last year of the Barber design. Population: 16 in 66, 0 finer (8/13). NGC ID# 2422, PCGS# 5670

3726 1916 MS65 NGC. Effusive swirling luster with a faint gold-orange overtone that intensifies on the reverse and adds a dot of deep color on the second S in STATES. The eagle's talons are uncommonly well-defined.
From The Joan Carroll Collection. NGC ID# 2425, PCGS# 5673

3727 1916 MS65+ PCGS. CAC. A high-end Gem from the final year of the Barber design, this coin is sharply detailed and lustrous throughout with attractive accents of pale gold toning. Population: 55 in 65 (2 in 65+), 30 finer (8/13). NGC ID# 2425, PCGS# 5673

PROOF BARBER QUARTERS

3728 1893 PR64 Cameo PCGS. Brilliant surfaces with flashy, reflective fields and a hint of champagne toning provide this near-Gem with a lovely appearance. Appreciable contrast exists between the fields and devices. A few small areas of darker toning are present on both sides and a small milky spot appears near the chin. Population: 17 in 64 Cameo, 40 finer (8/13).
From The Searight Collection. PCGS# 85679

1893 Quarter, PR66 Cameo Appealing Silver-White Color

3729 1893 PR66 Cameo PCGS. CAC. A gorgeous Premium Gem, this second-year proof Barber quarter boasts generous field-device contrast on each side, even if insufficient for a Deep Cameo designation. The silver-white surfaces are essentially untoned. A couple of faint contact marks appear to preclude an even higher grade. The strike is full throughout. Population: 11 in 66 Cameo, 17 finer (8/13). PCGS# 85679

3730 1897 PR66 NGC. The obverse of this Premium Gem exhibits a prooflike appearance. Tiny, scattered freckles of gray patina appear on portions of the obverse. The luster is somewhat subdued on the reverse, with that side revealing a slight counter-clockwise rotation. Census: 34 in 66, 21 finer (8/13). NGC ID# 242C, PCGS# 5683

3731 1897 PR63 Deep Cameo PCGS. CAC. The pronounced cameo contrast and brilliant appearance of this piece provide a strong degree of eye appeal. Small areas of light toning are present on this Select example. The proof mintage for this issue was 731 coins. Population: 0 in 63 Deep Cameo, 14 finer (8/13). PCGS# 95683

1898 Barber Quarter, PR66 Beautifully Toned

3732 1898 PR66 NGC. Gold CAC. A richly toned Premium Gem, this example includes shades of golden-orange, sea-green, light yellow-gold, olive-green, and plum. The toning on the reverse is particularly brilliant, with the deeply mirrored fields adding to the eye appeal. Among the hues on the reverse are cerulean-blue, orange, gold, and sea-green. Encapsulated in a prior generation holder. Census: 31 in 66, 37 finer (8/13). NGC ID# 242D, PCGS# 5684

3733 1900 PR64 Cameo PCGS. Type One Obverse, Type Two Reverse. The sharply detailed frosty design elements seem to float on the deeply mirrored fields of this delightful Choice specimen and a few hints of pale gold toning add to the terrific eye appeal. Population: 12 in 64 Cameo, 36 finer (8/13).
From The Strawberry Fields Collection. PCGS# 85686

3734 1901 PR66 NGC. Deep aquamarine tones approach the center obverse of this Premium Gem proof and fully occupy the reverse. This piece is well-preserved and sharp save for the minor exception of the eagle's right (facing) claw, which was placed opposite the wide space of Liberty's gap through a die flaw. NGC ID# 242G, PCGS# 5687

3735 1904 PR66 PCGS. Close examination of this lovely Premium Gem reveals blushes of golden-brown and blue-gray color on the obverse. The reverse is largely enveloped by a copper-gold patina. Flashy surfaces add to the eye appeal. Population: 27 in 66, 10 finer (8/13). NGC ID# 242K, PCGS# 5690

1908 Barber Quarter, PR67 Only 545 Pieces Struck

3736 1908 PR67 NGC. Only 545 proof Barber quarters were struck in 1908. This spectacular Superb Gem exhibits sharply detailed design elements and deeply mirrored fields under a blanket of champagne-gold and violet patina. The surfaces are well-preserved and the eye appeal is outstanding. Census: 22 in 67, 4 finer (8/13). NGC ID# 242P, PCGS# 5694

3737 1909 PR65 PCGS. CAC. An impressive Gem from a mintage of just 650 pieces, this coin offers sharply detailed design elements and deeply reflective fields under delicate shades of champagne-gold toning. Population: 28 in 65 (1 in 65+), 47 finer (8/13). NGC ID# 242R, PCGS# 5695

**1909 Quarter, PR66 Cameo
Concentric Toning on Each Side**

- 3738 1909 PR66 Cameo PCGS.** Usually a coin has to be brilliant, or nearly so, to receive a Cameo designation, but the contrast on this piece is so obvious, even beneath the amazing iridescence, that there is no doubt the designation is justified. The aesthetic appeal is exceptional. Population: 13 in 66 Cameo, 4 finer (8/13).
Ex: Dallas Signature (Heritage, 10/2008), lot 718. PCGS# 85695

**1911 Barber Quarter, PR66
Pleasing Contrast**

- 3739 1911 PR66 PCGS. CAC.** This attractive piece was encapsulated prior to PCGS adding cameo designations to these coins. If held today, this piece would earn such a designation as the contrast is pronounced between the fields and devices. Only a few trivial hairlines appear on the obverse fields. Housed in a first generation holder. Population: 27 in 66 (1 in 66+), 21 finer (8/13).
NGC ID# 242T, PCGS# 5697
- 3740 1914 PR66 NGC.** Toning aficionados will certainly find much to love about this beautiful Premium Gem. Both sides are covered in a blanket of smoky rose and gold with areas of more intense aquamarine and magenta. Boldly struck with undeniable eye appeal.
Ex: FUN Signature (Heritage, 1/2008), lot 1223. NGC ID# 242W, PCGS# 5700

**1915 Barber Quarter, PR65 Cameo
Final Barber Proof Issue**

- 3741 1915 PR65 Cameo PCGS. CAC.** Barber quarters were produced in proof format for the last time in 1915, with a meager mintage of 450 pieces. This impressive Gem exhibits distinct cameo contrast between the sharply detailed frosty design elements and the deeply reflective fields. Population: 3 in 65 Cameo, 3 finer (8/13).
PCGS# 85701

EARLY HALF DOLLARS

- 3742 1794 PCGS Genuine. O-107, R.6.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Good specimen that has graffiti and has been retoned. Both sides exhibit deep steel-blue and ebony patina that hides the imperfections.
- 3743 1795 2 Leaves VG8 PCGS. O-104, R.4.** Rich cream-gray, chestnut-gold, and ice-blue toning graces this evenly worn Flowing Hair type coin. The dentils and legends are sharp for the grade. Only lightly abraded though two small flan flaws are on the lower right obverse field. *PCGS# 6052*
- 3744 1795 2 Leaves VG8 PCGS. O-105, R.4.** Deep walnut-brown and gunmetal-blue patina encompass this Flowing Hair type coin. The legends are bold and the stars are well outlined. One thin mark noted on the central reverse. *PCGS# 6052*
- 3745 1795 2 Leaves VG10 PCGS. O-102a, R.5.** A well-worn VG10 specimen of this early half dollar, with a prominent die crack passing between 9 and 5 in the date. A few interior design details remain intact, but the right obverse rim is worn smooth.
From The Strawberry Fields Collection. PCGS# 6052
- 3746 1795 2 Leaves VG10 PCGS. O-107a, R.5.** An early die state of O-107a with a bisecting reverse crack between 2:30 and 8:30. (The rare O-107 prime lacks the die crack at 8:30.) The crack is most apparent on the T in UNITED, and is also visible beneath the eagle's left (facing) wing. The crack resumes in the field between OF and AMERICA, but is faint within this area.
The obverse die is resurrected from O-106, and is an essentially identical state, with a noticeable vertical die crack through the E in LIBERTY, and barely visible die cracks through the 1 in the date and from 5 o'clock to the bust. The ridge is prominent across the date and stars 13 to 15. The ridge continues from star 12 toward the forehead, although this portion is faint.
The present example features deep lilac, apple-green, and yellow toning. A few small marks are noted above the left stand of the eagle, but the surfaces are generally smooth for the grade. The devices possess partial hair and feather detail, and more than half of the dentils are clear. All legends are sharp except for the TE in UNITED and the final A in AMERICA, which are slightly faded.
Ex: Michael Summers (12/2004); Westmoreland County Collection (Heritage, 1/2008), lot 1326. PCGS# 6052
- 3747 1795 2 Leaves Fine 12 ANACS. O-102, R.4.** Mostly stone-gray though the peripheries display peach toning. The field near the eagle is somewhat glossy, but no abrasions are readily evident. Adjustment marks are moderate and confined the left reverse margin. *PCGS# 6052*
- 3748 1795 2 Leaves Fine 12 PCGS. O-129, R.5.** The final S in STATES is punched over a D, an engraving blunder also seen on certain 1795 half eagles. Pale grayish-magenta toning appears over the pleasing and mostly problem-free surfaces of this moderately worn half dollar, showing only trivial, scattered marks on each side. *PCGS# 6052*
- 3749 1795 2 Leaves — Graffiti — PCGS Genuine. Fine Details. O-109, R.4.** Steel-blue and chestnut-gold toning encompasses this Flowing Hair collector coin. The letter Z is pinscratched on Liberty's neck, and the obverse field appears lightly smoothed. *PCGS# 6052*

**1795 O-104 Half Dollar, Fine 15
Diagnostic Defect Below Last Star**

- 3750** 1795 2 Leaves Fine 15 PCGS. O-104, R.4. Star 15 straddles the bust with one ray pointing above the bust and another pointing below. A tiny die defect is visible in the field below that star, identifying the variety. Delicate lilac-gold toning appears on the high points of Liberty, with olive-gray and steel patina in the fields. PCGS# 6052

**1795 O-106 Half Dollar, VF20
Near Census Level**

- 3751** 1795 2 Leaves VF20 PCGS. O-106, R.6. A heavy diagonal break through the eagle's neck attributes the very rare Overton-106. The obverse is glossy with a pearl-gray portrait and deep charcoal-gray toning in the field. The reverse displays lighter stone-gray and chestnut patina. A few faded scratches are noted on the cheek and near the profile, but the obverse has only occasional brief thin marks. PCGS# 6052

- 3752** 1801 Fine 15 ANACS. O-101, R.3. The usual variety for the elusive 1801 half dollars, This example has light gray devices, and deeper gray toning in the fields. Splashes of cobalt-blue appear at the lower obverse. A few trivial marks are evident and inconsequential. NGC ID# 24ED, PCGS# 6064

- 3753** 1806 Pointed 6, Stem VF30 ANACS. O-116, R.3. Glimmers of luster outline design elements of this mildly bright and minimally toned Bust half dollar. A broad but subtle gray streak is on the upper left reverse. Free from any consequential contact. NGC ID# 24EJ, PCGS# 6071

- 3754** 1806 Pointed 6, Stem XF40 PCGS. CAC. O-115, R.1. The early die state without a crack through UNITED. A charming dove-gray and straw-gold representative with smooth surfaces and pleasing eye appeal. The eagle's wings are richly detailed. NGC ID# 24EJ, PCGS# 6071

- 3755** 1807 Draped Bust XF45 NGC. O-102, R.2. A lovely Draped Bust type coin with ample glimpses of bright luster outlining design elements. Open areas display rich cream-gray and chestnut-gold toning. Lightly abraded overall, though two thin marks are beneath the ribbon and chin. NGC ID# 24EM, PCGS# 6079

**1807 Draped Bust Half, AU50, O-105
Richly Patinated Obverse**

- 3756** 1807 Draped Bust AU50 NGC. O-105, R.1. Deep forest-green, lavender, and wheat-gold visits most of the obverse. The reverse is lightly toned though the borders show ice-blue and almond-gold. Glimpses of luster are plentiful and neither side displays any remotely noticeable abrasions. NGC ID# 24EM, PCGS# 6079

BUST HALF DOLLARS

- 3757** 1807 Large Stars, 50 Over 20 VF30 PCGS. CAC. O-112, R.1. Intermingled sky-blue and light tan appear on both sides with splashes of charcoal around the peripheral design elements on this popular blundered die half dollar. NGC ID# 24EN, PCGS# 6086

- 3758** 1807 Large Stars, 50 Over 20 XF45 PCGS. O-112, R.1. An accessible yet ever-popular die pair thanks to the mistaken and later corrected punching of a "2" in the denomination area. Lightly worn surfaces with a few marks and digs show blue and gold overtones across a range of grays. NGC ID# 24EN, PCGS# 6086

- 3759** 1807 Large Stars, 50 Over 20 AU53 NGC. O-112, R.1. Blended tan-brown, gunmetal-gray, and aqua-blue toning embraces this well detailed Bust half. The subdued surfaces have relatively few marks. The popular blundered denomination variety.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2037, which realized \$2,415. NGC ID# 24EN, PCGS# 6086

- 3760** 1808/7 AU50 NGC. O-101, R.1. This richly detailed and overdated Capped Bust half is darkly toned walnut-brown and cobalt-blue. Marks are minor except for a pinscratch on the eagle's neck and upper shield. NGC ID# 24EP, PCGS# 6091

**1810 Bust Half, MS62
Scarce Overton-106**

- 3761** 1810 MS62 NGC. O-106, R.4. This scarce Overton pairing is attributable by a lengthy diagonal die line from the left shield corner. A Condition Census example with vibrant luster and pleasing medium golden-brown and forest-green toning. The strike is crisp and marks are inconsequential to the grade. The reverse rim is flat near 7 o'clock, due to a slight misalignment of the reverse die toward that side. NGC ID# 24ET, PCGS# 6095

- 3762** 1811/10 XF45 PCGS. CAC. O-101, R.1. Two overdate varieties share a common obverse and have a small dot between the 8 and the adjacent 1 that are remnants from the overdate. This Choice XF specimen has traces of luster with medium to dark gray-brown toning. NGC ID# 24EV, PCGS# 6099

3763 1811 Small 8 AU53 PCGS. O-112, Low R.4. Four prominent obverse die cracks allow prompt attribution of this better variety half dollar. Orange-gold and aquamarine margins frame pearl-gray centers. No marks are consequential, though we note a slight obverse rim nick at 2:30.

Ex: Tampa FUN Signature (Heritage, 1/2011), lot 10650, which realized \$690. PCGS# 6097

3764 1811 Small 8 AU53 PCGS. CAC. O-110, R.1. Golden-brown and gunmetal-blue toning enriches this well defined Bust half. We note a few marks near PLURIBUS, but the obverse is unabraded aside from a tiny dig on the cleavage. PCGS# 6097

3765 1813 AU58 NGC. CAC. O-105, R.1. A heavily clashed example that does not yet show the reverse die crack that makes the scarce O-105a variant. Gold-orange, rose-gray, and steel-blue shadings cover still-lustrous, lightly rubbed surfaces with an old pinscratch on Liberty's cheek. NGC ID# 24EZ, PCGS# 6103

3766 1817 AU55 PCGS. O-113, R.2. The usual early state without the die crack through UNITED STA, this Choice AU example has frosty silver luster with splashes of pale gold toning and light wear on the high points. NGC ID# 24F6, PCGS# 6109

1820/19 Half Dollar, Near-Mint O-101, Square Base 2

3767 1820/19 Square Base 2 AU58 NGC. O-101, R.2. Transitional between O-101 and O-101a, the inner loop of the 9 is weak but present. This Overton marriage commands its own Guide Book listing, since the other 1820 overdate exhibits a Curl 2. The present lustrous near-Mint example has smooth fields and only minor contact on the portrait. Medium chestnut-gold centers are bounded by ocean-blue and lavender patina. NGC ID# 24FE, PCGS# 6125

3768 1821 AU58 PCGS. O-106, R.1. A few tiny bright silver spots appear on the high points of this original and delightful near-Mint half dollar. Both sides have golden-brown and iridescent toning. NGC ID# 24FF, PCGS# 6128

3769 1822 AU55 NGC. CAC. O-106, R.3. Mostly bright silver luster on both sides of this near-Mint specimen exhibit splashes of gold toning with a few darker spots. The design elements are nicely detailed. NGC ID# 24FG, PCGS# 6129

1822 O-104 Half Dollar, MS63

3770 1822 MS63 PCGS. O-104, R.3. This splendid Bust half dollar exhibits potent luster and attractive light honey-gold toning. The strike is precise and the eye appeal is imposing. A short cobalt-blue streak between the 22 in the date serves as an identifier. Overton-104 is often attributed by the high N in UNITED. NGC ID# 24FG, PCGS# 6129

3771 1823 MS62 NGC. CAC. O-106, R.3. The early die state before a Mint worker tampered with the shape of the 3. Dusky almond-gold and powder-blue shades encompass this satiny and minimally abraded example. The strike is sharp aside from several stars. NGC ID# 24FJ, PCGS# 6131

1823 O-106a Half Dollar, MS64 The Tampered 3 Variety

3772 1823 MS64 NGC. O-106a, R.2. The Mint had a problem with the punch for the 3 in 1823, and half dollar varieties listed in the Guide Book include the Broken 3, Patched 3, and Ugly 3. Specialized guides also refer to the Reworked 3, and the Tampered 3 of O-106a. This Choice Mint State example has deep magenta and sea-green toning over full satin luster on both sides. Only a few trivial marks prevent a higher grade. This piece is likely a census level example. *From The Strawberry Fields Collection.* NGC ID# 24FJ, PCGS# 6131

3773 1824 AU58 PCGS. O-108, R.2. A trace of rub appears in the form of grayish-tan patina on the high points of this lustrous silver half dollar with nearly full brilliance and excellent eye appeal. NGC ID# 24FK, PCGS# 6137

3774 1825 AU58 PCGS. CAC. O-105, R.2. ITED are joined on this distinctive variety. Both sides have satin luster with light champagne toning, showing nearly prooflike fields. A delightful near-Mint specimen. NGC ID# 24FL, PCGS# 6142

1825 Half Dollar, MS64 O-108, Interesting Strike Doubling

3775 1825 MS64 NGC. O-108, R.3. Autumn-gold and sea-green margins encompass lightly toned fields and motifs. Sharply struck and well-preserved with vibrant luster and exceptional eye appeal. Liberty's profile is widely strike doubled. The Herman census is led by two MS64 pieces, but we suspect that the present coin is as nice or better than either. NGC ID# 24FL, PCGS# 6142

3776 1826 AU58 PCGS. O-116a, R.1. Richly toned in gold, aqua-blue, and mauve shades. Luster flashes across the borders and devices. A pair of mint-made strike-throughs above the eagle's right (facing) shoulder are of little consequence. *Ex: Dallas Signature (Heritage, 4/2007), lot 748, which realized \$862.50. NGC ID# 24FM, PCGS# 6143*

3777 1826 AU58 PCGS. O-108, R.1. Pale silver with the faintest suggestion of gold on the rims. A well-defined and faintly frosty example that shows only minor rub on the high points.

3778 1826 AU58 PCGS. O-117, R.2. A trace of wear is noted on the high points as the grade suggests. However, virtually full silver luster is visible on the untuned surfaces of this attractive half dollar. NGC ID# 24FM, PCGS# 6143

- 3779 1826 MS63 NGC. O-118a, R.1.** A delicate die crack joins the tops of most letters in UNITED STATES and AMERICA on this Select Mint State half dollar. Both sides have intermingled magenta, gold, and sea-green toning. NGC ID# 24FM, PCGS# 6143

**1826 O-108a Half Dollar, MS64
Lustrous and Well-Struck**

- 3780 1826 MS64 PCGS. O-108a, R.1.** Actually in between O-108 and O-108a, since the die crack through OF fades out near the AM in AMERICA. Rich olive-gold, lilac-red, and powder-blue patina endows this lustrous and precisely struck Choice half dollar. The reverse appears pristine, as does the left obverse field, while the right obverse field and Liberty's neck display only faint marks. NGC ID# 24FM, PCGS# 6143

- 3781 1827 Square Base 2 AU58 PCGS Secure. O-142, R.3.** A diagonal die line on the right wing near the shield border identifies the variety, per Dr. Peterson's handy reference. A whisper of chestnut toning visits this lustrous and lightly abrade near-Mint half dollar. Several stars are incompletely impressed but the overall strike is bold. NGC ID# 24FN, PCGS# 6144

- 3782 1827 Square Base 2 MS60 ANACS. O-118, R.3.** Light golden patina adorns the margins of this lustrous half dollar, though the fields and motifs are brilliant. Uncommonly unabraded for the grade aside from a small smoothed area beneath the right scroll end. NGC ID# 24FN, PCGS# 6144

- 3783 1827 Square Base 2 MS62 PCGS. O-128, Low R.4.** The E in STATES is recut above and the I in PLURIBUS is jointed. This is a scarce variety although several Mint State pieces are recorded. This lustrous specimen has delicate champagne toning over its silvery-white surfaces and probably ranks among the 10 finest examples of the variety. NGC ID# 24FN, PCGS# 6144

- 3784 1827 Square Base 2 MS63 PCGS. O-114, R.3.** A die line appears in the left arm of the Y in LIBERTY on this scarce variety. Both sides of this piece have brilliant and frosty silver luster with hints of delicate gold toning. NGC ID# 24FN, PCGS# 6144

- 3785 1828 Curl Base 2, Knob AU58 NGC. O-107, R.2.** Bright luster fills the borders of this minimally abraded Borderline Uncirculated half dollar. A lens shows only minor contact. Generally silver-gray with glimpses of tan near the rims. PCGS# 6149

- 3786 1828 Square Base 2, Small 8, Large Letters AU58 PCGS. CAC. O-117, R.1.** Olive-green, orange-gold, and plum-mauve enrich this well defined representative. The high points exhibit light wear but marks are minimal and the eye appeal is pleasing. PCGS# 6151

- 3787 1828 Square Base 2, Small 8, Small Letters AU55 PCGS. O-119, R.3.** The sole Overton variety with small letters on the reverse legend, though Dr. Peterson refers to O-119 as a Medium Letters reverse. Light straw-gold and cream-gray toning graces this smooth and partly lustrous half dollar. One small flan flaw beneath the LU in PLURIBUS. PCGS# 6152

- 3788 1830 Small 0 MS63 PCGS. O-116, R.2.** Rich dove-gray and autumn-brown patina encompasses this satiny and nicely struck Select Bust half. Nicely struck and minimally marked. A late die state with the stars drawn to the rim. *From The Strawberry Fields Collection.* NGC ID# 24FU, PCGS# 6156

**1830 Half Dollar, Near-Gem
Small 0, O-103**

- 3789 1830 Small 0 MS64 PCGS. O-103, R.1.** The first A in AMERICA and the 5 in the denomination are both recut to the left on this collectible variety. A short die line connects the center arrowhead to the border. This satiny representative is deeply patinated olive-green and tobacco-brown with glimpses of cobalt-blue and fire-red at the margins. Well struck except for the stars. Liberty's profile is lightly strike doubled. *Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3613, which realized \$2,530.* NGC ID# 24FU, PCGS# 6156

- 3790 1831 MS62 NGC. CAC. O-111, R.1.** Medium autumn-brown and gunmetal toning embraces coruscating and unmarked surfaces. Well struck at the centers though border elements show occasional incompleteness. NGC ID# 24FV, PCGS# 6159

- 3791 1831 MS63 PCGS. O-110, R.2.** Light to medium wheat-gold toning adorns this lustrous silver type coin. Smooth aside from a few tiny ticks near the chin. Sharply struck at the centers though border elements are incompletely brought up. *From The Searight Collection.* NGC ID# 24FV, PCGS# 6159

**1831 Bust Half, MS64
O-109, Attractively Toned**

- 3792 1831 MS64 NGC. O-109, R.1.** Jade-green, golden-brown, and powder-blue embrace this lustrous and impressively unabraded near-Gem. The star centers and the UR in PLURIBUS are lightly brought up, but the remainder of the design is bold. A brief die line in the band above the R in LIBERTY identifies the available Overton marriage. Struck from a lightly rusted obverse die. NGC ID# 24FV, PCGS# 6159

**1831 Half Dollar, Brilliant MS64+
O-119**

- 3793 1831 MS64+ PCGS. O-119, R.3.** The obverse of this die marriage is attributed by positions of the key stars 1, 7, 8, and 13, while the reverse, a carryover from the 1830 O-108, shows many of the horizontal shield lines extending far outward into the right (facing) wing feathers. AM nearly touch, M lower than A. This piece differs from most, in that there is no evidence of a die crack connecting the tops of UNITED. Lustrous, untuned silver-white surfaces show generous cartwheel luster, for those who prefer their silver coins untuned. Moderate die erosion is more obvious on the obverse, despite the reuse of the reverse die. NGC ID# 24FV, PCGS# 6159

- 3794 1833 AU58 PCGS. CAC. O-101, R.1.** A vertical line appears at the upper left crossbars on the reverse of this plentiful variety. Both sides have a trace of wear visible through golden-brown and iridescent toning on the lustrous surfaces. NGC ID# 24FX, PCGS# 6163

- 3795 1833 MS62 PCGS. O-104, R.1.** A high second T in STATES identifies this Overton variety. Dusky olive-green and dove-gray toning graces coruscating and unmarked surfaces. One small spot on the nose. Liberty's profile is strike doubled. NGC ID# 24FX, PCGS# 6163

1833 O-108 Half Dollar, MS64

- 3796 1833 MS64 NGC. O-108, R.1.** Rich golden-brown, steel-blue, and forest-green blanket this satiny, well struck, and unmarked near-Gem. Trivial hairlines on the left obverse field are all that limit the grade. Dr. Glenn Peterson identifies Overton-108 by the extension of the second lowest horizontal die line into the right wing. NGC ID# 24FX, PCGS# 6163

- 3797 1834 Large Date, Large Letters MS62 PCGS. O-101, R.1.** There are only three varieties for the Large Date, Large Letters combination, so they are easy to attribute. This one has the upright of the 5 in 50C recut. A delightful and lustrous Mint State example, this half dollar has lovely multi-colored toning over its frosty surfaces. NGC ID# 24FY, PCGS# 6164

**1834 O-109 Half Dollar, MS63
Prooflike Surfaces**

- 3798 1834 Small Date, Small Letters MS63 Prooflike NGC. O-109, R.1.** Lovely golden-violet and sky-blue toning appears on both sides of this Select Mint State Capped Bust half dollar. The fields are fully mirrored, further enhancing the already wonderful eye appeal. This piece will appeal to variety specialists as well as date and type collectors. PCGS# 6166

**1834 O-116 Half Dollar, MS64
Small Date, Small Letters**

- 3799 1834 Small Date, Small Letters MS64 PCGS. CAC. O-116, R.1.** O-116 shows a double outline of the bust tip, presumably from a misplaced first impression of the bust device. Dusky caramel-gold and powder-blue patina embraces this coruscating and attractively toned example. The strike shows occasional incompleteness and the surfaces are smooth aside from faint contact on the portrait and left obverse field. PCGS# 6166

REEDED EDGE HALF DOLLARS

- 3800 1837 MS62 NGC. GR-7, R.2.** The so-called "Inverted G" variety with a defective C in AMERICA. A sharply struck olive-gray and almond-gold example with satin luster and a thin horizontal mark across Liberty's neck. Struck from moderately rotated dies. NGC ID# 24G4, PCGS# 6176

1837 Select Half Dollar A Popular Type Coin

- 3801 1837 MS63 PCGS.** The 1837 second-year Reeded Edge halves are popular with type collectors, as far fewer 1836 pieces were struck and are considerably more expensive. Together they constitute the entire two-year subtype with 50 CENTS on the reverse. This sharply struck Select piece has lovely mint frost that has taken on a steely appearance with some coppery accents on the reverse. An outstanding example of this essentially one-year type.
Ex: Long Beach Signature (Heritage, 2/2005), lot 7019.
From The Searight Collection. NGC ID# 24G4, PCGS# 6176

1837 GR-9 Half Dollar, MS63 Smooth, Lustrous Surfaces

- 3802 1837 MS63 PCGS. GR-9, R.1.** Light to medium autumn-gold toning is most apparent near the rims. This lustrous Select half dollar is intricately struck at the centers though the reverse border shows incompleteness. Marks are present but of no consequence. A two-year type, and the costly 1836 compels purchase of its successor. NGC ID# 24G4, PCGS# 6176

- 3803 1838 MS62 PCGS. GR-13, R.1.** The lengthy reverse peripheral die crack helps attribute the marriage. A satiny cream-gray representative with smooth surfaces. The central strike is sharp though right-side stars and legends show incompleteness.
From The Searight Collection. NGC ID# 24G5, PCGS# 6177

- 3804 1838 MS62 PCGS. GR-3, R.2.** The die marriage is most interesting for a roughly horizontal die crack through the shield. A blanket of dusky dove-gray toning encompasses this gently coruscating and minimally abraded half dollar. The strike is precise at the centers though selected peripheral elements are lightly brought up. NGC ID# 24G5, PCGS# 6177

- 3805 1839-O VF35 NGC. GR-1, R.1.** The latest die state for the variety yet seen by the cataloger, with many heavy cracks and evidence of die sinking. A nicely detailed Choice VF lavender-brown New Orleans type coin. Minimally abraded and attractive. NGC ID# 24G7, PCGS# 6181

- 3806 1839-O XF45 PCGS. CAC. GR-1, R.1.** The mintmark is lightly repunched south. Dusky dove-gray and slate toning embraces this moderately circulated New Orleans type coin. The left obverse has a few tiny ticks but marks are minor overall.
From The Strawberry Fields Collection. NGC ID# 24G7, PCGS# 6181

- 3807 1839-O AU53 NGC. GR-1, R.1.** The usual die variety of this low mintage New Orleans type coin. The late die state with many cracks across both sides. A lightly circulated slate-gray coin without any consequential marks. NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

- 3808 1839 No Drapery VF35 PCGS. CAC.** Silver and gold surfaces, along with hints of blue, provide this Choice VF survivor with a pleasing appearance. The brighter devices stand out against the darker fields, particularly on the reverse, adding to the eye appeal. The wear is even and there are no abrasions worthy of mention. A lovely representative of this one-year type.
From The Strawberry Fields Collection. NGC ID# 24GK, PCGS# 6230

1839 No Drapery Half, AU55 Scarce One-Year Transitional Type

- 3809 1839 No Drapery AU55 NGC.** Although the 1839 Drapery and 1839 Bust half dollars are relatively plentiful, the 1839 No Drapery is surprisingly rare in better Mint State grades. This Choice AU example has a pleasing appearance with areas of golden-brown and rose-gray toning confined primarily to the outer edges, accentuating the brighter central devices. The piece retains a pleasing level of design detail and luster. Census: 20 in 55, 50 finer (8/13).
From The Joan Carroll Collection. NGC ID# 24GK, PCGS# 6230

1839 No Drapery Half, AU55 Single Year Subtype

- 3810 1839 No Drapery AU55 PCGS.** An essential one-year type, this is an especially attractive No Drapery Half that also represents excellent value for the type or date collector. The surfaces show almost complete mint luster, and while they are not exactly brilliant, they have a lovely silvery-gray patina with darker russet accents over the highpoints of the design. Well struck. To put a finer point on the value issue: a bagmarked MS60 will cost twice as much as this pleasing, problem-free AU55. Population: 18 in 55, 49 finer (8/13).
Ex: Atlanta Signature (Heritage, 8/2001), lot 6161.
From The Searight Collection. NGC ID# 24GK, PCGS# 6230

- 3811 1840 (O) Reverse of 1838, Medium Letters XF45 NGC.** The Guide Book describes this scarce variety as “struck at the New Orleans Mint from a reverse die of the previous style without mintmark.” The 1839-O half, of course, has the mintmark above the date. A sharp olive-gray example with moderate obverse abrasions. From *The Joan Carroll Collection*. NGC ID# 24GP, PCGS# 6233

**1840 (O) Half Dollar, AU58
Reverse of 1839, No Mintmark**

- 3812 1840 (O) Reverse of 1838, Medium Letters AU58 NGC.** Struck from a leftover reverse die from the Reeded Edge period (with no reverse mintmark), this anomaly was not discovered and published until 1980. This particular coin displays almost all the reverse die cracks that are enhanced on page 51 of the updated Bugert reference. Significant mint luster remains on each side and most of the obverse is covered with a light layer of pinkish patina, less so on the reverse. There are also remnants of iron bits embedded in the planchet, a problem mentioned by Philos B. Tyler in 1840. Here the iron bits are located out from star 1 and through the final A in AMERICA. Census: 5 in 58, 6 finer (8/13). From *The Joan Carroll Collection*. NGC ID# 24GP, PCGS# 6233

- 3813 1840 Reverse of 1839, Small Letters AU58 NGC.** A chestnut-gold example of this scarce Seated subtype, in use between 1839 and 1841. Nicely struck and lightly abraded. Luster is particularly extensive on the reverse. From *The Joan Carroll Collection*. NGC ID# 24GM, PCGS# 6234

- 3814 1841-O AU58 PCGS. WB-101.** Large O. Light almond-gold toning endows this partly lustrous and typically struck near-Mint half dollar. Abrasions are minor aside from a faint field cluster near Liberty's right (facing) knee. From *The Strawberry Fields Collection*. NGC ID# 24GS, PCGS# 6237

- 3815 1842-O Small Date, Small Letters Good 6 PCGS. CAC.** Though well circulated, this key date New Orleans example is pleasing due to minimally abraded surfaces and attractive autumn-gold and cream-gray toning. From *The Strawberry Fields Collection*. NGC ID# 24GV, PCGS# 6238

- 3816 1842-O Small Date, Small Letters VG8 PCGS. CAC.** A circulated but unmarked example of this rare *Guide Book* variety. In LIBERTY, the L is full and the TY are partial. Tan-gold margins frame stone-white fields and motifs. From *The Strawberry Fields Collection*. NGC ID# 24GV, PCGS# 6238

- 3817 1844 MS63 NGC.** The 844 in the date is lightly repunched, though the coin does not match any of WB-102 through WB-105. A lustrous and well struck No Motto half with light caramel-gold toning. Marks are minor though clustered on the upper reverse field. NGC ID# 24GZ, PCGS# 6245

- 3818 1844-O Doubled Date VG8 PCGS. WB-103, FS-301.** The widely misplaced date is readily visible beneath Liberty's rock. Some drapery and plumage detail remains. Cobalt-blue margins encompass walnut-brown fields and stone-gray high points. The obverse field is abraded and the upper reverse field displays hairlines. From *The Strawberry Fields Collection*. NGC ID# 24H2, PCGS# 6247

- 3819 1844-O Doubled Date VF25 PCGS. WB-103, FS-301.** Imagine the annoyance of the unknown Mint engraver who placed the date too high on the obverse die of the present variety. The date overlapped the top of the rock, and had to be entered again. Little if any attempt was made to efface the blundered date. This midgrade representative has lilac, slate-gray, and powder-blue toning. No marks are noticeable, and most of LIBERTY is sharp. From *The Strawberry Fields Collection*. NGC ID# 24H2, PCGS# 6247

**1844-O Doubled Date Half Dollar
AU Sharpness, FS-301**

- 3820 1844-O Doubled Date — Cleaning — PCGS Genuine. AU Details. WB-103, FS-301.** This blatantly blundered date *Guide Book* variety is famous from the large-sized photo on the cover of the classic Wiley-Bugert reference. The present example has a wealth of detail and rich golden-brown obverse toning. The reverse is dusky pearl-gray with hints of chestnut patina. Moderately hairlined but devoid of consequential abrasions. NGC ID# 24H2, PCGS# 6247

- 3821 1845-O AU58 PCGS. CAC.** This lustrous near-Mint specimen shows just a trace of high-point wear on the sharply detailed design elements. Pleasing shades of pale blue, green, pink, and gray toning mingle on the lightly abraded surfaces. Population: 6 in 58, 23 finer (8/13). NGC ID# 24H4, PCGS# 6249

- 3822 1845-O No Drapery AU58 PCGS. CAC.** A near-Mint example, this piece displays caramel-gold color overall, with a few splashes of other colors present on the reverse, including sea-green, copper, plum, and lime-green. This lovely coin exhibits a bold strike. Population: 5 in 58, 5 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 24H5, PCGS# 6250

- 3823 1846 Tall Date MS62 NGC.** The Open 6 confirms the scarce Tall or Large Date logotype variety for this piece. Both sides of this half display deep golden-gray toning. The design elements exhibit an attractive level of detail. There are no contact marks worthy of mention. Census: 21 in 62, 28 finer (8/13). PCGS# 6252

- 3824 1846 6 Over Horizontal 6 AU50 PCGS. WB-104, FS-301.** A remarkable blundered date variety that has achieved a separate *Guide Book* listing. This untuned and sharp representative is lightly abraded and exhibits ample luster on the motifs and legends. Population: 5 in 50, 17 finer (7/13). NGC ID# 24H6, PCGS# 6254

- 3825 1846-O Tall Date XF45 PCGS. CAC.** A much more difficult coin to locate in any grade than its Medium Date counterpart, this is a lovely representative of the scarce 1846-O Tall Date variety. Splashes of honey-brown color along with a few small areas of teal are present. The design elements retain a pleasing level of detail. Population: 5 in 45, 8 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 24H9, PCGS# 6256

- 3826 1848-O AU58 PCGS. CAC.** A lovely near-Mint representative, this piece appears to be free of toning. A hair thin mark is present in the left obverse field. Housed in a green label holder. Population: 11 in 58, 19 finer (8/13). NGC ID# 24HD, PCGS# 6261

3827 1848-O MS63 PCGS. Mottled toning appears on both sides of this Select New Orleans No Motto half. The colors include copper-brown, red, jade-green, orange, and plum. The design details display nice definition overall with only small areas of incompleteness. Population: 5 in 63, 7 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24HD, PCGS# 6261

3828 1850 AU55 PCGS. The scarcity of the 1850 is related to the California Gold Rush of the era, which led to an increase in the value of silver. Half dollars were removed from circulation and melted to reclaim the bullion content. This lightly circulated example displays orange and red-brown toning. Teal and plum shades appear at the extreme edges. The fields are typically abraded. Population: 10 in 55, 37 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24HG, PCGS# 6264

3829 1851 VF20 PCGS. Peach, blue, and violet overtones mingle across shades of gray on this midrange example. On the shield, the E in LIBERTY is just beginning to show wear-softness. Population: 2 in 20, 79 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24HJ, PCGS# 6266

3830 1851 — Cleaning — PCGS Genuine. AU Details. The 1851 mintage is misleading. The issue was widely melted, because its bullion content exceeded face. This sharply defined example shows only slight wear on Liberty's legs. The blue-green and lilac toning is artificial and the fields display hairlines. NGC ID# 24HJ, PCGS# 6266

3831 1852 XF45 PCGS. CAC. Lightly worn but still lustrous with a range of colors in its patina. Gold-to-orange, pearl-gray, and steel-blue are most prominent with the deepest hues at the left reverse rim. Population: 7 in 45, 68 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24HL, PCGS# 6268

1853 Arrows and Rays Half Dollar, MS63 An Excellent Type Coin

3832 1853 Arrows and Rays MS63 PCGS. While circulated examples of the 1853 Arrows and Rays half dollar can be located with little difficulty, Mint State examples are another matter. Inspection of PCGS and NGC population data indicate a surprising number of examples in the MS62 through MS64 levels, probably resulting from resubmissions in the hope of attaining a higher grade. In other words, coins in these grades are likely scarcer than the population reports indicate. The lustrous silver-gray surfaces of this Select example exhibit well-struck design elements and both sides reveal fewer marks than what might be expected for the designated grade. A few light roller marks are visible on Liberty's chest. This is an excellent choice for a type collection.
From *The Searight Collection*. NGC ID# 24JJ, PCGS# 6275

3833 1854-O Arrows MS64 PCGS. This attractive Choice specimen exhibits sharply detailed design elements and vibrant mint luster throughout, with pleasing champagne-gold toning and few signs of contact. Population: 80 in 64 (2 in 64+), 33 finer (8/13).
From *The Searight Collection*. NGC ID# 24JM, PCGS# 6280

3834 1855-O Arrows MS63 PCGS. The arrows at the date were added to signify the weight reduction that took place in 1853. This feature was discontinued after 1855, and type collectors prize the short-lived design. This lovely Select example exhibits incompleteness of strike in several areas, including several of the stars at right on the obverse and several of the reverse designs such as the top of the eagle's left wing, the M in AMERICA, and the eagle's right claw. Population: 52 in 63, 95 finer (8/13). NGC ID# 24JP, PCGS# 6283

1855-O Arrows Half, MS64+ Ideal Mintmark Type Coin

3835 1855-O Arrows MS64+ NGC. Gleaming untuned surfaces and a bold level of design details provide this near-Gem representative with a strong degree of eye appeal as the plus designation attests. A hair thin mark is present to the left of Liberty's face. A small as-made strike-through appears near 10 o'clock on the obverse. Census: 34 in 64 (2 in 64+), 24 finer (8/13).
From *The Joan Carroll Collection*. NGC ID# 24JP, PCGS# 6283

3836 1856-O MS63+ PCGS. CAC. WB-103. The 56 in the date is repunched. The obverse of this antebellum half dollar has semireflective luster, while the reverse is more swirling. Dappled blue, green, and gold shadings are leavened with spots of silver. Population: 28 in 63+, 50 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24HP, PCGS# 6288

1857-S Half Dollar, AU53 Conditionally Rare S-Mint

3837 1857-S AU53 PCGS. CAC. Large S. Scattered toning adds to the eye appeal of this lovely example, with the colors including shades of gold, yellow, ice-silver, ice-blue, red-brown, and green-brown. Although minor surface marks are present, as expected at this grade level, they are all minor. This is a pleasing representative. Population: 8 in 53, 9 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24HU, PCGS# 6292

3838 Three-Piece S.S. Republic Half Dollar Issuers Set. Ex: S.S. Republic. This lot includes: 1860-O — Shipwreck Effect — NGC Details, issued by the United States; 1861-O — Shipwreck Effect (C) — NGC Details, Unc., Wiley-04, issued by the state of Louisiana; and an 1861-O — Shipwreck Effect (B) — NGC Details, Unc., Wiley-13, issued by the Confederacy. All three NGC-certified items are housed in separate holders within a presentation case with slipcover. Certificate of authenticity included. (Total: 3 coins)

3839 1860-O MS62 PCGS. CAC. Luminous cartwheel luster is silver to pearl-gray on the interiors with strong gold-to-tan elements at the margins. A great antebellum half dollar.
From *The Strawberry Fields Collection*. NGC ID# 24J4, PCGS# 6300

3840 1861-O Half Dollar "Three Authorities" S.S. Republic Set NGC. Comes in presentation case with certificate of authenticity. All coins certified as "Shipwreck Effect" by NGC. Examples include a W-01A "United States issue," a W-04A "Louisiana Issue," and a W-10 "Confederate States Issue." (Total: 3 coins)

3841 1861-O AU55 PCGS. CAC. WB-103, WB-104. A Confederate striking that combines a Bisected Date obverse with a Speared Olive Bud reverse. In the November 2005 *Gobrecht Journal*, Randy Wiley presents the various 1861-O die pairings and assigns them to Federal, Louisiana, and Confederacy.
From *The Strawberry Fields Collection*. NGC ID# 24J8, PCGS# 6303

1861-O Seated Half Dollar, MS64 Dramatic Multicolor Toning

3842 1861-O MS64 PCGS. The 1861-O Seated Liberty half dollar was produced in large numbers but examples in MS64 condition are surprisingly difficult to locate in today's market. This well-detailed Choice example displays shades of lavender, gray, blue, green, and amber toning, with strong mint luster underneath. Population: 26 in 64 (2 in 64+), 14 finer (8/13). NGC ID# 24J8, PCGS# 6303

3843 1861-S AU58 PCGS. Well-defined for the issue with only a touch of rub on the high points of the lustrous surfaces. The obverse is pearl-gray, while the reverse shows touches of tan as well. Population: 12 in 58, 32 finer (8/13). NGC ID# 24J5, PCGS# 6306

1862 Half Dollar, Near-Gem Conditionally Rare

3844 1862 MS64 PCGS. CAC. Both sides of this near-Gem display largely brilliant centers framed by lovely toning. The primary colors are orange and russet, with splashes of teal and sea-green also appearing. Attractive mint luster is present. Abrasions appear, including on Liberty's cheek and the field above the eagle. Population: 13 in 64, 17 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24J9, PCGS# 6307

3845 1862-S MS61 PCGS. Large splashes of golden-brown color are present on the obverse of this example along with smaller areas of blue-gray, plum, and violet. The reverse primarily exhibits a light gold color. Encapsulated in an old green label holder. Population: 3 in 61, 32 finer (8/13). NGC ID# 24JA, PCGS# 6308

1865 Half Dollar, Choice Specimen Attractively Toned

3846 1865 MS64 PCGS. CAC. Attractive overall steel-gray color and shimmering luster provide this near-Gem with a high degree of visual appeal. Closer examination reveals large areas of aqua and golden-orange toning, with aqua predominant on the obverse and golden-orange on the reverse. A number of tiny gray-brown spots are present on the obverse. The coin displays a pleasing degree of detail aside from minor incompleteness at the upper portion of the eagle's right wing. Population: 9 in 64, 14 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24JE, PCGS# 6313

3847 1866-S No Motto VF30 PCGS. The fields have delicate violet, lilac-blue, and peach hues around pale pearl-gray devices. A pleasing midrange coin that remains faintly luminous. Population: 15 in 30, 51 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24JH, PCGS# 6315

1866 Seated Half Dollar, MS64 Surprisingly Scarce in Mint Condition

3848 1866 Motto MS64 NGC. A coin with tremendous visual appeal, particularly on the reverse, this near-Gem displays rich toning. The colors include intermingled shades of rich golden-brown, teal, sea-green, copper-brown, red-brown, plum, and violet. As-made roller marks appear on both sides. Census: 7 in 64 (1 in 64+), 14 finer (8/13). NGC ID# 24JS, PCGS# 6319

3849 1870 MS63 NGC. This dusky delight has glimmers of luster under deep blue-violet and peach patina. The grade comes from wispy flaws rather than abrasions of any significance. NGC ID# 24JZ, PCGS# 6327

3850 1870 MS64 PCGS. Peach and violet shadings enrich most of each side, the obverse adding a silver interior. A pleasing near-Gem of the With Motto type, surprisingly rare this fine. Population: 6 in 64 (1 in 64+), 4 finer (8/13). NGC ID# 24JZ, PCGS# 6327

3851 1870 MS64 PCGS. Vibrant mint luster shines through vivid shades of lavender toning on this attractive Seated Liberty half dollar. The design elements are sharply detailed, aside from a touch of softness on IN in the motto. From a mintage of 633,900 pieces. Population: 6 in 64 (1 in 64+), 4 finer (8/13). NGC ID# 24JZ, PCGS# 6327

- 3852 1870-CC AG3 PCGS.** The rims and some peripheral devices are worn smooth, but major design elements are complete in outline and date and mintmark are plainly legible. From a low mintage of 54,617 pieces. NGC ID# 24K2, PCGS# 6328

**1870-CC Half Dollar, VG8
Pleasing and Problem-Free**

- 3853 1870-CC VG8 PCGS. CAC.** The 1870-CC Seated Liberty half dollar is the first, and rarest, issue of the Carson City series. The mintage of 54,617 pieces would indicate a greater availability of this issue than is actually the case. This problem-free VG8 example displays even wear. The surfaces reveal chestnut-gold and stone-gray colors.
From The Strawberry Fields Collection. NGC ID# 24K2, PCGS# 6328

- 3854 1872-CC VF35 PCGS. CAC.** Though the 1872-CC has a reasonable mintage, it also has a low survival rate. A pleasing gray patina with hints of gold and rose covers both sides of this Choice VF piece. The coin retains a pleasing level of detail and there are no abrasions worthy of mention. Population: 18 in 35, 65 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24K8, PCGS# 6334

- 3855 1872-CC — Environmental Damage — PCGS Genuine. XF Details.** A well defined example of this early and conditionally rare Carson City issue. The deep steel-gray surfaces are mildly granular, and a couple of minor marks are noted near the left ribbon end. NGC ID# 24K8, PCGS# 6334

- 3856 1873-CC Arrows VF35 PCGS. CAC.** The 1873-CC With Arrows half dollar is a scarce issue from a mintage of 214,560 pieces. This Choice VF specimen retains much of its original design detail and the pleasing gray surfaces display hints of green and lavender toning. Population: 20 in 35, 99 finer (8/13). NGC ID# 24L8, PCGS# 6344

- 3857 1873-CC Arrows XF40 PCGS.** A pleasing XF example of the popular Arrows design from the famous Carson City Mint, with a Small CC mintmark. The design elements show light-to-moderate even wear and the lightly abraded surfaces are darkly toned in grayish-bronze hues. Population: 22 in 40, 77 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24L8, PCGS# 6344

- 3858 1874-CC Arrows VG10 PCGS. CAC.** The L and Y in LIBERTY are clear on this tough With Arrows Carson City issue. Surfaces are gold-gray and blue-gray with touches of orange. Population: 13 in 10, 75 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24LB, PCGS# 6347

- 3859 1875 MS63 PCGS.** The high-mintage 1875 half is one of the more available and more attractively produced issues in the series. Brilliant champagne surfaces and frosty luster create an attractive appearance for this Select example. Population: 55 in 63, 59 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24KD, PCGS# 6349

- 3860 1875-CC MS61 NGC.** Although the 1875-CC is readily collected in grades below VF, Uncirculated examples are both rare and desirable. This wonderful representative boasts rich mint luster. The surfaces reveal only a hint of light champagne toning and nicely defined design details. AMERICA exhibits strike doubling. Census: 8 in 61, 49 finer (8/13). NGC ID# 24KE, PCGS# 6350

**1875-S Seated Half, MS65
Pleasing Luster**

- 3861 1875-S MS65 PCGS.** Mint State 1875-S half dollars are scarce through MS65 and are a significant condition rarity any finer. Rich luster remains beneath a patina of gray-green, golden-brown, rose-pink, and orange-gold on this pleasing Gem example. The design elements display strong detail. Population: 53 in 65, 14 finer (8/13). NGC ID# 24KE, PCGS# 6351

- 3862 1877 MS64 PCGS.** Dusky chestnut-gold, stone-gray, and cobalt-blue toning enriches this satiny and nicely struck near-Gem. Smooth except for a luster graze on the left obverse field. Encapsulated in an old green label holder. Population: 47 in 64, 43 finer (8/13). NGC ID# 24KK, PCGS# 6355

**1877-CC Half Dollar, MS64
Bright Mint Luster**

- 3863 1877-CC MS64 PCGS. CAC.** Type One Reverse, Medium CC. Because almost 2 million CC halves were struck in 1877, it is likely to be used for type purposes. This is a highly lustrous example that has just the slightest hint of toning over each side. The strike is sharp throughout, and the only mark we can see that would prevent an even higher grade is a short one in the right obverse field. Population: 44 in 64, 21 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24KL, PCGS# 6356

- 3864 1878-CC Good 6 NGC.** Though only the ghosts of the letters in LIBERTY are visible, this coin's all-around detail is consistent with a G6 designation. Gold-gray and charcoal-blue shadings prevail on modestly abraded surfaces. Census: 2 in 6, 29 finer (8/13). NGC ID# 24KP, PCGS# 6359

- 3865 1878-CC VG10 PCGS. CAC.** This issue marked the end of Carson City half dollars, and indeed all minor silver production at that branch mint. Just 62,000 of the halves were produced, and the issue saw hard use. This VG10 example displays golden-orange color overall along with small areas of sea-green, primarily on the outer edges of the obverse. Population: 17 in 10, 59 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24KP, PCGS# 6359

- 3866 1879 AU55 PCGS. CAC.** Prooflike surfaces provide this nicely struck Choice AU example with a lovely appearance. Copper-gold and orange colors cover large portions of the reflective surfaces, with hues of pink, green, and rose present as well.
From The Strawberry Fields Collection. NGC ID# 24KS, PCGS# 6361
- 3867 1880 MS64 PCGS.** Only 8,400 business-strike Seated Liberty half dollars were struck in 1880, and the issue is seldom encountered in high grade. A pleasing near-Gem representative, this brilliant piece reveals prooflike surfaces, particularly the reverse. A few wisps of golden-brown color appear on the obverse. The minor abrasions present are almost all confined to the obverse. Population: 21 in 64, 37 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24KT, PCGS# 6362
- 3868 1880 MS64 PCGS. CAC.** Gold-orange, lavender, and blue toning with a broad silver window at the central obverse. This near-Gem has glimmering semireflective luster and frost on Liberty's figure. Population: 21 in 64, 37 finer (8/13). NGC ID# 24KT, PCGS# 6362
- 3869 1881 MS62 PCGS.** The low business strike mintage of the 1881 half, at only 10,000 pieces, suggests there may be an above average percentage of survivors with mirrored fields. Golden-brown toning along with hints of green appears on both sides of this piece. The coin displays a pleasing strike and reflective fields. Population: 21 in 62, 77 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24KU, PCGS# 6363
- 3870 1883 MS62 PCGS. CAC.** Reflective fields, particularly on the reverse, provide this lightly toned piece with a strong degree of eye appeal. The golden-brown toning is confined almost entirely to the outer edges, leaving brilliant silver centers. Population: 16 in 62, 67 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24KW, PCGS# 6365
- 3871 1884 XF40 PCGS.** A scarce issue from a minuscule mintage of 4,400 pieces, this pleasing XF specimen retains most of its original design detail and the lavender-gray surfaces show traces of prooflike reflectivity in sheltered areas.
From The Strawberry Fields Collection. NGC ID# 24KX, PCGS# 6366
- 3872 1886 MS61 NGC.** Well-defined with watery reflectivity in the fields. Gold-to-orange peripheral toning yields to silver interiors with a touch of blue on the reverse. Scattered light marks and a few deeper digs in the obverse fields account for the grade. NGC ID# 24KZ, PCGS# 6368
- 3873 1890 MS64 PCGS.** Despite the multicolored toning, the fields remain highly reflective on this near-Gem example. The toning includes hues of yellow, teal, deep electric-blue, copper, and plum. Clash marks are present on the reverse. The abrasions are minor, save for a mark slightly below Liberty's right shoulder. Population: 26 in 64 (1 in 64+), 33 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24L5, PCGS# 6372
- 3874 1891 MS64 PCGS.** Mintages at Philadelphia finally began to pick up in 1891 following 12 years of minimal business strike production. However, the issue is nonetheless scarce at the upper grade levels. The reverse of this near-Gem example, in particular, displays a prooflike appearance. Subtle light gold toning with hints of blue is present. Population: 46 in 64, 37 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24L6, PCGS# 6373

PROOF SEATED HALF DOLLARS

- 3875 1862 PR63 PCGS.** Intricately detailed with deep, watery mirrors and delicate golden-orange accents that more noticeably affect the reverse. A desirable Civil War era issue from a tiny mintage of 550 proofs. Population: 51 in 63, 69 finer (8/13).
From The Searight Collection. NGC ID# 27TN, PCGS# 6416

1863 Seated Half, PR64 Cameo Brilliant and Attractive

- 3876 1863 PR64 Cameo PCGS.** Ex: The Sundance Collection. This Civil War era half hails from a relatively low mintage of 460 proofs. The near-Gem Cameo exhibits a barely discernible film of champagne color along with outstanding field-motif contrast. An exacting strike imparts bold definition to the design elements, further enhancing the eye appeal. Several as-made lint marks appear on each side. Population: 8 in 64 Cameo, 7 finer (8/13).
Ex: *Long Beach Signature* (Heritage, 9/2008), lot 2253. PCGS# 86417

1864 Seated Liberty Half, PR64 Only 470 Pieces Struck

- 3877 1864 PR64 NGC.** Only 470 proof Seated Liberty half dollars were struck in 1864. This attractive Choice survivor displays sharply detailed design elements and deeply reflective fields under delicate shades of champagne-gold and cerulean-blue toning. Census: 59 in 64 (1 in 64+), 20 finer (8/13). NGC ID# 27TR, PCGS# 6418
- 3878 1869 PR64 NGC.** Only 600 proof Seated Liberty half dollars were struck in 1869. A solid strike brings essentially full definition on the devices of this near-Gem proof. Liberty's portrait stands out against the mirrored fields. The few marks present detract nothing from the coin's pleasing overall eye appeal. Census: 48 in 64, 31 finer (8/13). NGC ID# 27U4, PCGS# 6427
- 3879 1870 PR63 PCGS.** A generous mintage of 1,000 proof Seated Liberty half dollars was accomplished in 1870. This sharply detailed Select example is darkly toned in shades of blue, gray, and pale gold, with deeply reflective fields under the patina. Population: 45 in 63, 72 finer (8/13). NGC ID# 27U5, PCGS# 6428
- 3880 1870 PR64 PCGS.** Rich toning on the obverse that includes hues of golden-champagne, russet, red, plum, and emerald-green only partially masks the flashy reflectivity that is fully revealed on the reverse. The patina on the reverse is more scattered, but includes the same shades. The majority of the design elements exhibit bold definition. Population: 56 in 64, 16 finer (8/13). NGC ID# 27U5, PCGS# 6428

**1872 Seated Liberty Half, PR66
Vivid Peripheral Toning**

- 3881 1872 PR66 NGC.** The brilliant centers of this delightful Premium Gem yield to vivid rings of sea-green and cobalt-blue at the borders. The design elements are sharply detailed, with frosty mint luster, and the fields are deeply reflective, creating some elements of contrast. Census: 10 in 66, 3 finer (8/13). NGC ID# 27U7, PCGS# 6430

**1873 Arrows Half Dollar, PR64 Cameo
Starkly Contrasted**

- 3882 1873 Arrows PR64 Cameo PCGS.** The 1873 Arrows half dollar is the first date of this two-year type. Only 550 proof coins of the denomination were struck in this year, the lower of the two mintages for the type (between 700 and 750 proofs of 1874 were struck). Of the 180 1873 Arrows half dollars seen by PCGS, only 35 are designated Cameos (including one Deep Cameo). The frosted devices of this near-Gem Cameo are fully struck and boldly stand out against the mirrored fields. Population: 10 in 64 Cameo, 7 finer (8/13).
From The Searight Collection. PCGS# 86434

- 3883 1875 PR63 PCGS.** Orange-gold and cherry-red enrich this sharply struck Seated specimen. A "partial drapery" variety due to a lapped obverse die. A few delicate left obverse field hairlines limit the grade. Just 700 proofs were struck. Population: 43 in 63 (1 in 63+), 80 finer (8/13).
Ex: Central States Signature (Heritage, 4/2008), lot 1164. NGC ID# 27U9, PCGS# 6436

- 3884 1877 PR63 NGC.** Shades of cerulean-blue, lavender-gray and greenish-gold toning blanket the surfaces of this sharply detailed Select specimen. From a mintage of 510 pieces. Census: 47 in 63, 61 finer (8/13). NGC ID# 27UC, PCGS# 6438

**1877 Half Dollar, PR65
Highly Reflective Proof Striking**

- 3885 1877 PR65 NGC. CAC.** The year 1877 is one of those magical ones that always grabs the attention of numismatists because of the numerous rarities struck. The 1877 proof half is not among them, but the cachet of the date nevertheless is shared by the half dollars. This is a remarkable, deeply mirrored proof. Blue-green and rose colors are seen on each side, although in differing portions from side-to-side. Surprisingly few Gem proofs are known out of the mintage of 510 pieces. Census: 12 in 65, 4 finer (8/13). NGC ID# 27UC, PCGS# 6438

- 3886 1879 PR63 PCGS.** Even with gray patina covering both sides, the reflectivity of the fields cannot be denied on this Select example. Closer examination reveals a host of colors on both sides. The hues include yellow-gold, plum, orange, and apple-green. Arguably, the reverse is the more attractive side, with large areas of vibrant orange and cherry-red appearing on the eagle. The coin exhibits strong design detail.
From The Strawberry Fields Collection. NGC ID# 27UE, PCGS# 6440

- 3887 1879 PR63 NGC.** Type One Reverse. The reverse die was likely made in 1876 or before, when the design was modified to close the bud above the H in HALF. The present nicely struck specimen displays dappled chestnut-brown toning with hints of lilac and sea-green. The devices exhibit noticeable frost, though the toning precludes a Cameo designation. NGC ID# 27UE, PCGS# 6440

**1879 Half Dollar, PR65
Deeply Toned and Sharply Struck**

- 3888 1879 PR65 PCGS.** Deep russet patination at the obverse border highlights the lighter-colored center, while cobalt-blue rims on the reverse cede to varying shades of crimson in the central area. The design elements are sharply struck throughout, and neither side reveals mentionable marks. Population: 24 in 65 (1 in 65+), 16 finer (8/13). NGC ID# 27UE, PCGS# 6440

**1879 Half Dollar, PR66
Richly Toned Yet Brightly Mirrored**

3889 1879 PR66 PCGS. CAC. This is the first year of drastically reduced mintages for half dollars and quarters. Only 5,900 circulation strikes were made and an additional 1,100 proofs. This is an exceptionally well-preserved proof. The devices are fully struck in all areas, the fields are brightly mirrored and fully evident as such even through the deep, multicolored toning that covers each side. Population: 14 in 66, 2 finer (8/13). NGC ID# 27UE, PCGS# 6440

3890 1880 PR64 PCGS. The well-detailed design elements show just a touch of softness on the eagle's claws and the reflective surfaces shine through hazy pinkish-gray patina. From a proof mintage of 1,355 pieces. Population: 88 in 64 (1 in 64+), 48 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 27UF, PCGS# 6441

**1881 Half Dollar, PR65
Toned Cameo Example**

3891 1881 PR65 Cameo PCGS. This spectacular Gem exhibits sharply detailed design elements in most areas, with just a touch of softness on the eagle's claws and arrow feathers. The reflective fields are visited by attractive shades of champagne-gold toning and contrast noticeably with the frosty devices. Population: 9 in 65 Cameo, 6 finer (8/13). PCGS# 86442

**1881 Seated Half, PR65 Cameo
Rare Type One Reverse**

3892 1881 PR65 Cameo PCGS. Type One Reverse. A pleasing representative of the rare variety identified by the split berry above the left stand of H in HALF, this coin exhibits attractive eye appeal. The left obverse field displays lovely copper-gold toning. A strong strike and pronounced contrast between the fields and devices adds to the attractiveness of this piece. As-made flan striations appear near star 13 on the obverse. Population: 9 in 65 Cameo, 6 finer (8/13). PCGS# 86442

3893 1882 PR63 PCGS. The 1882 proof production constituted 20% of the total production for the entire year, including business strikes and proofs. This piece offers light gold and champagne-pink hues with considerable cameo effect, although not noted on the encapsulation.

Ex: *Long Beach Signature (Heritage, 2/2008)*, lot 633. NGC ID# 27UH, PCGS# 6443

3894 1882 PR64 Cameo PCGS. CAC. A near-Gem example with strong eye appeal, this piece displays a pleasing level of contrast between the frosted devices and reflective fields. Moderate hairlines held this lovely example from a higher grade. Population: 31 in 64 (4 in 64+) Cameo, 22 finer (8/13). PCGS# 86443

3895 1884 PR64 NGC. The obverse of this near-Gem displays dark toning that includes liberal splashes of teal and hints of golden-orange. The reverse fields are flashy beneath attractive toning that includes shades of gold, red, russet, and plum with a few tiny splashes of cerulean blue. The design elements exhibit a pleasing level of detail. Census: 70 in 64, 48 finer (8/13). NGC ID# 27UK, PCGS# 6445

**1884 Seated Half Dollar, PR65
Low-Mintage Date**

3896 1884 PR65 PCGS. Only 4,400 business-strike half dollars were struck in 1884, creating intense date-collector pressure on the proof mintage of 875 pieces. This attractive Gem is sharply detailed in most areas, with just a touch of softness on the eagle's right claw. The reflective surfaces are blanketed in shades of champagne-gold toning with a few tiny splashes of golden-brown, primarily on the outer edges of the obverse. Population: 22 in 65, 13 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 27UK, PCGS# 6445

3897 1884 PR64 Cameo PCGS. Razor-sharp definition is evident on all design elements and the richly frosted devices contrast boldly with the deeply mirrored brilliant fields. Population: 15 in 64 Cameo, 9 finer (8/13). PCGS# 86445

**1884 Half Dollar, PR64 Deep Cameo
The Only Certified Deep Cameo in This Grade**

3898 1884 PR64 Deep Cameo PCGS. The 1884 proof half dollar saw a mintage of 875 pieces, a fair number of which have survived to the present day. Relatively few are seen in proof format, however. Indeed, of the nearly 300 1884 proofs graded by PCGS only 41 are designated Cameos. Of these, only one piece, the present near-Gem offering, is assigned the Deep Cameo classification. Moreover, NGC has seen no Ultra Cameos of this date. Frosty motifs appear to glide over the deeply mirrored, watery fields, and the bold strike on the design elements further enhances this stunning contrast. This is a fantastic piece for the collector of 19th century American proof coinage. From *The Searight Collection*. PCGS# 96445

- 3899 1885 PR63 PCGS.** The fields on both sides of this Select example display bold reflectivity, with a degree of contrast present between the field and the devices on the reverse. Areas of light toning appear on both sides, with colors that include golden-brown, orange-rose, and teal. NGC ID# 27UL, PCGS# 6446

**1885 Half Dollar, Brilliant PR66 Cameo
Pristine Surfaces**

- 3900 1885 PR66 Cameo NGC.** This untoned and fully struck Premium Gem has icy devices and darkly mirrored fields. The surfaces are essentially perfect on each side and present a well-balanced appearance. Only 930 proofs and 5,200 business strikes were coined. Census: 14 in 66 (1 in 66+) Cameo, 8 finer (8/13). Ex: *FUN Signature (Heritage, 1/2010)*, lot 3498. PCGS# 86446

**1888 Seated Half, PR65
Low-Mintage as Proof or Business Strike**

- 3901 1888 PR65 PCGS.** Scarcely a trace of copper-colored rim toning appears on either side of this Gem proof strike, from late in a decade when both proofs and circulation strikes shared meager production quotas. The silvery surfaces show a full strike along with a few light hairlines that account for the grade. Population: 16 in 65, 19 finer (8/13). NGC ID# 27UP, PCGS# 6449

**1890 Seated Half, PR65 Deep Cameo
Gorgeous Untoned Surfaces**

- 3902 1890 PR65 Deep Cameo PCGS. CAC.** Gleaming white surfaces are free of toning on this Gem representative. As expected, given the Deep Cameo designation, the contrast is pronounced. The devices display rich mint frost and the fields are deeply mirrored and flashy. This beautifully struck piece has tremendous eye appeal. Population: 4 in 65 (1 in 65+) Deep Cameo, 3 finer (8/13). PCGS# 96451

BARBER HALF DOLLARS

**1892 Barber Half, MS65
Light Toning Over Thick Mint Luster**

- 3903 1892 MS65 PCGS. CAC.** The 1892 half dollar has an enduring popularity with collectors as the first year of production of this relatively short-lived type. The mint luster on this Gem so thick that it could be mistaken for an S-mint. Slight golden-lilac toning is evident, but in no way impedes the swirling mint frost. Well struck. NGC ID# 24LF, PCGS# 6461

**1892-O Micro O Half, AG3
Collectible and Elusive**

- 3904 1892-O Micro O AG3 PCGS. CAC. FS-501.** A nice, collectible example of this highly sought-after Barber half variety, in About Good condition over attractive medium-gray surfaces. As usual for well-circulated examples in this grade, the obverse rims are nearly full, while the reverse rims show much blending, particularly the upper portion. Most of the central details on the reverse and the crucial Micro O mintmark are well-preserved, and most of HALF DOLLAR is legible to full. Population: 9 in 3, 34 finer (8/13). PCGS# 6463

- 3905 1893-O MS63 PCGS.** Rich sapphire and amethyst patina predominates on this shining Select piece, though the flashy fields show emerald and orange accents as well. The portrait is boldly defined, though the eagle's right (facing) wing and lower body show softness.

Ex: *Houston Signature (Heritage, 11/2007)*, lot 60682. NGC ID# 24LL, PCGS# 6466

- 3906 1893-S AU55 PCGS.** Dark shades of slate-gray and golden-brown toning blanket the surfaces of this impressive Choice AU specimen from a low mintage of 740,000 pieces. Only a trace of wear shows on the well-detailed design elements. Population: 12 in 55, 71 finer (8/13).

From *The Strawberry Fields Collection*. NGC ID# 24LM, PCGS# 6467

- 3907 1893-S — Cleaning — PCGS Genuine. Unc Details.** The 1893-S Barber half claims a low mintage of 740,000 pieces and examples in high grade are rare in today's market. This well-detailed specimen shows few signs of contact on the unnaturally bright surfaces. NGC ID# 24LM, PCGS# 6467

3908 1894-O AU58 PCGS. Attractive satin luster and primarily untuned surfaces provide this near-Mint example with a strong degree of eye appeal. Areas of faint toning are present and include hints of almond-gold and rose. A few small freckles of gray patina appear on the portrait. Minor abrasions are consistent with the grade. NGC ID# 24LP, PCGS# 6469

3909 1895-O MS63 PCGS. As with most branch-mint coins of the 1890s, the 1895-O Barber half dollar was not heavily saved by collectors and most survivors are well circulated. This Select example displays champagne centers with yellow-gold color around the outer edges of both sides. Portions of the obverse dentils reveal teal hues. Clash marks are present. Population: 17 in 63, 29 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 24LT, PCGS# 6472

3910 1896 MS63 NGC. Gold-silver interiors give way to medium-gray and charcoal hues at the margins. Though wispy abrasions affect the portrait, this Select coin from a sub-million mintage has strong eye appeal at arm's length. NGC ID# 24LV, PCGS# 6474

3911 1896 MS63 PCGS. A smooth, needle-sharp, and lustrous Select half dollar with good eye appeal despite a few milky tan spots on the upper reverse. A relatively low mintage issue. Encapsulated in an old green label holder. NGC ID# 24LV, PCGS# 6474

1897-O Barber Half Dollar, MS63 A Difficult Low-Mintage Issue

3912 1897-O MS63 NGC. The 1897-O Barber half dollar, from a small mintage of 632,000 pieces, is one of the most difficult pieces to obtain in Fine and better grades. The silver-gray surfaces of this Select specimen display bright semiprooflikeness in the fields, and the design elements are mostly well-struck for a New Orleans issue, particularly on the obverse. Only the upper-right shield corner and adjacent wing feathers exhibit the usual weakness. A few light obverse marks prevent near-Gem classification. We mention a milling mark on Liberty's cheek below the eye as a possible pedigree identifier. Census: 7 in 63, 20 finer (8/13). NGC ID# 24LZ, PCGS# 6478

3913 1898-S MS62 NGC. This well-detailed MS62 example displays just a touch of softness in the area of the right (facing) shield point. The lustrous surfaces exhibit traces of light blue and gold toning. Census: 5 in 62, 21 finer (8/13). NGC ID# 24M5, PCGS# 6482

3914 1898-S MS62 PCGS. CAC. Mottled green-gray toning appears on both sides, but it is largely confined to the outer edges on the obverse. Satin luster provides nice eye appeal. The design elements display a strong level of detail and there are no abrasions worthy of mention. Population: 7 in 62 (1 in 62+), 27 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 24M5, PCGS# 6482

1898-S Half Dollar, MS63 Lightly Toned and Well-Preserved

3915 1898-S MS63 PCGS. CAC. Certified in a first-generation PCGS holder with the CAC sticker, this Select 1898-S Barber half intermingles areas of dove-gray, silver, pinkish-gray and adds daubs of mint on the reverse, all amid generous mint luster and much eye appeal. A difficult issue within the series, and here nicely preserved. Population: 5 in 63, 22 finer (8/13). NGC ID# 24M5, PCGS# 6482

3916 1899 MS64 PCGS. This popular turn-of-the-century specimen displays vibrant mint luster and sharply detailed design elements with a few hints of champagne-gold toning. Population: 50 in 64 (1 in 64+), 31 finer (8/13). NGC ID# 24M6, PCGS# 6483

3917 1900 MS63 PCGS. Without a doubt, the reverse of this Select example has the greater eye appeal. Multicolored toning appears in bright shades of lemon-yellow, cherry-red, and apple-green on that side. The obverse displays muted shades of yellow-gold, russet, green, and blue-gray. The design elements are well defined. Population: 52 in 63 (1 in 63+), 92 finer (8/13). NGC ID# 24M9, PCGS# 6486

3918 1901-S XF40 PCGS. CAC. Pearl-gray and medium-gray shadings occupy the centers, while the margins show rose and golden-brown hues. A faint glimmer of luster graces the fields. *From The Strawberry Fields Collection.* NGC ID# 24ME, PCGS# 6491

3919 1901-S AU50 PCGS. The 1901-S is common in well-worn circulated grades but becomes very scarce in VF and is rare in Mint State. Hints of almond, blue, and green are present on this lightly circulated piece. Population: 13 in 50, 52 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 24ME, PCGS# 6491

3920 1902 MS63 PCGS. CAC. Darkly patinated in shades of bluish-gray, golden-brown, and amber, this well-detailed Select specimen exhibits frosty mint luster under the toning and only minor signs of contact. Population: 38 in 63, 69 finer (8/13). NGC ID# 24ME, PCGS# 6492

**1902-O Half Dollar, MS64
Richly Toned**

3921 1902-O MS64 PCGS. CAC. A ring of electric-blue, violet, and russet toning encircles the centers, which have a lovely dusting of gold patina. Satiny mint luster enhances the eye appeal of this sharply struck near-Gem specimen; only the upper-right shield corner reveals the usual softness. A graze in the upper right field is the most noticeable mark. Population: 15 in 64, 7 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24MG, PCGS# 6493

3922 1902-S AU55 PCGS. CAC. As with most S-mint issues from the turn of the century, the 1902-S Barber half dollar was circulated widely, and few examples were saved by collectors. Satin luster and golden-gray surfaces with hints of rose appear on this Choice AU representative. Population: 8 in 55, 46 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24MH, PCGS# 6494

3923 1903-O MS63 PCGS. CAC. IN GOD WE TRUST displays a hint of rose patina though the remainder of this lustrous example is close to brilliant. The strike is good and there are no noticeable marks. Housed in an old green label holder. NGC ID# 24MK, PCGS# 6496

3924 1904 MS63 PCGS. Subtle areas of gold toning are present on this Select example, a pleasing coin with no abrasions worthy of individual mention. Population: 24 in 63, 55 finer (8/13). NGC ID# 24MM, PCGS# 6498

3925 1904 MS64 NGC. CAC. The 1904 Barber half dollar is a condition rarity in the series, despite a large mintage of nearly 3 million pieces. Subtle hints of color are found on this near-Gem example displaying attractive satin luster. Census: 33 in 64, 9 finer (8/13). NGC ID# 24MM, PCGS# 6498

3926 1904-O AU58 PCGS. This impressive near-Mint Barber half displays attractive shades of silver-gray and crimson toning with just the slightest trace of wear on the sharply detailed design elements. Population: 6 in 58, 45 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24MN, PCGS# 6499

3927 1904-O AU58 PCGS. This attractive near-Mint specimen retains almost all of its original mint luster and the design elements show just a trace of wear on the high points. A few hints of greenish-gold toning visit the lightly abraded surfaces. Population: 6 in 58, 45 finer (8/13). NGC ID# 24MN, PCGS# 6499

3928 1905 MS64 PCGS. CAC. Rich mint luster and attractive toning are among the attributes of this near-Gem coin. The colors include shades of orange, gold, blue, and plum. The design elements are nicely defined and the coin displays minimal abrasions. Population: 26 in 64 (1 in 64+), 23 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24MR, PCGS# 6501

**1906-D Half Dollar, MS65
Conditionally Scarce, First Denver Mint Issue**

3929 1906-D MS65 PCGS. The 1906-D is unusually challenging in Gem condition or higher considering production consisted of 4,028,000 pieces. Although these were part of the first year of issue for the Denver mint, collectors set few coins aside. A lustrous Gem example, this piece displays medium honey-gold patina, with hints of deeper brown and aqua toning near the rims. Population: 15 in 65, 9 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24MV, PCGS# 6505

**1906-O Barber Half, MS64
Vibrant Mint Luster**

3930 1906-O MS64 NGC. The 1906-O Barber half dollar is much more difficult to locate in high grade than its mintage of nearly 2.5 million pieces would suggest. Both sides of this near-Gem display rich satin luster. Chestnut-gold and cream-gray colors are present. The design elements display a pleasing degree of detail on this lovely representative. Census: 10 in 64, 11 finer (8/13). NGC ID# 24MW, PCGS# 6506

3931 1907-D MS64 PCGS. CAC. This well-detailed Choice specimen shows an interesting V-shaped pair of die cracks on the reverse, from the end of the stem to D in DOLLAR and from D to the arrow feathers. The brilliant surfaces radiate vibrant mint luster. Population: 50 in 64 (2 in 64+), 32 finer (8/13). NGC ID# 24MZ, PCGS# 6509

3932 1908-S AU58 PCGS. Just a trace of wear shows on the high points of the design elements and the lightly abraded surfaces retain most of their original mint luster. Population: 9 in 58, 53 finer (8/13). NGC ID# 24N7, PCGS# 6515

3933 1908-S MS63 PCGS. This sharply detailed Select example displays vibrant mint luster under shades of pale gold and lavender-gray toning. Only minor signs of contact are evident. Population: 16 in 63, 31 finer (7/13). NGC ID# 24N7, PCGS# 6515

3934 1910-S MS64 PCGS. Pleasing satin luster is among the attributes this lovely near-Gem example possesses. The piece is largely toned in an attractive almond-brown shade. Minimal abrasions are present and they are minor. Population: 17 in 64, 26 finer (8/13). NGC ID# 24NC, PCGS# 6520

3935 1911-D MS64 PCGS. CAC. A well-detailed Choice example of this low-mintage better date, with satiny mint luster under shades of pinkish-gray and sea-green toning. Population: 37 in 64, 34 finer (8/13). NGC ID# 24NE, PCGS# 6522

- 3936 1913 XF45 PCGS. CAC.** Lightly worn and minimally abraded for the grade, this Choice XF specimen displays attractive shades of greenish-gold and pinkish-gray toning. From a low mintage of 188,000 pieces.
From *The Strawberry Fields Collection*. NGC ID# 24NK, PCGS# 6527

**1913-D Barber Half, MS65
Low-Mintage Condition Rarity**

- 3937 1913-D MS65 PCGS.** The 1913-D Barber half dollar is one of the lowest-mintage issues in the series at only 534,000 pieces and surviving examples are rare in Gem or finer condition. Strong silver-gray luster is present on this Gem. The strike is somewhat soft over the forehead and at the usual areas on the reverse. Scattered freckles of brown patina are present. Population: 11 in 65, 5 finer (8/13). NGC ID# 24NL, PCGS# 6528
- 3938 1914 AU55 NGC. CAC.** Areas of gold and peach patina add to the attractiveness of this Choice AU representative of this low-mintage date. The 1914 Barber half dollar is seldom encountered in high grade. NGC ID# 24NN, PCGS# 6530
- 3939 1914-S MS64 PCGS.** Dusky golden-brown, olive, and lilac colors bathe this shimmering Choice Barber Half Dollar. The strike is good, if not quite complete on the right shield tip or fletchings. Although struck late in the series with a mintage of nearly 1 million pieces, this issue is very tough to obtain in any Uncirculated grade. Population: 40 in 64, 26 finer (8/13).
Ex: *Long Beach Signature (Heritage, 6/2005)*, lot 6395. NGC ID# 24NP, PCGS# 6531
- 3940 1915 MS61 ANACS.** Shimmering satin luster provides this piece with a lovely appearance. Subtle areas of almond-gold toning are present, primarily at the outer edges. The devices are well defined. Although contact marks are present, including a few on Liberty's face, none is overly distracting. This is a lovely example for the grade. NGC ID# 24NR, PCGS# 6532
- 3941 1915 MS62 NGC.** Blue-violet at the margins with pearl-to-gold interiors. Soft satin-smooth luster gives this piece an understated eye appeal. One of 138,000 business strikes produced. NGC ID# 24NR, PCGS# 6532
- 3942 1915-D MS64 NGC.** Dappled lemon-gold, lavender-red, and apple-green toning embraces this lustrous and sharply struck final year Barber half. A smooth and pleasing type coin housed in an old pre-hologram holder. NGC ID# 24NS, PCGS# 6533
- 3943 1915-D MS64 PCGS.** An important issue for type collectors, this lustrous Choice example represents the final year of the Barber design. The design elements are a bit soft in some areas but the surfaces are free of serious distractions, with pleasing gray and amber toning. NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

- 3944 1892 PR64 NGC.** Shades of rich gold, orange, fuchsia, electric-blue, and turquoise toning provide this near-Gem with an interesting appearance. The fields remain reflective beneath the colorful patina and the coin exhibits sharp design details. A hair thin mark is present on Liberty. Census: 79 in 64, 91 finer (8/13). NGC ID# 24NU, PCGS# 6539

**1892 Half Dollar, PR65 Cameo
Slight Toning**

- 3945 1892 PR65 Cameo NGC.** The Barber design was introduced in 1892 and a hefty proof mintage of 1,245 half dollars was accomplished. This sharply detailed Gem displays frosty devices and deeply mirrored fields with bold cameo contrast. A few wisps of pale gold toning visit the well-preserved surfaces. Census: 28 in 65 (1 in 65+) Cameo, 40 finer (8/13). PCGS# 86539
- 3946 1893 PR64 NGC.** Although this near-Gem piece has a dark gray appearance overall, closer examination reveals shades of blue-green, faint pink, copper, and gold. The surfaces reveal reflectivity beneath the patina. A few small translucent spots are present. A mark below Liberty's eye poses little distraction, if any. Encased in a rare pre-hologram holder. Census: 39 in 64, 82 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24NV, PCGS# 6540
- 3947 1893 PR64+ Cameo PCGS.** Silver interiors are surrounded by bands of gold-to-orange with areas of teal and blue at top and bottom on both sides. Well-frosted on portrait and eagle with great all-around eye appeal. Population: 21 in 64 (2 in 64+) Cameo, 47 finer (8/13). PCGS# 86540
- 3948 1898 PR64 Cameo PCGS. CAC.** The sharply detailed frosty design elements seem to float on the deeply reflective fields of this charming Choice example, with attractive accents of cobalt-blue and champagne-gold toning. Population: 25 in 64 (2 in 64+) Cameo, 30 finer (8/13). PCGS# 86545
- 3949 1899 PR64 Cameo PCGS. CAC.** A pleasing degree of contrast is present between the fields and devices, adding to the attractiveness of this lovely near-Gem Cameo representative. The fields exhibit light champagne toning. A few small areas of darker toning appear near the outer edges, primarily on the rims. Population: 16 in 64 (3 in 64+) Cameo, 29 finer (8/13). PCGS# 86546
- 3950 1903 PR64 PCGS.** The deeply reflective fields of this sharply detailed Choice Barber half display a vivid medley of cobalt-blue and emerald-green hues in a dazzling play of colors. Population: 60 in 64 (1 in 64+), 60 finer (8/13). NGC ID# 24P7, PCGS# 6550
- 3951 1904 PR63 PCGS.** The reflective fields of this attractive Select specimen are darkly toned in shades of sea-green and bluish-gray, and the design elements are sharply detailed throughout. From a mintage of 670 pieces. NGC ID# 24P8, PCGS# 6551
- 3952 1908 PR64 PCGS. Ex: Teich Family Collection.** A glossy near-Gem with gold and orange overtones against a gray base occasionally tinged in lavender. A few stray hairlines, though well-hidden, account for the grade. Population: 35 in 64 (2 in 64+), 49 finer (8/13). NGC ID# 24PC, PCGS# 6555

- 3953 1911 PR62 PCGS.** Vibrant toning is present at the outer edges of the obverse. The colors include golden-yellow, orange, red, fuchsia, teal, and purple. The reverse reveals scattered gold, yellow, and brown shadings, along with a few splashes of teal and bright green at portions of the dentils near 3 o'clock. Moderate hairlines appear in the fields. NGC ID# 24PF, PCGS# 6558

**1913 Barber Half, PR65
Low Mintage of 627 Pieces**

- 3954 1913 PR65 PCGS.** This coin was submitted to the grading service prior to the addition of cameo designations. Appreciable contrast is present that might lead this coin to receive such a designation today. This well struck Gem has a lovely appearance. Encased in a green label holder. Population: 29 in 65 (1 in 65+), 29 finer (8/13). NGC ID# 24PH, PCGS# 6560

- 3955 1913 PR64 Cameo PCGS.** The low mintages of 1913-dated business strikes and those of 1914 and 1915 exert added pressure on high-grade proof survivors from those years. In the case of 1913, the business strikes were made to the extent of only 188,000 coins, complementing the 627 recorded proofs. This near-Gem Cameo example displays a pleasing level of contrast between the fields and devices. A small mark appears at the jaw line. Population: 3 in 64 Cameo, 11 finer (8/13). PCGS# 86560

EARLY DOLLARS

- 3956 1795 Flowing Hair, Three Leaves VG8 NGC. B-1, BB-21, R.2.** Bowers Die State I. A luminous ice-blue, wheat-gold, and pearl-white representative of this introductory and briefly coined type. Light mint-made roller marks are on the upper right margin, and a rim flaw on the reverse at 11 o'clock is also as coined. NGC ID# 24WZ, PCGS# 6852

**1795 Flowing Hair Dollar, B-6, BB-25
Net VF20**

- 3957 1795 Flowing Hair, Three Leaves — Corroded, Tooled, Cleaned — ANACS. XF Details, Net VF20. B-6, BB-25, R.3.** Overall, not a bad appearance despite the three disclaimers on the ANACS holder. The obverse is light gray with a slightly darker area at 4 o'clock. The reverse shows some dark encrustation in the protected areas. Some crisscrossing adjustment marks are also at the center of that side. Still, a highly collectible example.

Ex: Denver Signature (Heritage, 8/2006), lot 3612; Dallas Signature (Heritage, 10/2006), lot 2213. NGC ID# 24WZ, PCGS# 6852

- 3958 1795 Flowing Hair, Two Leaves — Damage — PCGS Genuine. Fine Details. B-2, BB-20, R.3.** Bowers-Borckardt Die State II. The BB-20 variety is recognized by the position of the lowest curl pierced by star 1 and the two inside berries near the eagle's tail on the reverse. A puncture in the left reverse field, under the eagle's wing constitutes the noted damage on this evenly worn, lightly abraded specimen. NGC ID# 24WZ, PCGS# 6853

- 3959 1795 Flowing Hair, Two Leaves — Repaired — NGC Details. VF. B-1, BB-21, R.2.** Bowers Die State I. The obverse is olive-gray and the reverse is steel-blue. Smoothed on Liberty's jaw and upper neck, and probably smoothed on the right obverse field. Both sides appear lightly whizzed, and the left reverse displays lacquer residue. Reverse peripheral adjustment marks are mint-made. NGC ID# 24WZ, PCGS# 6853

- 3960 1795 Flowing Hair, Two Leaves — Repaired — NGC Details. VF. B-4, BB-14, R.3.** This better Bolender variety dollar has light gold toning and mildly luminous surfaces. Hairlined and lightly granular with a pinscratch each on the portrait and right obverse field. The reverse margin displays minor adjustment marks. No repair is readily evident.

From The Joan Carroll Collection.

**1795 Flowing Hair Dollar, VF Details
B-2, BB-20, Two Leaves**

- 3961 1795 Flowing Hair, Two Leaves — Cleaning — PCGS Genuine. VF Details. B-2, BB-20, R.3.** A well defined and attractive Flowing Hair dollar. The fields are only mildly bright and minimally abraded. Mint-made adjustment marks are moderate and confined to Liberty's hair. Since a majority of survivors have problems of one category or another, the present lot is above average in quality and will please many collectors. NGC ID# 24WZ, PCGS# 6853

**1795 B-15, BB-52 Silver Dollar, VF Details
Centered Draped Bust**

- 3962 1795 Draped Bust, Centered — Cleaning — PCGS Genuine. VF Details. B-15, BB-52, R.2.** Lightly cleaned and now showing splashes of vibrant multi-colored toning on both sides. This piece retains a trace of luster in the protected areas. The usual triangular die break is clearly visible at the back of Liberty's head. NGC ID# 24X2, PCGS# 6858

- 3963 1795 Draped Bust, Off Center — Cleaned, Defective Planchet — ANACS. Fine 12 Details. B-14, BB-51, R.2.** The mint-made flan defect is relegated to the obverse rim at 10 o'clock. Lightly hairlined, and the reverse field is somewhat granular. Moderate adjustment marks are seen on the obverse center and upper right border. Sharp for the Fine level, with ample hair and wing detail.

Ex: Long Beach Signature (Heritage, 2/2007), lot 3594, which realized \$2,070. PCGS# 96858

3964 1795 Draped Bust, Off Center — Improperly Cleaned — NGC Details. Fine. B-14, BB-51, R.2. Light almond-gold patina visits glossy and hairlined surfaces. The obverse is somewhat brighter than the reverse. The reverse has minor adjustment marks, as issued. *From The Joan Carroll Collection.*

3965 1796 Large Date, Small Letters — Scratch — PCGS Genuine. VG Details. B-5, BB-65, R.2. Bowers Die State III. The die break between the I and C in AMERICA is impressive, but it is the Large Date feature that causes a separate *Guide Book* listing for the variety. Stone-white motifs contrast with dark gray fields. Four thin obverse scratches are noted near the nose, chin, neck, and shoulder of Liberty. The reverse exergue has pinscratched initials JGR. On the reverse, a narrow granular area extends between 3 o'clock and 7:30.

3966 1797 10x6 Stars, Large Letters — Obverse Scratched — NGC Details. Fine. B-3, BB-71, R.2. Bowers Die State III. A thin but fairly deep scratch beneath the hair ribbon explains the NGC notation. Otherwise, marks are minor, though we note faint abrasions on the reverse exergue. A stone-gray and chestnut-gold representative with cloudy surfaces. NGC ID# 24X4, PCGS# 6865

1797 Dollar, VF20 Details, B-3, BB-71
Unique 10x6 Star Arrangement

3967 1797 10x6 Stars, Large Letters — Cleaned, Scratched — ANACS. VF20 Details. B-3, BB-71, R.2. The only 1797 variety with the 10x6 star division. Magnification reveals some fine hairlines on the light to medium gray surfaces. The fields possess somewhat deeper hues, thereby highlighting the well-centered, sharply defined design elements. A few shallow, short scratches are noted on the obverse, and a couple of roller marks are located on the reverse. Actually not that bad despite the ANACS disclaimers. *Ex: Long Beach Signature (Heritage, 2/2007), lot 3600. NGC ID# 24X4, PCGS# 6865*

1798 Small Eagle Dollar, XF Details
13 Stars Variant, B-1, BB-82

3968 1798 Small Eagle, 13 Stars — Repaired, Cleaned — NGC Details. XF. B-1, BB-82, R.3. Two varieties are known for the 1798 Draped Bust, Small Eagle dollar, BB-81 with 15 obverse stars and the present BB-82 with 13 obverse stars. BB-82 is slightly more available than its 15 stars counterpart. A small, partially repaired, hole is present between the words UNITED and STATES on the reverse of this example, and the surfaces are unnaturally bright from cleaning. This coin is well detailed and attractive, in spite of the noted defects. *Ex: Summer FUN Signature (Heritage, 7/2010), lot 3788.*

3969 1798 Large Eagle, Pointed 9 — Improperly Cleaned — NGC Details. Fine. B-29, BB-119, R.4. Bowers Die State I. This scarcer variety Bust dollar is hairlined with mildly glossy slate-gray surfaces. The reverse has a minor rim ding at 3:30 and a few very light scuffs, most noticeable on the shield. NGC ID# 24X6, PCGS# 6873

3970 1798 Large Eagle, Pointed 9 — Damaged, Cleaned — ANACS. VF20 Details. B-29, BB-119, R.4. This Draped Bust dollar is cloudy from hairlines, and has several moderate rim bruises. The portrait has a few tiny roundish digs, and thin marks pass through UNITED and the star near the beak. *Ex: Long Beach Signature (Heritage, 2/2007), lot 3606, which realized \$977.50. NGC ID# 24X6, PCGS# 6873*

3971 1798 Large Eagle, Pointed 9 — Obverse Damage — NCS. VF Details. B-28, BB-118, R.3. Bowers Die State V. A rare late die state with a large retained break near the fletchings. Four parallel pinscratches on the right obverse field explain the NCS notation, and a trio of faint thin marks are near the branch stem. The reverse is misaligned toward 1:30 and has a minor rim ding at 3 o'clock. A gunmetal-blue and lavender-gray example. *Ex: Jonathan Kern (11/1990); Jules Reiver Collection (Heritage, 1/2006), lot 23546, which realized \$920. NGC ID# 24X6, PCGS# 6873*

3972 1798 Large Eagle, Pointed 9 — Obverse Damage — NGC Details. VF. B-24, BB-124, R.2. Bowers Die State IV. A number of tiny digs on the hair west of the ear corresponds to the NGC designation. A moderate obverse rim ding beneath the 9 in the date is repaired. The cream-gray and straw-gold surfaces are otherwise only lightly abraded. Softly struck on the right side reverse stars. NGC ID# 24X6, PCGS# 6873

3973 1798 Large Eagle, Pointed 9 — Scratched — NCS. VF Details. B-9, BB-121, R.4. Bowers-Borckardt Die State IV. The scarce BB-121 variety is identified by the disrupted arc star pattern on the reverse, with the first star in the second row out of place. Some deep scratches in the right obverse field constitute the noted damage on this otherwise pleasing VF specimen.

3974 1798 Large Eagle, Pointed 9, Four Berries VF30 PCGS. B-8, BB-125, R.2. There are only four berries in the branch on the reverse of this first-year Heraldic Eagle dollar. This is one of the eight different 1798 Heraldic Eagles listed on page 217 of the 2014 *Guide Book*, and it enjoys great demand that results from that listing. This piece has pleasing light gray and pewter surfaces that exhibit minimal marks expected at the grade level. *From The Searight Collection. NGC ID# 24X6, PCGS# 6873*

3975 1798 Large Eagle, Pointed 9 VF30 NGC. B-10, BB-109, R.5. A very scarce Bolender variety. Deep lavender toning dominates though sea-green and golden-brown are also present. Abrasions are minor for the grade though we note a slight reverse rim nick at 3 o'clock and faint marks near the R in LIBERTY. NGC ID# 24X6, PCGS# 6873

3976 1798 Large Eagle, Pointed 9 — Damaged, Scratched, Cleaned — ANACS. XF45 Details. B-27, BB-113, R.2. Bowers Die State III. Moderately bright from a past wipe, this richly detailed Bust dollar has three thin scratches on the right reverse and a minor reverse rim ding near 5 o'clock. *Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 918, which realized \$1,955. NGC ID# 24X6, PCGS# 6873*

**1798 B-8, BB-125 Dollar, XF45
Four Berries, Usual Die State**

- 3977** 1798 Large Eagle, Pointed 9, Four Berries XF45 ANACS. B-8, BB-125, R.2. Die State II. The usual early die state with a faint obverse crack from the E to the hair. No reverse cracks have yet appeared. This light gray piece has wisps of gold toning that enhance the eye appeal on both sides. NGC ID# 24X6, PCGS# 6873

**1798 B-28, BB-118 Dollar, AU50
Early Die State**

- 3978** 1798 Large Eagle, Pointed 9 AU50 PCGS. B-28, BB-118, R.3. The obverse die was used with seven different reverse dies, and BB-118 was the sixth of those seven die marriages. The obverse has the usual cracks below and through the date while the reverse is perfect without die cracks, an unusual state. This example is probably among the top 15 or 20 known pieces with pale champagne and gray toning over the still lustrous surfaces. From *The Strawberry Fields Collection*. NGC ID# 24X6, PCGS# 6873

**1798 Large Eagle Dollar, AU Sharpness
B-27, BB-113, Pointed 9, Close Date**

- 3979** 1798 Large Eagle, Pointed 9, Close Date — Damaged — NGC Details. AU. B-27, BB-113, R.2. Bowers Die State II. An impressively detailed representative with dusky chestnut-gold and pearl-gray toning. Minute marks are distributed throughout the fields, and portions of the reverse exhibit mildly granular charcoal-gray surfaces. Given the Damaged designation, the eye appeal is pleasing, particularly to the unaided eye. NGC ID# 24X6, PCGS# 6873

- 3980** 1798 Large Eagle, Pointed 9, 10 Arrows — Repaired, Whizzed — NGC Details. VF. B-21, BB-107, R.5. This very scarce Bolender variety is identified by the tadpole-shaped break above the 79 in the date. The obverse displays a number of tiny marks and the stone-gray centers are subbed and mildly granular from whizzing. Skillfully repaired near 12 o'clock on the obverse and opposite near 6 o'clock on the reverse.

- 3981** 1798 Large Eagle, Pointed 9, Wide Date — Scratch — PCGS Genuine. VF Details. B-20, BB-102, R.5. Bowers-Borckardt Die State IV. The very scarce BB-102 variety is easily recognized by the reverse rim break below the eagle's tail. The BB-102 is very rare in grades above the VF level. This pleasing evenly worn dove-gray specimen is lightly abraded except for two deep scratches through the shield on the reverse. PCGS# 6877

- 3982** 1798 Large Eagle, Wide Date, Pointed 9 — Cleaned — ANACS. VF30 Details. B-23, BB-105, R.3. Bowers Die State III. A faintly hairlined pearl-gray representative of the popular crown-sized Draped Bust type. Relatively free from marks save for a light diagonal pincscratch near the left (facing) shield tip. PCGS# 6877

- 3983** 1798 Large Eagle, Wide Date, Pointed 9 VF30 PCGS. B-23, BB-105, R.3. Bowers Die State I. This Heraldic Eagle dollar offers ice-blue fields and olive-gold high points. Abrasions are inconsequential save for a slight reverse rim ding near 4:30. Portions of Liberty's forehead and hair are mildly granular. Certified in a green label holder. PCGS# 6877

- 3984** 1799/8 15 Stars Reverse Fine 15 PCGS. CAC. B-3, BB-141, R.3. Bowers Die State III. The popular blundered reverse with expanded first and last clouds to conceal two extraneous stars. Mostly dove-gray though selected high points are stone-white. The fields are minimally abraded though we note a series of tiny marks near Liberty's ear and minor reverse rim dings at 4 and 5 o'clock. NGC ID# 24X8, PCGS# 6883

- 3985** 1799/8 13 Stars Reverse VF25 PCGS. B-2, BB-143, R.4. A dusky cream-gray example of this scarce overdated Bolender variety. Attractive overall, though the portrait has a mildly granular gray vertical streak near the profile and bust tip, and a thin mark is noted between the IB in LIBERTY. PCGS# 6884

**1799 Irregular Date Dollar, VF30
15 Stars Reverse, B-4, BB-153**

- 3986** 1799 Irregular Date, 15 Stars Reverse VF30 NGC. B-4, BB-153, R.4. Bowers Die State I without clashed dentils near the left-side obverse stars. The famous blundered reverse with two expanded clouds partially covering stars, an attempt to conceal an incorrect star count. The Irregular Date moniker overstates matters, since the first 9 is merely entered slightly high with a tilt to the left. Toned forest-green and golden-brown with slate high points. No marks are noticeable. PCGS# 6879

**1799 Dollar, Choice VF
B-4, BB-153, 15 Stars Reverse**

3987 1799 Irregular Date, 15 Stars Reverse VF35 PCGS. B-4, BB-153, R.4. The well-known blundered reverse with 15 stars instead of the traditional 13. The engraver tried to hide the error by enlarging the first and last cloud to engulf two stars, but points of the errant stars are still visible. This lavender-gray example has a few faint obverse field marks and the centers are slightly soft, but the overall sharpness and eye appeal is undeniable.
Ex: Dallas Signature (Heritage, 11/2007), lot 946. PCGS# 6879

3988 1799 7x6 Stars — Mount Removed — NGC Details. VF. B-10, BB-163, R.2. Bowers Die State I. This collectible Bust dollar has dark gray fields and slate-white high points. A trio of scratches are noted near the eagle's beak and a few pinscratches are near Liberty's chin and bust tip. Brief marks are on the obverse field at 7 o'clock. Both sides are faintly hairlined. The lower reverse rim exhibits damage from a mount. NGC ID# 24X7, PCGS# 6878

3989 1799 7x6 Stars — Repaired, Cleaned — NGC Details. VF. B-8, BB-165, R.3. Bowers Die State II. Glossy surfaces between the right shield corner and the right-side clouds suggest smoothing. This example has golden-brown and navy-blue fields. The high points are pearl-gray. A few field marks are noted beneath the left ribbon end, and the obverse rim has small dings at 5 and 6 o'clock. NGC ID# 24X7, PCGS# 6878

3990 1799 7x6 Stars — Rims Damaged — ANACS. VF Details, Net VF20. B-10, BB-163, R.2. Bowers Die State II. A deep dove-gray example with glimpses of walnut-brown toning. Moderate rim dings are at 6:30 and 7 o'clock on the obverse and at 5:30 on the reverse. The reverse field is glossy near the branch stem, and close inspection reveals the occasional abrasion. NGC ID# 24X7, PCGS# 6878

3991 1799 7x6 Stars VF25 NGC. B-10, BB-163, R.2. Bowers Die State I. Walnut-brown and steel-blue toning blankets this lightly abraded Heraldic Eagle dollar. E PLURIBUS UNUM is bold and the wings and curls retain ample definition.
From The Joan Carroll Collection. NGC ID# 24X7, PCGS# 6878

3992 1799 7x6 Stars — Improperly Cleaned — NGC Details. XF. B-16, BB-158, R.2. Bowers Die State I. The aquamarine, lilac, and apricot toning appears artificial, but the underlying surfaces are attractive. Well defined with noticeable remaining luster. One reverse rim ding at 7 o'clock. NGC ID# 24X7, PCGS# 6878

3993 1799 7x6 Stars — Scratches, Artificial Toning — NGC Details. XF. B-9, BB-166, R.1. Bowers Die State III. A cluster of pinscratches on the field beneath the chin are partially concealed by a blanket of deep aquamarine toning. The reverse also displays golden-brown patina on the shield. The reverse is smooth except for a pinscratch from the rim near 12 o'clock down to the shield. NGC ID# 24X7, PCGS# 6878

3994 1800 Fine 12 PCGS. B-5, BB-189, R.5. A better though nondescript Bolender variety. The caramel-gold and stone-gray surfaces are mildly luminous and minimally abraded for the grade. Most letters in E PLURIBUS UNUM are partly present. NGC ID# 24X9, PCGS# 6887

3995 1800 VF25 PCGS. B-13, BB-193, R.4. Bowers Die State "V." The state with an arc-shaped crack between obverse stars 8 and 11 is unlisted in the recent Bowers reference. Blended tan-brown and olive-gray toning encompasses this unmarked and mildly granular silver dollar. Trivial rim knocks are at 6 o'clock on the obverse and 9:30 on the reverse. NGC ID# 24X9, PCGS# 6887

**1800 B-16, BB-187 Dollar, VF35
Middle Die State**

3996 1800 VF35 PCGS. B-16, BB-187, R.2. A plentiful variety with a line of die chips over the final S in STATES. Die State IV with clash marks forming waves at the top of the date. A splendid, lightly worn example, this dollar has splashes of gold and iridescent toning over its light gray surfaces. NGC ID# 24X9, PCGS# 6887

3997 1800 — Cleaning — PCGS Genuine. XF Details. B-16, BB-187, R.2. Bowers-Borckardt Die State III. The available BB-187 variety is recognized by the small die dot near the highest wave of Liberty's head. This still-attractive specimen is lightly abraded, with XF sharpness and unnaturally glossy dark surfaces due to a previous cleaning. NGC ID# 24X9, PCGS# 6887

3998 1800 — Improperly Cleaned — NGC Details. XF. B-13, BB-193, R.4. Bowers Die State III. This slate-gray and tan-gold early dollar is well defined but the surfaces are moderately glossy. An intermittent thin mark extends from the cheek to the drapery with another between stars 6 and 13 across the portrait. NGC ID# 24X9, PCGS# 6887

3999 1800 AMERICA! VF25 PCGS. B-19, BB-192, R.2. Bowers Die State III. Light caramel-gold and ice-blue toning embraces this nicely defined early dollar. Mildly granular near the IBE in LIBERTY and the top curl nearby. Faintly hairlined but without any noticeable abrasions. Certified in a green label holder. PCGS# 6892

**1800 AMERICA! Dollar, AU Details
B-11, BB-191**

4000 1800 AMERICA! — Improperly Cleaned — NGC Details. AU. B-11, BB-191, R.5. The AMERICA! variety is named after the slender die scratch following the final A in the reverse legend. AMERICA! examples are relatively plentiful, but most are B-19. Bolender shares the same reverse but is much rarer. This almond-gold and stone-white representative is faintly hairlined but otherwise highly pleasing.
From The Joan Carroll Collection.

- 4001 1800 12 Arrows — Damage — PCGS Genuine. VF Details. B-17, BB-196, R.1.** Bowers-Borckardt Die State II. The popular BB-196 variety is recognized by the “collar” clash mark on the obverse and the 12 arrows on the reverse. A pit in the obverse field near the rim at 7:30 and a smaller one on Liberty’s neck constitute the noted damage. Otherwise, this piece is an evenly worn VF example, with pleasing lavender-gray and blue patina and a few thin obverse scratches. PCGS# 6890

**1800 B-17, BB-196 Silver Dollar, VF30
Usual Middle Die State**

- 4002 1800 12 Arrows VF30 PCGS. B-17, BB-196, R.1.** The usual later die state with a “collar” clash mark along Liberty’s upper bust. Early die state without the collar are extremely rare with only two or three identified to date. This example represents the usual die state. Light silver-gray surfaces show slightly deeper gray fields, gradually changing to charcoal near the borders.
From The Searight Collection. PCGS# 6890

**1801 B-4, BB-214 Dollar, VF25
Scarcest 1801 Variety**

- 4003 1801 VF25 PCGS. B-4, BB-214, R.4.** This is the scarcest of four 1801 die marriages, with the 1 practically touching the lowest hair curl. All others have that digit well separated. Both sides of this example have light silver surfaces with slightly reflective fields.
From The Searight Collection. NGC ID# 24XA, PCGS# 6893

**1801 B-1, BB-211 Dollar, VF35
Early Die State**

- 4004 1801 VF35 PCGS. B-1, BB-211, R.3.** There are four known die varieties for 1801, and each is scarce. The lowest arrow is below the U in UNITED on this die marriage, and it is right of the U on the other three. This Choice VF example has gold toning with splashes of gunmetal-blue and steel over pleasing surfaces that retain traces of luster. NGC ID# 24XA, PCGS# 6893

**1801 Silver Dollar, XF Details
B-3, BB-213**

- 4005 1801 — Improperly Cleaned — NGC Details. XF. B-3, BB-213, R.3.** Bowers Die State III with the date boldly clashed on the upper reverse border. Luster illuminates design recesses of this moderately granular but unmarked Heraldic Eagle dollar. An opportunity to acquire a sharp example at a collector price.
- 4006 1802/1 Narrow Date Fine 15 PCGS. B-4, BB-232, R.3.** Bowers-Borckardt Die State II, as usually seen with wormlike die crack at the right side of Liberty’s bust. Well-worn but surprisingly bright with little toning on lightly marked silver surfaces. NGC ID# 24XC, PCGS# 6898
- 4007 1802/1 Wide Date — Cleaning — PCGS Genuine Secure. VF Details. B-3, BB-234, R.3.** This bust dollar has sharpness that approaches XF, and there are no noticeable marks. The surfaces are mildly luminous from cleaning despite subsequent sea-green and olive-gold toning. The die lump invariably seen beneath obverse star 8 on B-3 is absent here, probably smoothed away. Repaired northeast of the eagle’s beak, affecting four stars and three clouds. PCGS# 6899
- 4008 1802 Narrow Date — Improperly Cleaned — NGC Details. VF. B-6, BB-241, R.1.** This stone-gray representative is hairlined but has no abrasions apparent to the unaided eye. The well defined surfaces display wheat-gold and ice-blue toning.
From The Joan Carroll Collection.

**1802 Narrow Date Dollar, VF30
Problem-Free Example of B-6, BB-241**

- 4009 1802 Narrow Date VF30 PCGS. B-6, BB-241, R.1.** Deep golden-brown and lilac patina, with lighter color where the devices have rub. Hints of the original luster survive within the hair tresses and olive branches. E PLURIBUS UNUM is fully legible, and the shield lines are fully separated. A problem-free example of this frequently seen variety.
Ex: Philadelphia 2000 Signature (Heritage, 8/2000), lot 6167; New York Signature (Heritage, 7/2002), lot 8450.
From The Searight Collection. NGC ID# 24XB, PCGS# 6895

**1802 Silver Dollar, XF Details
Narrow Date, B-6, BB-241**

- 4010** 1802 Narrow Date — Environmental Damage — PCGS Genuine. XF Details. B-6, BB-241, R.1. Bowers Die State III. This Draped Bust dollar is sharper than a majority of its peers, but the forest-green and steel-blue surfaces are mildly granular and slightly glossy. The reverse displays minor rim dings at 1, 7, 8, 10, and 11 o'clock. NGC ID# 24XB, PCGS# 6895

**1803 B-5, BB-252 Dollar, VF30
Small 3**

- 4011** 1803 Small 3 VF30 PCGS. B-5, BB-252, R.3. The Small 3 lacks its upper left serif while the Large 3 has a complete serif. The single Large 3 variety is about equal to the combined availability of all Small 3 varieties. This Choice VF specimen has light silver surfaces with faint golden-brown toning and charcoal patina around part of the periphery.
From The Searight Collection. NGC ID# 24XD, PCGS# 6900

**1803 B-4, BB-254 Dollar, VF30
Small 3 Date Style**

- 4012** 1803 Small 3 VF30 PCGS. CAC. B-4, BB-254, R.3. A delightful example with deep magenta and dark gray toning on both sides over reflective fields. Minor surface marks are evident on both sides with a tiny rim bruise on the reverse about 6:30. All known specimens are in a constant die state. NGC ID# 24XD, PCGS# 6900

**1803 Draped Bust Dollar, VF35
Small 3, B-1, BB-251**

- 4013** 1803 Small 3 VF35 NGC. B-1, BB-251, R.4. Bowers-Borckardt Die State II. A Choice VF specimen of the scarce BB-251 variety, with the Small 3 in the date and the point of the leftmost arrow under the center of the upright of N in UNITED. Evenly worn and lightly abraded, with pleasing dark gray and blue-steel patina. NGC ID# 24XD, PCGS# 6900

- 4014** 1803 Large 3 PCGS Genuine. B-6, BB-255, R.2. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. A nicely defined and minimally abraded type coin. The mildly glossy surfaces display subdued straw-gold and powder-blue toning.

SEATED DOLLARS

- 4015** 1840 AU50 ANACS. Though softly struck, this early Seated dollar has generous reflective luster remaining in silver fields with touches of gold and reddish-orange at the margins. Lightly abraded with a few rim bumps. Housed in a small-format holder. NGC ID# 24YA, PCGS# 6926

- 4016** 1840 AU50 PCGS. Mostly untoned, although blushes of pale peach are here and there. A bold first-year Seated dollar with ample luster and a few abrasions on the field near the beak. Encased in a green label holder.
Ex: Long Beach Signature (Heritage, 9/2009), lot 921, which realized \$1,782.50. NGC ID# 24YA, PCGS# 6926

- 4017** 1840 AU53 PCGS Secure. The Philadelphia Mint produced a reported total of 61,005 silver dollars in 1840, the first year of the Seated Liberty design. Although it was the first of its type, coins from the 1840 issue were not saved in appreciable numbers, leaving few high grade survivors. Small splashes of gold, orange, and brown colors appear at outer portions of the obverse. This lightly circulated example retains a pleasing level of design detail. The reverse is particularly attractive. Population: 23 in 53, 79 finer (8/13). NGC ID# 24YA, PCGS# 6926

- 4018** 1840 AU55 NGC. Intermingled shades of gray, gold, blue-gray, and plum-gray are present on this Choice AU example. The reverse is lighter in color. The coin exhibits a strong degree of design detail. Scattered marks are present, as expected at this grade level. A small green spot appears near the E in ONE. NGC ID# 24YA, PCGS# 6926

- 4019** 1841 AU53 NGC. The peripheries of both sides display large areas of attractive light gold and orange-gold color along with a few hints of rose. The centers are largely free of any toning, creating a lovely overall appearance for this piece. Moderate granularity is present near the lower reverse. NGC ID# 24YB, PCGS# 6927

- 4020** 1841 AU55 NGC. Medium gray toning with violet accents rolls over slightly abraded surfaces. A noticeable dig is in the right obverse field, several are also on the reverse. The design elements are well struck, though Liberty's head is slightly soft. Census: 34 in 55, 92 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2005), lot 3712; Long Beach Signature (Heritage, 2/2006), lot 1643. NGC ID# 24YB, PCGS# 6927

4021 1841 AU55 NGC. Well struck with light wear evident on the highpoints. The surfaces are modestly marked overall, and the still-lustrous fields display colorful bands of aqua, midnight-blue, magenta, and gold-orange color. A pleasing representative of this early Seated dollar.
Ex: Summer FUN West Palm Beach Signature (Heritage, 7/2007), lot 1186. NGC ID# 24YB, PCGS# 6927

4022 1842 AU58 NGC. No Motto Philadelphia Seated dollars are notoriously scarce in any Mint State grade. A near-Mint example, this piece retains areas of reflectivity. Clash marks are present near Liberty's left arm. Numerous contact marks are present, most of them inconsequential. An "X" appears under the eagle's right wing. Census: 76 in 58, 72 finer (8/13). NGC ID# 24YC, PCGS# 6928

4023 1843 AU53 PCGS. The obverse exhibits dark gunmetal-gray, plum-mauve, and walnut-brown toning. The reverse displays rich tan-gray shades. A well defined Seated dollar without any individually relevant marks. Housed in an old green label holder. NGC ID# 24YD, PCGS# 6929

4024 1843 AU55 PCGS. This well-detailed Choice AU specimen exhibits attractive shades of powder-blue, gray, and champagne-gold toning over surfaces that show traces of prooflike reflectivity in sheltered areas. Population: 50 in 55, 87 finer (8/13). NGC ID# 24YD, PCGS# 6929

4025 1843 AU55 NGC. This Choice AU Seated Liberty dollar shows just a trace of wear on the high points of the design elements and retains much of its original mint luster, under mottled shades of gray, green, and amber toning. NGC ID# 24YD, PCGS# 6929

4026 1843 AU55 PCGS. CAC. A colorful ring around the obverse periphery includes shades of sea-green, cherry-red, lemon-yellow, russet, and plum. Both sides display champagne color overall. The reverse includes small splashes of dark gray. Population: 50 in 55, 87 finer (8/13). NGC ID# 24YD, PCGS# 6929

4027 1843 AU58 NGC. Attractive shades of pale blue and greenish-gold toning blanket the lightly abraded surfaces of this early series Seated Liberty dollar. The sharply detailed design elements show just a trace of wear on the high points. Census: 64 in 58, 56 finer (8/13). NGC ID# 24YD, PCGS# 6929

4028 1844 XF45 ANACS. Deep blue-to-violet peripheral toning yields to silver on the interiors. Lightly worn surfaces still show glimmers of luster in the fields. Housed in a small-format holder. NGC ID# 24YE, PCGS# 6930

4029 1844 AU50 ANACS. Lightly toned golden-brown and pale blue with touches of pearl-gray. The surfaces are modestly abraded and show a few small digs, but the all-around eye appeal is good for an AU50 coin. Housed in a small-format holder. NGC ID# 24YE, PCGS# 6930

4030 1844 AU55 NGC. The low commercial mintage of 20,000 pieces came from a single pair of dies. On the obverse, LIBERTY and the shield are die doubled. The central reverse displays numerous die lines. This lightly circulated and minimally toned example is well defined and has no relevant marks.
From The Strawberry Fields Collection. NGC ID# 24YE, PCGS# 6930

4031 1845 AU55 NGC. Layers of rose-gold toning grace parts of this Choice AU coin, while the rest remains mildly reflective silver-white. Faintly abraded but only modestly worn. Census: 34 in 55, 45 finer (8/13). NGC ID# 24YF, PCGS# 6931

4032 1846 AU50 PCGS. A softly lustrous and richly toned AU example of this earlier Seated dollar issue. The obverse has peripheral toning in violet and olive-orange around a medium-gray center, while the reverse has similar but slightly lighter colors combined across that side.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1220. From The Strawberry Fields Collection. NGC ID# 24YG, PCGS# 6932

4033 1846 AU53 PCGS. Pearl-gray color, small splashes of forest-green, and hints of champagne add to the eye appeal of this lightly circulated example. The high points of the designs reveal light wear. As expected at this grade level, numerous abrasions are present. A mark in the field above the eagle's left wing poses little distraction, if any. NGC ID# 24YG, PCGS# 6932

4034 1846 AU53 PCGS Secure. Areas of reflectivity remain on the fields of this lightly circulated representative. Subtle toning in shades of almond-gold and rose are present. A streak of as-made struck-in grease extends through Liberty's cap. NGC ID# 24YG, PCGS# 6932

4035 1846-O AU53 PCGS Secure. The obverse of this example displays attractive shades of orange, copper, and golden-brown along with a pleasing degree of reflectivity. Toning appears on the reverse, but it is more subtle. This lightly circulated coin reveals a strong strike. Population: 18 in 53, 59 finer (8/13). NGC ID# 24YH, PCGS# 6933

1846-O Dollar, AU55
The First Branch Mint U.S. Silver Dollar

4036 1846-O AU55 PCGS. The 1846-O is the first silver dollar issue ever struck at the New Orleans Mint, and the only one dated in the 1840s. Production consisted of only 59,000 pieces. Only three later Liberty Seated dollar issues bear the O mintmark: 1850, 1859, and 1860. Reflectivity remains on this Choice AU representative. Speckled gray and blue-gray toning is present, primarily on the obverse. Minimally abraded. Population: 21 in 55, 38 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 24YH, PCGS# 6933

4037 1847 AU50 PCGS. Several shades of toning appear on this example, particularly at the outer edges of the devices. The hues include gold-pink, peach-gold, red-brown, salmon, teal, and orange. As expected at this grade level, abrasions are present, including a few on Liberty's face. A retained lamination is seen at star 8. NGC ID# 24YJ, PCGS# 6934

4038 1847 AU50 NGC. Attractive gray, gold, and rose shades appear on this lightly circulated example. Scattered abrasions are present, as expected, with a few appearing on Liberty's face and the surrounding areas. NGC ID# 24YJ, PCGS# 6934

4039 1847 AU50 PCGS Secure. Lightly gold-toned overall with a blue "sky" behind the eagle. Modestly worn with a few abrasions scattered through the fields on each side. NGC ID# 24YJ, PCGS# 6934

4040 1847 AU53 NGC. This piece reveals areas of yellow-gold color when examined closely, with the coin displaying deep gray color overall. The well-detailed design elements show just a trace of wear. NGC ID# 24YJ, PCGS# 6934

4041 1849 AU50 PCGS. Pearl-gray overall with touches of golden-brown at the rims. The peripheral strike is blunt on the obverse, but the high points show surprisingly little wear. NGC ID# 24YL, PCGS# 6936

4042 1849 AU55 ANACS. Golden-brown and orange peripheral elements yield to pale silver interiors that offer glimmers of reflectivity. Though light to moderate abrasions are scattered across each side, wear is minimal. Housed in a small-format holder. NGC ID# 24YL, PCGS# 6936

- 4043 1849 AU55 PCGS.** This is an attractive, well struck Choice AU coin that is virtually free of any toning. Although abrasions are present as expected, they are minor in nature. NGC ID# 24YL, PCGS# 6936
- 4044 1850 — Cleaning — PCGS Genuine. XF Details.** A sharply defined powder-blue example of this challenging date, struck at a time when the value of silver coins exceeded face and were profitable to melt. A few unimportant field marks are scattered. The base of the 0 is lightly repunched. A mere 7,500 pieces were struck. NGC ID# 24YM, PCGS# 6937
- 4045 1850 XF45 PCGS.** The 1850 is a challenging issue among Seated dollars. Only 7,500 pieces were produced, due to the introduction of the gold dollar in 1849, the large number of gold dollars produced in 1850, and the rising price of silver in terms of gold, caused by the California Gold Rush. A large percentage of the 1850 silver dollars produced were melted, leaving only a few hundred survivors in all grades, with Mint State pieces especially difficult to locate. This Choice XF example reveals shades of gold and peach beneath the overall gray patina. NGC ID# 24YM, PCGS# 6937

**1850 Seated Dollar, AU55
Attractively Toned**

- 4046 1850 AU55 PCGS.** The 1850 Seated dollar is a notable rarity within the series, struck to the extent of a meager 7,500 circulation strikes. This Choice AU example offers many of the benefits of a Mint State piece, save for the most minor rub and slight thinning of the luster. Attractively toned surfaces show only scattered, minor marks. Population: 36 in 55, 55 finer (8/13). NGC ID# 24YM, PCGS# 6937
- 4047 1850-O — Cleaning — PCGS Genuine. AU Details.** Though the 1850-O and 1860-O are plentiful by No Motto standards, the 1850-O is very scarce, with few AU examples from the mintage of 40,000 pieces. Medium plum-mauve and wheat-gold toning embraces this sharply defined and inoffensively hairlined silver dollar. A few pin scratches are noted on the field near the cap. NGC ID# 24YN, PCGS# 6938

**1850-O Dollar, AU50
Minimally Marked**

- 4048 1850-O AU50 PCGS.** Most extant 1850-O silver dollars are in the Very Fine to About Uncirculated grade range. Mint State coins are challenging and very difficult to locate. Whispers of reddish-gold and cobalt-blue make occasional visits to the gray surfaces of this AU specimen, and traces of luster reside in the protected areas of the well-defined design features. This piece reveals fewer marks than might be expected for the designated grade. Population: 24 in 50, 38 finer (8/13). NGC ID# 24YN, PCGS# 6938

- 4049 1853 AU55 ANACS.** This attractive Seated dollar shows just a trace of wear on the sharply impressed design elements and the lightly abraded surfaces retain most of their original mint luster with accents of pale gold toning. NGC ID# 24YS, PCGS# 6941
- 4050 1856 — Filed Rims — PCGS Genuine. AU Details.** This low mintage pearl-gray Seated dollar displays noticeable luster but the surfaces are hairlined and the fields are typically abraded. On both sides throughout, the rims are carefully filed where they meet the edge. NGC ID# 24YV, PCGS# 6944
- 4051 1859 XF45 PCGS Secure.** Although the 1859 Seated dollar had a relatively plentiful mintage of more than a quarter-million pieces, it is scarcer than that figure might imply and grows conditionally rarer as the grade level advances. Several shades of gold are present on both sides of this Choice XF example, along with a few splashes of copper, violet, plum, and ice-blue on the obverse. The only mark of note is in the field above Liberty's feet. Population: 23 in 45, 80 finer (8/13). NGC ID# 24YX, PCGS# 6946
- 4052 1859-O AU58 NGC.** An attractive near-Mint Seated dollar, this piece retains much of its original luster and design detail, with hints of light gold toning and excellent eye appeal for the grade. *From The Strawberry Fields Collection.* NGC ID# 24YY, PCGS# 6947
- 4053 1859-O MS61 NGC.** Flashy and full luster is pale silver with faint golden overtones. Though significantly abraded, most notably to the left of Liberty's form, this New Orleans Seated dollar retains considerable all-around eye appeal. NGC ID# 24YY, PCGS# 6947
- 4054 1859-S Fine 12 PCGS.** This coin has a strong degree of eye appeal for the grade, with darker toning at the outer edges providing attractive highlights for the devices. The coin exhibits tan-gray color overall. The wear is even and there are no abrasions worthy of mention. NGC ID# 24YZ, PCGS# 6948
- 4055 1859-S VF30 PCGS.** Gold-orange toning overall with blue-violet at parts of the margins, most visibly around Liberty's head. Surprisingly luminous despite the VF30 grade, the piece has several obverse abrasions but the reverse is comparatively clean. NGC ID# 24YZ, PCGS# 6948
- 4056 1859-S — Cleaning — PCGS Genuine. XF Details.** The cloudy steel-gray surfaces have pleasing sharpness and show few visible marks. A loupe reveals patches of hairlines. The 18 in the date is lightly repunched south. The sole No Motto San Francisco issue, and scarce due to a mintage of only 20,000 pieces. NGC ID# 24YZ, PCGS# 6948

**1859-S Dollar, AU50
A Low-Mintage Issue**

- 4057 1859-S AU50 NGC.** The first San Francisco silver dollar issue had a low mintage of 20,000 pieces, most of which went to the Orient. Surviving examples are mostly in the VF to AU grade range. The few Mint State specimens are primarily in the lower levels. The gray surfaces of this AU example display hints of light reddish-tan, along with traces of luster in the recessed areas. Both sides show nicely defined motifs and reveal no significant marks. NGC ID# 24YZ, PCGS# 6948

4058 1860 AU50 PCGS. The obverse of this piece displays faint champagne toning, while portions of the reverse reveal shades of gold, golden-brown, and violet. Other than a few marks at ERI of AMERICA, there are no marks worthy of mention. NGC ID# 24Z2, PCGS# 6949

4059 1860 AU55 PCGS Secure. Splashes of golden-brown and orange toning appear at portions of the outer periphery on the obverse. The reverse is similarly toned and includes small amounts of olive-green color. Boldly defined design elements add to the appeal of this lightly circulated example. NGC ID# 24Z2, PCGS# 6949

4060 1860 AU58 NGC. The 1860 Seated Liberty dollar experienced heavy circulation in trade with China and many were later melted, leading to examples in Mint State grades being scarce today. A bright, flashy near-Mint survivor, this piece has an attractive appearance. The reverse in particular exhibits a strong degree of design detail. Census: 15 in 58, 59 finer (8/13). NGC ID# 24Z2, PCGS# 6949

4061 1860-O AU58 PCGS. Cartwheel luster remains on both sides of this near-Mint example retaining a large degree of brilliance. Areas of toning are present, most of them subtle. Among the contact marks are pinscratches on the obverse near the cap and pole and a few marks on the reverse near 6 o'clock. NGC ID# 24Z3, PCGS# 6950

4062 1860-O AU58 NGC. A lightly circulated example of this popular date with just a touch of wear on the design elements and traces of mint luster under shades of gold, blue, and amber patina. NGC ID# 24Z3, PCGS# 6950

4063 1860-O AU58 NGC. Although the surfaces are lightly marred due to slight evidence of circulation, this pleasing piece displays reflective surfaces with light silver color and hints of golden toning. The design motifs on both sides are sharply rendered. A lovely near-Mint example.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4361. NGC ID# 24Z3, PCGS# 6950

4064 1860-O AU58 PCGS. CAC. This antebellum silver dollar remains broadly lustrous despite light rub on the high points. Gold-tinged surfaces show numerous wispy abrasions as well as a handful of small digs, but the overall eye appeal is pleasing. NGC ID# 24Z3, PCGS# 6950

4065 1860-O MS61 PCGS. Sharply detailed in the centers, this attractive Seated Liberty dollar shows a little softness on some of the stars and Liberty's toe. The pleasing surfaces are brightly lustrous and show the expected number of minor contact marks for the grade. NGC ID# 24Z3, PCGS# 6950

1860-O Seated Dollar, MS62 Heavily Exported Issue

4066 1860-O MS62 PCGS. A substantial mintage of 515,000 Seated Liberty silver dollars was accomplished at the New Orleans Mint in 1860, primarily for use in the China trade. This impressive MS62 specimen is darkly toned in shades of gray, cerulean-blue, and golden-brown, with traces of mint luster under the toning. NGC ID# 24Z3, PCGS# 6950

4067 1861 — Cleaning — PCGS Genuine. AU Details. The borders and devices display luster and Liberty's legs show only a trace of wear. The moderately hairlined surfaces exhibit light honey-gold toning. Abrasions are trivial except for a small dig on the obverse rim at 5 o'clock. Low mintage and very scarce. NGC ID# 24Z4, PCGS# 6951

1861 Silver Dollar, Uncirculated Details

4068 1861 — Cleaning — PCGS Genuine. Unc Details. A light wipe causes a mildly glossy and moderately prooflike appearance. Light wheat-gold and powder-blue toning visits this precisely struck and faintly hairlined Civil War dollar. The few minor field marks are relegated to the reverse. Though 1861 halves were struck in great quantity, the old tenor silver dollar was mostly coined for export to the Orient. NGC ID# 24Z4, PCGS# 6951

4069 1862 — Environmental Damage — PCGS Genuine. XF Details. Dark gray patina blankets this rare date silver dollar. The well defined surfaces are thickly hairlined but only lightly granular. A mere 11,500 pieces were struck, probably a token emission to prevent the 550 proofs from becoming instant rarities. By comparison, the gold dollar mintage in 1862 was 118 times greater. NGC ID# 24Z5, PCGS# 6952

4070 1862 XF45 NGC. From a low mintage of 11,540 pieces, this lightly circulated surviving Seated Liberty dollar displays moderate wear on the design elements. Census: 4 in 45, 70 finer (8/13). NGC ID# 24Z5, PCGS# 6952

4071 1863 VF20 PCGS. Only 27,200 Seated liberty dollars were struck in 1863 at the height of the Civil War. This pleasing VF specimen displays problem-free gray and blue-steel surfaces with all major design elements complete in outline and all letters in LIBERTY still legible. NGC ID# 24Z6, PCGS# 6953

4072 1863 — Cleaning — PCGS Genuine. XF Details. Well defined and only lightly abraded, though the surfaces are slightly subdued from an unobtrusive cleaning. The business mintage for this Civil War date was just 27,200 pieces. Survivors are scarce and underappreciated in all grades. NGC ID# 24Z6, PCGS# 6953

4073 1865 VF35 ANACS. Moderate even wear shows on both sides of this attractive Choice VF specimen and a few traces of mint luster cling to the devices. Attractive shades of lavender and greenish-gold patina highlight the pleasing surfaces. NGC ID# 24Z8, PCGS# 6955

4074 1866 Motto AU50 ANACS. Despite a touch of wear on the high points, this coin exhibits remarkably sharp striking details and the partially prooflike fields are blanketed in shades of pale gold toning. NGC ID# 24Z9, PCGS# 6959

4075 1866 Motto — Altered Surfaces — PCGS Genuine. Unc Details. Delicate honey-gold toning visits this unworn better date Seated dollar. The luster is mildly diminished on the open fields, and delicate hairlines are evident. Only 48,900 pieces were struck. NGC ID# 24Z9, PCGS# 6959

**1868 Seated Dollar, AU58
Scarcely Circulated Type Coin**

4076 1868 AU58 PCGS. This 1868 Seated dollar scarcely shows signs of circulation over the dove-gray surfaces accented with pale gray, rose, and green tinges. There are a few scattered marks consistent with the grade, but singular contact is absent. A nice-looking, affordable alternative to a Mint State example of this issue. Population: 18 in 58, 28 finer (8/13). NGC ID# 24ZB, PCGS# 6961

4077 1869 AU50 PCGS. Dusky shades of lavender-gray and golden-brown toning visit the surfaces of this lightly circulated specimen, with traces of mint luster under the patina. Population: 15 in 50, 99 finer (8/13). NGC ID# 24ZC, PCGS# 6962

4078 1869 AU58 PCGS. This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements and retains most of its original mint luster. Only minor signs of contact are evident. Population: 20 in 58, 42 finer (8/13). NGC ID# 24ZC, PCGS# 6962

4079 1870 AU50 PCGS. Hues of blue, green, gold, and peach are present on this pleasing piece. The high points of the design exhibit light wear. None of the surface marks are worthy of individual mention. NGC ID# 24ZD, PCGS# 6963

4080 1870-CC — Stained — NGC Details. VF. Variety 1-C. The 1870-CC dollar has a minimal mintage of 12,462 pieces, though it is less rare than its higher mintage half dollar counterpart. This midgrade example is toned dark brown and gray but the underlying surfaces are only lightly abraded. NGC ID# 24ZE, PCGS# 6964

4081 1870-CC VF20 PCGS. Variety 2-E. Despite a small mintage of 12,462 pieces, three obverse and five reverse dies were used to coin the first year 1870-CC. This is a predominantly stone-white example with caramel-gold high points. The eagle's plumage is bold. The surfaces are mildly bright and moderately abraded. NGC ID# 24ZE, PCGS# 6964

4082 1871 AU53 PCGS. A lightly worn example, this piece reveals surprisingly bright silver centers. Deep gold-orange toning visits the borders, as do patches of rich claret. Lightly marked overall with an abrasion over DOL. on the reverse.
Ex: Summer FUN Orlando (Heritage, 7/2010), lot 3836. NGC ID# 24ZG, PCGS# 6966

4083 1871 MS60 PCGS. CAC. Apricot-gold and pearl-gray shades alternate across satiny and well struck surfaces. The fields are moderately abraded. The 1871 is scarcer than its mintage implies, since most of the production was exported as bullion. Certified in a green label holder. NGC ID# 24ZG, PCGS# 6966

4084 1872 AU58 PCGS. A bright, near-Mint survivor, this piece retains a strong level of design detail. Only light traces of wear are present. Lint marks on the hub led to the raised lines on the skirt near Liberty's legs. NGC ID# 24ZJ, PCGS# 6968

**1872 Seated Dollar, Toned MS63
High-Mintage Type Coin Issue**

4085 1872 MS63 NGC. This dove-gray Select 1872 Seated dollar shows deeper charcoal accents around the devices amid frosty surfaces throughout both sides. The mintage of business strikes was abnormally large, at more than 1.1 million pieces. At the time they were struck, their melt value was \$1.03, but in ensuing years their face value exceeded their melt value, and they began to circulate in the years after the "Crime of '73" as silver prices continued to plummet. The average certified survivor is only Choice XF. Small marks and rather subdued luster account for the grade on this coin. Census: 16 in 63, 26 finer (8/13). NGC ID# 24ZJ, PCGS# 6968

**1872-CC Seated Dollar, Fine 15
Elusive Low-Mintage Carson City Issue**

4086 1872-CC Fine 15 PCGS. One of only four Seated Liberty dollar issues from the Carson City Mint, the 1872-CC claims a minuscule mintage of 3,150 pieces, adding to the desirability of any survivors no matter the grade. Although well circulated, as the grade implies, this piece displays overall even wear and color. A few hair thin marks appear in the right obverse field, but the coin is relatively free of abrasions of any note. This is a lovely representative for the grade. NGC ID# 24ZK, PCGS# 6969

**1872-CC Dollar, VF Details
Low-Mintage Carson City Date**

4087 1872-CC — Damage — Genuine PCGS. VF Details. This low-mintage Carson City dollar is seldom available in any grade. The damage referred to on the insert is in the form of several field marks and a nearly horizontal scratch on the upper portion of the reverse. Otherwise the surfaces appear to have toned naturally and are medium to darker gray with near-brilliant accents over the high points of the devices.

- 4088 1872-S XF40 PCGS Secure.** The 1872-S Seated Liberty dollar boasts a mintage of just 9,000 pieces, and the issue is even rarer than the minuscule production figure would suggest. Survivors at any grade level are always in demand. The obverse of this piece displays attractive intermingled shades of gold, silver, and blue when examined closely. A pleasing level of detail is present and there are no abrasions worthy of individual mention. Population: 37 in 40, 90 finer (8/13). NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLARS

1867 Seated Liberty Dollar, PR63 Only 625 Pieces Struck

- 4089 1867 PR63 PCGS.** This is a pleasingly original Select proof specimen. The surfaces are overlaid in rich intermingled shades of gray-green, gold, and crimson. The sharp detail is all that one should expect for a specimen striking of the Seated Dollar with Motto. Population: 71 in 63, 79 finer (8/13).
Ex: Central States Signature (Heritage, 5/2004), lot 8068. NGC ID# 252N, PCGS# 7015

1870 Seated Liberty Dollar, PR62 Cameo Excellent Contrast

- 4090 1870 PR62 Cameo PCGS.** The 1870 proof dollar is scarcer than its mintage of 1,000 pieces might suggest. Most 1870 proof dollars were apparently distributed with minor and silver proof sets. The pieces that remained unsold at the end of the year were melted. The surfaces of this example reveal areas of teal and light copper-gold color. A pleasing level of contrast exists between the fields and devices. The eagle's right leg lacks full definition. Moderately hairlined. Population: 6 in 62 Cameo, 35 finer (8/13). PCGS# 87018

1873 Seated Dollar, PR63 Moderately Contrasted

- 4091 1873 PR63 PCGS. CAC.** The "Crime of '73" ended the Seated dollar and several other designs and denominations, making the 1873 proof the last year this design and denomination would be available. This is a deeply mirrored example that has lightly contrasting, frosted devices on each side. Just a bit of peripheral color can be seen on the obverse, but the reverse displays a more even golden-reddish tone. Lightly hairlined. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

- 4092 1873 MS61 PCGS.** The lustrous surfaces of this attractive first-year Trade dollar show a minimum number of minor contact marks for the grade and the design elements are well-detailed. Attractive shades of pale gold toning visit both sides. NGC ID# 252W, PCGS# 7031
- 4093 1873-CC — Questionable Color — PCGS Genuine. Unc Details.** Darkly toned in shades of sea-green and gray, this low-mintage first-year Trade dollar exhibits well-detailed design elements with just a touch of softness on the eagle's claws.
From The Strawberry Fields Collection. NGC ID# 252X, PCGS# 7032
- 4094 1874-CC Chop Mark MS61 PCGS.** Micro CC. Period after FINE. An extensive network of die breaks is evident on both sides of this well-detailed Trade dollar, with an unobtrusive chop mark on the eagle's breast. Population: 9 in 61, 23 finer (8/13). PCGS# 87035
- 4095 1874-CC AU55 NGC.** Micro CC. No period after FINE. A lightly circulated Carson City representative with bold definition except on Liberty's curls. Delicate ice-blue and straw-gold toning visits moderately abraded fields. Minor gray verdigris near DOLLAR and a couple of pinpoint aqua flecks near UNITED. NGC ID# 2532, PCGS# 7035
- 4096 1874-S MS62 PCGS. Breen-5783.** Minute S, "very scarce." Period after FINE. This highly lustrous and well struck silver type coin is close to brilliant, though each side has a hint of tan toning. Abrasions are minor aside from thin marks near star 8. NGC ID# 2533, PCGS# 7036

**1874-S Trade Dollar, MS64
Moderately Toned, Great Type Coin**

- 4097 1874-S MS64 NGC.** This near-Gem 1874-S Trade dollar is quite well-struck through all of the central (and most of the peripheral) details, despite minor softness on Liberty's hair, extended left foot, and the grassy bottom of her perch closest to star 13. The 1874-S Trade dollar saw an ample mintage exceeding 2.5 million pieces, making it an excellent selection for type. And this is a nice example, relatively unmarked with attractive pinkish-gray surfaces. Census: 18 in 64, 2 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 2533, PCGS# 7036

- 4098 1875-CC AU53 PCGS.** Type One Reverse. Peach-gold luster illuminates protected portions of this Carson City Trade dollar. The open fields and high points are slate-gray. Small abrasions are distributed. NGC ID# 2535, PCGS# 7038
- 4099 1875-CC MS60 ANACS.** Type One Reverse. Glimpses of lemon-gold toning adorn this flashy and moderately abraded Carson City type coin. The strike is good, though roller marks are evident on Liberty's waist. NGC ID# 2535, PCGS# 7038
- 4100 1875-S MS61 PCGS.** Type One Reverse. Large S. This well-detailed Mint State Trade dollar displays a scattering of minor contact marks on both sides and the lustrous surfaces show delicate shades of golden-tan toning. NGC ID# 2536, PCGS# 7039
- 4101 1875-S MS62 PCGS. CAC.** Type Two Reverse. Large S. A stone-gray and autumn-gold example that exhibits cartwheel sheen and a bold strike. The obverse is refreshingly free from abrasions while the reverse is smooth aside from a cluster of small marks on the lower left (facing) wing.
From The Strawberry Fields Collection. NGC ID# 2536, PCGS# 7039

**1875-S/CC Trade Dollar, MS60
Chop Marked**

- 4102 1875-S/CC Chop Mark MS60 ANACS. FS-501.** Type One Reverse. A fully lustrous, lightly toned, and well struck example of this famous overmintmark variety. Two chopmarks are present, one near 9:30 on the obverse and the other above the eagle's right (facing) leg. These chopmarks are deeply entered and make the piece somewhat wavy.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1962, where it realized \$4,600. PCGS# 87040

- 4103 1875-S/CC Chop Mark MS62 PCGS. FS-501.** The middle die state with cracks (but no breaks) near AMERICA. Lustrous, brilliant, and nicely struck. Deep chop marks are located near star 3, on Liberty's branch stem, on the arrow shafts, and on the eagle's right (facing) leg. PCGS# 87040

- 4104 1876 MS63 NGC.** Type One Obverse and Reverse. Dusky chestnut-gold toning embraces this satiny and well struck Philadelphia Mint type coin. Only minimally abraded for the designated grade, though we note a thin mark near the TA in STATES and a hint of granularity above the eagle's head. NGC ID# 2539, PCGS# 7041

- 4105 1876 MS63 PCGS.** Type One Obverse. Type Two Reverse. Vibrant mint luster shines beneath dark layers of golden-brown and blue-steel toning on this attractive Trade dollar. The design elements are well-detailed and the surfaces show only minor signs of contact.
From The Strawberry Fields Collection. NGC ID# 2539, PCGS# 7041

**1876 Trade Dollar, MS64
Pleasing, Richly Toned Example**

- 4106 1876 MS64 NGC.** Type One Obverse and Reverse. Sea-green and pale peach enrich the obverse. Light golden-brown, cream, and lime shades encompass the reverse. This well-struck near-Gem has pleasing luster and a well-preserved reverse. The obverse field has faint abrasions. NGC has certified just 17 pieces finer (8/13).
Ex: ANA Signature (Heritage, 7-8/2008), lot 828. NGC ID# 2539, PCGS# 7041

- 4107 1876-CC AU53 PCGS.** Type One Obverse. Type Two Reverse. Tall CC. Blended olive-green and gunmetal-gray toning embraces this well struck and briefly circulated Carson City Trade dollar. Careful inspection locates faded marks on the upper left obverse field and the rim beneath the date. NGC ID# 253A, PCGS# 7042

- 4108 1876-S MS63 PCGS.** Type One Obverse and Reverse. Large S. The current example is a pleasing Select Mint State specimen with sparkling luster and well struck design elements. A slight degree of gold color is noted on both sides, and surface marks are not excessive.
Ex: Dallas Signature (Heritage, 10/2008), lot 1136, which realized \$2,070. NGC ID# 253B, PCGS# 7043

- 4109 1877 MS61 PCGS.** The luster on both sides has a considerably reflective character and the strike is solid, though enough cartwheel is present in the fields to eliminate proof status. Extensive wispy abrasions in the left obverse field are the greatest contribution to the grade. NGC ID# 253C, PCGS# 7044

- 4110 1877 MS63 NGC.** Attractively toned in shades of greenish-gold and lavender-gray, this impressive Select specimen shows strong mint luster under the patina. Census: 50 in 63, 76 finer (8/13). NGC ID# 253C, PCGS# 7044

1877 Trade Dollar, MS64
Conditionally Rare Any Finer

- 4111 1877 MS64 PCGS.** The 1877 Trade dollar is much more difficult to locate in high grade than its mintage of more than 3 million pieces would suggest. This attractive Choice specimen exhibits well-detailed design elements and pleasing shades of lavender-gray and golden-brown toning, with strong mint luster under the patina. Population: 76 in 64 (2 in 64+), 8 finer (8/13). NGC ID# 253C, PCGS# 7044

- 4112 1877-S MS62 PCGS. CAC.** Large S. Rich autumn-brown and steel-gray toning encompasses this satiny type representative. The strike is intricate. Minor obverse field marks determine the grade. NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, MS64
Excellent Type Set Candidate

- 4113 1877-S MS64 PCGS. CAC.** This lustrous near-Gem boasts luminous surfaces with silver-gray, pinkish tinges, and hints of mint-green on the obverse. The sharp strike and relative lack of mentionable contact make this piece an excellent candidate for type set purposes, as does its large mintage exceeding 9.5 million pieces. PCGS has only seen 33 numerically finer (8/13). NGC ID# 253E, PCGS# 7046

- 4114 1877-S MS60 Deep Mirror Prooflike ANACS.** Large S. Unusual for a San Francisco business strike, the present Trade dollar has frosty motifs and glossy, flashy fields. Small marks are scattered though less consequential than expected for the grade, especially on the reverse. NGC ID# 253E, PCGS# 7046

- 4115 1878-CC — Scratch — PCGS Genuine. AU Details.** Mingled shades of sea-green, violet-gray, and amber toning blanket the surfaces of this low-mintage Trade dollar. The well-detailed design elements show just a trace of wear and a long thin scratch in the lower-left obverse field constitutes the noted damage. From *The Strawberry Fields Collection*. NGC ID# 253F, PCGS# 7047

- 4116 1878-S MS61 NGC.** Although not designated as prooflike, the fields of this attractive Mint State Trade dollar are brightly reflective, with a few hints of greenish-gold and lavender toning. The well-detailed design elements add to the surprisingly strong visual appeal. NGC ID# 253G, PCGS# 7048

- 4117 1878-S MS62 PCGS.** A sharply impressed and subdued charcoal-gray example, this piece displays caramel-gold and sky-blue upon rotation beneath a light. The reverse is unabraded, and the obverse field exhibits only moderate marks.

Ex: Long Beach Signature (Heritage, 5/2009), lot 981.

From The Strawberry Fields Collection. NGC ID# 253G, PCGS# 7048

- 4118 1878-S Doubled Die Reverse MS61 PCGS. FS-801.** The doubling is easily seen on the letters in TRADE and GRAINS and on the arrow points. This attractive coin is well-detailed and brightly lustrous. Minimally marked for the grade. Population: 2 in 61, 4 finer (8/13). PCGS# 145808

PROOF TRADE DOLLARS

- 4119 1873 — Questionable Color — PCGS Proof Genuine. Unc Details.** This first-year proof Trade dollar has no evidence of wear, though digs and contact marks are scattered through the fields. The yellow, green, and rose-violet toning over most of each side is murky yet shallow and has been labeled "Questionable" by PCGS. NGC ID# 27YJ, PCGS# 7053

- 4120 1873 PR61 PCGS.** Faint toning in shades of peach, green, and gray is present, primarily on the obverse. The coin exhibits a pleasing strike and nice eye appeal. Two small horizontal marks are present below the branch hand. From *The Strawberry Fields Collection*. NGC ID# 27YJ, PCGS# 7053

- 4121 1875 PR61 Cameo PCGS.** Type Two Reverse. Sharply detailed and boldly contrasted, this low-mintage proof shows a few traces of pale gold color in the deeply mirrored fields. A scattering of minor hairlines and contact marks explains the grade. Population: 3 in 61 Cameo, 56 finer (8/13). PCGS# 87055

- 4122 1876 — Cleaning — PCGS Proof Genuine. Unc Details.** Type One Obverse and Reverse. Light honey-gold patina visits this hairlined but collectible Centennial-year proof silver type coin. The strike is bold except on the eagle's right (facing) leg. NGC ID# 27YM, PCGS# 7056

- 4123 1876 PR61 NGC.** Type One Obverse, Type Two Reverse. The well-detailed design elements of this attractive proof show a touch of softness on the eagle's claws and the reflective fields are blanketed in dark shades of gray, blue-steel, and sea-green. NGC ID# 27YM, PCGS# 7056

1877 Trade Dollar, Boldly Struck PR64

- 4124 1877 PR64 NGC.** Proof Trade dollars of 1877 had a mintage of 510 pieces, the lowest proof delivery in the series, except for the rare 1884 and 1885 issues. Reddish-brown toning bathes both sides of this near-Gem and a solid strike delivers crisp definition to the design elements. A few scattered marks are insignificant. Census: 58 in 64, 20 finer (8/13). NGC ID# 27YN, PCGS# 7057

- 4125 1878 — Questionable Color — PCGS Proof Genuine. Unc Details.** Iridescent peach-gold and sky-blue blanket this sharply struck proof-only Trade dollar. The colorful patina helps conceal a few pinscratches on the fields that are most evident between stars 10 and 12.
From The Strawberry Fields Collection. NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR64
Sharply Struck and Appealing**

- 4126 1878 PR64 PCGS.** This near-Gem proof 1878 Trade dollar is certified in an old green-label holder, a nice-looking coin with a razor-sharp strike and good eye appeal. The grade is determined by a few light contact marks and hairlines in the fields, but there is plenty of eye appeal on this pinkish-gray proof, from the original mintage of 900 pieces. NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR64
Boldly Reflective Through Patina**

- 4127 1878 PR64 NGC.** From a mintage of 900 pieces, the proof 1878 Trade dollar is a scarce issue in high grade. This sharply detailed Choice example is darkly toned in shades of bluish-gray and champagne-gold, with deeply reflective fields under the patina. Census: 83 in 64, 58 finer (8/13). NGC ID# 27YP, PCGS# 7058

**1879 Trade Dollar, PR63
Deeply Toned Example**

- 4128 1879 Trade PR63 PCGS.** Deep patina in shades of copper-pink with accents of electric blue encroach upon centers showing small areas of silver color remaining, a bit more so on the reverse. A few scattered field hairlines explain the grade, but the strike and overall eye appeal are quite satisfactory. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR64
Some Elements of Contrast**

- 4129 1879 Trade PR64 NGC.** This delightful Choice Trade dollar exhibits sharply detailed design elements and deeply mirrored fields throughout. Although not designated as a Cameo, this coin shows definite elements of contrast. The mostly brilliant surfaces show hints of champagne-gold toning and a few minor hairlines and contact marks. NGC ID# 27YR, PCGS# 7059

- 4130 1880 PR60 PCGS.** A sharply detailed and deeply mirrored specimen of this proof-only issue with a scattering of minor hairlines and contact marks in the field that defines the grade. A few hints of pale gold toning visit the surfaces. NGC ID# 27YS, PCGS# 7060

- 4131 1880 PR61 NGC.** Portions of the rims exhibit toning; otherwise, this coin remains brilliant and flashy. The design elements reveal a bold level of detail. A curly lint mark appears at Liberty's left thigh. The expected number of hairlines is present on this PR61 representative. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR64
Attractively Toned**

- 4132 1880 PR64 PCGS.** This lovely near-Gem example displays a bold level of design detail overall, with minor incompleteness noted on some of the stars. The fields remain reflective through pleasing toning that includes shades of copper and golden-orange with a few splashes of sea-green also appearing.
From The Strawberry Fields Collection. NGC ID# 27YS, PCGS# 7060

1881 Trade Dollar, PR63 Cameo
Significantly Contrasted on Both Sides

- 4133 1881 PR63 Cameo PCGS.** The proof-only series of Trade dollars forms an interesting subset of this highly collectible and relatively short-lived series. This is a splendid proof whose surfaces are mostly untoned, except for a slight accent of color around the margins. As a result, the mirroring in the fields is allowed to flash unimpeded by any color considerations. Additionally, the devices show significant mint frost which give the coin a confirmed cameo contrast on each side.

From The Strawberry Fields Collection. PCGS# 87061

- 4134 1882 PR61 ANACS.** Vivid rings of cobalt-blue and sea-green toning highlight the reflective surfaces of this attractive proof-only issue. The design elements are sharply detailed and the fields show a minimum number of minor hairlines for the grade. NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR64 Cameo
Pleasing Eye Appeal

- 4135 1882 PR64 Cameo PCGS.** U.S. Trade dollars were only produced in proof format in 1882. The generous mintage of 1,097 pieces apparently satisfied collector demand as some examples went unsold and were melted after the close of the year. The mirrored fields of this PR64 Cameo contrasts strongly with the sharply struck, frosted design elements. Some unobtrusive wispy hairlines in the fields prevent a higher numerical grade. This piece yields very pleasing aesthetic appeal. Population: 40 in 64 (1 in 64+) Cameo, 17 finer (8/13).

From The Searight Collection. PCGS# 87062

1882 Trade Dollar, PR64 Cameo
Popular Proof-Only Issue

- 4136 1882 PR64 Cameo PCGS.** Pronounced cameo contrast provides this near-Gem with attractive eye appeal. The devices reveal a pleasing level of mint frost and the fields are nicely reflective. Both sides reveal large areas of rich golden toning. The reverse also includes areas of russet, plum, and cobalt-blue color. A long, curly as-made lint mark extends downward from Liberty's left shoulder. Minor haze and fingerprints are present on the obverse. Population: 40 in 64 (1 in 64+) Cameo, 17 finer (8/13).

From The Strawberry Fields Collection. PCGS# 87062

- 4137 1883 — Polished — NGC Details. Proof.** Upon initial evaluation, this proof-only Trade dollar appears to be a Gem Cameo specimen but the coin has been carefully buffed. Still a fully struck and attractive representative that is affordable relative to unimpaired pieces. NGC ID# 27YV, PCGS# 7063

STANDING LIBERTY QUARTERS

4138 1917 Type One MS65 Full Head PCGS. Light to medium tan-gold toning graces this fully struck and lustrous Gem. Type One quarters were coined for only 13 months, though a number of examples were saved. Encapsulated in an old green label holder. NGC ID# 242Z, PCGS# 5707

4139 1917 Type One MS65 Full Head PCGS. Champagne and gray-blue colors appear on this Gem. Areas of dark gray patina are present, serving as accents to portions of the design elements. In addition to the Full Head detail, the shield rivets are not only all present, but also boldly defined.
From The Strawberry Fields Collection. NGC ID# 242Z, PCGS# 5707

4140 1917 Type One MS66 Full Head PCGS. In addition to the Full Head designation, the shield rivets display strong definition. Brilliant satin surfaces on both sides provide this Premium Gem with bold visual appeal. A tiny carbon speck appears below the eagle. NGC ID# 242Z, PCGS# 5707

4141 1917 Type One MS66 Full Head PCGS. Both sides display butter-gold toning, with the patina deeper on the reverse. Dynamic cartwheel luster sweeps fully struck and well preserved surfaces. Housed in a green label holder. NGC ID# 242Z, PCGS# 5707

4142 1917 Type One MS66 Full Head NGC. Subtle toning appears on portions of this Premium Gem, including a few flyspecks of color. In addition to the Full Head detail, the shield rivets display definition. Only a few abrasions are present and they are minuscule. A lovely example.
From The Joan Carroll Collection. NGC ID# 242Z, PCGS# 5707

4143 1917 Type One MS66 Full Head NGC. Strong gray-gold luster with blue and violet tints visible at the margins are among the attributes this coin possesses. This example displays crisp definition and great eye appeal.
Ex: Houston Signature (Heritage, 12/2009), lot 598. NGC ID# 242Z, PCGS# 5707

4144 1917 Type One MS66 Full Head PCGS. A wonderful example, not only due to the Full Head designation, but also because of the attractive toning and a sharp strike overall. The toning on the obverse is particularly eye-catching, with shades of champagne, rose, orange, red, and plum. All of the shield rivets are present, with most of them exhibiting strong definition. NGC ID# 242Z, PCGS# 5707

4145 1917 Type One MS66+ Full Head PCGS. CAC. Not only does the head display a strong degree of detail, all of the shield rivets are present and well defined as well. A few tiny, scattered yellow-gold splashes of toning appear on the obverse. This is a pleasing high-end Premium Gem representative. NGC ID# 242Z, PCGS# 5707

1917 Standing Liberty Quarter, MS67

Full Head Type One Example

4146 1917 Type One MS67 Full Head PCGS. A Superb Gem representative, with the pinpoint sharpness expected of the issue and a few inconsequential frost breaks on the highpoints of the obverse. Attractive hints of champagne-gold and lavender toning enhance the outstanding eye appeal. Always in demand from type collectors and series specialists alike. Population: 69 in 67 (4 in 67+) Full Head, 0 finer (8/13). NGC ID# 242Z, PCGS# 5707

1917-D Quarter, MS66 Full Head

Sought-After Type One Issue

4147 1917-D Type One MS66 Full Head PCGS. CAC. A sharply detailed Premium Gem representative of this short-lived design type, with Full Head definition and fine detail on the shield rivets. The well-preserved surfaces are darkly toned in shades of golden-brown and lavender-gray. No mentionable surface marks are evident. PCGS has graded 21 numerically finer examples (8/13). NGC ID# 2432, PCGS# 5709

4148 1917-S Type One MS65 NGC. Eye-catching satiny luster radiates from the untuned surfaces of this Gem. All of the shield rivets are present, though not fully defined. A few minor surface marks are consistent with the grade. Census: 22 in 65, 14 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2009), lot 640. NGC ID# 2433, PCGS# 5710

4149 1917-S Type One MS64 Full Head NGC. Hints of peach, ice-blue, and gold are present on this well struck example exhibiting a grainy texture. Scattered light gray freckles appear on portions of the reverse. NGC ID# 2433, PCGS# 5711

4150 1917 Type Two MS66 Full Head PCGS. An attractive Premium Gem example, this piece displays rich luster, nicely detailed design elements, and a hint of color. A minor clash mark is present near Liberty's right shoulder. A few small marks and grazes are present. Population: 73 in 66 (2 in 66+) Full Head, 8 finer (8/13). NGC ID# 2434, PCGS# 5715

4151 1917 Type Two MS66 Full Head NGC. Ex: Simpson. A gorgeous Type Two Full Head representative, this coin features brilliant surfaces, rich satin luster, and a well-executed strike. The shield rivets display a pleasing level of detail. This is a lovely, minimally abraded coin. Census: 52 in 66 (3 in 66+) Full Head, 12 finer (8/13). NGC ID# 2434, PCGS# 5715

4152 1917-D Type Two MS66 NGC. Rich luster emanates from the attractively toned surfaces of this Premium Gem. The intermingled colors consist primarily of various shades of red and orange, with smaller areas of yellow-gold, dusky-blue, and olive-green also present. A few of the shield rivets are absent. Census: 16 in 66, 1 finer (8/13). NGC ID# 2435, PCGS# 5716

**1917-D Quarter, MS65 Full Head
Rich Mint Luster**

4153 1917-D Type Two MS65 Full Head PCGS. Brilliant surfaces and rich satin luster provide both sides of this Gem with a strong level of eye appeal. The coin is virtually untuned other than a small spot of orange near the branch hand. The strike was well executed, producing a bold level of detail. All of the shield rivets are present although a few lack full definition. Population: 59 in 65 Full Head, 23 finer (8/13). NGC ID# 2435, PCGS# 5717

4154 1917-S Type Two MS64 Full Head NGC. CAC. Scattered areas of attractive toning are present on this near-Gem example. The colors include hues of gold, red, and orange. Small areas of darker toning appear at the extreme rims, primarily on the reverse. The shield rivets are all present, though a few lack full definition. An interesting die crack extends from the bottom of the 9 in the date to the top of the 7. An as-made lint mark appears to the right of the 7. This is an extremely pleasing coin for the grade. NGC ID# 2436, PCGS# 5719

**1917-S Quarter, MS65+ Full Head
Exceptional Mintmark Type Coin**

4155 1917-S Type Two MS65+ Full Head PCGS. Always in demand as the first year of the Type Two design, the 1917-S Standing Liberty quarter is very scarce in Gem condition. This high-end Gem is well-detailed, with a touch of softness on the central obverse but full details on Liberty's head. Vibrant mint luster and a few hints of pale gold toning add to the outstanding eye appeal. Population: 53 in 65+ Full Head, 20 finer (8/13). NGC ID# 2436, PCGS# 5719

4156 1918 MS65 Full Head PCGS. A well struck example, not only does this Gem have Full Head details, the shield rivets are all present as well. Subtle hints of champagne and lilac toning appear, adding to the eye appeal. This lovely piece reveals only a few minuscule marks. NGC ID# 2437, PCGS# 5721

4157 1918 MS65 Full Head PCGS. Small hints of golden toning appear on this Gem example displaying rich satin luster and lovely eye appeal. Portions of the shield details reveal a minor incompleteness of strike. The few surface marks are minor. NGC ID# 2437, PCGS# 5721

**1918 Quarter, MS66 Full Head
Generous Cartwheel Luster, Full Date**

4158 1918 MS66 Full Head NGC. The 1918 Standing Liberty quarter is one of the better-produced issues in the series up to that point, save for the 1917 Type Two, according to Cline. This Premium Gem boasts generous cartwheel luster over silver-white surfaces, and the date is fully struck, even on the often-weak top portion. A slight touch of toning appears to the left of Liberty's left (facing) leg. The strike is uniformly sharp. Census: 33 in 66 (2 in 66+) Full Head, 3 finer (8/13). NGC ID# 2437, PCGS# 5721

4159 1918-D MS65 NGC. A pleasing Gem representative, this coin displays lustrous surfaces and only subtle hints of toning. The shield rivets are all present, with only a few exhibiting a minor incompleteness of strike. Census: 44 in 65, 16 finer (8/13). NGC ID# 2438, PCGS# 5722

4160 1918-D MS65 PCGS. CAC. Bold satin luster and brilliant surfaces provide this Gem with a pleasing appearance. Subtle hints of toning are present on both sides, with a few small spots appearing on the reverse. A die crack extends from the rim below the first star after STATES to the second feather tip of the eagle's left wing. Population: 56 in 65 (1 in 65+), 20 finer (8/13). NGC ID# 2438, PCGS# 5722

4161 1918-D MS64 Full Head NGC. The obverse of this near-Gem with a Full Head designation is virtually free of toning, while the back reveals liberal tiny flecks of color, including shades of golden-brown, blue-gray, and dark teal. Portions of the shield display minor incompleteness of strike. NGC ID# 2438, PCGS# 5723

4162 1918-S MS66 PCGS. Rich satin luster provides this Premium Gem with a pleasing appearance. Areas of gold, rose, and peach color are present on this brilliant coin. The head and shield lack full definition. A number of as-made die polish lines appear on the reverse. Population: 12 in 66, 1 finer (8/13). NGC ID# 2439, PCGS# 5724

1918/7-S Quarter, VF Details

4163 1918/7-S — Improperly Cleaned — NGC Details. VF. FS-101. The flat top and thick downstroke of the all-important underdigit 7 confirms the rare overdate. This subdued slate-gray quarter is hairlined and has a pinscratch near the junction of the front wing with the eagle's body. Protected areas show traces of luster. *From The Joan Carroll Collection.*

**1918/7-S Quarter, XF Details
Key Wartime Hubbing Error**

- 4164 1918/7-S — Cleaning — PCGS Genuine. XF Details. FS-101.** This famous wartime hubbing error is always in demand in all grades and conditions. This lightly worn specimen retains XF sharpness on the design elements, but the surfaces have an unnatural sheen due to cleaning. Dark shades of gray, amber and golden-brown patina blanket the lightly abraded surfaces. NGC ID# 243A, PCGS# 5726

**1919-D Quarter, MS64
Strong Luster**

- 4165 1919-D MS64 NGC.** Silver-white overall with only localized softness on Liberty's head and the bottom of her shield. Occasional hints of pink-gold visit the pebbled reverse fields. The 1919-D quarter has a mintage of fewer than 2 million pieces and is a scarce and underrated date in near-Gem and finer condition. NGC ID# 243C, PCGS# 5730

- 4166 1920 MS65 Full Head NGC.** This lustrous Gem example displays a strong degree of eye appeal. Rich luster and bright surfaces are among the attributes this coin possesses. The shield exhibits a pleasing level of detail, with all of the rivets present and only two lacking definition. Small, scattered subtle hints of toning are present. Census: 57 in 65 (1 in 65+) Full Head, 18 finer (8/13). NGC ID# 243E, PCGS# 5735

**1920-S Standing Liberty Quarter, MS66
Underrated Issue in High Grade**

- 4167 1920-S MS66 NGC.** The 1920-S Standing Liberty quarter is an underrated issue in the series, despite the substantial reported mintage of nearly 6.4 million pieces. This well-detailed Premium Gem displays completely brilliant surfaces with vibrant mint luster and no mentionable signs of contact. Census: 16 in 66, 5 finer (8/13). NGC ID# 243G, PCGS# 5738

- 4168 1921 AU55 NGC.** Pleasing satin luster provides both sides of this Choice AU example with lovely eye appeal. Wear is present on the high points of the devices. This bright piece displays relatively few abrasions, all of them minor. NGC ID# 243H, PCGS# 5740

- 4169 1921 MS62 NGC.** Rich satin luster on both sides provides this piece with a pleasing appearance. A few small splashes of color are present near 6 o'clock on the reverse. Incompleteness of strike is noted, including a large portion of the peripheral design on the obverse. NGC ID# 243H, PCGS# 5740

- 4170 1921 MS64 NGC.** An attractive near-Gem example, this piece reveals shades of pale gold and ice-blue toning, enhancing the well-preserved surfaces. The design elements are well-detailed, with just a trace of softness on two of the shield rivets and the eagle's belly. Vibrant satiny mint luster adds to the considerable visual appeal. NGC ID# 243H, PCGS# 5740

**1921 Standing Liberty Quarter, MS65
Better Date in High Grade**

- 4171 1921 MS65 NGC.** The 1921 Standing Liberty quarter is a better date in the series, from a mintage of less than 2 million pieces. Examples in MS65 condition are very scarce and finer grades are rare. This sharply detailed Gem displays vibrant mint luster and attractive accents of pale gold toning. Census: 81 in 65, 24 finer (8/13). NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS64 Full Head
Delightfully Toned**

- 4172 1921 MS64 Full Head NGC.** The year 1921 is tough for many denominations, quarters included. The Philadelphia issue, represented by this Full Head near-Gem, saw a mintage of fewer than 2 million pieces. Rich peach, rose, and plum overtones occasionally fade to medium-gray on the dusky yet delightful patina. NGC ID# 243H, PCGS# 5741

**1923 Quarter, MS66 Full Head
Conditional and Strike Rarity**

4173 1923 MS66 Full Head NGC. This midseries P-mint is a high-mintage issue, but one seldom seen with Full Head details. This Premium Gem Full Head example boasts generous luster throughout both sides, with scarcely a hint of gold patina and eye appeal as bold as the strike. Census: 12 in 66 Full Head, 3 finer (8/13). NGC ID# 243J, PCGS# 5743

4174 1923-S VF35 PCGS Secure. The 1923-S Standing Liberty quarter is a sought-after key, with a low-mintage of 1.3 million pieces. This moderately worn example retains important original detail and displays pleasing gray and olive-green patina. NGC ID# 243K, PCGS# 5744

4175 1923-S AU55 NGC. This Choice AU representative displays satin luster on both sides. Wear is present on the high points of the devices. Other than a mark near 4 o'clock on the obverse, the abrasions present are minor. NGC ID# 243K, PCGS# 5744

**1923-S Standing Liberty Quarter, MS64
Lustrous and Colorful**

4176 1923-S MS64 PCGS. The 1923-S Standing Liberty quarter is a scarce issue in high grade, from a mintage of 1.3 million pieces. This well-detailed Choice example displays vibrant mint luster under attractive shades of golden-brown and lavender-gray toning. Only minor signs of contact are evident and visual appeal is quite strong. NGC ID# 243K, PCGS# 5744

4177 1924 MS65 Full Head NGC. Well-defined on both Liberty's head and her shield, an unusual characteristic. Frosty luster is largely silver, bright on the obverse with a more subdued reverse that extends the gold-orange rim toning on each side partly into the fields. NGC ID# 243L, PCGS# 5747

**1924-D Quarter, MS67
None Finer at PCGS**

4178 1924-D MS67 PCGS. CAC. This 1924-D Standing Liberty quarter shows the characteristically soft detail on the head and date, but the well-preserved surfaces exhibit vibrant mint luster and pleasing shades of golden-brown and ice-blue toning. Visual appeal is unusually strong for the issue. Population: 6 in 67, 0 finer (8/13). NGC ID# 243M, PCGS# 5748

4179 1924-S MS63 PCGS. Scattered freckles of color are present on both sides, with the reverse revealing more pronounced toning. Those hues include a large splash of gold along with smaller areas of ice-violet and soft pink. Numerous thin die cracks appear on the reverse. This Select example displays the typical strike. NGC ID# 243N, PCGS# 5750

4180 1924-S MS65 NGC. Pleasing luster provides this Gem with nice eye appeal. Light toning is present, primarily on the reverse, in shades of tan and olive-green. Die cracks appear near 10 o'clock on the reverse. Though not fully struck, as this issue is known for, this coin has appeal. Minor grazes appear in the left obverse field. Census: 57 in 65, 20 finer (8/13). NGC ID# 243N, PCGS# 5750

4181 1926 MS65 Full Head PCGS. Attractive gold toning adorns both sides of this lustrous Gem, with areas of russet and plum present on the obverse. The coin exhibits a strong strike, with only a few of the shield rivets lacking definition. Reed marks appear on Liberty's right arm. NGC ID# 243R, PCGS# 5755

**1926-S Standing Liberty Quarter, MS64+
Better-Than-Average Strike**

4182 1926-S MS64+ PCGS. CAC. The 1926-S Standing Liberty quarter is known as a strike rarity and this well-detailed specimen is better-than-average in that respect, with some detail on Liberty's head and only a couple of missing shield rivets. The mostly brilliant lustrous surfaces show a few hints of gold and lavender toning. Population: 98 in 64 (1 in 64+), 81 finer (8/13). NGC ID# 243T, PCGS# 5758

4183 1927-S XF45 PCGS. Attractive toning in hues that include golden-orange, plum, teal, and deep electric-blue appears on both sides of this lovely example. A silver spot is present to the right of the head. The piece retains a pleasing level of detail. A few abrasions and pin scratches are evident on both sides.
Ex: Central States St. Louis Signature (Heritage, 5/2005), lot 7060, which realized \$1,495. NGC ID# 243W, PCGS# 5764

- 4184 1927-S — Reverse Scratched — NGC Details. AU.** This brilliant semikey quarter displays substantial mint sheen though Liberty's legs and the eagle's back wing exhibit moderate wear. Lightly abraded except for a single lengthy pinscratch from 2 o'clock to the base of the lower right star. NGC ID# 243W, PCGS# 5764
- 4185 1928 MS66 Full Head NGC.** Gorgeous toning provides this Superb Gem with a strong level of eye appeal. The colors include shades of orange, rose, and salmon. The obverse displays more pronounced hues. The design elements reveal a strong level of definition. Census: 15 in 66 Full Head, 12 finer (8/13). NGC ID# 243X, PCGS# 5767
- 4186 1929 MS66 Full Head NGC.** Gorgeous satiny white surfaces and rich luster provide this Premium Gem Full Head example with exceptional eye appeal. Beyond the Full Head, all but two of the shield rivets are present. Census: 55 in 66 (1 in 66+) Full Head, 9 finer (8/13). NGC ID# 2442, PCGS# 5773
- 4187 1929-D MS64 Full Head PCGS.** Attractive champagne toning with small splashes of peach provides this lustrous near-Gem with lovely eye appeal. The shield reveals minor incompleteness of strike. Population: 73 in 64 (1 in 64+) Full Head, 47 finer (8/13). NGC ID# 2443, PCGS# 5775
- 4188 1929-D MS64 Full Head PCGS.** A light patina of almond-gold with hints of orange and green is present on this near-Gem example. Although the head exhibits pleasing definition, as indicated by the Full Head designation, the shield and eagle are not fully defined. Population: 73 in 64 (1 in 64+) Full Head, 47 finer (8/13). NGC ID# 2443, PCGS# 5775
- 4189 1929-D MS64 Full Head NGC.** Frosty white surfaces and satin luster appear on this near-Gem Full Head representative, providing this piece with an attractive appearance. The coin is minimally abraded and the back exhibits a slight counter-clockwise rotation. A few small spots of yellow residue are present on the obverse. Census: 42 in 64 Full Head, 29 finer (8/13). NGC ID# 2443, PCGS# 5775
- 4190 1929-S MS66+ Full Head PCGS. CAC.** Rich satin luster and boldly brilliant surfaces provide this high-end Premium Gem Full Head example with tremendous eye appeal. The coin exhibits minor incompleteness of strike at a few of the shield rivets. A tiny hint of haze appears near the I in LIBERTY when the coin examined closely and rotated. Population: 4 in 66+ Full Head, 12 finer (8/13). NGC ID# 2444, PCGS# 5777
- 4191 1930 MS66 Full Head PCGS.** This is an appealing Premium Gem Full Head example. Brilliant surfaces and gleaming luster provide nice eye appeal. A hint of champagne toning is present on the reverse. All of the shield rivets are present, though not fully defined. *From The Searight Collection.* NGC ID# 2445, PCGS# 5779
- 4192 1930 MS67 Full Head NGC.** A brilliant Superb Gem Full Head example, this piece displays lustrous surfaces and only a few small areas of toning. Golden-orange color appears at the date and a small gray spot is present near 9 o'clock on the obverse. All but two of the shield rivets are present. As expected at this grade level, there are very few abrasions and they are minor. Census: 30 in 67 Full Head, 0 finer (8/13). NGC ID# 2445, PCGS# 5779
- 4193 1930-S MS66 Full Head NGC.** Attractive luster provides this largely untuned Premium Gem Full Head representative with nice eye appeal. Small flecks of dark patina are present, with most of them concentrated at the rim at the top portion of the obverse. NGC has assigned higher numeric grades to only 29 examples (8/13). NGC ID# 2446, PCGS# 5781

1930-S Quarter, MS67 Full Head Well-Made Series-Ending Issue

- 4194 1930-S MS67 Full Head NGC.** The 1930-S Standing Liberty quarter is a well-produced series-ending issue and one easier to find with Full Head in high grades, making it an obvious but appealing target. This Superb Gem shows generous luster and a bold strike over mostly untuned surfaces accented with rose and ice-blue, more prominent on the obverse. Census: 27 in 67 Full Head, 2 finer (8/13). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

- 4195 1932-D MS64 PCGS. CAC.** Intermingled hues of gold and silver provide this near-Gem piece with an attractive appearance, with the reverse also including hints of rose. Tiny flecks of gray and golden-brown are present as well. The surfaces reveal scattered marks, but none is worthy of individual mention. PCGS has awarded higher numeric grades to only 67 examples (8/13). NGC ID# 2448, PCGS# 5791

1932-D Quarter, MS64 Tough Date

- 4196 1932-D MS64 PCGS. CAC.** The mintmarked quarters of 1932 are longtime collector favorites. This near-Gem from the Denver issue has light gold and violet toning over a silver base, the former color prominent on the obverse and the latter on the reverse. PCGS has graded 67 examples as MS65 or better (8/13). NGC ID# 2448, PCGS# 5791
- 4197 1932-S MS64 NGC.** Richly toned blue and pink-gold with several shades in-between. Only a few stray marks keep this key-date near-Gem from an even finer grade. NGC ID# 2449, PCGS# 5792
- 4198 1932-S MS64 NGC.** Scattered splashes of toning are present on both sides of this near-Gem representative. The colors include gray-brown, gray-green, tan, and golden-brown. A few marks on the portrait were grade-limiting factors. NGC has awarded higher numeric grades to only 66 examples (8/13). NGC ID# 2449, PCGS# 5792

**1932-S Quarter, MS65
Two-Tone Obverse**

- 4199 1932-S MS65 PCGS.** The obverse fields are divided almost in two between the pearl-gray covering the left side and portrait and the right side's yellow-green hue. The reverse offers a faint echo of the latter color on its own right side. This first-year key date is rare any finer; PCGS has graded just four coins as MS66 or better (8/13). NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter, MS65
Important First-Year Key**

- 4200 1932-S MS65 PCGS.** Always in demand as a first-year mintmark type coin, the 1932-S Washington quarter also claims the lowest business-strike mintage of the series at 408,000 pieces. This delightful Gem exhibits sharply detailed design elements and vibrant mint luster, under delicate shades of pale gold toning. PCGS has graded four numerically finer examples (8/13). NGC ID# 2449, PCGS# 5792

- 4201 1934 Light Motto MS67 PCGS. CAC. FS-401.** Pale pink-blue peripheral toning frames pastel-yellow centers. Effusive cartwheel luster makes this second-year quarter an eye-catcher. Population: 6 in 67, 0 finer (8/13). NGC ID# 244A, PCGS# 5794

**1934 Medium Motto Quarter, MS67+
Strong Outer Patina**

- 4202 1934 Medium Motto MS67+ PCGS. CAC. FS-402.** Legible but not bold, the motto on this second-year Washington quarter finds a happy medium. Yellow, peach, silver, and blue shadings stand out on this well-defined coin that is carefully preserved even by Superb Gem standards. Population: 84 in 67 (6 in 67+), 1 finer (8/13). NGC ID# 244A, PCGS# 5793

- 4203 1934-D Heavy Motto MS66 PCGS. CAC.** The Medium Motto and Heavy Motto varieties have been known for a long time, but have only recently gained in popularity. The Heavy Motto pieces are elusive in high grades. This Premium Gem has brilliant and frosty silver luster with pristine white surfaces and a hint of delicate gold toning. Population: 18 in 66 (2 in 66+), 3 finer (8/13). PCGS# 85796

- 4204 1935-D MS66+ PCGS.** Faint toning appears on this Premium Gem example that received a plus designation due to the strong eye appeal it possesses. The toning includes shades of champagne-gold and peach along with a few tiny freckles of gray. Portions of the extreme outer edges lack definition. Very few abrasions are present. Population: 2 in 66+, 15 finer (8/13). NGC ID# 244E, PCGS# 5798

- 4205 1936-D MS66 PCGS.** Yellow-to-orange patina overall with tinges of blue-violet on the margins. Though a touch softly struck on the portrait, this Premium Gem's all-around eye appeal is grand. NGC ID# 244H, PCGS# 5801

- 4206 1936-D MS66+ PCGS. CAC.** While the 1932-D and S issues are traditionally labeled the key dates in the Washington quarter series, the 1936-D is also elusive. This Premium Gem is an exquisite specimen with hints of gold toning over its pristine white surfaces. The obverse is prooflike and the reverse is satiny. PCGS has only certified 12 finer examples (8/13). NGC ID# 244H, PCGS# 5801

**1936-S Washington Quarter, MS67
Better Date in High Grade**

- 4207 1936-S MS67 PCGS.** From a low mintage of 3.8 million pieces, the 1936-S Washington quarter is definitely rare at the MS67 level. This spectacular Superb Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show light traces of sea-green toning. Population: 27 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 244J, PCGS# 5802

- 4208 1937 MS67 PCGS.** Frosty luster resides on the well struck surfaces of this Superb Gem. A couple of ticks on each side might prevent an even finer grade. Population: 60 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 244K, PCGS# 5803

- 4209 1937 MS67 PCGS.** Most of the early Philadelphia issues in the Washington quarter series are plentiful up to MS66 and scarce in higher grades. This Superb Gem has frosty silver-white surfaces with full mint brilliance and a trace of gold toning. Population: 60 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 244K, PCGS# 5803

- 4210 1937 MS67 PCGS.** Delicate gold toning appears on the frosty surfaces of this lustrous Superb Gem. An exquisite example for the connoisseur. Population: 60 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 244K, PCGS# 5803

- 4211 1937 MS67 PCGS Secure. CAC.** Frosty silver luster and a bold strike over pristine surfaces contribute to the high eye appeal on this top-grade 1937 quarter. Population: 60 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 244K, PCGS# 5803

- 4212 1938 MS67 PCGS.** Wisps of soft bluish color makes occasional visits to the margins of this well struck Superb Gem. Both sides have been nicely cared for. Population: 42 in 67 (3 in 67+), 0 finer (8/13). NGC ID# 244N, PCGS# 5806

4213 1938 MS67 PCGS. An exceptional Superb Gem, this 1938 quarter has frosty silver luster beneath delightful iridescent toning. Population: 42 in 67 (3 in 67+), 0 finer (8/13). NGC ID# 244N, PCGS# 5806

4214 1938 MS67 PCGS. CAC. The 1938 is considered a key issue among early Philadelphia Mint Washington quarters. This Superb Gem exhibits frosty silver-white luster with fully brilliant, untoned surfaces. Population: 42 in 67 (3 in 67+), 0 finer (8/13). NGC ID# 244N, PCGS# 5806

**1939-S Washington Quarter, MS67
None Finer at PCGS**

4215 1939-S MS67 PCGS. At just 2.6 million pieces, the 1939-S Washington quarter claims the fourth-lowest business-strike mintage of the series. Examples in MS67 condition are quite rare. This delightful Superb Gem offers razor-sharp definition on the design elements and especially vibrant mint luster. Population: 32 in 67, 0 finer (8/13). NGC ID# 244T, PCGS# 5810

**1939-S Quarter, MS67
Tied for Finest Certified**

4216 1939-S MS67 PCGS. CAC. The bright obverse of this Superb Gem example includes splashes of dark toning, including shades of brown, gold, and kelly green. Tiny areas of color appear on the reverse, primarily at the rims. Frosty satin luster is present on both sides. The 1939-S Washington quarter is seldom encountered at the MS67 level, and the issue is unknown in higher numeric grades at either grading service, with the PCGS Population standing at 32 in 67, 0 finer (8/13). NGC ID# 244T, PCGS# 5810

**1940 Quarter, MS67+
Broadly Lustrous**

4217 1940 MS67+ PCGS. CAC. Silver-gray and gold-orange shadings enrich each side in a loose concentric pattern that ends with reddish dots and lines near the rims. The portrait's hair detail is soft, though the eagle's tiny feathers on the breast are more visible than usual. PCGS has graded only one example as MS68 or finer (8/13). NGC ID# 244U, PCGS# 5811

4218 1940-D MS67 PCGS. Brilliant, original mint frosty appears on both sides of this lovely Superb Gem that is characterized by a bold strike and exceptional eye appeal. Population: 26 in 67, 0 finer (8/13). NGC ID# 244V, PCGS# 5812

4219 1941-D MS67 PCGS. CAC. The 1941-D Washington quarter is a relatively common issue up through Gem and Premium Gem levels, but at the Superb Gem rank, the population thins dramatically. Rich satin luster provides this piece with an attractive overall appearance. Small splashes and freckles of golden-brown and gray toning appear on both sides of this Superb Gem example along with areas of champagne toning. Population: 24 in 67 (5 in 67+), 1 finer (8/13). NGC ID# 244Y, PCGS# 5815

4220 1943-S MS67 PCGS. CAC. Large S. A fully brilliant and thoroughly lustrous Superb Gem. Crisply struck and pristine with outstanding eye appeal. Though a number of rolls were set aside, few pieces can match the present quality. Population: 42 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 2457, PCGS# 5822

4221 1944-D MS67 PCGS. CAC. The PCGS Population Report tells the story of this issue, with nearly 1,500 pieces certified in MS65 and MS66, and less than 100 in MS67 and only one MS68. This example has amazing frosty mint luster with hints of gold and iridescent toning. Population: 86 in 67 (5 in 67+), 1 finer (8/13). NGC ID# 2459, PCGS# 5825

4222 1944-D MS67 PCGS. CAC. Both sides of this Superb Gem example display splashes of dark toning. The shades include red, bright yellow, olive-green, dark gray, golden-brown, and dark blue-green. The coin is virtually free of abrasions. A few tiny die cracks are present. Population: 86 in 67 (5 in 67+), 1 finer (8/13). NGC ID# 2459, PCGS# 5825

**1944-S Quarter, MS67+
Lightly Toned Beauty**

4223 1944-S MS67+ PCGS. CAC. Soft blue and gold accents grace this subtly sparkling MS67+ quarter. Though the waves of Washington's wig are soft, as often seen on earlier San Francisco quarter issues, the eagle's breast feathers are better-defined than usual. Population: 99 in 67 (7 in 67+), 3 finer (8/13). NGC ID# 245A, PCGS# 5826

4224 1945 MS67 PCGS. CAC. An overlooked issue due to a substantial mintage of more than 74 million pieces, the 1945 is underrepresented at the Superb Gem grade level. This example displays light toning in a variety of colors, including peach, ice-blue and yellow on the obverse. The more colorful reverse exhibits olive-green, peach, red, and orange-brown. Population: 20 in 67, 1 finer (8/13). NGC ID# 245B, PCGS# 5827

**1948-S Washington Quarter, MS67+
Only One Finer Coin at PCGS**

4225 1948-S MS67+ PCGS. CAC. This high-end Superb Gem is sharply detailed throughout, with vibrant mint luster on both sides. As expected from the grade, the well-preserved surfaces show no mentionable signs of contact and the obverse displays attractive shades of sea-green and lavender toning. Population: 56 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 245N, PCGS# 5838

4226 1949-D MS67 PCGS. CAC. Boldly toned reddish-orange through the centers with plum toning at top and bottom on each side. A fantastically lustrous Superb Gem from an underrated issue. Population: 34 in 67 (2 in 67+), 2 finer (8/13). NGC ID# 245R, PCGS# 5840

**1949-D Washington Quarter, MS67+
Extremely Rare Any Finer**

4227 1949-D MS67+ PCGS. CAC. The 1949-D Washington quarter claims a mintage of more than 10 million pieces, making the date readily available at the Gem level. Higher grades are scarce, and the issue is extremely rare above MS67. This high-end Superb Gem is sharply detailed and lustrous, with vivid shades of sea-green and lavender-gray toning. Population: 34 in 67 (2 in 67+), 2 finer (8/13). NGC ID# 245R, PCGS# 5840

**1950-S/D Washington Quarter, MS66
Popular Overmintmark, FS-501**

4228 1950-S/D MS66 PCGS. CAC. FS-501. One of the most popular and interesting Washington quarter varieties, FS-501 shows the undertype of the original D plainly below the primary S mintmark. This well-detailed Premium Gem is brightly lustrous, under delicate shades of champagne-gold toning. Population: 32 in 66 (1 in 66+), 4 finer (8/13). NGC ID# 245V, PCGS# 5845

4229 1951-D MS67 PCGS. CAC. Rich satin luster adds to the attractiveness of this lovely Superb Gem example. The coin displays a light champagne patina with tiny flyspecks of gray. Thin die cracks are found near the top of Washington's head and across the eagle's face. Population: 23 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 245X, PCGS# 5847

4230 1951-D MS67 PCGS. CAC. Potent satin luster and brilliant surfaces provide this Superb Gem representative with a strong degree of visual appeal. Subtle almond-gold toning is present. Population: 23 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 245X, PCGS# 5847

**1951-S Quarter, MS67+
Frosty Luster, Dark Peripheral Toning**

4231 1951-S MS67+ PCGS. CAC. The 1951-S Washington quarter is a plentiful issue in Gem condition, but Superb Gems are rare and finer coins are virtually unobtainable. This high-end Superb Gem is well-detailed, with deeply frosted mint luster and dark crescents of sea-green and amber toning at the peripheries. PCGS has graded only one numerically finer example (8/13). NGC ID# 245Y, PCGS# 5848

4232 1953 MS67 PCGS. CAC. Toning appears at the outer edges of the obverse and covers large portions of the reverse. The colors include golden-brown, orange, yellow-green, olive-green, golden-yellow, cherry-red, and rose-gold. A horizontal die crack is present near the top of Washington's head. Population: 54 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 246A, PCGS# 5852

4233 1962 MS67 PCGS. Type A Reverse. Ideal for the competitive Registry Set, the present brilliant Superb Gem provides sweeping luster and a good strike. A solitary obverse field graze near 3 o'clock determines the grade. Population: 13 in 67, none finer (8/13). NGC ID# 246P, PCGS# 5872

4234 1970 MS67 PCGS. An attractive well preserved Superb Gem Washington quarter; this piece exhibits only faint traces of toning. Minor incompleteness of strike is noted at portions of the extreme outer edges. Population: 13 in 67, 0 finer (8/13). NGC ID# 2475, PCGS# 5885

**1972-D Washington Quarter, MS68
Tied With Three Others As Finest Known at PCGS**

4235 1972-D MS68 PCGS. Prooflike surfaces provide this brilliant high-end representative with strong eye appeal. Subtle hints of light ice-green and ice-blue toning are present. A tiny mark appears across the M in UNUM. This coin will no doubt garner strong attention from Registry Set collectors. Population: 4 in 68, 0 finer (8/13). NGC ID# 247A, PCGS# 5890

- 4236 1973 MS67 PCGS.** Mint State examples of the 1973 quarter are readily available through MS66, but rarely found any finer. This Superb Gem has satin luster and bold details with excellent eye appeal. Population: 10 in 67, 0 finer (8/13). NGC ID# 247B, PCGS# 5891

PROOF WASHINGTON QUARTERS

- 4237 1936 PR65 NGC.** After a hiatus of two decades, the Mint resumed proof set offerings in 1936. This attractive Gem is sharply detailed, with deeply reflective fields and a few hints of golden-tan toning. NGC ID# 27HN, PCGS# 5975
- 4238 1936PR65NGC.** A Gem representative of the first proof Washington quarters, the 1936 issue consisted of only 3,837 pieces. This pleasing example is well struck and displays moderately reflective fields, with light toning that includes shades of gray and golden-brown. *From The Joan Carroll Collection.* NGC ID# 27HN, PCGS# 5975
- 4239 1936 PR66 NGC.** A first-year proof Washington quarter with watery reflectivity around modestly frosted devices. The eagle's breast feathers are indistinct but visible. NGC has graded just 20 coins as PR67 or finer (8/13). NGC ID# 27HN, PCGS# 5975

1953 Quarter, PR66 Re-Engraved Tail Feathers, FS-901

- 4240 1953 Re-Engraved Tail Feathers PR66 PCGS. FS-901.** Cherrypickers' states "many of the tailfeather details were polished away ... The design was then strengthened by the cutting in of crude tailfeather outlines." A flawless and flashy specimen with lightly dappled apple-green, peach-gold, and lilac toning. PCGS# 509995
- 4241 1958 PR68 Deep Cameo PCGS.** Proof 1958 Washington quarters were produced in a quantity of 875,652 pieces. Very few coins are able to surpass the quality and appeal of this wonderful example, as evidenced by the population data. This coin displays tremendous eye appeal. Two tiny as-made strike-throughs appear near IN GOD WE TRUST. Population: 23 in 68 Deep Cameo, 5 finer (8/13). NGC ID# 27J4, PCGS# 95990
- 4242 1959 PR68 Cameo PCGS.** Essentially untoned and impressively contrasted, though the frost is a touch too light for a Deep Cameo designation. PCGS has graded just nine numerically finer Cameo specimens (8/13). NGC ID# 248Z, PCGS# 85991

WALKING LIBERTY HALF DOLLARS

- 4243 1916 MS64 NGC.** Hints of gold appear on this well struck near-Gem representative exhibiting a pronounced matte-like texture. Adding to the appeal, this coin displays minimal abrasions. *From The Joan Carroll Collection.* NGC ID# 24PL, PCGS# 6566
- 4244 1916-D MS65 NGC. FS-501.** The mintmark is nicely repunched southwest. The variety is undesignated on the insert. Light chestnut-gold and gunmetal-gray toning visits this well preserved, lustrous, and boldly struck Gem. NGC ID# 24PM, PCGS# 6567

- 4245 1916-D MS65 NGC.** Rolling luster filters through layers of silver-gray, pink, and violet. A pleasing first-year Gem from an issue of just over a million examples. NGC ID# 24PM, PCGS# 6567

1916-D Half Dollar, MS66 Obverse Mintmark Subtype

- 4246 1916-D MS66 PCGS.** Liberal, scattered splashes of teal toning are present on both sides of this Premium Gem, particularly on the obverse. The reverse also includes russet and plum-brown color. The level of design detail is pleasing and the coin displays attractive luster. Population: 59 in 66 (1 in 66+), 3 finer (8/13). NGC ID# 24PM, PCGS# 6567
- 4247 1916-S AU58 NGC.** Bold peach, blue, and violet shadings dapple into each other on this faintly rubbed yet strongly lustrous Walking Liberty half dollar. A touch of the usual striking softness affects the eagle's forward leg. NGC ID# 24PN, PCGS# 6568
- 4248 1916-S — Improperly Cleaned — NGC Details. Unc.** This lustrous first year and low mintage Walker displays faint almond-gold toning. Both sides are remarkably devoid of abrasions. The strike is good, though the central skirt lines show slight blending. Careful rotation reveals obverse hairlines. *From The Joan Carroll Collection.* NGC ID# 24PN, PCGS# 6568

1916-S Half Dollar, MS64 Distinctive Toning

- 4249 1916-S MS64 PCGS. CAC.** Orange, gold-gray, and steel-blue overtones mingle on this near-Gem, more obviously on the obverse though still strongly on the reverse. Liberty's head has pleasing detail, though her branch hand and the eagle's legs show softness. This first-year San Francisco issue saw a mintage of only 508,000 pieces, according to its semikey status. NGC ID# 24PN, PCGS# 6568
- 4250 1917 MS65 PCGS.** The well-detailed design elements show a touch of softness at the centers and the well-preserved surfaces display vibrant mint luster under shades of gold, pink, and lavender toning. NGC ID# 24PP, PCGS# 6569
- 4251 1917 MS65 PCGS. CAC.** While the mintmarked Walker issues of 1917 come in two varieties, the Philadelphia pieces have no such distinction. This brilliant Gem displays delicate patina in shades of champagne, gold, and rose-red. The reverse is particularly attractive and is virtually pristine. *From The Strawberry Fields Collection.* NGC ID# 24PP, PCGS# 6569

- 4252 1917-D Reverse MS62 PCGS.** Silver-white through the centers with pale golden-tan at much of the margins. A plum patch touching Liberty's hand and the flag provides a highly visible exception. This second variety for the 1917-D half has a mintage of fewer than 2 million pieces. NGC ID# 24PS, PCGS# 6571
- 4253 1917-D Reverse MS62 PCGS.** Richly toned copper-orange and wine shades with generous underlying luster. Though softly struck on the head and branch hand, this piece has fewer obvious abrasions than might be expected for an MS62 coin. NGC ID# 24PS, PCGS# 6571
- 4254 1917-S Reverse MS63 PCGS.** Lovely champagne toning is present on this Select example, along with a few tiny freckles of dark gray and green. The freckles are largely confined to the reverse. This is a pleasing coin. NGC ID# 24PU, PCGS# 6573
- 4255 1918-D AU55 PCGS.** Areas of light golden-brown toning appear on this Choice AU example, primarily on the obverse. Wear is confined to the high points and there are no marks worthy of mention. This is a pleasing example for the grade. NGC ID# 24PW, PCGS# 6575
- 4256 1918-D AU58 PCGS.** Areas of gold and peach toning are present on both sides of this near-Mint example, while the obverse reveals subtle hints of green and blue. Pleasing satiny mint luster remains. A die break is present at the rim near 9 o'clock on the obverse. NGC ID# 24PW, PCGS# 6575
- 4257 1920 MS64 PCGS.** A lovely, minimally abraded near-Gem representative, this coin is virtually untoned and has nice eye appeal. Appealing luster is present. NGC ID# 24R3, PCGS# 6580
- 4258 1921 XF40 NGC.** Rose-gray color on both sides, along with small splashes of gold, provides this representative with an attractive appearance. Wear is largely confined to the high points of the designs and there are no contact marks worthy of mention. The early 1920s recession sharply reduced coinage for the half dollar denomination. Philadelphia struck only 246,000 pieces, and the economic hardship limited the number saved by collectors. NGC ID# 24R6, PCGS# 6583

**1921-D Half Dollar, Unc Details
Low-Mintage, Key-Date Issue**

- 4259 1921-D — Improperly Cleaned — NGC Details. Unc.** The 1921-D is the lowest mintage in the circulation strike Walking Liberty half dollar series and is coveted in all grades, including those with impairments. This Unc Details specimen is retoning to a light golden-tan. Its design elements are generally well-struck, including partial definition on the thumb of Liberty's branch hand and sharpness on the eagle's breast feathers. Both sides are free of mentionable abrasions.
- 4260 1921-S VF30 PCGS.** A completely original pewter-gray specimen of this important issue in the series, this piece includes scattered areas of golden toning on both sides. Even wear and a lack of significant abrasions adds to the desirability of this lovely representative. NGC ID# 24R8, PCGS# 6585
- 4261 1927-S AU58 NGC.** Champagne and golden-brown toning are present on this near-Mint representative along with a few tiny flyspecks of darker color. Pleasing luster adds to the eye appeal. This piece exhibits the typical strike with weakness at the centers. NGC ID# 24RA, PCGS# 6587

- 4262 1929-D MS64 NGC.** Attractive toning and pleasing luster provide this near-Mint example with a strong degree of visual appeal. The colors include shades of gold and orange, along with scattered light spots of lilac and ice-silver. NGC ID# 24RC, PCGS# 6589
- 4263 1929-D MS64 PCGS.** Pleasing luster adds to the eye appeal of this near-Gem example exhibiting a light wheat-gold patina. A few translucent spots appear in the left obverse field. A few marks and grazes are present in the right obverse field.
Ex: ANA Phoenix Signature (Heritage, 3/2008), lot 763. NGC ID# 24RC, PCGS# 6589

1929-S Half Dollar, Lustrous MS65+

- 4264 1929-S MS65+ PCGS.** Both sides of this high-end Gem Walker display excellent frosty mint luster and each is devoid of distracting marks. The strike is typical for the issue; that is, it shows incompleteness of detail over Liberty's right (facing) hand, head, and the eagle's trailing leg. The breast feathers are fairly strong, however. All in all, this is a very nice specimen for a high-grade Walking Liberty collection. Population: 2 in 65+, 42 finer (8/13). NGC ID# 24RD, PCGS# 6590
- 4265 1933-S MS64 PCGS.** Small splashes of russet color are present on this near-Gem example, primarily on the obverse. A few streaks of milky patina also appear. Nice luster and a pleasing strike add to the appeal of this piece. NGC ID# 24RE, PCGS# 6591
- 4266 1933-S MS64 PCGS.** Rich satin luster provides this near-Gem with nice eye appeal. Areas of light toning are present, primarily on the reverse. The colors include shades of gold, yellow, and peach. The left obverse field displays a few grazes. NGC ID# 24RE, PCGS# 6591

**1933-S Walking Liberty Half, MS65
Strong Visual Appeal**

- 4267 1933-S MS65 PCGS.** A Gem with a strong degree of visual appeal, this piece remains brilliant with only the slightest hint of toning at portions of the upper obverse. Rich luster and a bold strike are additional attributes this coin possesses. A wonderful representative from the first issue since the 1929-S, and the last before the more-elusive 1920s coins gave way to the "Short Set" issues of 1934-47-PDS. NGC ID# 24RE, PCGS# 6591

**1933-S Walking Liberty Half, MS65
Sharply Detailed and Lustrous**

4268 1933-S MS65 NGC. This sharply detailed Walking Liberty half dollar shows emerging detail on Liberty's head, wreath hand, and other usual trouble spots. The well-preserved surfaces radiate vibrant mint luster and traces of pale gold toning enhance the outstanding visual appeal. NGC ID# 24RE, PCGS# 6591

4269 1934-D MS66 PCGS. Dotted blue-violet toning at the obverse margins gives way to the pale silver-and-gold scheme visible elsewhere on this Premium Gem. Brightly lustrous with a sharp branch hand as one of its many delights. NGC ID# 24RG, PCGS# 6593

4270 1934-S MS64 NGC. A pleasing level of design detail adds to the eye appeal of this brilliant, lustrous, untuned near-Gem example. The 1934-S is the scarcest of the Middle Date issues in the Walking Liberty series from 1934 through 1940. NGC ID# 24RH, PCGS# 6594

4271 1934-S MS64 PCGS. The 1934-S is the scarcest of the Middle Date issues in the Walking Liberty series from 1934 through 1940. Appealing pewter color along with hints of violet provide this near-Gem with a strong level of visual appeal. Darker gray accents appear at portions of the outer edges, primarily on the reverse. NGC ID# 24RH, PCGS# 6594

4272 1934-S MS64+ NGC. Even a quick glance at this lovely piece reveals why this coin received the Plus designation, as the eye appeal is strong. Gleaming surfaces, strong luster, and a pleasing level of design detail are among the attributes this high-end near-Gem possesses. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65
Delicate Gold Accents**

4273 1934-S MS65 PCGS. Delicate antique-gold accents grace this frosty silver-white Gem. While a touch of striking softness is noted on Liberty's head and branch hand, the all-around eye appeal is strong for the grade, which is due to wispy abrasions rather than any individually significant marks. NGC ID# 24RH, PCGS# 6594

**1935 Half Dollar, MS67
Only One Numerically Finer**

4274 1935 MS67 PCGS. Although the 1935 is not known as a rarity in the Middle Series of Walkers, relatively few pieces have been certified at this Superb Gem grade level. This highly lustrous example remains brilliant and untuned, providing a strong degree of eye appeal. Population: 35 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 24RJ, PCGS# 6595

4275 1935-D MS65 PCGS. Gleaming, lustrous surfaces provide this Gem with a strong degree of visual appeal. Subtle hints of peach, apricot, and tan color are present. NGC ID# 24RK, PCGS# 6596

4276 1935-S MS64 PCGS. This untuned near-Gem is well preserved and lustrous, with the typical incompleteness of strike on the high points. The 1935-S is the scarcest of the three issues for the date. NGC ID# 24RL, PCGS# 6597

4277 1935-S MS65 PCGS. Strikingly toned pearl-gray and golden-tan with peripheral patches of metallic violet. Softly struck on Liberty's branch hand but all-around appealing. NGC ID# 24RL, PCGS# 6597

**1935-S Walking Liberty Half, MS66
Only Three Numerically Finer Coins at NGC**

4278 1935-S MS66 NGC. Sharply detailed except for the touch of softness always seen on Liberty's wreath hand, this spectacular Premium Gem displays intense satiny mint luster under attractive shades of pale gold toning. Eye appeal is extraordinary. Census: 46 in 66 (1 in 66+), 3 finer (8/13). NGC ID# 24RL, PCGS# 6597

4279 1936-S MS66 PCGS. Tiny areas of toning are present at the outer edges of both sides of this Premium Gem. Rich satin luster provides this piece with strong degree of eye appeal. The obverse reveals numerous as-made die polish lines. PCGS has awarded higher numeric grades to only 8 examples (8/13). NGC ID# 24RP, PCGS# 6600

4280 1936-S MS66 PCGS. This Great Depression half dollar possesses potent luster and light chestnut-gold toning. The strike is sharp except on the central skirt lines. Encapsulated in a green label holder. NGC ID# 24RP, PCGS# 6600

4281 1937 MS67 PCGS. CAC. Pale silver-blue overall with a glimpse of gold in the right obverse field. Well-defined on Liberty's branch hand and all-around pleasingly preserved. PCGS has graded just three coins as MS68 or better (8/13). NGC ID# 24RR, PCGS# 6601

4282 1937-D MS66 PCGS. Toning varies from near-invisible on the silver-white areas to plainer gold and orange hues, the last mostly on the reverse. Small abrasions just below the softly struck branch hand contribute to the grade. NGC ID# 24RS, PCGS# 6602

4283 1937-D MS66 PCGS. CAC. Light champagne and tan toning is present on this Premium Gem example, with the reverse also exhibiting hints of olive-green, orange, and red. A few small gray spots appear as well. Examples are conditionally scarce at the higher grade levels, with PCGS having awarded higher numeric grades to only 41 examples (8/13). NGC ID# 24RS, PCGS# 6602

4284 1938 MS67 PCGS. CAC. A lustrous Superb Gem, this piece displays smooth and carefully preserved surfaces beneath a patina that includes yellow-tan and icy blue-green color. Small splashes of golden-brown are also present. Population: 70 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 24RU, PCGS# 6604

4285 1938-D MS65 PCGS. CAC. Popular for its uncommonly low mintage, the 1938-D is nonetheless affordable in Gem quality. This lovely Gem remains silver overall, with areas of golden-brown toning present at portions of the outer edges, primarily on the obverse. NGC ID# 24RV, PCGS# 6605

1938-D Half Dollar, MS66+ Luminous Surfaces

4286 1938-D MS66+ PCGS. CAC. Light gold, rose, and violet interior toning with an arc of deeper orange at the top left obverse. Luminous with decent detail on Liberty's head, though her branch hand is more typically soft. The 1938-D is an under-the-radar half dollar issue despite a mintage of fewer than half a million pieces. PCGS has graded just 33 examples as MS67 or finer (8/13). NGC ID# 24RV, PCGS# 6605

4287 1939-S MS67 PCGS. CAC. This sharply detailed Superb Gem displays vibrant mint luster on both sides and the completely brilliant surfaces are free of mentionable distractions. PCGS has graded no coins in higher numeric grades (8/13). NGC ID# 24RY, PCGS# 6608

4288 1940-S MS66+ PCGS. CAC. The plus designation confirms the superior eye appeal of this lovely Premium Gem example. Attractive champagne patina covers all but the top portion of the obverse. The mint luster is outstanding. Population: 32 in 66+, 7 finer (8/13). NGC ID# 24S2, PCGS# 6610

4289 1941 MS67+ PCGS. CAC. An attractive patina in shades of amber, russet, and copper-gold rings large portions of the reverse rim. The obverse reveals tiny splashes of color, primarily at the outer edges. Rich luster and largely untuned centers provide this piece with nice eye appeal. Population: 29 in 67+, 15 finer (8/13). NGC ID# 24S3, PCGS# 6611

1941 Walking Liberty Half, MS68 None Certified Finer

4290 1941 MS68 NGC. What a pleasure it is to examine this remarkable half dollar. The nearly perfect surfaces show pinpoint striking definition and there is just a slight degree of peripheral toning present, including a faintly perceptible arc of rainbow coloration near the left obverse border. There are certainly no distractions on either side of the piece, and a beautiful satiny sheen perfectly highlights the nearly immaculate fields and devices. A splendid example of one of the best-produced issues in the entire series, in a state of preservation that has never been exceeded. Census: 18 in 68, 0 finer (8/13).

Ex: Dallas Signature (Heritage, 10/2006), lot 2121; Long Beach Signature (Heritage, 9/2008), lot 975; Central States Signature (Heritage, 4/2009), lot 2883. NGC ID# 24S3, PCGS# 6611

4291 1941-D MS67 PCGS. This magnificent Superb Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster on both sides. PCGS has graded one numerically finer example (8/13). NGC ID# 24S4, PCGS# 6612

4292 1941-S MS66 PCGS. This well-detailed Premium Gem exhibits a touch of the usual softness on Liberty's wreath hand. The pristine surfaces are brightly lustrous, with a few hints of golden-tan toning. PCGS has graded seven numerically finer examples (8/13). NGC ID# 24S5, PCGS# 6613

4293 1943-S MS66+ PCGS. CAC. FS-101. Large S. IN GOD WE TRUST is die doubled, as frequently seen on 1943-dated half dollars. Fully brilliant and highly lustrous with minimal marks and a typical strike. NGC ID# 24SB, PCGS# 6620

4294 1944 MS67 PCGS. Only the faintest hint of toning is present on this brilliant and lustrous Superb Gem representative. The coin exhibits a pleasing strike. Population: 75 in 67 (3 in 67+), 1 finer (8/13). NGC ID# 24SC, PCGS# 6621

4295 1944 MS67 PCGS. CAC. This short-set Superb Gem shows a surprising level of separation on the branch hand. Gold-tinged surfaces are smooth with rolling semifrosted luster. Population: 75 in 67 (3 in 67+), 1 finer (8/13). NGC ID# 24SC, PCGS# 6621

4296 1944 MS67 PCGS. CAC. Intermingled shades of toning blanket the obverse while the reverse is virtually free of toning on this lovely Superb Gem example. The colors include golden-green, green-brown, apple-green, cherry-red, and orange. A few tiny scattered abrasions are present. Population: 75 in 67 (3 in 67+), 1 finer (8/13). NGC ID# 24SC, PCGS# 6621

**1944-S Half Dollar, MS66+
Above-Average Strike**

- 4297 1944-S MS66+ PCGS. CAC.** The 1944-S Walker is readily available through the Gem level of preservation. The certified population drops significantly at the Premium Gem level. PCGS has seen only 36 high-end Premium Gems and just five pieces finer. The current MS66+ example displays vibrant luster and impeccably preserved surfaces. The design elements are somewhat better struck than typically seen on this strike-rarity issue. Specifically, Liberty's branch hand and the eagle's breast feathers exhibit a modicum of detail NGC ID# 24SE, PCGS# 6623
- 4298 1944-S MS66+ PCGS. CAC.** Large S. Faint chestnut-gold toning visits this thoroughly lustrous and impressively smooth Premium Gem. The 1944-S is notoriously difficult to acquire well struck but the present piece shows only moderate softness on the branch hand. NGC ID# 24SE, PCGS# 6623
- 4299 1945 MS67 PCGS. CAC.** This splendid coin is among the finest known, as neither PCGS nor NGC has awarded a higher numeric grade to a single example (8/13). A few tiny scattered areas of light toning are present on this lustrous piece. NGC ID# 24SF, PCGS# 6624
- 4300 1945-S MS66+ PCGS. CAC.** Knob S. Frosty silver with just a hint of a golden overtone and modest blue-violet touches at the top of the reverse. The strike is typically soft on the branch hand but the skirt lines are sharp. NGC ID# 24SH, PCGS# 6626
- 4301 1945-S MS66+ PCGS. CAC.** Knob S. A lustrous and minimally toned Premium Gem with immaculate fields and only minor contact on the eagle and rock. The cheek is nicely struck though the branch hand is incomplete. NGC ID# 24SH, PCGS# 6626
- 4302 1945-S MS66+ PCGS. CAC.** Knob S. Lush forest-green, plum-mauve, and tan-gold toning encompasses this lustrous San Francisco half. The branch hand is softly defined though the remainder of the strike is crisp. The right obverse field exhibits minor grazes. NGC ID# 24SH, PCGS# 6626
- 4303 1945-S MS66+ PCGS. CAC.** Knob S. Beautifully toned with concentric bands of aquamarine, rose-red, and olive-gold at the margins. A lustrous wartime Walker with the expected incompleteness of impression on the branch hand. A lens reveals a couple of thin marks and grazes. NGC ID# 24SH, PCGS# 6626

**1946 Half Dollar, MS67
Lightly Toned**

- 4304 1946 MS67 PCGS. CAC.** This Superb Gem of the penultimate Philadelphia Walking Liberty half dollar issue has a crisp branch hand to go with above-average details on the head. A partial golden overtone takes on aspects of aqua at the right reverse. Great all-around eye appeal. Population: 45 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 24SJ, PCGS# 6627
- 4305 1946 MS67 NGC. CAC.** Razor-sharp definition is evident on all the design elements and this spectacular Superb Gem displays especially vibrant mint luster throughout. Census: 40 in 67, 0 finer (8/13). NGC ID# 24SJ, PCGS# 6627
- 4306 1946 Doubled Die Reverse MS63 NGC. FS-801.** Bold doubling on the eagle's feathers makes this late-date Walker variant a fixture in the *Guide Book*. Russet-brown toning visits the margins though the remainder of the coin is nearly brilliant. Lustrous and nicely struck with only minor marks for the designated grade.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2147, which realized \$632.50. PCGS# 6632
- 4307 1946 Doubled Die Reverse MS65 PCGS. CAC. FS-801.** The only Walking Liberty die variety listed in the *Guide Book*, FS-801 is underrated relative to its scarcity and significance. This lustrous and nicely struck Gem has unmarked surfaces and peripheral gold and lime patina. Population: 16 in 65, 6 finer (8/13). PCGS# 6632
- 4308 1946-S MS67 NGC.** Knob S. A lustrous, brilliant, and virtually immaculate Superb Gem with sharp skirt lines and moderate blending on Liberty's cheek and branch hand. Census: 63 in 67, 0 finer (8/13). NGC ID# 24SL, PCGS# 6629
- 4309 1947 MS67 PCGS.** Lightly gold-toned with a great gleam beneath it. A small luster scrape is noted at the top of the obverse sun but the preservation is near-impeccable otherwise. Population: 40 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 24SM, PCGS# 6630

PROOF WALKING LIBERTY HALF DOLLARS

- 4310 1936 PR62 PCGS.** Only 3,901 Walking Liberty half dollars were produced in 1936 at the Philadelphia Mint after they resumed proof set offerings following a hiatus of two decades. Scattered, tiny flyspecks of color appear at portions of the outer edges on both sides of this PR62 example. Light marks in the fields may account for the grade. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR65+ Fully Struck First-Year Proof

- 4311 1936 PR65+ NGC.** The 1936 proof Walking Liberty, as a first-year issue, is perennially popular with collectors. This PR65+ example from NGC boasts the desired full proof strike throughout both sides, with just a touch of light patina around the rims, a totally original coin. Only a couple of small ticks in the right obverse field preclude a PR66 grade. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half, PR66 First Year for Modern Proofs

- 4312 1936 PR66 NGC.** A Premium Gem example of the first proof Walking Liberty half dollar issue to see mass release, this is one of only 3,901 specimens sold. The brilliant surfaces of this piece display barely discernible light yellow-gold and sky-blue patina. Scattered tiny freckles of golden-brown toning also appear. The devices exhibit a strong level of detail.
From The Joan Carroll Collection. NGC ID# 27V4, PCGS# 6636

- 4313 1939 PR67 NGC.** A fully struck and pristine Superb Gem of this scarce proof type. Faint canary-gold toning adorns the fields, though the high points are stone-gray. The designer's monogram was engraved by hand on the working die, similar to the 1944-D FS-901.
From The Joan Carroll Collection. NGC ID# 27V7, PCGS# 6639

1940 Walking Liberty Half, PR68 None Certified Finer

- 4314 1940 PR68 NGC.** Fully struck, with deeply reflective fields that show no mentionable distractions, this magnificent Walking Liberty half dollar possesses tremendous eye appeal and the highest available technical quality. From a mintage of 11,279 pieces. Census: 52 in 68, 0 finer (8/13). NGC ID# 27V8, PCGS# 6640

- 4315 1941 PR67 PCGS.** Silver-gleaming through lightly patinated interiors with bands of blue and gold at the margins. Gleaming fields surround the sharply struck figure of Liberty on this attractive Superb Gem. NGC ID# 24SP, PCGS# 6641

- 4316 1941 PR67+ NGC. CAC.** No AW. A high-end Superb Gem proof, from a mintage of 15,412 pieces. This magnificent specimen exhibits fully struck design elements and a deeply reflective, all-brilliant finish. NGC ID# 24SP, PCGS# 6641

1941 Walking Liberty Half, PR68 Among the Finest Known

- 4317 1941 PR68 NGC.** This incredible Walking Liberty half dollar offers fully struck design elements and reflective surfaces that show a few wisps of champagne-gold toning. Close inspection reveals no mentionable distractions and eye appeal is terrific. Census: 56 in 68, 0 finer (8/13). NGC ID# 24SP, PCGS# 6641

- 4318 1942 PR67+ NGC. CAC.** Golden accents appear mostly in the fields, leaving subtly frosted devices pale silver. Though not to a Cameo level, this piece shows appreciable contrast and great all-around appeal. NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

- 4319 1949-S MS66+ Full Bell Lines PCGS. CAC.** Rolling frosted luster under significant patina, golden-tan and violet overall with a window of pearl-gray at the central obverse, lends great eye appeal. Sharp and carefully preserved. PCGS has graded only three coins as MS67 Full Bell Lines or finer (8/13). NGC ID# 24SV, PCGS# 86655

- 4320 1950 MS66 Full Bell Lines PCGS Secure.** Spectacular shades of burnt-orange and violet-blue toning enhance the tremendous eye appeal of this remarkable Premium Gem. The design elements are sharply detailed and vibrant mint luster shines through the toning. PCGS has graded six numerically finer examples (8/13). NGC ID# 24SW, PCGS# 86656

- 4321 1952-D MS66 Full Bell Lines PCGS.** This sharply detailed Premium Gem displays Full Bell Lines definition and vibrant mint luster under shades of sea-green and lavender-gray toning. Population: 71 in 66 Full Bell Lines, 2 finer (8/13). NGC ID# 24T4, PCGS# 86662

**1957-D Franklin Half, MS67
Darkly Toned, Full Bell Lines**

- 4322 1957-D MS67 Full Bell Lines NGC.** The 1957-D Franklin half dollar was a well-produced issue, but it suffered from rough storage conditions and most examples seen have excessive bagmarks. This impressive Superb Gem is sharply detailed, with Full Bell Lines, and the well-preserved surfaces are darkly toned in shades of burnt-orange, lavender, and amber. Census: 6 in 67 Full Bell Lines, 0 finer (8/13). NGC ID# 24TF, PCGS# 86673

- 4323 1958-D MS67 Full Bell Lines PCGS. CAC.** This well-struck Superb Gem displays attractive toning on both sides. The colors include lemon-yellow, lime-green, kelly-green, fuchsia, fiery-orange, and grape, with a swath of color near the right rim of the obverse further adding to the eye appeal. Population: 33 in 67 Full Bell Lines, 0 finer (8/13). NGC ID# 24TH, PCGS# 86675

- 4324 1960 MS66 Full Bell Lines PCGS.** A brilliant, untuned Premium Gem with the desirable Full Bell Lines designation and rich luster, this piece displays strong eye appeal. A few scattered marks are present on both sides. Population: 42 in 66 Full Bell Lines, 0 finer (8/13). NGC ID# 24TL, PCGS# 86678

- 4325 1960 MS66 Full Bell Lines PCGS. CAC.** An impressive representative with the coveted full bell lines, this Premium Gem exhibits brilliant untuned surfaces and rich luster. A few small, scattered marks are present. Population: 42 in 66 Full Bell Lines, 0 finer (8/13). NGC ID# 24TL, PCGS# 86678

- 4326 1960-D MS66 Full Bell Lines PCGS.** The 1960-D Franklin half dollar is prohibitively rare in Premium Gem condition with Full Bell Lines. The obverse patina on this example is an attractive gray color when viewed from a distance, but closer examination reveals muted shades of blue, green, plum, and yellow. The slightly lighter reverse reveals more pronounced shades of yellow, gold, orange, and pink. Minor marks are present on both sides, but pose little distraction if any. Population: 20 in 66 Full Bell Lines, 0 finer (8/13). NGC ID# 24TM, PCGS# 86679

PROOF FRANKLIN HALF DOLLARS

- 4327 1950 PR67 PCGS.** The first proof Franklin half dollar, this Superb Gem is a stunning beauty with essentially brilliant silver surfaces beneath delicate gold and pale blue toning. Population: 38 in 67, 0 finer (8/13). NGC ID# 27VA, PCGS# 6691

- 4328 1950 PR65 Cameo PCGS.** Though the fields are a touch watery, the uncommonly strong frost on Franklin's portrait and the Liberty Bell makes for pleasing contrast. Faintly gold-toned and attractive. Population: 99 in 65 Cameo, 35 finer (8/13). NGC ID# 27VA, PCGS# 86691

**1951 Franklin Half Dollar, PR65
Rare Deep Cameo Example**

- 4329 1951 PR65 Deep Cameo PCGS.** The 1951 proof Franklin half dollar is rare with Deep Cameo surfaces and most of the coins seen were struck from repolished dies. This spectacular Gem exhibits profound cameo contrast between the sharply detailed frosty design elements and the deeply mirrored fields. Population: 14 in 65 Deep Cameo, 16 finer (8/13). NGC ID# 27VB, PCGS# 96692

1952 Half Dollar, PR68 ★

- 4330 1952 PR68 ★ NGC.** White on black contrast is noticeable on both sides, though perhaps to an insufficient degree for the Cameo designation. Instead, NGC has bestowed the elusive Star designation. Crisply struck and essentially brilliant with one tiny speck on Franklin's coat. Census: 7 in 68 ★, none finer with a Star designation (8/13). NGC ID# 27VC, PCGS# 6693

- 4331 1953 PR67 ★ Cameo NGC.** Impressive frost on the motifs ensures desirable contrast with the darkly mirrored fields. Most proof 1953 halves show little or no contrast. A virtually brilliant Superb Gem. Census: 6 in 67 ★ Cameo, 1 finer as ★ Cameo (8/13). NGC ID# 27VD, PCGS# 86694

- 4332 1954 PR68 Cameo NGC. CAC.** A single dot of claret color at the base of the second T in TRUST on the obverse is the only toning of any significance on this well-contrasted specimen. Magnificently preserved. NGC ID# 27VE, PCGS# 86695

- 4333 1956 Type One PR68 Cameo PCGS.** This virtually perfect specimen features fully struck frosty design elements that contrast boldly with the deeply mirrored brilliant fields. Population: 31 in 68 Cameo, 0 finer (8/13). NGC ID# 24TV, PCGS# 86686

- 4334 1958 PR68 Cameo PCGS. CAC.** This remarkable Franklin half dollar approaches technical perfection, with deeply mirrored brilliant fields that contrast dramatically with the frosty sharply detailed design elements. Population: 53 in 68 Cameo, 1 finer (8/13). NGC ID# 27VH, PCGS# 86699

- 4335 1959 PR68 W Cameo NGC.** Both sides display impressive cameo contrast, the obverse especially. Virtually flawless fields and devices are made even more dramatic by an absence of toning and a bold strike. Specialists recognize the 1959 as the key to the Cameo series, and coins bring commensurately high prices. Ex: FUN Signature (Heritage, 1/2008), lot 2221. NGC ID# 27VJ, PCGS# 86700

- 4336 1961 PR68 Deep Cameo PCGS.** Pronounced contrast between the frosted devices and shimmering, reflective fields provides this piece with tremendous eye appeal. A sharply struck later-date Franklin proof that is sure to please. Population: 82 in 68 Deep Cameo, 1 finer (8/13).
From The Searight Collection. NGC ID# 24TZ, PCGS# 96702

**1961 Half Dollar, PR66
Doubled Die Reverse**

- 4337 1961 Doubled Die Reverse PR66 NGC. FS-801.** Remarkable die doubling on E PLURIBUS UNUM, UNITED, and other left-side legends ensures *Guide Book* inclusion of this important variety. The undisturbed surfaces exhibit moderate and attractive pumpkin-gold, ruby-red, and jade-green toning.
From The Joan Carroll Collection. PCGS# 6689

PROOF KENNEDY HALF DOLLARS

- 4338 1981-S Type Two PR70 Ultra Cameo NGC.** The 1981 proof Kennedy half dollar with Type Two mintmark is more elusive than its Type One counterpart. This technically perfect example exhibits profound cameo contrast between the deeply mirrored fields and the richly frosted devices. Census: 27 in 70 Ultra Cameo (7/13). NGC ID# 24WS, PCGS# 96822
- 4339 1981-S Type Two PR70 Ultra Cameo NGC.** A technically perfect example of this clear-mintmark variety. NGC has assigned only 27 specimens of this issue the ultimate grade (8/13). NGC ID# 24WS, PCGS# 96822

COMMEMORATIVE SILVER

- 4340 1893 Isabella Quarter MS65 NGC.** The Isabella quarter was struck on behalf of the Board of Lady Managers for the Columbian Exposition held in Chicago in 1893. This splendid Gem displays frosty luster beneath medium gold toning along with subtle violet overtones on both sides. NGC ID# 28HR, PCGS# 9220
- 4341 1893 Isabella Quarter MS65 NGC.** Attractive peripheral honey-gold, sea-green, and cherry-red toning endows this lustrous and fully struck Gem. A loupe reveals only minor field contact. Certified in a former generation holder. NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, MS66
Commemorating 'The Industry of Women'**

- 4342 1893 Isabella Quarter MS66 NGC.** Although Bertha Palmer, head of the Board of Lady Managers, would have preferred that a woman prepare the design, the art was accomplished by Charles Barber, the reverse based on a sketch by George T. Morgan. This Premium Gem nicely illustrates the design, with abundant luster shining through a thin layer of blue-gray toning. Several peripheral die cracks appear on the reverse.
Ex: Santa Clara Bullet Sale (Heritage, 11/2002), lot 2131. NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, MS66
Highly Lustrous and Sharply Struck**

- 4343 1893 Isabella Quarter MS66 PCGS.** The Isabella commemorative quarter saw an original mintage of 40,023 pieces, of which 15,909 were melted, leaving a net distribution of 24,214 coins. The majority of survivors are in Uncirculated grades through MS64. The current Premium Gem offering displays rich luster and crisply defined design features. Both sides of this lovely piece have been very well-cared for. PCGS has seen fewer than 40 examples finer (8/13). NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, MS66
Gorgeous Patina**

- 4344 1893 Isabella Quarter MS66 PCGS. CAC.** The Isabella quarters were offered at the same price as the Columbian half dollars, which makes it little wonder that so few sold. This Premium Gem with its delightful peach, plum, and blue hues has glorious underlying luster and excellent all-around appeal. PCGS has graded 38 numerically finer pieces (8/13). NGC ID# 28HR, PCGS# 9220
- 4345 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** A lightly toned and lustrous Select example of the sole silver dollar classic commemorative issue. The obverse is well preserved and the reverse displays scattered moderate marks. NGC ID# 28N8, PCGS# 9222

- 4346 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 1-B.** Shades of light gray, greenish-gold, and violet toning blanket the surfaces of this attractive Select specimen, with well-detailed design elements and strong mint luster, under the patina. *From The Strawberry Fields Collection.* NGC ID# 28N8, PCGS# 9222
- 4347 1900 Lafayette Dollar MS64 PCGS Secure. DuVall 1-B.** This satiny near-Gem would be called brilliant by many but has a whisper of tan toning. The fields are exceptionally smooth and the strike is precise, save for minor inexactness on Lafayette's boot and Washington's jaw and cheek. NGC ID# 28N8, PCGS# 9222
- 4348 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 2-C.** A sharply detailed Choice representative of the first silver dollar commemorative from a distribution total of 36,026 pieces. The lightly marked surfaces are blanketed in attractive shades of lavender, gray, blue, and champagne-gold toning, with compelling eye appeal. NGC ID# 28N8, PCGS# 9222
- 4349 1921 Alabama MS65 PCGS. CAC.** Patchwork patina on both sides includes two charcoal-gray "bars" slanting across Kilby's portrait. Silver, peach, and plum hues are found elsewhere on this softly struck Gem. NGC ID# 28HT, PCGS# 9224
- 4350 1921 Alabama MS66 PCGS.** A lovely Premium Gem representative, this piece boasts pleasing shades of peach, gold, and faint mint-green. Scattered flyspecks of gray are also present. Lustrous surfaces add to the visual appeal of this example. A small mark under IN of IN GOD WE TRUST provides minimal distraction, if any. NGC ID# 28HT, PCGS# 9224
- 4351 1921 Alabama MS66 PCGS. CAC.** Rich satin luster provides this Premium Gem example with immediate eye appeal. Scattered areas of toning are present on both sides. The predominant colors are russet and golden-brown, while more subtle hues are also appear, including champagne and light ice-green. Only 2 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 28HT, PCGS# 9224
- 4352 1921 Alabama 2x2 MS65 PCGS.** A sharply detailed Gem specimen of the popular 2x2 variant, with vibrant mint luster and delicate highlights of lavender and pale gold toning. Eye appeal is outstanding. NGC ID# 28HS, PCGS# 9225
- 4353 1936 Albany MS67 PCGS.** This Superb Gem possesses strong eye appeal. Light toning on portions of the obverse includes attractive pastel shades of green, pink, and orange. Areas of light color are also present on the reverse. NGC ID# 28HU, PCGS# 9227
- 4354 1936 Albany MS67 NGC.** Deep toning in intermingled shades of apple-green, cherry-red, golden-brown, and plum-brown are present on this spectacular Superb Gem. Well-detailed design elements and vibrant mint luster are evident beneath the toning. NGC has awarded higher numeric grades to only 5 examples (8/13). NGC ID# 28HU, PCGS# 9227
- 4355 1936 Albany MS67 PCGS. CAC.** Scattered areas of golden-brown toning are present on this Superb Gem example. The reverse also includes golden-orange, red, and bright green highlights at portions of the outer edges. PCGS has assigned a higher numeric grade to a sole example (8/13). NGC ID# 28HU, PCGS# 9227
- 4356 1936 Albany MS67 PCGS. CAC.** Intermingled toning in shades of apple-green, orange, lemon-yellow, golden-brown, cherry-red, and russet appears on both sides of this well preserved Superb Gem representative. PCGS and NGC combined have awarded higher numeric grades to only six examples (8/13). NGC ID# 28HU, PCGS# 9227
- 4357 1937 Antietam MS65 PCGS. Gold CAC.** Pastel ice-blue and straw-gold toning visits this thoroughly lustrous and crisply struck Civil War commemorative. Only minute marks emerge beneath a loupe. Encased in a first generation holder. NGC ID# 28HV, PCGS# 9229
- 4358 1937 Antietam MS67 NGC.** The frosty, unmarked surfaces exhibit varying shades of golden-russet patina, particularly near the borders. An exceptionally high grade example of this popular silver commemorative. NGC has graded 14 numerically finer examples (7/13). NGC ID# 28HV, PCGS# 9229
- 4359 1937 Antietam MS67 PCGS.** A pleasing Superb Gem example of this popular commemorative, this piece displays rich satin luster. Small areas of toning are present along portions of the obverse rim. The colors include hues of red, orange-brown, and green-brown. Tiny flecks of color appear on the reverse. NGC ID# 28HV, PCGS# 9229
- 4360 1937 Antietam MS67 PCGS. CAC.** Splashes of bright gold color are present on both sides of this Superb Gem along with a few tiny areas of orange and lime-green. The coin displays pleasing, light almond-gold color overall. NGC ID# 28HV, PCGS# 9229
- 4361 1937 Antietam MS67 PCGS. CAC.** A spectacular example, this Superb Gem displays brilliant satin luster. The piece is virtually untoned, with only a few small flecks of color appearing on the surfaces, aside from the rims. The piece is almost completely free of abrasions of any kind, and those present are minor. NGC ID# 28HV, PCGS# 9229
- 4362 1936 Arkansas PDS Set MS66 PCGS. CAC.** The coins are identically graded and each possesses a green CAC seal. They are separately encapsulated in holders bearing consecutive serial numbers. The coins have likely been together since their issue, as they exhibit similar pastel sky-blue and almond-gold toning along with narrow ruby-red and sea-green bands across the obverse margins. (Total: 3 coins) PCGS# 9240

**1937-D Arkansas Half Dollar, MS67
Only One Numerically Finer at PCGS**

- 4363 1937-D Arkansas MS67 PCGS.** Tawny gold toning and rich satin luster are present on both sides, deepening at the periphery. A few small orange, yellow, and red highlights also appear. This piece exhibits extraordinary quality for this date, as most specimens from the Mint display more signs of handling than found on this Superb Gem representative. Population: 20 in 67 (1 in 67+), 1 finer (8/13).
Ex: ANA San Francisco Signature (Heritage, 7/2005), lot 7065. NGC ID# 28J5, PCGS# 9242
-

1937-D Arkansas Half Dollar, MS67
One Numerically Finer Coin at PCGS

4364 1937-D Arkansas MS67 PCGS. CAC. A few hints of attractive lavender and sea-green toning enhance the outstanding eye appeal of this sharply detailed Superb Gem. The well-preserved surfaces display satiny mint luster and no mentionable signs of contact. Population: 20 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 28J5, PCGS# 9242

4365 1939-D Arkansas MS66 PCGS. CAC. Rich satin luster and brilliant surfaces provide this Premium Gem with exceptional visual appeal. There are only the faintest hints of toning present. The surfaces are virtually pristine. A small as-made strike-through appears above the R in LIBERTY. Only 7 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 28JB, PCGS# 9250

4366 1936-S Bay Bridge MS67 PCGS. About half of the obverse displays rich reddish-golden patina, the reverse is mostly untoned. Nary a mark is noticed on either side. Highly elusive as a Superb Gem. PCGS has graded nine numerically finer examples (7/13). Ex: *Long Beach Signature* (Heritage, 6/2000), lot 8153. NGC ID# 28JD, PCGS# 9254

4367 1935-S Boone MS67 NGC. Fully struck with a coating of creamy, opaque, beige to light-gray toning on both sides, augmented by a slight degree of speckled russet and olive patina. The impeccably preserved surfaces seem pristine. A visually pleasing Superb Gem. Census: 26 in 67, 1 finer (7/13). Ex: *FUN Signature* (Heritage, 1/2006), lot 7262. NGC ID# 28JH, PCGS# 9260

4368 1935-S Boone MS67 PCGS. Speckled patina covers large portions of both sides of this Superb Gem representative. The colors include tan, gray, olive-green, and orange. Both sides reveal more vibrant, concentrated toning at portions of the peripheries. Those shades are peach, gold, green, cherry-red, apple-green, and lemon-yellow, with the more vibrant colors appearing on the reverse. Population: 21 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 28JH, PCGS# 9260

1935/34-S Boone Half Dollar, MS67
Only Two Finer at PCGS

4369 1935/34-S Boone MS67 PCGS. This low-mintage issue consisted of 2,004 pieces and included the addition of the commemorative date 1934 above the words PIONEER YEAR, and is sometimes referred to as "1935 small 1934." Golden-gray patina is imbued with wisps of green and lilac. Well struck, with lustrous, impeccably preserved surfaces. The population data has changed little since this coin was last offered by us over five years ago, with only one additional coin having achieved the MS67 level, the population is now 17 in 67, 2 finer (8/13).

Ex: *Central States Rosemont Signature* (Heritage, 4/2008), lot 1635, which realized \$3737.50. NGC ID# 28JL, PCGS# 9264

4370 1937-D Boone MS67 NGC. The obverse is largely silver with touches of gold and rose-violet, though those colors are deeper and more broadly distributed on the reverse. Cartwheel luster is flashy at the correct angle. Census: 26 in 67, 1 finer (8/13). NGC ID# 28JS, PCGS# 9271

4371 1925-S California MS66 PCGS. Potent satin luster and rich toning that includes shades of orange, gold, rose, lemon, apple-green, jade-green, plum, and violet provide this Premium Gem with a tremendous degree of eye appeal on both sides. These coins commemorate the 75th anniversary of California statehood and feature a miner panning for gold on the obverse and a grizzly bear on the reverse. NGC ID# 28JY, PCGS# 9281

4372 1925-S California MS66 NGC. A California Premium Gem that has bold luster on each side. The well-defined obverse boasts multicolor patina heavy on the reds and yellows, while the reverse has mild champagne and silver-gray hues. From *The Strawberry Fields Collection*. NGC ID# 28JY, PCGS# 9281

4373 1925-S California MS66 PCGS. CAC. Coruscating luster on both sides provides this Premium Gem with a stunning appearance. The toning, in hues including bright pink, ice-green, yellow, ice-blue, and violet, appears on both sides. A wonderful, well preserved example. NGC ID# 28JY, PCGS# 9281

4374 1925-S California MS67 PCGS. A magnificent Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. Pleasing shades of greenish-gold and ice-blue toning visit the well-preserved surfaces, with outstanding eye appeal. Population: 92 in 67, 6 finer (7/13). NGC ID# 28JY, PCGS# 9281

4375 1925-S California MS67 PCGS. CAC. The 1925-S California half dollar claims a large distribution total of 86,394 pieces, but examples in Superb Gem condition are quite scarce today. This spectacular MS67 specimen displays vibrant mint luster under dappled shades of lavender, gray, golden-brown, and violet toning. Population: 92 in 67, 6 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 28JY, PCGS# 9281

4376 1936 Cincinnati MS66 PCGS. This well-detailed Premium Gem displays satiny mint luster under shades of golden-tan and silver-gray toning. The well-preserved surfaces show few signs of contact. PCGS has graded five numerically finer examples (8/13). NGC ID# 28JZ, PCGS# 9283

**1936-D Cincinnati Half, MS67
Only One Numerically Finer**

- 4377 1936-D Cincinnati MS67 PCGS.** An appealing Superb Gem example, this piece is faintly toned in hues of almond-gold, ice-blue, and ice-green. In addition, a few tiny splashes of darker color are present, including golden-yellow, orange, and red. A few minor marks appear on each side. Population: 35 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 28K2, PCGS# 9284

**1936-D Cincinnati Half, Superb Gem
Colorful Fields**

- 4378 1936-D Cincinnati MS67 PCGS.** Though Stephen Foster lived in Cincinnati for a time and he was a noted songwriter of his day, his musical career was found outside the city, thus rendering the justification for this commemorative issue suspect. The obverse of this Denver Superb Gem has gold-orange outer toning with blue-violet inner hues, while the reverse blends the shades. Population: 35 in 67 (1 in 67+), 1 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 28K2, PCGS# 9284

**1936-D Cincinnati Half, MS67
Low Mintage Type**

- 4379 1936-D Cincinnati MS67 NGC.** The Cincinnati ranks among the lowest mintage types, despite an equal division between the three mintmark varieties, with a modest distribution figure of 5,005 pieces each. This well detailed Superb Gem displays light gold and lavender toning over satiny mint luster. Census: 28 in 67, 0 finer (8/13).
Ex: Chicago Central States (Heritage, 4/2011), lot 6006, which realized \$2,760. NGC ID# 28K2, PCGS# 9284

- 4380 1936-S Cincinnati MS66 PCGS.** An exceptionally clean and original specimen, toned on the obverse in shadings of light-gray and accented with deep golden-russet patina, the reverse is somewhat lighter with similar peripheral shadings. An essentially mark-free specimen and a condition rarity. Population: 63 in 66 (1 in 66+), 1 finer (7/13).
Ex: Dallas Signature (Heritage, 12/2004), lot 7874. NGC ID# 28K3, PCGS# 9285

- 4381 1936 Cleveland MS67 NGC.** A sharply detailed Superb Gem specimen, with vibrant mint luster and attractive highlights of lavender and champagne-gold toning. Eye appeal is outstanding. Census: 50 in 67, 3 finer (7/13). NGC ID# 28K4, PCGS# 9288

- 4382 1936 Cleveland MS67 PCGS. CAC.** The obverse displays a speckled patina in shades of blue-gray, golden-brown, dark teal, and mustard-brown. The reverse of this Superb Gem reveals less concentrated areas of color, primarily at the outer edges. The few marks present are largely confined to the reverse. Population: 51 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28K4, PCGS# 9288

- 4383 1936 Columbia MS67 PCGS. CAC.** The 1936 Columbia half dollar claims a distribution total of 9,007 pieces. Light toning is present and includes hues of gold, green, yellow, pink, and violet. As expected at this grade level, very few abrasions appear. Population: 71 in 67 (5 in 67+), 1 finer (8/13). NGC ID# 28K5, PCGS# 9291

- 4384 1892 Columbian MS66 PCGS.** Frosty devices and flashy fields give this Premium Gem a semiprooflike character. Both sides offer rich, dappled blue, peach, and violet peripheral toning. PCGS has graded 16 numerically finer examples (8/13). NGC ID# 26H5, PCGS# 9296

- 4385 1892 Columbian MS66 Prooflike NGC.** Prooflike surfaces and attractive, multicolored toning provide this Premium Gem with strong eye appeal. The toning includes light shades of red, green, yellow, and orange. A dark fleck appears on the cheek. Census: 21 in 66 Prooflike, 1 finer (8/13). PCGS# 89296

- 4386 1893 Columbian MS66 PCGS. CAC.** The toning is darker at the outer edges of the obverse on this Premium Gem, with the colors including golden-brown, orange, copper, and teal. The reverse displays intermingled shades of gold, copper, and sea-green. A small tick is present near 11 o'clock on the reverse rim. Only 11 examples have received higher numeric grades from PCGS (8/13). NGC ID# 26H6, PCGS# 9297

- 4387 1935 Connecticut MS67 PCGS.** Both sides of this beautiful coin have competing peripheral shades of golden-russet and crimson-red patina, particularly on the reverse. A good strike and strong luster are complemented with nearly pristine surfaces. Virtually unobtainable any finer. Population: 56 in 67 (3 in 67+), 1 finer (7/13).
Ex: FUN Signature (Heritage, 1/2006), lot 7348; Dallas Signature (Heritage, 7/2006), lot 3130. NGC ID# 28K8, PCGS# 9299

- 4388 1935 Connecticut MS67 PCGS.** Both sides of this Superb Gem exhibit only faint toning aside from the extreme obverse peripheries, which display areas of dark brown and dark gray. This wonderful example displays a strong level of detail. Very few marks are present and they are tiny. Population: 56 in 67 (3 in 67+), 1 finer (8/13). NGC ID# 28K8, PCGS# 9299

- 4389 1935 Connecticut MS67 PCGS. CAC.** Strikingly toned gold, mint-green, and silver across brightly lustrous surfaces. This Connecticut Superb Gem has only a few minuscule marks on the eagle. Population: 56 in 67 (3 in 67+), 1 finer (8/13). NGC ID# 28K8, PCGS# 9299

- 4390 1936 Delaware MS66+ PCGS. CAC.** Boldly toned gold-orange, rose, and violet on the obverse with similar colors in an obvious tab-toned pattern with silver on the reverse. Great all-around eye appeal. PCGS has graded 94 examples as MS67 or finer (8/13).
From The Strawberry Fields Collection. NGC ID# 28K9, PCGS# 9301

- 4391 1936 Delaware MS67 PCGS.** Specks of green-gray toning appear primarily on the obverse. More concentrated areas of patina, in shades of deep russet and olive-green, are visible at the outer bottom edges of the obverse. This lustrous Superb Gem also displays hints of light pink and sage. Minor contact marks are visible, primarily on the reverse. Population: 92 in 67 (8 in 67+), 2 finer (8/13). NGC ID# 28K9, PCGS# 9301
- 4392 1936 Elgin MS67 PCGS.** Hazy, light, original toning on both sides, awash with mint frost. About as nice as these are ever found, especially with such delicate, and lovely, colors. PCGS has graded four numerically finer examples (7/13).
Ex: Central States Signature (Heritage, 4/2001), lot 6928. NGC ID# 28KA, PCGS# 9303
- 4393 1936 Elgin MS67 PCGS. CAC.** Gold, orange, blue, and violet patches appear on this frosted Elgin Superb Gem. Though softness appears on the figures as usually seen, the all-around eye appeal is solid. PCGS has graded just four coins as MS68 or finer (8/13). NGC ID# 28KA, PCGS# 9303
- 4394 1936 Elgin MS67 PCGS. CAC.** In addition to the rich satin luster this Superb Gem possesses, this piece also features areas of attractive toning in shades of red, gold, yellow, and green on the obverse with more subtle toning appearing on the reverse. PCGS has awarded higher numeric grades to only 4 pieces (8/13). NGC ID# 28KA, PCGS# 9303
- 4395 1936 Gettysburg MS66 PCGS.** Almond-gold and powder-blue tints enrich this lustrous and exemplary Premium Gem. The strike is precise and the surfaces are pristine save for minor contact on the shields. Certified in a green label holder. NGC ID# 28KB, PCGS# 9305
- 4396 1936 Gettysburg MS66 NGC.** A gorgeous Premium Gem representative, this piece has a tremendous degree of visual appeal. This well struck coin displays lustrous surfaces that include only faint toning at portions of the outer edges. The obverse is virtually free of marks and the abrasions on the reverse are tiny. This is a wonderful coin. NGC has awarded higher numeric grades to only 59 examples (8/13).
From The Joan Carroll Collection. NGC ID# 28KB, PCGS# 9305
- 4397 1936 Gettysburg MS67 PCGS.** The centers are toned stone-gray though the margins provide autumn-gold. The diamond jubilee of the Battle of Gettysburg was observed in 1938, but the silver commemorative was instead struck in 1936 due to a favorable Congressional environment. Certified in a green label holder. Population: 90 in 67 (3 in 67+), 2 finer (7/13). NGC ID# 28KB, PCGS# 9305
- 4398 1922 Grant No Star MS66+ PCGS.** The interiors are a mix of pale silver and yellow, while the margins show touches of deeper blue. Better-defined than often seen, though Grant still has a small "bald spot" at the back of the head. NGC ID# 28KD, PCGS# 9306
- 4399 1922 Grant With Star MS63 PCGS.** This untuned and satiny representative is unmarked and appears to merit a higher technical grade than has been bestowed by PCGS. Struck from clashed and striated dies, as usual for this scarce and low mintage issue. Encapsulated in an old green label holder. NGC ID# 28KC, PCGS# 9307
- 4400 1922 Grant With Star MS64 PCGS.** This is a lovely near-Gem example of this popular variant with the small star in the right obverse field below the final A in AMERICA. This attractive near-Gem exhibits lovely mint luster. Areas of rich toning at portions of the peripheries includes shades of apple-green, cherry-red, orange, lemon-yellow, violet, and teal. NGC ID# 28KC, PCGS# 9307
- 4401 1922 Grant With Star MS64 PCGS.** An attractive Choice example of the popular With Star variant, with sharply detailed design elements and vibrant mint luster on both sides. Pleasing pale gold toning enhances the lightly marked surfaces. NGC ID# 28KC, PCGS# 9307

- 4402 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** A patch of faint vertical hairlines on the portrait confirms a past unobtrusive cleaning. Olive-green and gunmetal-gray toning embraces satiny and unmarked surfaces. The rarest silver type in the classic series.

- 4403 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** Careful rotation beneath a loupe reveals faint hairlines beneath the medium autumn-brown and steel-blue toning. Contact marks are minimal, and the strike is incomplete only on the reverse rim near 7 o'clock. The key silver commemorative type.

- 4404 1928 Hawaiian MS63 NGC.** Only 9,958 Hawaiian Sesquicentennial half dollars were distributed in 1928, most examples going to noncollectors in the Hawaiian Islands. The issue is quite scarce in high grades today, and attractive MS63 examples are prized by collectors. Light champagne toning with a few hints of peach is found on this Select example.
From The Joan Carroll Collection. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Commemorative Half, MS64
Lustrous and Well-Struck**

- 4405 1928 Hawaiian MS64 PCGS.** The 1928 Hawaiian Sesquicentennial half dollar saw a distribution of 9,958 circulation strikes plus 50 sandblast proof specimens. Soft gold-tan patination gravitates to the margins of this near-Gem example, and lustrous surfaces exhibit well-struck design elements. Scattered light marks determine the grade. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64
Multicolor Patination**

- 4406 1928 Hawaiian MS64 PCGS.** Both sides of this near-Gem are covered by vibrant toning. The obverse features intermingled shades of apple-green, jade-green, cherry-red, lemon-yellow, grape, orange, cobalt-blue, and olive-green. The reverse reveals shades of orange, gold, and rose. Scattered marks are present.
From The Strawberry Fields Collection. NGC ID# 28KE, PCGS# 9309
-

**1928 Hawaiian Half, MS65
Sesquicentennial of 'Discovery'**

- 4407 1928 Hawaiian MS65 NGC.** In addition to the fact that this was a low-mintage commemorative issue, the distribution went primarily to non-collectors, further limiting the number of high-end survivors today. This example displays partial mustard and green-gold toning, a feature it shares with many others of its kind, and equally strong luster and detail.
Ex: Central States Milwaukee Signature (Heritage, 4/2010), lot 1476. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, MS65

- 4408 1928 Hawaiian MS65 PCGS. CAC.** Though the mintage of the Hawaiian type is similar to the more available Hudson and Spanish Trail, the Hawaiian is scarcer since much of the mintage went to local non-collectors. The present lustrous and minimally abraded Gem displays lavish canary-gold and powder-blue toning. Housed in a first generation holder. NGC ID# 28KE, PCGS# 9309
- 4409 1935 Hudson MS64 NGC.** An attractive Choice specimen of this popular silver commemorative, from a distribution total of 10,008 pieces. This coin possesses vibrant mint luster and well-detailed design elements and the pleasing surfaces show few signs of contact. NGC ID# 28KF, PCGS# 9312
- 4410 1935 Hudson MS64 NGC.** Vibrant satin luster provides this near-Gem with strong visual appeal. Small, scattered marks are consistent with the grade level. The reverse features the ship of Henry Hudson, the *Half Moon*, along with a quarter moon showing a bump intended to symbolize the Man in the Moon.
From The Joan Carroll Collection. NGC ID# 28KF, PCGS# 9312
- 4411 1935 Hudson MS65 NGC.** A russet-brown, lilac-red, stone-gray, and lime-green Gem of the low mintage Hudson type. Satiny and nicely struck with an unmarked appearance. Certified in a prior generation holder. NGC ID# 28KF, PCGS# 9312
- 4412 1935 Hudson MS65 PCGS.** A Gem possessing a high degree of eye appeal, this coin displays rich frosty satin luster. Portions of the rims exhibit dark gray toning, however the patina on the rest of the coin consists of subtle light shades of rose and champagne, providing it with a brilliant appearance overall. NGC ID# 28KF, PCGS# 9312
- 4413 1935 Hudson MS66 NGC. CAC.** Rich frosty luster provides this Premium Gem with a strong degree of eye appeal. The coin remains bright overall, with areas of light toning present including hues of golden-brown, red-brown, and dark steel-gray. Very few abrasions appear and they are minor. NGC ID# 28KF, PCGS# 9312

- 4414 1924 Huguenot MS67 PCGS.** The medium golden-brown toning is both consistent and attractive. Luster dazzles this smooth and intricately impressed Superb Gem. The Huguenot type is plentiful in typical Mint State, but becomes an important conditional rarity at the MS67 level. Encased in a green label holder. Population: 47 in 67 (6 in 67+), 1 finer (7/13).
Ex: Dallas Signature (Heritage, 10/2006), lot 1805, which realized \$2,990. NGC ID# 28KG, PCGS# 9314
- 4415 1924 Huguenot MS67 PCGS.** Brilliant satin luster emanates from both sides of this appealing Superb Gem example, with the reverse in particular displaying flashy cartwheel luster. Only a few small areas of light toning appear, primarily at the outer peripheries. Population: 47 in 67 (6 in 67+), 1 finer (8/13). NGC ID# 28KG, PCGS# 9314
- 4416 1924 Huguenot MS67 PCGS.** A lovely Superb Gem representative, this coin reveals pleasing satin luster. Yellow-gold, orange, cherry-red, and lime-green toning is present on both sides, primarily at the outer edges. A lovely, well struck piece with very few abrasions, all of them minor. Population: 47 in 67 (6 in 67+), 1 finer (8/13). NGC ID# 28KG, PCGS# 9314
- 4417 1924 Huguenot MS67 PCGS. CAC.** Rich satin luster provides this Superb Gem with immediate eye appeal. The peripheries on both sides display toning, with cherry-red, orange, apple-green, and russet among the colors present. This is a well struck and beautifully preserved example. Population: 47 in 67 (6 in 67+), 1 finer (8/13). NGC ID# 28KG, PCGS# 9314
- 4418 1925 Lexington MS66 PCGS.** This beautiful, crisply struck, and nearly pristine commemorative half dollar exhibits booming luster and light wheat-gold toning. Difficult to obtain any finer, and housed in a green label holder. NGC ID# 28KK, PCGS# 9318
- 4419 1925 Lexington MS66 PCGS.** Large portions of the extreme obverse rim reveal russet, orange, lemon-yellow, apple-green, and cherry-red toning. A small portion of the reverse rim also reveals toning. Scattered tiny specks of gray appear on both sides. Only 11 coins have been awarded higher numeric grades by PCGS (8/13). NGC ID# 28KK, PCGS# 9318
- 4420 1925 Lexington MS66 PCGS. CAC.** Delicate honey-gold and sky-gray patina encompasses this satiny and sharply struck Premium Gem. Traces of lavender toning are confined to the obverse rim. Any marks require thorough evaluation to confirm. NGC ID# 28KK, PCGS# 9318
- 4421 1918 Lincoln MS67 PCGS.** Highlights of champagne-gold and amber toning add to the terrific eye appeal of this magnificent Superb Gem. The design elements display razor-sharp definition throughout and vibrant mint luster radiates from both sides. PCGS has graded only two numerically finer examples (7/13). PCGS# 9320
- 4422 1918 Lincoln MS67 NGC.** Gold and peach overtones cross most of each side. A greatly lustrous Superb Gem example of this long-popular earlier commemorative silver issue. PCGS# 9320
- 4423 1918 Lincoln MS67 PCGS.** Shimmering luster remains on this lightly toned Superb Gem example. The centers reveal very little toning, while portions of the outer edges display shades of orange-gold and green-brown. PCGS has awarded higher numeric grades to only 2 examples (8/13). PCGS# 9320
- 4424 1936 Lynchburg MS67 PCGS.** The obverse of this impressive Superb Gem is darkly toned in mingled shades of plum, peach, and lilac, while the reverse is mostly brilliant in the center with rings of pale jade and lavender. The design elements are sharply detailed and vibrant mint luster shines beneath the patina. Population: 79 in 67 (5 in 67+), 0 finer (8/13). NGC ID# 28KM, PCGS# 9324
- 4425 1936 Lynchburg MS67 PCGS. CAC.** Silver-blue interiors with dotted reddish-orange and claret toning around much of the margins. Impressively preserved with only a few tiny, scattered faults. Population: 79 in 67 (5 in 67+), 0 finer (8/13). NGC ID# 28KM, PCGS# 9324

**1920 Maine Half Dollar, MS67
Tied for Finest at PCGS**

4426 1920 Maine MS67 PCGS. CAC. Potent luster illuminates the sparkling surfaces of this conditionally scarce Superb Gem. Mostly untoned, with faint touches of speckled gold patina that become apparent under low magnification. Few examples of this early commemorative half dollar issue have survived in such a high state of preservation. Population: 25 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 28KN, PCGS# 9326

4427 1934 Maryland MS67 PCGS. Near-complete gold-to-orange outer toning gives way to silver on the interiors. A subtly frosted Superb Gem with ample eye appeal. Population: 52 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 28KP, PCGS# 9328

4428 1934 Maryland MS67 PCGS. Light lime-green and honey-gold patina visits this lustrous and nicely struck Superb Gem. The reverse is pristine and the obverse shows only delicate field grazes. Certified in a green label holder. Population: 52 in 67 (2 in 67+), 0 finer (7/13). NGC ID# 28KP, PCGS# 9328

4429 1934 Maryland MS67 PCGS. CAC. Rich toning covers much of the obverse periphery on this attractive Superb Gem example. The colors include yellow, orange, gold, red, and green. The obverse center is brilliant, as is the entire reverse, and both sides exhibit rich satin luster. Population: 52 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 28KP, PCGS# 9328

**1921 Missouri Half Dollar, MS65
Vivid Multicolor Toning**

4430 1921 Missouri MS65 PCGS. CAC. This 1921 Missouri half dollar is attractively toned in shades of lavender, gray, and champagne-gold, with vibrant mint luster underneath. The design elements are sharply detailed throughout and the well-preserved surfaces add to the considerable eye appeal. *From The Strawberry Fields Collection.* NGC ID# 28KS, PCGS# 9330

4431 1921 Missouri 2X4 MS64 NGC. A well-detailed Choice example of the popular 2X4 variant, with vibrant mint luster and attractive shades of pale gold toning on both sides. Eye appeal is outstanding. NGC ID# 28KR, PCGS# 9331

4432 1921 Missouri 2★4 MS65 NGC. An impressive Gem example of the popular 2★4 variant of this classic silver commemorative, with sharply detailed design elements and well-preserved lustrous surfaces that show a few hints of gold and lavender toning. NGC ID# 28KR, PCGS# 9331

4433 1921 Missouri 2★4 MS65 PCGS. Most of the pioneer's shoulder strap is visible on this scarce Missouri half dollar. The wheat-gold surfaces are lustrous and only lightly abraded. Certified in a green label holder. NGC ID# 28KR, PCGS# 9331

4434 1923-S Monroe MS65 PCGS. Attractive luster and areas of light toning provide this Gem with an attractive appearance. The colors include gold and green with a few small flecks of red present as well. Scattered abrasions appear, but they are minor in nature. NGC ID# 28KT, PCGS# 9333

4435 1923-S Monroe MS65 PCGS. A subtly frosted silver-white Gem representative of one of the most infamous condition rarities among classic silver commemoratives. Minimally marked, though the devices are typically flat. NGC ID# 28KT, PCGS# 9333

4436 1923-S Monroe MS65 PCGS. Charges of plagiarism have swirled around the reverse of this issue for many years, though the question of whose idea it was to turn North and South America into "contortionist" sisters (to borrow a word from Vermeule) is far from over. This is a well-struck example, lightly toned overall with strong luster. Russet and gold toning is present at the lower periphery, as is a fingerprint centered at 7 o'clock on the reverse. NGC ID# 28KT, PCGS# 9333

**1938 New Rochelle Half, MS67+ ★
Exquisite Toning**

4437 1938 New Rochelle MS67+ ★ NGC. CAC. The obverse is possibly tab-toned, since the rich orange-red and lime-green toning is confined to selected portions of the border. The reverse displays similar shades, but they are comprehensive throughout that side. Each side has unimportant abrasions. Census: 6 in 67+ ★, 5 finer as 68 ★, 1 finer as 68 Prooflike ★ (8/13). NGC ID# 28KU, PCGS# 9335

4438 1936 Norfolk MS68 NGC. Attractive shades of pale gold and lavender toning blanket the pristine surfaces of this spectacular MS68 example, with vibrant mint luster and sharply detailed design elements enhancing the terrific visual appeal. Census: 76 in 68, 1 finer (7/13). NGC ID# 28KV, PCGS# 9337

4439 1936 Norfolk MS68 PCGS. CAC. Vibrant mint luster and sharply detailed design elements combine for excellent eye appeal on this MS68 piece. Areas of faint toning include yellow and orange on both sides. PCGS and NGC combined have awarded higher numeric grades to only 2 examples (8/13). NGC ID# 28KV, PCGS# 9337

4440 1925 Norse Thick Planchet MS66 PCGS. Thick planchet. Bold detail stands out due to lustrous fields on this well-preserved Premium Gem. Good silver color appears, with a few hints of pale gold toning. Population: 34 in 66, 0 finer (7/13). *Ex: Long Beach Signature (Heritage, 10/2001), lot 9158.* PCGS# 9450

**1925 Norse Thin Planchet, MS66
Top-Grade Example**

4441 1925 Norse Thin Planchet MS66 NGC. This virtually untoned Thin Planchet Norse medal shows some interesting strike doubling on the upper legends and Viking warrior. This medal is collected alongside the classic commemorative half dollars, but Bowers nonetheless sticks to the letter of the law, excluding it entirely from his commemorative coins *Guide Book*, since it is not a “coin” *per se*. This Premium Gem has light golden tinges over mostly silver-white surfaces with good eye appeal. NGC shows eight at this grade level (8/13). PCGS# 9451

4442 1926-S Oregon MS67 PCGS. Broad silver interiors provide an appealing contrast to the narrow yet prominent bands of gold, orange, green, and blue peripheral toning. A desirable Superb Gem example of this initial S-mint Oregon issue. Only 5 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 28KX, PCGS# 9341

4443 1926-S Oregon MS67 PCGS. CAC. Coruscating luster and attractive multicolored toning contribute to the strong eye appeal of this Superb Gem. The lovely toning includes hues of gold, teal, dark sea-green, lemon-yellow, rose-pink, ice-green, and dusty-pink. Arguably, the reverse is the more alluring side. PCGS and NGC combined have awarded higher numeric grades to only 12 examples (8/13). NGC ID# 28KX, PCGS# 9341

4444 1928 Oregon MS67 PCGS. Near-brilliant at first glance, though the eye gradually picks out pale tan and blue elements on this Oregon half. This piece possesses wonderful luster and eye appeal, even among Superb Gems. The reverse exhibits a slight counter-clockwise rotation. Population: 70 in 67 (5 in 67+), 2 finer (8/13). NGC ID# 28KY, PCGS# 9342

4445 1928 Oregon MS67 PCGS. CAC. Scattered small splashes and flyspecks of toning, in shades of yellow-gold and golden-brown, appear on both sides of this Superb Gem. The obverse also reveals hues of rose-gold and muted lime-green. Population: 70 in 67 (5 in 67+), 2 finer (8/13). NGC ID# 28KY, PCGS# 9342

**1928 Oregon Half, MS67+
Second Year of Design**

4446 1928 Oregon MS67+ PCGS. CAC. After the initial Oregon Trail issues of 1926, the design returned in 1928, an early sign of the commemorative coin legislation abuses that were to come. This gorgeous piece is largely pale gray to silver-blue with bold yellow and rose elements in a narrow arc at the right reverse. Population: 70 in 67 (5 in 67+), 2 finer (8/13). NGC ID# 28KY, PCGS# 9342

4447 1933-D Oregon MS67 NGC. Well struck with pleasing light toning and nice satin luster. Most of the obverse letters show broad doubling or tripling. Seemingly mark-free on both sides. Census: 38 in 67 (1 in 67+), 1 finer (7/13). NGC ID# 28KZ, PCGS# 9343

4448 1936 Oregon MS67 PCGS. CAC. The design elements display a sharp degree of detail on this Superb Gem representative. Unabraded surfaces are also among the attributes. Portions of the obverse are attractively toned in shades of gold and lilac. The upper reverse reveals an area of tobacco-brown patina. Tiny gray flyspecks are present. PCGS and NGC have each only awarded higher numeric grades to 2 examples (8/13). NGC ID# 28L3, PCGS# 9345

4449 1936-S Oregon MS67+ PCGS. CAC. Yellow, orange, and cherry-red toning appears on portions of the obverse on this Superb Gem, with a plus designation indicating this piece has strong eye appeal. The reverse reveals larger areas of toning, with intermingled speckles of dark gray, teal, orange-brown, apple-green, and plum. Frosty satin luster and a bold strike are additional attributes. Population: 5 in 67+, 4 finer (8/13). NGC ID# 28L4, PCGS# 9346

4450 1937-D Oregon MS67+ PCGS. CAC. A gorgeous high-end Superb Gem representative, this piece boasts a beautifully toned obverse and virtually untoned reverse. The colors on the obverse include intermingled shades of deep orange, red-pink, olive-green, apple-green, lemon-yellow, lime-green, and plum. The reverse displays rich satin luster. Population: 22 in 67+, 43 finer (8/13). NGC ID# 28L5, PCGS# 9347

4451 1937-D Oregon MS68 NGC. Thick, satiny luster and immaculately preserved, as one would expect from the grade, each side shows scattered, light golden-gray toning that enhances the overall attractiveness of this piece even more. Census: 68 in 68, 1 finer (7/13).
Ex: *Portland Signature (Heritage, 3/2004)*, lot 6956. NGC ID# 28L5, PCGS# 9347

4452 1939 Oregon MS67 NGC. A charming Superb Gem example of one of the most popular issues in the silver commemorative series, with solid even luster and a sharp strike. Census: 99 in 67, 4 finer (7/13). NGC ID# 28L9, PCGS# 9352

4453 1939 Oregon MS67 PCGS. The tab-toned reverse displays peripheral sea-green and peach-red. This precisely struck and coruscating Superb Gem is mark-free and desirable. Encapsulated in a green label holder. Population: 93 in 67 (2 in 67+), 4 finer (7/13).
Ex: *Denver Signature (Heritage, 8/2006)*, lot 3902. NGC ID# 28L9, PCGS# 9352

**1939 Oregon Half Dollar, MS67+
Magnificent Eye Appeal**

4454 1939 Oregon MS67+ PCGS. CAC. The Oregon Trail Memorial is the longest-running series of commemorative coins (1926, 1926-S, 1928, 1933-D, 1934-D, 1936, 1936-S, 1937-D, 1938 P-D-S, 1939 P-D-S). The present high-end Superb Gem offering displays a soft blend of pastel toning on the obverse that becomes slightly more extensive and deeper in hue on the reverse. Sharply struck design elements and exquisitely preserved surfaces round out the magnificent eye appeal of this piece. Population: 3 in 67+, 4 finer (8/13). NGC ID# 28L9, PCGS# 9352

4455 1939-D Oregon MS67 NGC. A sharply struck and exquisitely preserved Superb Gem that has good luster. The final year of the long-running Oregon Trail Commemorative type. Only 3,004 pieces were struck, with the extra four pieces submitted for assay. NGC has graded eight numerically finer examples (7/13).
Ex: Long Beach Signature (Heritage, 2/2003), lot 8964. NGC ID# 28LA, PCGS# 9353

4456 1939-D Oregon MS67 PCGS. Obverse tab-toning consists of jade-green, rose-red, and canary-gold hues. Satiny and pristine with only slight inexactness of strike on the back of the wagon. A low mintage commemorative issue.
Ex: Denver Signature (Heritage, 8/2006), lot 3902. NGC ID# 28LA, PCGS# 9353

4457 1939-D Oregon MS67 PCGS. CAC. Gold-orange peripheral tones surround well-preserved silver interiors. A pleasing example from an issue of just 3,000 pieces plus assay coins. NGC ID# 28LA, PCGS# 9353

4458 1939-S Oregon MS67 NGC. A sharply detailed Superb Gem example of this popular commemorative issue, with vibrant mint luster and a few hints of champagne-gold toning on the well-preserved surfaces. Census: 99 in 67, 6 finer (7/13). NGC ID# 28LB, PCGS# 9354

4459 1939-S Oregon MS67 PCGS. Light butter-gold and orange toning embraces the borders of this lustrous, fully struck, and immaculate Superb Gem. The 1939 PDS set had a distribution of only 3,000 pieces. Certified in a green label holder. Population: 91 in 67 (1 in 67+), 8 finer (7/13).
Ex: Denver Signature (Heritage, 8/2006), lot 3902. NGC ID# 28LB, PCGS# 9354

4460 1939-S Oregon MS67 PCGS. CAC. The Oregon Trail half dollars began in 1926 and did not stop until 1939, an unprecedented stretch for a single commemorative design. This S-mint from the final year of issues has rich silver-gray, salmon, and rose waves from left to right on the obverse, while the reverse has a concentric appearance with the latter two colors around a minimally toned core. Population: 91 in 67 (1 in 67+), 8 finer (8/13). NGC ID# 28LB, PCGS# 9354

4461 1915-S Panama-Pacific — Artificial Toning — NGC Details. Unc. The rich autumn-gold, cobalt-blue, and lavender toning is attractive but deemed unnatural by NGC. The satiny surfaces are free from visible abrasions. The mintmark is lightly repunched south, undoubtedly scarce as such.
From The Joan Carroll Collection. NGC ID# 26H7, PCGS# 9357

4462 1915-S Panama-Pacific MS64 NGC. Light almond-gold toning graces this lustrous and crisply struck near-Gem. A high end example that will please even the demanding specialist. Accompanying the lot is its original printed envelope, as issued from the 1915 Panama-Pacific Exposition, Very Good. NGC ID# 26H7, PCGS# 9357

4463 1915-S Panama-Pacific MS64 PCGS. FS-501. The mintmark is repunched east. This satiny Choice commemorate is patinated in mahogany-brown and steel-gray shades. Mark-free save for minor field contact near the oak branch.
From The Strawberry Fields Collection. NGC ID# 26H7, PCGS# 9357

4464 1915-S Panama-Pacific MS64 PCGS. A well-detailed Choice example of this popular silver commemorative, with satiny mint luster and light shades of gold, pink, and amber toning.. From a distribution total of 27,134 pieces. NGC ID# 26H7, PCGS# 9357

4465 1915-S Panama-Pacific MS64 PCGS. Gold CAC. Powder-blue and honey-gold compete for territory across this lustrous and crisply impressed near-Gem. A few glimpses of deeper russet toning accompany the upper obverse margin. NGC ID# 26H7, PCGS# 9357

4466 1915-S Panama-Pacific MS64+ NGC. CAC. The brilliant centers of this high-end Choice example yield to rings of greenish-gold, amber, and violet at the peripheries. The design elements are sharply detailed and the surfaces radiate vibrant mint luster.
From The Strawberry Fields Collection. NGC ID# 26H7, PCGS# 9357

4467 1915-S Panama-Pacific MS65 NGC. A delightful Gem representative of the Pan-Pac half dollar, with vibrant mint luster and sharply detailed design elements throughout. A few hints of champagne-gold and lavender toning grace the well-preserved surfaces.
From The Strawberry Fields Collection. NGC ID# 26H7, PCGS# 9357

1915-S Pan-Pac Half Dollar Nicely Toned MS66

4468 1915-S Panama-Pacific MS66 PCGS. Deep jade-green and plum-red invigorate this satiny high-grade Panama-Pacific half. A pass beneath a lens cannot locate any marks, and the strike is consistently sharp. An early silver commemorative type that is scarcer than its mintage suggests. Housed in a green label holder. NGC ID# 26H7, PCGS# 9357

1915-S Pan-Pac Half, MS66 Boldly Struck and Lightly Toned

4469 1915-S Panama-Pacific MS66 PCGS. The low-mintage 1915-S Pan-Pac half dollar is among the keys to the U.S. commemorative series. This frosty Premium Gem example is untuned save for the lightest suggestions of golden-tan color around the peripheries. No mentionable abrasions appear, and the strike definition is appreciably bold for the type.
Ex: Long Beach Signature (Heritage, 9/2002), lot 9359. NGC ID# 26H7, PCGS# 9357

4470 1936 Rhode Island MS67 PCGS. CAC. Light blue and gold accents over pale gray centers yield to richer orange and reddish-brown tones at parts of the margins, most visibly the bottom reverse. A tiny nick on the anchor is the sole significant obstacle to an even finer grade. Population: 26 in 67, 0 finer (8/13). NGC ID# 28LE, PCGS# 9363

4471 1936-S Rhode Island MS67 NGC. CAC. Subtle violet and tan elements at the margins along with shades of fiery orange, red, and red-brown yield to silver-white in the centers of this S-mint Superb Gem. The piece is well struck with the soft, finely textured luster peculiar to the Rhode Island design. Neither NGC nor PCGS has graded a numerically finer example (8/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1201. NGC ID# 28LG, PCGS# 9365

4472 1936 Rhode Island PDS Set MS65 PCGS. Separately housed in identically graded holders with consecutive serial numbers. All three coins are lustrous and well preserved. The Philadelphia and Denver coins are minimally toned while the San Francisco Gem displays light to medium caramel-gold and olive-green patina. (Total: 3 coins) PCGS# 9366

4473 1937 Roanoke MS67 PCGS. CAC. A wide swath of color encircles Sir Walter Raleigh's image, including deep orange and red colors, creating a striking appearance. Brilliant mint luster is clearly visible beneath the toning. The reverse includes a deep gold patina and hues of iridescent pinks, blues, and greens. This beautifully struck coin is well preserved. PCGS has graded 14 numerically finer examples (7/13).

From The Strawberry Fields Collection. NGC ID# 28LH, PCGS# 9367

4474 1936 Robinson MS67 PCGS. Though Chicago-based Edward Everett Burr and Connecticut-based Henry Kreis had only infrequent artistic contact, the two sculptors share credit for the Robinson-Arkansas commemorative half. The obverse of this lovely Superb Gem representative has delicate silver-gray patina overall with elements of tan at portions of the margins. The reverse reveals subtle hints of rose, with a few tiny splashes of vibrant color also present. Population: 60 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 28LJ, PCGS# 9369

4475 1935-S San Diego MS67 PCGS. Pleasing shades of ice-blue and champagne-gold toning blanket the well-preserved surfaces of this spectacular Premium Gem. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. PCGS has graded three numerically finer examples (7/13). NGC ID# 28LK, PCGS# 9371

4476 1926 Sesquicentennial MS65 PCGS. A highly lustrous and boldly struck representative. The surfaces are mostly brilliant with a golden tint on the rims. This carefully preserved specimen has numerous planchet striations that radiate from the centers, and only a couple of tiny abrasions. Although common in lower grades, it is virtually impossible to find an example better than Gem. PCGS has certified a mere eight pieces numerically finer (7/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1204. NGC ID# 28LM, PCGS# 9374

4477 1926 Sesquicentennial MS65 PCGS. CAC. Attractive gold toning covers large portions of this Gem. Shades of lime-green, bright pink and orange are also present. Scattered marks appear on both sides. Few examples have surpassed the grade level of this piece, with PCGS having assigned higher numeric grades to only 8 examples (8/13). NGC ID# 28LM, PCGS# 9374

4478 1935 Spanish Trail MS64 NGC. A wonderful near-Gem example, this piece is extremely attractive for the grade. Faint hues of almond-gold and subtle ice-blue add to the eye appeal. Scattered, tiny abrasions appear on the obverse, while the reverse is virtually pristine.
From The Joan Carroll Collection. NGC ID# 28LN, PCGS# 9376

4479 1935 Spanish Trail MS65 PCGS. Hints of peach-gold and olive-green adorn this lustrous, smooth, and crisply struck Gem. The only commemorative type designed by an A.N.A. President, L.W. Hoffercker. Housed in a green label holder. NGC ID# 28LN, PCGS# 9376

4480 1935 Spanish Trail MS65 PCGS. CAC. Magnificent fire-red, orange-gold, and ocean-blue endow the reverse. The obverse is brilliant. The low mintage Spanish Trail type was designed by future A.N.A. President L.W. Hoffercker. The issue celebrated the 400th anniversary of the disastrous expedition of Cabeza de Vaca, which translates as head of cow, hence the obverse motif. NGC ID# 28LN, PCGS# 9376

**1935 Spanish Trail Half, MS67
Strong Visual Appeal**

4481 1935 Spanish Trail MS67 PCGS. This Superb Gem possesses a strong degree of visual appeal. A pleasing level of satin luster is present. The surfaces are faintly toned in hues of almond-gold and subtle ice-blue, with some portions revealing darker shades. PCGS has awarded higher numeric grades to only 2 examples (8/13). NGC ID# 28LN, PCGS# 9376

**1935 Spanish Trail Half, Superb Gem
Only Two Numerically Finer at PCGS**

4482 1935 Spanish Trail MS67 PCGS. CAC. With just 10,000 pieces coined along with eight additional coins for assay purposes, the Spanish Trail has one of the lowest mintages of any commemorative design. This is a superlative silver-gray Superb Gem, lightly suffused with tinges of gold. The strike and surface preservation overall are both equally remarkable.
Ex: Summer FUN Orlando Signature (Heritage, 7/2010), lot 4383. NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail Half Dollar, Satiny MS67

4483 1935 Spanish Trail MS67 PCGS. CAC. This satiny Superb Gem displays gorgeous preservation and a bold strike. Each side has a coating of tan, olive, and russet patina, and there are no blemishes or distractions to be seen. Future ANA President L.W. Hoffercker designed the Spanish Trail commemorative, and also assisted in its distribution.
Ex: Long Beach Signature (Heritage, 9/2003), lot 9440. NGC ID# 28LN, PCGS# 9376

4484 1925 Stone Mountain MS67 NGC. A delightful Premium Gem representative of this popular silver commemorative, with sharply detailed design elements and vibrant mint luster that creates outstanding eye appeal. A few hints of greenish-gold toning enhance the well-preserved surfaces. NGC has certified nine numerically finer examples (7/13). NGC ID# 26H8, PCGS# 9378

- 4485 1925 Stone Mountain MS67 NGC.** Subtle gold, orange, and blue tones enrich this understated but well-preserved Superb Gem. Only a tiny abrasion on the front horse's flank precludes an even finer designation. NGC ID# 26H8, PCGS# 9378

1936 Texas Half, MS68
Pristine Example With Crescent Toning

- 4486 1936 Texas MS68 NGC.** The Texas commemorative halves from 1934 to 1938-PDS, 13 issues in all, form a mighty rewarding subset of collecting, both for their aesthetics as well as their rarity in higher grades. This MS68 NGC piece is essentially pristine throughout both sides and largely untuned, save for a touch of reddish-orange rim toning on a portion of each side. Extremely appealing. NGC has seen a total of eight in the numeric grade of MS68, with a single MS69 finer (8/13). NGC ID# 28LU, PCGS# 9386

- 4487 1936-D Texas MS67 NGC.** Bright silver overall with touches of cloud-white and gold. Occasional hints of frostiness grace the well-defined high points. Pleasingly preserved. NGC ID# 28LV, PCGS# 9387

- 4488 1936 Texas PDS Set MS66+ PCGS. CAC.** A matched set, each coin is identically graded and bears the green CAC seal. The coins are housed in individual holders with consecutive serial numbers. The Philadelphia half is lustrous and well struck with peripheral russet toning. The Denver example is nearly brilliant and displays minor inexactness of strike. The pristine San Francisco half is typically struck and features rich golden-brown patina at the margins. (Total: 3 coins) PCGS# 9389

1937-S Texas Half Dollar, MS67+
Rarely Seen Finer

- 4489 1937-S Texas MS67+ NGC. CAC.** Only 6,637 Texas half dollars were struck at the San Francisco Mint in 1937. This high-end Superb Gem features sharply detailed design elements and vibrant mint luster, with accents of champagne-gold toning. Eye appeal is outstanding. NGC has certified only five numerically finer examples (8/13). NGC ID# 28LZ, PCGS# 9392

- 4490 1938 Texas MS67 PCGS. CAC.** Close examination of the obverse reveals several shades of toning, among them gray-blue, plum, orange, forest-green, yellow, ice-green, and cherry-red. The lustrous reverse displays a bright center with areas of toning at the peripheries. Population: 48 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M2, PCGS# 9394

- 4491 1938 Texas MS67 PCGS. CAC.** Areas of light toning are present on this Superb Gem representative, primarily on the obverse, with shades of orange and gray-green appearing. Rich luster adds to the eye appeal of this coin. The 1938 Texas commemorative half dollar had a low distribution figure of 3,780 pieces. Population: 48 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M2, PCGS# 9394

- 4492 1938-D Texas MS67 PCGS.** A spectacular Superb Gem, with sharply detailed design elements and vibrant mint luster on both sides. A few hints of pale gold toning visit the pristine surfaces. Population: 84 in 67 (6 in 67+), 1 finer (7/13). NGC ID# 28M3, PCGS# 9395

- 4493 1938-D Texas MS67 PCGS.** Scattered flecks of gray patina appear on both sides of this Superb Gem example, with splashes of light orange toning appearing on the obverse. The coin displays attractive luster and reveals only a couple of minuscule marks. Population: 84 in 67 (6 in 67+), 1 finer (8/13). NGC ID# 28M3, PCGS# 9395

- 4494 1938-D Texas MS67 PCGS. CAC.** Light blue and green-to-gold overtones grace this Superb Gem Texas commemorative from the last year of striking. The design's usual obverse "halo" luster is understated yet still plain. NGC ID# 28M3, PCGS# 9395

- 4495 1938-S Texas MS67 PCGS.** The silver-white, frosty surfaces show little trace of color on this Superb Gem representative. The exception is a lovely strip of colorful toning in deep shades of yellow, red, green, and plum near the bottom of the reverse. Population: 61 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M4, PCGS# 9396

- 4496 1938-S Texas MS67 PCGS. CAC.** The centers remain primarily untuned on this Superb Gem, with shades of vibrant gold, lemon-yellow, apple-green, cherry-red, and golden-brown present at the outer edges. Population: 61 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M4, PCGS# 9396

- 4497 1938-S Texas MS67 PCGS. CAC.** Assembling a complete high-grade 1934-38 PDS Texas commemorative set is a challenging endeavor. This 1938-S would bookend the series in a great way. This Superb Gem exhibits a light gold patina that includes small splashes of orange, with small areas of gray primarily appearing at portions of the outer edges. Population: 61 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M4, PCGS# 9396

- 4498 1938-S Texas MS67 PCGS. CAC.** Subtle hints of champagne and ice-blue appear on this attractive Superb Gem representative with virtually pristine surfaces. The 1938-S Texas commemoratives had a low-distribution of 3,814 coins. Population: 61 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M4, PCGS# 9396

- 4499 1938-S Texas MS67 PCGS. CAC.** Light shades of toning appear on this appealing Superb Gem representative. The colors include gold, blue, and ice-gray. Only a few tiny abrasions are present on this lovely example. Population: 61 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 28M4, PCGS# 9396

- 4500 1925 Vancouver MS66 PCGS.** The 1925 Vancouver half dollar is very scarce above the MS66 grade level. This Premium Gem exhibits pearl-gray color overall, with areas of toning that include hues of gold, orange, pink, ice-blue, violet, apple-green, electric-blue, and plum. NGC ID# 28M5, PCGS# 9399

- 4501 1925 — Doubled Die Obverse — Vancouver MS66 PCGS Secure. FS-102.** The 19 in 1925 and the WE T in WE TRUST are nicely die doubled. Despite a low mintage, it appears that more than one obverse die was used, and this variety appears on a minority of examples. A lustrous half dollar with medium canary-gold toning. Marks are confined to a single graze on the left obverse field. NGC ID# 28M5, PCGS# 9399

**1925 Vancouver Half, MS67
High-End Example With Rainbow Toning**

- 4502 1925 Vancouver MS67 PCGS.** This Superb Gem Vancouver half dollar displays a true cameo effect, the untoned central portrait of Dr. John McLoughlin complemented by lavish rings of rainbow patina on each side. This well-struck piece is certified in an early blue-label PCGS holder. At the time McLoughlin founded Fort Vancouver in 1825 it was in the Oregon Territory, although today it is a smallish city in Washington state; Vancouver, the capital of British Columbia, is some 250 miles north, a large metropolis in Canada. Population: 47 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 28M5, PCGS# 9399

**1927 Vermont Half, MS67
Only One Finer at NGC**

- 4503 1927 Vermont MS67 NGC.** The largely brilliant centers are framed by attractive toning in shades that include golden-orange, pink, ice-green, and violet. Several splashes of sea-green appear on the portrait and on portions of the upper reverse. Satin luster, strong detail, and only a few minor abrasions are additional attributes of this Superb Gem representative. Census: 17 in 67, 1 finer (8/13). NGC ID# 28M6, PCGS# 9401

- 4504 1946 Booker T. Washington MS67 PCGS.** CAC. Vibrant toning covers both sides of this Superb Gem, providing a tremendous degree of visual appeal. The colors include apple-green, cherry-red, vibrant orange, red-brown, and hot pink. A few marks are present near the first S in STATES. Population: 58 in 67 (5 in 67+), 1 finer (8/13). NGC ID# 28M7, PCGS# 9404

- 4505 1946-S Booker T. Washington MS67 PCGS.** CAC. Intense amber, gold, lilac, and emerald toning on each side of this Superb Gem masks the frosty luster. The virtually pristine surfaces are nearly flawless, and even Washington's face is free of the usual heavy marks. Population: 86 in 67 (7 in 67+), 1 finer (8/13). Ex: *Long Beach Signature (Heritage, 9/2008), lot 1232.* NGC ID# 28M9, PCGS# 9406

- 4506 1948-S Booker T. Washington MS67 PCGS.** CAC. Mottled toning appears on the obverse of this piece, while the reverse is only lightly toned with most of the color appearing at the peripheries. The obverse displays shades of russet, wine, olive-green, cherry-red, and apple-green. Rich luster adds to the eye appeal of this Superb Gem. Population: 15 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 28MF, PCGS# 9414

**1949 Booker T. Washington Half Dollar, MS67
Exceptional Technical Quality and Aesthetic Appeal**

- 4507 1949 Booker T. Washington MS67 PCGS.** CAC. The Booker T. Washington half dollar is considered to be one of the poorest produced commemorative coins, displaying imperfect strikes, planchet defects, and bagmarks. Superb Gems such as the present coin are thus a rarity. Vibrant luster and sharply struck design elements stand out on both sides, each of which is impeccably preserved. As evidenced by the CAC sticker, this is a truly well-produced coin that will satisfy the most discriminating collector. Population: 15 in 67, 0 finer (8/13). NGC ID# 28MG, PCGS# 9416

- 4508 1949-D Booker T. Washington MS67 PCGS.** CAC. Brilliant surfaces and shimmering luster furnish this piece with tremendous eye appeal. This Superb Gem reveals few marks and they are minor. The Hall of Fame displays a small area of as-made struck-in grease. Population: 19 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 28MH, PCGS# 9417

- 4509 1949-S Booker T. Washington MS67 PCGS.** Intensely lustrous surfaces display light tan-gold patination around the peripheries, which is somewhat deeper and more extensive on the reverse. The centers remain completely untuned. Excellent definition is seen on the design elements, with no areas showing signs of weakness. A few inconsequential ticks on Washington's cheek do not betray the MS67 grade designation. Population: 29 in 67, 0 finer (7/13). Ex: *Central States Signature (Heritage, 4/2006), lot 5122.* NGC ID# 28MJ, PCGS# 9418

- 4510 1951-S Booker T. Washington MS67 PCGS.** Gleaming luster exudes from the essentially untuned surfaces of this Superb Gem commemorative half dollar, and an attentive strike leaves sharp definition on the design elements. Impeccably preserved, with just a couple of trivial marks on the cheek. Population: 34 in 67 (1 in 67+), 0 finer (7/13). Ex: *Palm Beach Signature (Heritage, 6/2008), lot 1656.* NGC ID# 28MR, PCGS# 9426

- 4511 1951-D Washington-Carver MS66 PCGS.** CAC. Light blue overtones against surfaces that range from silver to pale gray. The strike is softer than usual, particularly on the portraits, but the surfaces are well-preserved aside from a flaw under Florida on the reverse. NGC ID# 28MT, PCGS# 9431

**1952 Washington-Carver Half, MS67
None Numerically Finer**

4512 1952 Washington-Carver MS67 PCGS. This satiny Superb Gem boasts small iridescent freckles of color that provide an overall pinkish-gray appearance that is more prevalent on the obverse. Areas of golden-brown toning are present at the upper portion of the reverse. Both sides are splendidly preserved and well struck. Population: 14 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 28MV, PCGS# 9434

4513 1952-D Washington-Carver MS66 PCGS. CAC. Subtle toning is present on this brilliant and lustrous Premium Gem. Both sides reveal a few abrasions, including the map. This limited mintage issue consisted of only 8,006 pieces. Population: 33 in 66, 0 finer (8/13). NGC ID# 28MW, PCGS# 9435

4514 1953 Washington-Carver MS66+ PCGS. PCGS awarded this Premium Gem the plus designation due to the eye appeal it possesses. The obverse includes intermingled shades of gold with other colors mixed in, among them icy shades of pink, lilac, and blue. The reverse reveals shades of orange, gold, yellow, pink, and red in varying intensities. A few small marks are present on Carver's portrait. Population: 10 in 66+, 2 finer (8/13). NGC ID# 28MY, PCGS# 9438

4515 1953-D Washington-Carver MS66 PCGS. CAC. Both sides of this Premium Gem exhibit light toning, with a few tiny areas of darker toning appearing on the obverse near the rim. Population: 49 in 66 (4 in 66+), 0 finer (8/13). NGC ID# 28MZ, PCGS# 9439

**1953-S Washington-Carver, MS67
None Numerically Finer at NGC or PCGS**

4516 1953-S Washington-Carver MS67 NGC. Gilroy Roberts was the engraver responsible for making this Isaac Scott Hathaway design coinage-ready, and while the design is not a favorite of most numismatic aesthetes, credit must be given to Roberts for his efforts. The Superb Gem offered here is more than presentable, with potent luster that shines beneath silver-gray patina in the centers and bronze-tan toning at the rims. Census: 12 in 67, 0 finer (8/13). Ex: *FUN Signature (Heritage, 1/2008)*, lot 2452. NGC ID# 28N2, PCGS# 9440

4517 1954-D Washington-Carver MS66 PCGS. CAC. A few scattered splashes of gold toning appear along with hints of gold and peach on this Premium Gem piece. This coin has lovely eye appeal due to the bright and lustrous surfaces. Population: 42 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 28N4, PCGS# 9443

4518 1936 Wisconsin MS67 NGC. Modestly toned with faint canary patina at the reverse interior and pale pearl hues elsewhere. The frostiness of the all-around luster is most visible in contrast to brilliant patches at the margins. NGC ID# 28N6, PCGS# 9447

4519 1936 York MS68 NGC. Minute splashes of sea-green and orange-rust patina concentrate at the borders of this Superb Gem commemorative. A solid strike leaves crisp definition on the design elements, and highly lustrous surfaces are devoid of mentionable marks. Census: 25 in 68, 0 finer (7/13). Ex: *Palm Beach Signature (Heritage, 6/2008)*, lot 1658. NGC ID# 28N7, PCGS# 9449

COMMEMORATIVE GOLD

4520 1903 Louisiana Purchase/Jefferson MS66 PCGS. A gorgeous Premium Gem example of these pieces commemorating the 100th anniversary celebration of Jefferson's Louisiana Purchase. Jefferson's portrait is pristine on this example. A few tiny alloy spots are present. NGC ID# 26HA, PCGS# 7443

4521 1903 Louisiana Purchase/Jefferson MS66 PCGS. Vibrant color and luster provide this Premium Gem with strong, immediate eye appeal. Intermingled shades of rich gold, mint-green, plum, and lilac are present. The surfaces have only minimal detractors. The outer edges reveal orange peel texture. NGC ID# 26HA, PCGS# 7443

4522 1903 Louisiana Purchase/McKinley MS66 NGC. The recently assassinated President McKinley appears on the obverse of this gold commemorative issued for the St. Louis World's Fair. Both sides of this Premium Gem are brilliant and lustrous, providing excellent eye appeal. A small lint mark appears below the 03 of the date. NGC ID# 26HB, PCGS# 7444

4523 1904 Lewis and Clark MS64 PCGS. Several shades of bright yellow-gold appear on both sides of this near-Gem representative. This is an attractive, well struck piece. A few tiny spots are present. Ex: *Long Beach Signature (Heritage, 9/2004)*, lot 7312. NGC ID# 26HC, PCGS# 7447

**1904 Lewis and Clark Dollar, MS65
Rich Color and Luster**

4524 1904 Lewis and Clark MS65 PCGS. Rich apricot-gold color and highly lustrous surfaces provide this Gem representative of this early gold commemorative with eye appeal. This piece was struck from heavily eroded dies, as evidenced by the surface textures, and large portions of the dentils lack definition. NGC ID# 26HC, PCGS# 7447

4525 1915-S Panama-Pacific Gold Dollar MS64 NGC. A coruscating butter-gold commemorative that has exemplary preservation for the designated grade. Included with the lot is its original printed envelope from the 1915 Panama-Pacific Exposition, Very Good. NGC ID# 26HE, PCGS# 7449

4526 1915-S Panama-Pacific Gold Dollar MS65 NGC. Light golden color overall with a few touches of deeper orange at the reverse margins. A pleasing Gem example of the first commemorative gold dollar issue to sell in line with expectations. From *The Joan Carroll Collection*. NGC ID# 26HE, PCGS# 7449

- 4527 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** A lustrous Gem, this piece displays lovely light yellow-gold color, with areas of orange and rose-pink highlights. Virtually pristine surfaces are another attribute of this wonderful example. NGC ID# 26HE, PCGS# 7449
- 4528 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** A lovely exhibition of variegated colors occurs on each side of this satiny Gem. Copper-red, lime, gold, and mint-green are just some of the shadings encountered. The piece is also well struck, lustrous, and nearly pristine. One of the most beautiful examples of this issue that we have ever seen. NGC ID# 26HE, PCGS# 7449
- 4529 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** Attractive luster and pleasing yellow and green-gold surfaces add to the eye appeal of this Premium Gem. A few hints of peach are also present. The obverse reveals a few as-made lint marks. A tiny spot appears on the cap. PCGS has awarded higher numeric grades to only 53 examples (8/13). NGC ID# 26HE, PCGS# 7449

1915-S Panama-Pacific Quarter Eagle Superb Gem With Great Luster

- 4530 1915-S Panama-Pacific Quarter Eagle MS67 NGC.** Strong golden color with semifrosted luster and great all-around appeal. Though the usual striking softness affects Columbia's face, the preservation is impressive. Neither NGC nor PCGS has certified an MS68 example of this first new-design commemorative quarter eagle issue (8/13). From *The Joan Carroll Collection*. NGC ID# 26HK, PCGS# 7450

Five-Item Small Coin Case for Panama-Pacific Commemoratives

- 4531 Five-Item Small Case for Panama-Pacific Commemoratives.** Fair overall condition, a touch frayed on the outside with separation of the purple velvet setting (five holes, including the famous octagonal shape) from the rest of the case. Also included is a paper card describing the denominations and designs of the various commemoratives, old glue residue on the back. An interesting piece of ephemera. From *The Joan Carroll Collection*.

Copper-and-Glass Frame for Panama-Pacific Commemoratives

- 4532 Copper-and-Glass Frame for Panama-Pacific Commemoratives.** Shreve & Co., San Francisco. These frames, originally created to present Panama-Pacific commemorative coins, have become numismatic icons in their own right. This frame for a five-coin set is a touch faded on the interior cards with one screw missing from the top and the ring gone from the back, but otherwise it is in remarkably good condition. From *The Joan Carroll Collection*.

- 4533 1916 McKinley MS65 PCGS.** A lovely peach-gold Gem. The strike is precise, the luster is dynamic, and the surfaces show only trivial imperfections visible only beneath a powerful lens. Certified in a green label holder. NGC ID# 26HF, PCGS# 7454
- 4534 1916 McKinley MS65 PCGS.** The well-preserved surfaces of this impressive Gem display prooflike reflectivity, with vivid lemon-yellow patina and hints of lilac. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26HF, PCGS# 7454
- 4535 1916 McKinley MS65 PCGS. CAC.** Hints of peach and green are present on this lovely Gem displaying light gold color overall. This is a lustrous and well struck example. NGC ID# 26HF, PCGS# 7454
- 4536 1916 McKinley MS66 PCGS.** Rich gold color with hints of orange and apricot provides this Premium Gem with a lovely appearance on both sides. A sharp strike and appealing satin luster are additional attributes of this piece. NGC ID# 26HF, PCGS# 7454
- 4537 1916 McKinley MS66+ PCGS. CAC.** As indicated by the plus designation, this Premium Gem displays strong visual appeal. Deep gold color, rich luster, and a pleasing level of design definition are among the attributes this coin possesses. Population: 6 in 66+, 71 finer (8/13). NGC ID# 26HF, PCGS# 7454
- 4538 1917 McKinley MS64 PCGS.** Bold peach tones streak across the obverse, while the reverse is almost uniformly golden. Both sides of this second-year McKinley near-Gem offer bounteous luster. NGC ID# 26HG, PCGS# 7455
- 4539 1917 McKinley MS64 PCGS. CAC.** Rich yellow-orange and golden-tan color dominates this near-Gem. Swirling luster has the usual two luster streaks in the "sky" above the birthplace memorial. NGC ID# 26HG, PCGS# 7455
- 4540 1917 McKinley MS66 PCGS.** A Premium Gem, the light yellow-gold surfaces of this attractive piece display a few hints of rose. Satiny mint luster and well-detailed design elements add to the eye appeal. A few small flecks are present on the obverse. NGC ID# 26HG, PCGS# 7455
- 4541 1922 Grant No Star MS64 PCGS. CAC.** Several shades of yellow-gold are present on this near-Gem representative, adding to the eye appeal. A few small marks are present, consistent with the grade. NGC ID# 26HJ, PCGS# 7458

**1922 Grant No Star Dollar, MS67
Sharp Hair Details**

4542 1922 Grant No Star MS67 PCGS. Excellent detail with rich and rolling yellow-gold luster. Both sides are nigh-undisturbed save for a tiny spot behind Grant's head. With no MS68 examples certified by PCGS (8/13), this is an important coin for the classic commemorative enthusiast competing at the highest Registry levels. NGC ID# 26HJ, PCGS# 7458

4543 1922 Grant With Star MS64 PCGS. The surfaces of this lovely piece display bright yellow-gold color along with satiny mint luster. A few minor obverse marks explain the MS64 grade. The strike is exceptionally strong throughout. NGC ID# 26HH, PCGS# 7459

4544 1922 Grant With Star MS66 NGC. Both sides yield visitant luster and a subtle mix of soft yellow-gold and apricot-gold coloration, along with a blush of rose on the reverse. The design elements are sharply struck, enhancing the coin's overall eye appeal. As expected, the surfaces are very well-preserved. NGC ID# 26HH, PCGS# 7459

4545 1922 Grant With Star MS66 NGC. CAC. From a small distribution total of 5,016 pieces, this 1922 Grant With Star gold dollar displays vibrant mint luster and well-detailed design elements. The well-preserved orange-gold surfaces show a few hints of lilac and no mentionable signs of contact. Eye appeal is extraordinary. NGC ID# 26HH, PCGS# 7459

**1922 Grant Gold Dollar, MS67
Prized With Star Variety**

4546 1922 Grant With Star MS67 PCGS. Attractive shades of orange-gold, crimson, and lilac patina enhance the terrific eye appeal of this magnificent Superb Gem. The design elements are sharply detailed throughout and the well-preserved surfaces show no large or distracting contact marks. PCGS has graded only one numerically finer example (8/13). NGC ID# 26HH, PCGS# 7459

**1922 Grant Gold Dollar, MS67
With Star Type**

4547 1922 Grant With Star MS67 PCGS. A spectacular Superb Gem representative of the popular With Star variant, this 1922 Grant gold dollar displays vibrant mint luster and sharply detailed design elements, with well-preserved lemon-yellow surfaces that show hints of lilac. Eye appeal is terrific. PCGS has graded only one numerically finer example (8/13). NGC ID# 26HH, PCGS# 7459

4548 1926 Sesquicentennial MS64 PCGS. This is a lovely near-Gem example with golden-orange color and hints of peach. The luster is very attractive. A few small surface marks appear on both sides. NGC ID# 26HL, PCGS# 7466

4549 1926 Sesquicentennial MS65 PCGS. CAC. A lovely Gem with frosty light yellow-gold luster and hints of peach, this example also features bold design motifs. A few tiny marks are present, consistent with the grade. NGC ID# 26HL, PCGS# 7466

LARGE CENTS

1793 AMERICA Chain Cent, S-3
Fine Details, Die State III

4550 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Filed Rims — PCGS Genuine. Fine Details. Breen Die State III with clash marks beneath bust truncation. Both sides display several moderate rim bruises, and those on the upper obverse display minor and widely spaced hair-thin marks. The medium brown surfaces are mildly glossy and minimally granular with occasional unobtrusive marks. Our EAC grade VG8.

Purchased at the C4 Convention, Boston (11/15/2008).

From The COL Steve Ellsworth Die State Collection. PCGS# 35438

1793 AMERICA Chain Cent, VF Details
Periods Variety, S-4
Die State I

4551 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State I with a faint obverse die crack and bulge at 8 o'clock. The sole Chain cent variety with periods after LIBERTY and the date. The deep steel-gray to dark brown surfaces are evenly granular and surprisingly unabraded. The sole rim nick is very small and located at 5 o'clock on the reverse. The strike is moderately uneven with the upper obverse and lower reverse sharpest. Much sharper than the typical Chain cent, some of which are identifiable solely by the chain motif. Our EAC grade VF20.

Ex: Greg Reff, Gemini Coin; Mark Dizio (4/2/2011).

From The COL Steve Ellsworth Die State Collection.

1793 S-5 Wreath Cent, VF25
Die State I

- 4552** 1793 Wreath, Vine and Bars, S-5, B-6, R.4 VF25 PCGS. Breen Die State I without rim die breaks on beaks above LIBERTY. A deep chocolate-brown representative of this scarce and popular single-year, first year type. Traces of verdigris are minimal and confined to design crevices on the right reverse. No marks are noticeable, though we note as an identifier a slight reverse rim nick near the U in UNITED. The obverse displays several narrow and parallel planchet flaws, with the largest flaw on Liberty's jaw. Our EAC grade Fine 15.
Ex: Stack's (6/1989), lot 1003; Bowers and Merena (9/1992), lot 1060; Chris Victor-McCawley; Dr. Willard Carmel (Superior, 9/1997), lot 148.
From The COL Steve Ellsworth Die State Collection. PCGS# 35447

1793 S-6 Wreath Cent, VF Details
Die State II

- 4553** 1793 Wreath, Vine and Bars, S-6, B-7, R.3 — Damage or Tooling — PCGS Genuine. VF Details. Breen Die State II with the faint obverse bulge from 9 o'clock to the hair continuing across to Liberty's jaw. A few short pinscratches on the field near the nose are more graffiti than tooling. Otherwise, the dark gunmetal-gray surfaces are unabraded though evenly granular. A well defined example of the desirable and briefly coined early cent type. Our EAC grade Fine 12.
Ex: Butternut (4/22/2003); Purchased from Ron Robertson (5/26/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 35450

1793 S-8 Wreath Cent, VF30
Die State I

- 4554** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 VF30 PCGS. Breen Die State I with the biplanar diagonal reverse crack confined to the interior of the wreath. A beautiful chocolate-brown example of the briefly coined early copper type. Devoid of granularity. Relevant marks are limited to a faint obverse line near 3 o'clock and a minor reverse edge nick at 11 o'clock. The reverse is misaligned a few degrees toward 1 o'clock. Our EAC grade VF20.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 182; Purchased 2/14/2008.
From The COL Steve Ellsworth Die State Collection. PCGS# 35456

Sharp 1793 S-9 Wreath Cent
Die State III

- 4555** 1793 Wreath, Vine and Bars, S-9, B-12, R.2 PCGS Genuine. Breen Die State III with a bold crack through the R in AMERICA to a berry. A well defined and moderately granular gunmetal-gray cent. The obverse displays many thin pinscratches, noticeable on the cheek and the border near 2:30. The reverse is unabraded. Substantially sharper than the Holmes example of the variety. Our EAC grade VF20.
*Purchased at a Vienna, Virginia Coin Show (11/4/1995).
From The COL Steve Ellsworth Die State Collection.*

1793 S-10 Wreath Cent, XF Details
Die State I

- 4556** 1793 Wreath, Vine and Bars, S-10, B-10, R.4 — **Damage or Tooling** — PCGS Genuine. XF Details. Breen Die State I with blurry but intact obverse beading at 2:30. This dark gray Wreath cent is only mildly granular and has a wealth of design detail. The obverse is burnished and possibly smoothed. Free from remotely relevant abrasions. Our EAC grade VF25.
*Ex: Numismatic Gallery (Beverly Hills); Purchased from Aspen Park Rare Coins (7/30/2008).
From The COL Steve Ellsworth Die State Collection. PCGS# 35462*

1793 S-10 Wreath Cent, VF Details
Die State II

- 4557** 1793 Wreath, Vine and Bars, S-10, B-10, R.4 — **Environmental Damage** — PCGS Genuine. VF Details. Breen Die State II with absent obverse beading near 2:30. This granular Wreath cent has olive-brown high points and dark golden-tan fields. An impressively detailed example without any consequential abrasions. Our EAC grade VG8.
*Purchased from Tom Kohler (9/15/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35462*

1793 S-11b Wreath Cent, XF Details
Lettered Edge, Die State II

- 4558** 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — **Edge Repaired** — PCGS Genuine. XF Details. Breen Die State II with clash marks from the leaves beneath Liberty's jaw. A sharp golden-brown representative of this famous early type. Only the S-11 dies struck Lettered Edge Wreath cents, and S-11b with two leaves on the edge is much scarcer than its S-11c successor with a single edge leaf. A pair of pinscratches crosses the nose, and minor rim damage at 11 o'clock on the reverse is tooled with hair-thin marks. The surfaces are mildly glossy from a wipe. Our EAC grade Fine 15.
*Ex: Stack's (6/21/1985).
From The COL Steve Ellsworth Die State Collection. PCGS# 35474*

**1793 S-13 Liberty Cap, Fine Details
Die State I**

- 4559 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — PCGS Genuine. Fine Details.** Breen Die State I. A dark gunmetal-gray example of the final and rarest 1793 type. The surfaces are extensively granular but no marks are visible aside from a minor reverse rim nick at 7 o'clock. All beads and legends are clear except for the left half of ONE CENT. Our EAC grade VG7. Purchased from Tom Kohler (9/15/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35489

**1794 S-17a Cent, VG Details
Head of 1793, Die State II**

- 4560 1794 Head of 1793, S-17a, B-1a, Low R.5 — Damage or Tooling — PCGS Genuine. VG Details.** Breen Die State II with a field bulge near the L in LIBERTY. The Head of 1793 is an elusive Guide Book variety. This lavender-brown cent has a granular obverse and minor verdigris on the reverse within UNITED STATES. A cluster of fine pinscratches affect the 17 in the date. The obverse is burnished and has a thin mark on the field near the profile. The reverse has two slight rim nicks at 6 and 7 o'clock. Our EAC grade Good 6.
Ex: Stack's (10/2008), lot 45; Purchased from George Trostel (5/4/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 35504

**1794 S-22 Cent
Head of 1794, Die State I**

- 4561 1794 Head of 1794, S-22, B-6, R.1 PCGS Genuine.** Breen Die State I. The well-known "Mounds" variety, but an early die state without the usually seen field bulges above the NE in ONE. An evenly porous golden-brown example with olive high points. Devoid of abrasions and impressively detailed. Our EAC grade VF20.
Ex: Mid-American (2/1985), lot 48.
From The COL Steve Ellsworth Die State Collection. PCGS# 35531

- 4562 1794 Head of 1794, S-23, B-7, High R.4 PCGS Genuine.** Breen Die State I. Without any crack between the rim and pole. A rare early die state of this very scarce variety. The olive-brown and mahogany-red surfaces are highly granular. The right obverse field is somewhat pitted. Our EAC grade Good 6.
Ex: Walter Reed (6/12/1999).
From The COL Steve Ellsworth Die State Collection. PCGS# 35534

**1794 Head of 1794 Cent
S-24, Die State IV**

- 4563 1794 Head of 1794, S-24, B-8, R.1 PCGS Genuine. CAC.** Breen Die State IV with a radial obverse die crack at 5 o'clock. This medium brown cent has VF sharpness and mildly granular surfaces. Liberty's neck has a smoothed area and the date and lower right obverse field are lightly burnished. Unabraded save for a slight obverse rim ding at 3 o'clock. Our EAC grade Fine 12.
Purchased from C. Foster (7/10/1998).
From The COL Steve Ellsworth Die State Collection. PCGS# 35537

- 4564 1794 Head of 1794, S-26, B-16, R.2 PCGS Genuine.** Breen Die State III with a double set of clash marks on the reverse, noticeable on the present piece beneath the F in OF. The walnut-brown surfaces are granular, especially on the obverse, and a few thin marks are noted on Liberty's neck. Our EAC grade VG10.
Ex: Walter Reed (1/18/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 35543

- 4565 1794 Head of 1794, S-26, B-16, R.2 VF20 PCGS.** Breen Die State VII. A late die state with a large pod-shaped break northwest of the C in CENT. A steel-gray cent with nearly mark-free surfaces. The reverse border is mildly granular, and the obverse rim has subtle dings between 1 o'clock and 3:30. Our EAC grade Fine 12.
Ex: Mark Schwartz (3/24/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 35543

- 4566 1794 Head of 1794, S-28, B-10, R.2 — Damage — PCGS Genuine. XF Details.** Breen Die State II. The reverse dentils are partly lapped. A well defined but granular and somewhat pitted dark gray cent. A cocoon-shaped dig is on the O in ONE and spots are noted beneath the TA in STATES and on the left ribbon loop. Our EAC grade Fine 12.
Ex: Walter Reed (11/24/2001); Butternut (11/2002); purchased from Richard Stouffer (4/30/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35549

1794 Head of 1794 Cent, AU50
S-29, Die State IV

- 4567** 1794 Head of 1794, S-29, B-11, R.2 AU50 PCGS. Breen Die State IV with a vertical crack through the left corner of the 4 in the date. Several other cracks and clashes are retained from earlier states. A beautiful chestnut-gold Liberty Cap type coin. Minimally abraded, though unimportant flan defects are noted on the E in STATES and the O in OF. Our EAC grade VF35.
Ex: Merritt Reynolds (7/14/2002).
From The COL Steve Ellsworth Die State Collection. PCGS# 35552

- 4568** 1794 Head of 1794, S-32, B-18, R.2 VF25 PCGS. Breen Die State II. A bold radial crack traverses through the first S in STATES, but no rim breaks are present above LIB. The die alignment causes much sharper definition on the left borders than on the right margins. A minutely granular and unabraded medium brown cent. Our EAC grade Fine 12.
Ex: Andrew Luck (6/19/2010).
From The COL Steve Ellsworth Die State Collection. PCGS# 35561

1794 S-35 Cent, VG10
Head of 1794
Die State VI

- 4569** 1794 Head of 1794, S-35, B-21, R.5 VG10 PCGS. Breen Die State VI. A linear crack passes through Liberty's cap. A rare Sheldon variety. The dark gray fields are granular and contrast with the walnut-brown motifs. The portrait exhibits numerous delicate hair-thin marks. One pit noted near the C in AMERICA. Our EAC grade Good 6.
Purchased from Rod Holmes (2/29/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 35570

1794 Head of 1794 Cent, VF Details
S-35, Die State VI

- 4570** 1794 Head of 1794, S-35, B-21, R.5 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State VI with a horizontal crack through the cap. A rare die variety. A deep walnut-brown representative with unevenly granular surfaces. Pitted inside and near the wreath. The reverse rim has a small recessed area at 6:30. The dies are moderately rotated. Our EAC grade VG10.
Ex: Tom Reynolds (2007). Purchased from Don Poole (8/1/2008).
From The COL Steve Ellsworth Die State Collection. PCGS# 35570

- 4571** 1794 Head of 1794, S-41, B-30, R.3 VF30 PCGS. Breen Die State IV. A radial crack between the AT in STATES identifies this middle die state. This nicely defined golden-brown cent is nearly free from contact and moderately granular. Our EAC grade Fine 15.
Ex: Norman Stack Collection; Herman Halpern (Stack's, 3/1988), lot 55; 2002 EAC Convention (McCawley & Grellman, 4/2002), lot 138.
From The COL Steve Ellsworth Die State Collection. PCGS# 35588

1794 Head of 1794 Cent, XF40
S-41, Die State VIII

- 4572** 1794 Head of 1794, S-41, B-30, R.3 XF40 PCGS. Breen Die State VIII with a delicate vertical crack between the 79 in the date. A pleasing golden-brown and steel-blue representative. The obverse field displays a few minor marks, and a rim ding is beneath the 94 in the date, but the surfaces are generally smooth. "H 74" in ink on edge near 7 o'clock, perhaps made by Dr. Hall about a century ago. Our EAC grade VF30.
Ex: W.W. Hays (11/8/1892); Dr. Thomas Hall (9/7/1909); Virgil M. Brand; New Netherlands (10/1951), lot 588; M.L. "Max" Kaplan; Thomas P. Warfield (Associated Coin Auction Co., 10/1955), lot 166; Willard C. Blaisdell (8/1977); John W. Adams (2/1979); Denis W. Loring (3/1982); R.E. "Ted" Naftzger Jr. (Early American Coppers, 4/1985), lot 43; Wes A. Rasmussen (Heritage, 1/2005), lot 3048.
From The COL Steve Ellsworth Die State Collection. PCGS# 35588

1794 S-43 Cent, Head of 1794
Die State V

- 4573** 1794 Head of 1794, S-43, B-32, R.2 PCGS Genuine. Breen Die State V with additional cracks through the AT in STATES and northwest of the O in ONE. This lightly granular cent has a deep brown reverse and a dark lavender obverse. The portrait and right obverse field are smoothed and burnished, and a few thin marks are noted near the profile. Our EAC grade Fine 15.
Purchased from Roger Cohen, Jr. (12/1/1986), "while we ate bagels in my Georgetown condo."
From The COL Steve Ellsworth Die State Collection. PCGS# 35594

1794 S-44 Head of 1794 Cent
Die State I

- 4574** 1794 Head of 1794, S-44, B-33, R.1 PCGS Genuine. Breen Die State I without clash marks on the upper reverse field. A well defined and evenly granular dark brown type representative. Marks are minimal save for a small dig on the N in ONE. The fraction is lightly defined but all other legends are sharp. Liberty's hair is richly defined. Our EAC grade Fine 15.
Purchased from the McIntosh Collection, Palm Springs, CA (2/21/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 35597

1794 Head of 1794 Cent, VF30
S-46, Die State IV

- 4575** 1794 Head of 1794, S-46, B-36, R.3 VF30 PCGS. Breen Die State IV with a light crack to the hair through the BE in LIBERTY. The lower obverse has three heavy cracks from prior states. A splendid walnut-brown and olive-green cent. Free from corrosion. We note marks on the E in CENT and moderate contact on Liberty's neck. Each side has a rim ding at 5 o'clock. Our EAC grade VG10.
Ex: Henry C. Hines; M.H. Bolender (1/1939); Willard C. Blaisdell (2/8/1971); Jules Reiver (Heritage, 1/2006), lot 19209; Al Boka (4/17/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 35603

- 4576** 1794 Head of 1794, S-46, B-36, R.3 PCGS Genuine. Breen Die State V. The terminal die state with a triangular break over the 4 in the date. The die break through the E in CENT is diagnostic for S-46. This ebony-brown cent has bold legends but is granular throughout with striations over the cheek and profile. Our EAC grade Good 5.
Ex: Walter Reed (1/18/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 35603

1794 S-48 Starred Reverse Cent, Net AG3
A Recent Discovery

- 4577** 1794 Starred Reverse, S-48, B-38, R.5 — Corroded — ANACS. VG Details, Net AG3. This specimen is thought to be a recent discovery, although it resides in an older ANACS holder. Both sides are heavily corroded although a substantial portion of the reverse border is present, and several stars remain visible. The high points, especially on the obverse, are smooth orange and tan. More heavily worn at the right obverse, over AMERICA. The reverse die buckling of late die states is not evident on this piece, eliminating the possibility of a large rim break were the coin appears worn. Looking through the corrosion, the existing detail suggests a sharpness grade of Fine 12. Our EAC grade AG3.
From The COL Steve Ellsworth Die State Collection. PCGS# 35705

1794 Head of 1794 Cent, VF Details
S-49, Die State II

- 4578** 1794 Head of 1794, S-49, B-41, R.2 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State II. The vertical crack through the E in LIBERTY, familiar to 1794 specialists, first appears in this state. A well defined and granular ebony-brown example. Portions of the portrait and the lower right obverse border are burnished. Our EAC grade Fine 15.
Purchased from Mark Schwartz (9/11/2010).
From The COL Steve Ellsworth Die State Collection. PCGS# 35609

1794 Head of 1794 Cent, S-49
Die State III

- 4579** 1794 Head of 1794, S-49, B-41, R.2 PCGS Genuine. Breen Die State III. The vertical obverse crack extends from 12 o'clock to the middle of Liberty's hair. This medium brown example has XF details. Moderate dark gray verdigris is noted on the upper obverse and lower reverse. The portrait and date area exhibit many faint horizontal pinscratches. Our EAC grade VF20.
Purchased from Ed Hipps (10/15/1998).
From The COL Steve Ellsworth Die State Collection. PCGS# 35609

1794 Head of 1794 Cent, Very Fine
Rare Sheldon-50
Die State II

- 4580** 1794 Head of 1794, S-50, B-43, R.5 VF20 PCGS. Breen Die State II. The obverse is lightly lapped, weakening the base of the cap and removing much of the shoulder loop. A dark gunmetal-gray representative of this rare Sheldon pairing. Mildly granular overall with a couple of glossy areas on the obverse. Small marks are noted east of the date and above the E in CENT. Our EAC grade Fine 12.
Ex: Robert L. Moore (11/1958); Dorothy I. Paschal; Eugene Exman; Robinson S. Brown, Jr. (6/1977); Denis W. Loring (8/1982); Robinson S. Brown, Jr. (Superior, 9/1986), lot 68; Wes A. Rasmussen (Heritage, 1/2005), lot 3058; Al Boka (4/27/2007).
From The COL Steve Ellsworth Die State Collection. PCGS# 35612

-
- 4581** 1794 Head of 1794, S-51, B-42, Low R.5 — Damage — PCGS Genuine. Fine Details. Breen Die State II, "very rare," with a light crack between the 17 in the date. A very scarce variety. This walnut-brown cent has a dig on the E in LIBERTY and a couple of small pits on the upper left portion of the wreath. The portrait displays a number of tiny, faded marks. Our EAC grade VG8.
Ex: Tom Reynolds. Purchased from Walter Reed (9/2/2007).
From The COL Steve Ellsworth Die State Collection. PCGS# 35615

1794 Head of 1794 Cent
Rare S-51, Die State III

-
- 4582** 1794 Head of 1794, S-51, B-42, Low R.5 PCGS Genuine. Breen Die State III, "very rare." A bold crack across portions of the date, bust tip, and pole terminates at the vertical crack of State II. A challenging die variety. This medium brown cent is lightly granular and is glossy from a wipe. A few tiny marks are present, including a slight obverse rim knock at 3 o'clock. Our EAC grade VF20.
Ex: Dr. William H. Sheldon; Mayflower Coin Company (12/1967), lot 107; L. Neilson; Louis Ullian; Superior (6/2000), lot 125.
From The COL Steve Ellsworth Die State Collection. PCGS# 35615
-

**1794 S-55 Cent, VF Details
Head of 1794
Die State I**

- 4583 1794 Head of 1794, S-55, B-47, R.2 — Environmental Damage — PCGS Genuine. VF Details.** Breen Die State I. A light radial die crack is present beneath the cap. The A in STATES is blundered, entered northwest of its ideal position. Toned gunmetal-gray with olive-green high points. The surfaces are porous but all legends are bold and the hair is richly detailed. No marks are apparent on either side. Our EAC grade VG8.
Purchased from Phil Darby (10/19/2007).
From The COL Steve Ellsworth Die State Collection. PCGS# 35627

**1794 Head of 1794 Cent, XF
S-58, Die State I
Ex: Boys Town Collection**

- 4584 1794 Head of 1794, S-58, B-56, R.3 XF40 PCGS.** Breen Die State I. Perfect dies. This medium brown example has olive-green undertones. We note a narrow mark on the cheek and minor rim nicks at 3:30 on the obverse and at 6:30 and 12 o'clock on the reverse. The reverse displays myriad slender laminations, reminiscent of those often seen on 1787 Fugio cents. Our EAC grade VF25.
Ex: Boys Town Collection (Bowers and Merena, 3/1998), lot 127.
From The COL Steve Ellsworth Die State Collection. PCGS# 35636

- 4585 1794 Head of 1794, S-58, B-56, R.3 — Environmental Damage — NGC Details. VF.** Breen Die State III with a bold arc-shaped crack through UNIT. This lavender-brown cent is glossy and moderately granular. Unimportant rim dings are noted at 2:30 and 9 o'clock on the obverse and at 5 and 8 o'clock on the reverse. Our EAC grade Fine 12.
Ex: Paul Stevenson (8/17/2012).
From The COL Steve Ellsworth Die State Collection.

**1794 Head of 1794 Cent
Scarce S-61, Die State I**

- 4586 1794 Head of 1794, S-61, B-53, R.4 PCGS Genuine.** Breen Die State I with dentil clash marks near the denominator. This golden-brown cent is evenly and moderately porous. Only a couple of tiny obverse marks, and the reverse is unabraded. The portrait exhibits AU sharpness. Our EAC grade VF25.
Purchased from Jerry Stephenson (9/28/2007).
From The COL Steve Ellsworth Die State Collection. PCGS# 35645

**1794 Head of 1794 Cent, XF Details
Better S-61 Variety
Die State III**

- 4587 1794 Head of 1794, S-61, B-53, R.4 — Environmental Damage — PCGS Genuine. XF Details.** Breen Die State III. Boldly clashed on the field beneath the LIB in LIBERTY. A lavender-brown example with impressive sharpness and mark-free surfaces. Moderately and evenly granular, but attractive to the eye. Our EAC grade VF20.
Ex: Chris Victor-McCawley. Purchased from Mark Cadden (9/17/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35645

- 4588 1794 Head of 1794, S-63, B-37, R.2 VG10 PCGS.** Breen Die State I. A perfect dies example of the distinctive "Fallen 4" variety. An evenly defined and lightly granular deep olive-brown example. Marks are few and inconsequential. Our EAC grade VG10.
Ex: David Garvin; 2005 EAC Sale, lot 115; Al Boka (4/17/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 35651

**1794 Head of 1794 Cent
Rare S-64, No Fraction Bar
Die State I**

- 4589 1794 No Fraction Bar, Head of 1794, S-64, B-50, Low R.5 PCGS Genuine.** Breen Die State I without a crack through the D in UNITED. The rare and famous Sheldon variety that lacks a fraction bar, separately priced in the *Guide Book* for a number of years. The chocolate-brown surfaces are glossy and lightly burnished. Most of the coin is only mildly granular though the cheek is pitted, as is the obverse margin at 7:30. Marks are principally absent but slight rim dings are at 2 o'clock on the obverse and 4:30 on the reverse. Our EAC grade Fine 12.
Ex: Sebring and Garbe Collections (Bowers and Merena, 3/1996), lot 59.
From The COL Steve Ellsworth Die State Collection.

**1794 S-65 Cent, XF40
Head of 1794
Die State I**

- 4590 1794 Head of 1794, S-65, B-51, R.1 XF40 PCGS.** Breen Die State I without the usually seen vertical crack at 12 o'clock on the reverse. The misaligned obverse "Shielded Hair" variety, which lives up to its name on the present piece, as the lower curls show only slight wear. This glossy medium brown cent is mostly smooth, but has a slender mark on the neck and minor rim dings at 11:30 on the obverse and at 4:00, 6:30, and 9:00 on the reverse. Our EAC grade VF30.
Ex: 1982 ANA (Steve Ivy, 8/1982), lot 47.
From The COL Steve Ellsworth Die State Collection. PCGS# 35654

**1794 Head of 1795 Cent, VF30
S-69, Die State II**

- 4591 1794 Head of 1795, S-69, B-61, R.3 VF30 PCGS.** Breen Die State II with faint clash marks at the throat and elsewhere. A deep steel-gray cent with minutely granular surfaces. Marks are of no consequence aside from a tick on the upper hair and thin lines near the E in CENT. Our EAC grade VF20.
Purchased from Steve Parker (11/29/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 35690

**1794 Head of 1795 Cent, XF40
S-72, Die State III**

- 4592 1794 Head of 1795, S-72, B-65, R.2 XF40 PCGS.** Breen Die State III with a crack through the D in UNITED. A lovely glossy chocolate-brown Head of '95 type coin. Tiny marks are distributed but only a minor obverse rim ding at 6 o'clock merits singular mention. Liberty's profile is strike doubled. Our EAC grade VF30.
Ex: Superior (2/2002), lot 1142.
From The COL Steve Ellsworth Die State Collection. PCGS# 35699

**1795 Lettered Edge Cent, XF40
Rare S-76a, Die State II**

- 4593 1795 Lettered Edge, S-76a, B-4a, R.5 XF40 PCGS.** Breen Die State II. Lightly clashed, most visible near Liberty's throat. The Lettered Edge S-76a is much rarer than its Plain Edge S-76b successor. This dark brown representative is generally smooth but has minor ticks on the right obverse field and a mark atop the C in CENT. Each side has a few tiny rim dings. Housed in a green label holder. Our EAC grade VF25.
Ex: Alfred Bonard; French (5/1967); R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 546; Herb Silberman; Chuck Furjanic; Dr. Gerald Maas (Superior, 2/1998), lot 853; COL. Steven Ellsworth; Tom Prendergast (5/2008); Butternut (5/2013).
From The COL Steve Ellsworth Die State Collection. PCGS# 35720

- 4594 1795 Plain Edge, S-76b, B-4b, R.1 — Environmental Damage — PCGS Genuine. XF Details.** Breen Die State III. The clashed die state, carried over from prior strikings on lettered edge planchets. A golden-brown example with glimpses of gunmetal-gray granularity on the obverse and areas of darker verdigris on the reverse. Sharply defined and devoid of marks. Our EAC grade VF20.
Ex: David Bloom (10/8/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35723

**1795 Plain Edge Cent, VF30
S-77, Die State III**

- 4595 1795 Plain Edge, S-77, B-6, R.3 VF30 PCGS.** Breen Die State III with a faint descending die crack above the TE in STATES and a horizontal crack through the N in UNITED to the final A in AMERICA. A smooth golden-brown representative identifiable by a rim ding over the TA in STATES. Generally well impressed though the central reverse is lightly brought up between 3 and 9 o'clock. S-77 is significantly scarcer than the two usual plain edge varieties, S-76a and S-78. Our EAC grade Fine 15.
Purchased from Jerry Sajbel (10/29/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 35726

- 4596 1796 Liberty Cap, S-83, B-4, R.4 VG8 NGC.** Breen Die State I. A dark steel-gray example of this scarce Sheldon pairing. The surfaces are moderately granular and a few faded pinscratches outline the top, profile, and neck of the portrait. The open fields are unmarked. Our EAC grade VG8.
Purchased 4/20/2012.
From The COL Steve Ellsworth Die State Collection. PCGS# 35756

- 4597 1796 Liberty Cap, S-84, B-5, R.3 — Damage — PCGS Genuine. VF Details.** Breen Die State I. No crack from rim to the top of the O in OF. All legends are bold except for parts of ONE CENT. A lightly cleaned golden-brown cent with pitted areas on the left obverse and the left portion of the wreath. The right side of the wreath displays corrosion. The obverse has myriad pinscratches and a few thin marks are noted near the top of the wreath. A narrow flan striation between 6 and 11 o'clock on the reverse is as made. Our EAC grade VG7.
Ex: Don Weathers (10/7/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35759

**1796 Liberty Cap Cent, XF45
S-84, Die State II**

- 4598 1796 Liberty Cap, S-84, B-5, R.3 XF45 PCGS.** Breen Die State II with a die crack near OF. A nicely detailed and glossy olive-brown example. Void of verdigris and relatively unabraded, though a couple of tiny rim nicks are noted, a pair of faint marks are over the TY in LIBERTY, and the obverse field has a minor abrasion at 4 o'clock. Our EAC grade VF30.
Ex: Denis Loring (8/1983); Jack Robinson (1/1989); Chris Victor-McCawley (1/1990); Steve Chappin; Chuck Furjanic (1/10/2013).
From The COL Steve Ellsworth Die State Collection. PCGS# 35759

- 4599 1796 Liberty Cap, S-87, B-8, R.3 VF20 PCGS.** Breen Die State I without a die crack through the 7 in the date. A deep olive-green cent with a blush of plum-mauve on the central reverse. The minutely granular surfaces are unabraded save for slight obverse rim dings at 5 and 6 o'clock. Our EAC grade Fine 15.
Ex: Robert Destefano (11/16/2008).
From The COL Steve Ellsworth Die State Collection. PCGS# 35768

**1796 Liberty Cap Cent, VF30
S-87, Die State II**

- 4600 1796 Liberty Cap, S-87, B-8, R.3 VF30 PCGS.** Breen Die State II with a delicate die crack from the rim to the bust through the 7 in the date. A medium to deep olive-brown example with attractive definition and only slight surface granularity. The fields and rims are uncommonly free from contact, though the portrait displays faint abrasions in addition to a more noticeable horizontal mark behind the eye. Our EAC grade VF20.
Ex: Denis Loring (10/11/1981); 2002 EAC Sale (4/2002), lot 191.
From The COL Steve Ellsworth Die State Collection. PCGS# 35768

**1796 Liberty Cap Cent, VF Details
Scarce S-88, Die State I**

- 4601 1796 Liberty Cap, S-88, B-9, R.4 — Environmental Damage — PCGS Genuine. VF Details.** Breen Die State I without a crack near the 7 in the date. A conditionally rare variety. The PCGS Population Report lists a single example, as XF45 (the Rasmussen-Husak-Holmes specimen). The present well defined deep lavender-brown cent is generally granular, though the left obverse and cheek are fairly smooth. No abrasions or rim marks are evident. Our EAC grade VG10.
*Purchased from Mark Schwartz (9/11/2010).
From The COL Steve Ellsworth Die State Collection. PCGS# 35771*

- 4602 1796 Liberty Cap, S-89, B-10, R.3 — Environmental Damage — NGC Details. VF.** Breen Die State I without clash marks. A sharp dark gray example. The reverse is lightly granular, the obverse field is moderately granular, and the portrait and cap are granular with scattered pitting. A lens reveals only a couple of minor thin marks. Our EAC grade VG8.
*Purchased 3/24/2012.
From The COL Steve Ellsworth Die State Collection.*

- 4603 1796 Draped Bust, Reverse of 1795, S-92, B-28, R.3 PCGS Genuine.** Breen Die State II with a light crack at the base of the TY in LIBERTY. A glossy medium to deep olive-brown representative. The surfaces are moderately granular, and marks are absent except for a faint field line near the profile. A small curved rim clip at 9:30 is mint-made. Our EAC grade Fine 15.
*Ex: Chris Victor-McCawley (3/2009); Clay Everhart (4/14/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 35813*

- 4604 1796 Draped Bust, Reverse of 1795, S-92, B-28, R.3 PCGS Genuine.** Breen Die State V. The rare terminal die state with a prominent cud at 5 o'clock on the reverse. This dark brown cent has XF sharpness and is nearly free from marks. Evenly granular and lightly cleaned. Our EAC grade VG8.
*Ex: Superior (9/1998), lot 1146.
From The COL Steve Ellsworth Die State Collection. PCGS# 35813*

**1796 Reverse of 1795 Cent
S-93, Die State I**

- 4605 1796 Draped Bust, Reverse of 1795, S-93, B-34, R.3 PCGS Genuine.** Breen Die State I. The obverse is clashed beneath the chin and ribbon. This is the plate coin for Die State III in the Breen Encyclopedia, though there is no sign of the crack near RICA associated with that state. Dusky olive-green fields accompany gunmetal-gray high points. The surfaces are moderately granular with recessed areas near the upper right wreath, bust tip, and left obverse border. Devoid of consequential contact. Our EAC grade Fine 15.
*Ex: Bowers and Merena (11/1994), lot 2040; 2002 EAC Sale (4/2002), lot 195.
From The COL Steve Ellsworth Die State Collection.*

- 4606 1796 Draped Bust, Reverse of 1795, S-93, B-34, R.3 VG10 PCGS.** Breen Die State VII with an internal cud near the ER in AMERICA. A dark steel-gray cent whose evenly granular surfaces are mark-free aside from a faint vertical line behind the shoulder curl. Our EAC grade VG8.
*Ex: Phil Darby (6/8/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 35816*

**1796 Reverse of 1795 Cent
Rare S-96, Die State II+**

- 4607 1796 Draped Bust, Reverse of 1795, S-96, B-32, R.6 PCGS Genuine.** Breen Die State II+ with a prominent bisecting crack on the reverse between 3 o'clock and 8:30. The reverse field is prominently buckled near the C in CENT, unmentioned in Breen or Noyes, and a later die state than the Holmes discovery specimen. A very rare Sheldon variety. This example has Fine details but the deep lavender-brown surfaces are moderately granular and the left obverse field has many faded pinscratches. All legends are bold. Tied for seventh finest. Our EAC grade VG7.
*From a collection of large cents started in the 19th century by Charles Hixson, later added to by Eli Hixson, and around 1932 passed on to Sue A. Eppler, then sold unattributed in 1986 by her son, Keith A. Eppler, to Dennis Pacheco (Panda Coin Exchange); Robert E. Vail (11/21/1988); Del N. Bland; Dr. Philip W. Ralls (12/1988); Denis W. Loring (9/1998); Walter H. Reed (2/14/2003).
From The COL Steve Ellsworth Die State Collection.*

4608 1796 Draped Bust, Reverse of 1795, S-97, B-20, R.3 VF20 PCGS. Breen Die State uncertain. A dark brown cent with minimally abraded and moderately granular surfaces. Most legends are bold though the top of LIBERTY is faint. Our EAC grade VG8.
Ex: David Walker (11/21/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 35825

4609 1796 Draped Bust, Reverse of 1795, S-97, B-20, R.3 PCGS Genuine. Breen Die State III-IV with an obverse rim break between 2:30 and 3:30. The walnut-brown surfaces are granular and a few faint thin marks are placed near the rim break and the upper portion of the portrait. Our EAC grade VG8.
Ex: Fred Borchardt; Walter Reed (11/8/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 35825

4610 1796 Draped Bust, Reverse of 1795, S-97, B-20, R.3 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State III-IV. The fields are chestnut-gold and the high points are powder-blue. An evenly granular example that is lightly abraded save for light tooling on the lower left reverse, a thin mark above the ON in ONE, and a minor reverse rim ding at 2 o'clock. The portrait is glossy. Our EAC grade VG10.
Ex: Ken Mote (1986); Robert Matthews (5/1989); Doug Bird; Pierre Fricke; Clay Everhart; John Sullivan; John C. Koebert (9/3/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 35825

**1796 Reverse of 1795 Cent
S-97, Die State IV**

4611 1796 Draped Bust, Reverse of 1795, S-97, B-20, R.3 PCGS Genuine. Breen Die State IV with a light crack atop BERTY. A dark steel-gray cent with nearly XF sharpness, but the surfaces are moderately granular, and both sides are extensively pinscratched from verdigris removal. The PCGS Population data lists only three examples, as Good 6, VF20, and VF35. Our EAC grade VG10.
Purchased from J.E.L. Coins (12/1986).
From The COL Steve Ellsworth Die State Collection. PCGS# 35825

**1796 Draped Bust Cent, Fine 15
Reverse of 1795
S-99, Die State I**

4612 1796 Draped Bust, Reverse of 1795, S-99, B-22, R.5 Fine 15 NGC. Breen Die State I without the prominent obverse crack from 9 to 11 o'clock through the ribbon. A lavender-brown representative of this desirable Sheldon pairing. The glossy surfaces are lightly granular. Marks are confined to a single thin horizontal line from the eye to the rim at 2:30. The date is sharp though the denominator, LIBERTY, and STATES OF are moderately faded. Our EAC grade VG8.
Ex: Hiram T. Ward; Denis W. Loring; G. Lee Kuntz (Superior, 10/1991), lot 111; Long Beach Sale (McCawley & Grellman, 9/1997), lot 72.
From The COL Steve Ellsworth Die State Collection. PCGS# 35831

**1796 Reverse of 1795 Cent, Fine 12
Rare S-99, Terminal Die State III**

4613 1796 Draped Bust, Reverse of 1795, S-99, B-22, R.5 Fine 12 PCGS. Breen Die State III with the bold crack of State II now biplanar, weakening the LI (and portions of B) in LIBERTY. This impressively pedigreed example has pleasing medium brown surfaces, though we note two minor pits, located on the second S in STATES and the right ribbon loop. Tied for sixth in the Noyes census as VG10. Our EAC grade Fine 12.
Ex: James F. Ruddy (10/1969); Jules Reiver (Heritage, 1/2006), lot 19279; Walter Husak (Heritage, 2/2008), lot 2100.
From The COL Steve Ellsworth Die State Collection. PCGS# 35831

4614 1796 Draped Bust, Reverse of 1797, S-100, B-24, R.5 — Damage — PCGS Genuine. VF Details. Breen Die State I. A well defined example of this much better variety. A medium gunmetal-gray cent. The obverse is glossy from a wipe and has several tiny distributed marks. A small dig is on the base of the neck. The reverse is lightly smoothed above the N in ONE. Our EAC grade VG7.
Ex: Chris Victor-McCawley; Clay Everhart; James E. Long, Jr.; John C. Koebert (2/20/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 35846

1796 Reverse of 1794 Cent, VF Details
Very Scarce S-101, Die State I

- 4615** 1796 Draped Bust, Reverse of 1794, S-101, B-25, Low R.5 — **Environmental Damage** — PCGS Genuine. VF Details. Breen Die State I without a crack through AMERI. This ebony-brown representative is moderately and evenly granular. Marks are absent save for a minor reverse rim nick at 9:30. A sharp example of a challenging Sheldon marriage. Our EAC grade VF20.
Ex: Richard Picker; G. Lee Kuntz (Superior, 10/1991), lot 113; J.R. Frankenfield (Superior, 2/2001), lot 318.
From The COL Steve Ellsworth Die State Collection. PCGS# 35783

1796 LIHERTY Cent, VF Details
S-103, Die State I

- 4616** 1796 Draped Bust, LIHERTY, S-103, B-27, R.3 — **Environmental Damage** — PCGS Genuine. VF Details. Breen Die State I with only a faint crack through AMERIC. The scarcer of the two blundered LIBERTY Sheldon varieties. The present golden-brown cent has nearly XF detail and displays luster within the curls, but the glossy surfaces are granular, particularly on the reverse and the left obverse. No marks are noticeable. Our EAC grade VG10.
Purchased from Don Poole (3/6/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35882

1796 LIHERTY Cent, VF Details
S-104, Die State I

- 4617** 1796 Draped Bust, LIHERTY, S-104, B-45, R.3 — **Environmental Damage** — PCGS Genuine. VF Details. Breen Die State I without a crack near the A in STATES. A mahogany-brown example with moderately granular surfaces and a number of small to medium-sized pits. The reverse displays several freckles of reddish verdigris and has minor rim knocks at 7:30 and 9:30. Our EAC grade VG10.
Purchased from Greg Holmes (9/24/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 35849

1796 LIHERTY Draped Bust Cent
S-104, Die State II

- 4618** 1796 Draped Bust, LIHERTY, S-104, B-45, R.3 PCGS Genuine. Breen Die State II with a faint crack from the rim to the A in STATES. This LIHERTY cent has XF sharpness. The surfaces are evenly microgranular and perhaps lightly whizzed. The fields are deep walnut-brown and the high points are olive-gold. A minor obverse rim ding is noted at 12 o'clock. Double struck, through the first strike, except near the right termination of the wreath. Our EAC grade VF20.
Ex: Tennessee Coin Exchange; Bob Grellman; Doug Bird (5/10/1986).
From The COL Steve Ellsworth Die State Collection.

1796 Reverse of 1797 Cent
Scarce Sheldon-105
Die State II

- 4619** 1796 Draped Bust, Reverse of 1797, S-105, B-44, Low R.5 PCGS Genuine. Breen Die State II with light clash marks. The 6 is widely repunched south. A dark gray representative of this elusive die marriage. A nicely defined but moderately granular cent. Only lightly abraded, though a small pit is on the field near the mouth, and a few ticks are beneath the N in UNITED. Our EAC grade VG10.
Ex: grandson of a Norfolk, Virginia customs collector; James E. Long, Jr. (5/1986); Denis W. Loring (5/9/1986); Robinson S. Brown, Jr. (Superior, 1/1996), lot 146.
From The COL Steve Ellsworth Die State Collection. PCGS# 35852

1796 Reverse of 1794 Cent
Very Scarce S-106

- 4620 1796 Draped Bust, Reverse of 1794, S-106, B-14, High R.4 PCGS Genuine.** The die state is uncertain but early. This better variety example has XF details but the surfaces are granular. Darkly toned overall with olive-gold high points on the portrait. No marks are remotely noticeable aside from a small reverse rim ding at 6 o'clock. Our EAC grade VF25.
Ex: *Lindsmith Collection (Bowers and Merena, 3/2000)*, lot 85.
From *The COL Steve Ellsworth Die State Collection*. PCGS# 35789

- 4621 1796 Draped Bust, Reverse of 1794, S-106, B-14, High R.4 — Scratch — PCGS Genuine. VF Details.** Breen Die State II. Clashed from the drapery near OF. A moderately granular steel-blue example with olive-brown high points. The obverse exhibits myriad light pinscratches and has a dull vertical mark above the bust tip. A very scarce variety. Our EAC grade Good 5.
Ex: *Butternut (1998)*; *Clay Everhart*; *James E. Long, Jr.*; *John C. Koebert (2/20/2012)*.
From *The COL Steve Ellsworth Die State Collection*. PCGS# 35789

- 4622 1796 Draped Bust, Reverse of 1794, S-107, B-13, R.5 PCGS Genuine.** Breen Die State II. A cud extends from the Y in LIBERTY past 2 o'clock. The lavender-brown surfaces are granular and burnished but all legends are bold. A challenging Sheldon marriage. Our EAC grade Good 4.
Ex: *James E. Long, Jr.*; *Clay Everhart (7/3/2008)*.
From *The COL Steve Ellsworth Die State Collection*. PCGS# 35792

1796 Draped Bust Cent, XF Details
Reverse of 1794
S-108, Die State V

- 4623 1796 Draped Bust, Reverse of 1794, S-108, B-12, R.4 — Environmental Damage — PCGS Genuine. XF Details.** Breen Die State V with a heavy die crack from the 96 in the date through the bust tip and into the right field. This crack intersects with another that descends from the nose to the rim at 4 o'clock. The present cent has ebony-brown fields and walnut-brown high points. The surfaces are mildly to moderately granular. The obverse has a small rim ding at 3 o'clock, and the portrait and upper obverse rim exhibit many fine pinscratches. Our EAC grade VF25.
Ex: *Howard R. Newcomb (3/23/1936)*; *Willard S. Blaisdell*; *Del Bland (11/1978)*; *Dr. Willard J. Carmel, Jr. (8/26/1982)*; *C. Douglas Smith*; *Dr. Robert J. Shalowitz*; *Dr. C.R. Chambers (1/16/1988)*; *Robinson S. Brown, Jr. (Superior, 1/1996)*, lot 149; *Dr. Willard J. Carmel, Jr. (Superior, 9/1997)*, lot 200.

1796 Draped Bust Cent, VF Details
Reverse of 1794
S-109, Die State II

- 4624 1796 Draped Bust, Reverse of 1794, S-109, B-15, R.3 — Environmental Damage — PCGS Genuine. VF Details.** Breen Die State II. Die lapping on the reverse weakens wreath details. A sharp example of a fairly scarce variety. The dark steel-gray surfaces are luminous and evenly granular. Marks are of no relevance aside from a slight obverse rim ding at 10 o'clock. Our EAC grade Fine 12.
Purchased from *John Hipps (1/18/2004)*.
From *The COL Steve Ellsworth Die State Collection*. PCGS# 35798

1796 Draped Bust Cent
S-110, Die State IV

- 4625 1796 Draped Bust, Reverse of 1794, S-110, B-16, R.3 PCGS Genuine.** Breen Die State IV. A crack descends from the shoulder curl through the date. A sharp example of S-110, noteworthy for its repunched LI in LIBERTY. A lightly granular golden-brown cent. The obverse is glossy from a thorough wipe. A small pit is beneath the hair ribbon and careful examination locates a couple of minor obverse marks. Our EAC grade VF25.
Ex: *2001 EAC Sale (3/2001)*, lot 195.
From *The COL Steve Ellsworth Die State Collection*. PCGS# 35801

1796 Reverse of 1794 Cent
S-110, Terminal Die State IX

- 4626 1796 Draped Bust, Reverse of 1794, S-110, B-16, R.3 PCGS Genuine.** Breen Die State IX, the terminal state with further bold cracks from the bust tip and on the right obverse field. The large cud over TY is from State VIII. An attractive example with XF sharpness. The glossy mahogany-brown surfaces are burnished but minimally abraded. A repair is noted beneath the ear. Our EAC grade VF35.
Ex: *Santa Clara Signature (Heritage, 11/2002)*, lot 5096; *Victor Scheide (7/10/2009)*.
From *The COL Steve Ellsworth Die State Collection*. PCGS# 35801

**1796 Draped Bust Cent, VF20
Rare Sheldon-111
Die State II**

- 4627 1796 Draped Bust, Reverse of 1794, S-111, B-17, Low R.5 VF20 PCGS.** Breen Die State II with minor die chips beneath the E in UNITED. A moderately granular dark gunmetal-gray example of this difficult Sheldon marriage. A narrow mark is noted on the ES in STATES and the obverse has a few minor to moderate rim dings. Housed in an old green label holder. Our EAC grade Fine 15.
Ex: Boys Town Collection (Bowers and Merena, 3/1998), lot 144; Steven Ellsworth; Butternut; John C. Koebert (9/3/12).
From The COL Steve Ellsworth Die State Collection. PCGS# 35804

**1796 Reverse of 1797 Cent, Fine 15
Ex: Norweb, Frankenfield
Rare Sheldon-113, Die State IV**

- 4628 1796 Draped Bust, Reverse of 1797, S-113, B-41, R.5 Fine 15 PCGS.** Breen Die State IV with a biplanar die crack descending through the 17 in the date. A dark gray example of this rare die pairing. The surfaces are brushed and moderately granular. No marks are consequential, though we note a faint hair-thin horizontal line on the cheek. Our EAC grade VG10.
Ex: Anderson Dupont Sale (Stack's, 9/1954), lot 148; Norweb Collection (Bowers and Merena, 11/1988), lot 2755; J.R. Frankenfield (Superior, 2/2001), lot 335.
From The COL Steve Ellsworth Die State Collection. PCGS# 35855

- 4629 1796 Draped Bust, Reverse of 1797, S-113, B-41, R.5 Good 6 PCGS.** Breen Die State V. The rare terminal die state with a large break on the lower left obverse, including the 17 in the date. However, any example of S-113 is hard to find. A deep gray representative with lightly granular and minimally marked surfaces. Our EAC grade Good 5.
Ex: Dr. Robert Batchelder (1965); C.F. Gordon, Jr.; Ken Mote (4/1985); Robert E. Matthews (Superior, 5/1989), lot 258; Joel Spingarn; Red Henry; Clay Everhart (3/18/2001).
From The COL Steve Ellsworth Die State Collection. PCGS# 35855

- 4630 1796 Draped Bust, Reverse of 1797, S-114, B-42, Low R.5 PCGS Genuine.** Breen Die State II. A heavy rim to rim crack crosses the tops of the TY in LIBERTY. A dark brown example of this elusive Sheldon marriage. The evenly granular surfaces lack any noticeable abrasions. Our EAC grade Good 5.
Ex: Walter Reed (4/23/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 35858

- 4631 1796 Draped Bust, Reverse of 1797, S-114, B-42, Low R.5 PCGS Genuine.** Breen Die State IV. The very rare terminal die state with a large cud centered over the TY in LIBERTY. The rim break near 10:30 is also seen on Die State III. A granular and dark olive-gray cent. The dies are misaligned, which causes the upper obverse and lower reverse to be much sharper than the lower obverse and upper reverse. Our EAC grade AG3.
Ex: Heritage (9/2003), lot 5282; Clay Everhart (10/22/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 35858

**1796 Draped Bust Cent
Reverse of 1797, S-115
Die State II**

- 4632 1796 Draped Bust, Reverse of 1797, S-115, B-43, R.3 PCGS Genuine.** Breen Die State II with faint clash marks at the chin. A moderately and evenly granular cent with a luminous olive-green obverse and a dark sea-green reverse. A few thin marks are near the TY in LIBERTY. Our EAC grade Fine 12.
Ex: S. Emerson (2/1978); Richard V. Punchard (4/1993); Wes Rasmussen (Heritage, 1/2005), lot 3132.
From The COL Steve Ellsworth Die State Collection. PCGS# 35861

**1796 Reverse of 1797 Cent
Ex: Holmes
S-115, Die State VI**

- 4633 1796 Draped Bust, Reverse of 1797, S-115, B-43, R.3 PCGS Genuine.** Breen Die State VI with arc-shaped cracks above the TY in LIBERTY, which become cuds in later strikes of the variety. A well-pedigreed dark brown example with AU sharpness. The obverse is mildly to moderately granular. The reverse is smooth save for a small pit on a leaf near the I in AMERICA. Darkened at one time, and the reverse field is glossy above ONE. In the Bland Census, called XF40 and listed as the second finest known. Our EAC grade VF35.
Ex: R.N. Matylewicz; George Ramont; Charles E. Harrison (3/1993); Dr. Philip Ralls (4/18/1997); Robert C. Clark (Bowers and Merena, 8/2000), lot 265; Jack Wadlington (via Bob Grellman and Chris Victor-McCawley, 6/30/2005; Daniel W. Holmes, Jr. (Goldberg Coins, 9/2009), lot 197.
From The COL Steve Ellsworth Die State Collection.

- 4634 1796 Draped Bust, Reverse of 1795, S-116, B-36, Low R.5 Good 6 PCGS.** Breen Die State I without clash marks. A very scarce die variety. An evenly granular deep gunmetal-gray example. The peripheral legends are fully readable and range from clear to faint. Unabraded save for a single nick at the reverse center. Our EAC grade AG3.
Purchased from Walter Reed (4/23/2005). Ex: Tom Reynolds (9/8/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 35834

1796 Draped Bust Cent, VF Details
Reverse of 1795
Rare S-116, Die State II

- 4635** 1796 Draped Bust, Reverse of 1795, S-116, B-36, Low R.5 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State II with bold obverse clash marks. A steel-blue representative of this much better die pairing. Pitted on the right obverse border, on the wreath near UNITED, and on the reverse margin near 3 o'clock. The nose and forehead curl also display pits. The reverse periphery has a number of light pinscratches. Our EAC grade VG7. Purchased from Chris Schwerd (10/6/2005). From The COL Steve Ellsworth Die State Collection. PCGS# 35834

1796 Reverse of 1797 Cent
Rare Sheldon-118
Die State II

- 4637** 1796 Draped Bust, Reverse of 1797, S-118, B-39, High R.5 PCGS Genuine. Breen Die State II with a rim die break on the reverse between 6:30 and 7 o'clock. A rare die pairing. This dark gunmetal-gray example has VF sharpness. The reverse is moderately granular, while the obverse is granular and exhibits a number of tiny pits on the portrait and right field. Devoid of remotely relevant contact. Our EAC grade VG10. Ex: Walter Breen; Dorothy I. Paschal; Ray Chatham; Fred Borchardt; Walter Reed (1/9/2005). From The COL Steve Ellsworth Die State Collection. PCGS# 35867

1796 Reverse of 1797 Cent
Rare Sheldon-117
Die State II

- 4636** 1796 Draped Bust, Reverse of 1797, S-117, B-37, High R.5 PCGS Genuine. Breen Die State II with a faint crack through the top of portions of LIBERTY. This dark gray cent has XF sharpness. The surfaces are lightly to moderately granular, and faded sea-green verdigris is noted on the cheek, on the date and drapery, and on the upper left portion of the wreath. The obverse field has a pit at 8:30 and a small scrape near 3:30. Sharper than the Dan Holmes example. Our EAC grade VG10. Ex: Early American Copper Auction (10/1993), lot 59; EAC Sale (4/1998), lot 101. From The COL Steve Ellsworth Die State Collection.

1796 Draped Bust Cent, VF Details
Reverse of 1797
Rare NC-3 Variety

- 4638** 1796 Draped Bust, Reverse of 1797, S-NC-3, B-33, R.6 — Scratch — PCGS Genuine. VF Details. Breen Die State I with light clash marks on the reverse. The N in CENT was initially entered inverted and has a vestige right foot. A very rare die pairing, though more collectible than in Sheldon's day. This powder-blue and almond-gold cent is somewhat luminous from cleaning but is only minimally granular. The portrait and left obverse field exhibit many straight thin marks. Tied for third place in the Noyes census, who lists it as VG8(F12). Our EAC grade VG10. Ex: Charles Blood; EAC Sale (4/1997), lot 131. From The COL Steve Ellsworth Die State Collection. PCGS# 35876

**1796 Reverse of 1795 Cent, Fair 2
Rare NC-4, Die State II**

- 4639 1796 Draped Bust, Reverse of 1795, S-NC-4, B-23, High R.5 Fair 2 PCGS.** Breen Die State II, "extremely rare," with a crack connecting the tops of the TES in STATES. A collectible example of this challenging variety. The fields are darkly toned and moderately granular. The high points are stone-gray. No marks are evident. All legends are readable though some of the letters fade near the rims. Our EAC grade AG3.
Purchased from Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 35840

**1797 Reverse of 1797 Cent
Stems, Rare S-124 Variety
Die State II**

- 4640 1797 Reverse of 1797, Stems, S-124, B-14, High R.5 PCGS Genuine.** Breen Die State II with the obverse die sinking near the date. This dark mahogany-brown example has clear legends and shows some hair definition. The surfaces are granular and Liberty's neck exhibits pitting. No marks are apparent aside from reverse rim dings at 3 o'clock and 4:30. Our EAC grade Good 5.
Ex: John Cloutier (2/28/2000).
From The COL Steve Ellsworth Die State Collection.

- 4641 1797 Reverse of 1797, Stems, S-126, B-16, R.3 PCGS Genuine.** Breen Die State II with clash marks on both sides but no cracks. This golden-brown and sea-green cent has AU sharpness but the obverse field exhibits three X marks, one near the chin and two near the ribbon. Scattered minute flan marks are as struck. Our EAC grade XF40.
Ex: Tom Reynolds (11/1993); Mac McDonald (Heritage, 9/1997), lot 5112.
From The COL Steve Ellsworth Die State Collection. PCGS# 35918

- 4642 1797 Reverse of 1797, Stems, S-126, B-16, R.3 PCGS Genuine.** Breen Die State IV. A faint diagonal crack from the nose distinguishes this middle die state. This crisply struck and partly lustrous golden-brown cent is moderately granular throughout but has no remotely noticeable marks. Our EAC grade XF40.
Ex: Bowers and Merena (3/1997), lot 50.
From The COL Steve Ellsworth Die State Collection. PCGS# 35918

**1797 S-127 Cent, XF45
Stems, Reverse of 1797
Among the Finest Known
Ex: French, Naftzger, Husak**

- 4643 1797 Reverse of 1797, Stems, S-127, B-17, R.4 XF45 PCGS.** Breen Die State IV with a rising crack between the TA in STATES. The Breen Encyclopedia plate coin and second finest per Bland. A well defined olive-brown cent with only distributed tiny marks. ONE CENT is lightly brought up. A very scarce to rare die marriage discovered by Dr. Sheldon in 1931. Our EAC grade VF30.
Ex: Dr. George P. French (B. Max Mehl, 1929 FPL), lot 174; James G. Macallister; Henry C. Hines; Henry A. Sternberg; M.H. Bolender (3/1956), lot 1593; R.E. Naftzger, Jr. (3/1973); C. Douglas Smith; Dr. Robert Schuman (Superior, 6/2000), lot 148; Walter Husak (Heritage, 2/2008), lot 2130.
From The COL Steve Ellsworth Die State Collection. PCGS# 35921

**1797 Cent, VF20
Reverse of 1797, Stems
Very Scarce Sheldon-127**

- 4644 1797 Reverse of 1797, Stems, S-127, B-17, R.4 VF20 PCGS.** Breen Die State IV. A deep tan-brown example of this elusive Sheldon variety. The portrait exhibits considerable design definition. The evenly granular surfaces are minimally abraded. Our EAC grade VF20.
Ex: Charles French 1971 FPL; Del Bland (5/9/1971); C. Douglas Smith (12/1982); G. Lee Kuntz (Superior, 10/1991), lot 141; McCawley and Grellman (9/1997), lot 78.
From The COL Steve Ellsworth Die State Collection. PCGS# 35921

1797 S-130 Cent
Reverse of 1797, Stems
Die State II

- 4645** 1797 Reverse of 1797, Stems, S-130, B-25, R.2 PCGS Genuine. Breen Die State II with a small spur crack inside the R in LIBERTY. This chocolate-brown cent has AU sharpness and is minimally abraded. The surfaces are evenly microgranular, and the obverse is lightly burnished. Our EAC grade XF40.
Ex: Paul Sutton (Stack's, 5/1973), lot 16; later, Kagin's (5/1978), lot 58; later, Mid-American (5/1989), lot 7; Superior (10/1989), lot 911; G. Lee Kuntz (Superior, 10/1991), lot 145; J.R. Frankenfield (Superior, 2/2001), lot 359.
From The COL Steve Ellsworth Die State Collection. PCGS# 35930

1797 S-130 Cent
Stems, Reverse of 1797
Die State III

- 4646** 1797 Reverse of 1797, Stems, S-130, B-25, R.2 PCGS Genuine. Breen Die State III with a solid appearance to the large obverse die flaw. This partly lustrous example has AU sharpness. The reverse is dark brown while the obverse is retoned in cobalt-blue and olive shades. The obverse field is smoothed, as is Liberty's neck and cleavage. The reverse is unabraded except for two lengthy scratches near the C in CENT. Our EAC grade VF25.
Ex: EAC Sale (4/2002), lot 226; Phil Speranza (11/11/2002).
From The COL Steve Ellsworth Die State Collection. PCGS# 35930

- 4647** 1797 Reverse of 1797, Stems, S-130, B-25, R.2 VF25 PCGS. Breen Die State IV. The conspicuous die break on the left obverse field attaches to the rim. A deep almond-gold cent with distributed tiny marks, none of which merit elaboration. Our EAC grade Fine 12.
Ex: James E. Long, Jr.; John Koeber (9/10/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 35930

1797 S-131 Cent, Choice VF
No Stems, Reverse of 1797
Die State I

- 4648** 1797 Reverse of 1797, No Stems, S-131, B-27, R.2 VF35 PCGS. Breen Die State I with the obverse break as seen on late examples of S-130. A glossy olive-brown example with pleasing sharpness. The obverse is moderately misaligned toward 3 o'clock, and a prominent flan flaw extends from the nose to the rim, all as made. We note a thin mark on the bases of LIB and a pair of lesser slender marks on the bust tip. Our EAC grade VF20.
Purchased from David Weinstein (10/14/1999).
From The COL Steve Ellsworth Die State Collection. PCGS# 35981

- 4649** 1797 Reverse of 1797, No Stems, S-133, B-29, R.5 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State IV. A radial die crack from 4 o'clock reaches the base of Liberty's throat. A chocolate-brown obverse pairs with a gunmetal-gray reverse. The reverse and right obverse margin are granular though most of the obverse is smooth. The portrait has a few minor to moderate marks. Our EAC grade VG10.
Purchased from Walter Reed (1/9/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 35987

- 4650** 1797 Reverse of 1797, Stems, S-134, B-4, R.4 PCGS Genuine. Breen Die State IV with a diagonal crack above the E in AMERICA. The scarce Sheldon variety with a large die chip on the right obverse field. A deep brown cent with nearly XF sharpness. The surfaces are lightly granular and the small initials IH are on the right obverse field. Two pinscratches are noted on Liberty's hair and cleavage, with a third thin mark near 6:30 on the reverse. Our EAC grade Fine 12.
Ex: Flambeau Stamp & Coin Co. (1966 FPL), lot 69; Philip Van Cleave (Kagin's, 1/1986), lot 5145; 1986 EAC (5/1986).
From The COL Steve Ellsworth Die State Collection. PCGS# 35933

- 4651** 1797 Reverse of 1797, Stems, S-136, B-7, R.3 PCGS Genuine. Breen Die State V. Light die cracks cross the U in UNITED and the M in AMERICA. A moderately granular dark gray cent with tan verdigris on the reverse border between 11 and 4 o'clock. The portrait has a few faint thin marks. Our EAC grade VF20.
Ex: Fox Valley Coin; Louis Canban (10/20/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 35939

**1797 S-137 Cent, XF40
Stems, Reverse of 1797
Die State IV**

- 4652 1797 Reverse of 1797, Stems, S-137, B-8, R.2 XF40 PCGS.** Breen Die State IV with a delicate crack through the R in AMERICA. The first S in STATES is clearly repunched south, diagnostic for the variety. A dark olive-brown example with mildly granular surfaces. A slightly soft strike near CENT retains the planchet texture within that region. A loupe reveals a few widely spaced hairlines on the portrait. Our EAC grade VF35.
Ex: Henry C. Hines; Homer K. Downing (ANA, New Netherlands, 8/1952), lot 1778; Thomas P. Warfield (Associated Coin Auction Co., 10/1955), lot 251; Del Bland (5/1957); William H. Smith (Eureka Coin Shop); later, Chuck Furjanic; First Coinvestors; Pine Tree Auction Co. (2/1975), lot 671; later, First Coinvestors (1/1985); Gordon J. Wrubel; Dr. Philip W. Ralls (3/1/1996); Dr. Willard J. Carmel, Jr. (Superior, 9/1997), lot 216.
From The COL Steve Ellsworth Die State Collection. PCGS# 35942

- 4653 1797 Reverse of 1797, Stems, S-138, B-20, R.1 VF35 PCGS.** Breen Die State V with a light horizontal crack between the leaves above ONE. Die sinking near OF is well advanced. A golden-brown and olive-green example with pleasing sharpness on the portrait. Smooth aside from a small reverse rim nick at 5 o'clock and a few faded ticks on the right obverse field. Our EAC grade VF25.
Ex: Bowers and Merena (3/1996), lot 151.
From The COL Steve Ellsworth Die State Collection. PCGS# 35945

**1797 S-139 Cent, Choice XF
Reverse of 1797, Stems
Die State V**

- 4654 1797 Reverse of 1797, Stems, S-139, B-21, R.1 XF45 PCGS.** Breen Die State V with obverse buckling extended to the field above the bust tip. The wedge-shaped break behind the shoulder curls likely soon put an end to production of the variety. A deep chestnut-brown cent with splendid detail and traces of remaining luster. Mostly smooth, though a few ticks are near the C in CENT and the right obverse rim has three small nicks. Our EAC grade VF35.
Ex: Millennium ANA (Bowers and Merena, 8/2000), lot 273.
From The COL Steve Ellsworth Die State Collection. PCGS# 35948

**1797 S-140 Cent, Choice XF
Stems, Reverse of 1797
Die State VII**

- 4655 1797 Reverse of 1797, Stems, S-140, B-22, R.1 XF45 PCGS.** Breen Die State VII with dentils clashed above STATES. Buckling at OF and the bust tip is pronounced. An ebony-brown cent with exceptionally pleasing surfaces. An available variety but seldom in the present quality. Our EAC grade VF35.
Ex: Roger Cohen (Superior, 2/1992), lot 828; J.R. Frankenfield (Superior, 2/2001), lot 374.
From The COL Steve Ellsworth Die State Collection. PCGS# 35951

- 4656 1797 Reverse of 1797, Stems, S-141, B-18, R.4 VF25 PCGS.** Breen Die State III with a prominent vertical crack between the C in CENT and the rim at 6:30. A medium brown example of this scarce Sheldon variety. A few scattered minute marks but pleasing overall. Our EAC grade Fine 12.
Ex: Doug Bird, Mick Arconti; Walter Reed (1/7/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 35954

**1797 Reverse of 1797 Cent
Rare Sheldon-NC-5 Variety
Stems, Die State IV**

- 4657 1797 Reverse of 1797, Stems, S-NC-5, B-13, R.6 PCGS Genuine.** Breen Die State IV with a fairly lengthy obverse rim break near 1:30. A collectible example of this rare variety. This deep walnut-brown cent is extensively granular but all legends are clear except the 9 in the date. Marks are inconsequential save for a minor reverse rim nick at 5:30. Our EAC grade Good 4.
Purchased from Walter Reed (8/2/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 35969

**1798 First Hair Style Cent
Rare S-144 Variety
Die State III**

4658 1798 First Hair Style, S-144, B-1, High R.5 PCGS Genuine. Breen Die State III with a bold linear crack across the tops of OF. The reverse die is failing at the center, with ONE obscured by swelling. A well-pedigreed example of this rare variety. The dark gunmetal-gray surfaces are evenly and moderately granular. The obverse is burnished and the dentils are damaged above the R in LIBERTY with a small flattened area opposite at 5 o'clock. Our EAC grade Good 6.

Ex: Howard R. Newcomb (J.C. Morgenthau & Co., 2/1945), lot 179; Dr. William H. Sheldon; Dorothy I. Paschal (11/25/1977); Dr. Thomas S. Chalkley (Superior, 1/1990), lot 331; Robinson S. Brown, Jr. (Superior, 1/1996), lot 205.

From The COL Steve Ellsworth Die State Collection. PCGS# 36011

4659 1798 First Hair Style, S-145, B-2, R.3 VG10 PCGS. Breen Die State II with reverse die buckling near OF. A narrow straight rim clip is as made near 2 o'clock. This walnut-brown representative is lightly abraded except for two moderate obverse field marks near the ribbon and profile. Our EAC grade Good 6.

Ex: Becker (eBay, 8/2003); Clay Everhart (9/8/2003).

From The COL Steve Ellsworth Die State Collection. PCGS# 36014

**1798 First Hair Style Cent
Rare Sheldon-146
Die State II**

4660 1798 First Hair Style, S-146, B-3, Low R.5 PCGS Genuine. Breen Die State II. Hair detail is absent near the E in LIBERTY, since the obverse die was lapped to reduce evidence of rust. This rare variety cent has XF sharpness but the obverse is moderately pitted, burnished, and retoned in lilac and almond-gold shades. There are no noticeable marks. Our EAC grade Fine 15.

Ex: Henry C. Hines; Homer K. Downing (1952 ANA, New Netherlands, 8/1952), lot 1787; C. Douglas Smith; Dr. Robert Schuman (Superior, 5/2003), lot 435.

**1798 Cent, VF Details
Rare S-146, First Hair Style
Die State IV**

4661 1798 First Hair Style, S-146, B-3, Low R.5 — Environmental Damage—PCGS Genuine. VF Details. Breen Die State IV with faint vertical die lines within much of LIBERTY. A challenging Sheldon marriage. This dark walnut-brown cent is lightly to moderately granular. Small abrasions are scattered though only a mark above the bust tip merits singular mention. Our EAC grade Fine 15.

Ex: Dr. Charles A. Cass (Stack's, 11/1957), lot 144; C. Douglas Smith; Edward H. Schwartz (A. Kosoff, 10/1961), lot 167; R.E. Naftzger, Jr.; Robert Gildred (Kagin's, 10/1983), lot 1035; Jack Robinson (Superior, 1/1989), lot 295; Robinson S. Brown, Jr. (Superior, 1/1996), lot 207.

From The COL Steve Ellsworth Die State Collection. PCGS# 36017

**1798 S-148 Cent, XF40
Die State II, First Hair Style**

4662 1798 First Hair Style, S-148, B-11, R.2 XF40 PCGS. Breen Die State II with a crack across the base of the date. A lovely golden-brown cent with glossy and minimally abraded surfaces. Luster shimmers within the curls. Our EAC grade VF25.

Ex: Karl Stephens; Steve Fischer (1/1985); Tom Reynolds (4/1993); Chris Kromer; Superior (2/2001), lot 2195.

From The COL Steve Ellsworth Die State Collection. PCGS# 36023

4663 1798 First Hair Style, S-148, B-11, R.2 Fine 12 PCGS. Breen Die State VI with a large rim break over RTY. A lightly granular example with golden-brown fields and steel-blue high points. Only trivial ticks are present save for a minor obverse rim knock at 7:30. Our EAC grade Fine 12.

Ex: Tom Reynolds (10/2000); Clay Everhart (9/3/2003).

From The COL Steve Ellsworth Die State Collection. PCGS# 36023

**1798 First Hair Style Cent, Good 6
Better S-149 Marriage
Die State III**

- 4664 1798 First Hair Style, S-149, B-5, R.5 Good 6 PCGS.** Breen Die State III with a small linear die lump on the right obverse field. OF is partially obscured by buckling. A rare Sheldon marriage typically encountered in low grade. This medium brown cent is mostly smooth though the field near the hair ribbon is pitted and minor granularity is noted on UNITED STATES and the final letters in LIBERTY. The field near the profile has a few faded minor marks. Our EAC grade Good 5.
Ex: EAC Sale (1986), lot 122; EAC Sale (4/1995), lot 205.
From The COL Steve Ellsworth Die State Collection. PCGS# 36026

- 4665 1798/7 S-151, B-7, R.3 PCGS Genuine.** Breen Die State I. The obverse field is buckling near 9 o'clock but there are no cracks. One of only three overdated 1798 varieties. The underdigit 7 is obvious on the present medium brown piece. Unabraded with VF sharpness but lightly burnished and moderately and evenly granular. Green verdigris is noted near the left ribbon loop. Our EAC grade VG10.
Ex: Homer K. Downing; Barney Bluestone; Dr. Charles L. Ruby (Superior, 2/1974), lot 493; Richard A. Winterhalter; EAC Sale (4/1985), lot 166; Robert E. Matthews (Superior, 5/1989), lot 306; Evan Kopald; Early Copper Auction (1/1993), lot 69; Mac McDonald (Heritage, 9/1997), lot 5124.
From The COL Steve Ellsworth Die State Collection. PCGS# 35996

- 4666 1798/7 S-151, B-7, R.3 PCGS Genuine.** Breen Die State V. A bold crack passes through the upright of the E in AMERICA. This medium brown cent has Fine details but was burnished to reduce surface granularity, though light pitting remains evident and the left obverse field is rough. Minor obverse rim nicks at 3 o'clock and 3:30. Our EAC grade Good 6.
Ex: Walter Reed (11/26/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 35996

**1798/7 S-151 Cent, Fine 15
Die State VII**

- 4667 1798/7 S-151, B-7, R.3 Fine 15 PCGS.** Breen Die State VII with two additional faint cracks on the left obverse field. The second of three 1798/7 marriages, distinguished by a die chip beneath the left ribbon end. A minimally abraded medium brown representative with lightly granular surfaces. Our EAC grade VF20.
Ex: Bowers and Merena (11/1999), lot 311.
From The COL Steve Ellsworth Die State Collection. PCGS# 35996

- 4668 1798 First Hair Style, S-153, B-12, R.3 VG10 PCGS.** Breen Die State VII. The rare terminal die state with a large cud at the bust tip. A glossy olive-brown cent with scattered small to moderate marks, most noticeable beneath the C in CENT and on Liberty's shoulder. Our EAC grade VG8.
Ex: Fred Borchardt (1998); John Cloutier (11/18/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36029

- 4669 1798 First Hair Style, S-154, B-8, High R.4 PCGS Genuine.** Breen Die State I without clashes or noticeable buckling. This deep brown cent has XF details but is evenly granular. Abrasions are absent save for minor marks on the curls behind the upper neck. Our EAC grade VF20.
Ex: Sebring and Garbe Collection (Bowers and Merena, 3/1996), lot 179.
From The COL Steve Ellsworth Die State Collection. PCGS# 36032

**1798 S-155 Cent
Reverse of 1796
Die State VI**

- 4670 1798 Reverse of 1796, S-155, B-9, R.3 PCGS Genuine.** Breen Die State VI with the crack of state II now through LIB. Strongly clashed near RICA. A dark brown cent with minimal marks and only minor granularity. The obverse field is unobtrusively burnished. On 1798 cents, the Reverse of 1796 is scarce. Our EAC grade VF20.
Ex: Henry C. Hines; Dr. William H. Sheldon; Robert S. Carter, Jr.; Norman Locke (7/1984); Sol Varon; Superior (9/1998), lot 1179.
From The COL Steve Ellsworth Die State Collection. PCGS# 36002

**1798 Reverse of 1796 Cent
Rare Sheldon-156
Good 4, Die State I**

- 4671 1798 Reverse of 1796, S-156, B-10, High R.5 Good 4 PCGS.** Breen Die State I without obverse cracks. A rare Sheldon marriage. Dark mahogany-brown with distributed tiny and individually inconsequential marks. Mildly granular on the wreath near UNITED. Sharpest near the date though the fraction and selected other design elements are well worn. Our EAC grade Good 4.
Ex: Jack Robinson (1990 EAC); Mick Arconti (8/18/1997); Walter Reed (8/2/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36005

1798 S-157 Cent, AU50
First Hair Style
Terminal Die State IV

- 4672** 1798 First Hair Style, S-157, B-15, R.2 AU50 PCGS. Breen Die State IV with a radial die crack at 12:30 to the wreath. Both sides display substantial die rust, which should not be confused with verdigris. In fact, this chocolate-brown cent has pleasing surfaces. The strike is good though CENT is softly defined, usual for this terminal die state. A small area of orange color on the jaw. Our EAC grade XF40.
Ex: Robert J. Kissner (Stack's, 6/1975), lot 304; C. Douglas Smith; G. Lee Kuntz (Superior, 10/1991), lot 178; Robinson S. Brown, Jr. (Superior, 1/1996), lot 221; Robert C. Clark (Bowers and Merena, 8/2000); Walter Reed (4/19/2009).

1798 First Hair Style Cent, VF30
Scarce Sheldon-158
Die State II

- 4675** 1798 First Hair Style, S-158, B-17, R.4 VF30 PCGS. Breen Die State II with a bold linear reverse crack between 8:30 and 11 o'clock. This ebony-brown cent has XF sharpness and is only minutely granular. A loupe reveals a number of thin marks. A few flecks of verdigris near UNITED. Our EAC grade VF30.
Ex: Charles Clapp (3/1921); George Clapp; Dr. William H. Sheldon; Dorothy Paschal; Robinson S. Brown, Jr. (Superior, 9/1986), lot 223; Robert Matthews (Superior, 5/1989), lot 314; Robinson S. Brown, Jr. (Superior, 1/1996), lot 223; EAC Sale (4/1998), lot 115.
 From The COL Steve Ellsworth Die State Collection. PCGS# 36038

- 4676** 1798 First Hair Style, S-159, B-18, R.3 Fine 15 PCGS. Breen Die State I, the state carried over from the obverse's use for S-158. A medium brown and lilac example with unblemished surfaces. ONE CENT is faint though the other legends are bold. Our EAC grade VG10.
No provenance recorded.
 From The COL Steve Ellsworth Die State Collection. PCGS# 36041

1798 S-159 Cent, VF30
First Hair Style
Die State II

- 4677** 1798 First Hair Style, S-159, B-18, R.3 VF30 PCGS. Breen Die State II. A faint die crack emerges across the top of the LIB in LIBERTY. This well defined medium brown cent is somewhat glossy and shows minor granularity near the forehead and the ERIC in AMERICA. Small abrasions are scattered but none merit individual discussion. Our EAC grade VF20.
Ex: EAC Sale (4/2000), lot 197.
 From The COL Steve Ellsworth Die State Collection. PCGS# 36041

- 4678** 1798 First Hair Style, S-159, B-18, R.3 Fine 15 PCGS. Breen Die State IV. Numerous spindly die cracks emerge on the reverse. The vertical cracks on the left obverse are highly conspicuous. A moderately abraded and mildly luminous golden-brown representative. Our EAC grade VG8.
Ex: John K. Borcky (Thomas L. Elder, 6/1935), lot 681; later, Darwin Palmer (6/1974); Tom Reynolds (4/9/1991); Rod Burruss (10/3/2002); John Pijewski (5/2005), lot 1328; Chris Victor-McCawley; Richard Goss (7/2006); Clay Everhart (7/3/2008).
 From The COL Steve Ellsworth Die State Collection. PCGS# 36041

4679 1798 First Hair Style, S-161, B-22, R.2 VF35 PCGS. Breen Die State I. Obverse die state as inherited from S-160. Reverse die state perfect. This deep mahogany-brown cent is mildly granular and nearly unabraded. Minor verdigris near STATES. Our EAC grade VF30.
Ex: McLaughlin and Robinson (9/1987), lot 199.
From The COL Steve Ellsworth Die State Collection. PCGS# 36047

4680 1798 First Hair Style, S-161, B-22, R.2 PCGS Genuine. Breen Die State IV. An obverse die crack past 3 o'clock extends into the field. A moderately granular cent with mahogany-brown and ocean-blue undertones. Liberty's cheek and neck are smoothed. Our EAC grade VF20.
Ex: Fred Borchardt (1998); John Cloutier (11/18/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36047

4681 1798 First Hair Style, S-161, B-22, R.2 Fine 15 PCGS. Breen Die State IX. The reverse cud occupies all of the rim above the TE in STATES and is partly over the nearby A. This chocolate-brown example is problem-free save for a spot in front of Liberty's nose. Our EAC grade VG10.
Purchased at Pennsauken, New Jersey (10/11/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 36047

4682 1798 First Hair Style, S-162, B-23, R.4 — Environmental Damage — PCGS Genuine. Fine Details. Breen Die State II with a light die crack above OF. This evenly granular ebony-brown cent is lightly abraded overall, though a small obverse rim ding is at 2:30 and the portrait displays a few wispy pinscratches. Our EAC grade VG8.
Ex: Walter Reed (11/29/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36050

From The COL Steve Ellsworth Die State Collection. PCGS# 36086

4703 1798 Second Hair Style, S-173, B-38, R.3 VG10 PCGS. Breen Die State uncertain, but without a cud over the RTY in LIBERTY. Struck from widely rotated dies, usual for early strikes of Sheldon-173. All legends are bold on this dark brown cent. No marks are relevant though a pit is noted on the field above the bust tip. Our EAC grade VG10.
Purchased from John Cloutier (11/18/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36089

4704 1798 Second Hair Style, S-173, B-38, R.3 Fine 12 PCGS. Breen Die State V with a prominent cud over the RTY in LIBERTY. The dies are widely rotated. This cent has a deep olive-brown obverse and a sea-green and chestnut-tan reverse. The obverse has two thin marks near the chin and hair ribbon. The reverse is smooth save for a rim ding at 7 o'clock. Our EAC grade VG10.
Ex: Fred Borchardt; John Cloutier (11/18/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36089

4705 1798 Second Hair Style, S-173, B-38, R.3 Genuine PCGS. Breen Die State VIII. The late die state with an additional break over the L in LIBERTY. No break is seen over the CA in AMERICA. This dark brown example has a faint date and STATES OF though other legends are bold. The moderately granular surfaces have been burnished on the right obverse and upper reverse. Our EAC grade Good 5.
Ex: Pat Clark (6/5/2004).
From The COL Steve Ellsworth Die State Collection.

4706 1798 Second Hair Style, S-174, B-35, R.2 — Scratch — PCGS Genuine. VF Details. Breen Die State III. A middle die state with bold clashes near the numerator. A medium brown representative with a few pinscratches near the profile, ear, and hair ribbon. Our EAC grade VG8.
Ex: John Willis (11/22/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 36092

4707 1798 Second Hair Style, S-175, B-36, R.3 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State V. A crack extends from a leaf tip toward the second T in STATES. A bold medium brown representative with granular left borders, though the remainder of the design is problem-free. The curls glimmer with luster. Our EAC grade VF20.
Ex: Pat Clark (4/12/2002).
From The COL Steve Ellsworth Die State Collection. PCGS# 36095

4708 1798 Second Hair Style, S-176, B-24, R.4 PCGS Genuine. Breen Die State IV with a bulge developing on the reverse field near ES OF. This dark brown cent is mildly granular and moderately glossy with a dull slender vertical mark on Liberty's neck. Our EAC grade Fine 12.
Ex: Sebring and Garbe Collections (Bowers and Merena, 3/1996), lot 230.
From The COL Steve Ellsworth Die State Collection. PCGS# 36098

4709 1798 Second Hair, S-177, B-25, High R.4 — Damage or Tooling — PCGS Genuine. VG Details. Breen Die State III. A faint arch-shaped die break is apparent on the lower right obverse field. A deep walnut-brown cent with clear legends. Mildly granular near OF and Liberty's profile has a few pinscratches. Slight rim nicks at 4 o'clock on the obverse and 10 o'clock on the reverse. Our EAC grade Good 5.
Ex: White Plains, New York (11/26/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36101

**1798 Reverse of 1796 Cent, Good 4
Difficult Sheldon-178
Die State IV**

4710 1798 Reverse of 1796, S-178, B-26, High R.5 Good 4 PCGS. Breen Die State IV with two bold die cracks through the date. A dark brown cent with extensively granular surfaces. No marks are evident save for a tick above the hair ribbon. The legends are sharp except for OF and portions of UNITED. A challenging Sheldon marriage. Our EAC grade VG7.
Ex: EAC Sale (5/2008), lot 312.
From The COL Steve Ellsworth Die State Collection. PCGS# 36008

**1798 Reverse of 1796 Cent, VG10
Rare Sheldon-178
Die State IV**

4711 1798 Reverse of 1796, S-178, B-26, High R.5 VG10 PCGS. Breen Die State IV with a second (and lower) die crack through the date. A rare Sheldon variety, and one of only three 1798 marriages with a Reverse of 1796. A nearly unabraded medium brown cent with granular surfaces. OF is weakly brought up. Our EAC grade VG7.
Ex: Jim McGuigan (1/24/1984); Jack Robinson (Superior, 1/1989), lot 369; Robinson S. Brown, Jr. (Superior, 1/1996), lot 244.
From The COL Steve Ellsworth Die State Collection. PCGS# 36008

**1798 Cent, Second Hair Style
Rare S-180 Variety
Die State I**

4712 1798 Second Hair Style, S-180, B-41, High R.5 PCGS Genuine. Breen Die State I without the usually seen large cud over the second T in STATES. The reverse die failed early, contributing to the rarity of the variety. A richly detailed and evenly granular dark brown cent. Marks are limited to a few thin lines at the profile. Our EAC grade VG10.
Ex: C. Douglas Smith; Tom Reynolds; Walter Reed (4/23/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 36107

4713 1798 Second Hair Style, S-180, B-41, High R.5 Good 4 PCGS. Breen Die State III. The large die break above the second T in STATES extends further over the nearby E. A medium brown example of this challenging and interesting Sheldon variety. OF AMERICA and the denominator are worn smooth but the date is partly present. Relatively unblemished aside from a pair of thin reverse marks near 7 o'clock. Our EAC grade AG3.
Ex: Fred Borchardt; John Cloutier (11/18/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36107

4714 1798 Second Hair Style, S-180, B-41, High R.5 PCGS Genuine. Breen Die State V. A second prominent cud forms over the UN in UNITED. A deep brown example of this much better variety. Only mildly granular but subdued by an even, light cleaning. All legends are readable. Our EAC grade 6.
Ex: Sebring and Garbe Collections (Bowers and Merena, 3/1996), lot 235.
From The COL Steve Ellsworth Die State Collection. PCGS# 36107

- 4715** 1798 Second Hair Style, S-181, B-42, R.3 — **Environmental Damage — PCGS Genuine. XF Details.** Breen Die State I, as inherited from the prior use of the obverse die as S-180. A dark brown cent with verdigris on the wreath and portions of the reverse legends. The obverse is mostly smooth but the shoulder curl and ribbons are granular. A few marks noted near the date and bust tip. Our EAC grade VG10.
Ex: John Hipps (1/18/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36110

**1798 S-181 Cent
Second Hair Style
Die State I**

- 4716** 1798 Second Hair Style, S-181, B-42, R.3 **PCGS Genuine.** Breen Die State I without any rim breaks. S-181 is distinguished by large Os over Small Os within the denominator, caused by the initial selection of a half cent 0 punch. This darkened cent has XF sharpness. The reverse is lightly granular, and the obverse is moderately granular with corrosion between 6 and 9 o'clock. Two small pits on the N in CENT. Marks are absent save for a thin vertical line through the E in CENT. Our EAC grade VF30.
Ex: Bowers and Merena (3/1996), lot 236.
From The COL Steve Ellsworth Die State Collection. PCGS# 36110

**1798 S-181 Cent, Choice XF
Second Hair Style
Die State II**

- 4717** 1798 Second Hair Style, S-181, B-42, R.3 **XF45 PCGS.** Breen Die State II with two delicate obverse die cracks from the rim to the ends of the ribbon. The popular blundered fraction Sheldon variety. This minimally abraded medium brown cent provides excellent definition. The surfaces are smooth save for a mildly granular left obverse field. Our EAC grade VF35.
Ex: Gordon J. Wrubel (2/1978); Dr. Allan S. Pirnig; EAC Sale (1981), lot 164; EAC Sale (3/2001), lot 239.
From The COL Steve Ellsworth Die State Collection. PCGS# 36110

**1798 S-181 Cent
Second Hair Style
Die State III**

- 4718** 1798 Second Hair Style, S-181, B-42, R.3 **PCGS Genuine.** Breen Die State III with a horizontal crack above the base of the bust tip. The dusky golden-brown surfaces are lightly to moderately granular, most notably near 12 o'clock on the reverse. Unabraded save for a trio of minor hairlines near the forehead. The profile is strike doubled. Our EAC grade VF25.
Purchased from Clem Schettino (1/9/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 36110

**1798 S-184 Cent, AU50
Second Hair Style
Die State II**

- 4719** 1798 Second Hair Style, S-184, B-45, R.1 **AU50 PCGS.** Breen Die State II with die chips above the serif of the 7 in the date. This is a mildly glossy medium brown representative with an even strike and well defined devices. Lightly abraded aside from faded marks beneath the hair ribbon and a hair-thin diagonal line above Liberty's ear. Our EAC grade VF30.
Ex: Orlando FUN Signature (Heritage, 1/2012), lot 4086.
From The COL Steve Ellsworth Die State Collection. PCGS# 36119

- 4720** 1798 Second Hair Style, S-184, B-45, R.1 **XF45 PCGS.** Breen Die State III. A die chip on the field near the neck helps distinguish this die state from its predecessor. Toned deep olive-brown and chestnut-tan. A richly detailed cent with smooth, attractive surfaces. Our EAC grade VF25.
Ex: Roy Rauch (McIntire Numismatic Auctions, 6/1988), lot 3; Roy Rauch (7/1988); Del Bland; Dr. Robert J. Shalowitz; Chris Victor-McCawley (11/1988); Robinson S. Brown, Jr. (Superior, 1/1996), lot 251; Tom Reynolds; Walter Husak (Heritage, 2/2008), lot 2187; Victor Scheide (1/7/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36119

**1798 S-185 Cent, VF30
Second Hair Style
Die State VI**

- 4721** 1798 Second Hair Style, S-185, B-46, R.2 VF30 PCGS. Breen Die State VI. A bold radial die crack ventures from the rim to the top of Liberty's neck. Dark mahogany-red and steel-gray fields contrast with medium brown high points. This Draped Bust cent is smooth aside from a small dig beneath the second S in STATES. Our EAC grade VF20.
Ex: Tom Morley; Fred Clymer; Fred Borchardt; Walter Reed (8/2/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36122

**1798 Second Hair Style S-185 Cent
Terminal Die State VIII**

- 4722** 1798 Second Hair Style, S-185, B-46, R.2 PCGS Genuine. Breen Die State VIII with a cud over the I in AMERICA. The obverse displays prominent cracks. The terminal die state. This glossy golden-brown cent has pleasing definition and lacks individually consequential marks, though minute contact is distributed. Our EAC grade VF20.
Purchased from John Hipps (1/18/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36122

- 4723** 1798 Second Hair Style, S-187, B-40, R.1 PCGS Genuine. Breen Die State II. Light die cracks emerge on the lower right reverse border. A deep brown cent with olive-green, gunmetal-blue, and lilac undertones. The glossy surfaces are well defined and only moderately abraded, except for a small repaired obverse area near 7:30 and a faded thin mark nearby at 8 o'clock. Our EAC grade VF20.
Ex: Fred Borchardt (1998); John Cloutier (11/18/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36128

- 4724** 1798 Second Hair Style, S-187, B-40, R.1 VF35 PCGS. Breen Die State IV. A break from the wreath's right ribbon end distinguishes this middle state. This medium brown cent is minimally abraded save for a tick on the jaw, a thin mark left of the hair ribbon, and a reverse rim nick at 8 o'clock. Our EAC grade VF20.
Ex: McLaughlin and Robinson (9/1989), lot 283.
From The COL Steve Ellsworth Die State Collection. PCGS# 36128

**1799/8 Cent
Scarce S-188 Overdate
Die State III**

- 4725** 1799/8 S-188, B-2, R.4 — Surfaces Tooled — PCGS Genuine. Breen Die State III. Denticles are clashed above AMERICA. This medium brown key date cent has VF sharpness and shows only traces of verdigris. Glossy from a wipe, and the obverse high points display parallel hairlines. Our EAC grade VG10.
Ex: Maryland Consignment; N.H. Coin Co. #51 (6/1958), lot 279; Hollinbeck Coin Company; 1964 ANA (Federal Brand, 8/1964), lot 72; Hollinbeck Coin Company; Hollinbeck-Kagin #235 (9/1969), lot 986; Kagin's Numismatic Auctions (1/1977), lot 52; later, 1995 ANA (Heritage, 8/1995), lot 5582; Gary Parietti (Long Island Numismatics); Ronald Copper (7/14/1996).
From The COL Steve Ellsworth Die State Collection.

1799 S-189 Cent, VF20
Draped Bust Key
Die State II

- 4726** 1799 S-189, B-3, R.2 VF20 NGC. Breen Die State II with a small chip above the T in CENT. A deep golden-brown representative of this coveted date. Devoid of verdigris. Minor abrasions are distributed, but none merit mention save for thin lines through the O in ONE, the first T in STATES, and the tail of the final date digit. The rims display occasional minute bumps. Our EAC grade VG10.
Ex: St. Louis Central States (Heritage, 5/2007), lot 2014; purchased 4/18/2010.
From The COL Steve Ellsworth Die State Collection. PCGS# 36140

1799 S-189 Cent
Key to a Date Collection, Die State IV

- 4727** 1799 S-189, B-3, R.2 PCGS Genuine. Breen Die State IV. Two lengthy rim die breaks are noted over the first A in AMERICA. The die chip above the T in CENT is large and somewhat triangular. A dark steel-gray cent with VF sharpness and moderately granular surfaces. The obverse exergue is faintly pinscratched and a diagonal scratch extends from 11 o'clock to behind Liberty's eye. The reverse has minor rim dings at 5:30 and 10:30. Much sharper than the typical example of this famous early copper rarity. Our EAC grade Fine 12.
Purchased from Great Britain Coin Company (6/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36140

1799 S-189 Cent, VF25
Die State IV

- 4728** 1799 S-189, B-3, R.2 VF25 PCGS. Breen Die State IV with a rim break above the AM in AMERICA. Toned dark gunmetal-gray with deep sea-green shades on the obverse margin. The reverse is evenly granular and the obverse is both glossy and lightly granular. Only minimally abraded. A key date usually located in well worn or corroded condition. Our EAC grade VF20.
Ex: New York Stamp & Coin Co. (1/1890), lot 2540; Ropes Collection; New York Stamp & Coin Co. (12/1893); Wayte Raymond; New Netherlands 41st Sale (1953), lot 269; William H. Sheldon; R.E. Naftzger, Jr (New Netherlands, 11/1973), lot 505.
From The COL Steve Ellsworth Die State Collection. PCGS# 36140

- 4729** 1800/1798 S-191, B-2, R.3 Fine 15 PCGS. Breen Die State IV. The reverse die is sinking near 9 o'clock. The triangular "mound" at 6 o'clock is well advanced and weakens the ERT in LIBERTY, which is opposite. The deep steel-gray and medium brown surfaces are pleasing despite a tick on the forehead. Traces of the underdate are obvious, especially the "horns" from the underdigit 7 above the 8. A scarce Guide Book variety represented by four die marriages, two of which are very rare. Our EAC grade VG10.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36146

- 4730** 1800 80 Over 79, Style Two Hair, S-192, B-6, R.4 VF20 PCGS. Breen Die State I without an arc-shaped crack on the lower right reverse. The 79 underdigits are obvious. A better variety, since the usual Style Two overdate is S-196. This dark brown example has minor inactive obverse verdigris and a few thin marks on the portrait. A minor mint error with a small curved clip at 10 o'clock. Our EAC grade VG8.
Ex: 2003 EAC Convention.
From The COL Steve Ellsworth Die State Collection. PCGS# 36155

4731 1800 80 Over 79, Style Two Hair, S-192, B-6, R.4 Fine 15 PCGS. Breen Die State IV. Two die cracks through the R in AMERICA join the prominent arc-shaped crack through the fraction and I in AMERICA. This ebony-brown representative is unmarked and only lightly granular. Our EAC grade VG10.
Ex: Chris Schwerd (10/6/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 36155

4732 1800 80 Over 79, Style Two Hair, S-193, B-7, R.4 Fine 12 PCGS. Breen Die State II. Lightly cracked near the fraction, and a faint die crack traverses the left serifs of the E in AMERICA. This deep brown has minor obverse pits and a few tiny digs at the reverse center. An elusive Sheldon variety. Our EAC grade Fine 12.
Purchased 9/1987.
From The COL Steve Ellsworth Die State Collection. PCGS# 36158

4733 1800 80 Over 79, Style Two Hair, S-193, B-7, R.4 — Damage or Tooling — PCGS Genuine. VF Details. Breen Die State II. The die cracks described in the previous lot are now bold instead of faint. The deep brown surfaces are evenly granular aside from a more glossy appearance on the central reverse. The portrait has a few tiny roundish marks. Our EAC grade VG10.
Ex: James E. Long, Jr.; John Koebert (9/10/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 36158

**1800 80 Over 79 Cent, S-194
Style Two Hair, Die State III**

4734 1800 80 Over 79, Style Two Hair, S-194, B-8, R.3 PCGS Genuine. Breen Die State III with delicate die cracks near the CA in AMERICA and the 1 in denominator identify this middle die state. This deep gunmetal-gray cent is moderately granular and has unabraded fields. Minor marks are concealed within the hair, and the reverse has a slight rim ding at 5 o'clock. Our EAC grade VF25.
Ex: Sebring and Garbe Collections (Bowers and Merena, 3/1996), lot 261.
From The COL Steve Ellsworth Die State Collection. PCGS# 36161

**1800 80 Over 79 Cent, Choice AU
S-194, Style Two Hair
Esteemed Pedigree**

4735 1800 80 Over 79, Style Two Hair, S-194, B-8, R.3 AU55 PCGS. Breen Die State III with a light crack across the reverse exergue. A splendid golden-brown to medium brown cent with nearly full design detail and ample glimmers of luster. The fields are refreshingly unmarked and free from verdigris. An outstanding example of this popular and unmistakable overdate. Much sharper than the Dan Holmes specimen. Our EAC grade AU50.
Ex: Virgil M. Brand; B.G. Johnson (6/28/1944); Thomas L. Elder (7/8/1944); Leonard M. Holland; James G. Pennypacker (5/1959); Raymond Gallo (via Lester Merkin, 5/18/1960); C. Douglas Smith (via Denis W. Loring, 1971); Robinson S. Brown, Jr. (Superior, 9/1986), lot 275; Douglas F. Bird; Michael Kramer; Douglas F. Bird; Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 183; Jack Wadlington; Chris Victor-McCawley (7/27/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 36161

1800 80 Over 79 Cent, Fine 15
Style Two Hair, S-194
Terminal Die State VIII

- 4736** 1800 80 Over 79, Style Two Hair, S-194, B-8, R.3 Fine 15 PCGS. Breen Die State VIII, "extremely rare," with a large reverse exergue cud. This glossy lavender-brown cent has VF sharpness. The fields exhibit many small abrasions and the top half of the portrait exhibits faint parallel pinscratches. Our EAC grade VG10.
Ex: *Great Britain Coins* (10/24/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 36161

1800 S-195 Cent, VF Details
80 Over 79, Style Two Hair
Die State I

- 4737** 1800 80 Over 79, Style Two Hair, S-195, B-9, R.5 — Damage or Tooling — PCGS Genuine. VF Details. Breen Die State I without the often seen crack at the bases of the RTY in LIBERTY. The rare Sheldon-195 is sometimes attributed by its lengthy and narrow fraction bar. This impressively detailed dark brown cent is evenly granular and devoid of noticeable abrasions. Our EAC grade Fine 15.
Ex: Henry C. Hines; Dr. William H. Sheldon; later, Steve Ivy (6/1982), lot 45; Superior (9/2004), lot 1592.
From The COL Steve Ellsworth Die State Collection. PCGS# 36164

1800 S-197 Cent, XF Details
Die State II

- 4738** 1800 S-197, B-12, R.1 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State II with several tiny but distinct die chips beneath the hair ribbon. The "Q" variety invariably has chips near the 00 in the date, in addition to the tornado-shaped break through the IB in LIBERTY. This steel-gray cent is evenly and moderately granular. Both sides are surprisingly unabraded. Our EAC grade VF20.
Purchased 3/7/1998.
From The COL Steve Ellsworth Die State Collection. PCGS# 36179

1800 Cent, Fair 2
Rare Sheldon-198
Terminal Die State VI

- 4739** 1800 S-198, B-19, High R.5 Fair 2 PCGS. Breen Die State VI, "extremely rare," with a cud over the ER in AMERICA. Any example of S-198 is highly elusive. A mildly granular and moderately abraded deep tan-brown cent. The portrait has three small pits with another on the D in UNITED. The reverse rim has minor dings at 2 and 3 o'clock. Our EAC grade Fair 2.
Ex: Darwin Palmer (8/7/1992); Allan Ballard (6/18/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36182

- 4740** 1800 S-200, B-15, R.3 PCGS Genuine. Breen Die State II. The upper left reverse border displays minor die sinking. The deep steel-gray surfaces are evenly but relatively moderately granular. The reverse has a small ding at 1 o'clock. Our EAC grade VG8.
Ex: McLaughlin and Robinson (8/1985), lot 244.
From The COL Steve Ellsworth Die State Collection. PCGS# 36188

- 4741** 1800 S-200, B-15, R.3 VF30 PCGS. Breen Die State VII. The die break through OF extends right, nearly to the letter A. A medium to dark brown cent with attractive surfaces despite a slight obverse rim nick at 9 o'clock. Our EAC grade Fine 15.
Ex: EAC Sale (5/2008), lot 330.
From The COL Steve Ellsworth Die State Collection. PCGS# 36188

1800 S-200 Cent, VF25
Die State VIII

- 4742** 1800 S-200, B-15, R.3 VF25 PCGS. Breen Die State VIII. A biplanar and irregular crack extends from 8 o'clock into Liberty's curls. The large break over OF is from State VII. A minimally abraded steel-blue and golden-brown example. A slight rim ding on the reverse at 8 o'clock provides an identifier. Our EAC grade VF20.
Ex: 1957 ANA (Federal Coin Exchange, 8/1957), lot 865; C. Douglas Smith (via Denis W. Loring, 1971); Robinson S. Brown, Jr. (Superior, 9/1986), lot 288; John Sybe; Tom Reynolds; Jack Wadlington (via Chris McCawley, 4/2004); Daniel W. Holmes, Jr. (Goldberg Coins, 9/2009), lot 376.
From The COL Steve Ellsworth Die State Collection. PCGS# 36188

- 4743** 1800 S-201, B-17, High R.4 — Damage or Tooling — PCGS Genuine. VG Details. Breen Die State I. The ascending obverse die crack is carried over from its prior appearance on S-200. A lightly granular ebony-brown example with numerous tiny digs on the portrait and reverse border. A pinscratch crosses Liberty's shoulder and the bust tip displays three short thin marks. A very scarce Sheldon marriage. Our EAC grade Good 6.
Ex: Bill Smith (2/18/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36191

- 4744** 1800 S-201, B-17, High R.4 Good 6 PCGS. Breen Die State VI. Reverse die sinking affects the wreath near ST and the legend portions ES and ME. The mildly bright and granular obverse is deep mahogany-brown. The reverse is dark medium brown. Refreshingly unmarked. Our EAC grade Good 5.
Ex: John Arndt Collection (3/16/2010).
From The COL Steve Ellsworth Die State Collection. PCGS# 36191

- 4745** 1800 S-202, B-18, High R.4 PCGS Genuine. Breen Die State II. The reverse die is failing near ATE. The obverse break near the shoulder curl grows larger. The dark brown surfaces are evenly granular but only a single mark is visible, a thin vertical line near the top of the wreath. Our EAC grade VG8.
Ex: Kissner Collection (Stack's, 6/1975), lot 329; Walter Reed (4/24/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36194

- 4746** 1800 S-202, B-18, High R.4 Good 6 PCGS. Breen Die State uncertain but late, with most of STATES obscured by swelling. The obverse break reaches the hair ribbon. A glossy medium to dark brown cent with no relevant marks and only a hint of granularity. Our EAC grade Good 5.
Ex: Parsippany, New Jersey (9/6/2008).
From The COL Steve Ellsworth Die State Collection. PCGS# 36194

1800 S-203 Cent
Die State II

- 4747** 1800 S-203, B-29, R.3 PCGS Genuine. Breen Die State II. The date is deeply clashed date within the TES in STATES. This walnut-brown and powder-blue cent has VF sharpness but is glossy from a thorough wipe. No marks are remotely consequential. Our EAC grade Fine 12.
Purchased 4/19/2004.
From The COL Steve Ellsworth Die State Collection. PCGS# 36197

- 4748** 1800 S-203, B-29, R.3 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State III. Clashed near TES OF. A slender obverse field die break near 3 o'clock attributes the variety. The unmarked but moderately granular dark gray surfaces exhibit some pitting on the right obverse field and above the O in ONE. Our EAC grade Fine 15.
Ex: Wayne Scheible (1/20/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36197

- 4749** 1800 S-203, B-29, R.3 XF40 NGC. Breen Die State III. OF displays a double set of clash marks from the bust tip. A well defined medium brown representative without noticeable contact. The obverse and fraction are lightly granular. Our EAC grade VF25.
Ex: John Hadaway (4/23/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 36197

1800 S-203 Cent, XF40
Die State V

- 4750** 1800 S-203, B-29, R.3 XF40 PCGS. Breen Die State V. The obverse field is buckling near the date and lowest shoulder curl. A glossy golden-brown and gunmetal-blue cent. Well defined and minimally abraded with pleasing surfaces despite infrequent small areas of mild granularity. Our EAC grade VF35.
Ex: James G. Macallister; Frank Hussey; New Netherlands (4/1960), lot 1412; Glen Wallace; A. Kosoff; RARCOA (5/1974), lot 885; Stack's (4/1977), lot 1022; Dr. Willard J. Carmel, Jr.; Jack Beymer; John Boise; Chris Victor-McCawley; Thomas D. Reynolds (11/1998); Robert C. Clark (Bowers and Merena, 8/2000), lot 290.
From The COL Steve Ellsworth Die State Collection. PCGS# 36197

1800 S-204 Cent, AU50

Ex: Rasmussen
Die State IV

- 4751** 1800 S-204, B-25, R.4 AU50 PCGS. Breen Die State IV with a faint but lengthy crack on the right obverse field. Clashed near the profile. An exquisite example with chocolate-brown fields and medium brown devices. Predominantly smooth though we note a minor mark beneath the chin and a slight obverse rim nick at 8:30. Formerly housed in an AU55 NGC, per its Rasmussen catalog appearance. Our EAC grade VF30.

Ex: *New England Museum; Stack's (10/1988), lot 473; Martin Paul; Don Valenziano, Jr.; Thomas D. Reynolds; EAC Sale (4/1994), lot 262; Wes Rasmussen (Heritage, 1/2005), lot 3240.*

1800 S-206, AU Details

Die State II

- 4752** 1800 S-206, B-27, R.3 — **Graffiti** — PCGS **Genuine. AU Details.** Breen Die State II with multiple cracks on the lower reverse. This cent has only a trace of wear on the high points and the glossy medium brown surfaces are generally attractive. Large initials ST are faintly pinscratched on the right obverse field. The TAT in STATES displays minor verdigris and smoothing. Our EAC grade VF25.

Ex: *Doug Bird; Michael Kramer; Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 197.*

From The COL Steve Ellsworth Die State Collection. PCGS# 36206

- 4753** 1800 S-208, B-21, R.3 — **Environmental Damage** — PCGS **Genuine. Fine Details.** Breen Die State II. A narrow arc-shaped crosses the upper right obverse margin. Dentil clashes are visible near the break. A mildly granular medium brown cent with spots at the shoulder curl, the B in LIBERTY, the NI in UNITED, and the final A in AMERICA. Our EAC grade VG8.

Ex: *David Bloom (10/8/2011).*

From The COL Steve Ellsworth Die State Collection. PCGS# 36212

1800 S-208 Cent, XF Details

Die State III

- 4754** 1800 S-208, B-21, R.3 — **Environmental Damage** — PCGS **Genuine. XF Details.** Breen Die State III with a prominent obverse cud from 12:30 to 1:30. This dark brown cent has a generally smooth reverse and a moderately granular obverse. The obverse is somewhat glossy and displays several thin marks, with the most noticeable near the nose and on the cheek. Our EAC grade VF20. VF20. Smooth glossy chocolate-brown. Two scratches near nose. Another dull scratch across cheek. Well struck.

Ex: *R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 523; later, McLaughlin and Robinson (9/1989), lot 293.*

From The COL Steve Ellsworth Die State Collection. PCGS# 36212

- 4755** 1800 S-209, B-23, R.3 PCGS **Genuine.** Breen Die State II. Clashed near the hair ribbon. This ebony-brown cent has close to XF sharpness but much of the reverse has rough surfaces. The obverse is only lightly granular though the cheek and right field are burnished. A slender vertical mark extends from the neck to the drapery. Our EAC grade VG8.

Ex: *Walter Reed (11/25/2001).*

From The COL Steve Ellsworth Die State Collection. PCGS# 36215

- 4756** 1800 S-210, B-24, **High R.5** PCGS **Genuine.** Breen Die State uncertain though the obverse die is failing near the Y in LIBERTY. A granular ebony-brown example. The upper left reverse is tooled in an effort to remove verdigris. A very scarce Sheldon marriage often attributed by the "apostrophe" die chip near the B in LIBERTY. Our EAC grade Good 5.

Ex: *Darwin Palmer (3/15/1991); Allan Ballard (6/18/2004).*

From The COL Steve Ellsworth Die State Collection. PCGS# 36218

- 4757** 1800 S-211, B-13, R.3 **Fine 12** PCGS. Breen Die State VI. The left and right obverse field shows obvious swelling. The dark brown surfaces are glossy and mildly granular. Marks are limited to two scratches above and below the O in ONE. Our EAC grade VG10.

Ex: *Doug Bird (6/1989); Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 202.*

From The COL Steve Ellsworth Die State Collection. PCGS# 36221

- 4758** 1800 S-211, B-13, R.3 — **Environmental Damage** — PCGS **Genuine. XF Details.** Breen Die State VI. The obverse field is swollen, especially above the bust tip. A sharp but unevenly granular deep brown cent. No marks are consequential. Our EAC grade Fine 12.

Ex: *James E. Long; John Koebert (9/10/2006).*

From The COL Steve Ellsworth Die State Collection. PCGS# 36221

1800 S-212 Cent, VF Sharpness
Die State I

- 4759** 1800 S-212, B-20, R.3 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State I without clash marks or evidence of lapping. The medium brown fields contrast mildly with powder-blue devices. The slightly luminous surfaces display even and moderate granularity. Marks are of no import save for a tick above the T in CENT. Our EAC grade Fine 12.
*Purchased at Long Beach, California (9/25/2010).
From The COL Steve Ellsworth Die State Collection. PCGS# 36224*

- 4760** 1800 S-212, B-20, R.3 VF20 PCGS. Breen Die State VI. The upper half of ERTY is weakened by die sinking. This deep steel-gray and walnut-brown cent is only mildly granular and lacks any remotely noticeable abrasions. Our EAC grade Fine 15.
*Ex: J. Edeburn (9/23/1978); Paul Mory Collection (Bowers and Merena, 6/2000), lot 128.
From The COL Steve Ellsworth Die State Collection. PCGS# 36224*

1800/79 Style Two Hair Large Cent
Rare Sheldon-NC-2

- 4761** 1800/79 Style Two Hair, S-NC-2, B-11, High R.6 PCGS Genuine. Breen Die State II with a slender but lengthy obverse rim between 3 o'clock and 4:30. A very rare die marriage. This representative has VF sharpness but the surfaces are darkened and extensively granular. No marks are evident except for a tick beneath the top of the wreath. Raised areas near the TA in STATES and the O in ONE are presumably verdigris instead of breaks. Our EAC grade Good 6.
*Purchased from Doug Bird (11/19/1994).
From The COL Steve Ellsworth Die State Collection. PCGS# 36173*

1800 Cent, AG3
Very Rare Sheldon-NC-4
Die State II, Large Cuds

- 4762** 1800 S-NC-4, B-22, R.7 AG3 PCGS. Breen Die State II with large and distinct obverse cuds at 10 o'clock and between 7 and 9 o'clock. This deep brown cent is well worn but free from corrosion. The date is bold. UNITED STATES OF is faint, as is the TY in LIBERTY. The edge has an abrasion at 10 o'clock, and the reverse has a narrow mark at 8 o'clock. Our EAC grade AG3.
*Ex: Robert Strauss (1971); Enoch Blackwell; Denis W. Loring; Robinson S. Brown, Jr. (Superior, 1/1996), lot 290; J.R. Frankenfield (Superior, 2/2001), lot 479.
From The COL Steve Ellsworth Die State Collection. PCGS# 36230*

- 4763** 1801 S-213, B-1, R.2 VF35 PCGS. Breen Die State V. A die crack passes through the I in LIBERTY. The four linear cracks near the profile are bold. This gunmetal-gray representative is lightly abraded despite a small rim bump over the L in LIBERTY. Our EAC grade VF20.
*Ex: American Heritage Minting (11/28/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36236*

1801 S-213 Cent, VF25
Die State VI

- 4764** 1801 S-213, B-1, R.2 — Environmental Damage — VF25 PCGS. VF Details. Breen Die State VI with die sinking near the RTY in LIBERTY. The BE in LIBERTY is boldly clashed near the fraction. Several diagonal cracks are prominent on the upper right obverse and lower right reverse. A glossy ebony-brown example with minimally marked surfaces and only a hint of granularity. Our EAC grade VF20.
*Ex: Walter Reed (5/5/2006).
From The COL Steve Ellsworth Die State Collection.*

**1801 S-214 Cent, Choice VF
Die State II**

- 4765** 1801 S-214, B-2, R.3 VF35 PCGS. Breen Die State II with the field swelling near the RTY in LIBERTY. An attractive olive-brown cent with glimpses of luster within the curls. Smooth except for mild granularity near the date and hair ribbon. A small dig is noted above the N in ONE. Sharper than the Holmes specimen. Our EAC grade VF20.
Ex: Walter Reed (1/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36239

- 4766** 1801 S-215, B-4, High R.4 AG3 PCGS. Breen Die State V. The dies are sinking near the shoulder curl and STATES. The date is faint but most legends are readable. The dark brown surfaces are glossy and moderately granular. A challenging Sheldon marriage. Our EAC grade Good 5.
Ex: Superior (2/2002), lot 1245.
From The COL Steve Ellsworth Die State Collection. PCGS# 36242

**1801 S-219 Cent
Die State I, Three Errors**

- 4767** 1801 3 Errors, S-219, B-11, R.2 PCGS Genuine. Breen Die State I, "very rare," without dentil clash marks above LIBERTY. The present representative has XF sharpness and the ebony-brown surfaces show only minor, even granularity. A diagonal scratch near Liberty's eye and a horizontal scratch on Liberty's neck preclude PCGS assigning a numerical grade. A short mark is also noted beneath the wreath's left ribbon end. Our EAC grade Fine 15.
Ex: Tom Reynolds; Quality Coins (11/14/1998).
From The COL Steve Ellsworth Die State Collection. PCGS# 36272

- 4768** 1801 3 Errors, S-219, B-11, R.2 VG10 PCGS. Breen Die State III. Cracked from the I in UNITED to the fraction. The more available of the two Sheldon varieties that share the blundered reverse die. The deep dove-gray surfaces are pleasing despite an obverse verdigris speck at 1:30. Our EAC grade Good 6.
Ex: Stack's; John Willis (11/22/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 36272

**1801 S-219 Cent, Choice Fine
Die State III, Three Errors**

- 4769** 1801 3 Errors, S-219, B-11, R.2 Fine 15 PCGS. Breen Die State III. The first appearance of the bold crack from the denominator to the I in UNITED. A chocolate-brown example with a hint of rose-red toning on the lower reverse margin. Verdigris is absent aside from a few obverse specks near 1:30. Each side has a few minor marks. Our EAC grade Fine 12.
Ex: Pat Leahy (2/26/2010).
From The COL Steve Ellsworth Die State Collection. PCGS# 36272

**1801 S-219 Cent
Three Errors, Die State V**

- 4770** 1801 3 Errors, S-219, B-11, R.2 PCGS Genuine. Breen Die State V with a bold crack from the numerator to the reverse rim at 8 o'clock. This medium brown Three Errors cent has VF sharpness but is glossy from a past wipe. The portrait and right obverse field are moderately abraded and the reverse has a slight rim ding at 2:30. Our EAC grade Fine 12.
Ex: Trademark Coins (7/14/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 36272

**1801 S-219 Cent, VF20
Die State VI, Three Errors**

- 4771** 1801 3 Errors, S-219, B-11, R.2 VF20 PCGS. Breen Die State VI with BERT weakened by clashing. A dark steel-gray cent with moderately granular borders and only minor contact. The three errors include a 000 denominator, and absent left wreath stem, and an inverted and corrected U in UNITED. Perhaps the "office boy" engraver of Sheldon-56 tried his hand once again. Our EAC grade Fine 12.
Ex: Main Line Coin and Stamp (4/25/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 36272

**1801 S-220 Cent
Blundered Fraction, Die State VI**

- 4772** 1801 1/000, S-220, B-12, R.3 PCGS Genuine. Breen Die State VI. The rim break below the date touches the second 1 but not the 0. A popular blundered fraction *Guide Book* variety. This medium brown example has XF sharpness and displays noticeable luster. The right obverse field is smoothed. Liberty's neck is smoothed and abraded. The reverse is mostly smooth but has a brief scratch at 2 o'clock and a diagonal trail of small marks near the E in ONE. Our EAC grade VF20.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36275

**1801 S-221 Cent
Die State IV, 100 Over 000**

- 4773** 1801 100/000, S-221, B-5, R.2 Genuine PCGS. Breen Die State IV with a rim break over AME. A medium brown example with XF sharpness. The obverse field is smoothed, though a lens and a strong light are required to confirm the impairment. The denominator was initially entered as 000, then corrected. Our EAC grade Fine 15.
Ex: Great Britain Coins (5/29/2002).
From The COL Steve Ellsworth Die State Collection.

- 4774** 1801 S-222, B-16, R.1 PCGS Genuine. Breen Die State III. The rim die break over the IB in LIBERTY becomes prominent. This Draped Bust cent has AU sharpness but the mahogany and olive-brown surfaces are intermittently granular, especially near the shoulder curl and profile. Unabraded save for a faint mark on the cheek. Our EAC grade VF20.
Ex: Pat Clark (6/5/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36251

**1801 S-223 Cent, Choice VF
Die State V, 1 Over 000**

- 4775** 1801 1/000, S-223, B-17, R.1 VF35 PCGS. Breen Die State V. The cud over the RT in LIBERTY expands to include the left pendant of the T. A spike from the left wreath stem distinguishes S-223 from the other blundered fraction Sheldon varieties. A medium brown representative with pleasing surfaces aside from two faint vertical marks above the N in ONE and through the right wreath stem. Our EAC grade VF20.
Ex: 1995 ANA (Heritage, 8/1995), lot 5583.
From The COL Steve Ellsworth Die State Collection. PCGS# 36278

**1801 S-223 Cent, XF45
1 Over 000 Mint Blunder
Die State VI, Cud at Bust Tip**

- 4776** 1801 1/000, S-223, B-17, R.1 XF45 PCGS. Breen Die State VI, "very rare," with a large cud beneath the bust tip. A partly lustrous medium brown cent with hints of golden-brown near the profile. No trace of verdigris, though a lens reveals a few faded obverse abrasions. Nicer than the equivalent from the Dan Holmes collection. Our EAC grade XF40.
Ex: EAC Sale (4/2002), lot 303.
From The COL Steve Ellsworth Die State Collection. PCGS# 36278

- 4777** 1801 S-224, B-13, R.1 VF30 PCGS. Breen Die State I without a rim break over the AME in AMERICA. A smooth and nicely defined example with deep chestnut-gold and plum-mauve toning. Our EAC grade VF20.
Ex: David Bloom (10/8/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36254

- 4778** 1801 S-224, B-13, R.1 VF30 PCGS. Breen Die State IV. A die crack connects the F in OF to the rim at 1 o'clock. The cud at 3 o'clock is prominent. This medium brown cent has strong detail and is smooth aside from four faint thin marks on the portrait. Our EAC grade VF20.
Ex: EAC Sale (4/2010), lot 260.
From The COL Steve Ellsworth Die State Collection. PCGS# 36254

- 4779** 1802 S-225, B-1, R.3 VF35 PCGS. Breen Die State II. Dull clash marks of dentils are noted near the bust tip. A sharply defined cent with olive-green and steel-gray undertones. Lightly abraded on the right obverse field, and a thin mark separates the ME in AMERICA. Moderately granular near the fraction and beneath the T in CENT. Our EAC grade VF25.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36290

- 4780 1802 S-227, B-5, R.2 AU50 NGC.** Breen Die State II-III. Boldly clashed near the profile. Minor crumbling appears above the diagonal of the N in CENT. A lovely and sharp medium brown example without any mentionable marks or spots. Our EAC grade VF30.
Ex: EAC Sale (4/2009), lot 171.
From The COL Steve Ellsworth Die State Collection. PCGS# 36296

**1802 S-229 Cent, AU Details
 Die State IV**

- 4781 1802 S-229, B-6, R.2 — Scratch — PCGS Genuine. AU Details.** Breen Die State IV with a double set of clash marks from the drapery near the O in OF. A richly detailed chocolate-brown cent with many hair-thin marks on the right obverse field, portrait, and upper reverse. The strike is generally sharp though the die alignment causes some softness on LIBERTY and the fraction. Our EAC grade Fine 15.
Ex: Phil Darby (10/19/2007).
From The COL Steve Ellsworth Die State Collection. PCGS# 36299

- 4782 1802 S-230, B-8, R.1 XF45 PCGS.** Breen Die State VI. A delicate crack passes through the tops of OF. The glossy medium brown surfaces displays scattered minute obverse marks. The reverse is lightly granular. Our EAC grade VF20.
Ex: Walter Reed (8/2/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36302

- 4783 1802 S-230, B-8, R.1 PCGS Genuine.** Breen Die State IX. In addition to the bold upper reverse cracks seen in prior states, slender rim die breaks are noted beneath the 18 in the date. This golden-brown cent has AU sharpness but portions of the surfaces are granular, especially on the lower obverse. Our EAC grade VF20.
Ex: Great Britain Coins (10/24/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 36302

- 4784 1802 S-230, B-8, R.1 VF20 PCGS.** Breen Die State IX. A faint radial crack reaches the left pendant of the second T in STATES. A chocolate-brown cent with many tiny marks on the obverse field and near ONE CENT and AMERICA. A slight obverse rim ding at 5 o'clock. Our EAC grade Fine 12.
Ex: Wayne Scheible (1/20/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36302

- 4785 1802 No Stems, S-231, B-9, R.1 — Scratch — PCGS Genuine. VF Details.** Breen Die State III. An irregular die crack extends from the R in LIBERTY to the rim at 3 o'clock. Medium brown overall with lilac high points on ONE CENT. Wispy pinscratches are noted near the profile and on the forehead. Our EAC grade Fine 15.
Ex: Phil Darby (8/1999); Bob Rankin (11/29/2002); Butternut (9/2003); Kevin Glasson (9/10/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36344

**1802 S-231 Cent, Choice XF
 Die State IV, No Stems**

- 4786 1802 No Stems, S-231, B-9, R.1 XF45 PCGS.** Breen Die State IV with a slender but lengthy arc-shaped crack on the right obverse field. One of only two No Stems 1802 Sheldon marriages. The virtually unabraded walnut-brown surfaces show only slight wear. Evenly and moderately granular. Sharper than the Dan Holmes example. Our EAC grade VF25.
Ex: Miller's Mint; Ron Cooper (1/31/1999).
From The COL Steve Ellsworth Die State Collection. PCGS# 36344

**1802 S-232 Cent, AU53
 Die State VI, Reverse Cud**

- 4787 1802 S-232, B-12, R.1 AU53 PCGS.** Breen Die State VI with a large cud over the AT in STATES. The T in LIBERTY is clearly repunched over a Y. A lovely chocolate-brown Draped Bust type coin with pleasing, smooth surfaces despite a couple of faded thin marks on Liberty's neck. A trace of verdigris near the ED in UNITED. Luster glimmers from design recesses. Our EAC grade XF40.
Ex: EAC Sale (5/2008), lot 353.
From The COL Steve Ellsworth Die State Collection. PCGS# 36305

- 4788 1802 S-232, B-12, R.1 XF40 PCGS.** Breen Die State VII. A slender crack appears across the top of the STATES, though the cud over the AT in STATES remains of greater interest. This medium brown example is only lightly abraded though we note a small reverse rim ding at 9:30 and a granular area between CENT and the fraction. Our EAC grade VF25.
Ex: Euripedes Coin (3/23/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36305

- 4789 1802 S-233, B-13, R.2 VF25 PCGS.** Breen Die State I. The reverse is without clash marks and the die break below the 18 in the date is relatively small. This walnut-brown cent has a smooth reverse and only a minutely granular obverse. One slender obverse mark near 2 o'clock. Our EAC grade Fine 15.
Ex: Tom Reynolds; EAC Sale (5/2011), lot 277; Rod Burrell; John Koeber (9/3/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36308

- 4790 1802 S-234, B-14, R.3 PCGS Genuine.** Breen Die State IV. A fairly large rim die break over the B in LIBERTY distinguishes this moderately scarce Sheldon variety. A glossy gunmetal-gray and chestnut-gold cent with a number of scattered and individually minor obverse marks. Our EAC grade VG10.
Ex: James E. Long (12/1986).
From The COL Steve Ellsworth Die State Collection. PCGS# 36311

1802 S-234 Cent
'Dripping Paint' Die State VI

- 4791** 1802 S-234, B-14, R.3 PCGS Genuine. Breen Die State VI, the so-called "Dripping Paint" state with a large obverse break at 12 o'clock. A lavender-brown example with XF sharpness. The surfaces are pitted, more extensively on the obverse than the reverse. Essentially devoid of marks. Our EAC grade VG10.
Ex: Pat Clark (7/11/1998).
From The COL Steve Ellsworth Die State Collection. PCGS# 36311

- 4792** 1802 S-235, B-15, R.3 VF30 PCGS. Breen Die State III. The fraction denominator is clashed near the RTY in LIBERTY. This minutely granular lavender-brown representative is unabraded except for a couple of faded thin marks on the field near the profile. Our EAC grade VF25.
Ex: EAC Sale (5/2008), lot 356; COL. Steven Ellsworth (10/6/2009); Fred Rhoads (10/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36314

- 4793** 1802 S-235, B-15, R.3 PCGS Genuine. Breen Die State V. A prominent cud is centered over the T in LIBERTY. An evenly and moderately granular medium brown cent. Unabraded and well defined. Our EAC grade VF20.
Ex: Chris Young (8/20/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36314

1802 S-236 Cent
Die State IX, Reverse Cud

- 4794** 1802 S-236, B-16, R.1 PCGS Genuine. Breen Die State IX with clash marks near the profile and a dramatic cud over the ST in STATES. This golden-brown cent has XF details but is somewhat blurry from burnishing. The surfaces are evenly microgranular except for moderate roughness near the fraction. Our EAC grade VF30.
Ex: Phil Darby (12/7/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36317

- 4795** 1802 S-237, B-10, R.2 VF30 PCGS. Breen Die State V. A spindly vertical reverse crack emerges between the right ribbon loop and the leaves above the E in ONE. This medium brown example has pleasing surfaces except for a small dig beneath the chin and a minor obverse retained lamination at 4:30. Our EAC grade VF20.
Ex: John Sullivan; John Koebert (11/5/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36320

1802 S-238 Cent, AU Details
Die State IV

- 4796** 1802 S-238, B-11, R.4 — Scratch — PCGS Genuine. AU Details. Breen Die State IV with further clash mark injury to LIBERTY. This glossy and well struck medium brown cent has only minimal wear, but each side displays several pinscratches, and a few pits are noted on the upper left curls and lower bust. Our EAC grade VF25.
Ex: Roanoke, Virginia (7/16/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36323

- 4797** 1802 S-239, B-17, R.3 VF20 PCGS. Breen Die State II. LIBERTY is clashed near the fraction. A deep olive-brown cent with attractive surfaces aside from a few shallow marks near ONE. Our EAC grade Fine 12.
Ex: Bowers and Merena (11/1998), lot 1085.
From The COL Steve Ellsworth Die State Collection. PCGS# 36326

- 4798** 1802 S-239, B-17, R.3 VF30 PCGS. Breen Die State V. A pod-shaped break in front of Liberty's nose makes this late die state highly distinctive. The glossy dark brown surfaces display a couple of small marks on Liberty's neck and a few faded pinscratches on the upper reverse. Our EAC grade VF30.
Ex: EAC Sale (4/2002), lot 311.
From The COL Steve Ellsworth Die State Collection. PCGS# 36326

1802 S-240 Cent, VF Sharpness
Die State IV

- 4799** 1802 S-240, B-18, R.3 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State IV, "probably rare." This late die state exhibits clashed dentils through AMERICA. The lengthy and nearly vertical crack above the bust tip is retained from State III, and the reverse has a vertical crack from State II and a horizontal crack from State I. An unabraded but evenly granular dark brown cent. Our EAC grade Fine 12.
Ex: Walter Reed (1/9/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 36329

- 4800** 1802 No Stems, S-241, B-20, R.1 PCGS Genuine. Breen Die State IV. A large cud extends over, and to the right of, the F in OF. The reverse die has multiple blunders that continue to delight numismatists more than two centuries later. This cent is unabraded and has AU sharpness. The ebony-brown surfaces are evenly and moderately granular. Our EAC grade VF25.
Ex: C. Douglas Smith; EAC Sale (4/2010), lot 271.
From The COL Steve Ellsworth Die State Collection. PCGS# 36347

4801 1802 No Stems, S-241, B-20, R.1 PCGS Genuine. Breen Die State V. A large cud over the AT in STATES identifies the terminal die state of this well known blundered Sheldon variety. A gunmetal-gray example. The obverse field is granular, as is the reverse near 9:30, though the portrait and most of the reverse is smooth. Our EAC grade Fine 15.
Ex: Orlando FUN Convention (1/8/1999).
From The COL Steve Ellsworth Die State Collection. PCGS# 36347

4802 1802 S-242, B-19, R.2 — Scratch — PCGS Genuine. AU Details. Breen Die State I. No die crack is present through NITE. A die scratch from the left wreath stem attributes the Sheldon variety. A splendidly detailed deep brown cent. A slender scratch crosses the obverse between 3 and 7 o'clock. Lesser thin marks are noted near the F in OF and the LIBE in LIBERTY. Our EAC grade Fine 15.
Purchased in March 1985.
From The COL Steve Ellsworth Die State Collection. PCGS# 36332

4803 1803 No Stems, S-243, B-1, R.2 VF30 PCGS. Breen Die State V. The terminal state with two cuds on the upper right obverse. Our EAC grade VF20. The sole 1803 No Stems Sheldon variety, also noteworthy for the widely repunched fraction bar and second S in STATES. A well defined ebony-brown example with two small marks near the D in UNITED.
Ex: Chris Victor-McCawley (12/27/1999); Walter Reed (4/24/2003).
From The COL Steve Ellsworth Die State Collection. PCGS# 36419

**1803 S-244 Cent, XF Details
 Small Date, Small Fraction
 Die State I**

4804 1803 Small Date, Small Fraction, S-244, B-3, R.4 — Damage or Tooling — PCGS Genuine. XF Details. Breen Die State I, clashed but not yet lapped. This well-pedigreed ebony-brown cent has minimal wear but is lightly granular and the obverse field is burnished. Per Bland, tied for fourth finest of this scarce die marriage. Our EAC grade VF30.
Ex: Dr. George P. French (B. Max Mehl, 1929 FPL), lot 332; James G. Macallister; Henry C. Hines; later, Federal Coin Exchange (5/1956), lot 937; 1957 ANA (Federal Coin Exchange, 8/1957), lot 560; R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 560; Robinson S. Brown, Jr. (Superior, 9/1986), lot 361; Gary Ruttenberg (10/1/1990); Robinson S. Brown, Jr. (Superior, 1/1996), lot 339; Wes Rasmussen (Heritage, 1/2005), lot 3294; Daniel W. Holmes, Jr. (Goldberg Coins, 9/2009), lot 480; Tory Denman (4/24/2010).
From The COL Steve Ellsworth Die State Collection.

4805 1803 Small Date, Small Fraction, S-244, B-3, R.4 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State II. The lapped middle die state of this scarce Sheldon variety. This dark brown cent has evenly granular surfaces that are free from evident marks. Our EAC grade VF20.
Purchased 8/16/1997.
From The COL Steve Ellsworth Die State Collection. PCGS# 36350

4806 1803 Small Date, Small Fraction, S-245, B-2, R.3 Fine 15 PCGS. Breen Die State I without the rim break above the N in UNITED. This deep brown representative is mildly granular and has a few hair-thin marks between the hair ribbon and nose. The reverse is nearly unabraded. Our EAC grade VG10.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36353

4807 1803 Small Date, Small Fraction, S-245, B-2, R.3 XF45 PCGS. Breen Die State II. A triangular die break emerges from the dentils near the N in UNITED. Substantial mint gloss is evident across smooth deep brown surfaces. Unimportant marks are on the rim near OF and on each side of Liberty's earlobe. Our EAC grade VF30.
Ex: Jack Robinson (Superior, 1/1989), lot 539; Joel Spingarn; Heritage (1/2000), lot 5046; EAC Sale (4/2002), lot 319.
From The COL Steve Ellsworth Die State Collection. PCGS# 36353

4808 1803 Small Date, Small Fraction, S-246, B-4, R.3 PCGS Genuine. Breen Die State I. The lightly clashed early die state. The sharpness is XF but the dark surfaces are uniformly and moderately granular from exposure to the elements. Void of relevant marks. Our EAC grade Fine 12.
Ex: McLaughlin and Robinson (6/1988), lot 226.
From The COL Steve Ellsworth Die State Collection.

4809 1803 Small Date, Small Fraction, S-246, B-4, R.3 PCGS Genuine. Breen Die State II. The middle die state with a lump below the jaw and additional sets of clash marks near the portrait. This ebony-brown cent has a granular appearance from environmental exposure but displays VF sharpness. Neither side shows abrasions. Our EAC grade VG10.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36356

4810 1803 Small Date, Small Fraction, S-246, B-4, R.3 VF35 PCGS. Breen Die State IV. The terminal die state with a prominent cud over the STA in STATES. The lump beneath the jaw is expanded in size. Lightly granular throughout with only marginal contact. Our EAC grade VF25.
Ex: Ray Chatham (8/13/1973); Paul Mory Collection (Bowers and Merena, 6/2000), lot 145.
From The COL Steve Ellsworth Die State Collection. PCGS# 36356

**1803 S-251 Cent, AU Details
 Die State I**

4811 1803 Small Date, Small Fraction, S-251, B-8, R.2 — Damage or Tooling — PCGS Genuine. AU Details. Breen Die State I. Lightly clashed near Liberty's ribbon and jaw. The second S in STATES is repunched. This sea-green and fire-red cent has excellent design detail but is recolored and lightly etched by acid. Marks are minimal but we note a thin vertical line on the right obverse field. Our EAC grade VF20.
Ex: Bill Smith (11/14/1998).
From The COL Steve Ellsworth Die State Collection. PCGS# 36368

1803 S-251 Cent, AU50
Small Date, Small Fraction
Die State I

- 4812** 1803 Small Date, Small Fraction, S-251, B-8, R.2 AU50 PCGS. CAC. Breen Die State I. A high grade chocolate-brown representative with noticeable remaining luster. Marks are confined to the areas near the profile, hair ribbon, and F in OF. S-251 has a short fraction bar and a boldly repunched second S in STATES. Our EAC grade VF30.
Purchased 5/4/2012.
From The COL Steve Ellsworth Die State Collection. PCGS# 36368

- 4813** 1803 Small Date, Small Fraction, S-252, B-11, R.2 — Cleaning — PCGS Genuine. AU Details. Breen Die State II. A middle state with delicate cracks near the date. This olive-brown cent is well defined and retains traces of luster but is moderately glossy from a wipe. Two hair-thin marks are noted near the profile and on the left obverse field. Our EAC grade VF25.
Ex: Heritage (1/2000), lot 5046.
From The COL Steve Ellsworth Die State Collection. PCGS# 36371

- 4814** 1803 Small Date, Small Fraction, S-252, B-11, R.2 VF35 PCGS. Breen Die State III. The die cracks on the lower obverse are bolder and extend to the rim at 4:30 and 7:30. This medium brown cent displays luster in design recesses. Tiny marks are scattered but none are of individual import. Our EAC grade VF25.
Ex: Mid-American (2/1985), lot 80.
From The COL Steve Ellsworth Die State Collection. PCGS# 36371

- 4815** 1803 Small Date, Small Fraction, S-252, B-11, R.2 PCGS Genuine. Breen Die State VIII. The terminal state with a sizeable cud from the hair curl to the 8 in the date. This ebony-brown cent has VF definition but the surfaces are granular, more noticeably on the obverse. No marks are consequential, though we note a trio of faint thin lines on the portrait. Our EAC grade Fine 15.
Ex: Wilmington, Delaware (1/21/1996).
From The COL Steve Ellsworth Die State Collection. PCGS# 36371

- 4816** 1803 Small Date, Small Fraction, S-253, B-12, R.2 PCGS Genuine. Breen Die State I. The rare early die state without an arc-shaped crack near STATES. This golden-brown representative is mildly glossy from cleaning and there are hints of smoothing near the IBE in LIBERTY and the E in UNITED. Our EAC grade Fine 12.
Purchased 7/13/1997.
From The COL Steve Ellsworth Die State Collection. PCGS# 36374

1803 S-253 Cent, XF Details
Small Date, Small Fraction
Rare Die State I

- 4817** 1803 Small Date, Small Fraction, S-253, B-12, R.2 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State I, “very rare,” without the usually seen arc-shaped crack at STATES. An evenly and moderately granular medium brown cent. One thin mark on the forehead but otherwise unabraded. S-253 has a lengthy spur from the right wreath stem. Our EAC grade VF20.
Ex: Mark Strumpf; John Koebert (9/10/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 36374

- 4818** 1803 Small Date, Small Fraction, S-253, B-12, R.2 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State IV. A slender die crack near 9:30 on the reverse joins earlier cracks near STATES and the bust tip. This dark brown cent is only lightly granular despite the strictly assessed Environmental Damage designation. One minor obverse mark at 3 o'clock. Our EAC grade VF20.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36374

- 4819** 1803 Small Date, Small Fraction, S-255, B-14, R.1 PCGS Genuine. Breen Die State IV. The terminal die state with a cud over the STA in STATES. This olive-brown cent is without any relevant marks. The reverse is moderately granular, and the right obverse is somewhat glossy from cleaning. Our EAC grade VF20.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36380

- 4820** 1803 Small Date, Small Fraction, S-256, B-15, R.3 PCGS Genuine. Breen Die State II. A relatively early die state with a crack through the D in UNITED but without a crack at the 8 in the date. S-256 is noted for a die scratch from the right wreath stem. This medium brown cent has close to XF sharpness, but the left obverse field is moderately granular and the reverse has a small rim ding at 3 o'clock. Our EAC grade Fine 15.
Ex: Walter Reed (4/17/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36383

- 4821** 1803 Small Date, Small Fraction, S-256, B-15, R.3 VF25 PCGS Genuine. Breen Die State IV. The dies are showing signs of buckling but there is no break above the first T in STATES. A glossy dark brown example with hair-thin marks noted through the fraction, the U in UNITED, the date, and beneath Liberty's eye. Our EAC grade VF20.
Ex: Steven Marmor (6/21/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 36383

1803 S-256 Cent
Die State V

- 4822 1803 Small Date, Small Fraction, S-256, B-15, R.3 PCGS Genuine.** Breen Die State V with a crack between the AM in AMERICA. Deep golden-brown and gunmetal-blue embraces this glossy Draped Bust cent. The coin has XF sharpness and appears unabraded but has been burnished. Our EAC grade VF20.
Ex: Fox Valley Coin; Louis Cambra (10/20/2000).
From The COL Steve Ellsworth Die State Collection. PCGS# 36383

- 4823 1803 Small Date, Small Fraction, S-256, B-15, R.3 — Cleaning — PCGS Genuine. XF Details.** Breen Die State VI. A cud connects the first T in STATES to the rim. This sharp medium brown cent is mildly granular and has been wiped. A few faint marks are noted on the cheek. Our EAC grade VF25.
Ex: Brett Dudek; John Koebert (9/10/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 36383

- 4824 1803 Small Date, Large Fraction, S-257, B-16, R.2 — Environmental Damage — PCGS Genuine. XF Details.** Breen Die State V. A retained die break causes STATES to appear faint. Die flow to the upper reverse weakens the 18 in the date and the nearby curl. This olive-brown large cent is granular but lacks visible abrasions. Our EAC grade Fine 15.
Ex: Mark Alberici (10/19/2007).
From The COL Steve Ellsworth Die State Collection.

- 4825 1803 Small Date, Large Fraction, S-258, B-17, R.1 VF20 PCGS.** Breen Die State I. A lightly clashed early die state without the often-seen arc-shaped crack near 9 o'clock. The "accent mark" die line over the D in UNITED is common to S-258 and S-259. An olive-brown example with marginal granularity and no evident marks. Our EAC grade Fine 12.
Ex: Little Rock, Arkansas (5/27/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36398

- 4826 1803 Small Date, Large Fraction, S-258, B-17, R.1 AU50 PCGS.** Breen Die State IV. The arc-shaped die crack beneath the hair ribbon is bold. Clashed near the C in CENT. A bold medium brown cent with noticeable luster and a few tiny marks on the right obverse. Moderately granular near the E in UNITED and the lowest shoulder curl. Our EAC grade VF30.
Ex: Paul Stevenson (8/17/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36398

1803 S-259 Cent, Choice VF
Small Date, Large Fraction
Die State I

- 4827 1803 Small Date, Large Fraction, S-259, B-18, R.4 VF35 PCGS.** Breen Die State I with a light crack across the top of STATE. A glossy medium brown representative with a couple of minor obverse field marks. S-259 is rarest among the Small Date, Large Fraction die varieties. Much sharper than any of the three examples from the Dan Holmes collection. Our EAC grade VF25.
Ex: Fred Borchardt (11/1984); Mid-American (2/1985), lot 81; J.R. Frankenfield (Superior, 2/2001), lot 567.
From The COL Steve Ellsworth Die State Collection. PCGS# 36401

1803 S-261 Cent, XF40
Die State III

- 4828 1803 Small Date, Large Fraction, S-261, B-20, R.2 XF40 PCGS.** Breen Die State III with a prominent curved crack between 6 and 9 o'clock. A deep chocolate-brown example with pleasing sharpness. Smooth aside from a small spot beneath the 0 in the date, a hair-thin line near the eye, and a small dig left of the E in AMERICA. Our EAC grade VF25.
Ex: K.K. Lee Collection. Purchased 5/28/2006).
From The COL Steve Ellsworth Die State Collection. PCGS# 36407

**1803 S-262 Cent, VF20
Small Date and Fraction
Die State II**

- 4829** 1803 Small Date, Small Fraction, S-262, B-21, R.3 VF20 PCGS. Breen Die State II with a vertical die crack through the bust tip and above field. A deep walnut-brown cent with a moderately abraded obverse field, a faint vertical pincscratch on the central reverse, and a small rim ding beneath the 0 in the date. Our EAC grade VF20. Ex: Tom Reynolds (1/2000); Robert Clark (Bowers and Merena, 8/2000), lot 314. From The COL Steve Ellsworth Die State Collection. PCGS# 36386

**1803 S-263 Cent, VF25
Small Date, Small Fraction
Die State V, Cud at Date**

- 4831** 1803 Small Date, Small Fraction, S-263, B-22, R.3 VF25 PCGS. Breen Die State V with a cud beneath the entire date. The upper reverse crack from 10 o'clock to 1 o'clock is present but faint. A medium brown cent with minimal marks confined to the left obverse field. Moderately granular inside the wreath and near the Y in LIBERTY. Our EAC grade Fine 15. Ex: Garry Fitzgerald (1/26/2000); Walter Reed (4/29/2003). From The COL Steve Ellsworth Die State Collection. PCGS# 36389

**1803 S-262 Cent, Good 4
Small Date, Small Fraction
Rare Terminal Die State**

- 4830** 1803 Small Date, Small Fraction, S-262, B-21, R.3 Good 4 PCGS. Breen Die State III+, "extremely rare," with a heavy break through STAT. This cream-gray example has generally bold legends, though LIBERTY is faint and the denominator is worn. Lightly abraded for the grade, especially on the reverse. Mildly granular near the profile and the obverse is glossy from a wipe. Our EAC grade Good 6. Ex: John Higgins (3/15/1995). From The COL Steve Ellsworth Die State Collection. PCGS# 36386

**1803 S-263 Cent, AU Sharpness
Small Date, Small Fraction
Die State VI**

- 4832** 1803 Small Date, Small Fraction, S-263, B-22, R.3 — Cleaning — Genuine PCGS. AU Details. Breen Die State VI with the field rising above the upper reverse crack. The prominent cud beneath the date began during State V. This chocolate-brown and gunmetal-gray example is burnished but attractive. The lower obverse field has faded thin marks, and the lower right leaves display a few pinpricks. Our EAC grade XF40. Ex: Lester Merkin (6/1970), lot 43; R.E. Naftzger, Jr.; McCawley & Grellman (9/2008), lot 190; Goldberg Coins (1/2012), lot 312. From The COL Steve Ellsworth Die State Collection.

1803 S-264 Cent
Large Date, Small Fraction
Key Guide Book Variety

- 4833** 1803 Large Date, Small Fraction, S-264, B-24, High R.4 PCGS Genuine. Breen Die State III with the reverse die failing between 9:30 and 11 o'clock. The sole Sheldon marriage with a Large Date obverse and a Small Fraction reverse, key to a collection of Guide Book varieties. A dark olive-brown representative with Fine sharpness and granular surfaces. The left obverse field is partly smoothed, and the reverse break and fraction have light pin scratches. Our EAC grade Good 4.
Ex: Paul Langseth; Denis W. Loring (8/12/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36410

1803 S-265 Cent, Fine 15
Large Date, Large Fraction
Scarce Guide Book Variety

- 4834** 1803 Large Date, Large Fraction, S-265, B-23, R.4 Fine 15 PCGS. Breen Die State I without the curved reverse crack between 9 and 12 o'clock. The sole Large Date, Large Fraction variety, a very scarce Guide Book entry. A deep golden-brown cent with sharp definition on Liberty's curls. The surfaces are glossy, and thin marks of various length are noted near the hair ribbon, bust tip, chin, UNI, and central reverse, Our EAC grade VG7.
Ex: Mike Demling (9/9/1995).
From The COL Steve Ellsworth Die State Collection. PCGS# 36413

1804 S-266a Cent, VF25
No Cuds, Key Date

- 4835** 1804 S-266a, B-1, R.2 VF25 PCGS. Breen Die State I. No cud above RTY. A well defined medium brown and lavender example of this famous low mintage date. The obverse and central reverse display distributed abrasions, each of which is individually minor. The obverse is glossy and lightly hairlined. Our EAC grade Fine 12.
Ex: Greg Reff (1/16/2009).
From The COL Steve Ellsworth Die State Collection. PCGS# 36422

1804 S-266b Cent
Die State III, Cud Over RTY

- 4836** 1804 S-266b, B-1, R.2 PCGS Genuine. Breen Die State III with a break over most of the RTY in LIBERTY. This deep gray key date cent has VF sharpness. The obverse is moderately and unevenly pitted. The right obverse field displays faded scrapes though the remainder of the coin is unabraded. Our EAC grade VG10.
Ex: Coleman Foster (12/12/1998).
From The COL Steve Ellsworth Die State Collection. PCGS# 36422

1804 S-266c Cent, VF Details
Die State IV, Two Cuds

- 4837** 1804 S-266c, B-1, R.2 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State IV with an additional lengthy cud over MERIC. A dark brown key date cent with nearly XF sharpness. Both sides are evenly granular but no abrasions are evident. The lower left obverse field is lightly smoothed. Our EAC grade VG10.
Ex: Tom Kohler (9/15/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36422

4838 1804 Restrike MS64 Brown PCGS. Breen Die State II. The usual lapped die state with weakened hair detail. The so-called Restrike was privately struck from broken and mismatched coinage dies acquired in a Mint scrap metal sale. The die rotation is about 90 degrees clockwise from coin turn, unusual for the issue, which typically is close to coin turn, though unlapped examples have close to medal turn. A problem-free mahogany-brown representative of this once-controversial issue. Our EAC grade MS60. Purchased 9/17/2011.

From The COL Steve Ellsworth Die State Collection. PCGS# 45344

4839 1805 S-267, B-1, R.1 XF40 PCGS. Breen Die State III. A delicate die crack is between the AM in AMERICA but no crack is present near the ST in STATES. A pleasing chocolate-brown example, devoid of verdigris and only lightly abraded. The reverse is particularly smooth. Housed in a green label holder. Our EAC grade VF30.

Ex: Butternut (1/3/2004); John Koebert (9/3/2012).

From The COL Steve Ellsworth Die State Collection. PCGS# 36427

4840 1805 S-268, B-2, R.3 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State III. A late die state with faint bulges on the obverse field. S-268 is scarcest among the three 1805 marriages. The reverse is smooth but the obverse is intermittently granular, particularly above Liberty's forehead. A few faded thin marks are noted near UNITED STATES. Our EAC grade Fine 12.

Ex: Scotsman (2/2007), lot 241; Tom Reynolds; John Koebert (1/28/2008).

From The COL Steve Ellsworth Die State Collection. PCGS# 36430

**1805 S-269 Cent
Die State IV**

4841 1805 S-269, B-3, R.1 PCGS Genuine. Breen Die State IV with a light crack through the base of the date. This cent has XF sharpness. Medium brown overall with glimpses of golden-brown toning at the centers. Moderately glossy and lightly burnished. The fields are nearly unabraded though the cleavage displays wispy marks. Our EAC grade VF20.

Ex: Chuck Habermehl (11/29/1996).

From The COL Steve Ellsworth Die State Collection. PCGS# 36433

**1806 S-270 Cent, AU50
Only Variety for Date
Die State II**

4842 1806 S-270, B-1, R.1 AU50 PCGS. Breen Die State II with a brief vertical crack above the lowest shoulder curl. The sole die pair for the date. A well struck medium brown cent with virtually unabraded surfaces. Smooth aside from a trace of granularity near STATES and the date. Our EAC grade 35. Population: 4 in 50, 15 finer (3/09).

Ex: Cincinnati Central States (Heritage, 4/2009), lot 1032; purchased 5/4/2012.

From The COL Steve Ellsworth Die State Collection. PCGS# 36436

**1807 S-271 Cent
Popular 'Comet' Variety
Die State VI**

4843 1807 Comet, S-271, B-1, R.1 PCGS Genuine. Breen Die State VI. The lower left obverse field is swelling. This primarily stone-gray "Comet" cent has XF sharpness though moderately granular russet spots are scattered and the left obverse field displays a few curly thin marks. Our EAC grade VF20.

Purchased at Lakewood, Florida (10/14/1995).

From The COL Steve Ellsworth Die State Collection. PCGS# 36454

**1807/6 Cent, VF Details
Small 7, S-272
Important Guide Book Variety**

4844 1807/6 Small 7, S-272, B-2, High R.4 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State I or II. An evenly and boldly defined example of the rare Guide Book variety, limited to the present die pair. The reddish-brown surfaces are thoroughly granular but marks are limited to a horizontal field line near the nose. Our EAC grade Good 5.

Ex: Walter Reed (4/24/2003).

From The COL Steve Ellsworth Die State Collection. PCGS# 36439

1807/6 S-273 Cent, XF40
Clashed Die State II

- 4845** 1807/6 Large 7, S-273, B-3, R.1 XF40 PCGS. Breen Die State II with clash marks near the hair ribbon and profile. The sole Large 7 overdate Sheldon pairing. A sharp gunmetal-gray cent with pleasing surfaces despite a couple of faded marks on the cheek and a minor rim tick on the reverse at 10 o'clock. Our EAC grade VF30. Purchased in Tucson, Arizona (2/1983). From The COL Steve Ellsworth Die State Collection. PCGS# 36442

1807/6 Large 7 Cent, AU50
Reverse Lamination
S-273, Die State II

- 4846** 1807/6 Large 7, S-273, B-3, R.1 — Lamination Reverse — AU50 PCGS. Breen Die State II with bold clash marks inside the wreath and about the portrait. This better grade walnut-brown example is unabraded aside from two moderate lower obverse field marks. The reverse has an as-made irregular recessed area beneath ONE to the final A in AMERICA, caused by a lamination or, possibly, a strike-through. Our EAC grade XF40. No provenance available. From The COL Steve Ellsworth Die State Collection. PCGS# 36442

1807/6 Large 7 Cent, Choice VF
S-273, Die State IV

- 4847** 1807/6 Large 7, S-273, B-3, R.1 VF35 PCGS. Breen Die State IV with a horizontal obverse die crack at 7:30. This medium brown cent is generally smooth though the right obverse has a few thin marks and the reverse has moderate rim dings at 5:30 and 7 o'clock. Slightly misaligned dies causes weakness on OF AMERICA. Our EAC grade VF25. Ex: John Schoentag (McCawley and Grellman, 1/1996), lot 262. From The COL Steve Ellsworth Die State Collection. PCGS# 36442

1807 Cent, XF Details
Large Fraction, S-275
Die State II

- 4848** 1807 Large Fraction, S-275, B-5, R.3 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State II with minor field bulges. The scarcer of the two Large Fraction 1807 die varieties. A sharp dark brown representative with moderately granular surfaces. A lens reveals a few inconsequential obverse pinscratches. Our EAC grade VF30. Ex: Mid-American (2/1985), lot 87. From The COL Steve Ellsworth Die State Collection. PCGS# 36448

- 4849** 1807 Large Fraction, S-275, B-5, R.3 — Damage or Tooling — PCGS Genuine. VF Details. Breen Die State III. The L in LIBERTY is faint due to die sinking on this late state example. The dark brown surfaces are mildly to moderately granular but are much nicer than the PCGS designations imply. Our EAC grade Fine 12. Ex: Doug Bird (3/31/2001); Jeff Adamovicz (3/6/2006). From The COL Steve Ellsworth Die State Collection. PCGS# 36448

- 4850** 1808 S-277, B-1, R.2 PCGS Genuine. Breen Die State IV. An arc-shaped die crack reaches the reverse rim at 9:30 and 12:30. This lavender-brown Classic Head cent is mildly granular and displays moderate pitting on the right-side leaves of the wreath. Our EAC grade Fine 15. Ex: Walter Reed (4/17/2004). From The COL Steve Ellsworth Die State Collection. PCGS# 36457

- 4851** 1808 S-278, B-2, R.3 — Cleaning — PCGS Genuine. Fine Details. Breen Die State II without clash marks. This glossy olive-brown cent is smooth except for a slender mark on the upper obverse field. S-278 is identified by its high T in CENT. Our EAC grade VG10. Ex: Richard Stouffer (4/30/2011). From The COL Steve Ellsworth Die State Collection. PCGS# 36460

1808 S-279 Cent
Die State I

- 4852** 1808 S-279, B-3, R.1 PCGS Genuine. Breen Die State I, "rarer than states II and III," perfect dies. The deep mahogany-brown surfaces exhibit XF detail but are burnished and lightly to moderately pitted. Seldom found as sharp as the present piece. Our EAC grade VF20. Ex: Great Britain Coins (12/2001). From The COL Steve Ellsworth Die State Collection. PCGS# 36463

- 4853** 1808 S-279, B-3, R.1 VF35 PCGS. Breen Die State II. A relatively early die state, though the reverse dentils are worn from the die. A deep brown representative with unmarked and pleasing surfaces despite minor verdigris on the upper left reverse. Our EAC grade VF25.
Ex: George Ramont; Robinson S. Brown, Jr. (*Superior*, 1/1996), lot 383.
From The COL Steve Ellsworth Die State Collection. PCGS# 36463

1809 S-280 Cent, Near Mint Die State II

- 4854** 1809 S-280, B-1, R.2 AU58 NGC. Breen Die State II with the usually seen diagonal die crack descending from the E in STATES to the wreath. The die line above star 11 is absent, as it first appears on State III. The only die marriage of the date. A beautiful olive-brown example with powder-blue undertones and partial satin luster. Spots are virtually absent and a loupe locates only three minor hair-thin marks, one on the cheek and the other two near star 9. Classic Head cents are typically found dark, corroded, and/or worn, and those few pieces without any of those three characteristics are highly desirable. Our EAC grade XF40.
Ex: Larry Lee; Phil Darby (5/14/2004).
From The COL Steve Ellsworth Die State Collection. PCGS# 36466

1810/09 S-281 Cent, VG8 Double Struck, Ex: Bolt

- 4855** 1810/09 S-281, B-1, R.1 — Double Struck — VG8 PCGS. Breen Die State uncertain though early. The first strike for this cent was normal, but the cent did not fully eject. It was struck a second time, 70% off center toward 2 o'clock, at 7:30 relative to the first strike. The second strike is uniface, since a planchet was fed between the present coin and the reverse die. A moderately granular medium brown cent with moderate pitting on the lower reverse. Pedigreed to Dr. Conway Bolt, who once owned a renowned and extensive collection of early copper errors. Our EAC grade VG8.
Ex: Dr. Conway Bolt; EAC Sale (*Pine Tree*, 2/1975), lot 567; later, Doug Bird (11/19/1994).
From The COL Steve Ellsworth Die State Collection. PCGS# 36469

1810/09 Cent, S-281 Die State IV

- 4856** 1810/09 S-281, B-1, R.1 PCGS Genuine. Breen Die State IV, "very rare," with an obscure obverse die bulge. Sharpness is close to Mint State though the unabraded surfaces are glossy from a wipe and the reverse is mildly to moderately granular. A dark brown cent with sea-green and rose-red undertones. Sharper than the Dan Holmes specimen. Our EAC grade AU50.
Ex: Hollinbeck Stamp and Coin; C. David Pierce; Floyd Starr (*Stack's*, 6/1984), lot 49.
From The COL Steve Ellsworth Die State Collection. PCGS# 36469

- 4857** 1810 S-283, B-4, R.2 VF20 PCGS. Breen Die State III. The dies are lapped to remove clash marks. A medium brown cent with minor contact and moderate buildup within protected areas of the reverse. Our EAC grade Fine 12.
Ex: Doug Bird; John Koeber (2/20/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36478

- 4858** 1810 S-284, B-5, R.3 Fine 15 PCGS. Breen Die State II with minor clashing from the profile on the reverse. S-284 is scarce and has a repunched T in LIBERTY. A deep olive-brown cent with smooth fields and a few faint hair-thin marks on the portrait. Struck slightly off center toward 5 o'clock. Our EAC grade Fine 12.
Ex: Chris Victor-McCawley; John Koeber (2/20/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36481

1810 S-285 Cent, VF25
Die State IV

- 4859** 1810 S-285, B-2, R.2 VF25 PCGS. Breen Die State IV with a rim break above the RI in AMERICA. A rare late die state. An unabraded and problem-free lavender-brown type representative. The obverse die for this variety later struck the extremely rare 1810 "restrrike" (Judd-41). Our EAC grade VF20.
Ex: Chris Victor-McCawley (9/14/2002); Walter Reed (1/19/2005).
From The COL Steve Ellsworth Die State Collection. PCGS# 36484

- 4860** 1812 Large Date, S-288, B-3, R.2 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State Uncertain. This deep brown cent is unmarked and has only light wear but both sides are evenly granular. Our EAC grade Fine 12.
Purchased 9/10/2004.
From The COL Steve Ellsworth Die State Collection. PCGS# 36505

- 4861** 1812 Large Date, S-289, B-4, R.1 VF35 PCGS. CAC. Breen Die State II. The date repunching has faded, and clash marks are evident within the wreath. This medium brown cent has an unabraded obverse and a few faded thin marks on the reverse. A large aqua speck is over the E in ONE. Our EAC grade Fine 15.
Purchased 11/3/2012.
From The COL Steve Ellsworth Die State Collection. PCGS# 36508

- 4862** 1812 Large Date, S-289, B-4, R.1 VF30 PCGS. Breen Die State IV. Boldly clashed between the NT in CENT. The leaf extends well past the second S in STATES, confirming S-289. A dark brown example with superior surfaces for the type. A flan crack is noted at 1 o'clock on the obverse and opposite on the C in AMERICA. Incorrectly designated as Small Date on the PCGS insert. Our EAC grade VF20.
Purchased 9/23/2011.
From The COL Steve Ellsworth Die State Collection. PCGS# 36508

1812 Small Date Cent, XF40
S-291, Die State III

- 4863** 1812 Small Date, S-291, B-1, R.2 XF40 PCGS. Breen Die State III with a crack between the bases of the 12 in the date. S-291 is readily attributed by the die lump beneath the E in ONE. This lavender-brown representative is generally smooth though we note a tick above the 8 and nearly imperceptible marks near the profile. Our EAC grade VF25.
Ex: Tom Reynolds; Superior (2/2003), lot 221; John Koebert (9/3/2012).
From The COL Steve Ellsworth Die State Collection. PCGS# 36502

1812 S-291 Cent, Mint Details
Small Date, Die State III

- 4864** 1812 Small Date, S-291, B-1, R.2 — Environmental Damage — PCGS Genuine. Unc. Breen Die State III. A deep chocolate-brown representative with mark-free surfaces. Moderately and unevenly granular, most notably on the obverse near stars 11 to 13 and on the reverse near the TES in STATES. Our EAC grade VF35.
Ex: 1995 ANA Sale (Heritage, 8/1995), lot 5042.
From The COL Steve Ellsworth Die State Collection. PCGS# 36502

1813 S-293 Cent, XF Sharpness
Die State III

- 4865** 1813 S-293, B-1, R.2 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State III with a raised ridge on the upper right obverse border. This olive-brown cent is well defined but the upper obverse and lower reverse are moderately granular. Neither side displays any visible marks. Our EAC grade VF25.
Purchased from Tom Kohler (9/15/2011).
From The COL Steve Ellsworth Die State Collection. PCGS# 36514

1814 Plain 4 Cent, MS62 Brown
S-295, Die State IV

- 4866** 1814 Plain 4, S-295, B-2, R.1 MS62 Brown NGC. Breen Die State IV-V with a faint diagonal crack from 3:30 to the 8 in the date. A deep golden-brown example with satin luster and a bold, even strike. Marks are absent aside from a couple of faint field lines near the profile. The curls display a hint of wear. Our EAC grade AU50.
Ex: Superior (6/2002), lot 2462.
From The COL Steve Ellsworth Die State Collection. PCGS# 36517

**1814 Plain 4 Cent, S-295
Die State XIV, Full 'Beard'**

- 4867** 1814 Plain 4, S-295, B-2, R.1. PCGS Genuine. Breen Die State XIV with a rim break above the TA in STATES. Liberty's "beard" die break is well advanced on this terminal state. This golden-brown and steel-gray cent is moderately luminous from a wipe. Thin marks are noted after star 7 and on the reverse exergue. A few hairlines are on the field near the profile, and the face displays minor contact. Our EAC grade VF30. Purchased from Coleman Foster (6/12/1999). From The COL Steve Ellsworth Die State Collection. PCGS# 36517

COLONIALS

- 4868** 1652 Oak Tree Shilling Fine 15 NGC. Noe-14, W-530, Salmon 10-G, R.4. 68.6 gn. IN at Bottom. The Spiny Tree variety. A stone-gray and almond-gold shilling without visible marks. The legends are virtually complete despite straight mint clips on the left and lower borders. Wavy surfaces protect the date and denomination at the expense of the tree, which is mostly worn aside from its base. Listed on page 39 of the 2014 *Guide Book*. PCGS# 20

**1652 Pine Tree Threepence, VF30
Noe-34, Pellets at Trunk**

- 4869** 1652 Pine Tree Threepence VF30 PCGS. CAC. Noe-34, W-630, Salmon 1-A, R.4. 17.3 gn. Pellets at trunk. A lavender-gray and aquamarine example. A later die state with a break filling the lower half of the E in MASATHVSETS. The obverse is misaligned toward 12 o'clock, and the EN in ENGLAND is indistinct, both as usual for Noe-34. The rocker press causes a wavy surface and small areas with greater wear, but all of the date and denomination and most of the tree is sharp. One slender mark noted beneath the tree. Listed on page 39 of the 2014 *Guide Book*. PCGS# 21

- 4870** 1652 Pine Tree Shilling, Large Planchet — Tooled — PCGS Genuine. VF Details. Noe-11, W-760, Salmon 9-F, R.4. A mildly bright example with sharp definition across most of the tree. ENGLAND is also bold, though mint clips affect the tops of some letters. Bent and straightened in two or three places, causing uneven wear. The lower right obverse border is unobtrusively tooled. Listed on page 39 of the 2014 *Guide Book*. PCGS# 23

**1652 Pine Tree Shilling, XF Details
Large Planchet, Rare Noe-6.1**

- 4871** 1652 Pine Tree Shilling, Large Planchet — Environmental Damage — NGC Details. XF. Noe-6.1, W-720, Salmon 5-Di, R.6. 67.8 gn. No pellets at trunk. First described by Richard Picker, Noe-6.1 is a very rare variant of Noe-6 distinguished by Boston Mint re-engraving of the letters IN M on the lower obverse. In particular, the I is short and sans serif with a pointed end. A different example of Noe-6.1 appears in lot 110 of the Hain Family Collection (Stack's, 1/2002), where it is stated "we have not recorded another." We suspect others exist, attributed simply as Noe-6. The die state is later than Noe-6 with prominent breaks on the reverse above the 6 in the date and through the M in DOM. This example is sharp but moderately granular and darkly toned. The planchet is wavy, as coined by a rocker press. Listed on page 39 of the 2014 *Guide Book*. PCGS# 23

**St. Patrick Farthing, Choice VF
W-11500, Smooth Fields**

- 4872** (1670-75) St. Patrick Farthing VF35 PCGS. CAC. Breen-208, W-11500. Nothing below king. The brass splasher is unusually well centered on the crown. A lovely example that boasts smooth chocolate-brown fields. Struck slightly off center with incomplete rims on the right borders. One small flan flaw above the harp angel, and a few tiny roundish marks are near the church. Listed on page 41 of the 2014 *Guide Book*. PCGS# 42

Undated St. Patrick Farthing, XF45
Circa 1670-1675 or Earlier, W-11500
From the Craige Collection

- 4873** (1670-75) St. Patrick Farthing XF45 PCGS. CAC. Breen-212, W-11500. Ex: Craige. this is the Sea Beasts variety with "Masonic" punctuation according to Breen, and this variety is plentiful in the context of St. Patrick farthings. The reverse has a die flaw left of Saint Patrick's head, suggesting a "Siamese Twins" variety label. Both sides are smooth and glossy with lovely dark chocolate fields and chestnut-brown devices. Slightly misstruck, as the brass splasher is well below the crown, missing it entirely. The dies were crudely engraved with long dentils at the lower obverse and reverse. Pristine surfaces for the grade, with excellent eye appeal. This piece is likely the finest example known from the Griffie 31-6/4a dies. Ex: Ted L. Craige Collection (*Stack's-Bowers*, 11/2012), lot 6156. PCGS# 42

St. Patrick Farthing, Choice Fine
Rare 'Halo' Variety, Breen-206

- 4874** (1670-75) St. Patrick Farthing, Halo Reverse Fine 15 PCGS. CAC. Breen-206, W-11520. A 'halo' or nimbus forms a circle around St. Patrick's miter. The rare variety is listed within a remarkable premium on page 41 of the 2014 *Guide Book*. A chocolate-brown example with pleasing surfaces. A late die state with a large break consuming the S in QVIESCAT. The brass splasher is unusually large and overlaps the crown. Population: 1 in 15, 1 finer (8/13). PCGS# 82
- 4875** (c. 1828) American Plantations 1/24 Part Real, Restrike AU55 PCGS. Newman 5-D, W-1160. Newman 5-D, W-1160, R.5. The lengthy die break on the right obverse identifies the restrike of this late 17th century token. Unabraded and unworn. The surfaces are evenly granular and display rich dove-gray toning, usual for the issue. Listed on page 41 of the 2014 *Guide Book*. PCGS# 52

1723 Rosa Americana Twopence
MS62 Brown, Martin 3.7-E.9

- 4876** 1723 Rosa Americana Twopence MS62 Brown PCGS. M. 3.7-E.9, W-1334, R.4. Stop after REX, no stop after the date. The deep brown surfaces exhibit olive-green undertones. An intricately struck and satiny example, smooth save for a single thin mark near the right scroll knob. Listed on page 43 of the 2014 *Guide Book*. Population: 11 in 62 Brown, 9 finer (8/13). Ex: San Jose Collection of Colonial Coinage (*Heritage*, 1/2009), lot 31, which realized \$2,530. PCGS# 128
- 4877** 1723 Hibernia Halfpenny MS64+ Brown PCGS. CAC. M. 4-34-Gb.3, W-13120, R.2. The fields are medium brown, the high points are gunmetal-gray, and traces of mint Red persist within the legends. A well preserved near-Gem with minor incompleteness of strike at the centers. Listed on page 43 of the 2014 *Guide Book*. PCGS# 180
- 4878** 1743-W French Colonies Sou Marque MS66 PCGS. CAC. Breen-576, Vlack-204, R.3. Struck in Lille, France, this essentially pristine sou marque has light almond-gold and ice-blue toning. The strike is good though slightly incomplete. Listed on page 52 of the 2014 *Guide Book*. The finest of only two graded at PCGS (7/13). PCGS# 171447

1766 William Pitt Halfpenny, AU
Betts-519, Copper

- 4879** 1766 Pitt Halfpenny AU50 PCGS. Betts-519, W-8350, R.3. The "Great Commoner" William Pitt successfully negotiated the repeal of the Stamp Act in Parliament, to the relief of New England merchants. This moderately circulated medal is mostly steel-gray with glimpses of golden-brown in design crevices. Smooth save for minor granularity on the right field near the portrait. Listed on page 50 of the 2014 *Guide Book*. PCGS# 236

**1766 Pitt Halfpenny, Near-Mint
Copper, Betts-519**

- 4880** 1766 Pitt Halfpenny AU58 PCGS. CAC. Betts-519, W-8350, R.3. A bold and glossy chocolate-brown example of this famous late Colonial-era medal. High points, such as the sails, display a hint of wear. Several faint thin field marks are distributed. William Pitt the Elder is honored for his repeal of the hated Stamp Act, but it is unknown which side of the Atlantic authorized the medal. Listed on page 50 of the 2014 *Guide Book*. Population: 5 in 58, 7 finer (8/13). PCGS# 236

**1766 Pitt Halfpenny, AU50
Silvered, Betts-519**

- 4881** 1766 Pitt Halfpenny, Silvered AU50 PCGS. CAC. Betts-519, W-8350. William Pitt the Elder, also known as The Great Commoner, helped repeal the despised Stamp Act that taxed colony trade. Silvered examples of the Pitt halfpenny are scarcer than their copper counterparts. The present cream-gray piece is unabraded and shows only a trace of wear. An area of moderately dark toning is noted near FRIENDS. Listed on page 50 of the 2014 *Guide Book*. Population: 1 in 50, 1 finer (8/13). PCGS# 239

- 4882** 1773 Virginia Halfpenny, Period MS64 Brown PCGS. Newman 27-J, W-1585, R.2. Brick-red and steel-blue hues emerge when this crisply impressed near-Gem is rotated beneath a light. A solitary subtle spot is present near the I in GEORGIVS. Listed on page 45 of the 2014 *Guide Book*.

Ex: *Houston Signature* (Heritage, 11/2007), lot 60006. PCGS# 240

**1787 Massachusetts Cent, MS64 Brown
Arrows in Left Talon, Ryder 3-G
Magnificent Condition Rarity**

- 4883** 1787 Massachusetts Cent, Arrows in Left Talon MS64 Brown PCGS. Ryder 3-G, W-6090, R.3. An outstanding Massachusetts Commonwealth type coin. The fields are virtually free from marks, and there are no spots or flan deficiencies. The strike is crisp with minor blending limited to a couple of small areas on the Indian's clothing. Principally toned medium brown with hints of golden-brown on the central reverse. Curiously, this die variety was absent from the Part V auction of John J. Ford, Jr. Collection. Listed on page 59 of the 2014 *Guide Book*. Population: 3 in 64 Brown, 1 in 64 Red and Brown, 1 finer as 65 Brown (8/13). PCGS# 302

- 4884** 1785 Connecticut Copper, Bust Right VF25 PCGS. M. 3.5-B, W-2350, High R.5. This better variety Connecticut copper is golden-brown aside from a darker area on the right reverse. A flan flaw is noted on the reverse at 11:30 and a loupe reveals a few thin marks. Listed on page 61 of the 2014 *Guide Book*. PCGS# 316

- 4885** 1787 ETLIB INDE Small Head Right Connecticut Copper VF30 NGC. M. 1.1-A, W-2700, R.3. A charming golden-brown example of this scarce *Guide Book* variety. Unmarked and attractive despite remnants of the granular flan surface at the centers. A collector flip with typed notations accompanies the lot. Listed on page 61 of the 2014 *Guide Book*. Census: 2 in 30, 1 finer (8/13). PCGS# 346

**1787 Connecticut Copper, Choice VF
Small Head Right, ETLIB INDE
Miller 1.1-A**

4886 1787 ETLIB INDE Small Head Right Connecticut Copper VF35 PCGS. M. 1.1-A, W-2700, R.3. A lovely chocolate-brown representative with exemplary surfaces. The central reverse retains traces of the planchet texture. Two small curved clips (as made) are at 10 and 12 o'clock, and the coin is moderately off center toward 11 o'clock. Population: 2 in 35, 3 finer (8/13). Listed on page 59 of the 2013 *Guide Book*. PCGS# 346

4887 1787/1777 Connecticut Copper, Mailed Bust Left VF30 PCGS. M. 12-Q, W-2885, R.3. A sharp example of this blundered date variety. The obverse appears off center toward 3 o'clock and the reverse appears off center toward 1:30 but all legends are intact due to a broad flan. The deep brown surfaces are moderately granular and the devices display a couple of mint-made vertical flaws. Listed on page 61 of the 2014 *Guide Book*. PCGS# 355

4888 1787 Machin's Mills Halfpenny — Environmental Damage — NGC Details. XF. Vlack 17-87A, W-7900, R.2. Machin's Mills were private post-Revolution New York coiners making counterfeit English halfpennies. This tan-brown representative is unmarked and has pleasing sharpness but the surfaces are evenly granular. Listed on page 67 of the 2014 *Guide Book*. PCGS# 469

4889 1787 New Jersey Copper, No Sprig Above Plow VF25 NGC. M. 59-o, W-5325, R.5. Designated as Large Planchet, Plain Shield by NGC, using the past *Guide Book* arrangement of the New Jersey series. A much better die variety usually encountered well worn. The present example has only moderate wear, though the centers are incompletely brought up and retain portions of the planchet surface. Mildly granular but only lightly abraded. Listed on page 70 of the 2014 *Guide Book*. PCGS# 509

4890 1785 Vermont Copper, VERMONTS Fine 15 PCGS. RR-2, Bressett 1-A, W-2005, R.2. This chocolate-brown Landscape example is free from visible marks and was coined on an above-average planchet. Struck a few degrees off center toward 7:30 causing uneven wear on the border legends. An early die state without the often-seen break on the lower obverse. Listed on page 72 of the 2014 *Guide Book*.

Ex: Orlando FUN Signature (Heritage, 1/2006), lot 25008, which realized \$690. PCGS# 539

4891 1786 Vermont Copper, VERMONTENSIMUM Fine 15 NGC. RR-6, Bressett 4-D, W-2020, R.2. A charming Landscape example with exceptional sharpness for the designated grade on the upper half of the obverse. QUARTA, the plow, and the all-seeing eye are also clear. STELLA is faint, as are portions of PUBLICA. Listed on page 72 of the 2014 *Guide Book*. PCGS# 545

4892 1786 Vermont Copper, VERMONTENSIMUM VF20 NGC. RR-7, Bressett 5-E, W-2025, R.3. Golden-brown centers are framed by ebony borders. The landscape is well defined for the VF level. Moderately off center toward 7:30. Minor flan flaws and a few faint obverse pinscratches are noted. Listed on page 72 of the 2014 *Guide Book*.

Ex: Tampa FUN Signature (Heritage, 1/2011), lot 9030, which realized \$1,265. PCGS# 545

4893 1788 Vermont Copper, Bust Right VG10 PCGS. RR-21, Bressett 10-R, W-2155, R.5. A lavender-brown representative of this elusive Ryder variety. All legends are clear and the date is sharp. No marks are noticeable though the center of the portrait has a small flan flaw. Listed on page 72 of the 2014 *Guide Book*. PCGS# 563

4894 1788 Vermont Copper, Bust Right VG10 NGC. RR-19, Bressett 13-L, W-2185, R.5. Steel-gray fields contrast with walnut-brown high points. Moderately granular near the profile. All legends are sharp, though centering causes portions of AUCTORI and the date to miss the flan. A small rim clip (as coined) is at 12 o'clock. Listed on page 72 of the 2014 *Guide Book*. PCGS# 563

4895 1788 Vermont Copper, Bust Right XF40 NGC. RR-27, Bressett 18-W, W-2205, R.2. A boldly defined example of this final year Vermont variety. The olive-brown and lilac-gray surfaces are mildly glossy and display slight dark granularity near the profile. A flan flaw affects the 1 in the date, and a minor mint clip is at 10 o'clock. Listed on page 72 of the 2014 *Guide Book*. PCGS# 563

4896 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU55 PCGS. Crosby 4-D, W-1910, High R.4. This chocolate-brown example has only light, even high point wear. The surfaces are mildly glossy and smooth aside from a thin mark near the 1 in CONSTELLATIO. A better die variety. Listed on page 54 of the 2014 *Guide Book*. PCGS# 813

**1787 Fugio Cent, No Cinquefoils, VF30
UNITED STATES, N. 1-B**

4897 1787 Fugio Cent, UNITED STATES, No Cinquefoils VF30 PCGS. CAC. N. 1-B, W-6600, R.4. The Cross after Date, No Cinquefoils was a Fugio prototype obverse die. It was paired with a pattern die (the very rare N. 1-CC), another prototype reverse (N. 1-Z), and one generic reverse each of the STATES UNITED (N. 1-L) and UNITED STATES (N. 1-B) subtypes. This example of the latter variety has pleasing walnut-brown surfaces. We note a thin mark on the E in ONE and a couple of faint lines on the sun. Listed on page 87 of the 2014 *Guide Book*. Population: 11 in 30, 18 finer (8/13). PCGS# 880

4898 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays Good 4 PCGS. N. 20-X, W-7000, R.5. A well circulated example of this very scarce Newman variety. The obverse legend is clear, allowing ready attribution, while the reverse exhibits greater wear. The cream-gray surfaces are smooth for the grade despite a moderate reverse lamination. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

4899 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF30 ANACS. N. 13-X, W-6855, R.2. This midgrade chocolate-brown representative is refreshingly free of marks or corrosion although minor flan striations are evident on both sides. Listed on page 87 of the 2014 *Guide Book*.
Ex: Dallas Signature (Heritage, 12/2007), lot 67004, which realized \$661.25. PCGS# 883

4900 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 PCGS. N. 9-P, W-6755, R.4. A scarce walnut-brown Fugio copper with pleasing sharpness and occasional traces of mint gloss. Smooth except for a minor thin mark on the 3 o'clock ring. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

4901 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 PCGS. N. 13-R, W-6850, R.4. This glossy medium brown Fugio copper was struck on a well-made, defect-free planchet. Peripheral elements are generally sharp, although the centers were incompletely impressed. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

4902 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS. N. 7-T, W-6735, R.4. This is the plate coin for the Newman 7-T variety in the 2008 edition of Eric P. Newman's *United States Fugio Copper Coinage of 1787*. The scarce marriage is distinguished by a low E in BUSINESS. The E in WE is repunched north. A charming golden-brown example, struck slightly off center toward 4:30. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**1787 N. 13-X Fugio Cent, AU50
Double Struck**

4903 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Double Struck — AU50 PCGS. N. 13-X, W-6855, R.2. The first strike of this spectacular double struck Fugio cent was a little off-center, and the second strike was normally centered. Attractive mahogany and olive-brown surfaces retain traces of mint luster. An outstanding example for the variety or error collector. PCGS# 883

4904 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 PCGS. N. 13-X, W-6855, R.2. Pink-red and olive-green hues embrace this unmarked and partly lustrous representative. Minor flan striations are all as made. 'X' reverse Fugios are associated with the Bank of New York holdings. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS63 Brown
STATES UNITED, Cinquefoils
Newman 13-X**

4905 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Brown PCGS. N. 13-X, W-6855, R.2. Numismatists can thank the Bank of New York holdings for providing Select Uncirculated Fugio cents such as the present piece. This unabraded example has a primarily medium brown obverse, but the reverse displays ample mint red, as do protected regions of the obverse. The strike is sharp except on the lower obverse margin. A small curved clip (as made) at 3:30. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS62 Brown
UNITED STATES, Cinquefoils
Newman 8-B**

4906 1787 Fugio Cent, UNITED STATES, Cinquefoils MS62 Brown PCGS. CAC. N. 8-B, W-6740, R.3. An unabraded chocolate-brown Fugio copper with scattered trivial flan imperfections. Misaligned dies cause incompleteness of strike on the lower obverse and upper reverse. Scarcer than its STATES UNITED counterpart. The sun is boldly clashed on the lower reverse and has the appearance of wearing glasses. Listed on page 87 of the 2014 *Guide Book*. PCGS# 889

4907 1787 Fugio Cent, New Haven Restrike, Copper MS63 Brown PCGS. CAC. N. 104-FF, W-17560. The "guinea pig" of American numismatics, Newman 104-FF is not from New Haven and is not a restrike, as it was struck from rusted copy dies. However, it has been avidly collected since the 1860s. A satiny and unabraded chocolate-brown Select example. Listed on page 88 of the 2014 *Guide Book*. PCGS# 916

4908 1736 Auctori Plebis VG10 NGC. Breen-1148, Low R.7. The extremely rare "173366 Hispaniola" token with a right-facing bust on the obverse and a harp on the reverse. These pieces are associated with the Auctori Plebis tokens because of the similar obverse legend. The weak impression is typical of all known examples, with smooth, glossy brown surfaces that any collector could love. About a dozen of these pieces survive in all grades. Ex: C-4 Convention Sale (11/1998), lot 438.

**1794 Talbot, Allum & Lee Cent
PR64 Brown, Fuld-4**

4909 1794 Talbot, Allum & Lee Cent PR64 Brown PCGS. Fuld-4, W-8590. The TAL tokens were ordered from British private coiner Matthew Boulton. His firm in addition struck several proofs, which served as portfolio specimens to procure further business. A golden-brown near-Gem with reflective fields, a sharp strike, minute flan flakes, and one spot on the right reverse field. Listed on page 76 of the 2013 *Guide Book*. PCGS# 90634

4910 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR66 Brown PCGS. Baker-3, W-10370, R.5. A pristine and fully struck specimen with glassy fields and consistent mahogany-brown toning. An outstanding example of the Large Letters W.S. Lincoln restrike. Listed on page 80 of the 2014 *Guide Book*. PCGS# 685

4911 1791 Washington Large Eagle Cent — Environmental Damage — NGC Details. Unc. Baker-15, W-10610, R.2. A well struck and moderately prooflike example with medium brown centers and mildly granular mahogany-red margins. The dies are attributed to teen prodigy John Gregory Hancock. Listed on page 81 of the 2014 *Guide Book*.

**1791 Washington Cent, MS63 Brown
Large Eagle, Baker-16**

4912 1791 Washington Large Eagle Cent MS63 Brown PCGS. CAC. Baker-16, W-10630, R.3. A mildly prooflike dark brown representative of this popular Washington variety. The strike is good aside from incompleteness on the first President's hair. Mostly smooth, though we note hair-thin marks near the N in WASHINGTON and across the eagle's neck. Listed on page 81 of the 2014 *Guide Book*. PCGS# 702

4913 1791 Washington Small Eagle Cent XF40 NGC. Baker-16, W-10630, R.3. A mildly granular ebony-brown representative of this popular 19th century Washington issue. No marks are remotely of interest though wear on the epaulets confirms a stint in circulation. Listed on page 81 of the 2014 *Guide Book*. PCGS# 705

4914 1795 Washington North Wales Halfpenny, Plain Edge AU55 PCGS. B-34, W-11150, R.3. The usual variety with one star at each side of the harp. Toned medium brown with olive high points. Die lines on the obverse field indicate only slight wear, visible at the epaulets. The strike was intentionally soft at the centers to imply long-term acceptance in circulation. Listed on page 84 of the 2014 *Guide Book*. Population: 3 in 55, 3 finer (8/13). PCGS# 770

HALF CENTS

**1793 C-1 Half Cent
Very Fine Sharpness**

4915 1793 — Improperly Cleaned — NGC Details. VF. C-1, B-1, High R.3. Manley Die State 2.0. This steel-gray half cent is mildly glossy from a wipe but no marks are noticeable and the two small spots are relegated to the right reverse margin. The definition is bold except for HALF CENT, which is always indistinct on examples of the present die state. Our EAC grade VG10. *From The Joan Carroll Collection.*

4916 1794 VG10 PCGS. C-4a, B-6b, R.3. The usual Small Letters Edge is presumed. This unabraded deep brown example is even defined and only moderately granular. An early die state without any bulge on the lower left obverse field. Our EAC grade Good 6. *From The Joan Carroll Collection.* NGC ID# 2223, PCGS# 1003

**1794 C-7, B-7 Half Cent, VF Details
Intermediate Die State**

4917 1794 High Relief Head — Environmental Damage — NGC Details. VF. C-7, B-7, High R.5. Intermediate die state between Manley Die States 1.0 and 2.0, showing some characteristics of both states. An elusive die variety with the High Relief Hair obverse and a vertical leaf pair below the T in CENT. Deep steel-brown surfaces show minor corrosion and a tiny reverse rim bump at 9 o'clock. Our EAC grade Fine 12. *From The Joan Carroll Collection.*

4918 1794 Normal Head VF25 NGC. C-4a, B-6b, R.3. Manley Die State 3.0, the usual state with a prominent bulge behind the low curls on the obverse, and with other die defects on both sides. This example shows moderate handling marks on the otherwise smooth dark brown surfaces with traces of mahogany. Our EAC grade Fine 15. *From The Joan Carroll Collection.* NGC ID# 2223, PCGS# 1003

4919 1795 Lettered Edge — Environmental Damage — NGC Details. VF. C-1, B-1, R.2. Manley Die State 1.0 with no evidence of the late state die bulge through AME. This pleasing two-tone piece has light brown devices and deeper olive and steel-brown fields. A small scrape is noted in the right obverse field and light porosity is evenly distributed across both sides. Our EAC grade Fine 12. *From The Joan Carroll Collection.*

**1795 C-1, B-1 Half Cent, XF40
Lettered Edge**

4920 1795 Lettered Edge XF40 NGC. C-1, B-1, R.2. Manley Die State 1.0, the usual early die state no bulge through AME. Minor rim imperfections are evident on the obverse with a small reverse edge bump at 9 o'clock. This pleasing light olive example has the usual trivial handling marks expected for the grade. Our EAC grade VF25. NGC ID# 2224, PCGS# 1009

1795 C-6a, B-6c Half Cent, VF30
Struck over a 1794 T.A.L. Token

4921 1795 Plain Edge VF30 NGC. C-6a, B-6c, R.2. Clearly struck over a 1794 Talbot, Allum, and Lee token, with substantial ship's rigging from the token design visible in the left and right obverse fields. The token was almost certainly the variety with New York, and it resembles the Fuld-3 variety more closely than Fuld-2 or 4. Although the surfaces are not perfectly smooth, this attractive two-tone piece has dark steel fields and lighter olive-brown devices. A small planchet void is evident between the final S and the O. Our EAC grade Fine 15. NGC ID# 2225, PCGS# 1018

4922 1795 Plain Edge — Clipped Planchet — XF40 NGC. C-5a, B-5a, R.3. The usual die state with a die crack across the upper reverse. Slight evidence of a clipped planchet is noted at 7 o'clock. A thin scratch is visible above the head and the surfaces have myriad marks, mostly from the planchet before striking. Both sides combine olive-brown and steel patina on this pleasing piece. Our EAC grade VF25.
From The Joan Carroll Collection. NGC ID# 2225, PCGS# 1018

4923 1797 1 Above 1, Plain Edge VG10 PCGS. C-1, B-1, R.2. Manley Die State 5.0, "very scarce," with the RTY in LIBERTY and the RICA in AMERICA absent due to sunken dies. Toned deep mahogany-brown with smooth surfaces save for a couple of thin marks above HALF. The Talbot, Allum & Lee undertype is especially evident near the T in UNITED. Encased in a green label holder. Our EAC grade VG8.
From The Joan Carroll Collection. PCGS# 1042

4924 1797 1 Above 1, Plain Edge — Scratch — PCGS Genuine. VF Details. C-1, B-1, R.2. Manley Die State 4.0. Glossy blue-brown surfaces show moderate wear. The obverse has few disturbances, though the reverse has several long, deep scratches from the rim down to the wreath and inside. Our EAC grade Good 5. PCGS# 1042

1797 C-2, B-2 Half Cent, VF25
Centered Head

4925 1797 Plain Edge VF25 NGC. C-2, B-2, R.3. A thin die crack is always present at the lower left reverse on this die marriage. The obverse die is nicely made with a wide border and properly centered head between the date and LIBERTY. This pleasing piece has smooth light steel surfaces with minor scratches at the upper reverse, probably remaining from the planchet before this piece was struck. Our EAC grade Fine 15.
From The Joan Carroll Collection. NGC ID# 2228, PCGS# 1036

1803 C-1, B-1 Half Cent, AU55
Scarce Middle Die State

4926 1803 AU55 PCGS. C-1, B-1, R.1. Manley Die State 2.0 that he describes as very scarce. This lovely Choice AU specimen has intermingled tan and olive-brown surfaces with hints of pale blue toning on the devices. An iridescent toning spot appears in front of the nose and a curly abrasion crosses the numerator. Our EAC grade XF40. NGC ID# 222E, PCGS# 1060

1804 C-13, B-10 Half Cent, MS63 Brown
Plain 4, No Stems

4927 1804 Plain 4, No Stems MS63 Brown PCGS. CAC. C-13, B-10, R.1. A late die state with little border dentilation visible only at the lower reverse. The lower obverse and upper reverse rims are flat and wide, giving the appearance of a broadstruck coin, a result of the die state. This piece has a sharp central strike with cartwheel luster on the dark chocolate and tan surfaces. Our EAC grade MS60. NGC ID# 222F, PCGS# 1063

1804 C-12, B-11 Half Cent, MS63 Brown
Crosslet 4, No Stems

4928 1804 Crosslet 4, No Stems MS63 Brown PCGS. CAC. C-12, B-11, R.2. Manley State 1.0. A wonderful example with mahogany-brown surfaces that show considerable mint sheen. The highpoints are darker olive with a few splashes of steel patina. Traces of lighter tan are faded from the original mint red. Our EAC grade MS60.
Ex: Dr. Wallace Lee (Superior, 5/2003), lot 221; Colonel Steven Ellsworth Collection of U.S. Half Cents (Heritage, 5/2008), lot 1687. NGC ID# 222F, PCGS# 1072

4929 1806 Small 6, No Stems MS61 Brown NGC. C-1, B-3, R.1. The single No Stems variety, and a pleasing tan and olive-brown example. A few short scratches and other trivial marks limit the grade. Our EAC grade AU55.
From The Joan Carroll Collection. NGC ID# 222J, PCGS# 1093

**1806 C-1, B-3 Half Cent, MS63 Brown
Small 6, No Stems**

- 4930** 1806 Small 6, No Stems MS63 Brown PCGS. C-1, B-3, R.1. A lovely example of the No Stems variety, this piece exhibits olive-brown and steel patina with a few splashes of lighter olive-tan, faded from original mint red. The usual die state with minor rim breaks over MER and elsewhere on the reverse. Our EAC grade MS60. NGC ID# 222J, PCGS# 1093

**1806 Large 6, Stems Half Cent, C-4
MS62 Red and Brown, Popular Grade**

- 4931** 1806 Large 6, Stems MS62 Red and Brown PCGS. C-4, B-4, R.1. Manley Die State 1.0 with clear repunching on the stem of the oversized 6. This satiny half cent features blended brick-red and tan. The strike is good overall, with limited softness on the bust truncation and upper reverse. A couple of moderate marks are present above the hair ribbon and near the profile. Our EAC grade AU50. *Ex: Long Beach Signature (Heritage, 5/2008), lot 1759.*
From The Searight Collection. NGC ID# 222J, PCGS# 1100

- 4932** 1811 VF20 NGC. C-2, B-2, Low R.3. Manley Die State 3.0. A dark brown representative of this scarce date. The surfaces are mildly granular and minimally abraded. The reverse die was slightly misaligned, since AMERICA is well struck while UNITED is faint. Our EAC grade F12. NGC ID# 222S, PCGS# 1135

**1828 Half Cent, MS63 Red
13 Stars, Cohen-3**

- 4933** 1828 13 Stars MS63 Red NGC. C-3, B-2, R.1. Manley Die State 4.0. This well struck and coruscating Select example is predominantly brick-red, though the left obverse has a few small to moderate gray spots, and a few traces of aqua debris are noted near the letters in STATES. Our EAC grade MS60. Census: 3 in 63 Red, 1 finer (8/13). NGC ID# 222V, PCGS# 1149

- 4934** 1829 MS64 Brown NGC. C-1, B-1, R.1. A lovely chocolate-brown example of this single variety issue with faint blue highlights on the devices. This piece has satin luster and excellent eye appeal. Our EAC grade AU55. Census: 28 in 64 Brown, 24 finer (8/13). NGC ID# 222X, PCGS# 1153

**1835 C-1, B-1 Half Cent
MS65 Red and Brown**

- 4935** 1835 MS65 Red and Brown PCGS. C-1, B-1, R.1. Prominent clash marks are visible in the usual locations at the face and chin, and inside the wreath. This Gem combines original orange mint color with sea-green and iridescent toning. Our EAC grade MS63. Population: 20 in 65 Red and Brown, 0 finer (8/13).
From The Searight Collection. NGC ID# 2233, PCGS# 1169

- 4936** 1850 MS64 Brown PCGS. C-1, B-1, R.2. Olive-brown and faded mint red are intermingled on both sides of this Choice Mint State half cent, 1849, 1850, and 1857 are the scarce dates among the business strike Braided Hair half cents. Our EAC grade MS60. Population: 25 in 64 Brown, 1 finer (8/13). NGC ID# 26YV, PCGS# 1221

- 4937** 1853 MS65 Brown PCGS. CAC. C-1, B-1, R.1. Golden-brown overall with aqua undertones and ample mint red in protected regions of the reverse. A crisply struck Gem that boasts booming luster, smooth fields, and only minor contact on Liberty's jaw and neck. Our EAC grade MS60. NGC ID# 26YX, PCGS# 1227

- 4938** 1854 MS64 Red and Brown PCGS. C-1, B-1, R.1. Orange-gold and steel-gray alternate across lustrous surfaces. Attentively struck with pleasing eye appeal and few marks. Our EAC grade MS63. *Ex: Dallas Signature (Heritage, 11/2007), lot 40, which realized \$977.50.*
From The Searight Collection. NGC ID# 26YY, PCGS# 1231

PROOF BRAIDED HAIR HALF CENT

**1852 B-2 Half Cent, PR62 Brown
First Restrike**

- 4939** 1852 First Restrike, Small Berries PR62 Brown NGC. B-2, R.4. The normally seen variety of 1852 half cents, with intermingled olive-brown, steel, and iridescent patina. The strike is sharp as expected, and the fields are fully mirrored with shallow depth. Microscopic spots are evident on both sides. In a prior generation holder. Our EAC grade PR60. NGC ID# 26ZT, PCGS# 1317

BOOK

- 4940** Extensively Signed Hardbound Volume of *The Robinson S. Brown, Jr. Collection of Large Cents*, Superior Galleries, 1986, slipcase but no dust-jacket. Phillip Clover's personal copy is much-inscribed with many desirable autographs related to large cent collecting. Frontpaper well-wishes are from **Larry Goldberg**, **Robinson S. Brown**, **Mark Goldberg**, **Ted Naftzger**, **Denis Loring**, **John R. Grellman**, **John D. Wright**, **Del Bland**, **Walter Breen**, and **Jack Collins**. **Ira Goldberg** adds well-wishes on the title page. The Acknowledgements page has further signatures from Brown, Bland, Breen, Naftzger, Grellman, Wright, **P. Scott Rubin** (on an affixed slip; an accompanying one-page handwritten letter noting the slip as an enclosure is included), Loring, and an unidentified signatory.

LARGE CENTS

1793 S-3, B-4 Chain Cent, Good Details Fully Outlined Devices and Date

- 4941** 1793 Chain AMERICA — Rim Damage, Scratches — NGC Details. Good. S-3, B-4, R.3. The head and chain are both outlined and the date is complete on this well-worn cent. Both sides of this dark brown example show minor scratches and myriad rim bruises and scrapes. Our EAC grade AG3. NGC ID# 223F, PCGS# 1341

- 4942** 1793 Wreath Cent, Vine and Bars — Corrosion — NGC Details. Fine. S-8, B-13, R.3. A dark lavender-brown representative of this desired first-year cent type. The surfaces are porous but the legends are fully readable aside from the date, which is indistinct except for the 3. Our EAC grade Good 4. NGC ID# 223H, PCGS# 1347

1793 S-11c, B-16c Wreath Cent, VF Details Lettered Edge

- 4943** 1793 Wreath Cent, Lettered Edge — Environmental Damage — NGC Details. VF. S-11c, B-16c, Low R.3. Three edge types are known for the S-11 large cents, and S-11c, with a lettered edge having a single leaf, is the most often seen subvariety. Both sides show minor corrosion and faint scratches on the olive-brown and mahogany surfaces. Our EAC grade VG8.
From The Joan Carroll Collection.

1794 S-19b, B-3b Cent, VF Details Head of 1793, Edge of 1794

- 4944** 1794 Head of 1793 — Environmental Damage — PCGS Genuine. VF Details. S-19b, B-3b, R.4. The Edge of 1794 has an upturned leaf after the word DOLLAR. This dark olive-brown and steel example displays moderate obverse porosity and lighter reverse porosity. Still a pleasing piece despite the surface roughness. Our EAC grade VG10. NGC ID# 223N, PCGS# 1362

1794 Cent, Choice VF S-22, Head of 1794

- 4945** 1794 Head of 1794 VF35 PCGS. S-22, B-6, R.1. A golden-brown and sea-green representative with generally smooth surfaces, though we note marks on the obverse border at 4 and 5 o'clock, and one small spot is on Liberty's neck. The "Mounds" variety, this coin has a faint OF due to die buckling. Housed in an old green label holder. Our EAC Grade VF20.
From The Joan Carroll Collection. NGC ID# 223P, PCGS# 901374

1794 S-43, B-32 Cent, AU Details Early Die State

- 4946** 1794 Head of 1794 — Environmental Damage — NGC Details. AU. S-43, B-32, R.2. Breen Die State II, an early die state for this variety, with slight cracks through 17 and through the U in UNITED. This sharply detailed piece has dark steel surfaces with evenly distributed granularity on each side. Our EAC grade VF30.
From The Joan Carroll Collection.

- 4947 1795 Plain Edge VF25 PCGS. S-76b, B-4b, R.1.** The familiar Sheldon marriage with ONE CENT placed inordinately high inside the wreath. Toned medium to deep mahogany-brown with a hint of gray verdigris. A few faded thin marks are noted beneath LIBERTY and the cap. A pinscratch passes through CENT. Certified in a green label holder. Our EAC grade F12. NGC ID# 223T, PCGS# 1380

**1795 S-78, B-8 Cent, VF30
Plain Edge**

- 4948 1795 Plain Edge VF30 NGC. S-78, B-8, R.1.** Minor clash marks are visible at the upper right reverse on this mahogany-brown cent. Both sides have myriad marks that remain from the planchet, along with scattered post-minting marks that are consistent with the grade. Our EAC grade VF20. NGC ID# 223T, PCGS# 1380

- 4949 1795 Plain Edge — Environmental Damage — PCGS Genuine. XF Details. S-76b, B-4b, R.1.** ONE CENT is entered high within the wreath. This unabraded Liberty Cap type coin has consistent dusky mahogany-brown toning. The surfaces are attractive despite uniform light granularity. Our EAC grade VF20. NGC ID# 223T, PCGS# 1380

- 4950 1796 Draped Bust, Reverse of 1794 Fine 12 NGC. S-102, B-26, R.4.** Breen Die State II with a crack across the upper obverse extending to the right border on this late die state example. Pleasing surfaces exhibit dark brown fields that frame the lighter brown devices. Our EAC grade VG10.
From The Joan Carroll Collection. NGC ID# 223W, PCGS# 1404

- 4951 1797 Reverse of 1796, Plain Edge — Environmental Damage — PCGS Genuine. VF Details. S-120a, B-2a, R.3.** PCGS calls this piece "Reverse of 1795," an equivalent to "Reverse of 1796." The Plain Edge version is slightly scarcer than the Gripped Edge variant from the same dies. This moderately worn example has extensive light corrosion from environmental damage across steel-brown surfaces. This piece has the sharpness of XF40. Our EAC grade Fine 12. NGC ID# 223Z, PCGS# 1419

- 4952 1797 Reverse of 1797, Stems Fine 15 ANACS. S-138, B-20, R.1.** A deep brown cent with gunmetal-blue undertones. A few scattered minor marks are of little account. Die sinking near S OF causes weakness on those letters, but the remainder of the design is evenly defined. Our EAC grade VG10.
From The Joan Carroll Collection. NGC ID# 2242, PCGS# 1422

- 4953 1797 Reverse of 1797, Stems — Environmental Damage — PCGS Genuine. XF Details. S-137, B-8, R.2.** Breen Die State III, with a faint bulge at ICA and a crack from the rim to the right ribbon. This olive-brown cent has sharp details with slight surface roughness and minor reverse rim nicks. The strike is imperfectly centered. Our EAC grade VF20. NGC ID# 2242, PCGS# 1422

- 4954 1797 Reverse of 1797, Stems — Environmental Damage — PCGS Genuine. XF Details. S-138, B-20, R.1.** This dark gunmetal-gray cent provides a wealth of design detail. Marks are virtually absent but both sides are evenly granular. S-138 is plentiful in scudzy condition but sharp examples are elusive. Our EAC grade VF20. NGC ID# 2242, PCGS# 1422

- 4955 1798 Reverse of 1796 — Environmental Damage — PCGS Genuine. VF Details. S-178, B-26, High R.5.** S-178 is the sole die marriage that pairs a Second Hair Style obverse with the obsolete Reverse of 1796. Since S-178 is also rare, the variety merits a sizeable premium over the typical 1798 cent. A darkened and granular example with pleasing sharpness and no noticeable marks. Our EAC grade VG7.
From The Joan Carroll Collection. NGC ID# 2244, PCGS# 1428

- 4956 1798 Second Hair Style VF30 NGC. S-167, B-33, R.1.** Breen Die State VI with a rim break above the TE in UNITED in addition to several earlier cracks and breaks. The fields are mahogany-brown and the high points are medium brown. A well defined and moderately abraded example of the terminal die state. Our EAC grade VF20. NGC ID# 2244, PCGS# 1434

1799 S-189 Cent, VG Details

- 4957 1799 — Environmental Damage — NGC Details. VG. S-189, B-3, R.2.** The die lump below the E in ONE is large and helps attribute this key date large cent. All legends are fully evident beneath a loupe, though STATES is faint, and the bottom of the date merges with the rim. The surfaces show occasional granularity but are burnished and moderately blurry. Our EAC grade Good 5.

**1801 S-219, B-11 Cent, XF Details
Three Errors Reverse**

- 4958 1801 3 Errors — Improperly Cleaned — NGC Details. XF. S-219, B-11, R.2.** Die State V with two arcing die cracks at the lower left reverse. This is the famous Three Errors Reverse, a spectacular and popular blundered die variety. Overly glossy as a result of light cleaning, this piece has pleasing surfaces with olive and magenta toning. Microscopic scratches are evident, especially on the obverse. Our EAC grade VF20. NGC ID# 224C, PCGS# 1461

- 4959 1801 1/000 Fine 15 PCGS. CAC. S-223, B-17, R.1.** Breen Die State III with a rim break on RT of LIBERTY. Light olive surfaces are smooth and relatively problem-free. Our EAC grade VG8. NGC ID# 224D, PCGS# 1464

**1803 S-249, B-7 Cent, XF45
Corrected Fraction**

4960 1803 100/000 XF45 PCGS. S-249, B-7, R.2. This is the only 1803 variety with the Corrected Fraction reverse, and it is listed separately in the *Guide Book*. Olive and steel-brown surfaces show considerable orange color on the reverse, indicative of retoning. Scattered handling marks are noted on both sides. Our EAC grade VF25. NGC ID# 224G, PCGS# 911501

4961 1805 VF35 PCGS. S-267, B-1, R.1. Mahogany-brown surfaces exhibit a few splashes of dark steel toning on each side of this pleasing cent. Myriad handling marks are consistent with the grade. Our EAC grade VF20. NGC ID# 224K, PCGS# 1510

4962 1805 — Corroded — ANACS. AU Details, Net XF40. S-267, B-1, R.1. Toned golden-brown and gunmetal-gray with bold definition and no detrimental marks. Granular near STATES, but the eye appeal is nonetheless attractive. Clashed near the profile, as usually seen. Our EAC grade VF20. NGC ID# 224K, PCGS# 1510

**1805 S-267, B-1 Cent, AU53
Intermediate Die State**

4963 1805 AU53 PCGS Secure. S-267, B-1, R.1. Breen Die State III with faded clash marks and a faint crack through the tops of AME. This pleasing cent features a blend of olive-brown, steel, and tan with trivial surface marks and faint scratches that prevent a higher grade. Our EAC grade XF40. NGC ID# 224K, PCGS# 1510

**1810/09 S-281, B-1 Cent, XF40
Naked Eye Overdate**

4964 1810/09 XF40 PCGS. CAC. S-281, B-1, R.1. The popular 1810/09 overdate variety with the overdate features clearly visible to the naked eye. This nicely detailed example combines tan, olive-brown, and chestnut toning on pleasing surfaces that show only trivial circulation marks. Our EAC grade VF30. NGC ID# 224T, PCGS# 1552

4965 1811 VF30 NGC. S-287, B-1, R.2. The lengthy die line from star 5 makes attribution an easy task. A midgrade medium-brown cent with pleasing surfaces despite wispy marks near star 10 and a hair-thin diagonal line on the cheek. Our EAC grade VF20. From *The Joan Carroll Collection*. NGC ID# 224U, PCGS# 1555

**1812 S-288, B-3 Cent, AU58
Late Die State**

4966 1812 Small Date AU58 PCGS. S-288, B-3, R.2. Breen Die State II, or later, with flowlines over ES OF A. This splendid olive-brown cent retains traces of frosty luster in the protected areas with excellent surfaces showing only slight roughness in the right obverse field. Our EAC grade XF45. NGC ID# 224W, PCGS# 1561

4967 1812 Large Date VF30 PCGS. S-288, B-3, R.2. An unmarked and attractively defined example of this collectible but conditionally scarce Sheldon variety. The ebony-brown color and minor, even surface granularity are usual for the Classic series. Our EAC grade VF20.

Ex: *Glenwood Collection (Heritage, 6/2008)*, lot 59, which realized \$747.50.

From *The Searight Collection*. NGC ID# 224W, PCGS# 1564

**1812 S-289, B-4 Cent, AU50
Late Die State**

4968 1812 Large Date AU50 PCGS. S-289, B-4, R.1. This late die state example has heavy flowlines that extend the stars to the edge on the obverse, and merge the tops of the legend letters with the rim on the reverse. Both sides have medium to dark olive-brown patina with a few minor handling marks. Our EAC grade VF35. NGC ID# 224W, PCGS# 1564

4969 1813 VF25 PCGS. CAC. BB-293, B-1, R.2. Faint clash marks are visible through TED ST on this late die state example. Both sides have dark olive and steel patina with lighter brown devices. Microscopic roughness is evident at the peripheries. Our EAC grade Fine 15. NGC ID# 224X, PCGS# 1570

4970 1814 Plain 4 XF45 NGC. S-295, B-2, R.1. A "Mumps" example with die lumps above the chin and beneath the jaw. This medium brown final-year Classic Head cent has a smooth reverse while the obverse displays a few inconspicuous marks and spots. Our EAC grade VF35. NGC ID# 224Y, PCGS# 1576

1814 S-295 Cent, AU50
Plain 4

- 4971 1814 Plain 4 AU50 PCGS. S-295, B-2, R.1.** This splendid cent has deep green and brown patina with lighter tan splashes and traces of cartwheel luster. It is an early die state with a light crack behind the lower curls. The Plain 4 variety is the most plentiful of the Classic Head type, an ideal coin for a type collector. Our EAC grade XF40. NGC ID# 224Y, PCGS# 1576
- 4972 1820 Large Date MS64 Brown PCGS. N-13, R.1.** Mostly medium brown though faded red is also present. A lustrous Randall Hoard cent. The obverse has minimal contact, though the reverse is abraded near the denomination, the D in UNITED, and the rim at 6:30. Our EAC grade AU55. NGC ID# 2256, PCGS# 1615
- 4973 1820 Large Date MS64 Brown PCGS. CAC. N-13, R.1.** Grellman Die State b, as usually seen with cracks through date and all stars. Better-defined at centers than margins with considerable faded orange inside the wreath. Our EAC grade MS62. NGC ID# 2256, PCGS# 1615
- 4974 1820 Large Date MS65 Brown NGC. N-13, R.1.** A triple-punched L in LIBERTY, along with bold obverse peripheral cracks and a recut N in CENT, confirm the popular Randall Hoard variety. A highly lustrous and beautifully preserved Gem. The obverse is sea-green and fire-red while the reverse displays rich olive-gold and rose toning. Our EAC grade MS62. NGC ID# 2256, PCGS# 1615
- 4975 1820 Large Date MS65 Red and Brown PCGS. N-13, R.1.** The most familiar 1820 variety in high grades due to its extent within the Randall Hoard. The present nicely struck Gem displays considerable orange-red color though the portrait is brown. Spots and marks are essentially absent. Our EAC grade MS63. *From The Searight Collection.* NGC ID# 2256, PCGS# 1616
- 4976 1820 Small Date MS61 Brown PCGS. N-15, R.1.** The large T in LIBERTY nearly touches the coronet line. N-15 is plentiful in circulated grades but far rarer in Mint State than the 1820 N-13. Struck from rusted dies, this satiny dark brown cent is uncommonly free from marks. Our EAC grade AU50. *Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3039.* NGC ID# 2256, PCGS# 91615
- 4977 1821 XF40 PCGS. N-1, High R.1.** The conditionally scarcer of the two Newcomb marriages for this low mintage date. Absent from the Randall Hoard, and a key to the Matron Head series. This medium brown example has a few thin marks, most noticeable near the wreath stem and the T in CENT. Our EAC grade VF25. NGC ID# 2258, PCGS# 1621
- 4978 1824 AU58 PCGS. N-4, R.2.** This lovely near-Mint cent has attractive tan surfaces with splashes of medium and dark brown. Myriad microscopic ticks are evident on both sides. Our EAC grade VF35. NGC ID# 225D, PCGS# 1636
- 4979 1837 Head of 1838 MS65 Brown NGC. N-13, High R.2.** A repunched N in UNITED and a die scratch near the Y in LIBERTY combine to confirm the Newcomb marriage. A coruscating and unabraded Gem with lilac-red and sea-green toning. Our EAC grade MS60. *From The Owen Collection, Part II.* NGC ID# 225U, PCGS# 1729
- 4980 1838 MS65 Brown PCGS. CAC. N-7, R.1.** A die scratch from the leaf tip to the F in OF identifies the Newcomb marriage. This unabraded and coruscating Gem is richly toned golden-brown and steel-gray. The strike is crisp at the centers though the dentils and stars show occasional softness. Our EAC grade MS62. NGC ID# 225V, PCGS# 1741
- 4981 1838 MS66 Brown NGC. N-10, High R.2.** The late state with the field sinking above the crack through the M in AMERICA. A highly lustrous and exceptionally preserved example. Both sides are mahogany-brown and olive-green, but the former dominates the obverse while the latter fills the central reverse. Housed in a prior generation holder. Our EAC grade MS62. NGC ID# 225V, PCGS# 1741
- 4982 1839 Head of 1838 MS64 Brown NGC. CAC. N-2, R.2.** An early state struck from crisp, well-detailed coinage dies, this piece has wonderful surfaces with satin luster and traces of mint red around the reverse devices. The obverse is golden-brown and the reverse is sea-green. Our EAC grade MS60. NGC ID# 225X, PCGS# 1744
- 4983 1839 Silly Head MS62 Brown PCGS. N-9, R.2.** A thin diagonal die crack bisects the obverse from 11 o'clock down to 5 o'clock. Both sides of this example have blue-green and golden-brown toning with traces of faded mint red. Our EAC grade MS60. NGC ID# 225Y, PCGS# 1748
- 4984 1839 Silly Head MS62 Brown NGC. CAC. N-9, R.2.** An early die state with a diagonal obverse crack that does not reach the border at 5 o'clock. Lovely light olive surfaces with small splashes of deep steel-brown on the reverse. Our EAC grade AU55. NGC ID# 225Y, PCGS# 1748
- 4985 1839 Silly Head MS64 Brown PCGS. N-9, R.2.** A late die state with four lengthy obverse rim breaks. A glossy deep brown near-Gem that has boldly struck devices and a few soft stars. Smooth save for one tiny spot at 6:30 on the reverse border. Certified in a green label holder. Our EAC grade MS60. NGC ID# 225Y, PCGS# 1748
- 4986 1842 Large Date MS64 Brown PCGS. CAC. N-7, High R.3.** This early die state example has a sharp line below the ME in AMERICA. Full cartwheel luster appears on both sides of this lovely olive-brown cent with traces of faded mint red on the obverse. Our EAC grade AU55. NGC ID# 2268, PCGS# 1835
- 4987 1842 Large Date MS65 Brown NGC. N-6, R.1.** Grellman Die State d. Golden-brown and powder-blue toning enriches this lustrous and blemish-free Gem. The centers are crisply impressed though the left-side stars show selected softness. Our EAC grade MS60. NGC ID# 2268, PCGS# 1835
- 4988 1848 MS65 Brown PCGS. N-28, R.1.** *Ex: Naftzger Collection.* Grellman Die State a with fine die lines from the O in ONE to the E in CENT. The smooth fields are reflective on this lovely cent, with light brown surfaces showing traces of original mint red. A trivial spot is visible above star 5 and a trace of wear appears on the high points. Grellman calls this piece AU58 and tied for 13th finest known. Our EAC grade AU55. *Ex: Davis Graves Sale (Stack's, 4/1954), lot 1760; Floyd T. Starr (Stack's, 6/1984), lot 566; R.E. Naftzger, Jr. (Goldberg Coins, 9/2009), lot 877.* NGC ID# 226E, PCGS# 1883
- 4989 1850 MS65 Red and Brown PCGS. CAC. N-7, R.2.** Grellman Die State b, the late state of this variety with flowlined fields. A large hoard of Mint State examples was dispersed many years ago. This gorgeous example has substantive original red mint luster with splashes of blue toning. Our EAC grade MS64. NGC ID# 226G, PCGS# 1890
- 4990 1853 MS66 Brown NGC. N-9, R.2.** Grellman Die State b. Repunching is visible inside the upper loop of the 5, and at the base of the 1. This lovely Premium Gem has olive-brown and pale blue patina with traces of original mint color. Our EAC grade MS62. NGC ID# 226K, PCGS# 1901

- 4991** 1853 MS64 Red PCGS. N-13, R.1. Grellman Die State b. A radiant orange near-Gem with vibrant luster and pleasing surfaces. The devices are sharply struck, though the peripheral stars, legends, and devices show intermittent minor softness of strike. Our EAC grade MS63.
 Ex: Long Beach Signature (Heritage, 9/2002), lot 5198, which realized \$948.75.
 From The Searight Collection. NGC ID# 226K, PCGS# 1903

PATTERNS

1854 Cent, PR64 Brown, Judd-160 Miniature Braided Hair Design

- 4992** 1854 One Cent, Judd-160, Pollock-187, R.4, PR64 Brown NGC. This familiar pattern is mid-sized between the large and small cent, an intermediate step in the transition toward the cent in the diameter as we know it today. Aside from the absence of stars, the types are retained from the Large cent, but are smaller in scale, especially the wreath. Struck in bronze with a plain edge. Well struck and glossy with medium brown toning and prominent clashmarks. PCGS# 11659

1858 Paquet Flying Eagle Cent, PR64 Judd-206, Eagle Eye Photo Seal

- 4993** 1858 Flying Eagle Cent, Judd-206, Pollock-242, Snow-PT16, R.5, PR64 PCGS. Eagle Eye Photo Seal, card included. Paquet's Small Eagle obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. A razor-sharp and unmarked Choice specimen with dusky peach-gold toning and pleasing field reflectivity. Population: 22 in 64, 3 finer (8/13). PCGS# 11877

1861 Longacre Copper Half Dollar Pattern Judd-280, PR63 Brown

- 4994** 1861 Half Dollar, Judd-280, Pollock-331, Low R.7, PR63 Brown NGC. Ex: Simpson. A regular dies obverse is paired with a reverse the same as the regular issue, except that the motto GOD OUR TRUST is set directly onto the upper field. Struck in copper with a reeded edge. The surfaces are deep brown over each side, but a faint trace of the original mint red can be seen. Both sides show light hairlining, but there are no obvious contact marks. PCGS# 12108

1861 GOD OUT TRUST Ten Dollar in Copper Judd-285, PR63 Brown

- 4995** 1861 Ten Dollar, Judd-285, Pollock-338, Low R.7, PR63 Brown PCGS. Similar in design to the issued Rounded Bun 1861 ten dollar piece, with the exception that a scroll is placed on the field above the eagle with the inscription GOD OUR TRUST. The usual high date Pollock variant. Struck in copper with a reeded edge. Toned chocolate-brown with hints of deeper toning on the left obverse. The strike is needle-sharp and there are no visible detractors. PCGS# 60431

1863 Judd-340 Half Dollar, PR63 Ultra Cameo Extraordinary Contrast

- 4996** 1863 Half Dollar, Judd-340, Pollock-412, Low R.6, PR63 Ultra Cameo NGC. Virtually identical to the adopted design with the motto GOD OUR TRUST included in the upper reverse field without a banner or scroll. Struck in silver with a reeded edge. Despite the lower numerical grade, this is an outstanding example With frosty and sharply detailed devices over deeply mirrored fields that exhibit wispy gold toning. PCGS# 60502

**1865 Silver Quarter, Judd-423, PR62
Elegant Paquet Reverse**

4997 1865 Quarter Dollar, Judd-423, Pollock-495, Low R.7, PR62 NGC. The obverse is the regular Liberty Seated design for 1865. The reverse features a perched eagle with wings spread widely, clutching arrows with extremely long shafts. The legend UNITED STATES OF AMERICA is above, with the denomination fully spelled out below. Anthony Paquet designed the reverse, using the tall, thin letters often associated with his work. Struck in silver with a reeded edge.

In addition to the present issue, the Paquet reverse was used on patterns dated 1858, 1859, and 1864. These pieces are believed to be restrikes, produced circa 1870, to satisfy demand from favored collectors. The first auction appearance of Judd-423 was in the famous Fewsmith Cabinet (Mason, 10/1870), lot 1325. The coin was purchased at that sale by Ebenezer Locke Mason, who had cataloged the coin himself. Mason paid \$6.37 for his prize.

The surfaces are suffused with beautiful russet toning, accented by violet highlights. The fields show scattered hairlines and contact marks, consistent with the grade. An attractive example of this famous pattern. Census: 1 in 62, 7 finer (8/13).

Ex: Auction '87 (Paramount, 7/1987), lot 331; Queller Family Collection, Part Two (Heritage, 1/2009), lot 1633. PCGS# 60607

**1866 Judd-473 Five Cents, PR65 Cameo
First Mint Depiction of Washington**

4998 1866 Five Cents, Judd-473, Pollock-564, Low R.6, PR65 Cameo PCGS. George Washington appeared on numerous privately minted Early American tokens, but did not appear on U.S. Mint coins prior to the 1866 five cent patterns. The obverse depicts a bust of Washington facing right and has the legend IN GOD WE TRUST. The obverse is muled with a regular issue Shield nickel rays reverse. Struck in nickel with a plain edge. This lovely example has light gray surfaces with fully mirrored field and lustrous design motifs beneath wispy gold toning. PCGS# 60669

**1868 Three Cent Nickel Pattern
Judd-615, PR66 Ultra Cameo**

4999 1868 Three Cent Nickel, Judd-615, Pollock-680, R.5, PR66 Ultra Cameo NGC. Similar in design to the contemporary three cent nickel, but the wreath on the reverse is that of the Flying Eagle cent and the Roman numeral lacks fluting on the columns. Struck in nickel with a plain edge. The obverse rim is unusually wide, while the reverse is narrower than normal. Tom DeLorey suggested that the obverse design is a regular 17.9-mm three cent obverse set in a one cent-size 19.1-mm die blank, leaving the wide borders, whereas the reverse is normal one cent-size. The fields show exceptionally deep reflectivity, especially for a nickel product, with sharply contrasting frosted devices. The mostly brilliant surfaces have a light overlay of straw-gold patina. There is a small patch of die rust, as made, between the chin and the T in UNITED. PCGS# 60827

**1869 Judd-722 Quarter, PR65
Standard Silver Design**

5000 1869 Standard Silver Quarter Dollar, Judd-722, Pollock-803, High R.6, PR65 PCGS. On the obverse a right-facing Liberty wears a Phrygian cap decorated with three stars at the front. A ribbon bearing the word LIBERTY flows from the base of the cap to Liberty's shoulder. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower periphery. Struck in silver with a plain edge. This Gem has lovely reddish-gold and sea-green toning with deeply mirrored fields and satin devices combining to display light contrast. PCGS# 60949

**1869 Standard Silver Quarter, Judd-733
Silver, Reeded Edge, Unc Details**

- 5001** 1869 Standard Silver Quarter Dollar, Judd-733, Pollock-814, R.5 — **Altered Surfaces** — PCGS Proof Genuine. Unc. Details. The bust of Liberty faces right, wearing a headband with LIBERTY on it. The peripheral legend is UNITED STATES OF AMERICA, with IN GOD WE TRUST on a scroll in exergue. On the reverse, an oak and laurel wreath surrounds 25 CENTS, and with STANDARD SILVER 1869 around the rim. Struck in silver with a reeded edge. A brilliant and fully struck specimen with moderate frost on the motifs. The obverse field near Liberty's chin may have been carefully smoothed.

**1869 Pattern Quarter, Judd-736, PR64 Brown
Standard Silver Series**

- 5002** 1869 Standard Silver Quarter Dollar, Judd-736, Pollock-817, Low R.7, PR64 Brown PCGS. This Standard Silver entry features a high relief portrait of Liberty with a large star above her forehead. Struck in copper with a plain edge. Chocolate-brown colored on the obverse with reverse surfaces that remain lighter in color. The surfaces are quite appealing for the grade with one curvy lintmark to the right of Liberty's neck being the most significant disturbance in the fields. PCGS# 60963

**1869 Standard Silver Half, PR61 Cameo
Judd-748, Reeded Edge**

- 5003** 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR61 Cameo NGC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. The untuned fields and frosty devices are framed by honey-gold peripheral patina. A spot above the R in SILVER is accompanied by a cluster of hair-thin marks. PCGS# 60977

**1869 Judd-754 Half Dollar, PR66
Standard Silver Design**

- 5004** 1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR66 PCGS. CAC. A bust of Liberty faces right and wears a headband inscribed LIBERTY. The headband is ornamented with a star. The legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse has 50 CENTS centered in a wreath of oak and laurel with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. This original Premium Gem has dusky gray toning with peripheral gold, violet, and blue. Light cameo contrast is evident on both sides although the toning prevents a Cameo designation.

From The Strawberry Fields Collection. PCGS# 60984

**1870 William Barber's Seated Liberty Dime
Judd-833, PR65+ Red
The Only Red Specimen**

- 5005** 1870 Ten Cents, Judd-833, Pollock-923, R.6-7, PR65+ Red NGC. CAC. On the obverse, a left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed LIBERTY flows across the shield and a Liberty cap and pole stand in the background. UNITED STATES/OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse is that of the regular dime issue for the year. Struck in copper with a reeded edge.

The Pollock reference itemizes five examples and lists seven additional appearances, while USPatterns.com suggests that 12 examples are known. There may actually be slightly more than a dozen survivors. NGC and PCGS have certified 22 pieces in all grades, and 21 of those are designated Brown or Red and Brown. Only the Newman example is designated Red.

This impressive Gem has brilliant orange mint color with a few trivial spots and slight mellowing of the mint color on the reverse. Boldly struck, as expected for this Gem proof.

Ex: Eric P. Newman Collection, Part One (Heritage, 4/2013), lot 3983. PCGS# 81077

**1870 Judd-846 Ten Cents, PR64 Red and Brown
Standard Silver Series**

- 5006** 1870 Standard Silver Ten Cents, Judd-846, Pollock-945, R.7, PR64 Red and Brown PCGS. The obverse features a head of Liberty with no stars on the tiara, UNITED STATES OF AMERICA above, and the motto on a scroll below. The reverse has the date and denomination encircled by an open agricultural wreath, with STANDARD above. Struck in copper, with a plain edge. Only about a half dozen examples of this variety are known. This example has mirrored fields with considerable deep orange mint color, along with golden-brown and dusky blue toning. A lovely near-Gem specimen. PCGS# 71090

**1870 Judd-862 Ten Cents, PR65
Standard Silver**

- 5007** 1870 Standard Silver Ten Cents, Judd-862, Pollock-950, High R.7, PR65 PCGS. CAC. A bust of Liberty faces right wearing a diadem, and her hair is tied in a bun. A scroll beneath her bears the inscription IN GOD WE TRUST, while UNITED STATES OF AMERICA fills the remainder of the periphery. The D in GOD is widely recut. The reverse has a wreath of corn and cotton, with STANDARD above, 1870 below, and 10/CENTS in the center. Struck in silver with a plain edge. Deeply toned in gunmetal-glue and magenta with underlying mirrored fields and lustrous, sharply detailed devices. PCGS# 61106

**1870 Standard Silver Quarter, PR63
Judd-889, Plain Edge, Silver**

- 5008** 1870 Standard Silver Quarter Dollar, Judd-889, Pollock-988, Low R.7, PR63 NGC. A bust of Liberty wearing a cap ornamented with three stars facing right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a plain edge. A well struck and flashy specimen with lovely caramel-gold, apple-green, and lilac toning. Certified in a prior generation holder. PCGS# 61133

**1870 Quarter Dollar, Judd-894, PR66 Cameo
From the Simpson Collection**

- 5009** 1870 Standard Silver Quarter Dollar, Judd-894, Pollock-1001, R.5, PR66 Cameo NGC. CAC. Ex: Simpson. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty wears a ribbon inscribed LIBERTY, the legend UNITED STATES OF AMERICA is at the periphery, the motto IN GOD WE TRUST is on a scroll below. The reverse depicts the denomination 25 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a reeded edge. This gorgeous example has delicate gold and pale blue toning around silver centers with deeply mirrored fields and frosty white devices. A lovely Premium Gem. PCGS# 61138

**1870 Standard Silver Quarter in Silver
Judd-912, PR66 Cameo**

- 5010** 1870 Standard Silver Quarter Dollar, Judd-912, Pollock-1008, High R.6, PR66 Cameo PCGS. CAC. Ex: Denali Collection. Standard Silver design with the head of Liberty wearing a diadem and a ribbon inscribed LIBERTY in raised letters. The reverse, leftover from 1869, reads STANDARD SILVER 1870 around the rim with 25 CENTS in the center of an oak and laurel wreath. Struck in silver with a reeded edge. About a dozen examples are believed known of this silver variant, known also in copper and aluminum, both reeded and plain edges. The fields are nicely mirrored, setting up a background of contrast against the frosted devices. Each side has golden-rose toning in varying degrees, mostly concentrated around the margins. PCGS# 61156

**1870 Judd-964 Half Dollar, PR62
Rare Standard Silver Issue**

- 5011** 1870 Standard Silver Half Dollar, Judd-964, Pollock-1060, Low R.7, PR62 PCGS. Liberty faces right on the obverse, wearing a cap with two stars, her hair adorned with a ribbon inscribed LIBERTY in raised letters. A ribbon below carries the motto IN GOD WE TRUST with the statutory legend around. The reverse has a wreath of olive and laurel that encloses the denomination, 50 CENTS, with STANDARD SILVER around and the date below. Struck in silver with a plain edge. Traces of peripheral gold toning appear on both sides of this otherwise brilliant silver pattern, with a hint of field-to-device contrast. Population: 2 in 62, 4 finer (8/13). PCGS# 61210

**1874 Judd-1368 Quarter Eagle, PR64 Cameo
Extremely Rare Aluminum Impression
Regular Dies**

- 5012** 1874 Quarter Eagle, Judd-1368, Pollock-1513, R.8, PR64 Cameo PCGS. CAC. An aluminum impression from the regular dies with a reeded edge, this example has exceptional eye appeal. Both sides have impressive contrast and fantastic eye appeal with brilliant surfaces. Deeply mirrored fields frame the sharply defined devices. This is an important pattern variety with only two or three examples known. We have been unable to find any offerings of this pattern variety since the late 1970s. PCGS# 61672

**1878 Judd-1554 Silver Dollar, PR63 Cameo
Charles Barber's Design**

- 5013** 1878 Dollar, Judd-1554, Pollock-1733, R.5, PR63 Cameo PCGS. Designed by Charles Barber, the head of Liberty is large and faces left with IN GOD WE TRUST at the top and the date below, similar to the pattern fifty dollar gold pieces from 1877. The reverse has a spread-winged eagle with E PLURIBUS UNUM in Gothic lettering above. UNITED STATES OF AMERICA is at the top and ONE DOLLAR on the bottom rim. The Pollock subvariety of Judd-1554 with star 13 close to the curl and the upright of the B in PLURIBUS beneath the right foot of the second T in STATES. Struck in silver with a reeded edge. This extraordinary example has deeply mirrored fields around the brilliant and lustrous white devices with a hint of faint champagne toning. Although relatively plentiful as patterns go, few others could match the aesthetic appeal of this Select Cameo proof. PCGS# 61915

**1896 Federal Shield Nickel, Judd-1770, PR64
Charles Barber Design**

- 5014** 1896 Five Cents, Judd-1770, Pollock-1987, Low R.6, PR64 PCGS. This Charles Barber design uses a Federal shield as its primary motif. Behind the shield are two crossed poles bearing a liberty cap and eagle. A scroll passing in front of the shield is inscribed LIBERTY. The denomination 5 CENTS is centered within a curved olive sprig on the reverse. Struck in a nickel alloy with a plain edge. This near-Gem exhibits deep champagne toning over lightly mirrored fields with delicate luster on the sharply defined devices. PCGS# 62224

GOLD DOLLARS

- 5015** 1849 No L MS63 NGC. A lovely, well struck Select example with nice eye appeal, due in part to pleasing luster and attractive yellow-gold color. NGC ID# 25B7, PCGS# 7501
- 5016** 1849 No L MS64 PCGS. Yellow-gold interiors with richer orange and peach elements prominent at the margins. A great first-year gold dollar example from a challenging design subtype. NGC ID# 25B7, PCGS# 7501
- 5017** 1849 Open Wreath MS63 PCGS. Breen-6004. Close stars, thin date numerals. A well struck lemon-gold Select example of this briefly coined design subtype. No marks are noticeable though a pair of minute grease specks are struck in near the lowest star and on Liberty's neck. Certified in a green label holder. NGC ID# 25B9, PCGS# 7502

5018 1849 Open Wreath MS63 PCGS. Breen-6011. Distant stars subtype. This first-year gold dollar is generally well-defined with delicate details visible on the hair below the coronet. Subtly frosted canary-gold luster is all-around pleasing. NGC ID# 25B9, PCGS# 7502

5019 1849 Open Wreath MS63 PCGS. Breen-6004. Close stars, thin date numerals. A striking canary-gold Select example with warm all-around luster. The obverse is clean, though the reverse has a long flaw to the right of the 1 in the denomination. NGC ID# 25B9, PCGS# 7502

1849-O Gold Dollar, Open Wreath, MS63 Popular First-Year O-Mint Coin

5020 1849-O Open Wreath MS63 PCGS. Variety 1. All known examples of the 1849-O gold dollar are of the Open Wreath type, not a great rarity but popular as a first-year mintmarked issue in the series that is still affordable. Great eye appeal flows from this Select example, showing excellent mint luster and pretty orange-gold color with no singular distractions. Population: 35 in 63, 29 finer (8/13). NGC ID# 25BE, PCGS# 7508

5021 1850 MS64 PCGS. Vibrant shades of yellow-gold appear on the obverse of this near-Gem example. Pleasing light gold color is present on the reverse and both sides reveal attractive luster. Minor surface marks are consistent with the assigned grade. Population: 34 in 64 (2 in 64+), 19 finer (8/13). NGC ID# 25BF, PCGS# 7509

5022 1851-C AU55 NGC. Variety 1. The usual die state with a crack connecting the tops of F and the first A, and the identifying feature for attribution in most die states. A small mark appears inside star 2 (at 8 o'clock) and faint hairlines are evident on both sides of this honey-gold example. NGC ID# 25BL, PCGS# 7514

5023 1851-D — Filed Rims — PCGS Genuine. XF Details. Variety 3-E. This peach-gold and powder-blue Dahlonega dollar is glossy from cleaning and the rims are filed throughout. Pinscratches are noted on the cheek, the 10 o'clock star, the TE in STATES, and the F in OF. Only 9,882 pieces were coined. NGC ID# 25BM, PCGS# 7515

5024 1851-D — Obverse Scratched — NGC Details. Unc. Variety 3-E. The rare late die state with heavy radial reverse die cracks at both 12 and 3 o'clock. Obverse rim die breaks are present at 10 and 12 o'clock. An original apricot-gold Dahlonega dollar with pleasing surfaces despite a short and strictly assessed obverse pinscratch at 5 o'clock. NGC ID# 25BM, PCGS# 7515

5025 1851-O MS62+ NGC. Variety 1. The diagnostic for this variety is a die crack through the 1 o'clock star. A lovely peach and khaki-gold example of this New Orleans type issue. Crisply struck and only lightly abraded. Gold dollars were coined in considerable quantity between 1851 and 1853 to replace Seated Silver hoarded from commerce. NGC ID# 25BN, PCGS# 7516

1852-O Gold Dollar, MS63 Conditionally Challenging

5026 1852-O MS63 NGC. Variety 1. Though Philadelphia struck more than two million 1852-O gold dollars, production of the denomination at New Orleans was limited to 140,000 pieces. The obverse high points and border of this Select example are sea-green, with the rest of coin displaying orange-gold. The date and forehead curls are soft though most of the design is well struck. The surfaces are almost entirely smooth, with an exception being a slender mark near star 10. Rare at the MS63 level, though AU and typical Mint State pieces are available. Census: 19 in 63, 12 finer (8/13). NGC ID# 25BT, PCGS# 7520

5027 1855 — Improperly Cleaned — NGC Details. Unc. A lustrous khaki-gold example of the briefly coined Type Two gold dollar. The portrait is intricately struck. Both sides display faint horizontal hairlines and the letter E is carefully pinscratched on the obverse exergue. NGC ID# 25C4, PCGS# 7532

5028 1855 MS61 NGC. As is often the case with 1855 gold dollars, clash marks are present on this piece, as seen on both sides. The coin displays nice luster and pleasing rich yellow-gold color that includes a few subtle hints of green. NGC ID# 25C4, PCGS# 7532

5029 1855 MS61 PCGS. A frosty Mint State example, this piece displays attractive medium yellow color and traces of pink toning hidden in the devices. This coin is quite attractive for the grade, with no distracting marks on either side. Portions of UNITED STATES OF AMERICA are weakly struck. Clash marks appear on the reverse. Ex: *Central States St. Louis (Heritage, 5/2007)*, lot 3258. NGC ID# 25C4, PCGS# 7532

1855 Gold Dollar, MS62 Lustrous and Nice for the Grade

5030 1855 MS62 NGC. Both sides of this piece reveal clash marks, with the marks more pronounced on the reverse, largely revealing an outline of the portrait. The coin displays attractive yellow-gold color with hints of orange and retains a pleasing degree of luster. A few scattered marks are present, but they are minor. NGC ID# 25C4, PCGS# 7532

5031 1855-O AU53 PCGS. Variety 2. A peach-gold example of the sole Type Two New Orleans issue. The mintage of 55,000 pieces makes the 1855-O much scarcer than its Philadelphia cousin. Visible marks are absent and luster glints from protected regions. From *The Searight Collection*. NGC ID# 25C7, PCGS# 7535

- 5032 1856-S Type Two AU53 NGC.** The Normal Mintmark variety, as represented by this piece, is slightly more plentiful than the Doubled Mintmark variety that is cataloged as FS-501. This AU example has light wear on its peach-gold surfaces with traces of luster remaining near the borders. A faint, wispy die crack appears in the left obverse field along with a lint mark. NGC ID# 25C8, PCGS# 7536

**1860-S Gold Dollar, MS61
Only 13,000 Pieces Struck**

- 5033 1860-S MS61 NGC.** The 1860-S gold dollar, coming from a mintage of 13,000 pieces quickly entered the channels of commerce, and has a low survival rate. The peach-gold surfaces of this MS61 specimen display wisps of tan, and the design elements are well defined, save for minor softness in Liberty's hair. Minute handling marks are scattered over each side. Census: 21 in 61, 17 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 3185. NGC ID# 25CT, PCGS# 7557

**1860-S Gold Dollar, MS62
Elusive California Issue**

- 5034 1860-S MS62 NGC.** This conditionally scarce S-mint is extremely well defined with a vibrant cartwheel glow in the fields and no major blemishes. The 1860-S is perhaps not quite as scarce in the absolute sense as its mintage of 13,000 pieces would suggest, but those surviving at the Uncirculated level are rarely offered. Census: 8 in 62, 9 finer (8/13). NGC ID# 25CT, PCGS# 7557

**1861 Gold Dollar, MS65
Rich Reddish-Gold Patina**

- 5035 1861 MS65 PCGS.** Pronounced reddish-orange patina covers each side of this original Gem. The surfaces are noticeably striated and the strike is bold and sharp. Despite a substantial mintage, the 1861 is actually much scarcer in Gem condition than many of its lower production counterparts. Population: 37 in 65, 10 finer (8/13).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 8052. NGC ID# 25CU, PCGS# 7558

- 5036 1864 MS62 PCGS.** Better-defined than often seen with the knot of the wreath particularly praiseworthy. Apricot-tinged yellow-gold fields have generally wispy faults that combine to account for the grade. Population: 10 in 62, 26 finer (8/13). NGC ID# 25CY, PCGS# 7563

- 5037 1866 MS63 NGC.** Attractive orange-gold color appears on this Select example, along with hints of green-gold and peach. The design elements exhibit a pleasing degree of detail. Minor clash marks are present on the obverse. Census: 8 in 63, 24 finer (8/13). NGC ID# 25D2, PCGS# 7565

**1867 Gold Dollar, MS63 Prooflike
Considerable Field-Motif Contrast**

- 5038 1867 MS63 Prooflike NGC.** The 1867 gold dollar, from a circulation-strike mintage of only 5,200 pieces, is rare in all grades. NGC has certified 51 examples in Mint State, only seven of which have been given the Prooflike designation. Considerable field-device contrast is apparent on both sides and the design elements are sharply struck. A few minute marks are consistent with the grade. Census: 1 in 63 Prooflike, 4 finer (8/13). PCGS# 77566

-
- 5039 1869 MS63 NGC.** Yellow-gold with an apricot overtone and semireflective fields. Great eye appeal for this lower-mintage issue despite wispy abrasions in the fields. NGC ID# 25D5, PCGS# 7568

- 5040 1880 MS65 PCGS. CAC.** Rich yellow-gold color and gleaming, lustrous surfaces provide this Gem with a strong degree of visual appeal. Very few marks are present and they are extremely tiny. As-made lint marks appear on the obverse to the left of the nose and at the second T in STATES. A lint mark is also present on the reverse near 11 o'clock. PCGS included a few threads within the encapsulation, as seen near 3 o'clock on the reverse. NGC ID# 25DJ, PCGS# 7581

**1881 Gold Dollar, MS66+
Sought-After Low-Mintage Date**

- 5041 1881 MS66+ PCGS. CAC.** Several attractive shades of gold color appear on both sides of this Premium Gem, providing a strong level of visual appeal as the plus designation indicates. Additionally, this gorgeous piece displays semiprooflike surfaces. The 88 in the date exhibits repunching. Faint die polish lines are present. NGC ID# 25DK, PCGS# 7582

**1881 Gold Dollar, MS67
Bright Luster, Subtle Patina**

- 5042 1881 MS67 NGC.** A flashy jewel with lovely honey and olive-gold hues. Fully struck and virtually devoid of contact. The 8s in the date show recutting (as made) inside the loops. Just 7,620 pieces were struck, although a few of these were undoubtedly set aside as souvenirs at the time of issue. Census: 64 in 67 (3 in 67+), 39 finer (8/13).
Ex: New York Signature (Heritage, 7/2004), lot 7989. NGC ID# 25DK, PCGS# 7582

**1883 Gold Dollar, Prooflike MS66
Sparkling, Mirrored Fields**

- 5043 1883 MS66 Prooflike NGC.** The 83 in the date is lightly repunched south. As is the case with all post-1874 gold dollar dates, the 1883 has a low mintage. Only 10,800 business strikes and 207 proofs were struck. Fortunately for collectors, a portion of the production was set aside, presumably by well-connected Philadelphia dealers. This flashy Premium Gem is intricately struck and nearly unabraded. The honey-gold surfaces exude eye appeal.
Ex: Central States Signature (Heritage, 4/2008), lot 3227. PCGS# 77584

**1884 Gold Dollar, MS66 Prooflike
Conditionally Rare in This Format**

- 5044 1884 MS66 Prooflike NGC.** Several hoards inflated the high-grade population of 1884 gold dollars, making it fairly available through Gem condition. Prooflike specimens are another story, and are scarce to rare. The fields of this conditionally rare MS66 Prooflike highlight the devices, all of which are sharply defined. Well-preserved surfaces add to the eye appeal. Census: 1 in 66 Prooflike, 4 finer (8/13). PCGS# 77585

- 5045 1885 MS66 PCGS.** Faint scratches appear at the lower obverse of this Premium Gem, with satiny, mirrored yellow-gold surfaces showing light cameo contrast. Population: 29 in 66, 14 finer (8/13). NGC ID# 25DP, PCGS# 7586

- 5046 1885 MS64 Prooflike NGC.** Few survivors from this issue have achieved the Prooflike designation. This near-Gem displays appreciable contrast between the devices and the fields. The coin exhibits a sharp strike, rich luster, and pleasing yellow-gold color. Census: 7 in 64 Prooflike, 7 finer (8/13). PCGS# 77586

- 5047 1886 MS64 Prooflike NGC.** A well struck near-Gem, this piece displays attractive yellow-gold color and pleasing luster. The reverse is rotated a few degrees counterclockwise. A small mark appears on the cheek. A mere 5,000 business strike 1886 gold dollars were struck. Census: 9 in 64 Prooflike, 15 finer (8/13).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 8070. PCGS# 77587

**1889 Gold Dollar, MS67
Final Year of Circulation Strikes**

- 5048 1889 MS67 NGC.** An impressive Superb Gem example with exceptional aesthetic appeal. This lovely dollar is fully struck and exhibits every individual detail to its fullest advantage, including light clash marks that are present on both sides. The surfaces are smooth and frosty, with only a single small abrasion of note, located above the digit 1 in the date. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, MS67
Last-Year Issue**

- 5049 1889 MS67 NGC. CAC.** Pleasing frosty luster and attractive straw-gold color provide this well struck Superb Gem representative with a bold level of visual appeal. Few examples have achieved higher numeric grades, with NGC and PCGS combined having only awarded higher grades to 16 examples (8/13). NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLAR

1887 Gold Dollar, PR62 Cameo Vivid Orange-Red Toning

- 5050 1887 PR62 Cameo PCGS.** In addition to the evident cameo contrast, vibrant orange-red hues provide this piece with a tremendous degree of visual appeal. The reverse also includes attractive shades of yellow-gold color. Aside from a small mark near the 1 on the reverse, there are no abrasions worthy of mention. Population: 3 in 62 Cameo, 27 finer (8/13).
From The Searight Collection. NGC ID# 25EX, PCGS# 87637

EARLY QUARTER EAGLE

1807 Quarter Eagle, VG Details BD-1, Only Dies

- 5051 1807 — Damage — PCGS Genuine. VG Details. BD-1, R.3.** The sole dies for this scarce date, the final year of the Robert Scot design. This wheat-gold representative is granular and the obverse exhibits myriad hair-thin marks. The left obverse field has a brief and slender vertical scratch. The reverse is minimally unabraded.

CLASSIC QUARTER EAGLES

- 5052 1834 AU53 NGC. Breen-6138, Variety 1, R.1.** An apricot-gold example of the Small Head subtype, found only on the present die pair. Subsequent Classic marriages feature a Large Head. The strike is typical and the sole noticeable imperfection is a recessed area between stars 6 and 7. NGC ID# 25FS, PCGS# 7692
- 5053 1834 AU55 NGC. Variety 1, R.1.** The obverse die is perfect with no clash marks, die cracks, or lapping. The reverse die has a short crack from the border to the tip of the right facing wing. Slight central weakness is typical of the variety, and of the design. This light yellow-gold example retains ample luster and pleasing surfaces with a few trivial handling marks.
Ex: Dallas Signature (Heritage, 12/2005), lot 8134, which realized \$1,265. NGC ID# 25FS, PCGS# 7692

1834 Classic Head Quarter Eagle, MS60 First-Year of Design

- 5054 1834 MS60 NGC. CAC. Variety 2, R.3.** All gold denominations saw a reduction in weight in 1834 to prevent large-scale hoarding and melting. This change was accompanied by a change in design to the new Classic Head motif, which circulated freely in the national economy. This well-detailed Mint State example shows pleasing yellow-gold surfaces with prooflike reflectivity in sheltered areas. NGC ID# 25FS, PCGS# 7692
- 5055 1836 Head of 1835, Script 8 AU53 PCGS. Variety 11, R.2.** An early die state with the bisecting obverse crack from the border at star 6 crossing the head to the hair curl above the ribbon, but disappearing in the right obverse field. The reverse die shows a single delicate crack. Weak at the centers as usual, this light yellow-gold example has a few splashes of coppery-orange toning with the usual trivial marks. NGC ID# 25FU, PCGS# 7694
- 5056 1836 Head of 1835, Script 8 AU53 ANACS. Variety 11, R.2.** The obverse has a bisecting crack from star 6 to the border between stars 12 and 13, and the reverse has delicate cracks. Central weakness is evident on this lustrous light yellow example, with traces of wear and insignificant marks. NGC ID# 25FU, PCGS# 7694
- 5057 1836 Block 8 AU53 NGC. Breen-6142, Variety 8, R.3.** A Large Head of 1834 variety, one of several minor subtypes in use during 1836. The present wheat-gold representative possesses ample flashes of luster and a minor hair-thin mark on the left obverse field. PCGS# 97694

LIBERTY QUARTER EAGLES

- 5058 1840-D — Removed from Jewelry — NGC Details. AU. Variety 1-A.** This rare date Dahlonega quarter eagle has a mintage of only 3,532 pieces. The present sun-gold representative has been polished and displays a few thin marks, most noticeably on the upper reverse field. NGC ID# 25GC, PCGS# 7719
- 5059 1842-C — Rim Damage — PCGS Genuine. AU Details. Variety 1.** This rare date Charlotte quarter eagle has luminous wheat-gold surfaces and is smooth except for a small dig on the obverse rim at 6:30. Actual wear is minimal though the strike is usual for the Southern branch facility. NGC ID# 25GH, PCGS# 7724
- 5060 1843 AU58 NGC.** Splashes of deep yellow-gold appear on the reverse of this lovely near-Mint example. Hints of green are also present. Portions of the high points of the devices reveal light wear. Census: 53 in 58, 21 finer (8/13). NGC ID# 25GL, PCGS# 7727

**1843-C Two and a Half
Uncirculated Sharpness**

5061 1843-C Large Date, Plain 4 — Cleaning — PCGS Genuine. Unc Details. Variety 1. The date and mintmark are lightly repunched, as often seen on high grade examples of this scarce Charlotte issue. The honey-gold surfaces are smooth aside from a thin mark above the upper arrowhead. Luster dominates the margins and motifs. Careful rotation reveals only minor hairlines. The strike is strong for the facility though the eagle's leg and LIBERTY show softness. NGC ID# 25GN, PCGS# 7728

5062 1843-C Small Date, Crosslet 4 — Graffiti — PCGS Genuine. VG Details. Variety 1. A pair of faint X marks on the lower left obverse quadrant hardly appear worthy of a "Graffiti" designation. A worn but unabraded example. The Small Date 1843-C is an important rarity, yet highly affordable in the present grade. PCGS# 7729

5063 1843-O Large Date, Plain 4 AU55 NGC. Variety 1. The mintmark is repunched, evident below the bottom curve. There are two die pairs of the 1843-O called Variety 1, one having a Small Date with a Crosslet 4, and the other offered here with a Large Date and a Plain 4. This Choice AU example has minor grade-consistent marks, with nearly full luster on the bright yellow surfaces. NGC ID# 25GS, PCGS# 7732

5064 1844 AU50 NGC. The 1844 quarter eagle had a meager mintage of 6,784 pieces, accounting for its rarity. This sun-gold example has a pleasing appearance for the grade. Only trivial abrasions are present. Census: 7 in 50, 32 finer (8/13). NGC ID# 25GT, PCGS# 7734

**1845-D Two and a Half
Uncirculated Details**

5065 1845-D — Cleaning — PCGS Genuine. Unc Details. Variety 6-J (formerly 6-I). A low mintage Dahlonega issue rarely seen with Uncirculated definition. The strike is surprisingly close to full, with only minimal merging on the curl above the ear and on the eagle's neck plumage. The butter-gold surfaces are nearly mark-free though subdued from cleanser exposure. NGC ID# 25GX, PCGS# 7738

**1846-D Quarter Eagle, AU53
Colorful and Lustrous**

5066 1846-D AU53 PCGS. Variety 7-L (formerly 7-K). The 1846-D Liberty quarter eagle claims a mintage of 19,303 pieces and probably no more than 300-350 examples survive in all grades today. This pleasing AU53 specimen displays just a touch of wear on the sharply impressed design elements and the lightly abraded fields show a mixture of vibrant mint luster and prooflike reflectivity. Population: 9 in 53, 44 finer (8/13). NGC ID# 25H3, PCGS# 7742

**1847-C Quarter Eagle, AU53
Purchased During the 1933 Gold Recall**

5067 1847-C AU53 PCGS. Variety 1. Traces of luster are visible in the recessed areas of this AU53 Charlotte issue, and yellow-gold patination exhibits hints of light green. The design elements are well defined, including virtual fullness in the star centrils. Some inoffensive circulation marks are noted over each side. Purchased in the 1930's at face value by Karl Stecher Sr. from coins turned in by the public as per President Roosevelt's March 9, 1933 directive. Ex: Stecher Collection (Heritage, 8/2007), lot 1703. NGC ID# 25H6, PCGS# 7745

5068 1847-O AU55 NGC. Variety 1. The base of the 1 is sharply doubled on this obverse that was used with three different reverse dies. This Choice AU example has rich orange toning over its light greenish-gold surfaces with considerable central weakness on both sides. NGC ID# 25H8, PCGS# 7747

5069 1848-C — Cleaning — PCGS Genuine. AU Details. Variety 1. Though mildly bright from a pass beneath a jeweler's cloth, this minimally circulated lemon-gold Charlotte example retains considerable eye appeal and will please many collectors. NGC ID# 25HB, PCGS# 7750

5070 1849 AU58 NGC. Green-gold surfaces and areas of remaining luster provide this near-Mint example with nice eye appeal. Other than a diagonal hair thin mark above Liberty's head, there are no marks worthy of mention. Census: 42 in 58, 20 finer (8/13). NGC ID# 25HD, PCGS# 7752

5071 1851-C — Improperly Cleaned — NGC Details. XF. Variety 1. A mildly cleaned canary-gold better date Charlotte quarter eagle. The strike is only average but no marks are obtrusive. A meager mintage of just 14,923 pieces. NGC ID# 25HM, PCGS# 7760

**1853 Quarter Eagle, MS65
Conditionally Scarce**

- 5072 1853 MS65 PCGS. CAC.** The 1853 quarter eagle had a relatively large mintage of almost 1.5 million pieces, but survivors are scarce at the higher grade levels. Gleaming luster and gorgeous light gold color provide this Gem with a tremendous degree of visual appeal. The second line in the second vertical stripe of the shield is virtually absent, as-struck due to polished dies. Numerous die polish lines are present on the reverse. A tiny area of darker color appears below the eagle's right wing. Population: 5 in 65 (1 in 65+), 1 finer (8/13). NGC ID# 25HV, PCGS# 7767

**1854-O Quarter Eagle, Choice AU
Partial Collar Error**

- 5073 1854-O — Broadstruck — AU55 NGC. Variety 7.** Struck with the collar die mostly obstructed, this wheat-gold New Orleans quarter eagle appears unabraded aside from dull marks on the lovelock. The strike is sharp except at the centers. Slightly uncentered, as the rim is narrow at 12 o'clock and wide at 6 o'clock. Edge reeding is partially present near the obverse between 3 and 8 o'clock, indicating the coin is in fact a partial collar mint error instead of a broadstrike.

- 5074 1857-O AU58 PCGS. Variety 1.** Only one die variety is known for the 1857-O quarter eagles. This near-Mint specimen has fully lustrous and satiny lemon-yellow surfaces with minimal marks and attractive pale orange toning splashes. An attractive example. Population: 29 in 58, 24 finer (8/13). NGC ID# 25JE, PCGS# 7784

- 5075 1857-O AU58 NGC. CAC. Variety 1.** The only dies identified for the 34,000 coin mintage of 1857-O quarter eagles. This piece has satiny yellow luster with sharp design motifs and minimal, scattered marks. NGC ID# 25JE, PCGS# 7784

- 5076 1857-S AU55 NGC.** Peach accents and hints of red provide this Choice AU example with an attractive appearance. This lightly circulated piece retains a pleasing level of design detail. NGC ID# 25JE, PCGS# 7785

**1860 Quarter Eagle, AU55
Old Reverse, Type One Hub**

- 5077 1860 Old Reverse, Type One AU55 NGC. CAC.** The years 1859 through 1861 saw a transition at the Philadelphia Mint as the reverse design of quarter eagles was reworked and a new hub created. The Old Reverse is more common for 1859, Slightly scarcer for 1860, and rarer still when dated 1861. This pleasing light yellow example has excellent design definition and considerable luster on each side with only a few minimal marks. PCGS# 97791

**1860-C Quarter Eagle, AU53
Low-Mintage Final Issue**

- 5078 1860-C AU53 PCGS. Variety 1.** The 1860-C is the final quarter eagle issue from the Charlotte Mint, with a small mintage of 7,469 pieces. No more than 155-205 examples survive today in all grades. This attractive AU53 specimen shows better detail on the obverse, like most examples seen, and the lustrous yellow-gold surfaces show only minor abrasions. Population: 12 in 53, 18 finer (8/13). NGC ID# 25JT, PCGS# 7792

- 5079 1861 Old Reverse, Type One AU58 NGC.** The upper two arrowheads touch, indicative of the very scarce Type One reverse. As a date, the 1861 is common, but the majority of examples are from Type Two dies. This is a generally lustrous apricot and sea-green Civil War quarter eagle exhibiting heavy clash marks. Ex: *Stamford Coinfest Signature* (Heritage, 10/2010), lot 4628. NGC ID# 25JW, PCGS# 97794

- 5080 1861 New Reverse, Type 2 MS62 NGC. CAC.** The 1861 Liberty quarter eagle with the New Reverse is a plentiful issue and a favorite choice of type collectors and Civil War aficionados. Several shades of color are present on this piece, among them yellow-gold, peach-gold, and green-gold. Clash marks appear on the reverse. Scattered marks are consistent with the grade. NGC ID# 25JX, PCGS# 7794

- 5081 1861 New Reverse, Type 2 MS63 PCGS.** Gleaming luster emanates from both sides of this attractive Select example. Vivid shades of orange and gold, particularly on the obverse, provide this piece with strong eye appeal. Both sides exhibit clash marks and a few small copper spots are present. NGC ID# 25JX, PCGS# 7794

- 5082 1861 New Reverse, Type 2 MS64 PCGS. CAC.** A lovely example of the variety with the small letters and arrowheads, this near-Gem displays rich gold color along with areas of peach and green-gold. The coin is well struck and exhibits only minor scattered abrasions, with none of them worthy of mention. NGC ID# 25JX, PCGS# 7794

**1861-S Quarter Eagle, AU53
Low Mintage Condition Rarity**

- 5083 1861-S AU53 NGC.** The low mintage of 24,000 coins only partially explains the rarity of this issue in higher grades as nearly every example entered circulation in California. This example has wisps of dark patina, especially on the reverse, with pleasing yellow surfaces and traces of luster. Census: 10 in 53, 39 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 25JY, PCGS# 7795

- 5084 1862 — Improperly Cleaned — NGC Details. AU.** Though the 1861 quarter eagle has a huge mintage, production of the 1862 was much smaller. The present briefly circulated apricot-gold example has a small smoothed area northeast of the eagle's head, and the moderately marked surfaces are mildly glossy. NGC ID# 25JZ, PCGS# 7796

**1862 Two and a Half, AU58
Struck from Bulged Dies**

- 5085 1862 AU58 PCGS.** Both dies are buckled, the obverse at the date and the reverse at TES. This greenish-gold near-Mint specimen has nearly full luster with only a trace of wear on the high points. An attractive example of a moderate mintage early Civil War issue. Population: 14 in 58, 25 finer (8/13). NGC ID# 25JZ, PCGS# 7796

- 5086 1868-S AU58 PCGS. CAC.** Pleasing butter-gold color provides this near-Mint representative with a lovely appearance. The well struck piece exhibits light wear on the high points, consistent with the grade. Other than a small mark above the eagle's beak, there are no marks worthy of mention. Population: 10 in 58, 16 finer (8/13). NGC ID# 25KC, PCGS# 7808

- 5087 1869-S AU55 NGC. CAC.** Uncommonly well-defined on the peripheral stars, though the inner devices have softer detail than the level of actual wear might imply. Orange overtones visit still-luminous yellow-gold surfaces. NGC ID# 25KE, PCGS# 7810

**1870 Quarter Eagle, MS61
Rare, Low-Mintage Date**

- 5088 1870 MS61 NGC.** The 1870 Liberty quarter eagle boasts a minuscule mintage of 4,555 pieces, making the date scarce-to-rare in all grades. This impressive MS61 specimen displays vivid greenish-gold surfaces that show highlights of rose and lilac and a few scattered contact marks on both sides. Vibrant mint luster mixes with prooflike reflectivity in sheltered areas. Census: 8 in 61, 2 finer (8/13). NGC ID# 25KF, PCGS# 7811

**1870-S Two and a Half, AU58
Only 16,000 Minted**

- 5089 1870-S AU58 PCGS. CAC.** A splendid near-Mint specimen, this 1870-S quarter eagle has a trace of wear on its brilliant light yellow surfaces with nearly full frosty luster. San Francisco quarter eagle mintages during much of the Reconstruction Era were quite low, such as the 16,000 minted there in 1870. Population: 14 in 58, 10 finer (8/13). NGC ID# 25KG, PCGS# 7812

- 5090 1872-S AU55 NGC.** The San Francisco Mint seldom struck quarter eagles in significant quantity, since bullion depositors preferred payment in double eagles. The 1872-S mintage consisted of 18,000 pieces, with few high grade examples surviving. Lovely chestnut-gold color is present on this Choice AU representative. Scattered marks appear, consistent with the grade, but there are none worthy of individual mention. Census: 29 in 55, 56 finer (8/13). NGC ID# 25KL, PCGS# 7816

**1873 Open 3 Quarter Eagle, MS65
Rich Satin Luster**

- 5091 1873 Open 3 MS65 NGC.** Satiny with rich orange-gold overall luster and delicate apricot-pink traces. The intricate details of stars, eagle, and portrait are brought up well. While the 1873 quarter eagle with Open 3 in date is available in lesser grades, as a Gem it is conditionally rare and commands respect. NGC ID# 25KN, PCGS# 7817

5092 1875-S AU58 NGC. Bright yellow-gold color provides this near-Mint example with an attractive appearance. The reverse includes shades of red and peach, further adding to the eye appeal. The design elements display a pleasing level of detail and mint luster remains. A few marks are present at the base of the neck. Census: 53 in 58, 28 finer (8/13). NGC ID# 25KT, PCGS# 7823

5093 1877-S MS62 NGC. A number of shades of orange, gold, and peach are present on both sides of this piece, along with a few hints of red. The coin is well struck. Although abrasions are present, few, if any, pose a distraction. Census: 58 in 62, 23 finer (8/13). NGC ID# 25KX, PCGS# 7827

5094 1877-S MS62 PCGS. Shimmering straw-gold surfaces provide this sharply struck piece with a pleasing degree of visual appeal. The fields are mildly prooflike. Scattered marks, including one on Liberty's nose, are consistent with the grade. Population: 33 in 62, 34 finer (8/13). NGC ID# 25KX, PCGS# 7827

1879 Quarter Eagle, MS65 Rare at Gem and Finer

5095 1879 MS65 PCGS. CAC. The quarter eagle was something of a neglected denomination by 1879. Its mintage fell into the high five figures, presaging a two-decade Philadelphia-only stretch in which no issue matched the year's output. This well-defined Gem has faint peach overtones across immensely lustrous sun-yellow surfaces. Population: 10 in 65, 6 finer (8/13). NGC ID# 25L2, PCGS# 7830

5096 1892 MS63 PCGS. Various hues appear on this Select piece, among them vibrant orange, peach, green-gold, and yellow-gold. The coin reveals attractive luster. The 1892 Liberty quarter eagle is a better date in the series, from a low mintage of 2,440 pieces. Population: 19 in 63, 30 finer (8/13). NGC ID# 25LG, PCGS# 7844

5097 1893 MS64 NGC. Golden-orange color and a bold level of design detail provide this near-Gem with exceptional eye appeal. Hints of olive-green are also present. A few scattered marks are present, but they are extremely minor. This is a wonderful representative. NGC ID# 25LH, PCGS# 7845

5098 1893 MS65 PCGS. CAC. Rich luster adds to the eye appeal of this well struck, near-Gem representative displaying lovely yellow-gold and orange-gold surfaces. Population: 44 in 65, 20 finer (8/13). NGC ID# 25LH, PCGS# 7845

5099 1894 MS62 Prooflike NGC. Intricately struck and blatantly mirrored with minor field hairlines and attractive eye appeal. A meager 4,000 pieces were struck. NGC has certified just eight examples as Prooflike in all grades. PCGS# 77846

1896 Quarter Eagle, MS66 Solidly Struck

5100 1896 MS66 PCGS. CAC. The 1896 quarter eagle comes from a sparse mintage of 19,070 circulation strikes and is scarce in all levels of preservation. Ebullient luster emanates from the satiny yellow-gold surfaces of this Premium Gem, and a solid strike delivers strong definition to the design elements. Both sides are well preserved. Population: 22 in 66 (1 in 66+), 3 finer (8/13). NGC ID# 25LL, PCGS# 7848

1897 Two and a Half, MS66 Rare in Higher Grades

5101 1897 MS66 PCGS. Between 1880 and 1899, only one quarter eagle issue, the 1893, reached 30,000 business strikes produced. The 1897, however, came close with an output of 29,768 pieces and is among the more viable pre-1900 two and a half dates in better-than-Gem grades. This MS66 coin has bold gold-orange luster and intricately detailed, minimally flawed devices. Population: 28 in 66, 10 finer (8/13). NGC ID# 25LM, PCGS# 7849

5102 1900 MS66 PCGS. Even a quick glance at this Premium Gem reveals shimmering luster and rich shades of gold and yellow color, providing it with strong eye appeal. Very few marks appear and they are minor, with a small tick on the obverse rim near 10 o'clock. A tiny alloy spot is present below star 8. Population: 66 in 66 (1 in 66+), 8 finer (8/13). NGC ID# 25LR, PCGS# 7852

5103 1902 MS66 PCGS. Rich canary-gold color and deep satin surfaces provide this Premium Gem with a tremendous level of eye appeal. The piece exhibits a bold strike and minimal abrasions. A truly lovely piece displaying cartwheel luster. NGC ID# 25LT, PCGS# 7854

5104 1902 MS66 PCGS. Vibrant mint luster provides this Premium Gem with strong visual appeal in addition to the pleasing array of colors. The surfaces reveal shades of orange, peach, green-gold, and bright frosty yellow. The coin exhibits a sharp strike. Tiny scattered alloy spots are present on the obverse. Only 38 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 25LT, PCGS# 7854

5105 1905 MS66 PCGS. Lustrous, gleaming surfaces provide this boldly struck Premium Gem representative with lovely eye appeal. The surfaces reveal a variety of shades of yellow and gold, with areas of green-gold also present. An orange-red alloy spot appears near 4 o'clock on the obverse. The cheek displays minor grazes. NGC ID# 25LW, PCGS# 7857

- 5106 1905 MS66+ PCGS.** Rich frosty luster and attractive hues, including yellow-gold, orange, and green-gold, provide this well struck Premium Gem example with a strong degree of eye appeal, as indicated by the Plus designation. The surfaces reveal a few hair thin marks on the obverse. Population: 5 in 66+, 55 finer (8/13). NGC ID# 25LW, PCGS# 7857

**1905 Quarter Eagle, MS67
Only Seven Certified Finer**

- 5107 1905 MS67 NGC. CAC.** This Superb Gem has frosty and highly lustrous butter-yellow surfaces with faint traces of powder-blue overtones on both sides. The strike is bold and the eye appeal is exceptional. A small splash of coppery-orange toning appears at TY of LIBERTY and another is noted at the final A in AMERICA. NGC has only certified six numerically finer examples (8/13). NGC ID# 25LW, PCGS# 7857

- 5108 1907 MS66+ NGC.** The 7 in the date displays repunching on this splendid Premium Gem example that earned the Plus designation due to the strong eye appeal this piece possesses. The coin exhibits lovely gold and green-gold surfaces and the design elements reveal a pleasing level of design detail. NGC ID# 25LY, PCGS# 7859

INDIAN QUARTER EAGLES

- 5109 1908 MS63 PCGS.** The surfaces reveal green-gold and orange-gold color on this lovely Select representative. This piece retains pleasing luster and the surfaces are largely free of abrasions. NGC ID# 288Y, PCGS# 7939
- 5110 1908 MS64 PCGS.** Striking sun-gold luster with occasional hints of orange. This well-defined first-year example has few marks of any significance. Eye appeal is strong.
From The Searight Collection. NGC ID# 288Y, PCGS# 7939
- 5111 1909 MS63 NGC.** From a mintage of 441,760 pieces, the 1909 Indian quarter eagle is the third-rarest date of the series in terms of total number of specimens known. Lovely light gold color and nice luster add to the appeal of this Select example. Tiny, light gray splashes of as-made struck-in grease appear near the Indian's eye. A trace of residue is present along portions of the profile outline. NGC ID# 288Z, PCGS# 7940
- 5112 1909 MS64 PCGS. CAC.** Rich peach-gold color makes this near-Gem a dusky delight. Satiny surfaces are generally well-preserved, though a luster break is noted behind the eagle's head. NGC ID# 288Z, PCGS# 7940
- 5113 1910 MS63 PCGS.** Rich pumpkin-gold color and pleasing luster provide this well struck example with lovely visual appeal. Few marks are present and they are minor. NGC ID# 2892, PCGS# 7941

**1910 Two and a Half, MS65
Honey-Gold Type Coin**

- 5114 1910 MS65 NGC.** The 1910 quarter eagle in Gem condition is far more elusive than the 1908 and somewhat more available than the 1909. This lovely Gem shows honey-gold color with smooth, flowing luster throughout both sides, virtually unmarked and oozing eye appeal. NGC has seen 14 numerically finer (8/13). NGC ID# 2892, PCGS# 7941

**1911-D Two and a Half, Unc Details
Remarkably Strong Strike Throughout**

- 5115 1911-D — Improperly Cleaned — NGC Details. Unc.** The surfaces are overbright from cleaning, but not offensively so. The diagnostic wire rim on the right side of the obverse is strong, and the mintmark is as pronounced as any we have ever seen on an '11-D. The mintmark sharpness is an indicator of overall strength of strike — we just do not see the normal softly struck areas. Each side shows finely textured granularity.

**1911-D Quarter Eagle
Uncirculated Details**

- 5116 1911-D — Improperly Cleaned — NGC Details. Unc.** The Denver mintmark is sharp on this key date two and a half. We note a number of pinpoint flecks, mostly relegated to the borders, but the coin is only mildly cleaned. The high points exhibit slight blending of detail. Luster glimmers from the motifs. NGC ID# 2894, PCGS# 7943

- 5117 1912 MS63 NGC.** Attractive yellow-gold color adds to the eye appeal of this Select example. Scattered marks appear on both sides, but there is none worthy of individual mention. NGC ID# 2896, PCGS# 7944
- 5118 1913 MS63 NGC.** Despite a series-high mintage of 722,000 pieces, the 1913 is less available in Mint State grades than the issues of the 1920s. This well-defined, subtly lustrous example displays lovely apricot-gold color. NGC ID# 2897, PCGS# 7945
- 5119 1914 MS62 PCGS.** Vivid orange-gold color, with the addition of sea-green on the reverse, provides this coin with a striking appearance. Scattered marks are consistent with the grade. NGC ID# 2898, PCGS# 7946
- 5120 1914-D MS63 NGC.** A pleasing level of design detail is present on this Select example. The coin displays rich gold color overall, with a few splashes of other hues also appearing. NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, Near-Gem Condition Rarity in Finer Grades

- 5121 1914-D MS64 NGC.** The 1914-D is second or third in conditional rarity behind the celebrated 1911-D and the 1914 issues within the Indian Head quarter eagles, and likely the most elusive overall in Gem grade. This orange-gold piece shows complete mint luster with a decent strike, only a couple of tiny marks away from a higher grade. NGC has seen 44 submissions finer (8/13). NGC ID# 2899, PCGS# 7947

1914-D Two and a Half, Sharply Struck MS64

- 5122 1914-D MS64 PCGS. CAC.** The 1914-D is among the rarest issues in the Indian quarter eagles beyond the MS64 grade level. PCGS have seen only about 80 Gem and finer coins. This near-Gem displays rose-gold color over satiny surfaces. Sharply struck, including the headdress feathers, eagle's shoulder, and the mintmark. A few minor reverse marks preclude Gem status, nevertheless the overall eye appeal is excellent. NGC ID# 2899, PCGS# 7947

1914-D Two and a Half, MS64 Above-Average Eye Appeal

- 5123 1914-D MS64 PCGS. CAC.** The 1914-D is considered by some numismatists to be the worst struck Indian Head quarter eagle; specifically in the center of the obverse, on the eagle's wing and legs, and the mintmark. The typical example also shows numerous surface marks and mint-made spots. This near-Gem is well-struck throughout and spot-free, and the few minute marks are within the parameters of the designated grade. Both sides display strong luster and coppery-gold color. The overall eye appeal is well above average, aptly recognized by CAC. PCGS has seen only 42 finer pieces. (8/13). NGC ID# 2899, PCGS# 7947

- 5124 1915 MS63 NGC.** A lovely apricot-gold representative, this Select example exhibits a nice level of detail. Scattered marks are present, as expected at this grade level, but none is worthy of mention. A pleasing representative for the grade. NGC ID# 289A, PCGS# 7948

1915 Quarter Eagle, MS65 Seldom Found Finer

- 5125 1915 MS65 NGC.** The crucial Indian chief's cheek and brow are totally free of marks on this Gem 1915 quarter eagle, one of the more available issues within the series in this grade (but scarcer than the 1908), although finer examples are seldom seen. Apricot-gold surfaces are exceedingly well-struck and offer blatant eye appeal. NGC has seen eight finer (8/13). NGC ID# 289A, PCGS# 7948

- 5126 1925-D MS64+ NGC.** A high-end near-Gem representative, this coin received the Plus designation for not only technical merit, but also because this piece possesses above-average eye appeal. This lovely representative displays frosty bright yellow surfaces and bold design elements. NGC ID# 289B, PCGS# 7949

- 5127 1928 MS65 NGC.** A coruscating peach-gold Gem of this collectible late Jazz Age date. A loupe reveals only faint field contact. The strike is bold except on the right end of the branch. NGC ID# 289E, PCGS# 7952

**1929 Quarter Eagle, MS65
Underrated Late-Series Issue**

- 5128 1929 MS65 PCGS.** Although perceptions may say otherwise, the reality is that the 1929 quarter eagle is rare and underrated in Gem condition. This piece is certified in a green-label holder and boasts all the virtues of that grade: flowing, complete luster over minimally marked antique-gold surfaces with glints of lemon-yellow in the recesses; a bold strike; and excellent eye appeal. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

- 5129 1854 AU55 NGC.** This first-year three dollar gold piece retains much of its sun-gold luster but shows clear light wear on Liberty's hair. Abrasions are few and eye appeal is high. NGC ID# 25M3, PCGS# 7969

**1854-O Three Dollar, XF45
Important O-Mint Type Coin**

- 5130 1854-O XF45 NGC. Variety 2.** The 1854-O is always in demand as the only three dollar gold piece from the New Orleans Mint. This attractive Choice XF example exhibits light wear on the well-detailed design elements and the pale yellow-gold surfaces show scattered minor contact marks on both sides, with a few traces of mint luster in sheltered areas. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, XF45
Only New Orleans Mint Three Dollar**

- 5131 1854-O XF45 NGC. CAC. Variety 2.** The 1854-O three dollar gold piece is the only issue of this odd denomination struck at the New Orleans Mint, with a nominal mintage of 24,000 pieces. This mellow orange-gold specimen is lightly abraded and retains most of its original design detail. A few hints of mint luster cling to the devices. NGC ID# 25M5, PCGS# 7971

- 5132 1855 AU53 PCGS.** The 1855 was one of only 10 three-dollar gold pieces that had mintages exceeding 10,000 coins, and in this instance the production was the third highest of the entire series at 50,555 examples. Light wear is largely confined to the high points of the design on this example, with the protected areas revealing frosty peach color. Splashes of vibrant yellow color appear on both sides. A few flecks of green are present in the dentils near 8 o'clock on the obverse. NGC ID# 25M6, PCGS# 7972

- 5133 1855 AU58 NGC.** Attractive luster emanates from both sides of this lovely near-Mint example. A hair-thin mark extends between the A and M of AMERICA. The 1855 issue was the second year of the denomination and the first year with large letters in DOLLARS. NGC ID# 25M6, PCGS# 7972

- 5134 1855-S — Improperly Cleaned — NGC Details. AU.** The first San Francisco issue and much scarcer than the 1856-S, as only 6,600 pieces were struck. A lightly circulated straw-gold example with hairlined but bagmark-free surfaces. A trace of PVC residue is noted near the first T in STATES.

**1856-S Three Dollar Gold, AU53
Favorite Mintmark Type Issue**

- 5135 1856-S AU53 PCGS.** Small S. The 1856-S claims a substantial mintage for a three dollar gold piece, at 34,500 pieces, and the issue is a favorite choice of mintmark type collectors. This lightly circulated example displays pleasing yellow-gold surfaces that show only minor abrasions and retain much of their original mint luster. Population: 30 in 53, 81 finer (8/13). NGC ID# 25M9, PCGS# 7975

**1856-S Three Dollar, AU55
Medium S Variant**

- 5136 1856-S AU55 NGC.** Medium S. The familiar San Francisco reverse die with a small break or "tail" beneath the second L in DOLLARS. The apricot-gold surfaces display ample luster within the legends and devices. Surprisingly unabraded aside from a couple of small marks on the right obverse field. NGC ID# 25M9, PCGS# 7975

1856-S Three Dollar, AU55
Popular Odd Denomination Type Coin

- 5137 1856-S AU55 NGC.** Medium S. The 1856-S three dollar gold piece is popular with type collectors and series specialists alike because of its availability in high grade. This attractive AU55 example offers lustrous orange and rose-gold surfaces with a moderate number of abrasions for the grade. Only a trace of wear shows on the well-detailed design elements. NGC ID# 25M9, PCGS# 7975

1856-S Three Dollar Gold, AU55
Colorful Lustrous Specimen

- 5138 1856-S AU55 PCGS.** Small S. Vivid orange-gold patina blankets the lightly abraded surfaces of this attractive Choice AU specimen, with a few highlights of green and lilac. Vibrant mint luster radiates from both sides and only a trace of wear shows on the high points of the design elements. Population: 40 in 55, 41 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 25M9, PCGS# 7975

- 5139 1860 AU55 NGC.** Ex: South Texas Collection. Pleasing canary gold color provides this piece from a low-mintage issue with a pleasing appearance. Small splashes of golden-orange appear in some of the protected areas. There are no abrasions worthy of mention. NGC ID# 25ME, PCGS# 7980

- 5140 1860 AU55 NGC.** With a mintage of only 7,036 coins, the 1860 three-dollar gold piece is a scarce issue. This lovely example displays pleasing light yellow surfaces with hints of peach and green. The luster is attractive and the wear is even. Although scattered marks are present, none are worthy of individual mention. NGC ID# 25ME, PCGS# 7980

- 5141 1860-S Fine 15 ANACS.** An attractive and important piece despite significant wear on the still-luminous yellow-to-orange surfaces. This survivor, which comes from a mintage of just 7,000 pieces, shows a small pinscratch to the right of the portrait. *Ex: Long Beach Signature (Heritage, 2/2008), lot 2422.* NGC ID# 25MF, PCGS# 7981

- 5142 1861 XF45 NGC.** This Civil War date issue had a low mintage of 5,959 pieces. This lightly worn XF specimen retains a pleasing appearance. Portions of the protected areas on the obverse reveal attractive orange color. NGC ID# 25MG, PCGS# 7982

- 5143 1861 — Cleaned — ANACS. AU58 Details.** A mildly bright lemon-gold representative. The forehead curls and eyebrow exhibit a hint of wear. A very scarce Civil War date with a mintage of just 5,959 pieces. *Ex: Orlando FUN Signature (Heritage, 1/2008), lot 3999.* NGC ID# 25MJ, PCGS# 7982

- 5144 1863 — Whizzed — ANACS. AU50 Details.** A challenging Civil War date with a meager mintage of 5,000 pieces. This yellow-gold representative has a tick on the cheek and is hairlined from brushing but will be acceptable to many collectors. Struck from clashed dies. *Ex: Orlando FUN Signature (Heritage, 1/2008), lot 10253.* NGC ID# 25MJ, PCGS# 7984

- 5145 1863 — Scratched, Improperly Cleaned — NCS. AU Details.** The Civil War 1863 has a mintage of just 5,000 pieces. Pronounced clash marks are visible on both sides of this butter-yellow specimen. Several shallow scratches are noted on the left obverse, but the reverse has only comparatively minor abrasions. *Ex: Long Beach Signature (Heritage, 9/2008), lot 3504.* NGC ID# 25MJ, PCGS# 7984

1867 Three Dollar, AU53
Mintage 2,600 Pieces

- 5146 1867 AU53 PCGS.** Unimpressive mintages are the norm rather than the exception for the three dollar gold series, and the 1867 at 2,600 business strikes fills the bill. This AU53 example, an unusual circulated post-Civil War three dollar coin, has semireflective orange-gold and violet luster remaining in the protected areas. Population: 9 in 53, 53 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 25MN, PCGS# 7988

- 5147 1868 AU53 NGC.** A mere 4,850 pieces were minted. Remarkably reflective fields complement the pleasing yellow-gold patina that endows the surfaces. Myriad abrasions define the grade, but the strike is bold. *Ex: Long Beach Signature (Heritage, 9/2008), lot 3515.* NGC ID# 25MP, PCGS# 7989

- 5148 1874 AU55 NGC.** Bright yellow-gold surfaces and pleasing luster provide this Choice AU representative with a lovely degree of visual appeal. The mark near Liberty's mouth is of mint origin. NGC ID# 25MX, PCGS# 7998

- 5149 1874 AU55 NGC.** A richly toned example, this piece displays a number of colors. The shades include orange, red, golden-brown, and plum. Many collectors will no doubt find this Choice AU example appealing. NGC ID# 25MX, PCGS# 7998

1874 Three Dollar, MS62
Great Type Example

- 5150 1874 MS62 NGC.** While it has only the fourth-highest mintage in the three dollar gold series, in high grades the 1874 is one of two go-to issues for type collectors, along with the 1878. This MS62 representative has grand swirling luster and predominantly yellow-gold surfaces with touches of rose at the bottom of the obverse. A touch of softness is noted on the wreath knot. NGC ID# 25MX, PCGS# 7998

5151 1878 AU53 PCGS. The 1878 three is well-known as the ideal type coin in the series, from a mintage of 82,304 coins, second-highest only to the 1854. Mottled colors, in shades that include vibrant yellow, yellow-green, and peach, provide this coin with an interesting appearance. Hints of red are also present. NGC ID# 25MZ, PCGS# 8000

5152 1878 MS62 NGC. Rich satin luster and attractive gold color along with splashes of orange and russet along portions of the wreath provide strong eye appeal for this lovely example. Minor incompleteness of strike is present, as is often seen. The coin is minimally abraded. NGC ID# 25MZ, PCGS# 8000

5153 1882 — Improperly Cleaned — NGC Details. Unc. A mintage of 1,500 pieces ensures the scarcity of the 1882, although Philadelphia dealers such as the Chapman brothers secured a number of mint examples. This sharply struck and unworn wheat-gold coin displays minor hairlines and has moderately prooflike surfaces. NGC ID# 25N5, PCGS# 8004

5154 1889 AU55 NGC. Subtle swirls of luster remain in honey-orange fields with hints of blue and violet. Though lightly rubbed with a few rim faults, the coin has solid eye appeal for the grade. One of just 2,300 business strikes for the final year of issue. NGC ID# 25NC, PCGS# 8011

EARLY HALF EAGLES

5155 1803/2 — Plugged — NGC Details. XF. BD-1, R.4. A plug is evident at 11 o'clock on the obverse and opposite at 6:30 on the reverse. A sun-gold example with bold borders and a soft strike on the shield and the upper half of the portrait. Both sides are glossy and a bit bright from cleaning. Marks are generally minor though we note a small obverse rim ding at 2:30. NGC ID# 25NY, PCGS# 8084

1805 BD-1 Half Eagle, AU Details

5156 1805 — Mount Removed, Improperly Cleaned — NCS. AU Details. BD-1, High R.3. Liberty's hair and shoulder has only a whisper of friction, but both sides are hairlined, and tooling near the LI in LIBERTY and opposite on the lower tail feathers suggest a repaired plug. The cheek has a pair of wispy marks. A bold example of this popular early gold type. NGC ID# 25P4, PCGS# 8088

1810 Half Eagle, AU Details BD-4, Large Date, Large 5

5157 1810 Large Date, Large 5 — Obverse Scratched — NGC Details. AU. BD-4, R.2. The portrait displays several thin parallel marks from a pressed-in edge such as a knife blade. The cheek also has a few minor adjustment marks, as made. The reverse has two parallel pinscratches beneath UNUM and a slight rim ding at 3:30. Olive-green luster fills protected areas while the open fields and high points are chestnut-gold. The strike is crisp aside from blending on the plumage near the left shield border. NGC ID# 25PG, PCGS# 8108

1811 Capped Bust Left Five, Good 6 Tall 5, BD-1 Variety

5158 1811 Tall 5 Good 6 PCGS. BD-1, High R.3. The 1811 Capped Bust Left half eagle claims a large mintage of 98,851 pieces, with just two die varieties known for the date. This well-worn example represents the BD-1 variety, with a surviving population of 175-250 examples in all grades. All lettering and the date remain legible, but the bust retains little interior detail, probably because of some heavy planchet adjustment marks that would have kept the design from striking up fully. PCGS# 8110

CLASSIC HALF EAGLES

5159 1834 Plain 4 XF45 NGC. Breen-6501, McCloskey 1-A, R.3. A scarcer First Head variety readily attributed by the high 3 in the date. A problem-free butter-gold representative of the Classic type. The curls display moderate wear but plumage definition is bold. NGC ID# 25RR, PCGS# 8171

5160 1834 Plain 4 AU55 NGC. McCloskey 2-B, R.3. The obverse has the upright of the 4 tripled at its upper right. This Choice AU Classic half eagle is a pleasing representative of the first year for the design after the weight of gold coins was reduced to promote circulation. Slight central weakness is evident with attractive light yellow surfaces showing slight reflectivity. NGC ID# 25RR, PCGS# 8171

5161 1834 Plain 4 AU58 NGC. Breen-6502, McCloskey 2-A, R.1. The obverse is perfect and the reverse has a short crack from the border to the right facing wing tip. Moderately abraded with considerable rubbing on the highpoints and a hint of remaining luster.
Ex: Long Beach Signature (Heritage, 2/2005), lot 7795. NGC ID# 25RR, PCGS# 8171

5162 1837 AU50 ANACS. Breen-6513, McCloskey 3-C, R.4. The Script 8 1837 variety, also known as the Close Date or Small Date. Significantly scarcer than McCloskey 2-B. The present piece has orange toning near the rims while the fields and motifs are honey-gold. Marks are scattered but individually minor. NGC ID# 25RZ, PCGS# 8175

5163 1838 AU53 NGC. Breen-6514, McCloskey 1-A, R.2. The Large Arrows, Small 5 die variety. This sun-gold representative is mildly glossy and free from any singularly noticeable marks. The strike is bold except on star 5, and luster illuminates all protected areas. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

5164 1840-D Tall D — Damaged — NGC Details. AU. Variety 3-B. A luminous straw-gold Dahlonge five with crisp design definition. A small dig is located between the first two stars, and a pair of dull marks is noted beneath the TA in STATES. NGC ID# 25SG, PCGS# 8198

5165 1841-D Small D — Cleaning — PCGS Genuine. XF Details. Variety 5-D. This peach-gold Dahlonge half eagle has pleasing sharpness but the surfaces are moderately bright and glossy from a wipe. Small abrasions are distributed but we note only a dull horizontal mark above Liberty's shoulder. NGC ID# 25SR, PCGS# 8204

1842-C Large Date Half Eagle, AU53 Underappreciated Issue

5166 1842-C Large Date AU53 PCGS. Variety 1. Both the Large Date and Small Date variants of the Charlotte half eagles of 1842 totaled an issue of 27,432 pieces, the Small Date being more elusive overall. As Doug Winter points out, this has the effect of making the Large Date underappreciated, especially in the higher grades. This golden-yellow AU53 example offers plenty of eye appeal via its bold strike and a scattering of small marks consistent with the grade. A shallow planchet lamination near star 1 on the obverse does little to dampen the appeal. Population: 8 in 53, 24 finer (8/13). NGC ID# 25SW, PCGS# 8209

5167 1842-D Small Date — Harshly Cleaned — NGC Details. AU. Variety 8-E. A butter-gold representative of the scarce Dahlonge Mint. The fields display subtle smoothing but the wings offer full definition and luster emerges from the motifs and legends. NGC ID# 25SX, PCGS# 8210

5168 1843-D Medium D VF35 PCGS. Variety 11-G (formerly 10-H). The Medium D has the mintmark centered over the space between the V and E in FIVE, while the Small D has the mintmark entirely over the V. There is one variety identified for each mintmark size. Considerable wear is present on this light yellow-gold example with wispy powder-blue overtones. NGC ID# 25T4, PCGS# 8215

5169 1844-O AU58 NGC. Variety 3. A late die state with a die crack past the U of UNITED to the wreath and the eagle's wing. This splendid near-Mint specimen has satiny yellow luster with trivial marks and hairlines. NGC ID# 25TA, PCGS# 8222

5170 1844-O — Saltwater Damage — PCGS Genuine. Unc. Variety 2. Likely recovered from a shipwreck, this honey-gold New Orleans five exhibits no indication of wear and is minimally abraded. The surfaces are lackluster and microgranular. NGC ID# 25TA, PCGS# 8222

5171 1845-D XF45 PCGS. Variety 14-H (formerly 12-I). The more plentiful of two die varieties, this example has brilliant light yellow surfaces with traces of luster in the protected areas. An attractive example despite the slightly deficient strike. NGC ID# 25TC, PCGS# 8224

5172 1845-O AU50 NGC. Variety 1. The only known dies. A pleasing New Orleans half eagle with satiny light yellow surfaces showing wispy greenish overtones. Scattered marks are only evident with a glass. NGC ID# 25TD, PCGS# 8225

5173 1846 Large Date MS61 NGC. Attractive luster remains on this piece displaying lovely yellow-gold color and exhibiting a pleasing strike. The marks are consistent with the grade level. Census: 21 in 61, 25 finer (8/13). NGC ID# 28BG, PCGS# 8226

5174 1848-C VF25 PCGS. Variety 1. The only known dies. Considerable wear and myriad surface marks are evident on both sides of this mid-grade Charlotte half eagle. Honey-gold surfaces show dark peripheral patina, especially on the reverse. NGC ID# 25TT, PCGS# 8237

5175 1852-D VF35 PCGS. Variety 33-V (formerly 28-U). Deep butter-gold toning embraces this Dahlonge gold type coin. Glimpses of dirt within the wings suggest originality, but thin back-and-forth marks are noted on the left obverse field and across the portrait beneath the ear. The field above the eagle also displays a few thin marks. Ex: *West Palm Beach Signature (Heritage, 6/2008)*, lot 2008, which realized \$1,840. NGC ID# 25UC, PCGS# 8252

5176 1853 XF40 PCGS. CAC. Luminous orange-gold, moreso on the reverse, with generous lilac and violet overtones. Decently detailed for the date with only a few digs scattered in the reverse fields. Housed in a green PCGS holder. NGC ID# 25UD, PCGS# 8253

1853-D Five Dollar, AU53 Vivid Color and Bright Mint Luster

5177 1853-D Large D AU53 PCGS. Variety 35-AA (formerly 29-U). The 1853-D Liberty half eagle claims a mintage of 89,678 pieces, making it one of the most available issues from the Dahlonge Mint. The vivid orange-gold surfaces of this lightly circulated example are brightly lustrous and show only minor grade-consistent abrasions. Population: 34 in 53, 81 finer (8/13). NGC ID# 25UE, PCGS# 8255

5178 1856-S XF45 NGC. CAC. Medium S. A well defined and lightly abraded apricot-gold example with glimpses of steel-gray near the rims. A relatively scarce issue, since San Francisco preferred to strike double eagles. NGC ID# 25UZ, PCGS# 8270

5179 1857-C — Damaged — NGC Details. AU. Variety 1. The eagle's head and neck are effaced by scratches, which are also present between star 2 and the forehead, and between the 85 in the date. The caramel-gold surfaces are well defined. NGC ID# 25V3, PCGS# 8272

5180 1860 AU50 ANACS. Ex: The John Stimson, Sr. Collection, Part Two. The brassy, khaki-tan surfaces reveal well struck design features, with just a trace of striking softness noted on the eagle's arrow fletchings. The letters "IBE" of LIBERTY are recut. A single moderate mark appears just above the eagle's head; the other marks on the piece are trivial. Ex: *The Frontenac Sale (Bowers and Merena, 11/91)*, lot 2364; *Long Beach Signature (Heritage, 2/2008)*, lot 2544. NGC ID# 25VF, PCGS# 8284

5181 1860-C Fine 15 PCGS. Variety 1. The only known dies. This is an affordable example of the 1860-C that falls near the low end of the PCGS population data. That service has graded two examples in Fine 12 and three in Fine 15. Despite the considerable wear on this straw-gold example, the surfaces are pleasing with trivial marks. NGC ID# 25VG, PCGS# 8285

5182 1860-D Medium D — Scratched — ANACS. XF40 Details. Variety 45-JJ (formerly 38-FF). Though more available than the 1861-D five, the 1860-D is nonetheless scarce, and has a mintage of just 14,635 pieces. This butter-gold example displays hairlines and a couple of closely spaced pinscratches on the cheek. NGC ID# 25VH, PCGS# 8286

5183 1860-D Medium D — Scratched — NCS. XF Details. Variety 45-JJ (formerly 38-FF). The reverse field is smoothed and pinscratched above the arrowheads and the eagle's neck. This butter-gold representative has a typical strike though the left (facing) wing is sharp and luster fills the legends. NGC ID# 25VH, PCGS# 8286

5184 1860-D Medium D — Scratches, Cleaned — NGC Details. AU. Variety 45-JJ (formerly 38-FF). This late date Dahlonega half eagle displays considerable luster, and soft definition on the curls and eagle's neck is principally due to the strike. The yellow-gold surfaces are hairlined and mildly bright. There are a few thin marks near the coronet tip and beneath the eagle's beak. NGC ID# 25VH, PCGS# 8286

5185 1860-S XF45 NGC. Ex: The John Stimson, Sr. Collection, Part Two. The 1860-S is even rarer than implied by its mintage of 21,200 pieces, since no one collected such pieces on the West Coast until the 1890s. This is an original apricot-gold half eagle with pleasing surfaces and considerable luster. The usual blending of detail on Liberty's hair and the eagle's neck is principally due to the strike. Census: 13 in 45, 24 finer (8/13).
Ex: *Stack's*, 10/91, lot 1872; *Long Beach Signature (Heritage, 2/2008)*, lot 2550. NGC ID# 25VJ, PCGS# 8287

5186 1861 AU58 NGC. With a mintage of 688,000 pieces, the 1861 Liberty five had the second highest production in the No Motto series from 1839 to 1866. Surviving examples are generally encountered in XF or AU grades. The design elements on this near-Mint example display a pleasing level of detail. Ample luster clings to brassy-gold surfaces. The fields on both sides are typically abraded for the grade.
Ex: *Long Beach Signature (Heritage, 2/2008)*, lot 8591. NGC ID# 25VK, PCGS# 8288

5187 1861 AU58 NGC. The design elements display a pleasing level of detail on this near-Mint example. Ample luster clings to brassy-gold surfaces. The fields on both sides are typically abraded for the grade. NGC ID# 25VK, PCGS# 8288

1865 Half Eagle, AU Details Mintage of 1,270 Pieces

5188 1865 — Improperly Cleaned — NGC Details. AU. Since gold coins did not circulate in 1865 due to Civil War hoarding, the tiny business mintage of 1,270 pieces was likely intended to prevent speculation over the 25 proofs. This butter-gold representative has minimal wear and moderately abraded fields. The surfaces are bright but lack distracting hairlines. NGC ID# 25VW, PCGS# 8298

5189 1865-S VF30 NGC. The 1865-S Liberty half eagle is a rare issue from a mintage of 27,612 pieces. This pleasing example displays overall even wear, with apricot-gold surfaces that include a few splashes of golden-brown. The surfaces reveal only scattered minor abrasions, all consistent with the grade. Census: 4 in 30, 61 finer (8/13).
Ex: *Dallas Signature (Heritage, 10/2008)*, lot 8552, which realized \$1,265. NGC ID# 25VX, PCGS# 8299

5190 1870-S VF25 PCGS. The 1870-S half eagle claims a mintage of 17,000 pieces, quite low in absolute terms, but typical of S-mint half eagle emissions of that era. Attractive red-orange color appears in portions of the protected areas on this pleasing survivor, with the coin exhibiting antique-gold color overall. The wear is even and there are no marks worthy of individual mention. This is a lovely representative. Population: 10 in 25, 51 finer (8/13). NGC ID# 25WB, PCGS# 8321

1873-S Half Eagle, AU53 Pleasing Eye Appeal

5191 1873-S AU53 PCGS. Rich golden-yellow color and cartwheel luster provide this piece with immediate eye appeal, particularly the reverse. Portions of the protected areas reveal pleasing peach color. Although numerous scattered abrasions are present, as expected at this grade level, none are worthy of individual mention. Population: 4 in 53, 6 finer (8/13).
From *The Searight Collection*. NGC ID# 25WM, PCGS# 8332

1873-S Five Dollar, AU55 Conditionally Scarce, Rare Any Finer

5192 1873-S AU55 NGC. The 1873-S half eagle was heavily circulated, and most surviving examples grade Extremely Fine to About Uncirculated. NGC has certified only one Mint State coin, an MS61. The yellow-gold surfaces of this Choice AU display luster in the recessed areas and the design features are well-impressed. A few scattered marks are not serious. Census: 14 in 55, 3 finer (8/13). NGC ID# 25WM, PCGS# 8332

5193 1879-S MS63 NGC. The 1879-S Liberty half eagle is a scarce issue in all Mint State grades. Shimmering luster adds to the eye appeal of this Select representative. The obverse reveals hints of red. Abrasions on Liberty's face and neck likely held this piece from a higher grade. Census: 23 in 63, 6 finer (8/13). NGC ID# 25X9, PCGS# 8350

5194 1880 MS64 NGC. CAC. Bright orange-gold color, rich luster, and a strong strike provide this near-Gem 1880 half eagle with tremendous visual appeal. A wispy die crack extends from approximately 4 o'clock to 7 o'clock through portions of the legends. This piece displays minimal abrasions. Census: 87 in 64 (4 in 64+), 23 finer (8/13). NGC ID# 25XA, PCGS# 8351

1880-CC Liberty Five, AU55
Very Scarce Any Finer

- 5195 1880-CC AU55 PCGS. Variety 1-A.** The 1880-CC Liberty half eagle is more difficult to locate than its mintage of 51,107 pieces would indicate. This attractive Choice AU specimen offers lightly abraded orange-gold surfaces with highlights of rose and lilac. Only a trace of wear shows on the sharply impressed design elements and vibrant mint luster enhances the outstanding eye appeal. Population: 37 in 55, 30 finer (8/13). NGC ID# 25XB, PCGS# 8352

- 5196 1881-CC VF30 PCGS. CAC. Variety 1-A.** A midgrade example of this low mintage Carson City emission. The orange-gold toning is original and the wings are richly detailed despite a soft impression on the eagle's neck and Liberty's curls. NGC ID# 25XE, PCGS# 8356

1882 Five Dollar, MS65
Bold All-Around Luster

- 5197 1882 MS65 NGC.** Rings of gold-orange at the margins give way to paler yellow at the well-defined centers. Though a small flaw appears at the tip of the bust, its origin is ambiguous. Of more concern are shallow flaws at and to the right of the date, but on the whole this is a pleasing Gem. NGC has graded only three coins as MS66 or better (8/13). NGC ID# 25XG, PCGS# 8358

- 5198 1883-S MS62 NGC. CAC.** A well struck example, this coin displays shades of yellow-gold, green-gold, and peach, with areas of luster remaining. Abrasions are present, as expected at this grade level, with none worthy of individual mention. Census: 36 in 62, 26 finer (8/13). NGC ID# 25XM, PCGS# 8363

1884-CC Half Eagle, AU50
Underrated Better Date

- 5199 1884-CC AU50 NGC. Variety 1-A.** The 1884-CC Liberty half eagle is an underrated issue from a low mintage of 16,402 pieces. This brightly lustrous yellow-gold specimen shows a few highlights of rose, with light wear on the design elements and scattered minor abrasions on both sides. Census: 19 in 50, 94 finer (8/13). NGC ID# 25XP, PCGS# 8365

- 5200 1885-S MS65+ NGC.** As the Plus designation signifies, this Gem displays a strong degree of eye appeal. Rich satin luster and attractive peach-gold and gold-green colors are among the attributes this piece possesses. Census: 2 in 65+, 13 finer (8/13). NGC ID# 25XT, PCGS# 8368

- 5201 1888-S MS62 NGC. CAC.** Vibrant, unmarked surfaces are glowing with original, deep golden mint luster. There is some weakness to the stars and the mintmark is not well defined. Unlike San Francisco minted half eagles of the previous three years, few Mint State examples of this date were saved. Census: 20 in 62, 2 finer (8/13). Ex: *Long Beach Signature* (Heritage, 6/2001), lot 9010. NGC ID# 25XY, PCGS# 8373

- 5202 1889 MS62 PCGS.** The 1889 is a difficult and generally overlooked issue with a very low mintage of only 7,565 pieces and is rare in all grades. Several shades of gold and yellow appear on this lovely piece. Population: 10 in 62, 5 finer (8/13). NGC ID# 25XZ, PCGS# 8374

- 5203 1890-CC MS61 NGC. CAC. Variety 1-A.** A charming orange-gold example of this scarce Carson City five, which has about one-fourth the mintage of the 1891-CC. Luster dominates the borders. Small marks are scattered but none distract. NGC ID# 25Y3, PCGS# 8376

1890-CC Liberty Five, MS62
Attractive Color, Vibrant Luster

- 5204 1890-CC MS62 PCGS. Variety 1-A.** The Carson City Mint resumed coinage of half eagles in 1890 with a nominal mintage of 53,800 pieces. This impressive MS62 example displays sharply detailed design elements and vibrant mint luster on both sides. The bright yellow-gold surfaces exhibit a few hints of rose and show only minor signs of contact. Population: 82 in 62, 64 finer (8/13). NGC ID# 25Y3, PCGS# 8376

- 5205 1898 MS64+ NGC.** An important condition-rarity, NGC and PCGS combined have awarded higher numeric grades to only 38 examples (8/13). This lustrous, high-end near-Gem example has brilliant yellow surfaces with only trivial imperfections. Census: 3 in 64+, 32 finer (8/13). NGC ID# 25YP, PCGS# 8396

**1899 Five Dollar, MS66
Deep Color, Satin Luster**

- 5206 1899 MS66 NGC.** Deep orange-gold surfaces have a satin sparkly on this dusky yet delightful Premium Gem from the turn of the century. Both the portrait and eagle show excellent detail, and only an old mark curving at Liberty's throat stands in the way of an even finer designation. NGC has certified nine coins as MS67 or finer (8/13). NGC ID# 25YS, PCGS# 8398

- 5207 1900-S MS64 PCGS. CAC.** Rich gold color and a pleasing level of design definition provide this near-Gem with a lovely appearance. A few small alloy spots are present. PCGS has awarded higher numeric grades to only 13 examples (8/13). NGC ID# 25YV, PCGS# 8401

- 5208 1901-S MS64 PCGS. CAC.** Displaying attractive luster, this near-Gem exhibits lovely butter-gold color and a sharp strike. Several tiny dies cracks are present on the reverse. Very few abrasions are present. NGC ID# 25YX, PCGS# 8404

- 5209 1902-S MS64 PCGS.** Bright honey-gold surfaces and cartwheel luster provide this near-Gem with a pleasing appearance. The design elements display a strong degree of detail. A number of minor abrasions appear, primarily on the obverse. NGC ID# 25YZ, PCGS# 8406

**1902-S Half Eagle, MS65+
A Well-Produced Issue**

- 5210 1902-S MS65+ PCGS.** The 1902 -S is one of the best-produced coins in the Liberty Head half eagle series in terms of strike and luster. These attributes, along with careful preservation, make this yellow-gold, high-end Gem a great type coin for a high-grade collection. Population: 2 in 65+, 30 finer (8/13). NGC ID# 25YZ, PCGS# 8406

**1902-S Liberty Five, MS65
Outstanding Type Coin**

- 5211 1902-S MS65 PCGS. CAC.** The 1902-S Liberty half eagle was a well-produced issue and this delightful Gem shows the sharply detailed design elements and vibrant mint luster that is typical of the issue. The vivid orange-gold surfaces show only minor signs of contact with outstanding eye appeal. In a green label holder. PCGS has graded 30 numerically finer examples (8/13). NGC ID# 25YZ, PCGS# 8406

- 5212 1903-S MS65 NGC.** Several attractive shades of yellow-gold along with rich luster provide this Gem with strong eye appeal. Wispy die cracks appear on both sides. NGC ID# 25Z3, PCGS# 8408

- 5213 1906 MS64 PCGS. CAC.** Rich yellow-orange and apricot shades grace satiny surfaces with a considerable cartwheel effect. Strong interior detail weakens slightly on the obverse stars. NGC ID# 25Z9, PCGS# 8413

- 5214 1906-S MS64 PCGS. CAC.** Attractive gold color and rich luster provide this near-Gem representative with a strong degree of visual appeal. Although small, scattered marks are present as expected at this grade level, none is worthy of mention. The San Francisco Mint coined 598,000 half eagles, presumably all before the famous earthquake of April 1906. Population: 35 in 64, 16 finer (8/13). NGC ID# 25ZB, PCGS# 8415

- 5215 1907-D MS64 NGC.** The 1907-D half eagle is extremely important to mintmark type collectors, as the last D-mint issue of the Liberty design, with the only other being the 1906, the year the Denver Mint began production. This wonderful specimen exhibits a bold strike along with satiny yellow-gold luster and excellent eye appeal. NGC ID# 25ZD, PCGS# 8417

INDIAN HALF EAGLES

**1908 Indian Five Dollar, MS64+
Excellent Type Coin**

- 5216 1908 MS64+ PCGS. CAC.** Apricot-gold color along with hints of green and gleaming luster provide this near-Gem with a bold degree of visual appeal, as the plus designation attests. Scattered marks are present, but aside from a few below AMERICA on the reverse, they are minor in nature. NGC ID# 28DE, PCGS# 8510

5217 1909 MS63 NGC. A well struck Select example, this coin reveals satiny surfaces and original green-gold color. The borders display small areas of gray debris on the surfaces. NGC ID# 28DH, PCGS# 8513

5218 1909 MS63 NGC. CAC. Hints of rose and peach are present on this pleasing Select representative displaying attractive honey-gold color overall. The few scattered marks are minor. NGC ID# 28DH, PCGS# 8513

**1909 Indian Half Eagle, MS64
Second Year Issue**

5219 1909 MS64 NGC. Swirling luster has an intriguing mix of straw-gold, butterscotch, and peach shadings. Both sides are generally well-defined with a touch of satin. The 1909 half eagle is among the more accessible issues in its series and remains available for a price as a near-Gem, though finer coins are conditionally scarce. NGC ID# 28DH, PCGS# 8513

5220 1909-D MS63+ NGC. CAC. Light yellow-gold overall and pleasing. Surfaces are well-preserved by Select standards though fall just shy of a near-Gem state. A good all-around type coin. NGC ID# 28DJ, PCGS# 8514

5221 1909-D MS64 PCGS. Yellow-gold at its lightest with amber and orange hues predominant, this near-Gem is a colorful and lustrous type coin for its series. Inner detail is strong though not intricate. *From The Searight Collection.* NGC ID# 28DJ, PCGS# 8514

**1909-O Five Dollar, XF Details
Even Wear, Light Reddish Color**

5222 1909-O — Damage — PCGS Genuine. XF Details. This New Orleans five slipped into circulation and spent a couple of years as actual currency before someone noticed the faintly visible O mintmark. The surfaces do not appear to have been cleaned, and they show light reddish patina. The damage mentioned on the insert is in the form of a couple of deep scratches in the area of BU in PLURIBUS. Even friction from circulation is balanced over each side. NGC ID# 25ZK, PCGS# 8515

**1910 Half Eagle, MS64+
Well-Struck Issue, Rare Any Finer**

5223 1910 MS64+ PCGS. The 1910 half eagle makes an excellent type coin choice via its combination of overall good surface qualities and Mint State availability up to the Gem level, above which it becomes quite rare. This deep orange-gold example shows the super strike the issue is noted for, with no mentionable weakness. This piece is only a couple of stray, insignificant marks away from Gem status. Population: 12 in 64+, 19 finer (8/13). NGC ID# 28DK, PCGS# 8517

5224 1910-S MS60 NGC. Green-gold color appears on this example exhibiting a pleasing strike. Some of the deeper recesses display attractive orange color. Scattered areas of gray debris are present on both sides. NGC ID# 28DM, PCGS# 8519

**1911 Indian Five Dollar, MS64
Quality Luster**

5225 1911 MS64 PCGS. CAC. The Bela Lyon Pratt gold coin design, innovative though it was, also made most of the surface area susceptible to abrasions. This near-Gem, yellow-orange with satin-bright luster and a few areas of sparkle, is softly struck but shows fewer abrasions than most of its peers. PCGS records 52 certification events at MS65 or finer (8/13). NGC ID# 28DP, PCGS# 8520

5226 1915-S AU58 PCGS. CAC. Uncommonly well-defined for the issue, particularly on the pendants of the necklace. Yellow-orange color is generally light and the luster soft with faint interruptions from rub. NGC ID# 25ZR, PCGS# 8531

LIBERTY EAGLES

5227 1839 Type of 1840, Small Letters VG10 PCGS. The 1839 Type of 1840 comes from a small mintage of 12,447 pieces. Few representatives of this type have survived in any condition and auction appearances of any examples are infrequent. This well circulated coin retains appeal with antique-gold color and even wear. Population: 1 in 10, 28 finer (8/13). NGC ID# 262F, PCGS# 8580

5228 1842-O — Improperly Cleaned — NCS. AU Details. Variety 2. Though less rare than its 1841-O predecessor, the 1842-O is nonetheless challenging and from a mintage of only 27,400 pieces. The present lightly circulated example is a bit bright from cleaning and displays its share of small abrasions. NGC ID# 262N, PCGS# 8587

5229 1843-O AU50 NGC. Variety 3. This pleasing AU50 example shows a high mintmark, positioned over the gap between E and N in TEN, and the reverse die is lapped, not corresponding to either of the varieties listed in Doug Winter's series reference. The lustrous surfaces show a scattering of minor contact marks on both sides, consistent with the grade. NGC ID# 262R, PCGS# 8589

5230 1843-O AU50 PCGS. Variety 2. The light orange-gold surfaces of this attractive AU50 example retain much original mint luster and the design elements show just a touch of wear. Prooflike reflectivity is evident in sheltered areas. Population: 26 in 50, 45 finer (8/13).
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 10406, which realized \$1,725. NGC ID# 262R, PCGS# 8589

5231 1843-O AU50 PCGS. Variety 2. This early O-mint eagle is lightly worn across the highpoints of the design. Some rub and scattered abrasions are also seen in the fields, but both sides are remarkably free of sizeable blemishes. Warm reddish-orange color overlies more deeply set green-gold hues. Population: 26 in 50, 45 finer (8/13).
Ex: New York Signature (Heritage, 7/2002), lot 9286; FUN Signature (Heritage, 1/2008), lot 4390. NGC ID# 262R, PCGS# 8589

5232 1845 VF30 NGC. Lightly marked for the grade, this straw-gold Liberty ten has noticeable hints of remaining luster despite highpoint wear on the portrait and wingtips. From a mintage of just 26,153 pieces. NGC ID# 262U, PCGS# 8592

5233 1845-O XF40 NGC. Variety 1. The 84 in the date are repunched. A peach-gold example that has moderate wear and the expected number of small to medium-sized marks. A scarce No Motto New Orleans issue.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 4399, which realized \$1,121.25. NGC ID# 262V, PCGS# 8593

1846 Ten Dollar, AU50 Seldom Seen Finer

5234 1846 AU50 NGC. A scarce date in the early Liberty eagle series, rarely seen in grades above AU55. The mintage was only 20,095 coins, and only a slender percentage of that production has survived. Although the surfaces are a bit abraded, this AU example is nicely defined and displays hints of its original luster. Census: 16 in 50, 33 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 3851; Long Beach Signature (Heritage, 2/2009), lot 2877. NGC ID# 262W, PCGS# 8594

5235 1846-O — Improperly Cleaned — NGC Details. AU. Variety 4. This variety was formerly regarded as an 1846/5-O overdate, but it is now believed that a defective date punched caused the “extra metal” within the 6. The obverse die was also used to strike the common Variety 3, but Variety 4 is rare, and locates the mintmark east of, instead of west of, the feather tip. This straw-gold example is typically struck and has a hairlined obverse, but much luster remains. NGC ID# 262X, PCGS# 8595

5236 1847 AU55 NGC. Bulging Bun subtype. Unusually toned with pale centers and deep gold-orange hues extending from the rims to varying degrees. Lightly marked overall but with a few deeper abrasions to the left and right of the portrait. NGC ID# 262Z, PCGS# 8597

1847 Liberty Eagle, MS61 Popular No Motto Type Coin

5237 1847 MS61 NGC. Rounded Bun subtype. Shield Ring reverse. From a large mintage of 862,258 pieces, the 1847 is the most available No Motto Liberty eagle and the number one choice of type collectors. This attractive Mint State example is well-detailed and lustrous, with pleasing yellow and rose-gold surfaces that show a minimum number of contact marks for the grade. Census: 37 in 61 (1 in 61+), 13 finer (8/13). NGC ID# 262Z, PCGS# 8597

5238 1847-O XF45 NGC. Variety 6. This coin represents one of several new die varieties unlisted in Winter, showing several short die lines near the obverse rim between 7 and 8 o'clock. The pleasing orange-gold surfaces are lightly abraded and the design elements show light-to-moderate wear. NGC ID# 2632, PCGS# 8598

5239 1847-O AU55 NGC. Variety 7. A canary-gold New Orleans type coin with lightly marked and mildly luminous surfaces. The strike is good aside from a few incompletely brought up stars.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 10410, which realized \$977.50. NGC ID# 2632, PCGS# 8598

5240 1850 Large Date XF45 NGC. A pleasing Choice XF example of this more accessible eagle variant for Philadelphia in 1850. Light yellow-gold surfaces are bright overall and moderately abraded. Peripheral detail is typically blunt. NGC ID# 2637, PCGS# 8603

5241 1850-O XF45 NGC. Variety 2. This die marriage, with the date centered beneath the bust, is much scarcer than Variety 1, which has the date placed further right. A caramel-gold example of this scarce New Orleans No Motto issue. Abrasions are inconsequential except for a cluster on the upper right reverse field. NGC ID# 2639, PCGS# 8605

5242 1850-O — Cleaned — ANACS. AU53 Details. Variety 1. A yellow-gold eagle with moderately subdued surfaces. The fields are only lightly abraded though the portrait displays unobtrusive marks. A better New Orleans issue which has about one-tenth the mintage of the 1847-O. NGC ID# 2639, PCGS# 8605

5243 1851-O VF30 PCGS. Variety 1. The 1851-O is an available issue, popular with mintmark type collectors. Moderate even wear shows on the design elements of this attractive VF30 specimen, and the pleasing orange-gold surfaces are lightly abraded for the grade.
Ex: Dallas Signature (Heritage, 4/2007), lot 8045. NGC ID# 263B, PCGS# 8607

5244 1851-O XF45 NGC. Variety 1. The date is high, slightly closer to the bust than the border, and the upright mintmark is centered over the space between the E and N in TEN. This Choice XF piece has light greenish yellow-gold surfaces with trivial marks and traces of luster. NGC ID# 263B, PCGS# 8607

**1853 Liberty Eagle, MS61
Bright and Appealing**

5245 1853 MS61 PCGS. CAC. Collectors of No Motto Liberty tens know how challenging they are to acquire in Mint State. The 1853 Liberty eagle shares a large mintage of 201,253 pieces with the 1853/2 overdate issue, making it one of the more available dates of the series. Mint State examples, like this example, are quite rare though. Gleaming light yellow-gold surfaces add to the eye appeal of this well struck example. Population: 13 in 61, 9 finer (8/13). NGC ID# 263E, PCGS# 8610

5246 1854-O Small Date AU53 NGC. Variety 1. Though the date seems large in isolation, it is distinctly smaller than that of the Large Date when seen side-by-side. This lightly worn orange-gold piece shows only a few significant abrasions, one on the portrait and another in the right obverse field. Census: 35 in 53, 88 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 3872. NGC ID# 28EC, PCGS# 8614

5247 1855-O XF40 NGC. Variety 2. A scarce issue from a mintage of 18,000 pieces. This attractive XF specimen displays lightly abraded orange-gold surfaces with moderate even wear on the design elements. Census: 13 in 40, 88 finer (8/13). NGC ID# 263M, PCGS# 8617

5248 1855-S — Obverse Scratched — NCS. VF Details. Much rarer than the first year 1854-S, since San Francisco concentrated on production of the more efficient double eagle. NGC has certified a mere 30 pieces from the initial mintage of just 9,000 pieces. This example displays traces of luster but is glossy and typically abraded. The cheek exhibits a dull scratch. NGC ID# 263N, PCGS# 8618

5249 1856 AU58 PCGS. A fundamentally appealing representative of an issue that is a condition rarity in Mint State. Despite a number of fine abrasions on each side, it remains attractive, particularly at the well-defined central devices, though the obverse stars show a degree of softness. Population: 24 in 58, 19 finer (8/13).
Ex: Central States Signature (Heritage, 4/2006), lot 3944; Baltimore Signature (Heritage, 7/2008), lot 3129. NGC ID# 263P, PCGS# 8619

5250 1857 XF45 PCGS. Lightly worn but with faint luster remaining in pale yellow surfaces. A prominent line of reed marks appears behind Liberty's neck, while the upper reverse has similar, shallower flaws. Population: 31 in 45, 35 finer (8/13). NGC ID# 263T, PCGS# 8622

5251 1857-O VF30 PCGS. Variety 1. The 1857-O is one of the scarcest New Orleans eagles, from a mintage of just 5,500 pieces. This moderately worn VF30 example displays pleasing orange-gold surfaces that retain a few traces of prooflike reflectivity in sheltered areas. Population: 3 in 30, 56 finer (8/13). NGC ID# 263U, PCGS# 8623

**1858-S Ten Dollar, AU Details
Very Scarce Early S-Mint Issue**

5252 1858-S — Improperly Cleaned — NGC Details. AU. The 1858-S has traditionally been compared to the 1858 Philadelphia issue. Both are low-mintage rarities with the 1858-S only having 11,800 pieces struck, compared to the P-Mint's 2,521-piece mintage. This piece is just a bit bright, thus the Improperly Cleaned designation. However, each side shows significant reddish-gold color, especially surrounding the devices. The strike is just a bit soft and uniformly so. Only light abrasions are peppered over each side.

5253 1860 XF45 NGC. Despite a low mintage of 15,055 pieces, the 1860 is found with two different design subtypes, the Rounded Bun and Bulging Bun. The present Choice XF example has a bulging (six-fold) central bun. The apricot-gold surfaces are original and typically abraded. NGC ID# 2644, PCGS# 8631

5254 1860 XF45 NGC. Bulging Bun subtype. This moderately circulated No Motto ten has a low mintage of 15,055 pieces and is scarce in all grades. The present coin is less abraded than customary for the type and retains original apricot-gold toning. NGC ID# 2644, PCGS# 8631

5255 1860 AU53 PCGS. Bulging Bun subtype. Mostly sun-gold though a blush of orange toning adorns the upper obverse. A few abrasions are noted near stars 8 and 9. From a mintage of just 15,105 pieces. Housed in a green label holder. Population: 11 in 53, 21 finer (8/13).
Ex: Baltimore Signature (Heritage, 8/2008), lot 9929, which realized \$1,610. NGC ID# 2644, PCGS# 8631

**1860 Eagle, AU55
Elusive in Mint Condition**

5256 1860 AU55 NGC. Reddish-gold patination covers both sides of this Choice AU twenty and the strike is solid throughout, including most of Liberty's hair and the star centrils. A few minute marks do not disturb. Mint State pieces are elusive, especially lower-level coins. Census: 19 in 55, 29 finer (8/13). NGC ID# 2644, PCGS# 8631

**1860 No Motto Ten, AU58
Low-Mintage Issue**

5257 1860 AU58 NGC. Bulging Bun subtype. An orange-gold representative that boasts bright luster across the margins and motifs. The strike is sharp and although abrasions are distributed, none merit individual mention. A meager 15,055 pieces were issued. Census: 22 in 58, 7 finer (7/13). NGC ID# 2644, PCGS# 8631

5258 1860-O XF45 NGC. Variety 1. Satiny and evenly worn across both sides, with appealing green-gold color and vague peach peripheral toning. A shallow mark below obverse star 3 has toned over in a deep shade of violet. A scarce low-mintage New Orleans issue of 11,100 pieces. Census: 19 in 45, 85 finer (8/13). Ex: FUN Signature (Heritage, 1/2008), lot 4418. NGC ID# 2645, PCGS# 98631

5259 1861 AU53 NGC. Rounded Bun subtype. A problem-free sun-gold example of this Civil War type issue. Only lightly abraded, and the margins and motifs display noticeable luster. The wingtips show minor wear. NGC ID# 2647, PCGS# 8633

5260 1861 AU55 NGC. Bulging Bun subtype. The lightly abraded orange-gold surfaces of this popular Civil War era Liberty eagle show considerable remaining mint luster in sheltered areas and only a trace of wear is seen on the well-detailed design elements. NGC ID# 2647, PCGS# 8633

**1861 Ten Dollar, AU58
Great Luster**

5261 1861 AU58 PCGS. Bulging Bun subtype. Though the double eagle saw massive mintages in 1861, the ten dollar denomination experienced comparative neglect, its production reaching only the low six figures. This scarcely rubbed near-Mint coin has ample yellow-to-orange semireflective cartwheel luster but also a number of small to moderate marks scattered across each side. Population: 30 in 58, 31 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 2647, PCGS# 8633

**1861 Liberty Eagle, AU58
Pleasing No Motto Type Coin**

5262 1861 AU58 NGC. CAC. Bulging Bun subtype. The 1861 Liberty eagle was produced in large numbers and remains a plentiful issue today in circulated grades. The 1861 becomes very scarce above the AU58 level, however. This attractive near-Mint piece exhibits lightly abraded orange-gold surfaces with a few traces of mint luster and a touch of wear on the design elements. NGC ID# 2647, PCGS# 8633

**1861-S Eagle, XF40
Low 15,500 Coin Mintage**

5263 1861-S XF40 PCGS. CAC. The 1861-S eagle is a conditionally rare low-mintage issue that is usually found with considerable wear. This lightly worn example has traces of luster in the protected areas close to the devices, with a few light surface marks that are consistent with the grade. Population: 7 in 40, 34 finer (8/13). NGC ID# 2648, PCGS# 8634

**1865 Ten Dollar, AU Details
Low-Mintage Issue**

5264 1865 — Rim Repair, Cleaned — NGC Details. AU. A glossy and bright orange-gold example of this rare date. The upper reverse has a railroad rim, as made, and the obverse rim is also irregular, though a rim scratch is noted near 12 o'clock. The fields are moderately abraded. Only 3,980 pieces were struck, since gold coins failed to circulate that year except on the West Coast, which was serviced by the San Francisco Mint.

**1865-S Eagle 865 Over Inverted 186, VG10
Exceptional for the Grade**

- 5265 1865-S 865 Over Inverted 186 VG10 PCGS.** All 1865-S eagles, both normal date and inverted date varieties, are elusive in any grade. The mintage of 16,700 coins for the date includes both varieties, and they are similar in rarity, although the inverted date variety seems slightly more available. The present piece is really quite exceptional for its well-worn condition. The reddish-yellow surfaces are smooth and essentially mark-free, aside from the usual tiny handling marks that accumulated from time in circulation. Deep steel patina around the border devices, including the stars and legend, provide excellent eye appeal. It is quite a delightful piece for the grade.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3888. NGC ID# 28ED, PCGS# 8643

**1865-S Ten Dollar, Fine 12
1865/Inverted 186 Variety**

- 5266 1865-S 865 Over Inverted 186 Fine 12 NGC.** Although not designated as such on the insert, this is actually an example of the intriguing 1865/Inverted 186 variety. The engraver accidentally punched the three-digit 186 logotype in the die upside down, then corrected his mistake before adding the final 5. This lovely piece has smooth, evenly worn, light yellow-gold surfaces, a most attractive example.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3889. NGC ID# 28ED, PCGS# 8643

**1866-S Motto Ten, AU Details
Rare and Underappreciated**

- 5267 1866-S Motto — Improperly Cleaned — NGC Details. AU.** Another rare and underappreciated San Francisco issue. The NGC Census lists 36 examples in all grades, several of which were probably broken out of their holders over the past 26 years. Most of the mintage of 11,500 pieces was likely eventually melted. The present coin shows minimal wear but the straw-gold surfaces are subdued and the obverse field is smoothed near Liberty's chin. NGC ID# 264K, PCGS# 8650

**1867 Ten Dollar, AU50
A Rare, Low-Mintage Issue**

- 5268 1867 AU50 NGC.** The 1867 Liberty Head eagle boasts a minuscule mintage of 3,090 circulation strikes. NGC and PCGS have certified slightly more than 100 pieces in all grades, making this a rare issue. Apricot-gold patina covers this AU. The design elements are generally well-impressed, and the scattered marks are in concert with the grade designated. Census: 10 in 50, 32 finer (8/13). NGC ID# 264L, PCGS# 8651

- 5269 1867-S — Scratched, Improperly Cleaned — NCS. Fine Details.** The 1867-S Liberty eagle is a rare issue from a mintage of just 9,000 pieces. Collectors prize this date in all grades and conditions. The design elements are well-worn but intact in outline, with much interior detail still present. A cluster of pinscratches in the left obverse field constitute the noted damage. NGC ID# 264M, PCGS# 8652

- 5270 1868 AU53 NGC.** This low-mintage issue usually is seen in VF or XF grades. AU coins are elusive and Mint State pieces are virtually non-existent. Traces of luster reside in the recesses of this AU53 example and the design elements are relatively well-defined. Scattered minor marks contribute to the grade.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3892. NGC ID# 264N, PCGS# 8653

- 5271 1879-S MS61 PCGS.** Although a common coin in grades up to and including AU58, very few Mint State examples of this San Francisco mint issue have survived. Yellow-gold luster has occasional apricot elements on this MS61 representative, particularly on the reverse. Scattered marks are present, as expected, with the most significant of those being a mark on Liberty's cheek. Population: 34 in 61, 26 finer (8/13). NGC ID# 265R, PCGS# 8686

- 5272 1880 MS63 PCGS.** The surfaces of this Select example reveal shades of gold, orange, and peach. Rich luster and a pleasing strike add to the eye appeal. Population: 61 in 63 (1 in 63+), 21 finer (8/13). NGC ID# 265S, PCGS# 8687

- 5273 1882 MS62 Prooflike NGC.** The fields are clearly reflective despite the customary number of small marks for the MS62 level. A sharply struck sun-gold representative. Census: 11 in 62, 1 finer (7/13).
Ex: Bay State Collection, Part One (Heritage, 7/2009), lot 1818, which realized \$1,610. PCGS# 78695

**1882-S Eagle, MS63
Seldom Seen Finer**

5274 1882-S MS63 NGC. Exuberant luster shines forth from each side of this orange-gold Select 1882-S eagle, one of the top survivors from the original mintage of 132,000 pieces. NGC and PCGS combined have seen fewer than three dozen submissions in this grade, with five finer (8/13). The strike is decent despite softness on a couple of the obverse stars, and a scattering of mostly small marks and a larger one at star 13 account for, but are consistent with, the grade. NGC ID# 2665, PCGS# 8698

5275 1885 MS63 NGC. Shimmering luster and reflective surfaces provide exceptional eye appeal to this Select example. Deep gold and orange colors are present. The design elements display bold definition. Minor abrasions are a grade-limiting factor on this lovely piece. Census: 26 in 63, 6 finer (8/13). NGC ID# 266D, PCGS# 8706

5276 1885 MS61 Prooflike NGC. The 1885 is a scarce, lower mintage issue, and prooflike Uncirculated pieces are seldom encountered. The present flashy eagle is sharply struck and free from singularly mentionable marks. Census: 4 in 61 Prooflike, 1 finer (7/13).
Ex: Houston Signature (Heritage, 12/2008), lot 2156. PCGS# 78706

**1886 Liberty Ten, MS63
Conditionally Elusive Issue**

5277 1886 MS63 NGC. A splendid Select Mint State specimen, this 1886 Liberty ten has butter-yellow surfaces with frosty mint luster. The strike is bold with nearly full design definition on both sides, with scattered grade-consistent surface marks. Census: 26 in 63, 4 finer (8/13). NGC ID# 266F, PCGS# 8708

5278 1886-S MS63 PCGS. Ample and even satiny luster is noted on both sides as is a delicate rose color that is undeniably pleasing. Generally clean with an assortment of scattered marks consistent with a Select grade. PCGS has graded 15 numerically finer examples (8/13). NGC ID# 266G, PCGS# 8709

5279 1886-S MS63 PCGS. This issue becomes prohibitively rarer at the higher grade levels, with PCGS having awarded higher numeric grades to only 15 examples (8/13). Attractive gold and orange colors, along with rich luster, provide this Select piece with a strong level of eye appeal. Surface marks limited the grade, but they pose little, if any, distraction. NGC ID# 266G, PCGS# 8709

5280 1887 MS62 PCGS. Due to a mintage of 53,600 pieces and an absence of sizeable overseas bank vault hoards, the 1887 is a much better date. This satiny example displays attractive color, with the expected number of abrasions for the grade level. A few of the dentils on the reverse, between 1 and 3 o'clock, reveal green flecks. Population: 30 in 62, 5 finer (8/13). NGC ID# 266H, PCGS# 8710

5281 1887-S MS63 PCGS. This Select example reveals hints of several shades, including bright yellow-gold, peach, khaki-green, and orange. The surfaces reveal pleasing luster. Scattered abrasions and a few tiny as-made strike-throughs are present. Population: 83 in 63, 3 finer (8/13). NGC ID# 266J, PCGS# 8711

5282 1888 MS62 PCGS. Gleaming, lustrous surfaces display lovely gold color on this attractive example. Scattered marks and wispy abrasions preclude Select status, though the portrait area is relatively clean. Population: 47 in 62, 7 finer (8/13).
Ex: ANA Fort Worth Signature (Heritage, 3/2010), lot 2476. NGC ID# 266K, PCGS# 8712

5283 1888-S MS63 PCGS. Peach and orange accents provide this Select example with a pleasing appearance. Attractive luster remains. A tiny spot of as-made struck-in grease is present near the center of the obverse. An encapsulated thread appears near the E in AMERICA. PCGS and NGC combined have awarded higher numeric grades to only 7 examples (8/13). NGC ID# 266M, PCGS# 8714

5284 1889-S MS62 NGC. The 1889-S has a reasonable mintage of 425,400 pieces, but most Uncirculated survivors are scuffy from loose bag storage. This piece displays attractive color and areas of pleasing luster. As expected at this grade level, numerous marks are present. The left periphery on the obverse displays small areas of as-made struck-in grease. NGC ID# 266P, PCGS# 8716

5285 1889-S MS63 NGC. Pumpkin-gold color and gleaming luster provide this Select example with an attractive appearance. Abrasions limited the grade of this piece. Census: 86 in 63, 8 finer (8/13). NGC ID# 266P, PCGS# 8716

5286 1889-S MS63 PCGS. CAC. Although the 1889-S eagle had a mintage of 425,400 pieces, there are few survivors at the near-Gem level or higher. Attractive color, including hints of peach, provides this lustrous Select representative with strong eye appeal. The rim near star 9 displays a small indentation. A few flyspecks of blue color appear on the left obverse. PCGS has awarded higher numeric grades to only 21 examples (8/13). NGC ID# 266P, PCGS# 8716

5287 1891-CC MS60 NGC. Variety 3-C, FS-501. The mintmark is clearly repunched. An orange-gold Carson City type coin with a crisp strike, good luster, and the expected number of field abrasions. Certified in an old pre-hologram holder. NGC ID# 266U, PCGS# 8720

5288 1892 MS64 PCGS. Although almost 800,000 coins were struck for this issue, survivors are conditionally rare beginning at the MS64 level. This near-Gem displays frosty luster and orange-gold surfaces. The reverse reveals several wispy die cracks. Scattered marks are present, including on Liberty's face. Population: 13 in 64, 9 finer (8/13). NGC ID# 266V, PCGS# 8721

5289 1892-S MS63 PCGS. Rich yellow-gold color and bold, shimmering luster provide this piece with a strong level of visual appeal. Areas of green-gold and bright yellow-gold are also present. A bold strike is another attribute of this lovely coin. Population: 67 in 63 (3 in 63+), 2 finer (8/13). NGC ID# 266Y, PCGS# 8724

5290 1893-S MS63 PCGS. Gleaming luster and lovely yellow-gold color are among the attributes this Select example possesses, in addition to a strong strike. Population: 49 in 63 (1 in 63+), 4 finer (8/13). NGC ID# 2674, PCGS# 8728

5291 1893-S MS63 NGC. Several shades of attractive colors are intermingled on this lovely Select example. The colors include yellow-gold, pumpkin-gold, and green-gold. The piece displays a strong strike and none of the abrasions poses serious distraction. Census: 16 in 63, 3 finer (8/13). NGC ID# 2674, PCGS# 8728

5292 1894 MS61 Prooflike NGC. Sharply detailed in most areas, this impressive Mint State coin shows a touch of softness on the stars. The yellow-gold surfaces show a scattering of minor contact marks on both sides, with brightly reflective fields. Census: 32 in 61 Prooflike, 40 finer (8/13).
From The Strawberry Fields Collection. PCGS# 78729

5293 1894 MS63 Prooflike NGC. A boldly struck Select example that offers reflective sun-gold fields. Distributed shallow marks correspond with the designated grade. Census: 11 in 63 (2 in 63+) Prooflike, 1 finer (7/13).
Ex: Long Beach Signature (Heritage, 5/2008), lot 3444, which realized \$1,840. PCGS# 78729

5294 1894-O MS61 NGC. Variety 4. An attractive Mint State example of this slightly scarce New Orleans eagle, with well-detailed design elements and vibrant mint luster. The light orange-gold surfaces show the expected number of contact marks for the grade. NGC ID# 2676, PCGS# 8730

**1894-S Eagle, MS61
Only 25,000 Minted**

5295 1894-S MS61 NGC. As expected at this grade level, both sides of this piece have myriad surface marks, including a large diagonal mark before the neck. All other marks on both sides are small and insignificant. Both sides exhibit lustrous honey-gold surfaces with excellent design definition. Census: 13 in 61, 1 finer (8/13). NGC ID# 2677, PCGS# 8731

5296 1896 MS64 NGC. A meager mintage of 76,200 confirms that the 1896 is much scarcer than the usual later Philadelphia issue. This well struck representative displays frosty gold surfaces with hints of green-gold. Thin, wispy die cracks are present on both sides, with the reverse also exhibiting clash marks. Census: 20 in 64, 1 finer (8/13). NGC ID# 267B, PCGS# 8735

5297 1898 MS64 PCGS. Rich pumpkin-gold color and strong luster provide this piece with immediate eye appeal. Closer examination reveals a pleasing level of design detail and interesting die cracks on the reverse. As expected at this near-Gem level, minor abrasions are present. They pose little distraction, if any. NGC ID# 267G, PCGS# 8740

5298 1898 MS64 NGC. CAC. Orange-gold and satiny through the fields with a good glow. Though shallow luster breaks are visible on both sides, by all-around eye appeal this is an appealing near-Gem. NGC ID# 267G, PCGS# 8740

5299 1899 MS64 PCGS. Vibrant orange-gold surfaces and cartwheel luster are among the attributes of this lovely near-Gem example. Both sides exhibit a strong degree of design detail.
From The Searight Collection. NGC ID# 267J, PCGS# 8742

5300 1899-S MS63 NGC. The reverse in particular displays potent luster on this lovely Select representative. Hints of green-gold and peach are present and the design elements are pleasingly detailed. Census: 49 in 63 (1 in 63+), 14 finer (8/13). NGC ID# 267L, PCGS# 8744

5301 1899-S MS63 PCGS. A Select example, both sides of this coin reveal cartwheel luster. The piece displays peach-gold color, with areas of olive-green also present. Abrasions limited the grade, including a mark near Liberty's mouth. Population: 53 in 63, 16 finer (8/13). NGC ID# 267L, PCGS# 8744

5302 1899-S MS63 PCGS. Although the 1899-S had a relatively high mintage, surviving examples are scarce above the MS62 level. This piece displays rich luster, good color, and a bold strike. A number of die cracks are present on the reverse. Population: 53 in 63, 16 finer (8/13). NGC ID# 267L, PCGS# 8744

**1899-S Liberty Ten, MS64
High-Grade Type Coin**

5303 1899-S MS64 NGC. From a large mintage of 841,000 pieces, the 1899-S L is a favorite choice of type collectors because of its relative availability in high grade. This impressive MS64 example exhibits well-detailed design elements and orange-gold surfaces that show only minor signs of contact. Census: 10 in 64, 4 finer (8/13). NGC ID# 267L, PCGS# 8744

**1901-O Eagle, MS63
Among the Last O-Mint Eagles**

5304 1901-O MS63 PCGS. CAC. The old green-label PCGS holder emphasizes the anachronistic character of this 1901-O eagle, among the last four sporadic eagle issues from the decrepit New Orleans Mint, along with the 1903-O, 1904-O, and 1906-O. The hair, beads and bun, and most of the star centrils are sharply struck, as are the eagle feathers throughout the reverse. Flowing mint luster radiates from orange-gold surfaces, an extremely nice coin. Population: 52 in 63 (1 in 63+), 13 finer (8/13). NGC ID# 267R, PCGS# 8748

5305 1901-S MS65 NGC. This attractive Gem exhibits sharply detailed design elements throughout, aside for a touch of softness on a few of the star centers. The well-preserved orange and green-gold surfaces radiate vibrant mint luster on both sides, with terrific eye appeal. NGC ID# 267S, PCGS# 8749

5306 1903 MS63 PCGS. CAC. A pleasing strike and attractive luster are attributes of this Select piece. Several die cracks are present on the reverse, particularly through UNITED. NGC ID# 267V, PCGS# 8752

5307 1903-O MS60 NGC. Variety 3. The mintmark is repunched west. A scarce die variety of this New Orleans type issue. A sharply struck representative with vibrant peripheral luster. Marks are inconsequential aside from an abrasion beneath star 9. NGC ID# 267W, PCGS# 8753

1903-O Ten Dollar, MS63
Underrated Late O-Mint Issue

5308 1903-O MS63 PCGS. CAC. Another O-mint eagle from the last decade of the New Orleans Mint encapsulated in a PCGS green-label holder with the CAC sticker, this Select 1903-O eagle should attract the attention of legions of collectors. Glorious reddish-gold color and copious mint luster complement a relative lack of mentionable marks, creating lots of eye appeal. These late O-mint eagle are quite underrated. NGC ID# 267W, PCGS# 8753

5309 1904 MS64 PCGS. Honey-gold and sea-green toning graces lustrous and splendidly smooth surfaces. Despite its late date, the 1904 is fairly low mintage and much rarer in the present grade than the 1901-S. Housed in an old green label holder. Population: 40 in 64 (1 in 64+), 3 finer (8/13). NGC ID# 267Y, PCGS# 8755

5310 1904-O MS61 NGC. Variety 1. The penultimate New Orleans ten dollar issue has a fairly low mintage but is readily collected in typical Mint State grades. This apricot-gold example has good luster and surprisingly unblemished surfaces. A few stars are incompletely impressed. NGC ID# 267Z, PCGS# 8756

1906 Liberty Ten, MS64
Low-Mintage Late-Series P-Mint

5311 1906 MS64 PCGS. CAC. The next-to-last P-mint Liberty Head eagle, the 1906, saw a small mintage of 165,420 coins, and few surpass the present near-Gem, either numerically or aesthetically. Deep orange-gold surfaces boast generous mint luster over surfaces that show only scattered, small ticks consistent with the grade and the CAC approval. Population: 33 in 64, 11 finer (8/13). NGC ID# 2684, PCGS# 8759

1907-S Eagle, MS63
Conditionally Elusive

5312 1907-S MS63 PCGS. Scattered small marks define the grade on this eye-appealing and conditionally elusive Select 1907-S eagle, the last S-mint Liberty Head issue. Orange-gold surfaces are quite well-struck and boast good eye appeal. The mintage was only 210,500 pieces, but San Francisco would make fewer eagles yet in the year following, of the Saint-Gaudens design. Population: 17 in 63, 11 finer (8/13). NGC ID# 268A, PCGS# 8765

INDIAN EAGLES

5313 1907 No Periods MS62 PCGS. CAC. Rich yellow-gold color and satin luster provide this piece with a pleasing appearance on both sides. This first-year Indian ten exhibits the typical central strike weakness. There are no abrasions worthy of mention. NGC ID# 28GF, PCGS# 8852

5314 1908-S AU55 NGC. The 1908-S is the first Indian eagle coined at San Francisco. The mintage was less than 60,000 coins, making it a better date within the Indian series. This Choice AU representative exhibits the grainy luster the earlier issues are known for. This lovely piece displays yellow-gold and peach colors. NGC ID# 28GL, PCGS# 8861

5315 1909-D AU58 NGC. Light apricot-gold overall with scattered coppery areas. A touch of rub across the high points scarcely dims the luster gracing the fields. NGC ID# 28GN, PCGS# 8863

5316 1909-S AU58 NGC. Glossy yellow-gold surfaces have minor yet distinct wear on the high points. Liberty's jawline shows a few light cuts that are within the bounds of the near-Mint grade. NGC ID# 28GP, PCGS# 8864

1909-S Eagle, MS62

5317 1909-S MS62 PCGS. Despite a sizeable mintage of nearly 300,000 coins, the 1909-S eagle is scarce in Mint State grades, and the typical certified example is a little below AU58. This lovely Mint State example has frosty yellow luster and generally bold design motifs with wispy pink overtones. NGC ID# 28GP, PCGS# 8864

5318 1910 MS63 NGC. A pleasing Select example, this piece displays a nice level of detail and luster. A few minor contact marks are present on both sides. NGC ID# 28GR, PCGS# 8865

5319 1910 MS63 PCGS. The 1910 Indian eagle is an available date and a popular type coin. Hints of orange and green-gold are present on the frosty yellow surfaces of this lovely Select example. NGC ID# 28GR, PCGS# 8865

5320 1910-D MS64 PCGS. Lightly orange-tinged with broad satiny luster, this near-Gem has a subtle appeal when tilted in the light. A few shallow abrasions in Liberty's portrait area contribute to the grade. *From The Searight Collection.* NGC ID# 28GS, PCGS# 8866

5321 1910-D MS64 PCGS. Gorgeous colors provide this near-Gem with a strong degree of visual appeal. Hues of vibrant orange, peach, pink, and ice-blue are present. Other than a mark on the portrait, there are no abrasions worthy of mention. NGC ID# 28GS, PCGS# 8866

5322 1910-S AU58 NGC. Breen-7114. This appears to be the Triple S variety listed in Breen's Encyclopedia as "Extremely Rare". The mintmark is repunched near its northwest curve, surely among the more interesting die varieties within the Indian ten series. In addition, this lustrous piece displays deep yellow-gold color, with hints of peach. This is a lovely coin in many regards. NGC ID# 268D, PCGS# 8867

5323 1911 MS63 NGC. This collectible Select Indian ten displays sharply detailed design elements and good mint luster. The green-gold surfaces show minimal marks for the designated grade. NGC ID# 28GT, PCGS# 8868

5324 1911 MS64 PCGS. Numerous attractive shades of color are present on this eagle, among them orange, green-gold, and peach. A small area of as-made struck-in grease appears on the headdress. The few scattered abrasions are minor. This is a lovely near-Gem example. NGC ID# 28GT, PCGS# 8868

5325 1912 MS63 NGC. An attractive Indian eagle, this Select coin features well-detailed design elements and lustrous surfaces with the usual number of minor contact marks for the grade. NGC ID# 28GW, PCGS# 8871

5326 1912 MS64 PCGS. Deep orange-gold color provides this near-Gem with attractive eye appeal. This lovely example displays a strong level of design detail. Minor abrasions are present, primarily on the reverse. NGC ID# 28GW, PCGS# 8871

5327 1912-S AU58 PCGS. The 1912-S eagle is very challenging in the higher grades as it was not saved at the time of issue. Hints of green-gold and peach appear on this near-Mint example. As expected at this grade level, a number of marks are present, with a few being more noticeable than the rest. NGC ID# 28GX, PCGS# 8872

1913-S Ten Dollar, AU58 Ample Remaining Luster

5328 1913-S AU58 NGC. Only 66,000 Indian eagles were struck at the San Francisco Mint in 1913, a very low mintage for a 20th century coin. Examples are available from AU through MS62 but rare any finer. Reddish-gold surfaces retain a good amount of luster. Light circulation marks do not distract. NGC ID# 28GZ, PCGS# 8874

1913-S Eagle, AU58 Scarce in Mint State

5329 1913-S AU58 PCGS. CAC. Lightly abraded but with only a touch of rub affecting the still-lustrous straw-gold obverse and the orange-influenced reverse. The 1913-S saw a mintage of only 66,000 pieces, making it one of several low-production dates in the Saint-Gaudens eagle series, and worn examples far outnumber Mint State. NGC ID# 28GZ, PCGS# 8874

5330 1914-S AU55 NGC. Abraded surfaces and slight high-point wear are evident on this Choice AU specimen. However, both sides have nearly full medium yellow luster with pleasing eye appeal. NGC ID# 28H4, PCGS# 8877

1915 Ten Dollar, MS64 Vibrant Mint Luster

5331 1915 MS64 PCGS. The 1915 is a plentiful date in the Indian Head ten dollar series but becomes scarce in Gem and is rare any finer. Vibrant mint luster issues from both sides of this near-Gem, each of which displays yellow-gold color with blushes of rose. This sharply struck piece reveals just a few light scuffs. Housed in a prior generation holder. NGC ID# 28H5, PCGS# 8878

5332 1916-S AU58 PCGS. This lovely near-Mint coin displays immediate eye appeal when viewed. The lustrous surfaces and butter-gold color create a pleasing appearance for this example. Areas of frosty pink color outline portions of the designs. Minor abrasions are present, as expected at this grade level, but none is overly distracting. NGC ID# 28H7, PCGS# 8880

1926 Indian Ten, MS65 Colorful Type Coin

5333 1926 MS65 PCGS. CAC. This well-detailed Gem exhibits well-preserved orange-gold surfaces with a few highlights of lilac and vibrant mint luster on both sides. A short scratch in the right reverse field is the only mark of note. Eye appeal is outstanding. Housed in a green label holder. PCGS has graded 11 numerically finer examples (8/13). NGC ID# 28H9, PCGS# 8882

LIBERTY DOUBLE EAGLES

1850 Double Eagle, XF45 First Year of Issue

- 5334 1850 XF45 NGC.** The famous 1849 double eagle is a prototype, and regular production of the twenty dollar gold denomination began in 1850. This Choice XF specimen displays peach-gold patina with traces of light green. Hints of luster are visible in the recessed areas and the design elements exhibit good detail despite high-point wear. A few surface and rim marks are insignificant. NGC ID# 268F, PCGS# 8902

- 5335 1850 — Obverse Damage — NGC Details. Unc.** A dull circular abrasion around the portrait may have been caused by a coin counter. The cheek displays a few fine marks. Otherwise, an attractive green-gold representative of the first collectible twenty dollar issue. NGC ID# 268F, PCGS# 8902

1850 Twenty Dollar Uncirculated Details

- 5336 1850 — Reverse Improperly Cleaned — NGC Details. Unc.** The first-year 1850 is found with little difficulty in XF and AU but pieces with Mint State sharpness are rare. This green-gold and apricot representative displays faint vertical hairlines on the reverse field. The obverse is minimally hairlined but has moderate marks.

1850-O Liberty Twenty, VF25 Still-Attractive, First-Year Survivor

- 5337 1850-O VF25 PCGS. Variety 3.** Considerable wear is apparent on the greenish-gold surfaces of this first-year New Orleans twenty, but all lettering, date, and mintmark remain bold. All major design elements are complete in outline and some fine interior detail remains intact. Traces of original mint luster linger in protected areas. NGC ID# 268G, PCGS# 8903

1850-O Twenty Dollar, AU Details First New Orleans Twenty

- 5338 1850-O — Environmental Damage — PCGS Genuine. AU Details. Variety 2.** The 1850-O is the first double eagle coined at the New Orleans Mint, with a substantial mintage of 141,000 pieces. Perhaps 500-600 examples survive today in all grades. This well-detailed specimen displays greenish-gold surfaces with the dull flat aspect that often accompanies emersion in sea water. NGC ID# 268G, PCGS# 8903

- 5339 1851 XF40 NGC.** A pleasing yellow-gold representative of this popular early double eagle, with a few accents of rose color and a scattering of minor contact marks on both sides. Much original mint luster remains intact. NGC ID# 268H, PCGS# 8904

- 5340 1851 XF45 NGC.** The pleasing yellow-gold surfaces of this early double eagle retain much original mint luster and show highlights of green and rose color, with a number of minor contact marks on both sides. Light-to-moderate wear shows on the design elements. NGC ID# 268H, PCGS# 8904

- 5341 1851 — Improperly Cleaned — NGC Details. Unc.** This boldly struck butter-gold early double eagle displays unbroken cartwheel sheen. Slightly subdued by a mild cleaning. A few specks of struck-in grease are noted on both sides, most noticeable near UNUM. NGC ID# 268H, PCGS# 8904

1851-O Double Eagle, XF40 An Available O-Mint in Circulated Grades

- 5342 1851-O XF40 ANACS.** The 1851-O double eagle is readily available in Very Fine and Extremely Fine grades; even mid-level AUs can be located with minimal difficulty. The bright, yellow-gold surfaces of this XF piece display soft green and reddish tints. The design features exhibit good detail despite high-point wear. Scattered marks are the norm for the grade and issue but do not distract. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU Details

- 5343 **1851-O — Brushed — NGC Details. AU. Variety 1.** New Orleans double eagles are known for their rarity, especially with close to full Mint detail, but the present example is nonetheless within the reach of many collectors. The green-gold surfaces are mildly glossy and faintly hairlined. Minimally bagmarked for the denomination, grade, and issue. A lamination is noted near the first T in TWENTY. NGC ID# 268J, PCGS# 8905

1852/1852 Liberty Twenty, AU55
Repunched Date, FS-301

- 5344 **1852/1852 AU55 NGC. FS-301.** This 1852 Liberty double eagle is lightly worn and brightly lustrous, with orange-gold surfaces that show hints of rose and a moderate number of minor abrasions for the grade. The date was repunched, with the undertype numerals visible to the north of the primary digits, identifying the popular FS-301 variety. NGC ID# 268K, PCGS# 8906

- 5345 **1853 AU50 ANACS.** The pleasing greenish-gold surfaces of this attractive AU double eagle are lightly abraded and retain considerable amounts of original mint luster. Only a touch of wear shows on the well-detailed design elements. NGC ID# 268M, PCGS# 8908

- 5346 **1853 AU50 NGC.** Surviving 1853 Liberty double eagles are surprisingly elusive in Mint State grades, making AU examples obtainable and affordable alternatives. This lightly worn yellow-gold example displays highlights of peach. The minor abrasions on both sides are consistent with the grade.

Ex: Long Beach Signature (Heritage, 9/2008), lot 10096, which realized \$1,380. NGC ID# 268M, PCGS# 8908

1853 Twenty Dollar, AU55
Nice Eye Appeal

- 5347 **1853 AU55 NGC.** The 1853 double eagle is elusive in Uncirculated grades. The apricot-gold surfaces of this Choice AU example display luster in the recessed areas. Moreover, the design elements are well brought up and neither side reveals significant contact marks. Nice overall eye appeal. NGC ID# 268M, PCGS# 8908

1854 Liberty Double Eagle, XF45
Small Date Variety

- 5348 **1854 Small Date XF45 NGC. CAC. Breen-7167.** The date is repunched. The 1854 Liberty double eagle with the Small Date is more available than its Large Date counterpart. This Choice XF specimen retains much of its original design detail and mint luster and the orange-gold surfaces display a number of minor surface flaws, the worst being a series of roller marks in the lower-right obverse field. NGC ID# 268P, PCGS# 8911

1854 Double Eagle, AU53
Small Date

- 5349 **1854 Small Date AU53 NGC.** Two logotype variants were produced in 1854, with the Small Date double eagle being more available than its Large Date counterpart. This attractive AU53 example displays yellow and rose-gold surfaces that show scattering of minor abrasions on both sides. The design elements retain most of their original detail and traces of mint luster are evident in protected areas. NGC ID# 268P, PCGS# 8911

1854 Small Date Twenty, AU53
Eye-Appealing Example

- 5350** 1854 Small Date AU53 NGC. A nick in the center of Liberty's cheek and some small scrapes on the neck nonetheless fail to defeat the considerable eye appeal remaining on this Small Date 1854 twenty, the more commonly found of the two date sizes. Moderate orange-gold color and much luster clinging to the surfaces are in line with the grade. NGC ID# 268P, PCGS# 8911

1854 Small Date Liberty Twenty, AU53
Clean and Attractive

- 5351** 1854 Small Date AU53 PCGS. This is a still-lustrous reddish-gold example of the Small Date variant of the 1854 double eagle, the Small Date representing the more available of the two date sizes. The lightly worn, mildly abraded obverse contrasts with the surprisingly clean reverse, which displays only faint friction. Ex: Long Beach Signature (Heritage, 1/2004), lot 7237; FUN Signature (Heritage, 1/2008), lot 4591. NGC ID# 268P, PCGS# 8911

1854 Double Eagle, AU55
Attractive Small Date Variety

- 5352** 1854 Small Date AU55 NGC. CAC. Two varieties of double eagles were produced at the San Francisco Mint in 1854, one with a Large Date and another with a Small Date. The present coin represents the more available Small Date type, with lustrous yellow-gold surfaces that show a moderate number of minor abrasions for the grade. NGC ID# 268P, PCGS# 8911
- 5353** 1854-S — Harshly Cleaned — NGC Details. AU. The 1854-S is the first San Francisco issue and the third scarcest overall, behind the 1866-S No Motto and the 1861-S Paquet Reverse. The present orange-gold example is bright from cleaning and displays small to moderate marks consistent with limited Old West circulation. NGC ID# 268U, PCGS# 8913

1855-S Double Eagle, AU55
Ex: S.S. Central America

- 5354** 1855-S AU55 PCGS. Variety 14G. Ex: S.S. Central America. SSCA 6537. The Thin A, Full E variety, per Robert Evans' research. An earlier-than-usual San Francisco double eagle from the famous shipwreck, lightly rubbed but with great copper-gold and orange colors. The obverse has an abrasion near the leading edge of the coronet, while the reverse has a few small coppery flecks. Housed in a gold label holder and comes with blue faux-book case (pages torn from "book") and slipcover. COA not included, though the PCGS holder is guarantee enough. NGC ID# 268X, PCGS# 8916

1856-S Twenty Dollar, Choice AU
Bright Sun-Gold Color

- 5355** 1856-S AU55 NGC. High-grade 1856-S double eagles were quite rare before shipwreck recoveries in recent years augmented the supply of well-preserved Type One twenties. This attractive coin displays sun-gold surfaces with shades of peach appearing in the protected areas, a pleasing strike, and abrasions consistent with the grade. NGC ID# 2692, PCGS# 8919

1856-S Liberty Twenty, AU58
Vivid Color, Vibrant Luster

- 5356** 1856-S AU58 PCGS. Variety 17-L. Like most Type One double eagles, the 1856-S was very rare in high grade before the recovery of the S.S. Central America and other recent shipwreck finds. This attractive near-Mint specimen may well have come from one of those finds, though nothing is designated on the holder. The lightly abraded lustrous surfaces are blanketed in mingled shades of burnt-orange, lilac, and lavender patina. Population: 41 in 58, 45 finer (8/13). NGC ID# 2692, PCGS# 8919

1857 Liberty Twenty, AU55
Scarce Date in High Grade

- 5357 1857 AU53 NGC.** Pleasing yellow-gold color and accents of peach in the protected portions appear on this lightly circulated example. The high points of the design exhibit wear and the abrasions are consistent with the assigned grade. This coin has nice eye appeal. Ex: *FUN Signature* (Heritage, 1/2008), lot 4615. NGC ID# 2693, PCGS# 8920

1857 Liberty Double Eagle, AU58
Challenging Issue in Near-Mint and Finer

- 5358 1857 AU58 NGC. CAC.** The 1857 is a scarce date, with most available specimens grading VF or XF, although there are survivors at the AU and Mint grade levels. This near-Mint representative boasts green-gold surfaces with hints of peach. A small area of as-made struck-in grease is present near the lower back portion of Liberty's hair. Census: 102 in 58, 34 finer (8/13). NGC ID# 2693, PCGS# 8920

- 5359 1858 XF45 NGC. CAC.** Pleasing antique-gold color provides this piece with a nice appearance. A few golden-orange highlights are present. The wear is even overall and the abrasions are consistent with the grade. NGC ID# 2697, PCGS# 8923

- 5360 1858-S XF45 NGC.** The pleasing orange-gold surfaces of this popular Type One double eagle display a number of minor marks but no large abrasions, and the central design elements show only the expected wear for the grade. NGC ID# 2699, PCGS# 8925

- 5361 1859 — Damaged, Cleaned — ANACS. AU55 Details.** The 1859 has the lowest mintage of any Philadelphia Type One issue, and is surprisingly scarce, even in circulated grades. The present piece is mildly luminous and has a few abrasions near the chin and hairbun. NGC ID# 269A, PCGS# 8926

- 5362 1859-S XF45 NGC.** Small surface marks and light wear on the high points are expected at the Choice XF grade, as is the case with this representative. This pleasing example offers considerable luster for the grade. NGC ID# 269C, PCGS# 8928

- 5363 1860 XF45 NGC.** A delightful Choice XF specimen, this 1860 double eagle has greenish patina over its light yellow surfaces, retaining hints of luster. Both sides have trivial surface marks as expected for the grade. NGC ID# 269D, PCGS# 8929

- 5364 1860 AU50 NGC.** Bright yellow-gold color provides this piece with an attractive appearance. Areas of peach color appear in portions of the protected areas. As expected at this grade level, numerous abrasions are present; however, there are none worthy of individual mention. NGC ID# 269D, PCGS# 8929

- 5365 1860 AU50 NGC.** Impressively lustrous, briefly circulated yellow-gold surfaces show only isolated abrasions. Softly struck as usual, though the overall eye appeal is strong for the grade. Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4061. NGC ID# 269D, PCGS# 8929

1860 Twenty, AU55
Attractive Color

- 5366 1860 AU53 NGC.** Many significant events in United States history took place in 1860, including South Carolina's secession from the Union. Yellow-gold color and hints of green are present on this lovely double eagle. Areas of mint luster remain on both sides of this representative. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, AU53
Pleasing Eye Appeal for the Grade

- 5367 1860 AU53 NGC.** A significant amount of mint luster remains on this lightly circulated example, providing this piece with a strong degree of eye appeal for the grade, particularly the reverse. Yellow-gold color and an absence of significant abrasions are additional attributes of this lovely example. NGC ID# 269D, PCGS# 8929

1860 Twenty Dollar Gold, AU55
Nice Eye Appeal

- 5368 1860 AU55 NGC.** Rich orange-gold color and remaining luster provide this lightly circulated piece with a pleasing appearance. As expected at this grade level, numerous abrasions are present, including a few marks across Liberty's cheek. A lovely example from the year Abraham Lincoln was elected President. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, AU55
From the Year of the Pony Express

5369 1860 AU55 NGC. Splendid yellow and orange patina drapes the surfaces of this lustrous specimen. Scattered abrasions cover each side, but none are particularly detracting. A crisply struck and affordable representative.

Ex: Long Beach Signature (Heritage, 9/2008), lot 4062. NGC ID# 269D, PCGS# 8929

1860 Twenty Dollar Gold, AU55
Pleasing Color and Luster

5370 1860 AU55 NGC. Rich luster remains on both sides of this Choice AU example, providing a strong degree of visual appeal. The piece displays bright gold color, with hints of green and peach also present. A few small hair thin marks on the reverse provide little distraction, if any. A wonderful representative. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, AU58
Attractive Luster and Color

5371 1860 AU58 NGC. Population figures indicate the 1860 double eagle is plentiful in circulated condition; however, Mint State pieces become difficult to locate, particularly at the higher grade levels. Pleasing mint luster remains on this lovely near-Mint example. Attractive butter-gold color adds to the eye appeal. A number of small alloy spots are present near the central reverse. *Ex: Long Beach Signature (Heritage, 9/2008), lot 4063. NGC ID# 269D, PCGS# 8929*

1860 Liberty Head Twenty, AU58
Significant Mint Luster Remains

5372 1860 AU58 NGC. Although plentiful in circulated grades, the 1860 double eagle becomes scarce in Mint State. A trace of light rub keeps this crisply struck piece from Uncirculated. This near-Mint example displays attractive luster radiating beneath the lovely butter-yellow patina. Numerous roller marks appear across the obverse, with a number of die cracks around the periphery. There are no mentionable marks, and the eye appeal is excellent.

Ex: Long Beach Signature (Heritage, 9/2008), lot 4065. NGC ID# 269D, PCGS# 8929

1860 Type One Double Eagle
Lustrous and Nearly Uncirculated

5373 1860 AU58 NGC. A lightly circulated example of this P-mint issue, one that generally averages only AU or so. There are a few moderate abrasions on each side, with bright orange-gold patina and splendid mint luster radiating forth. The *S.S. Republic* recovery yielded quite a few hoard coins, including some spectacular Mint State pieces. This near-Mint example represents good value for the collector.

Ex: Long Beach Signature (Heritage, 9/2008), lot 4064. NGC ID# 269D, PCGS# 8929

1860 Twenty Dollar, AU58
Especially Challenging Any Finer

5374 1860 AU58 NGC. *Ex: The Baltimore Collection.* The 1860 double eagle is a somewhat scarce issue, despite a significant mintage of 577,670 coins. The *S.S. Republic* discovery increased the NGC Mint State population from 60 coins to 103 coins, and the AU58 population from 222 coins to 257 coins. This near-Mint representative, known prior to the recent treasure discovery, is a brilliant and lustrous piece with bold details and pleasing green-gold surfaces.

Ex: Dallas Signature (Heritage, 10/2008), lot 3029. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, AU58
Generous Amounts of Luster Remain

- 5375 1860 AU58 PCGS.** The reddish-gold surfaces of this near-Mint State double eagle retain ample luster and the design elements are well-impressed. Scattered marks are in concert with the light circulation of a large gold coin. This issue is plentiful in circulated grades. Population: 60 in 58, 51 finer (8/13). NGC ID# 269D, PCGS# 8929

1860 Liberty Head Twenty
Near-Mint

- 5376 1860 AU58 NGC.** The usual minor grade-consistent surface marks are noted on each side with light wear on the high points of this lustrous near-Mint double eagle. A bold strike enhances the eye appeal of this important piece. This example is a few points finer than the typical certified piece as the average certified grade is just 52. NGC ID# 269D, PCGS# 8929

- 5377 1860-S XF45 NGC.** The light yellow and greenish-gold surfaces of this Choice XF specimen show the expected number of minor abrasions for the grade and retain much of their original mint luster. Only light-to-moderate wear shows on the devices, but the obverse stars are a little weak. NGC ID# 269F, PCGS# 8931

- 5378 1860-S XF45 NGC.** Pleasing yellow-gold color with areas of orange-gold highlights provide this piece with nice eye appeal. Portions of the protected areas reveal peach color. As expected at this grade level, numerous abrasions are present.
Ex: Long Beach Bullet Sale (Heritage, 6/2001), lot 1475; Baltimore ANA Signature (Heritage, 8/2008), lot 10085, which realized \$1,495. NGC ID# 269F, PCGS# 8931

- 5379 1860-S XF45 PCGS.** The 1860-S double eagle saw heavy circulation, and most of the remaining examples are in Very Fine or Extremely Fine condition. This specimen displays brass-gold surfaces. A few dark flecks are present near 9 o'clock on the reverse. Although scattered abrasions are present on both sides as expected at this grade level, none of the marks are worthy of mention. NGC ID# 269F, PCGS# 8931

1860-S Twenty Dollar, AU53
Above-Average Quality

- 5380 1860-S AU53 NGC.** Overall even wear is present on this representative displaying light brassy-gold color. As expected at this grade level, numerous abrasions are present, however they are well distributed and there are none worthy of individual mention. The San Francisco Mint produced substantial quantities of double eagles every year and those coins circulated for a substantial time leading to the majority of the survivors grading in the VF to XF range. NGC ID# 269F, PCGS# 8931

1860-S Double Eagle, AU53
Noticeable Remaining Mint Luster Remains

- 5381 1860-S AU53 NGC.** Attractive mint luster remains on this piece, particularly on the reverse. The level of design detail on this example is pleasing. Yellow-gold color and the absence of any significant abrasions are additional attributes of this representative from the San Francisco Mint. NGC ID# 269F, PCGS# 8931

1860-S Twenty Dollar Gold, AU53

- 5382 1860-S AU53 NGC.** This lightly circulated representative displays brassy yellow-gold color with a few small highlights of violet, electric-blue, and fiery orange. The design elements display a pleasing level of detail. Other than a few marks on Liberty's face, the abrasions are inconsequential. NGC ID# 269F, PCGS# 8931

1860-S Double Eagle, AU55
Pleasing Patina

- 5383 1860-S AU55 NGC.** Garrett and Guth (2006) call the 1860-S a “workhorse of commerce” and explain that most survivors exhibit heavy circulation. About Uncirculated examples can be difficult to locate, and this lustrous piece would make an excellent representative. Delightful yellow-gold patina drapes both sides. Sharply struck with no mentionable marks.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4066. NGC ID# 269F, PCGS# 8931

- 5384 1861 XF45 NGC.** A lovely representative at this grade level, this piece displays attractive gold color with hints of peach. The level of detail is pleasing and the abrasions are minor in nature. NGC ID# 269G, PCGS# 8932

- 5385 1861 XF45 PCGS.** A boldly struck, olive-orange example with significant luster in the protected areas. Although there are numerous abrasions on each side, none are significant. A charming and relatively affordable type coin.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4068. NGC ID# 269G, PCGS# 8932

- 5386 1861 AU50 ANACS.** A lightly worn and moderately abraded example of this popular and high-mintage Type One issue. Pale golden surfaces retain considerable luster. NGC ID# 269G, PCGS# 8932

- 5387 1861 AU50 PCGS.** A crisply defined piece with yellow-gold and olive-orange patina on both sides. Myriad bagmarks cover the surfaces, but there are no marks worthy of individual mention.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4069. NGC ID# 269G, PCGS# 8932

- 5388 1861 AU50 PCGS.** The 1861 Liberty double eagle is an available issue from the first year of the Civil War. This lightly circulated example displays well-detailed design elements and pleasing orange-gold surfaces.
Ex: Long Beach Signature (Heritage, 9/2008), lot 10099. NGC ID# 269G, PCGS# 8932

- 5389 1861 AU53 PCGS.** Deep yellow-gold color and accents of peach are present on this piece. The design elements exhibit an attractive level of detail. This is a pleasing representative.
Ex: FUN Signature (Heritage, 1/2008), lot 10526. NGC ID# 269G, PCGS# 8932

1861 Liberty Head Twenty, AU55
Pleasing Mint Luster

- 5390 1861 AU55 NGC.** Bright yellow-gold color and shimmering mint luster provide this lightly circulated representative with an attractive appearance. Peach accents are also present. As expected at this grade level, numerous scattered abrasions appear, but none of them are worthy of individual mention. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, Choice AU
Attractive Color

- 5391 1861 AU55 NGC. CAC.** Pleasing luster and yellow-gold surfaces with hints of green provide this piece with a lovely appearance. A die crack extends through STATES OF. Although there are numerous abrasions on each side as expected at this grade level, including the face, none is significant. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, AU58
Nearly Complete Mint Luster

- 5392 1861 AU58 NGC.** The short spate in circulation produced a scattering of small marks along with a couple of larger scrapes on the cheek and neck of Liberty, but most of the mint luster remains over attractive, orange-gold surfaces. The high-mintage 1861 twenty saw a production of nearly 3 million pieces. NGC ID# 269G, PCGS# 8932

1861 Twenty, AU58
Excellent Type Candidate

- 5393 1861 AU58 NGC.** A lovely double eagle, this near-Mint representative retains nearly all of its original mint luster over yellow-gold surfaces that boast a bold strike. Portions of the protected areas display attractive peach color. Other than a few marks on the portrait, the abrasions are minor. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, MS60
Attractive for the Grade

- 5394 1861 MS60 NGC.** Even though the technical grade of this piece might be correct, there is considerably more market appeal than that might imply. A couple of nicks at the corner of Liberty's mouth appear, and a longer, thin scrape through the hair beneath the coronet. Good luster nonetheless appears over green-gold surfaces that are sharply struck and attractive. NGC ID# 269G, PCGS# 8932

1861-S Double Eagle, AU53
Attractive Type Coin

- 5395 1861-S AU53 NGC.** Appealing mint luster and attractive bright yellow-gold color provide this lovely lightly circulated survivor with a nice degree of visual appeal. This is a lovely example struck during the first year of the Civil War and would make a nice addition to a type set. NGC ID# 269K, PCGS# 8935

1862-S Liberty Twenty, AU50
Lightly Circulated Example of This Scarcer Issue

- 5396 1862-S AU50 NGC.** As with most S-mint gold coins of the era, the 1862-S double eagles saw extensive circulation in the booming West. Although heavily abraded, there are no marks worthy of individual mention. The design elements display a pleasing level of detail, with modest rub as anticipated for the grade.
Ex: FUN Signature (Heritage, 1/2008), lot 4661. NGC ID# 269N, PCGS# 8938

- 5397 1863-S — Authentic Shipwreck Specie — NGC. Breen-7216.** *Ex: S.S. Republic.* Medium S. NGC has demurred on grading the present shipwreck treasure double eagle, but in our opinion, the coin has Uncirculated details with rim damage on the reverse above the ST in STATES. A lustrous sun-gold Civil War twenty. NGC ID# 269R, PCGS# 8940

1863-S Double Eagle, AU53
Pleasing Eye Appeal

- 5398 1863-S AU53 PCGS.** The 1863-S can be located with minimal difficulty through the About Uncirculated level of preservation. Mint State examples are rare. Apricot-gold patina is accented with yellow-gold and rose, and traces of luster reside in the recessed areas. This is a well defined piece with a scattering of light marks. Nice eye appeal overall. NGC ID# 269R, PCGS# 8940

- 5399 1863-S — Reverse Scratched — NCS. Unc Details. Breen-7217.** Small S. A straight scratch between 2:30 and 9:30 accounts for the NCS designation. The right-side rims display a couple of rounded marks. A rose-red representative of this conditionally scarce Civil War date.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 4667. NGC ID# 269R, PCGS# 8940

- 5400 1865 XF45 NGC.** The bright yellow-gold surfaces of this double eagle possess a strong amount of luster for an XF45 coin. Small areas of orange-peach also appear. This piece retains a pleasing level of design definition. NGC ID# 269U, PCGS# 8943

- 5401 1865-S XF45 NGC. Breen-7221.** Small S. A yellow-gold Civil War double eagle that has moderate wear and distributed small abrasions. Rotation reveals pockets of glimmering luster. NGC ID# 269V, PCGS# 8944

1865-S Double Eagle, AU50
Nice Luster and Color

- 5402 1865-S AU50 PCGS. Breen-7221.** Small S. The 1865-S Liberty double eagle was produced in large numbers, but high-grade examples were rarely encountered before recent shipwreck finds augmented the supply of this date. This attractive AU example shows light wear on the design elements and retains most of its original mint luster. The lightly abraded orange-gold surfaces display highlights of lilac. Housed in a green label holder. NGC ID# 269V, PCGS# 8944

1865-S Twenty Dollar Gold, Choice AU
Popular Type One Issue

- 5403 1865-S AU55 NGC.** Small S. The 1865-S Liberty double eagle claims a large mintage of more than a million pieces. Because the coins were intended for use in foreign trade or for currency reserves in Eastern banks, many high-grade examples were lost in shipwrecks and have been recovered in recent years. This attractive Choice AU specimen retains most of its original design detail and the rose-gold surfaces show only minor abrasions. NGC ID# 269V, PCGS# 8944

1866 Liberty Twenty, AU55
First Type Two Issue

- 5404 1866 AU55 NGC.** The 1866 Philadelphia double eagle marks the introduction of the Type Two design, with the motto IN GOD WE TRUST added to the reverse. With a mintage of close to 700,000 pieces, it is not too difficult to locate survivors in VF or XF grade levels. AU examples are scarce, and Mint State pieces are rare. This attractive piece boasts bright yellow-gold color, pleasing luster, and a nice strike. NGC ID# 269X, PCGS# 8949

- 5405 1866-S Motto XF45 NGC.** Gold coinage was in heavier use on the West Coast than the East, and so many more survivors, particularly from the mid-19th century, are found worn and abraded. This Choice XF example has its share of handling marks but also a surprising level of remaining apricot-gold luster. NGC ID# 269Y, PCGS# 8950

- 5406 1867 AU55 NGC.** Ex: The Wild West #1 NGC Registry of Type Three Double Eagles.
A flashy example with great eye appeal displaying a high degree of luster and a pleasing, peach-gold color. The devices are well struck and the surfaces are abraded in a manner consistent with the grade.
Ex: *Fun Signature* (Heritage, 1/2008), lot 4696, which realized \$1,725. NGC ID# 269Z, PCGS# 8951

- 5407 1868-S AU50 PCGS.** Although produced in large numbers, the 1868-S Liberty double eagle circulated heavily at the time of issue, and most survivors are in the VF-XF grade range. This example is brassy-gold overall with numerous abrasions throughout as expected at this grade level. The protected areas reveal attractive peach color. NGC ID# 26A4, PCGS# 8954

- 5408 1868-S AU53 NGC.** Although nearly a million of these coins were minted, most survivors exhibit considerable wear. This pleasing 1868-S double eagle displays considerable luster with attractive gold surfaces and fewer scattered abrasions than sometimes seen. NGC ID# 26A4, PCGS# 8954

- 5409 1869-S VF35 PCGS. Gold CAC.** Though the old green PCGS label calls this coin merely Choice VF, the remaining orange-gold luster (and the gold CAC label) point to something more. Softly struck with a few coppery areas and clear wear on the high points. NGC ID# 26A6, PCGS# 8956

- 5410 1869-S XF45 NGC.** Pleasing yellow-gold surfaces and remaining luster, particularly on the reverse, provide this piece with nice eye appeal. Thin, wispy die cracks appear on the reverse. NGC ID# 26A6, PCGS# 8956

- 5411 1869-S XF45 NGC.** The strike is soft near the rims, in some cases to a significant degree, but a large percentage of the mint luster remains on this Choice XF coin. Scattered abrasions are present, most of them being small, with a mark in the field near Liberty's forehead serving as an exception. NGC ID# 26A6, PCGS# 8956

- 5412 1873-S Closed 3 XF45 PCGS. CAC.** Small S. Faintly luminous in the protected areas of this orange-gold coin, particularly the reverse periphery. Scattered light to moderate abrasions include reed marks on the nose. Housed in a green label holder. NGC ID# 26AL, PCGS# 8969

1873-S Open 3 Double Eagle, Lustrous AU58

- 5413 1873-S Open 3 AU58 PCGS.** The 1873-S the Open 3 is scarcer than its Closed 3 predecessor, due to the delay in dies reaching San Francisco from Philadelphia. This near-Mint State example displays considerable luster on its yellow-gold surfaces. The design elements are well-impressed, and the few scattered marks are not serious. Population: 76 in 58, 53 finer (8/13). NGC ID# 26AM, PCGS# 8979

1874-CC Liberty Twenty, XF45
Still-Lustrous Type Two Carson City Issue

- 5414 1874-CC XF45 NGC. Variety 2-A.** Radiant luster outlines the obverse stars and fills the reverse legends. Marks are distributed but of little singular importance, though we note an indentation on the second S in STATES as an identifier. Type Two Carson City twenties have much lower mintages than their San Francisco counterparts. NGC ID# 26AP, PCGS# 8971

1874-S Twenty, MS61
Popular Type Two Issue

- 5415 1874-S MS61 NGC.** Bright copper-gold surfaces shimmer with luster and deliver a great deal of eye appeal. The coin shows the expected number of moderate contact marks, but they are light and inoffensive. While not especially difficult as an issue, the 1874-S double eagle is scarce in strict Mint State and infrequently seen in grades finer than MS61. Census: 373 in 61, 32 finer (8/13).
Ex: FUN Signature (Heritage, 1/2008), lot 4755. NGC ID# 26AR, PCGS# 8972

1874-S Liberty Twenty, MS61
Type Two, Very Scarce in Finer Grades

- 5416 1874-S MS61 NGC. CAC.** Broad S. Like most Type Two double eagles, the 1874-S is not difficult to locate in circulated grades, but the issue is very scarce above the MS61 level. This attractive Mint State piece is well-detailed, with vibrant mint luster on both sides. The light orange-gold surfaces show many grade-consistent minor contact marks. NGC has graded 32 numerically finer examples (8/13). NGC ID# 26AR, PCGS# 8972

- 5417 1875 MS60 PCGS.** Bright yellow-gold color with hints of peach and a high degree of luster provide this piece with considerable eye appeal. This is a lovely representative. NGC ID# 26AS, PCGS# 8973

1875-CC Double Eagle, XF45
Available Carson City Type Issue

- 5418 1875-CC XF45 NGC. CAC. Variety 4-A.** The 1875-CC Liberty double eagle was produced in large numbers and remains a plentiful issue today. This attractive Choice XF specimen displays light orange-gold surfaces with scattered minor abrasions and traces of mint luster on both sides. The devices retain most of their original design detail. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU53
Collectible Issue With Good Eye Appeal

- 5419 1875-CC AU53 PCGS.** The 1875-CC double eagle issue is the most collectible of the Carson City twenties, struck to the extent of a bit more than 111,000 pieces. Even though the 1874-CC and 1876-CC had slightly larger mintage figures, the 1875-CC is an obvious target for "mintmarked type" collectors. This orange-gold example shows bright luster amid a few scattered marks, none overt, with good eye appeal.
From The Searight Collection. NGC ID# 26AT, PCGS# 8974

- 5420 1875-S AU55 PCGS. CAC.** Generally yellow-gold with swirling luster and orange overtones. Modestly abraded with small areas of copper-rub noted at the high points. Housed in a green label holder. NGC ID# 26AU, PCGS# 8975

- 5421 1875-S MS61 NGC. CAC.** Well-defined with swirling yellow-orange luster and a small coppery dot on the neck. A number of fine abrasions and a few stronger marks account for the grade. NGC ID# 26AU, PCGS# 8975

1876 Double Eagle, Lustrous MS62

- 5422 1876 MS62 PCGS. CAC.** The bright yellow-gold surfaces of this double eagle exhibit sharply struck design elements. Both sides yield more vibrant luster than typically seen for the grade, revealing just a few breaks in the luster flow resulting from scattered minute marks. A difficult coin to locate any finer. NGC ID# 26AV, PCGS# 8976

- 5423 1876-CC — Cleaning — PCGS Genuine. AU Details. Variety 4-A.** No wear is readily evident on this Carson City type coin, but the bright surfaces are typically abraded and display diagonal hairlines. The mintage was less than one-tenth its San Francisco counterpart. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU55
New Variety 3-A**

- 5424 1876-CC AU55 PCGS. Variety 3-A.** This 1876-CC double eagle shows the second C in the mintmark in line with the edge of the T in TWENTY and the 1 in the date centered over a dentil, identifying the Variety 3-A which was identified by Heritage cataloger Brian Koller after Doug Winter published his series reference. The design elements show just a trace of wear and the lightly abraded orange-gold surfaces retain almost all of their original mint luster. NGC ID# 26AW, PCGS# 8977

- 5425 1876-S MS61 NGC.** This Type Two twenty has booming luster and a sharp strike. The obverse displays the expected chatter from coin to coin contact, while the reverse is generally smooth save for a mark within the shield.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4190. NGC ID# 26AX, PCGS# 8978

**1876-S Twenty, Sparkling MS62
Obtainable Type Two Issue**

- 5426 1876-S MS62 PCGS.** A well-struck representative with bold mint luster and pleasant honey-gold color. With a large mintage for a Type Two double eagle, this issue is relatively obtainable in grades through MS61, but becomes scarcer at or above MS62. A few too many marks, including a cut on Liberty's nose limits the grade, but not the sparkle.
Ex: FUN Signature (Heritage, 1/2008), lot 4780. NGC ID# 26AX, PCGS# 8978

- 5427 1878-S MS61 PCGS.** Straw-gold and orange-gold are the primary colors in evidence on this shining S-mint representative. Scattered hazy spots are present on the obverse, with a few toning spots appearing on each side.
Ex: FUN Signature (Heritage, 1/2008), lot 4797. NGC ID# 26B5, PCGS# 8987

**1880 Liberty Twenty Dollar, AU58
Pleasing Near-Mint Example**

- 5428 1880 AU58 PCGS.** The luster is pleasing on both sides of this near-Mint representative, but the reverse is particularly attractive with gleaming surfaces. Yellow-gold and peach colors are predominant, although a few subtle hints of rose-gold also appear. The coin displays scattered marks consistent with the grade level. Population: 39 in 58 (1 in 58+), 29 finer (8/13). NGC ID# 26BA, PCGS# 8992

- 5429 1883-S MS62 PCGS.** Small squat S. A clearly semireflective coin with sharply struck and delicately frosted central devices. The reverse is all-around appealing, though the obverse shows a sizable abrasion at Liberty's nose. NGC ID# 26BJ, PCGS# 9000

- 5430 1884-CC — Tooled — PCGS Genuine. AU Details. Variety 1-A.** *Ex: Rive d'Or Collection.* Despite the PCGS designation, no tooling is readily apparent on this scarce Carson City double eagle. Nicely struck and partly lustrous with the expected number of small obverse abrasions. NGC ID# 26BK, PCGS# 9001

- 5431 1888-S MS62 PCGS.** A highly lustrous, slightly dusky orange-gold representative, this piece displays subtle hints of peach and green. This example exhibits a pleasing level of detail for a San Francisco double eagle of the era. Abrasions are present, as expected at this grade level.
Ex: FUN Signature (Heritage, 1/2008), lot 4849. NGC ID# 26BU, PCGS# 9009

- 5432 1888-S MS62+ PCGS. CAC.** A coin with lovely eye appeal as the plus designation attests, this example displays pleasing shades of gold and peach. The piece exhibits a pleasing strike and has the expected abrasions for this grade level. NGC ID# 26BU, PCGS# 9009

**1889 Liberty Twenty, Nicely Preserved MS62
Low-Mintage Issue of 44,000 Coins**

- 5433 1889 MS62 NGC.** Glowing mint luster flows over nicely presented and preserved orange-gold surfaces on this low-mintage 1889 double eagle, from a meager production of 44,000 pieces. A few scattered marks and luster grazes account for the grade, but there is eye appeal to spare present. A solitary copper spot on the reverse is mentioned but minor. Elusive any finer: NGC has seen only six in higher grades (8/13). NGC ID# 2695, PCGS# 9010

- 5434 1889-S MS62 NGC.** Various shades of gold, yellow, orange, and peach are present on this example exhibiting a prooflike appearance. The luster is particularly bold on the reverse, creating nice eye appeal. NGC ID# 26BW, PCGS# 9012

**1890-CC Twenty Dollar, XF45
Colorful CC-Mint Type Coin**

- 5435 1890-CC XF45 NGC. CAC. Variety 1-A.** The 1890-CC Liberty double eagle is a popular mintmark type issue, from a large mintage of 91,209 pieces. This Choice XF specimen retains most of its original design detail and the lightly abraded orange-gold surfaces show accents of rose, with many traces of mint luster. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU50
Lustrous, Colorful, and Lightly Abraded**

- 5436 1890-CC AU50 PCGS. Variety 1-A.** The vivid orange-gold surfaces of this attractive Carson City double eagle show a few accents of lilac and are remarkably free of serious abrasions. The well-detailed design elements exhibit just a trace of actual wear and vibrant mint luster adds to the considerable eye appeal. NGC ID# 26BY, PCGS# 9014

**1895 Twenty Dollar, MS64
Superior Color and Bright Mint Luster**

- 5437 1895 MS64 PCGS.** The 1895 is an excellent choice for the 19th century type collector, and this is an especially attractive near-Gem representative. The vibrantly lustrous yellow-gold surfaces show distinct purplish-pink overtones in the centers. PCGS has graded just two finer examples (8/13).
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 7876; *FUN Signature* (Heritage, 1/2008), lot 4892. NGC ID# 26CD, PCGS# 9027

- 5438 1896-S MS61 Prooflike NGC.** This prooflike example has strong eye appeal due to the bright, reflective surfaces. Rich gold color and a bold strike add to the attractiveness. Census: 27 in 61 Prooflike, 13 finer (8/13). PCGS# 79030

**1896-S Liberty Twenty, MS62 Prooflike
Only One Finer Prooflike Coin at NGC**

- 5439 1896-S MS62 Prooflike NGC.** The 1896-S Liberty double eagle boasts a large mintage of 1.4 million pieces, and many examples were saved as currency reserves or used in foreign trade to settle large accounts overseas. This remarkable MS62 specimen shows a number of minor contact marks on the lemon-yellow prooflike surfaces, probably acquired during storage in one bank vault or another. The design elements are well-detailed and prooflike specimens are seldom encountered. Census: 12 in 62 Prooflike, 1 finer (8/13). PCGS# 79030

- 5440 1897 MS64 PCGS.** A near-Gem example, this piece displays reddish-gold color and remarkably few abrasions for the issue as well as the type. In fact, there are no singularly mentionable distractions save for a shallow scrape in the upper left obverse field, and the surfaces are both lustrous and sharply impressed. Only 5 examples have been awarded higher numeric grades by PCGS (8/13).
Ex: *November Signature* (Heritage, 11/2003), lot 7904; *FUN Signature* (Heritage, 1/2008), lot 4902. NGC ID# 26CH, PCGS# 9031

- 5441 1898-S MS64 NGC. CAC.** Pleasing orange and green-gold colors provide this lustrous near-Gem example with nice eye appeal. Scattered areas of as-made struck-in grease are present. NGC ID# 26CL, PCGS# 9034

**1898-S Double Eagle, MS62 Prooflike
Unusual Mirrored Specimen**

- 5442 1898-S MS62 Prooflike NGC.** Although myriad surface marks explain the lower numerical grade of this example, the prooflike surfaces are highly unusual. Collectors seeking prooflike double eagles have only a few to choose from. This lovely honey-gold example has fully brilliant yellow luster with a splash of orange toning on the reverse. Census: 31 in 62 Prooflike, 16 finer (8/13). PCGS# 79034

- 5443 1903 MS64 Prooflike NGC.** A flashy and precisely struck butter-gold near-Gem. Faint marks are distributed. Much lower mintage than its 1904 successor. Census: 7 in 64 Prooflike, none finer (7/13).
Ex: *Dallas Signature* (Heritage, 10/2006), lot 3374, which realized \$2,530. PCGS# 79043

- 5444 1904 MS64 NGC.** Cartwheel luster and bright yellow-gold surfaces provide this near-Gem with a strong degree of eye appeal. Scattered abrasions held this well struck piece from a higher grade. NGC ID# 26CY, PCGS# 9045

5445 1904 MS64+ PCGS. CAC. Even a quick glance at this coin confirms the Plus designation, as this near-Gem displays a strong degree of eye appeal. Rich gold color, lustrous surfaces, and no abrasions of any significance are among the attributes this coin possesses. NGC ID# 26CY, PCGS# 9045

5446 1904 MS65 NGC. Apricot-gold and green-colors appear on this lovely Gem example displaying a sharp strike, providing this piece with an attractive appearance. The scattered marks are trivial. NGC ID# 26CY, PCGS# 9045

1904 Twenty Dollar, MS65+ Clearly Above-Average, Even for a Gem

5447 1904 MS65+ NGC. Clearly a step above even the "typical" Gem, as indicated by the Star designation, this apricot-gold 1904 double eagle has slightly richer apricot color on the reverse but a touch more reflectivity to the obverse luster. Lightly marked but a desirable coin for the type collector. NGC ID# 26CY, PCGS# 9045

5448 1904 MS62 Prooflike NGC. The lemon-yellow surfaces of this attractive double eagle show a scattering of minor grade-consistent contact marks, but the fields are brightly reflective and the design elements are sharply detailed. *From The Strawberry Fields Collection.* PCGS# 79045

5449 1904-S MS62 Prooflike NGC. A broadly reflective example of the Liberty double eagle issue with the second-highest mintage, behind only its Philadelphia counterpart. Well-defined devices and yellow-gold mirrors share in light to moderate abrasions. Census: 39 in 62 Prooflike, 27 finer (8/13). PCGS# 79046

5450 1904-S MS63 Prooflike NGC. Magnificent prooflike reflectivity enhances this bright yellow specimen. The stars lack complete definition of the centrils, but the central devices are sharp. Scattered abrasions are entirely trivial. Census: 24 in 63 Prooflike, 3 finer (8/13). PCGS# 79046

5451 1907 MS64 PCGS. Ample cartwheel luster has an undercurrent of reflectivity on the reverse. Striking details are generally crisp and flaws shallow, making for an appealing near-Gem. *From The Searight Collection.* NGC ID# 26D7, PCGS# 9052

1907-D Liberty Twenty, MS64+ Tremendous Visual Appeal

5452 1907-D MS64+ PCGS. CAC. Attractive orange-gold color with hints of red is one of the many attributes this high-end near-Gem possesses. Rich satin luster on the obverse along with strong cartwheel luster on the reverse adds to the eye appeal of this representative. The coin exhibits minimal abrasions, with none of the marks worthy of mention. NGC ID# 26D8, PCGS# 9053

PROOF LIBERTY DOUBLE EAGLE

Proof 1904 Double Eagle Only 89 Pieces Struck

5453 1904 PCGS Genuine. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this proof coin has the details of Uncirculated specimen that has altered surfaces. A mere 98 proofs were issued, and any survivor is desirable for its rarity alone. The present canary-gold specimen has attractive eye appeal. Rotation beneath a light reveals subtle color and texture changes on open portions of the fields. NGC ID# 26ES, PCGS# 9120

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Twenty, MS65 Great Color and Luster

5454 1907 Arabic Numerals MS65 PCGS. After several months of striking High Reliefs on hydraulic presses, Charles Barber reduced Saint-Gaudens' design so it would be practical for high-speed, one-pass coinage using a regular steam press. This lovely Gem example possesses pumpkin-gold color, rich mint luster, and a strong strike throughout. *From The Searight Collection.* NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Twenty, MS65 Popular Arabic Numerals Type

5455 1907 Arabic Numerals MS65 PCGS. Always in demand from type and date collectors alike, the 1907 Arabic Numerals double eagle represents the first year of Saint-Gaudens' classic design. This delightful Gem displays well-preserved reddish-gold surfaces with vibrant mint luster and well-detailed design elements. NGC ID# 26F5, PCGS# 9141

5456 1908 No Motto MS65 PCGS. Lustrous yellow-orange with a light layer of storage patina. A generally well-defined example of this popular type issue with generally modest abrasions. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Saint, MS66
Wells Fargo Hoard Specimen**

5457 1908 No Motto MS66 PCGS. Short Rays obverse. The discovery of the Wells Fargo Hoard and its marketing by Ron Gillio in the 1990s made the 1908 No Motto Saint-Gaudens double eagle one of the most available issues of the series. This well-detailed orange-gold specimen displays well-preserved surfaces and vibrant mint luster on both sides. Housed in a green label holder. NGC ID# 26F6, PCGS# 9142

5458 1908 No Motto MS66+ PCGS. Short Rays obverse. An outstanding apricot-gold and lime-green example of the briefly issued No Motto subtype. Lustrous and precisely impressed. The eye appeal is incontestable. NGC ID# 26F6, PCGS# 9142

5459 1908 No Motto, Wells Fargo Nevada MS66 NGC. Short Rays obverse. A Premium Gem from the famous “Wells Fargo” hoard that is the source of so many high grade No Motto type coins. Lightly patinated apricot-gold surfaces swirl with luster. PCGS# 99142

**1908 Motto Double Eagle, MS64
Deeply and Attractively Toned**

5460 1908 Motto MS64 PCGS. Unlike its No Motto counterpart (4.3 million coins produced), the 1908 Motto double eagle is a scarcer issue from a low mintage (156,000 pieces). The deep orange-gold and yellow-gold toning confirms the originality of this lustrous and boldly struck introductory year Motto twenty. A couple of minor marks are concealed on the eagle's breast. NGC ID# 26F8, PCGS# 9147

5461 1908-D Motto MS62 PCGS. Sun-gold surfaces are broadly lustrous with elements of orange. Generally well-struck, though flatness is noted on Liberty's raised knee. Housed in a green label holder. NGC ID# 26F9, PCGS# 9148

5462 1908-D Motto MS64 PCGS. Lightly patinated with a mix of yellow and apricot shadings. This near-Gem from the first year of the With Motto design has a small green dot at the upper part of Liberty's gown. *From The Searight Collection.* NGC ID# 26F9, PCGS# 9148

**1908-S Twenty, AU Details
Only 22,000 Pieces Struck**

5463 1908-S — Cleaning — PCGS Genuine. AU Details. The 1908-S twenty has remained a popular issue in the series for more than a century, primarily because of its remarkably low mintage of only 22,000 pieces. The cleaning was lightly done, and each side shows matte-like granularity. The surfaces are just a bit too bright to be natural; otherwise, there is just slight friction seen over the high points of the design.

5464 1909 MS63 PCGS. The vivid orange-gold surfaces of this attractive Select specimen display vibrant mint luster and a few hints of lilac. A scattering of minor contact marks is consistent with the grade. NGC ID# 26FB, PCGS# 9150

5465 1910 MS64 PCGS. Gleaming surfaces, with numerous intermingled shades of gold, yellow, and orange, provide this near-Gem with strong eye appeal. The design elements display a pleasing level of detail and there are no abrasions worthy of individual mention. NGC ID# 26FF, PCGS# 9154

5466 1910-D MS64 NGC. Pale yellow interiors shine within deeper sun-gold rims. A shallow luster scrape below Liberty's olive branch contributes to the MS64 designation. NGC ID# 26FG, PCGS# 9155

**1910-D Double Eagle, MS65+
Sought-After Early Mintmarked Issue**

5467 1910-D MS65+ NGC. The 1910-D and 1911-D double eagles are occasionally encountered in grades up to MS66, and as well-produced issues, they are highly sought by type collectors and gold specialists, especially those seeking mintmarked pieces. This MS65+ example shows the usual bold strike over relatively unmarked, even reddish-gold surfaces. Extremely attractive. NGC ID# 26FG, PCGS# 9155

**1911 Double Eagle, MS64
Low-Mintage Issue**

- 5468 1911 MS64 PCGS.** Intermingled shades of fiery-orange, bright golden-orange, and golden-yellow provide this near-Gem example with a strong degree of eye appeal. The design elements display a bold level of detail. The obverse in particular exhibits textured surfaces. A lovely coin. PCGS has awarded higher numeric grades to only 47 examples (8/13). NGC ID# 26FJ, PCGS# 9157

**1911 Twenty Dollar, MS64
Bright Red-Orange Color**

- 5469 1911 MS64 NGC.** The 1911 double eagle can be found in near-Gem grade, but NGC has seen fewer than five dozen submissions in MS65 and finer grades. This MS64 example offers bright reddish-orange color with excellent eye appeal and a bold strike, usual for the issue. Scattered small marks and luster grazes define the grade. NGC ID# 26FJ, PCGS# 9157

**1911 Double Eagle, MS64
Sharply Struck, Seldom Seen Finer**

- 5470 1911 MS64 NGC.** Deep orange-red color complements the well-struck surfaces on this near-Gem 1911 double eagle, an issue that is available in this grade but seldom seen in Gem grade. The full columns and dome of the Capitol building and full toes and sandal on Liberty are a few of the many fully struck details. Scattered marks are minor. NGC ID# 26FJ, PCGS# 9157

- 5471 1911-D MS65 PCGS Secure.** Accents of peach are present on this Gem displaying rich yellow-gold color. The design elements exhibit a bold degree of detail on this piece. Rich luster also adds to the eye appeal of this attractive example. A vertical hair thin mark appears in the left obverse field. NGC ID# 26FK, PCGS# 9158

**1911-S Saint-Gaudens Twenty, MS65
Rich Frosty Luster and Good Color**

- 5472 1911-S MS65 PCGS.** Liberty's face is particularly attractive on this Gem. The coin displays frosty luster and lovely yellow-gold color overall, with a few hints of peach and green-gold also present. Other than a mark on the reverse near the eagle's head, there are no marks worthy of mention. Only 29 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 26FL, PCGS# 9159

**1911-S Double Eagle, MS65
Difficult Any Finer**

- 5473 1911-S MS65 NGC.** An available date in lower grades, the 1911-S Saint-Gaudens double eagle is very difficult to locate above the Gem level. Sharply detailed in most areas, this impressive Gem shows just a touch of softness on the lower stars and the Capitol building. The remaining devices are boldly struck. Lustrous surfaces reveal just a few grade-consistent marks. NGC ID# 26FL, PCGS# 9159

**1914-D Twenty, MS65
Very Scarce in Finer Grades**

- 5474 1914-D MS65 PCGS.** From a nominal mintage of 453,000 pieces, the 1914-D Saint-Gaudens double eagle is an available issue in grades up to the MS65 level, but finer examples are very scarce. This impressive Gem is well-detailed, with lustrous yellow and rose-gold surfaces that show no mentionable signs of contact. NGC ID# 26FT, PCGS# 9165

5475 1914-S MS65 PCGS. Shades of yellow-gold, orange, and peach are present on this Gem displaying a pleasing level of design detail. Scattered marks appear as expected, but there is none worthy of mention. NGC ID# 26FU, PCGS# 9166

5476 1915-S MS65 PCGS. This Gem comes from the sole double eagle issue in which it was not the highest-denomination coin put out at its Mint that year. (The Panama-Pacific fifty dollar coins, though not circulating, had higher face values.) Soft yellow-orange luster lends the piece understated eye appeal. NGC ID# 26FW, PCGS# 9168

5477 1915-S MS65 PCGS. A well struck example, this Gem reveals attractive shades of yellow-gold, orange-gold, and green-gold. Lustrous surfaces add to the eye appeal. A small mark in the obverse field to the right of Liberty's face poses minimal distraction, if any. NGC ID# 26FW, PCGS# 9168

1920 Double Eagle, MS64 Only Seven Numerically Finer at NGC

5478 1920 MS64 NGC. Lustrous yellow-gold surfaces provide this near-Gem with a strong degree of eye appeal. The design elements display a pleasing level of detail on this coin. A few thin, wispy die cracks are present at the upper obverse. The 1920 double eagle had a low mintage of just 228,250 coins, and surviving examples are rare in top grades. NGC ID# 26FY, PCGS# 9170

5479 1922 MS64 PCGS. CAC. Shimmering, lustrous surfaces and rich yellow-gold color produce strong eye appeal for this near-Gem. Minor incompleteness of strike is noted. A tiny alloy spot appears within the rays above the Capitol building. NGC ID# 26G3, PCGS# 9173

1922 Saint-Gaudens Double Eagle, MS65 Excellent Eye Appeal

5480 1922 MS65 PCGS. The 1922 and 1923 Philadelphia double eagle issues are comparatively scarce in Gem. This lovely MS65 example displays deep peach toning along with a blush or two of gunmetal-blue on each side. PCGS has awarded higher numeric grades to a mere 8 examples (8/13). NGC ID# 26G3, PCGS# 9173

1922 Saint-Gaudens Twenty, MS65 Condition Rarity in Higher Grades

5481 1922 MS65 PCGS. This attractive Gem is yellow-gold overall, with areas of peach and green-gold also appearing. Frosty luster and a pleasing strike add to the appeal of this piece. A small streak of as-made struck-in grease is present on the obverse near 3 o'clock. Few examples have achieved higher numeric grades, with PCGS and NGC combined having only assigned higher grades to 15 pieces (8/13). NGC ID# 26G3, PCGS# 9173

5482 1923-D MS66 PCGS. This amply lustrous Premium Gem is apricot-gold at the margins with lightening of color towards the interior. A few small marks below Liberty's flowing hair are the only significant barriers to an even finer grade. *From The Searight Collection.* NGC ID# 26G6, PCGS# 9176

5483 1923-D MS66 PCGS. A pleasing strike along with honey-gold color and peach accents are among the attributes of this lustrous Premium Gem representative. A small area of as-made struck-in grease appears near the hand holding the torch. Relatively few abrasions are present, none of them worthy of mention. NGC ID# 26G6, PCGS# 9176

5484 1925 MS66 NGC. Peach and yellow-gold colors, rich luster, and a strong strike provide this minimally abraded Premium Gem piece with a strong degree of visual appeal. Only 20 examples have achieved higher numeric grades from NGC (8/13). NGC ID# 26GA, PCGS# 9180

5485 1925 MS66 PCGS. The 1925 Saint-Gaudens double eagle is not difficult to locate in high grade, but few examples are found in grades above MS66, with PCGS having awarded higher numeric grades to 5 examples (8/13). Vibrant orange-gold color and rich luster provide this Premium Gem representative with strong visual appeal. Scattered marks are present. NGC ID# 26GA, PCGS# 9180

5486 1926 MS65 PCGS. Yellow-to-orange luster shines under a gauzy layer of patina. A few small, stuttering marks in the obverse fields define the Gem grade. NGC ID# 26GD, PCGS# 9183

5487 1927 MS65 PCGS. A sharply struck Gem representative, this piece displays rich and frosty yellow-gold luster, with hints of peach and rose on the reverse. Both sides have uniform color and excellent appeal. *Ex: Long Beach Signature (Heritage, 9/2004), lot 8156.* NGC ID# 26GG, PCGS# 9186

5488 1927 MS65+ PCGS. This Gem is certainly deserving of the Plus designation, as the eye appeal of this coin is outstanding. Rich luster and butter-gold color, along with hints of peach and orange, are among the attributes that make this coin so pleasing. Small, scattered marks held this piece from a higher grade. NGC ID# 26GG, PCGS# 9186

**1927 Double Eagle, MS66
Rarely Finer**

5489 1927 MS66 PCGS. CAC. An impressive Premium Gem with bold design motifs and scintillating yellow-gold luster. The frosty surfaces show few marks of note, with beautiful honey-gold overtones. A few insignificant copper toning spots are evident on the obverse. PCGS has only certified 14 finer examples (8/13). NGC ID# 26GG, PCGS# 9186

5490 1928 MS65+ ★ NGC. CAC. The grade of this high mintage double eagle possesses all three attributes currently in demand: a Plus, a Star, and a CAC seal. The peach-gold toning is rich on the reverse and subtle on the obverse. Highly lustrous and precisely struck with smooth fields and minor contact on Liberty. NGC ID# 26GK, PCGS# 9189

S.S.C.A. RELIC GOLD MEDAL

**2008 'Humbert \$50 Commemorative'
Struck from Kellogg & Humbert Ingots
Recovered From the S.S. *Central America***

5491 2008 "Humbert \$50 Commemorative" Gem Proof NGC. #5 of 375 struck. This relic medal was struck on September 12, 2008, using bullion from two Kellogg & Humbert gold ingots (#830 & #555) recovered from the S.S. *Central America* shipwreck. The design closely imitates the Kagin-11 1852 Humbert fifty, aside from a four-line inscription within a rectangular area of the reverse, reminiscent of the Kagin-10 Humbert ten. Housed in a presentation box with glass frame. PCGS# 10361

CALIFORNIA FRACTIONAL GOLD

**1854 Liberty Octagonal 25 Cents, MS67
BG-105, None Finer at NGC**

5492 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS67 NGC. The deeply reflective surfaces of this delightful Superb Gem display a vivid mix of orange-gold, crimson, and lilac patina, with no visible impairments. The well-detailed design elements add to the strong visual appeal. This issue was coined by Frontier to replace the scarcer BG-104. Census: 1 in 67, 0 finer (8/13). PCGS# 10374

5493 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS61 PCGS. Housed in a green-label PCGS holder, this early California gold dollar has light yellow surfaces with satin luster. Minor surface marks prevent a higher grade. PCGS# 10507

5494 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 NGC. A pristine canary-gold Superb Gem that boasts a sharp strike and outstanding eye appeal. Frontier, Deviercy & Co. were the makers for this run of Liberty heads (BG-701 through BG-720). Census: 4 in 67, 5 in 67 Prooflike, none finer (8/13). PCGS# 10544

5495 1870 Liberty Octagonal 25 Cents, BG-759, R.4, MS64 Deep Prooflike NGC. Pale yellow-gold surfaces are intensely reflective. As is usually seen, the reverse shows striking weakness on the wreath, but the overall eye appeal is high. PCGS# 910586

**1872 Indian Octagonal 25 Cents, MS67
BG-791, Finest Known Example**

5496 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS67 NGC. The design elements of this spectacular Superb Gem are unusually sharp, even on the central reverse. The well-preserved surfaces exhibit prooflike reflectivity throughout, with bright yellow-gold color and no visible surface flaws. This coin is the finest certified specimen at either of the leading grading services. Census: 1 in 67, 0 finer (8/13). PCGS# 10618

5497 1852 Indian Octagonal 25 Cents, BG-799U, High R.5, MS65 NGC. A lovely sun-gold representative of this challenging octagonal quarter variety. The fields are flashy and the strike is slightly soft at the reverse center. The reverse displays several "ghosts" of the reverse stars, caused by metal flow to the obverse during the strike. Census: 2 in 65, 1 finer (8/13). PCGS# 10647

5498 1872 Liberty Round 25 Cents, BG-814, High R.5, MS66 Prooflike NGC. An impressive Premium Gem, this diminutive gold piece has extraordinary contrast between the lustrous devices and fully mirrored fields. Heavy circular lathe lines on both sides remain from the die manufacturing process. Census: 1 in 66 Prooflike, 0 finer (8/13). PCGS# 710675

5499 1876 Indian Round 25 Cents, BG-852, High R.5, MS64+ PCGS. Although just missing the Gem level, this Choice Mint State piece has extraordinary eye appeal with prooflike fields and excellent contrast. Population: 12 in 64+, 0 finer (8/13). PCGS# 10713

5500 1881 Indian Round 25 Cents, BG-886, High R.5, MS66 Prooflike NGC. Well-contrasted with a touch of green to the gold. The reverse is rotated nearly 90 degrees counterclockwise from "coin turn" on this Premium Gem. PCGS# 710747

5501 1873 Liberty Octagonal 50 Cents, BG-915, Low R.4, MS66 NGC. A flashy butter-gold Premium Gem. Undisturbed by contact, and the strike is precise except on the F in HALF and the A in DOLLAR. Census: 8 in 66, 2 in 66 Prooflike, 1 finer (8/13). PCGS# 10773

5502 1870 Liberty Octagonal 50 Cents, BG-922, R.3, MS64 Deep Prooflike NGC. Pale yellow surfaces sport fabulous mirrors. Only a few wispy abrasions, not visible at arm's length, preclude a Gem grade. PCGS# 910780

1876 Indian Octagonal 50 Cents, MS66 Prooflike BG-949 Example

5503 1876 Indian Octagonal 50 Cents, BG-949, R.4, MS66 Prooflike NGC. BG-949 features a small date and was coined for sale as souvenirs to visitors of California, as indicated by the CAL notation on the reverse. Similar pieces (BG-953) were struck for sale outside of California, without the CAL notation. The deeply mirrored fields contrast boldly with the sharply detailed design elements, creating outstanding eye appeal. Census: 1 in 66 Prooflike, 0 finer (8/13). PCGS# 710807

5504 1881 Indian Round 50 Cents, BG-1070, R.5, MS64 Prooflike NGC. Lightly frosted on the devices with excellent mirror-fields in pale yellow. An attractive near-Gem example struck from dies 90 degrees clockwise past coin turn. PCGS# 710899

1860 Liberty Octagonal Dollar, MS64 Scarce BG-1102

5505 1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS64 PCGS. The 1860 Liberty octagonal dollar were struck by Frontier, Deviercy & Company. This attractive Choice specimen features unusually prooflike greenish-gold surfaces, with hints of orange and blue. The design elements are well-detailed and some die striations and minor planchet roughness shows under magnification. PCGS# 10913

5506 1871 Liberty Octagonal 1 Dollar, BG-1104, High R.4, MS63 NGC. The obverse shows considerable strike weakness at the top of the head. The fields are prooflike around lightly frosted devices with attractive honey-gold surfaces. A few peripheral laminations are noted. Census: 3 in 63, 0 finer (8/13). PCGS# 10915

1875 Octagonal Indian Dollar, BG-1126, MS64 Rare Deep Prooflike Example

5507 1875 Indian Octagonal 1 Dollar, BG-1126, R.5, MS64 Deep Prooflike NGC. The sharply detailed design elements of this spectacular Choice specimen contrast profoundly with the incredible mirrored fields. An interesting network of spidery die cracks is visible under magnification on the central reverse. Eye appeal is terrific. Census: 2 in 64 Deep Mirror Prooflike, 1 finer (8/13). PCGS# 910937

MORGAN DOLLARS

- 5508 1878 8TF MS65 PCGS.** Vibrant cartwheel mint luster mixes with areas of prooflike reflectivity on the well-preserved surfaces of this sharply detailed Gem. PCGS has graded 37 numerically finer examples (8/13). NGC ID# 253H, PCGS# 7072
- 5509 1878 8TF MS65 PCGS. VAM-16.** Deep cobalt-blue and tobacco-brown dominate the obverse. The reverse is mostly golden-brown though the left margin displays lavender and navy-blue patina. Lustrous and nicely struck with smooth fields and minor contact on the portrait. NGC ID# 253H, PCGS# 7072
- 5510 1878 7TF Reverse of 1878 MS65 PCGS. VAM-83. LIBERTY** is die doubled on this Long Nock variety. Rich cherry-red, jade-green, and peach-gold toning encompasses this lustrous Second Reverse Morgan dollar. Only faint abrasions are detected beneath the multicolor toning. NGC ID# 253K, PCGS# 7074
- 5511 1878 7TF Reverse of 1878 MS65 PCGS.** The reverse of this Gem in particular displays strong cartwheel luster. A bold strike and virtually untuned surfaces are additional attributes of this lovely Morgan. Only 27 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 253K, PCGS# 7074
- 5512 1878 7TF Reverse of 1878 MS65 NGC.** The famous 7 tailfeathers design, from the first year of Morgan silver dollar coinage. The parallel arrow feather indicates the scarcer Reverse of 1878. This delightful Gem displays vibrant mint luster and sharply detailed design elements throughout. NGC ID# 253K, PCGS# 7074
- 5513 1878 7TF Reverse of 1878 MS65 NGC.** A lovely Gem with frosty luster and excellent eye appeal, this sharply struck specimen has brilliant and mostly untuned silver surfaces. A small splash of violet and blue appears to the right of the date. Only 25 finer have been examined by NGC (8/13). NGC ID# 253K, PCGS# 7074
- 5514 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** The obverse displays colorful toning on this Gem, while the reverse remains almost entirely stone-white. The toning includes shades of yellow, gold, orange, sea-green, jade, fuchsia, and violet. The obverse also includes a number of dark gray flyspecks. The coin is well struck and lustrous. Scattered marks are present. Only 27 examples have been awarded higher numeric grades by PCGS (8/13). *From The Strawberry Fields Collection.* NGC ID# 253K, PCGS# 7074
- 5515 1878 7TF Reverse of 1878 MS65+ PCGS. CAC.** This Gem Plus example of the Flat Breast Reverse is richly toned on each side with reddish interiors that are surrounded by a ring of bright blue at the margins. Full definition is seen in the centers. *From The Strawberry Fields Collection.* NGC ID# 253K, PCGS# 7074
- 5516 1878 7TF Reverse of 1878, VAM-33 MS64 Deep Mirror Prooflike ANACS.** Teal, golden-orange, and grape colors appear along the peripheries of this near-Gem representative. Areas of golden toning are also present at portions of the devices. The toning serves to accent the deeply frosted devices and reflective fields, providing even greater visual appeal. These coins are conditionally scarce above the MS64 level. Housed in a small format holder. NGC ID# 253K, PCGS# 97075
- 5517 1878 7TF Reverse of 1879 MS65 PCGS.** Cartwheel luster on both sides provides this colorful piece with a pleasing appearance. The patina includes shades of teal, plum, russet, lemon-yellow, and lime-green. This Gem exhibits a sharp strike. PCGS has awarded higher numeric grades to only 13 examples (8/13). NGC ID# 253L, PCGS# 7076
- 5518 1878 7TF Reverse of 1879 MS65 PCGS.** A large swath of attractive multicolored toning is present on the upper part of the obverse, providing this Gem with strong eye appeal. The colors include mint-green, lemon-yellow, red-pink, and jade. The rest of the coin reveals scattered areas of light toning. The centers exhibit minor incompleteness of strike. Only 13 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 253L, PCGS# 7076
- 5519 1878 7TF Reverse of 1879 MS65 PCGS.** A pleasing Gem, this piece is virtually untuned, displaying lustrous surfaces. The design elements exhibit a strong degree of detail except at the extreme centers. Survivors are conditionally scarce beyond the Gem level, with both PCGS and NGC combined having graded only 18 examples at the MS66 level, with none finer (8/13). NGC ID# 253L, PCGS# 7076
- 5520 1878-CC MS65 PCGS.** Bright multi-colored toning and cartwheel luster add to the eye appeal of this Gem. The patina includes hues of apple-green, cherry-red, and russet. The coin displays a well-executed strike. A number of small contact marks are present on Liberty's face. NGC ID# 253M, PCGS# 7080
- 5521 1878-CC MS65 NGC.** Potent cartwheel luster is among the attributes this Gem possesses. The centers are virtually free of toning, while the extreme outer edges reveal shades of yellow-gold, russet, and teal on the obverse and primarily golden-orange on the reverse. Both sides reveal a strong degree of design detail. A few tiny spots are present, including one near Liberty's ear. NGC ID# 253M, PCGS# 7080
- 5522 1878-CC MS65 NGC.** This all-brilliant first-year CC dollar is fully defined in the centers, as usually seen. The surfaces are brightly lustrous and there is just the slightest glimmer of semireflectivity present in the fields. NGC ID# 253M, PCGS# 7080
- 5523 1878-CC MS65 PCGS.** This first-year Carson City Morgan is fully struck, as always seen, with the usual strong mint luster and absence of abrasions. A worthy candidate for type. NGC ID# 253M, PCGS# 7080
- 5524 1878-CC MS65 PCGS.** A lovely, virtually untuned example, this Gem displays scattered flyspecks of dark gray color. Both sides exhibit strongly detailed design elements. A few scattered marks and grazes are present, as expected at this grade level, but they are minor and none is distracting. NGC ID# 253M, PCGS# 7080
- 5525 1878-CC MS65 PCGS.** Despite rich toning on both sides, this Gem retains cartwheel luster on the reverse. Deep shades of olive-green, jade-green, rose, and red-brown are present. The coin exhibits a strong strike. Although the face reveals scattered abrasions when examined closely, the marks pose little or no distraction due to the toning. NGC ID# 253M, PCGS# 7080
- 5526 1878-CC MS65 PCGS. CAC.** A beautifully struck example displaying a strong level of detail, this Gem retains areas of reflectivity through the light patina. The majority of the toning on the obverse is confined to the outer edges. The color is more widely distributed on the reverse. Shades of gold and golden-brown are predominant, with hues of teal and plum also appearing. Faint roller marks are present on both sides along with minor abrasions. NGC ID# 253M, PCGS# 7080

**1879-CC Dollar, MS65+
Sharply Struck**

- 5527 1878-CC MS65+ PCGS. CAC.** All were struck with the Reverse of 1878, Parallel Arrow Feathers. The design elements are sharply struck, including strong definition in the hair over Liberty's ear. The essentially color-free surfaces display strong field-device contrast and are quite well-preserved. NGC ID# 253M, PCGS# 7080

**1878-CC VAM-11 Dollar, MS65 Prooflike
'Lines in Eagle's Wing' Variety**

- 5528 1878-CC MS65 Prooflike NGC. VAM-11, R.5.** A Top 100 Variety, certified as "Vam-11 Wing Lines" on the NGC insert. The popular "Lines in Eagle's Wing" VAM, is rated rare or R.5 by VAMWorld.com. This untoned Gem offers clearly reflective fields, and both sides exhibit moderate white-on-black contrast. The devices are well-struck aside from blending on the eagle's claws. Ex: *Houston Signature* (Heritage, 12/2009), lot 975. NGC ID# 253M, PCGS# 7081

- 5529 1878-CC MS63 Deep Mirror Prooflike NGC.** This lovely Choice example is untuned aside from areas of light gold toning at the outer edges and a few tiny gray spots. The frosty devices provide a strong level of contrast to the flashy reflective fields, adding to the eye appeal. NGC ID# 253M, PCGS# 97081

- 5530 1878-CC MS63 Deep Mirror Prooflike PCGS.** Dazzling field reflectivity, richly frosted devices, and an exemplary strike are attributes of this desirable Carson City Gem. The brilliant, untuned surfaces add to the eye appeal of this appealing Select example. NGC ID# 253M, PCGS# 97081

- 5531 1878-CC MS63 Deep Mirror Prooflike PCGS. CAC.** This first-year Morgan dollar exhibits sharply detailed frosty devices that contrast boldly with the mirrored prooflike fields. A scattering of minor hairlines and contact marks are evident on the surfaces. NGC ID# 253M, PCGS# 97081

- 5532 1878-S MS66 PCGS.** A beautifully struck example, this Premium Gem reveals sharp design definition and is virtually untuned. The coin remains brilliant and lustrous. PCGS has awarded higher numeric grades to only 21 examples (8/13). NGC ID# 253R, PCGS# 7082

- 5533 1878-S MS66+ PCGS. CAC.** The 1878-S Morgan dollar is far more elusive in the MS66 grade level than its 1879-S through 1882-S, by many multiples. The Plus grade of this piece sets it further apart, where it joins 19 other submissions in MS66+ with 21 finer (8/13). This is a great-looking, frosty, untuned coin with a good strike overall and minimal contact; a few light roller marks appear on the lower cheek, as made. NGC ID# 253R, PCGS# 7082

- 5534 1878-S MS66+ PCGS. CAC.** Multicolored toning is present on this high-end Premium Gem. The colors include vibrant orange, russet, plum-brown, sea-green, teal, cherry-red, and plum. The design elements display a bold level of detail, adding to the eye appeal. LIBERTY is die doubled south and the R in TRUST is broken. Population: 20 in 66+, 21 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 253R, PCGS# 7082

**1878-S Morgan, MS65 Deep Mirror Prooflike
First-Year 'Short Nock' Subtype**

- 5535 1878-S MS65 Deep Mirror Prooflike NGC.** A nearly brilliant Gem with profoundly reflective fields and a needle-sharp strike. This first-year San Francisco Morgan lacks consequential marks, which ensures its eye appeal. From the Short Nock reverse subtype. Census: 26 in 65 Deep Mirror Prooflike, 3 finer (8/13). Ex: *Baltimore ANA Signature* (Heritage, 8/2008), lot 2277. NGC ID# 253R, PCGS# 97083

- 5536 1879 MS65 PCGS. CAC.** While the reverse remains virtually free of toning aside from the extreme outer edges, the obverse of this Gem reveals numerous colors. The hues include copper-gold, fuchsia, jade-green, teal, and bright purple. The coin is well struck, even at the centers. The obverse reveals scattered marks. NGC ID# 253S, PCGS# 7084

- 5537 1879 MS66 PCGS.** This lovely Premium Gem remains virtually untuned, with only a few scattered areas of light color present. An attractive coin, this piece exhibits a strong strike and minimal abrasions, all minor. Housed in a green label holder. PCGS has awarded a higher numeric grade to a single example (8/13). NGC ID# 253S, PCGS# 7084

- 5538 1879 MS66 PCGS.** This delightful Premium Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show a few hints of golden-tan toning. NGC ID# 253S, PCGS# 7084

- 5539 1879-CC XF45 NGC.** A lightly worn example of this more challenging Morgan dollar issue, silver-gray in the centers with dusky peach at parts of the margins. The reverse shows clear evidence of clashing. NGC ID# 253T, PCGS# 7086

- 5540 1879-CC Capped Die AU58 NGC. VAM-3.** A Top 100 Variety. The obverse shows recutting on the date, discovered by Leroy Van Allen in 1965, and the reverse, with the remnants of the smaller CC under the primary mintmark, was discovered by Art Kagin in 1962. This near-Mint example is lightly abraded, with shades of gray and amber toning. NGC ID# 253T, PCGS# 7088

- 5541 1879-CC Capped Die AU58 NGC. VAM-3.** A Top 100 Variety. The date shows recutting and the remains of an undertype CC shows beneath the primary mintmark. This lightly circulated specimen shows traces of mint luster and pleasing gray toning. NGC ID# 253T, PCGS# 7088

- 5542 1879-CC Capped Die AU58 NGC. VAM-3.** A Top 100 Variety. The remnants of the undertype CC are plainly visible beneath the primary mintmark. The lustrous, lightly abraded surfaces show a few hints of gold, gray, and lavender toning. NGC ID# 253T, PCGS# 7088

- 5543 1879-O MS64+ PCGS. CAC.** A high-end Choice example of this popular New Orleans issue, with well-detailed design elements and vibrant frosty mint luster. The well-preserved surfaces show a few hints of golden-tan toning. NGC ID# 253V, PCGS# 7090

**1879-O Morgan Dollar, Gem
Condition Rarity, Few Finer**

- 5544 1879-O MS65 PCGS.** The 1879-O Morgan is popular with collectors as the inaugural O-mint issue of the type after a 19-year hiatus in the production of Silver Dollars. A bright and appealing Gem representative, this Morgan dollar exhibits a sharp strike. Other than a few small splashes of golden-yellow color in the right obverse field, this piece is virtually untoned. PCGS has awarded higher numeric grades to a mere 14 examples (8/13). NGC ID# 253V, PCGS# 7090

**1879-O Dollar, MS65+
Only 14 Finer at PCGS**

- 5545 1879-O MS65+ PCGS.** The 1879-O dollar can be obtained with minimal difficulty through near-Gem. The population declines in MS65, and finer specimens are elusive. This high-end Gem offering is one of just eight so-graded by PCGS, with 14 pieces finer (all MS66). Lustrous surfaces are essentially color-free on the obverse, while the reverse assumes medium intensity hues of russet-gold, blue-green, and whispers of gold-orange and bright rose. The design elements are generally well brought up, including partial definition on the hair over Liberty's ear. A few light scuffs prevent MS66, but both sides are better preserved than typical of this issue. NGC ID# 253V, PCGS# 7090

**1879-O Dollar, MS65
Above-Average Eye Appeal**

- 5546 1879-O MS65 PCGS. CAC.** The 1879-O Morgan dollar is plentiful through the near-Gem level of preservation, but the issue becomes scarce at the MS65 level. Indeed, MS65 is the highest grade that is likely to be encountered by collectors; only about 20 finer examples have been certified by PCGS and NGC combined, and a number of these are likely resubmitted coins. The Gem in this lot displays pleasing luster on silver-gray surfaces. Moreover, it is better struck than ordinarily seen. The centers, usually weak, exhibit a modicum of detail, and neither side reveals bagmarks, a major problem with this issue, yielding above-average eye appeal. NGC ID# 253V, PCGS# 7090

**1879-O Morgan Dollar, MS65
Gorgeous Multicolor Toning**

- 5547 1879-O MS65 PCGS. CAC.** Although the obverse of this piece has plenty of eye appeal, the reverse displays tremendous visual appeal due to the rich colorful toning and potent cartwheel luster. The reverse toning includes shades of sea-green, teal, denim-blue, violet, plum, copper, and orange. The obverse is largely covered in vibrant golden-orange toning. The centers exhibit a minor incompleteness of strike. A few scattered marks are present, including a small area on Liberty's nose. PCGS has awarded higher numeric grades to a mere 14 examples (8/13). NGC ID# 253V, PCGS# 7090

- 5548 1879-S Reverse of 1878 MS63 Prooflike PCGS.** A Top 100 Variety. A second-type reverse paired with a second-year obverse is the essence of this San Francisco variety. Appreciably reflective surfaces show light to moderate gray patina, while the frosted devices show abrasions, most notably on the portrait's cheek. NGC ID# 253W, PCGS# 7095

- 5549 1879-S MS65 ★ NGC. CAC.** The reverse of this boldly struck Morgan displays vivid toning, providing exceptional eye appeal and earning it the star designation. The reverse is flashy, with strong cartwheel luster present. The toning includes vivid shades of turquoise, fuchsia, yellow-gold, orange, denim-blue, violet, plum, and light green. Large areas of golden-brown color appear on the obverse. Scattered abrasions are present, including a few marks above the eagle's head. NGC ID# 253X, PCGS# 7092

- 5550 1879-S MS67 PCGS.** Shimmering, virtually untoned surfaces and cartwheel luster are among the attributes this coin possesses. Further positives include a strong strike and very few abrasions, all minuscule. Housed in an old green label holder. NGC ID# 253X, PCGS# 7092

- 5551 1879-S MS67 ★ NGC.** Dramatic arcs of cherry-red, lemon-yellow, powder-blue, and forest-green dominate the right reverse of this lustrous and well struck Superb Gem. The obverse field is virtually pristine, and the reverse displays only unobtrusive marks.
Ex: FUN Signature (Heritage, 1/2006), lot 6345; Los Angeles Signature (Heritage, 8/2009), lot 8276; Central States Rosemont Signature (Heritage, 4/2011), lot 5618, which realized \$1,035. NGC ID# 253X, PCGS# 7092

- 5552 1879-S MS67+ PCGS. CAC.** Even a quick glance at this beauty confirms the plus designation. This high-end Superb Gem has a cameo-like appearance with lightly frosted devices and reflective fields. Brilliant untuned surfaces and well struck design elements further add to the eye appeal. Other than a vertical hair thin mark on the reverse that extends from the second T in STATES, there are no mentionable marks. Population: 30 in 67+, 87 finer (8/13). NGC ID# 253X, PCGS# 7092

- 5553 1879-S MS67 Prooflike PCGS.** Pronounced contrast between the richly frosted devices and the reflective fields provides this well struck, beautifully preserved Superb Gem representative with strong visual appeal. Population: 47 in 67 (3 in 67+) Prooflike, 2 finer (8/13). NGC ID# 253X, PCGS# 7093

- 5554 1879-S MS67 Prooflike NGC.** This magnificent Superb Gem exhibits reflective fields, a bold strike, and peripheral pale gold toning. Aside from a mark on the eagle's left wing, there are few signs of contact. Census: 63 in 67 Prooflike, 4 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2010), lot 4449. NGC ID# 253X, PCGS# 7093

5555 1880 MS66 PCGS. Brilliant untuned surfaces and a well executed strike provide this Premium Gem with a high degree of eye appeal. Rich cartwheel luster is an additional attribute of this piece. PCGS has not awarded a higher numeric grade to a single example (8/13). NGC ID# 253Y, PCGS# 7096

5556 1880 MS66 PCGS. CAC. Flashy multicolored iridescent toning covers each side and is enlivened by strong mint luster. Just slightly soft in the centers. This is an overlooked early P-mint that is generally not available in high grades. NGC ID# 253Y, PCGS# 7096

5557 1880 MS66 PCGS. CAC. Although this Premium Gem possesses a number of attributes, chief among them has to be the gorgeous toning. The colors include golden-orange, rose-orange, frosty pastel yellow, pastel green, and pink on the obverse. The reverse is arguably even more attractive, with shades of fiery-orange, golden-red, yellow, green, aquamarine, teal, and plum. Cartwheel luster and boldly struck design elements add to the eye appeal. An as-made strike-through is present at Liberty's chin. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (8/13). NGC ID# 253Y, PCGS# 7096

1880 Morgan Silver Dollar, MS66 Prooflike Brilliant Untoned Surfaces

5558 1880 MS66 Prooflike NGC. The 1880 Morgan comes from a generous mintage of 12,600,000 pieces and is readily obtainable in the better Mint State grades. Prooflike examples can be located through near-Gem without too much trouble, but higher-grade specimens are elusive. This Premium Gem piece displays bright virtually untuned surfaces and reveals a strong strike. A few minor grazes and marks are present. Census: 6 in 66 Prooflike, 0 finer (8/13). NGC ID# 253Y, PCGS# 7097

5559 1880-CC MS65 NGC. Both sides of this Gem remain largely brilliant and untuned. The obverse displays a crescent of color at left. The colors include intermingled shades of forest-green, red, and golden-brown. The reverse exhibits a smaller area of toning in the same colors, though somewhat subdued. The coin is well struck. A small dark spot is present on the bridge of Liberty's nose. From *The Joan Carroll Collection*. NGC ID# 2542, PCGS# 7100

5560 1880-CC MS65 NGC. The thick cartwheel luster seen on this coin is commonly found on CC products. Each side is brilliant and there are no mentionable impairments (of course). Fully struck in the centers. NGC ID# 2542, PCGS# 7100

5561 1880-CC MS65 PCGS. Rich frosty luster adds to the visual appeal of this virtually untuned Gem displaying a pleasing degree of design detail. Faint roller marks appear at the centers on both sides, but pose little distraction. NGC ID# 2542, PCGS# 7100

5562 1880-CC MS65 PCGS. VAM-3A. A Super CD VAM. The dies are strongly clashed. A highly lustrous and minimally toned with exemplary preservation. A couple of strike-throughs bookend the upper left wreath end. NGC ID# 2542, PCGS# 7100

5563 1880-CC MS65 NGC. Brilliant virtually untuned surfaces and rich satin luster provide this Gem survivor with a high degree of visual appeal. Other than minor incompleteness at the centers, this coin exhibits a sharp strike. NGC ID# 2542, PCGS# 7100

5564 1880-CC MS65 PCGS. An exquisite Carson City Gem that boasts smooth surfaces, dappled autumn-gold toning, a crisp strike, and vibrant cartwheel sheen. Housed in an old green label holder. NGC ID# 2542, PCGS# 7100

5565 1880-CC MS65 PCGS. Scattered areas of faint toning appear on this brilliant Gem, with portions of the devices revealing a frosted appearance. The luster is strong and the coin exhibits a sharp strike, even at the centers. NGC ID# 2542, PCGS# 7100

5566 1880-CC MS66 PCGS. The obverse of this Premium Gem reveals intermingled shades of gold, tan, gray-blue, sea-green, and yellow-gold. The reverse exhibits a faint gold patina. Rich luster is also present, adding to the visual appeal of this lovely Morgan dollar. PCGS has awarded higher numeric grades to only 28 examples (8/13). NGC ID# 2542, PCGS# 7100

5567 1880-CC MS66 PCGS. A lustrous Premium Gem example, this attractive piece is virtually untuned. The strike is pleasing, with minor incompleteness at the centers. The reverse exhibits minor clash marks and areas of strike-throughs. PCGS has awarded higher numeric grades to only 28 examples (8/13). NGC ID# 2542, PCGS# 7100

5568 1880-CC MS66 PCGS. This Superb Gem remains brilliant overall, with scattered spots of gray appearing on both sides of this coin, with a slightly dusky obverse. A pleasing level of design detail is present, with only minor incompleteness at the centers. NGC ID# 2542, PCGS# 7100

1880-CC Morgan, MS66+ Untuned and Appealing

5569 1880-CC MS66+ PCGS. Liberty's cheek is extremely smooth and clean on this high-end Premium Gem, a coin with untuned surfaces and loads of eye appeal. Fans of the Morgan dollar series will look far and wide to find a nicer example of this somewhat better Carson City issue. Some strike weakness appears on the hair over the ear. Population: 48 in 66+, 28 finer (8/13). NGC ID# 2542, PCGS# 7100

5570 1880-CC MS66 PCGS. CAC. A pleasing Premium Gem Morgan, this piece displays cartwheel luster and rich stone-white surfaces. Only minor incompleteness of strike is present at the centers. Minor clash marks are present. Ex: *ANA Fort Worth Signature (Heritage, 3/2010)*, lot 1330. NGC ID# 2542, PCGS# 7100

5571 1880-CC MS66 PCGS. CAC. Attractive toning appears on the obverse of this Premium Gem. The colors include shades of golden-orange, teal, and plum. The reverse is only lightly toned. Both sides reveal a strong strike. Only 28 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 2542, PCGS# 7100

5572 1880-CC MS64 Deep Mirror Prooflike ANACS. Pronounced contrast exists between the frosted devices and the reflective fields providing this near-Gem example with an attractive appearance. Boldly detailed design elements are another attribute, with minor incompleteness present only at the extreme centers. Small areas of toning appear at the outer edges and include shades of gold, plum, denim-blue, and teal. Minor marks and grazes are noted, including several on Liberty's face and neck. Housed in a small format holder. Ex: *Santa Clara Signature (Heritage, 11/2002)*, lot 6462. NGC ID# 2542, PCGS# 97101

5573 1880-CC 8 Over High 7 MS65+ PCGS. VAM-5. A Top 100 Variety. Pleasingly preserved even by Gem standards and a couple of reed marks on the chin away from an even finer designation. Dotted reddish-tan and slate border toning yields to silver interiors. PCGS# 7102

5574 1880-CC 8 Over High 7 MS65 PCGS. CAC. VAM-5. A Top 100 Variety. The overdate and VAM are unlisted on the insert of the old green label holder. Magnificent cartwheel reflectivity complements the powerfully struck design elements. Traces of straw-gold toning visits lightly marked surfaces.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 9391, which realized \$1,150. PCGS# 7102

5575 1880-CC 8 Over High 7 MS66 NGC. VAM-5. A Top 100 Variety. Among the most obvious overdates in the series, with the shape of the 7 unmistakable above, below, inside, and over the second 8 in the date. Boldly struck and lustrous with slightly dusky wheat-gold and ice-blue toning. PCGS# 7102

5576 1880-CC 8 Over Low 7 MS65 PCGS. CAC. VAM-6. A Top 100 Variety. A remarkable overdate that shows the undertype 7 positioned low in the loops of the second 8. This sharply detailed Gem displays vibrant mint luster and no mentionable distractions. PCGS# 7104

**1880-CC 8 Over Low 7 Dollar, VAM-6, MS66
Lustrous and Well Struck**

5577 1880-CC 8 Over Low 7 MS66 PCGS. VAM-6. A Top 100 Variety. The low 7 is visible beneath the second 8 in the date identifying the popular VAM-6 variety. This is the Reverse of 1879, identified by the slanted arrow feather. Pleasing luster graces both sides of this Premium Gem, each of which is essentially free of toning. The design elements are generally well struck, including partial detail in the hair above Liberty's ear and the eagle's breast feathers. A few minor scuffs likely preclude an even finer grade. Population: 43 in 66 (4 in 66+), 0 finer (8/13). PCGS# 7104

5578 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4. A Top 100 Variety. The 1880-CC has the three most prominent overdates of the entire Morgan series: VAMs 4, 5, and 6. VAM-4 is also important for its obsolete Second Reverse. Exceptionally smooth for the MS64 level. The margins display faint rose-red patina. NGC ID# 253Z, PCGS# 7108

5579 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4. A Top 100 Variety. This popular overdate shows the remains of an overstruck 79 below the last two digits of the date and parallel arrow feathers. This attractive Choice example is well-detailed and lustrous, with highlights of golden-tan toning. NGC ID# 253Z, PCGS# 7108

5580 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4. Top 100 Variety. The undertype of the earlier date is clearly visible inside the loops of the final two digits and the parallel arrow feathers indicates the scarcer Reverse of 1878. A well-detailed Choice example, with cartwheel mint luster and delicate golden-tan toning. NGC ID# 253Z, PCGS# 7108

5581 1880/79-CC Reverse of 1878 MS64+ PCGS. CAC. VAM-4. A Top 100 Variety. This high-end Choice example displays the parallel arrow feathers that identify the Reverse of 1878. The popular VAM-4 overdate shows the undertype of the 79 below the last two digits of the primary date. This well-detailed specimen is brightly lustrous and lightly abraded. NGC ID# 253Z, PCGS# 7108

**1880/79-CC Morgan, Reverse of '78
MS64 Deep Mirror Prooflike**

5582 1880/79-CC Reverse of 1878 MS64 Deep Mirror Prooflike NGC. VAM-4. A Top 100 Variety. This popular Carson City variety combines the features of three years' issues, the overdate 1880 over 79 with the Parallel Arrow Feather reverse of 1878. This untuned near-Gem shows stark contrast between frosty devices and midnight-black fields, with thorough eye appeal. Census: 4 in 64 Deep Mirror Prooflike, 1 finer (8/13). NGC ID# 253Z, PCGS# 97109

5583 1880-CC 8/7 Reverse of 1878 MS64 NGC. VAM-7A. A Hit List 40 Variety. One of two Second Reverse 1880-CC die marriages. VAM-7A shows a clashed N from IN in front of Liberty's neck, while VAM-7 does not. VAM-4 is the other Second Reverse variety. Lustrous with light gray toning, smooth fields, and minor chatter on the cheek. PCGS# 7110

5584 1880-O MS64 PCGS. VAM-11A. Small or Micro O. A lustrous and well preserved near-Gem representative of this variety. Multiple bold clash marks increase the interest of this conditionally rare New Orleans dollar. The borders display peach patina while the fields and motifs are brilliant. NGC ID# 2543, PCGS# 7114

5585 1880-O MS64 NGC. A well-detailed Choice Morgan dollar, with vibrant mint luster under mingled shades of emerald-green, gray, and violet toning. NGC has graded 29 numerically finer examples (8/13). NGC ID# 2543, PCGS# 7114

5586 1880-O MS64 PCGS. Micro or Small O. This impressive Choice Morgan dollar possesses outstanding eye appeal due to its sharply detailed design elements and vibrant mint luster. A few minor contact marks are present and some hints of golden-tan toning. NGC ID# 2543, PCGS# 7114

5587 1880-O MS64 PCGS. VAM-11A. Micro or Small O. Several clashed letters provide additional VAM interest. Lustrous and well struck with exceptionally mark-free surfaces for the MS64 level. Expect to pay a premium to secure the present New Orleans near-Gem. NGC ID# 2543, PCGS# 7114

5588 1880-O MS64 PCGS. CAC. VAM-11A. Small or Micro O. Clashed letters on the obverse from LIBERTY and TRUST make this an interesting VAM variety. Crisply struck and lustrous with a clean surfaces and a blush of tan toning near the D in UNITED. NGC ID# 2543, PCGS# 7114

5589 1880-O MS64 PCGS. CAC. This near-Gem 1880-O Morgan is a prize for the color aficionados, featuring central pinkish-gray hues melding into pastel mint-green near the rims on each side. Only the most minor contact and some strike flatness over the ear prevent claims to a finer grade, but there is eye appeal in spades here. Gems of this issue are quite scarce; PCGS has seen only 33 numerically finer than this piece (8/13). NGC ID# 2543, PCGS# 7114

5590 1880-O MS64 PCGS. CAC. This is an unusually clean example of this all-too-often heavily abraded O-mint dollar. The surfaces are satiny and virtually unmarked. Most of each side is brilliant with just a hint of color here and there. NGC ID# 2543, PCGS# 7114

5591 1880-O MS64 PCGS. CAC. Small or micro O. Lustrous and essentially brilliant with a crisp strike and splendid preservation. A common issue in typical Mint State but surprisingly scarce in the present quality. An outstanding value relative to the few pieces certified finer. NGC ID# 2543, PCGS# 7114

5592 1880-O MS64 PCGS. CAC. This near-Gem is virtually untoned, aside from the dentils. Cartwheel luster and a strong degree of design detail provide this piece with strong visual appeal. Only 32 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 2543, PCGS# 7114

5593 1880/79-O MS62 Deep Mirror Prooflike PCGS. CAC. VAM-4. A Top 100 Variety. The VAM-4 overdate is differentiated from the VAM-5 overdate crossbar by the size of the mintmark on the reverse. The VAM-4 has a Small or Micro O. This sharply detailed example exhibits deeply reflective fields, with a scattering of minor contact marks on both sides. Population: 3 in 62 Deep Mirror Prooflike, 9 finer (8/13). PCGS# 97117

5594 1880/79-O MS63 Deep Mirror Prooflike NGC. VAM-4. A Top 100 Variety. Both sides show deviations from the norm with an overdate obverse and Micro O reverse. Lightly abraded surfaces are minimally toned save for touches of gold at the rims. Moderately contrasted with high appeal. PCGS# 97117

5595 1880-S MS65 NGC. CAC. The obverse of this Gem is richly toned in a number of colors, including hues of mint-green, fuchsia, jade-green, orange, red, apple-green, and purple. The reverse displays potent cartwheel luster. The center is brilliant, while the outer edges display attractive multicolor toning. This piece displays a sharp strike. Scattered marks are present, but pose little distraction, if any. In a former generation holder. NGC ID# 2544, PCGS# 7118

5596 1880-S MS67+ NGC. Large S. Although not designated as Prooflike, the fields of this extraordinary Morgan dollar are deeply mirrored, and there is significant cameo contrast with the frosty design elements when the coin is tilted in the light. This Morgan dollar has a tremendous amount of eye appeal. NGC ID# 2544, PCGS# 7118

5597 1880-S MS67 ★ NGC. Large S. Delightful bands of powder-blue, orange-gold, and lilac toning illuminate the obverse. The reverse is nearly brilliant and essentially pristine. A boldly struck and lustrous Superb Gem. NGC ID# 2544, PCGS# 7118

5598 1880-S MS67+ PCGS. CAC. Medium S. Apple-green, peach-gold, and rose-red patina consumes the obverse of this beautiful Superb Gem. Lustrous and fully struck with nearly pristine surfaces save for a minor field graze behind the cap. NGC ID# 2544, PCGS# 7118

5599 1880-S MS67+ PCGS. CAC. Medium S. Dramatic forest-green, cherry-red, lemon-gold, and powder-blue toning endows the left reverse of this high grade silver type coin. The remainder of the surfaces display only faint honey patina. NGC ID# 2544, PCGS# 7118

1880-S Dollar, MS68 Untoned, Pristine Example

5600 1880-S MS68 PCGS. The 1880-S Morgan dollar is among the best-produced issues within the series, and collectors vie eagerly for top-grade examples. This untoned MS68 piece displays a clean cheek on Liberty especially, but the surfaces are virtually unmarked throughout, as expected. The strike approaches full status, save for a strand of hair over the ear. Population: 5 in 68+, 5 finer (8/13). NGC ID# 2544, PCGS# 7118

1880-S Dollar, Well-Struck MS68

5601 1880-S MS68 NGC. The 1880-S, with a circulation-strike mintage approaching 9 million pieces, is one of the more available coins in the Morgan dollar series. Tens of thousands of certified coins exist through MS67. The population drops precipitously to about 420 examples in MS68, and both services have seen only 10 finer (8/13). Both sides display a degree of field-device contrast and are well struck. Untoned surfaces are impeccably preserved. NGC ID# 2544, PCGS# 7118

5602 1880-S MS66 Deep Mirror Prooflike PCGS. CAC. Medium S. Snowy, intricately struck motifs provide exemplary contrast with darkly reflective fields. Brilliant aside from a hint of golden patina near the rims. A beautifully preserved Premium Gem.
Ex: Long Beach Signature (Heritage, 2/2005), lot 10008, which realized \$1,840. NGC ID# 2544, PCGS# 97119

5603 1880/9-S MS64 Deep Mirror Prooflike PCGS. VAM-11. A Hot 50 Variety. Medium S. Die fill within the 0 suggests an underdigit 9. Remarkable field reflectivity confirms the DMPL designation. The frosty motifs are well struck. A brilliant Choice example. Population: 47 in 64 Deep Mirror Prooflike, 31 finer (8/13). PCGS# 97123

5604 1881 MS66 PCGS. The obverse of this spectacular Premium Gem shows prooflike reflectivity while the reverse displays vibrant satiny mint luster. The design elements are well-detailed and the reverse shows a few hints of golden-tan and lavender toning. Population: 89 in 66 (4 in 66+), 2 finer (8/13). NGC ID# 2546, PCGS# 7124

5605 1881 MS66 PCGS. Delicate frost highlights the feathers of the eagle. Generally strong detail for the issue with only a hint of peach patina over silver cartwheel luster. Population: 89 in 66 (4 in 66+), 2 finer (8/13). NGC ID# 2546, PCGS# 7124

5606 1881 MS66 PCGS. Cartwheel luster and a mere hint of toning provide this Premium Gem with strong eye appeal. The coin is well struck, with only minor incompleteness present at the centers. Population: 89 in 66 (4 in 66+), 2 finer (8/13). NGC ID# 2546, PCGS# 7124

5607 1881 MS64 Deep Mirror Prooflike PCGS. This nearly brilliant Choice Silver Dollar has impressively reflective fields, and the strike is attentive. A few light marks on the fields, the cheek is relatively clean. Population: 63 in 64 (1 in 64+) Deep Mirror Prooflike, 7 finer (8/13). NGC ID# 2546, PCGS# 97125

5608 1881-CC MS65 PCGS. VAM-2. This brilliant and lustrous Carson City Gem has a full strike and nearly pristine fields. The cheek and neck show minor grazes and the eagle's breast has one tick. Encapsulated in a rare doily label holder. NGC ID# 2547, PCGS# 7126

5609 1881-CC MS65+ NGC. The brilliant surfaces take on an even greater element of visual appreciation with the bright semiprooflike fields that gently contrast against the frosted devices. No noticeable abrasions are present, as one would expect from the grade. NGC ID# 2547, PCGS# 7126

5610 1881-CC MS65 PCGS. CAC. Ex: GSA. From the GSA sales but not in the GSA box, this piece is housed in a standard PCGS holder. Both sides have wisps of champagne and light gold toning over frosty luster. NGC ID# 2547, PCGS# 7126

5611 1881-CC MS66 NGC. Popular as a CC type coin, this 1881 example is brilliant throughout and exhibits thick, cartwheel mint frost. The surfaces are remarkably unabraded for a Carson City dollar. NGC ID# 2547, PCGS# 7126

5612 1881-CC MS66+ PCGS. A high-end Premium Gem from the famous Carson City Mint, this coin is sharply detailed and brightly lustrous throughout. The well-preserved surfaces show a few hints of golden-tan toning and eye appeal is outstanding. NGC ID# 2547, PCGS# 7126

5613 1881-CC MS66+ PCGS. CAC. VAM-2. The 8s in the date exhibit interesting die fill. A fully struck and thoroughly lustrous silver dollar that boasts an immaculate reverse and only minor obverse contact. A whisper of green-gold toning enriches both sides. NGC ID# 2547, PCGS# 7126

1881-CC Morgan, MS67 Strong Eye Appeal

5614 1881-CC MS67 NGC. The surfaces are untoned silver-white throughout, displaying generous eye appeal amid the bold strike. Marks are minimal; the most obvious are a couple of luster grazes on the truncation of Liberty's neck. The 1881-CC is a well-struck date overall with good survival, although examples above the Superb Gem level are seldom found. NGC has seen only three numerically finer (8/13). NGC ID# 2547, PCGS# 7126

1881-CC Dollar, MS65 Deep Mirror Prooflike Terrific Eye Appeal

5615 1881-CC MS65 Deep Mirror Prooflike NGC. An impressive Gem, this piece exhibits profound cameo contrast between the deeply mirrored fields and the richly frosted devices. The design elements exhibit a pleasing level of definition. The extreme outer edges of both sides display rich toning in shades including gold, russet, teal, plum, and violet. Scattered minor abrasions are present, including a few on the cheek. PCGS has graded only 51 finer coins within the designation (8/13). NGC ID# 2547, PCGS# 97127

5616 1881-O MS65 PCGS. CAC. Both sides of this shimmering Gem with cartwheel luster appear to be on the verge of a Prooflike designation, the reverse a bit more than the obverse. The piece is nicely struck and virtually untuned. Only 14 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 2548, PCGS# 7128

5617 1881-O Doubled Ear MS63 PCGS. VAM-27. A Hot 50 Variety. A Select example of the doubled ear variety, this piece reveals lustrous surfaces and faint toning. Scattered abrasions are present, as expected at this grade level, but there is none worthy of individual mention. PCGS# 133989

5618 1881-O MS64 Deep Mirror Prooflike PCGS. Frosty motifs and glassy fields ensure the eye appeal of this New Orleans near-Gem. Boldly struck and clean-cheeked with a few moderate field marks beneath the wings. Encased in a green label holder. NGC ID# 2548, PCGS# 97129

5619 1881-O MS64 Deep Mirror Prooflike PCGS. CAC. Outstanding field-mirrors with well-frosted portrait and eagle. Pleasingly detailed for a New Orleans product and attractive despite the scattered light obverse abrasions that account for the grade. NGC ID# 2548, PCGS# 97129

5620 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. A coin with a strong degree of eye appeal as the plus designation indicates, this near-Gem exhibits strong contrast between the frosted devices and the reflective fields. The design elements display a strong level of definition. There are no marks worthy of mention, with only scattered, small abrasions present along with a few tiny as-made strike-throughs. A lovely example. Population: 23 in 64+ Deep Mirror Prooflike, 12 finer (8/13). NGC ID# 2548, PCGS# 97129

5621 1881-S MS67 PCGS. Satiny cartwheel luster provides this Superb Gem with immediate visual appeal. Closer examination reveals additional attributes, among them untuned surfaces and a strong strike. Very few marks are present and they are minuscule. NGC ID# 2549, PCGS# 7130

5622 1881-S MS67 PCGS. CAC. The 1881-S is available even in MS67 grade, but finer pieces are seldom seen. This CAC-certified example stands out from the crowd via the gorgeous rainbow patina seen on the obverse, complementing an untuned reverse and unmarked, sharply struck surfaces throughout. A prize for color aficionados. NGC ID# 2549, PCGS# 7130

5623 1881-S MS67+ PCGS. CAC. Prominent cartwheel luster and brilliant virtually untuned surfaces are among the attributes this gorgeous coin possesses. The design elements display a bold level of detail, even at the extreme centers. This is a wonderful piece. NGC ID# 2549, PCGS# 7130

- 5624 1881-S MS67 ★ NGC. CAC.** Vivid toning on large portions of the obverse provides this piece with a strong degree of eye appeal, as evidenced by the star designation. Numerous shades of green and yellow are present, along with areas of fuchsia, violet, orange, and purple. The design elements display a strong degree of definition, adding to the appeal. The reverse is brilliant, with small areas of toning at the peripheries. Cartwheel luster is an additional attribute of this piece. Scattered abrasions are present on the obverse. NGC ID# 2549, PCGS# 7130
- 5625 1882 MS66 PCGS.** Gleaming white surfaces provide this Premium Gem with fantastic eye appeal. Cartwheel luster is another attribute this piece possesses. Other than the extreme centers, this example displays a sharp strike. PCGS has awarded higher numeric grades to a mere 6 examples (8/13). NGC ID# 254A, PCGS# 7132
- 5626 1882 MS66 PCGS.** The 1882 Morgan dollar is plentiful in grades up to MS66, but the issue is a condition rarity in finer grades. This well-detailed Premium Gem exhibits vibrant mint luster and outstanding eye appeal. PCGS has graded six numerically finer examples (8/13). NGC ID# 254A, PCGS# 7132
- 5627 1882 MS66 PCGS.** Soft golden-rose and pale blue toning is seen over each side of this Premium Gem dollar. The strike is strong, and the abrasions that are on the coin are well concealed by the toning. Strong mint luster greatly enlivens the lovely toning. Scarce early P-mint in high grades.
From The Strawberry Fields Collection. NGC ID# 254A, PCGS# 7132
- 5628 1882 MS66 NGC.** This frosty Premium Gem has brilliant white luster and sharp design elements, including virtually complete hair strands over Liberty's ear. Bright silver surfaces are untuned. NGC has only certified seven finer examples (8/13). NGC ID# 254A, PCGS# 7132
- 5629 1882 MS66 PCGS. CAC. Ex:** The Shrike Set - The Karschner Collection of Morgan Dollars. A fully struck and virtually brilliant high grade Morgan dollar, this piece displays vibrant luster and an essentially immaculate reverse. PCGS has awarded higher numeric grades to a mere six examples (8/13). NGC ID# 254A, PCGS# 7132
- 5630 1882-CC MS66 PCGS.** A dash of dark gold toning and a few luster breaks appear on the cheek of this otherwise nearly flawless Premium Gem. Both sides have satiny silver toning with full white brilliance. NGC ID# 254B, PCGS# 7134
- 5631 1882-CC MS66 PCGS.** This is a stunning Premium Gem with satin luster and delicate cameo contrast between the fields and devices. The strike shows slight central weakness but is up to the standard of this issue, and the brilliant white surfaces are entirely untuned. NGC ID# 254B, PCGS# 7134
- 5632 1882-CC MS66 PCGS.** Potent luster provides this virtually untuned Premium Gem with strong visual appeal. The coin displays a bold strike and is minimally abraded. A tiny planchet flake is present near Liberty's ear. NGC ID# 254B, PCGS# 7134
- 5633 1882-CC MS66 PCGS. CAC.** This sensational Premium Gem exhibits an excellent strike with frosty luster and brilliant silver surfaces showing no toning on either side. NGC ID# 254B, PCGS# 7134
- 5634 1882-CC MS66 PCGS. CAC.** An amazing Premium Gem that appeals to two different interests. While the green-gold, emerald, and silver-gray toning of the obverse should attract the toning aficionado, the shining and minimally patinated reverse may appeal to the collector preferring greater brilliance. Only 62 examples have achieved higher numeric grades from PCGS (8/13).
Ex: FUN Signature (Heritage, 1/2010), lot 2860. NGC ID# 254B, PCGS# 7134

- 5635 1882-CC MS66 PCGS. CAC.** Approximately half of the obverse displays multicolored toning in shades of golden-brown and teal. The coin is well struck, with only minor incompleteness at the extreme centers, and reveals satin luster. A few small areas of struck-in grease are present on the virtually untuned reverse. Scattered marks appear on both sides. NGC ID# 254B, PCGS# 7134
- 5636 1882-CC MS66+ PCGS. CAC.** Gleaming silver with only the faintest suggestions of patina. Excellent detail on the hair over the ear with touches of frostiness in the same area. This issue, despite being saved in quantity, is scarce in better grades. NGC ID# 254B, PCGS# 7134
- 5637 1882-CC MS66 Prooflike PCGS.** The contrast between the frosted devices and brilliant fields is clearly evident on this Premium Gem representative. The piece is virtually untuned aside from a few streaks of yellow-gold color on the portrait. The coin exhibits a sharp strike. Population: 75 in 66 (3 in 66+) Prooflike, 1 finer (8/13). NGC ID# 254B, PCGS# 7135
- 5638 1882-CC MS66 Prooflike PCGS.** An attractive Premium Gem, this piece displays fully mirrored fields around satiny and lustrous devices, creating excellent contrast. Both sides are brilliant with just a hint of peripheral gold toning. Population: 75 in 66 (3 in 66+) Prooflike, 1 finer (8/13).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4225. NGC ID# 254B, PCGS# 7135
- 5639 1882-CC MS65 Deep Mirror Prooflike PCGS.** The devices are richly frosted on this flashy Gem, providing appreciable contrast against the brilliant reflective fields. Aside from a few tiny splashes of color at portions of the extreme outer edges, this well struck piece is free of toning. Only 63 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 254B, PCGS# 97135

**1882-CC Morgan, MS66 Deep Mirror Prooflike
One Sole Coin Numerically Finer at PCGS**

- 5640 1882-CC MS66 Deep Mirror Prooflike PCGS.** This is a stunning, blazing silver-white example of this available but exceedingly popular Carson City issue, completely untuned and exhibiting powerful luster over surfaces that are free of singular marks. For "dimple" collectors, the Premium Gem grade is as good as it gets for the issue; PCGS has graded only a single MS67 DMPL. Population: 62 in 66 Deep Mirror Prooflike, 1 finer (8/13). NGC ID# 254B, PCGS# 97135
- 5641 1882-O MS65 NGC.** A lovely Gem with brilliant satin luster and delicate peripheral gold toning on the obverse. The reverse is fully brilliant silver-white and untuned. NGC ID# 254C, PCGS# 7136
- 5642 1882-O MS65 PCGS.** Both sides of this Gem are pleasing, with the reverse being particularly attractive with a prooflike appearance. Little toning is present on either side, with small splashes of golden-brown present on portions of the obverse periphery. The centers reveal a minor incompleteness of strike. PCGS has awarded higher numeric grades to only 27 examples (8/13). NGC ID# 254C, PCGS# 7136

5643 1882-O MS65 PCGS. CAC. The obverse displays attractive “end roll” toning, with peripheral areas of aquamarine and autumn-gold patina from the folded ends of a paper roll. The reverse is brilliant save for a hint of honey near the rims. The obverse has moderate carbon, but actual marks are minimal. PCGS has awarded higher numeric grades to only 27 examples (8/13).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4227. NGC ID# 254C, PCGS# 7136

5644 1882-O MS64 Deep Mirror Prooflike PCGS. Pronounced contrast between the thickly frosted devices and brilliant, reflective fields provides this near-Gem with a high degree of visual appeal. Cartwheel luster is present. The coin is free of toning other than a tiny spot below Liberty’s chin. Contact marks appear on both sides. Only 21 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 254C, PCGS# 97137

5645 1882-S MS67 PCGS. CAC. Rich vibrant multicolored toning is present on this Superb Gem representative. The piece has a rich golden cast overall, with the additional colors including ice-yellow, deep lemon-yellow, cherry-red, apple-green, fuchsia, and purple. Although the obverse is more colorful, the reverse displays a high degree of eye appeal as well. In addition, the strike was well executed, producing a strong level of design detail.
From The Strawberry Fields Collection. NGC ID# 254E, PCGS# 7140

1882-S Dollar, MS68 Lustrous and Sharply Struck

5646 1882-S MS68 PCGS. The 1882-S Morgan dollar, from a mintage exceeding 9 million pieces, exists in large quantities in Uncirculated condition. In the lofty grade of MS68, however, it is quite challenging. PCGS and NGC have graded about 130 examples and none finer, some of which are likely resubmissions. Whispers of reddish-gold cling to the margins of this radiantly lustrous coin. It is sharply struck and immaculately preserved. Population: 43 in 68, 0 finer (8/13). NGC ID# 254E, PCGS# 7140

5647 1882-S MS65 Deep Mirror Prooflike NGC. The centers remain brilliant; with areas of colorful toning appearing at the outer edges of this Gem. The contrast between the fields and devices is appreciable on this well struck example. Housed in a prior generation holder. Census: 72 in 65 (1 in 65+) Deep Mirror Prooflike, 8 finer (8/13). NGC ID# 254E, PCGS# 97141

5648 1883 MS66+ PCGS. Colorful toning appears on both sides of this coin, with the colors being particularly attractive on the obverse. The colors include shades of golden-brown, red-orange, teal, lemon-yellow, fuchsia, and plum. The extreme centers exhibit minor incompleteness of strike. NGC ID# 254G, PCGS# 7142

5649 1883 MS66+ PCGS. CAC. Frost-touched on the highest points of the devices with minor striking softness also visible there. Cartwheel luster is mainly silver but has suggestions of pink and blue. NGC ID# 254G, PCGS# 7142

5650 1883 MS67 NGC. The 1883 is a much more challenging issue in high grades than one might think judging from the mintage of more than 12 million coins. This is an exceptionally clean example with all-brilliant surfaces and sharp central definition. Remarkably clean surfaces. NGC ID# 254G, PCGS# 7142

1883 Dollar, MS66 Prooflike Great Eye Appeal

5651 1883 MS66 Prooflike PCGS. CAC. The 1883 Philadelphia Mint issue, sporting a generous mintage approaching 13 million pieces, is among the most available Morgan dollar dates of the 1880s. Even Premium Gems can be obtained with relatively little difficulty. Prooflike specimens at the MS66 level, on the other hand, are elusive. PCGS and NGC have graded just five at this level and none finer. Frosty, sharply defined motifs are highlighted by the prooflike fields, and both sides are untoned and mark-free. Great overall eye appeal. Population: 4 in 66 (1 in 66+) Prooflike, 0 finer (8/13). NGC ID# 254G, PCGS# 7143

5652 1883 MS65 Deep Mirror Prooflike PCGS. Even a quick glance at this pleasing piece confirms the DMPL designation. Both sides of this Gem display tremendous eye appeal. Areas of toning are present at the extreme outer edges, otherwise the coin is brilliant and stone-white. The central devices exhibit a strong level of detail. Population: 82 in 65 Deep Mirror Prooflike, 9 finer (8/13). NGC ID# 254G, PCGS# 97143

5653 1883 MS65 Deep Mirror Prooflike NGC. The fields are deeply reflective on this Gem, while the devices exhibit a pleasing degree of mint frost. The central devices reveal this coin was struck from rusted dies. The outer edges display attractive toning, particularly on the obverse. Census: 42 in 65 Deep Mirror Prooflike, 7 finer (8/13). NGC ID# 254G, PCGS# 97143

5654 1883-CC MS66 PCGS. This spectacular Premium Gem shows vivid shades of burnt-orange, cerulean-blue, and lavender toning, with most of the color on the obverse. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 254H, PCGS# 7144

5655 1883-CC MS66+ PCGS. Delicately patinated silver-blue with faint frost on the portrait and eagle. Generally strong definition with only a few soft strands on the hair over the ear. NGC ID# 254H, PCGS# 7144

5656 1883-CC MS66+ PCGS. When Carson City dollars are “on” they can be among the most attractive of all Morgans. This piece has the usual thick mint frost with the addition of wide swaths of multicolored toning on the lower two-thirds of the obverse. Brilliant on the reverse. Sharply defined. NGC ID# 254H, PCGS# 7144

5657 1883-CC MS66+ PCGS. CAC. The obverse is completely covered in attractive toning, leading to the plus designation for this Premium Gem. The hues include yellow, orange, golden-brown, sea-green, forest-green, red, plum, and violet. The reverse is gleaming white other than small areas of toning at portions of the rim. Rich luster and well defined design elements further enhance the appearance. NGC ID# 254H, PCGS# 7144

5658 1883-CC MS66+ PCGS. CAC. This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster, with virtually pristine surfaces that show wisps of golden-tan toning. NGC ID# 254H, PCGS# 7144

5659 1883-CC MS66+ PCGS. CAC. It is no wonder this Premium Gem achieved the plus grade. Potent cartwheel luster is present on both sides, but is particularly flashy on the reverse. The surfaces are brilliant and almost completely absent of even light toning. A sharp strike led to strongly defined devices. NGC ID# 254H, PCGS# 7144

5660 1883-CC MS66+ PCGS. CAC. The brilliant surfaces of this high-end Premium Gem display vibrant mint luster on both sides. The design elements are sharply detailed and the eye appeal is outstanding. A few marks above Liberty's eye pose little distraction, if any. NGC ID# 254H, PCGS# 7144

5661 1883-CC MS66+ PCGS. CAC. This high-end Premium Gem is well-detailed, with vibrant mint luster and creamy surfaces that show no mentionable signs of contact. Visual appeal is tremendous. NGC ID# 254H, PCGS# 7144

**1883-CC Dollar, MS67+
Impressively Preserved**

5662 1883-CC MS67+ NGC. This scarce Carson City VAM displays a clashed N (from IN) near Liberty's neck. A mere hint of almond-gold toning adorns this thoroughly lustrous and boldly struck high grade example. Nearly pristine save for a concealed thin mark on the left (facing) wing. A gorgeous Morgan. Census: 2 in 67+, 0 finer (8/13).

Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4230. NGC ID# 254H, PCGS# 7144

5663 1883-CC MS65 Deep Mirror Prooflike PCGS. VAM-5A. The N in IN is clashed before the neck. The clashes caused the Mint to lap the dies, and the present well preserved Gem exhibits impressive field reflectivity. Brilliant apart from a hint of gold patina near STATES. Housed in a green label holder. NGC ID# 254H, PCGS# 97145

5664 1883-O MS66+ PCGS. CAC. The extreme rims reveal rich toning that extends to portions of the dentils on this high-end Premium Gem example. The centers reveal only faint color. The coin is well struck and minimally abraded, creating strong visual appeal. Population: 38 in 66+, 36 finer (8/13).

From The Strawberry Fields Collection. NGC ID# 254J, PCGS# 7146

**1883-O Silver Dollar, MS67
Silver-White, Pristine Piece**

5665 1883-O MS67 PCGS. Liberty's cheek is free of marks and the surfaces throughout both sides lack mentionable blemishes of any sort. The 1883-O is found with both sharp and flat strikes, and this one is sharp overall, save for minor softness at the hair over the ear and the central eagle's breast on the reverse. The untoned surfaces are highly attractive. Among the finest graded. Population: 36 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 254J, PCGS# 7146

**1883-O Morgan Dollar, MS67
None Numerically Finer at Either Service**

5666 1883-O MS67 PCGS. Areas of golden-champagne toning appear on both sides of this Superb Gem, particularly on the obverse. Shades of sea-green and plum are among the additional colors found on the obverse. Cartwheel luster is present and the reverse is especially flashy with bright, reflective fields. The design elements exhibit a strong level of design detail. Population: 36 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 254J, PCGS# 7146

**1883-O Morgan Dollar, MS67
Among the Finest Graded**

5667 1883-O MS67 NGC. This Superb Gem example remains brilliant overall, with areas of toning confined to the peripheries on both sides. The patina includes shades of deep orange, plum, and russet, with the reverse displaying teal in addition. The detail of the design elements is strong overall, with only minor incompleteness present at the centers. Scattered minor abrasions and grazes appear on both sides. Census: 34 in 67, 0 finer (8/13). NGC ID# 254J, PCGS# 7146

**1883-O Morgan Dollar, VAM-22A, MS64
Untoned 'Partial E Reverse' Variety**

5668 1883-O Partial E Reverse MS64 PCGS. VAM-22A, R.6. A Hot 50 Variety. As VAMworld.com points out, the difference in VAM-22A and VAM-36A, both showing the Partial E reverse, is that the ear on the obverse shows no die chips. The obverse of this piece shows some interesting diagonal striations through the 8s in the date, source unknown but apparently as made. Minor field chatter that determines the grade is confined largely to the obverse field. PCGS# 148715

5669 1883-S MS63 NGC. Brilliant white flashy surfaces provide this Select piece with strong visual appeal. The designs reveal only minor incompleteness of strike at the extreme centers. Minor abrasions and grazes held this lovely piece from a higher grade. NGC ID# 254K, PCGS# 7148

5670 1884 MS66+ PCGS. CAC. This high-end Premium Gem is sharply detailed throughout, with vibrant mint luster and well-preserved brilliant surfaces. Visual appeal is outstanding. PCGS has graded 40 numerically finer examples (8/13). NGC ID# 254L, PCGS# 7150

5671 1884 MS66+ PCGS. CAC. This is a remarkable dollar. The mint brilliance allows full appreciation of the thick mint luster which is more suggestive of an S-mint dollar. The strike details are strong throughout with no detracting abrasions. NGC ID# 254L, PCGS# 7150

5672 1884-CC MS66 PCGS. CAC. This well-detailed Premium Gem is vividly toned in shades of greenish-gold, lavender-silver, and rose-bronze, with most of the color on the obverse. Vibrant mint luster shines through the toning. NGC ID# 254M, PCGS# 7152

5673 1884-CC MS66+ PCGS. CAC. VAM-2. The date is clearly repunched. A high grade Carson City type coin with booming luster and barely a wisp of tan toning. The strike is sharp and the eye appeal is imposing. NGC ID# 254M, PCGS# 7152

5674 1884-CC MS66+ PCGS. CAC. Mostly silver with an arc of deep blue-to-green at the bottom right obverse and faint golden accents on the reverse. Impressively preserved with attractive cartwheel luster. NGC ID# 254M, PCGS# 7152

5675 1884-CC MS66+ PCGS. CAC. VAM-3. The date is repunched. Dynamic luster and nearly pristine fields confirm the high quality of this Carson City type coin. The sweet spot of the cheek is also smooth. Brilliant save for a blush of caramel-gold toning on the reverse exergue. NGC ID# 254M, PCGS# 7152

1884-CC Dollar, MS67 Vibrant Luster

5676 1884-CC MS67 NGC. Mint State 1884-CC dollars are common through Premium Gem and become scarce in MS67. Silvery surfaces display vibrant luster and the design elements are well-struck, including partial detail in the centers, areas that are sometimes weak. Peripheral die cracks are noted on both sides, each of which is minimally marked. NGC has seen only one finer (8/13). NGC ID# 254M, PCGS# 7152

1884-CC Morgan Dollar, MS67 Virtually Unobtainable Any Finer

5677 1884-CC MS67 NGC. A gorgeous Superb Gem representative, this piece displays brilliant untuned surfaces and a bold strike with only minor incompleteness present at the extreme centers. The reverse is particularly attractive, with lightly frosted devices and flashy fields. NGC has awarded a higher numeric grade to a single example (8/13). NGC ID# 254M, PCGS# 7152

5678 1884-CC MS65 Deep Mirror Prooflike PCGS. This flashy, well struck Gem exhibits pronounced contrast between the deeply mirrored fields and the boldly frosted devices, providing this piece with a strong degree of visual appeal. The reverse displays numerous die polish lines. NGC ID# 254M, PCGS# 97153

1884-CC Morgan Dollar, Untoned MS66 Deep Mirror Prooflike

5679 1884-CC MS66 Deep Mirror Prooflike PCGS. The untuned silver-white surfaces on this Premium Gem actually help to emphasize the blatant contrast present between the snow-white devices and midnight-black fields on this stunning coin. A few roller marks appear, as made, and a couple of thin scrapes occur in the same area, on the lower cheek, to determine the grade, but this is a great-looking Carson City Morgan dollar. NGC ID# 254M, PCGS# 97153

1884-CC Silver Dollar MS66 Deep Mirror Prooflike

5680 1884-CC MS66 Deep Mirror Prooflike PCGS. A sensational example with deeply mirrored fields around richly frosted devices. Both sides have exceptional field-to-device contrast on this highly attractive Morgan. Only three examples with this designation have achieved higher numeric grades from PCGS (8/13). NGC ID# 254M, PCGS# 97153

1884-CC Dollar, MS66 Deep Mirror Prooflike Only Six Finer With This Finish

5681 1884-CC MS66 Deep Mirror Prooflike PCGS. The 1884-CC Morgan is an abundant coin in mint condition; even Prooflike and Deep Mirror Prooflike examples through MS65 are available. Premium Gems with a DMPL finish will require more searching. Russet and grayish-green patina is slightly deeper and more extensive on the obverse, and the strike is complete throughout. The few scattered marks are insignificant. PCGS and NGC has graded just six DMPL coins numerically higher ((8/13). NGC ID# 254M, PCGS# 97153

**1884-CC Dollar, MS66 Deep Mirror Prooflike
Noticeable Field-Motif Contrast**

5682 1884-CC MS66 Deep Mirror Prooflike PCGS. Each side is completely brilliant and the surfaces show no mentionable abrasions. The frosty-white devices set up noticeable contrast against the deeply mirrored fields. The design elements are well-impressed, including above-average detail in the centers. PCGS and NGC has graded just six DMPL coins numerically higher (8/13). NGC ID# 254M, PCGS# 97153

5683 1884-O MS63 PCGS. The reverse of this Select example displays rich toning in a number of attractive colors. The hues include purple, teal, sea-green, gold, yellow, and denim-blue. The obverse reveals toning only at the outer edges. The strike is pleasing, with only minor incompleteness noted at the centers. Abrasions held this piece from a higher grade. NGC ID# 254N, PCGS# 7154

5684 1884-O MS64 PCGS. Spectacular shades of violet and golden-brown toning blanket the obverse of this well-detailed Morgan dollar, while the reverse remains mostly brilliant with just a crescent of champagne-gold at the lower rim. Eye appeal is exceptional. NGC ID# 254N, PCGS# 7154

5685 1884-S AU58 PCGS. Subtle light gold toning and cartwheel luster add to the eye appeal of this coin. The lightly abraded surfaces of this near-Mint Morgan dollar display areas of prooflike reflectivity on both sides. The design elements exhibit only the slightest trace of wear. NGC ID# 254P, PCGS# 7156

5686 1884-S AU58 PCGS. CAC. This deep gray example shows just the slightest friction over the high points, which is well-concealed by the toning. A strong, upper-end AU of this important key issue in the Morgan series. NGC ID# 254P, PCGS# 7156

5687 1885 MS67 PCGS. CAC. Ex: The Shrike Set - The Karschner Collection of Morgan Dollars. This Superb Gem exhibits frosty silver luster with faint traces of champagne toning on each side. It is an incredible coin with few peers. Both sides exhibit pristine surfaces with no blemishes of any concern. This coin is likely destined for a high level Registry collection. Population: 96 in 67 (5 in 67+), 2 finer (8/13). NGC ID# 254R, PCGS# 7158

5688 1885 MS65+ Deep Mirror Prooflike PCGS. CAC. Brilliant, virtually untuned surfaces provide this Gem with a strong degree of eye appeal. The contrast between the frosted devices and mirrored fields is pronounced. The piece is well struck and displays pleasing cartwheel luster. Population: 1 in 65+ Deep Mirror Prooflike, 73 finer (8/13). NGC ID# 254R, PCGS# 97159

**1885 Dollar, MS66 Deep Mirror Prooflike
Starkly Contrasted**

5689 1885 MS66 Deep Mirror Prooflike PCGS. CAC. The 1885 Morgan dollar, sporting a hefty mintage approaching 18 million pieces, is a very common date. Mint State coins through Premium Gem are readily available. But Deep Mirror or Ultra Prooflike specimens are another matter. PCGS and NGC have graded only 125 Premium Gems with this finish and a mere six finer. Well struck design elements stand out against the deeply mirrored fields. Both sides are very well-cared for. Population: 72 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (8/13). NGC ID# 254R, PCGS# 97159

5690 1885-CC MS65 NGC. Flashy fields add to the eye appeal of this lovely Gem. Small splashes of toning appear on both sides, primarily at the outer edges. The coin displays a sharp strike and there are no abrasions worthy of individual mention. NGC ID# 254S, PCGS# 7160

5691 1885-CC MS65 NGC. Many 1885-CC dollars were present in the GSA offerings. Gems are always available for a price, making it a highly pursued Carson City type coin. This brilliant and highly lustrous example is only lacking a slight bit of central striking definition. Semiprooflike. NGC ID# 254S, PCGS# 7160

5692 1885-CC MS65 PCGS. VAM-3. A Gem representing the variety with the CC tilted left and die scratches near Liberty's eye. This is a well struck example with untuned surfaces and frosty luster. NGC ID# 254S, PCGS# 7160

5693 1885-CC MS65 PCGS. A fully brilliant and highly lustrous Gem, this frosty silver dollar has an average strike and bright silver surfaces without toning. NGC ID# 254S, PCGS# 7160

5694 1885-CC MS65 PCGS. CAC. A bright and minimally toned Gem with swirling luster. Short planchet striations visible at the hair over Liberty's ear are as-struck and do not affect the strong technical grade. NGC ID# 254S, PCGS# 7160

5695 1885-CC MS65 NGC. CAC. Always popular because of its low mintage, this Gem is brilliant throughout and the fields exhibit strong semiprooflike mirrors on each side. Sharply struck. NGC ID# 254S, PCGS# 7160

5696 1885-CC MS66 NGC. Light frost across devices and fields alike. This brilliant Premium Gem survivor is from this popular, low-mintage Carson City Morgan dollar issue. NGC has graded 76 numerically finer pieces (8/13). NGC ID# 254S, PCGS# 7160

5697 1885-CC MS66 NGC. Other than a few small areas of attractive toning at the peripheries, the surfaces of this lovely Premium Gem have a stone-white appearance. Rich satin luster and a bold level of detail add to the appeal of this piece. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66+
Bright Mint Luster**

- 5698 1885-CC MS66+ PCGS.** The low mintage of 228,000 coins suggests that the 1885-CC is a rare date, and in circulated grades it is. However, the GSA sales distributed 148,285 examples of this date, representing 65% of the original mintage (David Bowers, 2007). Brilliant luster emanates from this high-end Premium Gem and the strike is strong throughout. Light obverse marks are consistent with the grade. Population: 84 in 66+, 54 finer (8/13). NGC ID# 254S, PCGS# 7160

1885-CC Silver Dollar, MS66+

- 5699 1885-CC MS66+ NGC.** A mere hint of gold toning visits this lustrous and nicely struck Carson City dollar. Only wispy facial contact precludes an even higher grade. The lowest mintage CC-mint Morgan issue, though the GSA holdings held a significant number of Uncirculated examples.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4528, which realized \$1,840. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66+
High-Grade CC Type Coin**

- 5700 1885-CC MS66+ PCGS.** Vibrant cartwheel luster, bright surfaces, and well-struck design elements combine to provide this high-end Premium Gem with nice eye appeal. A few flecks of toning appear on the obverse. The surfaces exhibit minor marks. PCGS has graded only 54 numerically finer examples (8/13). NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66+
In-Demand Date and Mintmark Type Issue**

- 5701 1885-CC MS66+ PCGS. CAC.** As the plus designation attests, this Morgan dollar displays a strong degree of visual appeal. Aside from light golden-brown toning at portions of the outer edges, this piece is virtually untuned. This example exhibits a sharp strike, even at the centers, further adding to the attractiveness of this Premium Gem. NGC ID# 254S, PCGS# 7160

- 5702 1885-CC MS65 Prooflike NGC. VAM-3.** An amazing Prooflike Gem 1885-CC Morgan dollar with excellent contrast. The fields are deeply mirrored with minimal patina, and the devices are thickly frosted. The mintmark is tilted left on this variety. A tiny cluster of die polish lines appears above the eagle's head. NGC has graded just 27 numerically finer Prooflike examples (8/13).
Ex: Houston Signature (Heritage, 12/2010), lot 3920. NGC ID# 254S, PCGS# 7161

- 5703 1885-CC MS65 Prooflike PCGS. CAC.** Distinctly reflective fields also show strong cartwheel luster. Sharply struck and well-frosted devices add to the eye appeal, though a line of reed marks to the right of the eagle contributes to the grade. NGC ID# 254S, PCGS# 7161

- 5704 1885-CC MS64 Deep Mirror Prooflike PCGS.** This low mintage Carson City Morgan has prominently reflective fields and merely a hint of golden patina. Marks are chiefly confined to the left obverse. Housed in a green label holder. NGC ID# 254S, PCGS# 97161

- 5705 1885-CC MS65 Deep Mirror Prooflike NGC.** Outstanding mirrors on both obverse and reverse, with the former side showing thin but delightful toning in dappled gold-orange and pale metallic-green. An intriguing Deep Prooflike Gem from this popular and low-mintage Carson City issue. Census: 64 in 65 Deep Prooflike, 21 finer (8/13). NGC ID# 254S, PCGS# 97161

- 5706 1885-O MS67 PCGS. CAC.** A Superb Gem in every sense, from the satiny and virtually untuned surfaces to the bold strike and nearly complete absence of contact marks. In a word, amazing.
From The Strawberry Fields Collection. NGC ID# 254T, PCGS# 7162

- 5707 1885-O MS67 PCGS. CAC.** A brilliant Superb Gem, this piece reveals only a hint of toning aside from gold color covering many of the dentils on both sides. Frosty satin luster adds to the eye appeal. The coin is well struck, with only a small degree of incompleteness present at the extreme centers. PCGS has not awarded a higher numeric grade to a single example (8/13). NGC ID# 254T, PCGS# 7162

- 5708 1885-O MS67 PCGS. CAC.** The reverse of this Superb Gem remains virtually untuned, while the obverse displays an attractive pale-yellow color overall, with areas of blue-violet and orange-gold at the center. The coin is well struck and lustrous. PCGS has yet to award a higher numeric grade to a single example (8/13). NGC ID# 254T, PCGS# 7162

- 5709 1885-O MS65 Deep Mirror Prooflike PCGS.** Boldly frosted devices and bright reflective fields provide this piece with pronounced contrast and a prooflike appearance. Portions of the dentils reveal rich gold color. A long thin vertical graze appears on Liberty's cheek and neck. NGC ID# 254T, PCGS# 97163

- 5710 1885-S MS65 PCGS.** A brilliant, virtually untoned Gem, this piece exhibits strong eye appeal on both sides. Rich cartwheel luster adds to the attractiveness along with a bold strike. Minimal abrasions are present. PCGS has awarded higher numeric grades to only 32 examples (8/13). NGC ID# 254U, PCGS# 7164
- 5711 1885-S MS65 NGC. CAC.** Golden-orange is the dominant color on this well struck, toned Morgan. The outer edges of both sides reveal additional colors, among them sea-green, teal, and wine. Portions of the eagle include plum and violet hues. Attractive luster remains visible. Housed in a prior generation holder. NGC has awarded higher numeric grades to only 13 examples (8/13). NGC ID# 254U, PCGS# 7164
- 5712 1886 MS66+ PCGS. CAC.** Toning, in a number of shades, envelops the obverse of this high-end Premium Gem representative. The colors include yellow, orange, golden-brown, plum, and teal. The reverse reveals only a hint of toning. The strike is pleasing, adding to the eye appeal. NGC ID# 254V, PCGS# 7166
- 5713 1886 MS67 NGC.** A bright virtually untoned piece, this Superb Gem displays a bold strike. Minor clash marks are present. This coin possesses a strong degree of visual appeal. NGC has awarded higher numeric grades to only 20 examples (8/13). NGC ID# 254V, PCGS# 7166
- 5714 1886 MS67 NGC.** Splendid satiny mint luster glows over both sides of this Superb Gem. Most of each side is brilliant with a light trimming of golden around the margins. The 1886 is one of the few Morgan dollars that can be located with relative ease in MS67, making it a logical target for type purposes. NGC ID# 254V, PCGS# 7166
- 5715 1886 MS67 PCGS.** Subtle tan toning is present near the center of the obverse on this Superb Gem representative. Areas of gold toning appear along portions of the dentils. Adding to the appeal, the coin is well struck and minimally abraded. Only 3 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 254V, PCGS# 7166
- 5716 1886 MS67 PCGS. CAC. VAM-1A1.** A Top 100 Variety. The "Line in 6, Clashed N in IN" VAM. Portions of the peripheries reveal attractive gold color on both sides of this lustrous, well struck Superb Gem representative. Only 3 examples have achieved higher numeric grades from PCGS (8/13) NGC ID# 254V, PCGS# 7166
- 5717 1886 MS67 PCGS. CAC.** A remarkably well preserved example, with clean, evenly toned surfaces. Well struck with undiminished mint luster. PCGS has graded only three numerically finer specimens (8/13).
Ex: *Baltimore Bullet Sale (Heritage, 7/2003)*, lot 877. NGC ID# 254V, PCGS# 7166
- 5718 1886 MS66 Deep Mirror Prooflike NGC.** Excellent field-motif contrast is visible on this deeply mirrored Premium Gem. Sharply struck and minimally toned save for faint skiffs of patina, one overlapping the D in UNITED and the nearby wing.
Ex: *ANA Signature (Heritage, 7-8/2008)*, lot 2347. NGC ID# 254V, PCGS# 97167
- 5719 1886-O MS61 NGC.** Both sides of this coin remain primarily brilliant, with only a few subtle splashes of golden-brown toning present along with a few small flecks of dark gray color. The design elements display a pleasing degree of detail. Although numerous abrasions are present as expected at this grade level, they are minor in nature. NGC ID# 254W, PCGS# 7168
- 5720 1886-O MS61 NGC.** Very softly struck over the centers with lovely shimmering luster and light peach and mint-green toning near the obverse periphery. A few small abrasions are noted on each side. A scarcer date in Uncirculated grades. NGC ID# 254W, PCGS# 7168
- 5721 1886-O MS62 PCGS.** This attractive MS62 Morgan dollar is sharply detailed for a New Orleans issue, with lustrous surfaces that show a scattering of minor contact marks under delicate shades of golden-tan toning. NGC ID# 254W, PCGS# 7168

- 5722 1886-O MS62 PCGS.** Cartwheel luster and untuned surfaces provide this coin with an attractive appearance. Aside from the extreme centers, this piece exhibits a sharp strike. A few marks, including one on Liberty's cheek, may have held this lovely coin from a higher grade. NGC ID# 254W, PCGS# 7168
- 5723 1886-O MS61 PCGS. VAM-1A.** A Top 100 Variety. The "Double Clash" stage of this well known VAM. The E in LIBERTY is strongly clashed beneath the tail feathers. Rare in Uncirculated grades, and desirable in any grade. This piece is lustrous and has strong eye appeal. Population: 4 in 61, 7 finer (8/13). PCGS# 133905
- 5724 1886-S MS65 PCGS.** Boldly toned violet, blue, and green on the obverse with only a few faint suggestions of the last two hues at the bottom of an otherwise silver reverse. Strong cartwheel luster. NGC ID# 254X, PCGS# 7170

**1886-S Morgan Dollar, MS65
VAM-2, Top 100**

- 5725 1886-S MS65 PCGS. VAM-2.** A Top 100 Variety. The mintmark was initially entered tilted somewhat to the right, then corrected. The angled serifs remain from the first punch. The VAM is undesignated on the insert, as it is housed in an old green label holder that preceded publication of Dr. Fey's *Top 100* reference. The present well struck Gem exhibits booming luster and attractive peripheral autumn-gold toning. The cheek and left obverse field are pristine, though the eagle's breast displays two unobtrusive marks. NGC ID# 254X, PCGS# 7170
- 5726 1886-S MS65 PCGS. VAM-2.** A Top 100 Variety. The variety is undesignated on the holder. Attractive golden-brown and jade-green toning is noted on both sides though more prevalent on the obverse. The cheek and the field near the arrowheads display minor contact. NGC ID# 254X, PCGS# 7170
- 5727 1886-S MS65 PCGS.** End-of-roll toning is present on the obverse of this well struck Gem. The colors include shades of gold, peach, golden-brown, plum, and teal. The reverse includes small splashes of milky patina. The obverse reveals reed marks near the N in UNUM and a few streaks of struck-in grease near Liberty's jaw. Only 35 examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 254X, PCGS# 7170

**1886-S Morgan, MS65
Excellent Eye Appeal, Pale Patina**

- 5728 1886-S MS65 PCGS. CAC.** Certified with the CAC sticker, this green-label holdered Gem 1886-S should prove to be a special treat for series aficionados. Most of each side shows excellent eye appeal and a good strike, but it is the rich bluish-gray predominant color that really sets this piece apart. PCGS has seen 35 submissions numerically finer (8/13). NGC ID# 254X, PCGS# 7170
-

5729 1887/6 MS65 PCGS. VAM-2. A Top 100 Variety. The curve of the base of the underdigit 6 is present on both sides of the bottom of the 7. Similar 1887 overdate varieties are known from both the Philadelphia and New Orleans Mints. A flashy and nearly brilliant Gem, this coin displays a sharp strike. Small areas of golden toning are present. Housed in an old green label holder. PCGS and NGC combined have awarded higher numeric grades to only 16 examples (8/13). NGC ID# 254Z, PCGS# 7174

5730 1887/6 MS65 Prooflike PCGS. VAM-2. A Top 100 Variety. A thin lunule is seen on both the left and right side of the bottom of the 7 in the date, the unmistakable evidence of a 6. This overdate is seldom found with Prooflike fields. This is a brilliant example except for a slight smudge of pale golden color in the center of the obverse. Sharply struck. Population: 15 in 65 Prooflike, 2 finer (8/13). NGC ID# 254Z, PCGS# 7175

5731 1887 AU50 NGC. VAM-1B. A Hot 50 Variety. The remnants of a clashed E are barely visible under the eagle's tailfeathers. According to Jeff Oxman, the VAM-1B is one of the rarest and most sought-after varieties and always commands a healthy premium. This lightly circulated specimen retains much of its original design detail and mint luster. NGC ID# 254Y, PCGS# 7172

5732 1887 MS67 NGC. VAM-12. Top 100 Variety. This doubled-die obverse is most easily recognized by the doubling on the eye and some letters in PLURIBUS. This sharply detailed Premium Gem displays vibrant mint luster and well-preserved surfaces with a few hints of golden-tan toning. NGC has graded two numerically finer examples (8/13). NGC ID# 254Y, PCGS# 7172

5733 1887 MS67 NGC. VAM-12. A Top 100 Variety. A splendid example of the "alligator eye" variety, so named because the doubling on the front edge of Liberty's eye resembles that of an alligator's eye. A small area of light gold toning is present on the obverse of this brilliant, lustrous Superb Gem. NGC has awarded higher numeric grades to a mere 2 examples (8/13). NGC ID# 254Y, PCGS# 7172

5734 1887 MS67 NGC. Superior overall surfaces are mostly brilliant with a thin, but noticeable ring of rich golden-russet around the obverse rim. The only drawback is slight softness of strike in the centers. Wonderfully clean surfaces. NGC ID# 254Y, PCGS# 7172

5735 1887 MS67 NGC. An impressive Superb Gem, and rarely found any finer, this 1887 Morgan dollar is a wonderful survivor from a mintage of more than 20 million coins. According to the NGC *Census Report*, only one coin out of every 500 receives an MS67 or finer grade. Ex: *Stamford Coinfest Signature (Heritage, 10/2010)*, lot 4255. NGC ID# 254Y, PCGS# 7172

5736 1887 MS67 NGC. Rich satin luster provides this Superb Gem representative with strong visual appeal. The coin displays only a few scattered hints of light toning and is minimally abraded. A very pleasing, well struck coin. NGC and PCGS combined have awarded higher numeric grades to a mere 3 examples (8/13). NGC ID# 254Y, PCGS# 7172

5737 1887-O MS65 PCGS. A splendid Morgan dollar, this coin exhibits all of the desirable characteristics of a Gem. The design elements are sharply struck, including the centers, and the untoned surfaces display beautiful cartwheel luster. There are no abrasions worthy of mention. PCGS has awarded higher numeric grades to only 9 examples (8/13). NGC ID# 2552, PCGS# 7176

5738 1887-O MS65 PCGS. The 1887-O Morgan dollars are conditionally scarce above the MS65 level. This Gem displays brilliant surfaces and appealing luster. The strike is pleasing, with only minor incompleteness present at the centers. A lovely example. NGC ID# 2552, PCGS# 7176

1887-O Morgan Dollar, MS64 Deep Mirror Prooflike Attractive Obverse Peripheral Toning

5739 1887-O MS64 Deep Mirror Prooflike PCGS. The outer edges of the obverse display several shades of attractive toning, including hues of copper-gold, teal, sea-green, and plum. A hint of denim-blue patina is present on the obverse. This near-Gem exhibits a bold strike. A number of minor grazes are present on the cheek. Population: 98 in 64 (3 in 64+) Deep Mirror Prooflike, 7 finer (8/13). NGC ID# 2552, PCGS# 97177

5740 1887-S MS65 NGC. Trivial marks appear on both sides of this brilliant Gem. The surfaces are bright and satiny with untuned silver surfaces. NGC has only certified seven finer examples (8/13). NGC ID# 2554, PCGS# 7180

5741 1887-S MS65 PCGS. VAM-2A. A Top 100 Variety. The mintmark is clearly repunched within the loops. In 2010, the present late die state was discovered, identified by dentils damaged by clashmarks at 6 o'clock on both sides. The present fully struck Gem has potent luster and moderate marks. The borders are orange-gold while the cheek displays powder-blue. NGC ID# 2554, PCGS# 7180

5742 1888 MS66+ PCGS. CAC. Impressively preserved even by Premium Gem standards, this softly swirling silver example has faint skiffs of white and cream toning. The hair over Liberty's ear offers above-average detail. PCGS has graded only 18 examples as MS67 or finer (8/13). NGC ID# 2555, PCGS# 7182

5743 1888 MS66+ PCGS. CAC. Attractive untuned surfaces, a sharp strike, rich satin luster, and very few abrasions, all minuscule, are attributes of this high-end Premium Gem. Population: 43 in 66+, 18 finer (8/13). NGC ID# 2555, PCGS# 7182

5744 1888-O MS66 PCGS. Sharply detailed for a New Orleans issue, this impressive Premium Gem displays vibrant mint luster and mostly brilliant surfaces, with a few hints of greenish-gold toning. PCGS has graded no coins in numerically finer grades (8/13). NGC ID# 2556, PCGS# 7184

5745 1888-O MS66 NGC. VAM-9. A Top 100 Variety. This reverse doubled die is most readily visible at the arrowheads, though more minor doubling is visible elsewhere at the lower reverse. Carefully preserved with a hint of peach color over bright surfaces that are otherwise silver-white. Census: 44 in 66, 1 finer (8/13). NGC ID# 2556, PCGS# 7184

**1888-O Dollar, MS65 Deep Mirror Prooflike
Above-Average Strike**

- 5746 1888-O MS65 Deep Mirror Prooflike PCGS.** The 1888-O Morgan dollar, from a mintage exceeding 12 million pieces, is plentiful in Uncirculated, mostly from Treasury hoard dispersals. Deep Mirror Prooflike specimens are more challenging, especially with a decent strike. This coin displays an above-average strike for a New Orleans issue, and also possesses nice field-device contrast. Light marks and scuffs are consistent with the grade. Population: 62 in 65 Deep Mirror Prooflike, 4 DMPL finer (8/13). NGC ID# 2556, PCGS# 97185

- 5747 1888-S MS64 PCGS. CAC.** Relatively few 1888-S dollars were found in the Redfield Hoard, and as a result not as many are available, especially in high grades, as one might imagine. The surfaces seen here are thickly toned with gray over most of each side that is accented by golden-russet around the devices and rims. NGC ID# 2557, PCGS# 7186

- 5748 1888-S MS64+ PCGS. CAC.** Broad silver luster with touches of frost on the high points and small flecks of gray patina. A few small scrapes near Liberty's eye contribute to the grade. NGC ID# 2557, PCGS# 7186

- 5749 1888-S MS64+ PCGS. CAC.** Only the faintest hint of toning is present on this high-end near-Gem example. The coin is well struck and lustrous. The number of surface marks is minimal and primarily consists of light grazes. NGC ID# 2557, PCGS# 7186

1888-S Dollar, Highly Lustrous MS65

- 5750 1888-S MS65 PCGS.** The highly lustrous surfaces of this S-mint Gem display whispers of peripheral golden-tan color on the obverse, while olive-green dominates the reverse. Well struck, and devoid of all but a few grade-consistent marks. The 1888-S Morgan dollar is a better date from a small mintage of 657,000 pieces.
Ex: Central States Signature (Heritage, 4/2008), lot 2756. NGC ID# 2557, PCGS# 7186

**1888-S Morgan Dollar, MS65
Low-Mintage Better Date**

- 5751 1888-S MS65 PCGS.** Potent cartwheel luster provides this Gem with a pleasing appearance. Only a few tiny areas of toning are present on this brilliant piece. The coin displays a strong level of detail with only minor incompleteness present at the centers. The obverse includes a few small areas of roller marks. PCGS has awarded higher numeric grades to only 21 examples (8/13). NGC ID# 2557, PCGS# 7186

**1888-S Silver Dollar, MS65
Bright and Lustrous**

- 5752 1888-S MS65 PCGS.** The 1888-S Morgan dollar is a better date from a small mintage of 657,000 pieces. This impressive Gem exhibits sharply detailed design elements and satin cartwheel mint luster. Subtle hints of rose are present on this brilliant Gem example. A few die striations are evident on Liberty's cheek. Only 21 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 2557, PCGS# 7186

**1888-S Dollar, MS65
Rare Any Finer**

- 5753 1888-S MS65 PCGS.** Soft reddish-gold patination is slightly more extensive and deeper on the reverse of this Premium Gem. The design elements are better struck than usually seen, with partial definition on the hair over Liberty's ear. The lustrous surfaces are minimally marked. Finer pieces are rare. NGC ID# 2557, PCGS# 7186

- 5754 1889 MS66 NGC.** Portions of the outer edges reveal attractive gold toning, primarily on the obverse. Otherwise, the coin is a bright silver-white color. Bold design definition and rich satin luster add to the eye appeal. NGC has awarded a higher numeric grade to a sole example (8/13). NGC ID# 2558, PCGS# 7188

- 5755 1889 MS66 PCGS.** This sharply detailed Premium Gem Morgan dollar displays vibrant mint luster and shades of emerald-green and lavender-gray toning, with most of the color at the peripheries. PCGS has graded five numerically finer examples (8/13). NGC ID# 2558, PCGS# 7188
- 5756 1889 MS66 PCGS.** Ex: The Jack Lee Estate Collection. Boldly detailed with glints of frost across the highest design elements. This immensely lustrous Premium Gem offers amazing eye appeal. Only five examples have been awarded higher numeric grades by PCGS (8/13).
Ex: *Houston Signature (Heritage, 12/2008), lot 2961, which realized \$977.50.* NGC ID# 2558, PCGS# 7188
- 5757 1889 MS66 NGC.** Satiny and untuned with minimal marks, as expected for an MS66. Remarkably few high-grade 1889 dollars are extant from a mintage that exceeded 21 million pieces. NGC ID# 2558, PCGS# 7188
- 5758 1889-CC — Improperly Cleaned — NGC Details. VF. VAM-2A.** The N in IN is clashed in front of the neck. This chestnut-gold and dove-gray key Carson City Morgan dollar is faintly hairlined but nonetheless acceptable to many collectors. The legends display traces of luster. NGC ID# 2559, PCGS# 7190
- 5759 1889-CC — Improperly Cleaned — NGC Details. VF.** This important Carson City key retains VF sharpness on the design elements and the surfaces are lightly abraded, but an unnatural sheen indicates this piece was cleaned at one time. The 1889-CC is prized in all grades and conditions.
- 5760 1889-CC VF25 PCGS.** Areas of gold radiate beneath the gray patina on this Choice VF representative. A mark on Liberty's cheek is the only abrasion worthy of individual mention. NGC ID# 2559, PCGS# 7190
- 5761 1889-CC VF30 NGC.** The 1889-CC Morgan dollar is the key to the Carson City series. Overall silver-gray color and even wear are present on this piece. Small areas of golden toning are present near 3 o'clock at the reverse rim. There are no surface marks worthy of individual mention. NGC ID# 2559, PCGS# 7190
- 5762 1889-CC — Edge Damage — NGC Details. AU.** An edge ding near 3 o'clock affects the reverse rim but is not noticeable on the obverse. Luster shimmers from design recesses, and the golden-brown toning is chiefly confined to the borders. NGC ID# 2559, PCGS# 7190
- 5763 1889-O MS64 PCGS.** This 1889-O Morgan dollar is spectacularly toned in shades of burnt-orange, violet, champagne-gold, and greenish-gray, with vibrant mint luster and well-detailed design elements. NGC ID# 255A, PCGS# 7192
- 5764 1889-O MS64 PCGS. CAC.** Faintly toned green-gold in parts of the fields but resounding silver elsewhere. Only minor softness affects the hair over Liberty's ear. NGC ID# 255A, PCGS# 7192
- 5765 1889-S MS65 PCGS.** Attractive shades of violet, gray, golden-brown, and amber toning enhance the well-preserved surfaces of this sharply detailed Gem. Vibrant mint luster on both sides adds to the considerable eye appeal. NGC ID# 255B, PCGS# 7194
- 5766 1889-S MS65 NGC.** Bright, shimmering mint luster characterizes this Gem Redfield Hoard issue. Sharp details are noted in the centers of each side, and both obverse and reverse are almost free from color. NGC ID# 255B, PCGS# 7194
- 5767 1889-S MS65 PCGS.** A lovely Gem with strong eye appeal, this piece retains brilliant surfaces that are virtually free of toning. The coin exhibits a bold strike with only minor incompleteness at the extreme centers. Faint roller marks are present on Liberty's face. Wispy die cracks bisect the upper portions of both of the eagle's wings. NGC ID# 255B, PCGS# 7194
- 5768 1889-S MS65 PCGS.** Flashy cartwheel luster and minimal abrasions provide this Gem with strong visual appeal. The surfaces are well struck, brilliant, and virtually untuned. A wonderful representative. NGC ID# 255B, PCGS# 7194

- 5769 1889-S MS65 PCGS. CAC. VAM-7.** The mintmark is nicely repunched. Vibrant orange, powder-blue, and rose-red toning encompasses this lustrous and well struck silver dollar. The reverse is unabraded and the obverse exhibits only wispy marks. NGC ID# 255B, PCGS# 7194

**1889-S Dollar, MS65 Prooflike
Seldom Seen With This Designation**

- 5770 1889-S MS65 Prooflike PCGS.** This S-mint issue only infrequently comes with strongly Prooflike surfaces, but this Gem delivers, with unquestioned reflectivity and minimal patina combining for great eye appeal. A few tiny flaws on the reverse contribute to the grade. As another measure of the conditional scarcity of this coin, the population at PCGS remains exactly the same as it was more than four years ago, when we previously offered this piece. Population: 5 in 65 Prooflike, 2 finer (8/13).
Ex: *Baltimore Signature (Heritage, 3/2009), lot 1369.* NGC ID# 255B, PCGS# 7195
- 5771 1890 MS65 PCGS.** Medium-gray in the centers with bold reddish-orange and blue-violet shadings around. Strong underlying luster and great eye appeal. PCGS has graded only one coin as MS66 or finer (8/13). NGC ID# 255C, PCGS# 7196
- 5772 1890 MS65 PCGS.** Areas of the peripheries display attractive gold color on this Gem. The centers reveal only minor incompleteness. Light clash marks are present on both sides, including near Liberty's mouth. Housed in an old green label holder. NGC ID# 255C, PCGS# 7196
- 5773 1890 MS65 PCGS.** An attractively struck Gem, this piece displays brilliant, untuned surfaces and pleasing cartwheel luster. A mark under WE on the reverse poses minimal distraction, if any. Only a single example has received a higher numeric grade from PCGS (8/13). NGC ID# 255C, PCGS# 7196
- 5774 1890 MS65 PCGS.** Solidly struck and shining, this piece displays occasional glimpses of sky-blue patina against silver-white surfaces. This Gem exhibits tremendous eye appeal. PCGS has graded only one coin numerically finer example of this strike- and luster-challenged issue (8/13).
Ex: *Baltimore Signature (Heritage, 3/2009), lot 1372.* NGC ID# 255C, PCGS# 7196
- 5775 1890 MS65 NGC.** Impressively lustrous and well-defined overall with just a trace of weakness at the hair over Liberty's ear. The minimally toned obverse shows just a few faint luster grazes, though a handful of more significant marks are noted on the eagle's breast. NGC has only certified five finer examples (8/13). NGC ID# 255C, PCGS# 7196
- 5776 1890 MS65 NGC.** Teal and russet toning appears at the outer edges of this lovely Gem exhibiting a pleasing strike, with only minor incompleteness at the centers. Rich luster adds to the eye appeal. Housed in a former generation holder. NGC has awarded higher numeric grades to only 5 examples (8/13). NGC ID# 255C, PCGS# 7196
- 5777 1890-CC Tail Bar AU55 PCGS. CAC. VAM-4.** A Top 100 Variety. The famous Tailbar variety is identified by a large die gouge that runs from the eagle's tail feathers to the wreath on the reverse. This Choice AU specimen is toned in pleasing shades of dusky gray and golden-brown and the surfaces are lightly abraded. PCGS# 87198

5778 1890-CC MS64 PCGS. Splashes of teal cover large portions of both sides of this near-Gem, with slate-gray, rose-tan, copper, and lilac also present. The design elements display a pleasing degree of detail. NGC ID# 255D, PCGS# 7198

5779 1890-CC MS64+ NGC. A virtually brilliant near-Gem of this scarcer Carson City Morgan issue. A pleasing strike and vibrant cartwheel luster ensure the eye appeal of this example. The fields are uncommonly smooth, and the portrait displays only faint grazes. NGC ID# 255D, PCGS# 7198

5780 1890-CC MS64 PCGS. CAC. VAM-5. The second C in the mintmark is clearly repunched north. A lustrous Choice Carson City Morgan that has a good strike and attractive preservation. Both sides display merely a hint of tan-gold toning. NGC ID# 255D, PCGS# 7198

5781 1890-CC MS64 PCGS. CAC. Carson City Morgan dollars are always popular with collectors and this attractive Choice example should be a welcome addition to a fine collection. The design elements are well-detailed and the creamy surfaces show only minor contact marks. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65
Very Rare Any Finer**

5782 1890-CC MS65 NGC. The 1890-CC Morgan dollar was not well represented in the Treasury releases of the 1960s, and high-grade specimens are very rare today. A well struck Gem, this representative displays a high degree of eye appeal. Radiant, gleaming white surfaces remain almost completely untuned save for a few flyspecks of gray. The strike was well executed, providing this piece with a strong level of design detail. The faint parallel roller marks on the chin are as-made. Census: 91 in 65, 2 finer (8/13). From *The Joan Carroll Collection*. NGC ID# 255D, PCGS# 7198

5783 1890-CC MS63 Prooflike NGC. The reflective prooflike fields of this attractive Select specimen show a few traces of greenish-gold toning and some minor handling marks that explain the grade. Census: 96 in 63 Prooflike, 71 finer (8/13). NGC ID# 255D, PCGS# 7199

5784 1890-CC MS63 Deep Mirror Prooflike ANACS. Outstanding white-on-black cameo contrast ensures the eye appeal of this better date Carson City dollar. Sharply struck, and smooth except for a single diagonal mark on the cheekbone. Brilliant save for a glimpse of rose toning on the reverse exergue.
Ex: Orlando FUN Signature (Heritage, 1/2002), lot 1160, which realized \$632.50. NGC ID# 255D, PCGS# 97199

**1890-CC Dollar, MS64 Deep Mirror Prooflike
Sharply Struck**

5785 1890-CC MS64 Deep Mirror Prooflike PCGS. CAC. The original mintage of the 1890-CC Morgan dollar was more than 2.3 million pieces, a generous mintage for the mint and the time. The mirrored fields are flashy, providing excellent contrast to the frosty devices. Areas of light tan patina are present on both sides. This near-Gem exhibits a sharp strike. PCGS has awarded higher numeric grades to only 20 examples (8/13). NGC ID# 255D, PCGS# 97199

5786 1890-O MS65 PCGS. Better-defined than often seen with just a touch of softness at the hair over the ear. Light golden touches settle over broadly lustrous silver surfaces. PCGS has graded only 20 examples as MS66 or finer (8/13). NGC ID# 255E, PCGS# 7200

5787 1890-O MS65 PCGS. A delightful Gem with sharply detailed design elements and especially vibrant mint luster. The well-preserved surfaces are enhanced by shades of sea-green and dark gray toning. PCGS has graded 20 numerically finer examples (8/13). NGC ID# 255E, PCGS# 7200

5788 1890-O MS65+ PCGS. This high-end Gem is sharply detailed in most areas, with just a touch of softness on the hair above the ear. Both sides are lustrous and well-preserved, with hints of golden-tan toning. NGC ID# 255E, PCGS# 7200

5789 1890-S MS65 PCGS. Attractive shades of sea-green and crimson-gray toning enhance the well-preserved obverse surfaces of this well-detailed Gem, while the reverse remains mostly brilliant. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 255F, PCGS# 7202

5790 1890-S MS65 NGC. Only the faintest hints of toning appear on this brilliant Gem. The attributes of this coin include a sharp strike and rich luster, along with minimal abrasions. This piece has strong visual appeal. NGC ID# 255F, PCGS# 7202

5791 1890-S MS65 PCGS. CAC. Dazzling luster and an intricate strike ensure the eye appeal of this well preserved and lightly toned Gem. A high mintage issue but elusive at the MS65 level. Encapsulated in an old green label holder. NGC ID# 255F, PCGS# 7202

**1890-S Dollar, MS66
Conditionally Rare Issue**

5792 1890-S MS66 PCGS. This impressive Premium Gem displays razor-sharp definition. The brilliant fields exhibit only a few hints of darker toning. Vibrant cartwheel luster creates tremendous eye appeal. The abrasions are minimal and minor. PCGS has awarded higher numeric grades to a mere 6 examples (8/13). NGC ID# 255F, PCGS# 7202

- 5793 1891 MS64 PCGS. CAC.** The obverse is richly toned with green at the rims, blue across most of the interiors, and a violet-gold core. The reverse offers lighter silver, gold, and orange hues with significant cartwheel luster. NGC ID# 255G, PCGS# 7204
- 5794 1891-CC MS64 NGC. VAM-3.** A Top 100 Variety. A brilliant and lustrous Carson City near-Gem with unmarked fields and minor contact on the portrait. The "Spitting Eagle" variety is popular though it emerged in quantity from the GSA auctions. NGC ID# 255H, PCGS# 7206
- 5795 1891-CC MS64 PCGS.** Portions of the outer edges on both sides of this brilliant coin reveal attractive golden-orange toning. Cartwheel luster and a bold level of design detail are additional attributes of this pleasing near-Gem representative. NGC ID# 255H, PCGS# 7206
- 5796 1891-CC MS64 PCGS. VAM-3.** A Top 100 Variety. The familiar "Spitting Eagle" variety, also interesting for its repunched first C in the mintmark. Lustrous and nicely struck with delicate almond-gold toning and no consequential marks. NGC ID# 255H, PCGS# 7206
- 5797 1891-CC MS64 PCGS.** An attractive near-Gem example, this piece reveals only a few small, scattered areas of light toning. The coin is well struck and lustrous. NGC ID# 255H, PCGS# 7206
- 5798 1891-CC MS64 PCGS.** A choice Morgan dollar from the famous Carson City Mint, this piece offers vibrant mint luster and well-detailed design elements, with hints of golden-tan toning. NGC ID# 255H, PCGS# 7206
- 5799 1891-CC MS64 PCGS. VAM-3.** A Top 100 Variety. The memorable "Spitting Eagle" variety, seen on many of the GSA auction examples of the Carson City issue. Delicate honey-gold and sky-blue toning graces this lustrous Choice silver dollar. The reverse is well preserved. NGC ID# 255H, PCGS# 7206
- 5800 1891-CC MS63 Deep Mirror Prooflike PCGS.** Although the surfaces of this Select Mint State example show myriad marks that are reflected in the deeply mirrored fields, this example exhibits excellent field-to-device contrast with brilliant surfaces and only a trace of toning. NGC ID# 255H, PCGS# 97207
- 5801 1891-S MS65 PCGS.** Mingled shades of greenish-gold, lavender-gray, and amber toning grace the well-preserved surfaces of this attractive Morgan dollar. This coin displays vibrant mint luster and well-detailed design elements. NGC ID# 255K, PCGS# 7210
- 5802 1891-S MS65 PCGS.** A well-detailed Gem, with vibrant mint luster, brilliant surfaces, and terrific eye appeal. The 1891-S is rarely seen in higher grades, as surface abrasions are frequently a problem. NGC ID# 255K, PCGS# 7210
- 5803 1891-S MS65 PCGS. CAC.** A lovely Gem, both sides of this coin display pleasing satin surfaces and cartwheel luster. The brilliant surfaces are free of toning, adding to the eye appeal. This lovely piece displays a bold strike. A tiny streak of as-made struck-in grease appears to the right of the eagle's left wing. NGC ID# 255K, PCGS# 7210
- 5804 1891-S MS65 Prooflike PCGS.** A delightful prooflike Gem with bold design details and excellent cameo contrast between the fields and devices. This fully brilliant example approaches the finest prooflike grade that PCGS has ever assigned. Population: 23 in 65 Prooflike, 1 finer (8/13).
Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1400. NGC ID# 255K, PCGS# 7211

1891-S Morgan Dollar, MS65 Prooflike Bright and Lustrous

- 5805 1891-S MS65 Prooflike PCGS. CAC.** A pleasing prooflike Gem representative with bold design details and excellent cameo contrast between the fields and devices, this virtually untoned coin has nice eye appeal. The design elements display strong detail. The reverse exhibits a number of tiny as-made strike-throughs. Only a small percentage of 1891-S dollars are prooflike. Population: 23 in 65 Prooflike, 1 finer (8/13). NGC ID# 255K, PCGS# 7211
- 5806 1892 MS64 PCGS.** Rich golden-brown toning appears at the margins, while the devices and fields are generally untuned. Suitably struck, and lacking any mentionable marks. The 1892 is low mintage by Philadelphia standards.
Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5362. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, MS65 Conditionally Rare Issue

- 5807 1892 MS65 PCGS.** The obverse of this Gem features rich toning in shades including teal, copper-gold, sea-green, plum, denim-blue, and red. The reverse is largely almond-gold with rich toning at the peripheries. Among the colors are orange, golden-brown, denim-blue, and plum. The centers exhibit minor incompleteness of strike. Only 4 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 255L, PCGS# 7212
- 5808 1892-CC AU58 NGC.** Only the slightest trace of wear shows on the sharply detailed design elements of this attractive near-Mint dollar. The surfaces are lightly abraded and retain much original mint luster with a few hints of golden-tan toning. NGC ID# 255M, PCGS# 7214
- 5809 1892-CC MS61 PCGS.** Potent luster and gleaming, untuned surfaces provide this piece with nice eye appeal. The coin exhibits a sharp strike, including at the centers. Abrasions, primarily on the obverse, held this lovely example from a higher grade. Housed in an old green label holder. NGC ID# 255M, PCGS# 7214
- 5810 1892-CC MS62 PCGS.** This attractive example sports bright, semireflective fields on each side. The otherwise brilliant surfaces have just the slightest tinge of color when the coin is angled just so. Sharply struck. NGC ID# 255M, PCGS# 7214
- 5811 1892-CC MS62 ANACS.** Areas of light toning appear at the outer edges of this Morgan dollar. The colors include gold and russet. Scattered abrasions, primarily on the obverse, resulted in the grade. Housed in a small format holder. NGC ID# 255M, PCGS# 7214

- 5812 1892-CC MS63 NGC.** Bright silver with little toning aside from a few milky spots across the obverse. Great eye appeal for this penultimate Carson City issue despite light scrapes and abrasions. NGC ID# 255M, PCGS# 7214
- 5813 1892-CC MS63 PCGS.** A few roller marks appear at Liberty's ear, and some minor luster grazes combine to determine the grade on this untuned Select Mint State example. The silver-white surfaces show much eye appeal. Interesting die cracks and die clashes appear on the reverse. NGC ID# 255M, PCGS# 7214
- 5814 1892-CC MS62 Prooflike PCGS.** A bright, flashy Prooflike piece, this coin has a strong degree of visual appeal. Boldly detailed design elements add to the attractiveness of this Morgan. Moderate hairlines are present. NGC ID# 255M, PCGS# 7215

**1892-CC Dollar, MS64 Prooflike
Lightly Toned**

- 5815 1892-CC MS64 Prooflike PCGS.** Both sides are fully prooflike with mirrored fields and lustrous devices. Light marks are reflected in the fields and prevent a Gem grade for this piece. The otherwise fully brilliant surfaces show a slight trace of light gold toning near the borders on each side. Population: 81 in 64 Prooflike, 10 finer (8/13).
Ex: Charlotte ANA Signature (heritage, 2007), lot 1237. NGC ID# 255M, PCGS# 7215
- 5816 1892-O MS64 PCGS.** This attractive Choice Morgan dollar exhibits well-detailed design elements and vibrant mint luster on both sides, with delicate shades of champagne-gold toning. NGC ID# 255N, PCGS# 7216
- 5817 1892-O MS64 PCGS. CAC.** A frosty near-Gem, this brilliant white New Orleans dollar has slight weakness at the center as always for this issue. Both sides are lustrous and untuned. NGC ID# 255N, PCGS# 7216

**1892-O Morgan, MS65
Lustrous and Well-Preserved**

- 5818 1892-O MS65 NGC.** Orange-gold patination encircles the peripheries of this Gem O-mint representative, being somewhat more intense on the obverse. The strike is above-average for this notoriously poorly struck issue; some definition is apparent in the eagle's breast feathers, though the hair at Liberty's ear is soft. The surfaces possess nice luster and are quite well-preserved for the grade.
Ex: Reuben Reinstein Collection/Summer FUN Signature (Heritage, 7/2007), lot 1573. NGC ID# 255N, PCGS# 7216
- 5819 1892-S AU50 PCGS.** The surfaces are mostly brilliant and there is slight reflectivity noted in the fields. Attractive overall with no notable defects. A key issue and at this grade level a good value. NGC ID# 255P, PCGS# 7218

- 5820 1892-S AU50 PCGS.** Pleasing luster remains on this lightly toned example. The obverse displays shades of gold, russet, and teal along portions of the outer edges. The reverse is primarily untuned. Thin die cracks bisect the upper portions of the eagle's wings. NGC ID# 255P, PCGS# 7218
- 5821 1892-S AU50 PCGS.** The 1892-S Morgan dollar is an available issue in circulated grades but it is surprisingly challenging in higher the higher levels of Mint State. This lightly abraded specimen retains much of its original mint luster and design detail. NGC ID# 255P, PCGS# 7218
- 5822 1892-S AU53 PCGS. CAC.** Mirrored fields and frosty devices produce a moderate prooflike effect on this piece from a semikey issue, with much luster remaining and a glint of gold on the silver-white surfaces. Scattered marks are present, as expected at this grade level. NGC ID# 255P, PCGS# 7218
- 5823 1893 MS62 PCGS.** Powder-blue and peach patina embraces the borders of this shimmering and nicely struck example. This pleasing survivor is cleaner than customary for an MS62 and displays a strong strike. The 1893 ranks among the lowest mintage Philadelphia issues.
Ex: Summer FUN West Palm Beach Signature (Heritage, 7/2007), lot 1579. NGC ID# 255R, PCGS# 7220

- 5824 1893 MS63 NGC.** The lower obverse rim displays small areas of golden-brown color on this otherwise untuned Select representative. The strike is sharp and this piece displays attractive satin luster. NGC ID# 255R, PCGS# 7220
- 5825 1893 MS63 PCGS. CAC.** Beautiful orange-red toning dominates the obverse margin and visits the reverse periphery. Lustrous and pleasing with a smooth reverse and only minor obverse contact. Certified in an old green label holder. NGC ID# 255R, PCGS# 7220
- 5826 1893 MS64 PCGS.** A strongly lustrous near-Gem, this piece displays solid detail. The slightly hazy surfaces are silver-white save for two spots of translucent rose patina, one at Liberty's throat and the other near 8 o'clock at the rim. A great example from an issue of fewer than 400,000 pieces.
Ex: ANA Milwaukee Signature (Heritage, 8/2007), lot 2381. NGC ID# 255R, PCGS# 7220
- 5827 1893-CC XF40 NGC. CAC.** Deep cream-gray toning envelops this minimally abraded key date Carson City Morgan. High point wear is moderate, and traces of luster are evident within the wings and legends. NGC ID# 255S, PCGS# 7222
- 5828 1893-CC AU53 NGC.** This pleasing AU53 specimen retains significant amounts of original mint luster and the design elements show just a trace of wear. The surfaces are minimally abraded for the grade. NGC ID# 255S, PCGS# 7222

**1893-CC Select Morgan Dollar
Sharply Struck, Minimally Abraded
A High-Demand Issue**

- 5829 1893-CC MS63 NGC.** The 1893-CC turned up in the Redfield hoard, but it was conspicuously absent from the GSA sales. The issue is always in demand, and Mint State examples are quickly absorbed by the market. The present coin is sharply struck, with minimal handling marks for the grade. The surfaces are essentially brilliant on each side.
Ex: Houston Signature (Heritage, 12/2009), lot 1132. NGC ID# 255S, PCGS# 7222

5830 1893-O AU53 PCGS. CAC. Wisps of grayish-champagne toning appear on both sides of this lightly worn New Orleans dollar. This is a scarce issue from a well-known date in Morgan dollar coinage. NGC ID# 255T, PCGS# 7224

5831 1893-O AU58 PCGS. Slight highpoint friction on the centers denies an Uncirculated grade, but there is no shortage of cartwheel shimmer, and no unpleasant marks are detected. A low mintage date, scarcer in better grades than the similar production 1893. *Ex: Central States St. Louis Signature (Heritage, 5/2005), lot 9824, which realized \$1,207.50.* NGC ID# 255T, PCGS# 7224

5832 1893-O AU58 PCGS. This much-needed O-mint has a low mintage of only 300,000 pieces. The 1893-O is scarce to rare in Uncirculated condition, especially the better grades. This near-Mint example has bright faces with just the slightest accent of golden color around the margins. Just the slightest bit of friction can be seen. *From The Strawberry Fields Collection.* NGC ID# 255T, PCGS# 7224

1893-O Dollar, MS61 Semiprooflike and Above Average

5833 1893-O MS61 NGC. The 1893-O Morgan dollar is a challenging issue in mint condition because so many survivors are peppered with bagmarks. This factor severely limits certified examples grading above MS63. This MS61 coin has far fewer and less severe marks than would be expected for the grade designation. Also, the strike is better than usually seen, including decent detail in the centers. The luster, however, is satiny and contrasted against the bright semiprooflike finish seen in the fields. All in all, this is a nice coin for the issue and the MS61 grade. NGC ID# 255T, PCGS# 7224

5834 1893-S — Filed Rims — PCGS Genuine. The PCGS holder indicates Filed Rims as the reason, or one of the reasons, PCGS deemed this coin not gradable. In our opinion, this coin has the sharpness of a VF specimen that has had its rims filed. The 1893-S is the low-mintage business-strike key to the Morgan dollar series. NGC ID# 255U, PCGS# 7226

5835 1893-S — Improperly Cleaned — NGC Details. VG. Rich walnut-brown toning blankets this key date silver dollar. Careful evaluation beneath a loupe reveals parallel hairlines and moderately glossy surfaces. A hair-thin mark crosses the cheek and neck. NGC ID# 255U, PCGS# 7226

5836 1893-S — Scratch — PCGS Genuine. VG Details. Deep cream-gray toning encompasses this circulated key date Morgan dollar. A thin vertical obverse scratch is noted between the rim at 11 o'clock and Liberty's forehead. Both sides are hairlined. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF Details

5837 1893-S — Improperly Cleaned — NGC Details. VF. Unnatural silver-white surfaces are displayed on both sides with peripheral gold and bluish-gray toning on the obverse, the reverse showing even gray patina. However, still an important piece that will find a home in an otherwise complete Morgan dollar collection. NGC ID# 255U, PCGS# 7226

5838 1894 XF40 ANACS. Aside from the proof-only 1895, the 1894 is the rarest Philadelphia issue of the series. This piece displays dusky gray surfaces with hints of rose-gold. As expected at this grade level abrasions are present, most noticeably on Liberty's cheek and on the reverse between the last S in STATES and the O in OF. Housed in a small format holder. NGC ID# 255V, PCGS# 7228

5839 1894 — Improperly Cleaned — NGC Details. XF. The 1894 is the lowest-mintage Morgan dollar from the Philadelphia Mint. This lightly cleaned example retains XF sharpness on the design elements and the surfaces show a scattering of minor abrasions. NGC ID# 255V, PCGS# 7228

5840 1894 XF40 PCGS. CAC. Lightly worn and minimally abraded for the grade, this low-mintage Morgan dollar displays attractive shades of champagne-gold and lavender-gray toning, with a minor rim bruise at 6 o'clock on the reverse. NGC ID# 255V, PCGS# 7228

5841 1894 XF45 PCGS. A lightly worn and moderately abraded example from an issue of just 110,000 business strikes. Mint luster remains clearly visible on portions of this lovely representative. NGC ID# 255V, PCGS# 7228

5842 1894 XF45 NGC. This Choice XF Morgan dollar displays attractive shades of pink and sea-green patina, with lightly abraded surfaces and traces of mint luster in sheltered areas. From a low mintage of 110,000 pieces. NGC ID# 255V, PCGS# 7228

5843 1894 — Improperly Cleaned — NGC Details. AU. This slate-gray and almond-gold key date silver dollar exhibits substantial luster along with minor hairlines. The eagle's breast shows only a trace of wear. There are no noticeable abrasions. NGC ID# 255V, PCGS# 7228

5844 1894 AU50 PCGS. An attractive, lightly circulated example of this low-mintage date, with undimmed mint luster and just a touch of wear on the high points of the design elements. A few hints of gray and tan toning visit the pleasing surfaces. NGC ID# 255V, PCGS# 7228

5845 1894 — Rim Damaged — ANACS. AU55 Details. A few minor abrasions show on both sides of this lustrous, low-mintage Morgan dollar, and a trace of wear is evident on the devices. A minor rim bruise is evident at 1 o'clock on the obverse, but the noted damage seems to be hidden by the holder. NGC ID# 255V, PCGS# 7228

5846 1894 AU58 NGC. Subtle hints of rose color appear on this attractive near-Mint representative. The brilliant surfaces and satin luster provide this piece with a strong degree of eye appeal for the grade. A few marks on Liberty's face pose minimal distraction. *From The Joan Carroll Collection.* NGC ID# 255V, PCGS# 7228

1894 Dollar, MS61
Popular Morgan P-Mint Issue

5847 1894 MS61 NGC. CAC. The celebrated 1894 Philadelphia Morgan dollar ranks among the most-pursued P-mints in the series and is always popular with series fans. This piece shows a few scattered scrapes and marks on Liberty that account for the grade, but the satiny silver surfaces show much appealing luster remaining, mostly untuned silver-gray with a thin ring of pinkish-rose most prominent at the right obverse rim. The reverse shows a similar color scheme with scattered but smaller marks. NGC ID# 255V, PCGS# 7228

5848 1894-O MS62 PCGS. Cartwheel luster and brilliant, virtually untuned surfaces provide this piece with a strong degree of visual appeal. A small streak of as-made struck-in grease crosses Liberty's neck. Numerous grazes and marks, though minor, limited the grade of this attractive Morgan dollar. NGC ID# 255W, PCGS# 7230

5849 1894-O MS62 PCGS. Rich satin luster and virtually untuned surfaces provide this example with a strong degree of eye appeal. Scattered marks are present, but there is none overly distracting. NGC ID# 255W, PCGS# 7230

5850 1894-S MS62 PCGS. The 1894-S is one of the few relatively available issues from the mid-1890s. This is a lightly toned example with bright underlying mint luster. Well struck. No noticeable abrasions. NGC ID# 255X, PCGS# 7232

5851 1894-S MS64 PCGS. Ex: The Carson Silver Collection. This pleasing untuned near-Gem displays strong luster and well struck devices. Light roller marks are present on the central devices. Housed in a green label holder.

Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 1999. NGC ID# 255X, PCGS# 7232

5852 1895-O AU53 NGC. Considerable bright luster remains on this semikey Morgan dollar. Touches of gold-orange grace the rims, while the moderately abraded interiors remain silver. NGC ID# 255Y, PCGS# 7236

5853 1895-O AU55 PCGS. The 1895-O is well established as a challenging issue in the Morgan dollar series. Subtle apricot-champagne toning adds to the attractiveness of this lightly circulated piece. This is a lovely representative. NGC ID# 255Y, PCGS# 7236

5854 1895-O AU55 NGC. The centers have modest rub, but bright luster flows unhindered across the peripheral stars and legends. A problem-free specimen of this scarce and desirable lower mintage issue.

Ex: *FUN Signature* (Heritage, 1/2003), lot 8156; *Long Beach Signature* (Heritage, 2/2003), lot 7526. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, AU58
Remarkably Clean Surfaces

5855 1895-O AU58 PCGS. Slivers of deep reddish-orange patina visit the left margins of the obverse of this near-Mint State Morgan. The reverse is essentially color-free. The design elements are well-struck save for the typical softness in the centers. Despite having seen some circulation, both sides are remarkably devoid of mentionable marks. This pleasing high-end AU example is an excellent alternate choice to a significantly more expensive Uncirculated piece. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, Near-Mint
Scarce O-Mint Issue

5856 1895-O AU58 NGC. The year 1895 needs no introduction to Morgan dollar specialists. This near-Mint State piece would certainly make a cost-effective alternative to an Uncirculated example, boasting as it does much satin luster remaining over pale yellow centers tinged with cinnamon near the rims. A few marks on Liberty's cheek are in concert with the grade. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, Exceptional AU58

5857 1895-O AU58 PCGS. For the grade, this is an exceptional 1895-O dollar with a good amount of luster. Hints of champagne toning are evident on both sides of this near-Mint State coin, each of which is minimally marked. Only the barest trace of high point friction keeps this from the full Mint State category.

Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1126. NGC ID# 255Y, PCGS# 7236

5858 1895-S XF40 NGC. This is a nice, problem-free circulated example of this scarce, semikey S-mint dollar. Each side has medium gray patina with charcoal accents surrounding the devices. Very nice for an XF. NGC ID# 255Z, PCGS# 7238

- 5859 1895-S XF40 PCGS.** Even, light wear gives this elusive dollar solid eye appeal. The dove-gray surfaces have apricot undertones, with darker toning at the rims.
Ex: *Denver Signature (Heritage, 8/2006)*, lot 3124. NGC ID# 255Z, PCGS# 7238
- 5860 1895-S XF45 NGC.** Rubbed mostly on the high points with the fields faintly luminous. Pearl-gray interiors yield to gold and peach at the rims. Marks generally are wispy. NGC ID# 255Z, PCGS# 7238
- 5861 1895-S XF45 PCGS.** A faintly toned example, this coin displays a pleasing appearance for the grade. Light wear appears on the high points of the design elements of this low-mintage Morgan dollar, and a scattering of minor grade-consistent abrasions are evident on both sides. NGC ID# 255Z, PCGS# 7238
- 5862 1895-S XF45 NGC.** The 1895-S Morgan dollar claims a low mintage of 400,000 pieces. This lightly worn and minimally abraded Choice XF specimen shows traces of prooflike reflectivity in protected areas. NGC ID# 255Z, PCGS# 7238
- 5863 1895-S AU50 NGC.** The 1895-S is a low-mintage date in the Morgan dollar series. Subtle hints of golden toning appear on portions of this example. Considerable luster remains on both sides, despite the presence of minor wear. NGC ID# 255Z, PCGS# 7238
- 5864 1895-S — Cleaning — PCGS Genuine. AU Details.** The 1895-S Morgan dollar is prized by collectors because of its low mintage of 400,000 pieces. This still-attractive specimen is lightly worn and abraded, but the surfaces show signs of a light cleaning. NGC ID# 255Z, PCGS# 7238
- 5865 1896 MS66+ PCGS.** The obverse of this high-end Premium Gem is mostly brilliant, while the reverse is spectacularly toned in shades of violet and burnt-orange. The design elements are well-detailed and both sides radiate vibrant mint luster. NGC ID# 2562, PCGS# 7240
- 5866 1896 MS66+ PCGS. CAC.** Well-defined overall with only tiny small luster breaks and marks. Toning is largely pale silver with a touch of gold at the bottom right obverse. NGC ID# 2562, PCGS# 7240
- 5867 1896-S AU58 NGC.** Cartwheel luster remains on this pleasing near-Mint Morgan dollar. Areas of light toning are present, primarily at the outer edges. NGC ID# 2564, PCGS# 7244
- 5868 1897-O MS62 PCGS.** This well-detailed Morgan dollar shows just a touch of softness on the hair above the ear and vibrant mint luster is evident on both sides. The creamy surfaces show hints of golden-tan toning and a few minor signs of contact. NGC ID# 2566, PCGS# 7248
- 5869 1897-O MS62 ANACS.** Sea-green, plum, and golden-orange colors appear on this example. The centers reveal a minor incompleteness of strike. Housed in an ANA cache holder. NGC ID# 2566, PCGS# 7248
- 5870 1897-S MS66 PCGS.** Frosted on the high points with broad luster in light silver and little patina. This Premium Gem has great eye appeal for an issue that is conditionally rare any finer. NGC ID# 2567, PCGS# 7250
- 5871 1897-S MS64 Deep Mirror Prooflike PCGS. VAM-4.** The flag of the 1 in the date is repunched south. Brilliant with flashy fields, a sharp strike, and good cameo contrast. Certified in a green label holder. Population: 80 in 64 Deep Mirror Prooflike, 40 finer (8/13). NGC ID# 2567, PCGS# 97251
- 5872 1898 MS66+ PCGS. CAC.** Generally well-defined with understated but clear luster rolling around the fields. Hints of golden rim toning offset the light silver color elsewhere. Clearly better than the usual Premium Gem and just a few stray marks away from an even finer designation. NGC ID# 2568, PCGS# 7252

1898 Morgan Dollar, MS67 Frosty and Impressive

- 5873 1898 MS67 PCGS.** Liberty's cheek and neck, the obverse fields, the eagle breast on the reverse, all are free of visible contact on this lovely Superb Gem. The surfaces are untoned, save for a faint sprinkling of cinnamon at the extreme rims. The strike is sharp overall, and the eye appeal is top-notch. Population: 41 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 2568, PCGS# 7252
- 5874 1898 MS66 Prooflike PCGS.** Although the 1898 is plentiful in Mint State, high grade prooflike pieces are very scarce. This lovely Premium Gem example is well struck and largely free of toning. A few as-made marks are present, primarily strike-throughs to the right of the left portion of the wreath on the reverse. Population: 11 in 66 (1 in 66+) Prooflike, 0 finer (8/13). NGC ID# 2568, PCGS# 7253
- 5875 1898 MS66 Prooflike PCGS.** Sharply struck, this Premium Gem example remains moderately reflective beneath a thin haze. The obverse devices display slightly less frost than those on the reverse. Population: 11 in 66 (1 in 66+) Prooflike, 0 finer (8/13). NGC ID# 2568, PCGS# 7253
- 5876 1898-O MS67 PCGS.** Displaying tremendous eye appeal, this Superb Gem has bright surfaces, a well-executed strike, and minimal contact marks. The usual weakness appears over Liberty's ear, however the hair is sharper than often seen. PCGS has graded no finer examples, while NGC has only assigned a higher grade to one piece (8/13). NGC ID# 2569, PCGS# 7254
- 5877 1898-O MS67 NGC.** This late-date O-mint dollar is wonderfully preserved and displays the expected satiny mint luster common to most New Orleans products. Both sides are brilliant and fully struck. NGC ID# 2569, PCGS# 7254
- 5878 1898-O MS67 PCGS.** Brilliant, untuned surfaces and rich luster provide this Superb Gem with a strong degree of visual appeal. The piece exhibits minor incompleteness of strike at center. Very few abrasions are present and they are minor. NGC ID# 2569, PCGS# 7254
- 5879 1898-O MS67 PCGS. CAC.** A gorgeous Superb Gem with many attributes, among them exemplary luster and brilliant, smooth surfaces. The strike is intricate despite its New Orleans origin. The rims reveal areas of gold toning and a striking anomaly appears near 11 o'clock on the reverse. PCGS has yet to award a grade of MS68 or higher to a single example (8/13). NGC ID# 2569, PCGS# 7254
- 5880 1898-S MS65 NGC. CAC.** Silver cartwheel luster with a touch of frost visiting Liberty's portrait and the eagle. Minimally toned and appealing, this is a Gem to remember. NGC ID# 256A, PCGS# 7256

**1899 Morgan Dollar, MS66 Prooflike
Popular Low-Mintage Issue**

5881 1899 MS66 Prooflike PCGS. CAC. The 1899 is a popular Morgan dollar issue due to its low mintage of only 330,000 pieces. The sharply detailed, frosty devices of this attractive Premium Gem are accentuated by gleaming, reflective fields. The minimally abraded surfaces reveal hints of champagne, tan, and gray color. This is an appealing example. Population: 7 in 66 Prooflike, 0 finer (8/13). NGC ID# 256B, PCGS# 7259

5882 1899-O MS66+ PCGS. CAC. In-person inspection will confirm that there is very little that separates this 66+ from a 67. The brilliant surfaces exude thick, satiny mint luster and there are no noticeable abrasions. Sharply defined throughout. NGC ID# 256C, PCGS# 7260

5883 1899-O MS67 PCGS. Each side is remarkably clean, the bright satiny mint luster flows unimpeded by even the most trivial abrasions. Essentially this Superb dollar presents as brilliant, but close examination reveals just a hint of pale patina. Fully struck also. NGC ID# 256C, PCGS# 7260

5884 1899-O MS67 PCGS. Brilliant untuned surfaces, boldly struck devices, rich luster, and minimal abrasions are attributes of this gorgeous Superb Gem survivor. The red spot that appears in the image near Liberty's lips is encapsulated within the holder. Population: 94 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 256C, PCGS# 7260

5885 1899-O MS67 PCGS. CAC. Considering the large numbers of 1899-O dollars released from the Treasury in autumn 1962 one would think that this date would be more available than it is in Superb Gem condition. But only about 200 pieces have been so graded by PCGS and NGC, and one is finer (a PCGS MS68 coin). Bright, satiny mint luster issues from the untuned, immaculately preserved surfaces of this MS67, and the strike is solid throughout. Outstanding eye appeal. Population: 94 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 256C, PCGS# 7260

5886 1900-O/CC MS65 PCGS. Evidence of both C's can be seen, but the one on the right has much stronger definition. Bright golden-rose toning is interspersed with brilliance on the obverse, while barely any color is seen on the reverse. Sharply struck. NGC ID# 256G, PCGS# 7268

5887 1900-O/CC MS65 PCGS. The undermintmark is faintly visible on each side of the O. The surfaces are bright and satiny, mostly untuned with just a hint of light golden toning present on each side. The strike is complete on each side and abrasions are minimal. NGC ID# 256G, PCGS# 7268

5888 1900-S MS65 PCGS. Small, scattered splashes of toning are present on both sides of this Gem, primarily at the outer edges. The colors include shades of gray-green, golden-brown, and orange. The design elements exhibit a pleasing level of detail. A few reed marks appear on Liberty's face. NGC ID# 256H, PCGS# 7270

5889 1900-S MS65 PCGS. The 1900-S Morgan is scarce in Premium Gem and extremely rare any finer, making Gem examples a more affordable alternative. Golden-brown and moss-green toning appears on both sides of this Gem. Attractive satin luster provides this piece with nice eye appeal. NGC ID# 256H, PCGS# 7270

5890 1900-S MS65 NGC. CAC. Slender arcs of autumn-gold and sea-green are limited to the peripheries of this well struck, lustrous Gem. The obverse is especially free from marks. Encapsulated in a prior generation holder. NGC ID# 256H, PCGS# 7270

**1900-S Silver Dollar, MS66
Bright and Sharply Struck**

5891 1900-S MS66 PCGS. Bright luster envelops both sides of this Premium Gem 1900-S Morgan, complementing barely discernible speckles of orange patina. The surfaces are free of mentionable marks. This sharply struck piece is among the high end of certified survivors, as PCGS has seen only two numerically finer (8/13). Ex: Fort Worth Signature (Heritage, 3/2010), lot 1648. NGC ID# 256H, PCGS# 7270

**1900-S Morgan Dollar, MS66
Only Two Numerically Finer Coins at PCGS**

5892 1900-S MS66 PCGS. Attractive golden color is present on both sides of this Premium Gem representative. Small, scattered areas of golden-brown color are also present. The coin displays minor incompleteness of strike at the centers. Pleasing luster adds to the eye appeal of this lovely piece. PCGS has awarded higher numeric grades to only 2 examples (8/13). NGC ID# 256H, PCGS# 7270

5893 1901 AU58 PCGS. CAC. The well-detailed design elements of this near-Mint Morgan dollar show a trace of wear on the high points. Strong mint luster is evident under shades of golden-tan and silver-gray toning. NGC ID# 256J, PCGS# 7272

**1901-S Morgan Dollar, MS65
Challenging in Gem Condition**

- 5894 1901-S MS65 PCGS.** The 1901-S is quite scarce in the context of the Morgan dollar series. Gems in particular are in great demand from collectors and investors as higher-grade examples are difficult to locate. In this regard, PCGS and NGC have certified fewer than 40 specimens above MS65, a number of which are likely resubmitted coins. The lustrous surfaces of this Gem are nearly brilliant, and an impressive strike leaves relatively strong definition on the motifs. A few minor marks preclude an even finer grade.
Ex: Central States Signature (Heritage, 4/2008), lot 2996. NGC ID# 256L, PCGS# 7276

- 5895 1902 MS66+ PCGS.** The 1902 is a curiously unavailable late-date Morgan dollar in high grades. This is a notable example that exhibits much stronger luster than normally encountered. The strike is strong and there is just the slightest, almost indiscernible hint of color present. NGC ID# 256M, PCGS# 7278

- 5896 1902 MS66 PCGS. CAC.** Frosty luster and brilliant, virtually untuned surfaces provide this Premium Gem with pleasing eye appeal. The extreme centers reveal minor incompleteness of strike. PCGS has awarded higher numeric grades to only 25 examples (8/13). NGC ID# 256M, PCGS# 7278

**1902 Morgan Dollar, MS67
None Numerically Finer at Either Service**

- 5897 1902 MS67 NGC.** Satin luster and bright surfaces provide this Superb Gem example with strong eye appeal. This piece exhibits a strong strike. The eagle's breast does not display the level of detail that earlier issues did because the new reverse hub that was introduced in 1900 was not as intricately detailed on the area. Census: 15 in 67, 0 finer (8/13). NGC ID# 256M, PCGS# 7278

- 5898 1902-O MS66+ PCGS. CAC.** A lovely high-end Premium Gem with few rivals, this piece exhibits only minor incompleteness of strike at the centers. Golden-brown and teal toning appears at the outer edges, particularly on the reverse. Cartwheel luster is among the many attributes this coin possesses. Population: 23 in 66+, 9 finer (8/13). NGC ID# 256N, PCGS# 7280

- 5899 1902-S MS65 PCGS.** Toning is present on this Gem example, primarily at the outer edges. The colors include shades of golden-brown, russet, plum, sea-green, and yellow-gold. Rich satin luster provides this piece with a lovely appearance. The centers reveal a minor incompleteness of strike, as is generally the case. PCGS has awarded higher numeric grades to only 38 examples (8/13). NGC ID# 256P, PCGS# 7282

- 5900 1902-S MS65 PCGS.** Very few finer examples of this issue survive to this day. This is a challenging issue for collectors, as many or most are lightly struck, and often they have parallel roller marks across the central obverse and reverse devices. The present offering is an important opportunity as this Gem does not have any of the usually seen roller marks. Although not fully struck, it is far sharper than most. Both sides have satiny white luster with splashes of pale yellow toning on the obverse.
Ex: Dallas Signature (Heritage, 11/2005), lot 3644. NGC ID# 256P, PCGS# 7282

**1902-S Morgan Dollar, MS65
Difficult to Locate Any Finer**

- 5901 1902-S MS65 PCGS. CAC.** The 1902-S Morgan dollar, coming from a mintage of 1.53 million pieces, is plentiful through MS64. The population drops significantly at the MS65 level, and examples grading finer are difficult to locate. The lustrous surfaces of this Gem display light russet color at the margins. Strike softness shows in the centers, a typical feature of the issue, though some detail is apparent on the hair over Liberty's ear. Light roller marks are visible in the central areas of both sides, another typical characteristic of the 1902-S. PCGS and NGC combined have seen fewer than 40 specimens finer (8/13). NGC ID# 256P, PCGS# 7282

- 5902 1903-O MS66+ PCGS. CAC.** Wisps of light gold toning appear along the borders of this frosty ivory dollar. Considered a major rarity prior to the Treasury release of half a century ago, but today the 1903-O is only rare in circulated grades. NGC ID# 256S, PCGS# 7286

**1903-O Morgan Dollar, MS67
None Numerically Finer at Either Service**

- 5903 1903-O MS67 NGC.** The 1903-O was once considered a great rarity, before a number of sealed bags were shipped from Treasury vaults circa 1962. Rich satin luster and virtually untuned surfaces are among the many attributes of this Superb Gem representative. The design elements display a strong level of detail and the relatively few abrasions are minor. This coin has tremendous eye appeal. Census: 43 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 256S, PCGS# 7286

- 5904 1904 MS65 PCGS.** Both sides of this Gem are entirely toned in gold and gray with peripheral iridescence. The 1904 is a scarce date in higher grades and PCGS has only certified 17 finer examples (8/13). NGC ID# 256U, PCGS# 7290

**1904 Morgan, Rim-Toned MS65
Elusive in Higher Grades**

5905 1904 MS65 PCGS. CAC. The Gem level is seldom bettered for the 1904 Morgan issue, an elusive late-series issue from Philadelphia. The well-struck ivory-gray surfaces show rim accents of pale blue and sunset-orange on each side. NGC and PCGS combined have seen only about two dozen submissions numerically finer (8/13). NGC ID# 256U, PCGS# 7290

5906 1904-O MS67 NGC. Bright, shimmering mint luster is seen over the untuned surfaces of this Superb Gem. Well-defined for the issue, the last Morgan dollar struck at New Orleans. Census: 88 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 256V, PCGS# 7292

**1921 Morgan Dollar, MS66+
Only Seven Finer at PCGS**

5907 1921 MS66+ PCGS. CAC. Even though the Plus grading phenomenon is still a fairly recent one at NGC and PCGS, it is becoming increasingly important as a market differentiator and a Registry Set competitive tool. In the case of this 1921 Morgan, it serves to separate the 300-plus MS66 examples from the 12 in 66+ (including this coin) and the seven finer (8/13). (The CAC designation must also be considered a market differentiator.) This frosty piece is untuned silver-white and shows only a couple of tiny, minor ticks on Liberty's chin, but the cheek is quite clean. A few wispy die cracks appear on the peripheries of each side. The eye appeal is super. NGC ID# 256X, PCGS# 7296

**1921 Morgan, Frosty MS66+
Well-Struck and Top-Notch**

5908 1921 MS66+ PCGS. CAC. Only seven examples of the 1921 Morgan dollar have achieved the numerically finer grade of MS67, making this one of the finest-graded pieces available to legions of series collectors. The surfaces on this well-struck piece are frosty and coated with generous luster. A few tiny marks are inconsequential. NGC ID# 256X, PCGS# 7296

5909 1921-D MS66 NGC. Light golden-brown and blue toning increases in intensity toward the rims. Strong mint luster is present throughout, and minimally marked (as one would expect). NGC ID# 256Y, PCGS# 7298

5910 1921-D MS66 PCGS. Attractive satin luster and brilliant, virtually untuned surfaces provide this well struck example with strong eye appeal. Portions of the top of the reverse reveal die polish. Numerous die cracks are present on the reverse. Few examples have achieved higher grades, with PCGS and NGC combined having assigned finer numeric grades to 13 pieces (8/13). NGC ID# 256Y, PCGS# 7298

5911 1921-D MS66 PCGS. CAC. Intermingled toning, in shades of gray-green, plum-brown, orange, and red, appears on both sides of this Premium Gem. The reverse exhibits a number of die breaks and displays a slight counter-clockwise rotation. PCGS has awarded higher numeric grades to only 6 examples (8/13). NGC ID# 256Y, PCGS# 7298

5912 1921-D MS66+ PCGS. CAC. This high-end Premium Gem is well-detailed and attractively toned in shades of silver-gray, lavender, and sea-green. Vibrant mint luster radiates from the well-preserved surfaces. PCGS has graded six numerically finer examples (8/13). NGC ID# 256Y, PCGS# 7298

5913 1921-S MS65 PCGS. Light, even toning covers each side with the usual strong mint luster present. The strike details are strong for a 1921, as evaluated by the strength of detail on the reverse wreath. NGC ID# 256Z, PCGS# 7300

5914 1921-S MS65 PCGS. Subtle gold and rose-peach toning appears on this brilliant Gem. Frosty satin luster is present. The centers reveal a minor incompleteness of strike. The reverse displays minor clash marks. Only a few dozen examples have achieved higher numeric grades from PCGS (8/13). NGC ID# 256Z, PCGS# 7300

5915 1921-S MS65 PCGS. Subtle hints of golden toning are present on this brilliant and lustrous Gem. The coin is sharply struck. Minor clash marks appear on the reverse along with scattered, tiny flecks of dark gray. Only 37 examples have been awarded higher numeric grades by PCGS (8/13). NGC ID# 256Z, PCGS# 7300

5916 1921-S MS65 PCGS. Golden-brown, russet, and olive-gray patina covers large portions of both sides of this Gem. The design elements display a strong degree of detail. A mark below Liberty's eye poses minimal distraction, if any. The reverse exhibits minor clash marks. NGC ID# 256Z, PCGS# 7300

5917 1921-S MS65 NGC. The high-mintage 1921 issues were overlooked for years, but have recently come to be appreciated for the condition rarities they are. This is a highly lustrous S-mint example that is brilliant throughout and even shows slight semireflectivity in the fields. NGC ID# 256Z, PCGS# 7300

5918 1921-S MS65+ PCGS. As the plus designation attests, this Gem has a strong degree of eye appeal. Potent satin luster and brilliant untuned surfaces are among the attributes. The centers reveal a minor incompleteness of strike. The obverse exhibits a number of as-made die polish lines. Population: 15 in 65+, 37 finer (8/13). NGC ID# 256Z, PCGS# 7300

5919 1921-S MS65 PCGS. CAC. Intermingled shades of gold, orange, and red appear on both sides of this Gem. Pleasing luster remains visible. The design elements reveal a pleasing level of detail aside from the centers. This is a lovely representative. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

5920 1879 — Improperly Cleaned — NGC Details. Proof. This stone-white specimen is free from contact marks but has been dipped and displays light hairlines. The centers show incompleteness of strike though the remainder of the design is crisp. NGC ID# 2722, PCGS# 7314

**1882 Morgan, PR64 Cameo
Untoned and Well-Contrasted**

- 5921 1882 PR64 Cameo PCGS. CAC.** The untoned silver-white surfaces show splendid field-device contrast, with jet-black, mirrored fields and frost-white devices. A few stray field hairlines on the obverse and planchet striations on the lower reverse account for the grade, but there are no mentionable signs of contact. Population: 32 in 64 Cameo, 23 finer (8/13). PCGS# 87317

**1885 PR63 Cameo Morgan Dollar
Nice Eye Appeal for the Grade**

- 5922 1885 PR63 Cameo PCGS.** The Morgan dollar proofs of 1885 saw a mintage of 930 pieces, a relatively fair number of which have survived to the present day. Certified population data indicate that the majority of survivors appear to lack cameo finish. The present Select Cameo will therefore elicit considerable interest among Morgan dollar or collectors of proof coinage. Heavily frosted devices display an impressive strike and stand out against the mirrored fields. Both sides are minimally marked. This coin displays very nice eye appeal for the designated numerical grade. From *The Searight Collection*. PCGS# 87320

**1894 Morgan Dollar, PR62 Cameo
A Pleasing Business-Strike Alternative**

- 5923 1894 PR62 Cameo PCGS.** The 1894 proof Morgan dollar furnishes an alternative to its circulation-strike counterpart; the latter had a paltry mintage of 110,000 pieces and is elusive in all grades. The PR62 in the present lot has the additional feature of a Cameo finish, making it all the more desirable. Both sides display notable field-device contrast despite the layer of reddish-brown toning. The strike details are complete throughout. A few minute marks just barely preclude a higher numerical grade. Population: 5 in 62 Cameo, 58 finer (8/13). PCGS# 87329

- 5924 1900 PR58 NGC.** A lightly rubbed, modestly impaired example of the 1900 proof that shows modest contrast and strong detail nonetheless. Golden accents grace the margins of surfaces that show a range of grays elsewhere. NGC ID# 27ZY, PCGS# 7335

**1900 Morgan Dollar, PR63
Elusive Cameo Example**

- 5925 1900 PR63 Cameo PCGS.** Bright gleaming surfaces and a pleasing degree of cameo contrast provide both sides of this Select example with a strong amount of eye appeal. The coin is largely untoned, with areas of light golden-orange color appearing at the peripheries. Rich luster and a bold strike are additional attributes of this lovely piece. Population: 11 in 63 Cameo, 31 finer (8/13). PCGS# 87335

- 5926 1901 PR55 NGC.** The 1901 has been popular with collectors for several generations due to the scarcity of business strikes, placing date pressure on the proofs which provide collectors an affordable alternative. This Choice AU representative displays a slight golden tint. Wear appears on the high points and scattered abrasions are present. NGC ID# 27ZZ, PCGS# 7336

1904 Morgan Dollar, Deeply Toned PR64

- 5927 1904 PR64 PCGS.** Only 650 proof Morgan dollars were struck in 1904. They possessed the all-brilliant finish the Mint began using in 1902, giving the devices a chrome look, rather than the frosty effect of earlier years. Deep russet and reddish-gold patina bathes the luminous surfaces of this near-Gem. The strike is a just a trifle soft in the centers. A few minute marks are consistent with the grade. Population: 80 in 64 (1 in 64+), 57 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 5928 1921 MS65 PCGS.** Well-defined for this notoriously weak issue with golden patina over frosty silver luster. A few shiny areas appear at the LI of LIBERTY and behind the eagle's back. Ex: *Dallas Signature (Heritage, 10/2006)*, lot 1690, which realized \$1,840. NGC ID# 2U4E, PCGS# 7356

- 5929 1921 MS65 PCGS.** The High Relief motifs of the first Peace dollars show the design as intended, although making production difficult. The design was modified to a lower relief in 1922. This Gem has brilliant and frosty silver luster with only a trace of toning. The strike is above average. NGC ID# 2U4E, PCGS# 7356

- 5930 1921 MS65 PCGS.** Lustrous surfaces display golden-gray patina in the central areas and magenta and steel-blue at the borders. The usual weakness is seen in the centers. A few grade-consistent marks do not disturb.
Ex: Dallas Signature (Heritage, 10/2006), lot 1689; Summer FUN Signature (Heritage, 6/2008), lot 1540; Baltimore Signature (Heritage, 3/2009), lot 1582. NGC ID# 2U4E, PCGS# 7356
- 5931 1921 MS65+ NGC.** Frosty with less softness on the portrait's head than often seen. Generally silver surfaces have few abrasions overall but a few scrapes are visible on the neck. NGC ID# 2U4E, PCGS# 7356
- 5932 1921 MS65 PCGS. CAC.** Light gold overtones across silver surfaces. Though Liberty's hair shows typical softness, the coin is pleasing otherwise with only small and scattered marks. NGC ID# 2U4E, PCGS# 7356
- 5933 1922-S MS65 PCGS.** The 1922-S Peace dollar is a condition rarity in grades above the Gem level. Shades of golden-brown and lavender toning appear on this lovely Gem displaying subtle satiny mint luster. PCGS has certified only seven coins in higher numeric grades (8/13). NGC ID# 257E, PCGS# 7359
- 5934 1923 MS66+ PCGS. CAC.** Lovely shades of peach, lemon-lime, orange-rose, almond-gold, sea-green, and red appear on this high-end Premium Gem. Potent luster and a pleasing strike are additional attributes of this attractive piece. Population: 80 in 66+, 46 finer (8/13). NGC ID# 257F, PCGS# 7360
- 5935 1923 MS66+ PCGS. CAC.** As the plus designation indicates, this Premium Gem displays a strong degree of visual appeal. Brilliant surfaces and rich satin luster are among the attributes. A couple of wispy die cracks are present on the obverse. A few minor abrasions appear on the eagle. Population: 80 in 66+, 46 finer (8/13). NGC ID# 257F, PCGS# 7360
- 5936 1923 MS67 NGC.** The 1923 Peace dollar issue saw a sizable mintage of more than 30 million coins but few of those have survived in similar quality to this Superb Gem. Both sides are brilliant and untuned with frosty surfaces and intense silver luster. No finer pieces have been certified. Census: 91 in 67, 0 finer (8/13). NGC ID# 257F, PCGS# 7360
- 5937 1924-S MS64 PCGS.** Golden diagonal bands, light on the obverse and richer on the reverse, stand out from the shining silver cartwheels on this near-Gem. A soft strike on Liberty's portrait is typical for the issue.
From The Owen Collection, Part II. NGC ID# 257K, PCGS# 7364
- 5938 1924-S MS64 PCGS. VAM-2.** Liberty's profile is lightly die doubled. Light apricot patina visits this lustrous and well struck scarcer date near-Gem. Marks are minor throughout. A costly acquisition any finer. NGC ID# 257K, PCGS# 7364
- 5939 1924-S MS64 NGC.** Softly frosted luster shines in the fields. Light golden overtones are scattered on each side but most prominent at the interior reverse. An abrasion behind the tops of the eagle's wings contributes to the grade. NGC ID# 257K, PCGS# 7364
- 5940 1925 MS66+ PCGS. CAC.** Soft, frosted mint luster is seen over each side of this remarkably clean Peace dollar. This type is very scarce with problem-free surfaces, and such pieces as this deserve special attention from collectors. Fully struck and brilliant. NGC ID# 257L, PCGS# 7365
- 5941 1925-S MS64 PCGS.** Shades of silver-gray and sea-green toning blanket the surfaces of this 1925-S Peace dollar. The design elements are well-detailed and strong mint luster is evident beneath the patina. PCGS has graded 39 numerically finer examples (8/13). NGC ID# 257M, PCGS# 7366
- 5942 1926-D MS65 PCGS. CAC.** An attractive Gem, this well struck piece is virtually untuned and exhibits strong satin luster. A tiny spot of as-made struck-in grease is present near 5 o'clock on the reverse. This is a wonderful coin. NGC ID# 257P, PCGS# 7368

1926-S Peace Dollar, MS66 Only Two Finer

- 5943 1926-S MS66 PCGS.** The 1926-S Peace dollar is one of the most attractive and well-produced issues in the series. Cartwheel luster and brilliant, virtually untuned surfaces provide this Premium Gem with exceptional eye appeal. Both sides reveal die cracks. Population: 66 in 66, 2 finer (8/13). NGC ID# 257R, PCGS# 7369
- 5944 1927 MS65 NGC.** From a low mintage of 848,000 pieces, this delightful Gem displays vibrant mint luster and sharply detailed design elements throughout. NGC has graded only two numerically finer examples (8/13). NGC ID# 257S, PCGS# 7370
- 5945 1927-D MS64 PCGS.** A well-detailed Choice example from a mintage of 1.2 million pieces, this coin displays vibrant mint luster under shades of golden-brown, lavender-gray, and amber toning. NGC ID# 257T, PCGS# 7371
- 5946 1927-D MS64 PCGS.** This sharply detailed Choice specimen is darkly patinated in shades of amber, champagne-gold, and lavender. Vibrant mint luster shines through the toning and eye appeal is quite strong. NGC ID# 257T, PCGS# 7371
- 5947 1927-D MS64 PCGS.** This well-detailed Choice Peace dollar is darkly toned in mingled shades of lavender, sea-green, and amber. Vibrant mint luster shines beneath the patina. From a smallish mintage of 1.2 million pieces. NGC ID# 257T, PCGS# 7371
- 5948 1927-D MS64 PCGS.** Mottled shades of golden-tan and amber toning visit the lightly marked surfaces of this lustrous Choice example. The design elements are sharply detailed throughout. NGC ID# 257T, PCGS# 7371
- 5949 1927-D MS64 PCGS.** The population drops significantly at the Gem level for this issue. This near-Gem representative exhibits mottled shades of olive-green, gold, and rose-gray. Luster emerges beneath the patina. Housed in an old green label holder. NGC ID# 257T, PCGS# 7371
- 5950 1927-S MS64 PCGS.** This attractive Choice example displays especially vibrant mint luster and well-detailed design elements, with accents of pale gold toning and a few spots of amber on the reverse. NGC ID# 257U, PCGS# 7372
- 5951 1928 MS64 PCGS.** This low-mintage Peace dollar has had a constant pull on collectors since the year of issue. This is an especially nice example that displays bright, satiny mint luster and pale golden centers that deepen slightly around the margins. The strike is sharp and there are no mentionable abrasions. NGC ID# 257V, PCGS# 7373
- 5952 1928 MS64 NGC.** Peach, gold, and blue-violet overtones mingle on this near-Gem. Well-defined on the portrait with only a few small marks on the bust truncation. A pleasing near-Gem that also happens to be from the key issue of the Peace dollar series. NGC ID# 257V, PCGS# 7373
- 5953 1928 MS64 NGC.** Faint glimpses of gold and blue visit the pale silver surfaces of this softly lustrous key-date Peace dollar. Minor striking softness affects portrait and eagle.
From The Owen Collection, Part II. NGC ID# 257V, PCGS# 7373

- 5954 1928 MS64 PCGS.** Attractive frosty luster and faint almond-gold toning along with hints of green and peach provide this near-Gem example with a pleasing appearance. The obverse exhibits a couple of thin die cracks. NGC ID# 257V, PCGS# 7373
- 5955 1928 MS64 PCGS.** The 1928 Peace dollar claims a series-low mintage of 360,649 pieces. This well-detailed Choice example exhibits vibrant mint luster, well-preserved surfaces, and hints of sea-green and amber toning. *From The Strawberry Fields Collection.* NGC ID# 257V, PCGS# 7373
- 5956 1928 MS64 NGC. CAC.** This low-mintage key exhibits well-detailed design elements, with just a touch of softness on the eagle's wing, and vibrant mint luster, under attractive shades of gold and lavender toning. Housed in a prior generation holder. NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65
Above-Average Eye Appeal**

- 5957 1928 MS65 PCGS. CAC.** The 1928 Peace dollar is one of the most sought after issues in the series. It sports the lowest mintage (360,649 pieces), and next to the 1934-S has the fewest coins in Uncirculated condition. Attractive, soft russet color makes occasional visits over the pleasingly lustrous surfaces of the present Gem, and the design elements are well brought up. These attributes, which are often below-average on many Mint State survivors, yield nice eye appeal to the coin, aptly recognized by the CAC designation. PCGS and NGC have seen fewer than 15 specimens grading higher (8/13). NGC ID# 257V, PCGS# 7373
- 5958 1928-S MS64 PCGS.** Intermingled toning in shades of gold, peach, apricot, lime-green, blue-gray, and plum appears on this near-Gem example. A small area of opaque mint and lilac patina is present near Liberty's hair over the forehead. PCGS has awarded higher numeric grades to only 49 examples (8/13). NGC ID# 257W, PCGS# 7374
- 5959 1928-S MS64 PCGS.** The 1928-S Peace dollar is not too difficult to locate in MS64 condition, but finer examples are elusive, with PCGS having assigned higher numeric grades to only 49 examples (8/13). This lovely near-Gem displays bright centers with toning at the outer edges. The colors are particularly attractive on the reverse. The colors include pleasing shades of red and orange. *From The Strawberry Fields Collection.* NGC ID# 257W, PCGS# 7374
- 5960 1928-S MS64 NGC.** The design elements of this attractive 1928-S Peace dollar are well-detailed and the well-preserved surfaces display vibrant mint luster with only minor signs of contact. NGC has graded 39 numerically finer examples (8/13). NGC ID# 257W, PCGS# 7374
- 5961 1928-S MS64 PCGS.** The reverse of this well-detailed Choice specimen is darkly patinated in shades of burnt-orange and amber, while the lustrous obverse is much lighter, with accents of golden-tan and russet. NGC ID# 257W, PCGS# 7374
- 5962 1928-S MS64+ PCGS.** Dappled olive-green and caramel-gold toning overlies ice-blue lustrous surfaces. The cheek is smooth though moderate marks are noted on Liberty's neck and near her chin. Portions of IN GOD WE TRVST exhibit prominent die doubling, as often seen on this conditionally rare issue. The reverse has die polish lines similar to VAM-6A but the obverse die differs. NGC ID# 257W, PCGS# 7374

- 5963 1928-S MS64 PCGS. CAC.** Light steel-blue and wheat-gold toning adorns this lustrous and carefully preserved near-Gem. IN GOD WE TRUST is strongly die doubled, as seen on many examples of this conditionally challenging San Francisco issue. NGC ID# 257W, PCGS# 7374
- 5964 1928-S MS64 PCGS. CAC.** Dappled olive-green, plum-red, and cobalt-blue enrich this lustrous and well struck near-Gem. Only trivial marks are present. WE TRVST is lightly die doubled, as often seen on this better Peace dollar issue. *From The Owen Collection, Part II.* NGC ID# 257W, PCGS# 7374
- 5965 1934-D MS65 PCGS. Micro D.** The strike is bold aside from the Y in LIBERTY, and the dappled golden-brown and aqua toning is clearly original. The obverse has only minor marks, and the abrasions on the lower reverse are well-concealed. The final Denver issue aside from the unreleased 1964-D. NGC ID# 257Y, PCGS# 7376
- 5966 1934-D MS65 PCGS. VAM-3.** A Top 50 Variety. Medium D. The obverse is nicely die doubled, prominent on the profile and GOD WE. Undesignated by VAM since it is certified in an old green label holder. Lustrous and lightly abraded with a russet-brown obverse and an almond-gold reverse. NGC ID# 257Y, PCGS# 7376
- 5967 1934-S AU58 PCGS.** The 1934-S is a low-mintage key in the Peace dollar series. This near-Mint specimen shows just a trace of wear on the sharply detailed design elements and the lustrous surfaces exhibit attractive shades of golden-tan toning. NGC ID# 257Z, PCGS# 7377

- 5968 1934-S MS61 NGC.** From a mintage of just over 1 million pieces, the 1934-S Peace dollar is the most difficult issue of the series to locate in Mint State condition. Attractive satin luster adds to the eye appeal of this example. Scattered flecks of dark gray toning are present on both sides. The abrasion on Liberty's chin poses a minor distraction, if any. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS63
Series Key**

- 5969 1934-S MS63 PCGS.** The 1934-S is the key to the Peace dollars series. Many were released into circulation, making Uncirculated pieces difficult to acquire. Indeed, population reports from the major grading services show that the 1934-S has the smallest population of coins in MS60 and higher. The present MS63 example is close to brilliant, though a few pale gray freckles are on the cheek and the field before the profile and limited blushes of gold are visible at the reverse border. Both sides are well-struck and lustrous, and marks are surprisingly minimal for the Select level. *From The Owen Collection, Part II.* NGC ID# 257Z, PCGS# 7377
- 5970 1935 MS66 PCGS.** Golden overtones of varying intensity grace otherwise silver-gray surfaces with broadly swirling luster. A well-preserved Premium Gem from an issue of fewer than 1.6 million pieces. NGC ID# 2582, PCGS# 7378

**1935 Peace Dollar, MS66
Extremely Rare Any Finer**

- 5971 1935 MS66 PCGS. CAC.** The 1935, from a mintage of nearly 1.6 million pieces, is a fairly common date in the Peace dollar series through the Gem grade level. The certified population drops at the Premium Gem grade, which can be acquired with patience and searching. Higher-grade pieces are rarely seen. Satiny luster covers each side, and the design elements are relatively well struck for the issue. A few light reverse marks do not detract from the overall pleasing eye appeal. The Peace dollar was discontinued after 1935, making this issue an important one for type collectors. PCGS has graded none finer, and NGC four higher (8/13). NGC ID# 2582, PCGS# 7378

EISENHOWER DOLLARS

- 5972 1973 MS66 PCGS. CAC.** Light caramel-gold color adds to the appeal of this Premium Gem exhibiting a crisp strike and vibrant luster. A small mark through Eisenhower's eyebrow poses minimal distraction, if any. NGC ID# 258A, PCGS# 7412
- 5973 1973 MS66 PCGS. CAC.** Faint toning is present on this lustrous Premium Gem representative, including areas of gold at the rims. The copper-nickel clad Eisenhower dollars were only available in Mint Sets in 1973, creating a key issue in the series. Only 2 million examples were minted and none were placed into circulation. PCGS has not awarded a higher numeric grade to a single example (8/13). NGC ID# 258A, PCGS# 7412

MODERN ISSUES

- 5974 1983-P Olympic Silver Dollar MS70 PCGS.** A perfect Mint State example, this Superb Gem is a condition rarity at the top numerical grade. This brilliant and highly lustrous dollar has satin surfaces with white-silver that shows no toning on either side. Population: 18 in 70 (8/13). NGC ID# 28P5, PCGS# 9605
- 5975 1983-S Olympic Silver Dollar PR70 Deep Cameo PCGS.** The modern commemorative era began with the Washington Bicentennial half dollars of 1982, and the Olympic silver and gold coins of 1983. This gorgeous Olympic dollar has excellent contrast with fully brilliant silver surfaces, the obverse untuned and the reverse showing delicate wisps of gold. Population: 25 in 70 Deep Cameo (8/13). NGC ID# 28P8, PCGS# 9608
- 5976 Complete 32-Coin Set of Atlanta Olympic Commemoratives.** Eight five dollar gold, 16 silver dollars, and eight half dollars, divided equally into uncirculated and proof formats for a total of 16 designs. Certain uncirculated five dollar designs are modern commemorative keys. All coins are as-issued and housed in the deluxe cherrywood box with two trays. Comes with key and certificate of authenticity. (Total: 32 coins)

**2000-W Library of Congress Ten Dollar, MS69
Near-Perfect Gold-Platinum Commemorative**

- 5977 2000-W Library of Congress Bimetallic Ten Dollars MS69 PCGS.** Hindsight led to regret in the case of the 2000-W Library of Congress commemorative, the first bimetallic U.S. modern commemorative coin. Only 7,261 examples were sold of the Mint State variety. This coin is virtually perfect, as demanded of the grade and in common with most of the survivors. *From The Owen Collection, Part II.* NGC ID# 28V5, PCGS# 9784
- 5978 2000-W Library of Congress Bimetallic Ten Dollars MS69 NGC.** The West Point Mint distributed just 7,261 Mint State examples of the gold and platinum bimetallic Library of Congress commemorative. A few extremely tiny as-made strike-throughs are present on this lovely example. *From The Joan Carroll Collection.* NGC ID# 28V5, PCGS# 9784
- 5979 2000-W Library of Congress Bimetallic Ten Dollars MS69 NGC.** The 2000-W Library of Congress ten dollar commemorative is the first gold/platinum bimetallic coin ever issued by the United States, with a mintage of just 6,683 pieces. This specimen is a nearly perfect coin, with sharply detailed design elements, satiny mint luster, and virtually flawless surfaces. NGC ID# 28V5, PCGS# 9784
- 5980 2000-W Library of Congress PR70 Deep Cameo PCGS.** This technically perfect representative of the first gold/platinum bimetallic coin struck by the U.S. Mint was issued to celebrate the 200th anniversary of the Library of Congress. NGC ID# 28V6, PCGS# 99784
- 5981 2000-W Library of Congress PR70 Deep Cameo PCGS.** An unimpeachable specimen of this popular bimetallic proof, this piece displays strong eye appeal. Razor-sharp detail and gleaming mirrors grace both sides, each with outstanding contrast. NGC ID# 28V6, PCGS# 99784
- 5982 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** The Uncirculated 2001-W Capitol Visitor Center gold five is always in demand due to its limited mintage of 6,761 pieces. This is a technically flawless example of a simple-but-effective design from former Chief Engraver Elizabeth Jones. NGC ID# 28VB, PCGS# 9792
- 5983 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** Generally pale yellow surfaces with a touch of deeper orange near the top of the reverse. The surfaces are technically flawless. *From The Joan Carroll Collection.* NGC ID# 28VB, PCGS# 9792
- 5984 2008-W Jackson's Liberty Half-Ounce Gold Ten Dollar, First Strike PR69 Deep Cameo PCGS.** The Jackson Liberty design pays homage to the Capped Bust designs of the 1830s. This piece nears technical perfection and displays pronounced black-on-gold contrast between the devices and fields. Andrew Jackson was nicknamed "Old Hickory" due to his tough and aggressive personality. PCGS# 395709

- 5985 2008-W Van Buren's Liberty Half-Ounce Gold Ten Dollar, First Strike PR69 Deep Cameo PCGS.** The Liberty subseries of First Spouse coins for unmarried, generally widower, presidents provides a rewarding specialty for some collectors. This Van Buren proof displays deeply contrasted orange-gold surfaces. The coin reflects the Christian Gobrecht Seated Liberty design, introduced on the Gobrecht silver dollars of 1836. PCGS# 395711

MODERN BULLION COINS

- 5986 1986 Half-Ounce Gold Eagle MS70 NGC.** Hints of green-gold color are present on this attractive piece earning a full MS70 grade from NGC. This series is available in four denominations. NGC ID# 28Y8, PCGS# 9805
- 5987 1986 One-Ounce Gold Eagle MS70 NGC.** A perfect Mint State specimen of the debut year for the American Eagle program, this full one-ounce gold Eagle has satin luster and gleaming yellow surfaces. NGC ID# 26PA, PCGS# 9806
- 5988 1986 One-Ounce Gold Eagle MS70 NGC.** A gleaming, technically perfect, example of the highest of the four denominations for this series. This beautifully struck coin reveals strong detail of the Capitol building. NGC ID# 26PA, PCGS# 9806
- 5989 1986 One-Ounce Gold Eagle MS70 NGC.** A beautiful, technically perfect specimen, this piece has all of the expected eye appeal. Miley Busiek created the design used on the reverse of these coins, featuring a nest containing a female eagle and her hatchlings, with a male eagle flying above carrying an olive branch. NGC ID# 26PA, PCGS# 9806
- 5990 1986 One-Ounce Gold Eagle MS70 NGC.** A technically perfect example of the initial circulation-finish one-ounce gold American Eagle issue, largely pale yellow with a touch of peach. Luster falls between satin and cartwheel. NGC ID# 26PA, PCGS# 9806
- 5991 1987 Quarter-Ounce Gold Eagle MS70 NGC.** The pairing of the Augustus Saint-Gaudens design on the obverse and Miley Busiek's eagle-themed design on the reverse provides these coins with tremendous visual appeal. This technically perfect coin is sure to please. NGC ID# 26M3, PCGS# 9811
- 5992 1987 Quarter-Ounce Gold Eagle MS70 NGC.** A gorgeous, technically perfect eagle, one of four denominations struck with this design. These coins are produced from gold mined in the United States. NGC ID# 26M3, PCGS# 9811

1995-W Silver Eagle, PR68 Deep Cameo Capstone to the American Silver Eagles

- 5993 1995-W Silver Eagle PR68 Deep Cameo PCGS.** The 1995-W is the undisputed king of the American Silver Eagle series, even though there have been some other interesting issues (and we mean that in more than one way) from the Mint in the last couple of years. This pristine silver-white piece is exceedingly attractive, despite a couple of minor flaws that determine the grade. NGC ID# 28WZ, PCGS# 9887
- 5994 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS70 ANACS.** An impressive and perfect example with extraordinary design definition in a distinctive ANACS holder with an American flag label. NGC ID# 26LB, PCGS# 99940

- 5995 2006-W Half Ounce Gold Eagle MS69 PCGS.** A popular product of the U.S. Mint facility at West Point, this example displays gleaming surfaces and a strong degree of eye appeal. Small, scattered freckles of orange and plum color are present. These coins are struck from gold mined in the United States. NGC ID# 26NV, PCGS# 79983

- 5996 2006-W Half Ounce Gold Eagle MS69 PCGS.** The designs found on the \$25 denomination were also used for the \$5, \$10, and \$50 American Eagle gold bullion coins. The obverse is particularly attractive on this example, with a large swath of rich orange color appearing at the outer edges. NGC ID# 26NV, PCGS# 79983

- 5997 2006-W Half Ounce Gold Eagle MS69 PCGS.** A few tiny freckles of pleasing orange color appear on the reverse of this beautifully struck piece. NGC ID# 26NV, PCGS# 79983

- 5998 2006-W One-Ounce Gold Eagle, Reverse Proof PR70 NGC.** The reverse proof American Gold and Silver Eagles came in three-piece sets with a regular proof and a burnished circulation strike coin, creating a sensation when they were released in 2006. This technically perfect reverse proof offers a stunning black-on-yellow appearance.
From The Joan Carroll Collection. NGC ID# 28ZH, PCGS# 89994

2006-W One-Ounce American Gold Eagle, PR70 Reverse Proof Variant

- 5999 2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** This is an American Gold Eagle in the highest possible grade, an issue that caused quite a stir in the collector community when the three-piece sets, along with American Silver Eagles, were issued in 2006. Stunning black-on-gold contrast is the hallmark of both sides. NGC ID# 28ZH, PCGS# 89994

- 6000 2006-W One-Ounce Gold Reverse Proof, First Strike, PR70 PCGS.** A technically perfect example of this unusual one-year issue with its surreal pairing of mirror-finish devices and frosted fields. This coin has a tremendous amount of visual appeal. PCGS# 89995

- 6001 2007-W Half-Ounce Gold Eagle MS69 PCGS.** Large areas of rich orange color appear on this pleasing piece, particularly on the obverse. Two tiny as-made strike-throughs are present on the obverse near the tops of the rays at left. NGC ID# 26NY, PCGS# 150430

- 6002 2007-W Half-Ounce Gold Eagle MS69 PCGS.** A wonderful representative with a pleasing appearance, this piece displays a minuscule as-made strike-through in the field to the left of the tip of the eagle's left wing. NGC ID# 26NY, PCGS# 150430

- 6003 2007-W Half-Ounce Gold Eagle MS69 PCGS.** The United States uses the 22-karat standard for gold coins, established over three and a half centuries ago. Areas of rich orange color serve as accents on this wonderful representative. NGC ID# 26NY, PCGS# 150430

- 6004 2007-W Half-Ounce Gold Eagle MS69 PCGS.** The Augustus Saint-Gaudens design used on double eagles from 1907-1933 appears on the obverse of these beautiful coins. This example exhibits a tiny, as-made strike-through near the branch hand and small splashes of rich orange color. NGC ID# 26NY, PCGS# 150430

- 6005 2007-W Half-Ounce Gold Eagle MS69 PCGS.** Overall even color appears on this specimen exhibiting a strong degree of eye appeal. NGC ID# 26NY, PCGS# 150430
- 6006 2007-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** Designated as a First Strike by PCGS, this technically perfect specimen exhibits profound cameo contrast between the fully struck richly frosted design elements and the deeply reflective fields. PCGS# 149586
- 6007 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** Apricot-gold color overall, particularly on the obverse, while the reverse has orange-gold intensity at the rims. Near-perfect and pleasing. PCGS# 393064
- 6008 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** Pale wheat-gold on the obverse with hints of peach gracing the reverse. This satiny quarter-ounce American Eagle is only a tiny fault away from the finest designation. PCGS# 393064
- 6009 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** This lovely Superb Gem quarter-ounce American Eagle gold piece combines lemon-yellow luster with deeper gold peripheries on its satin surfaces. Sharply strike with excellent eye appeal. PCGS# 393064
- 6010 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** The American Eagle gold bullion coins really highlight the Augustus Saint-Gaudens design, a favorite among collectors. A tiny, as-made strike-through is present in the field between the second T in TRUST and the S in DOLLARS on this attractive example. PCGS# 393064
- 6011 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** The lovely designs used on both sides of this piece are used for all of the American Eagle bullion coins. The gold coins are made from gold that is mined in the United States. A swath of orange and coral color appears on the obverse at right, providing this example with an interesting appearance. PCGS# 393064
- 6012 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** Miley Busiek created the design used on the reverse of these coins, featuring a nest containing a female eagle and her hatchlings while a male eagle flies above carrying an olive branch. Shimmering luster and great color provide this piece with wonderful eye appeal. PCGS# 393064
- 6013 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** The design on the obverse of this piece was the work of Augustus Saint-Gaudens. This beautifully struck representative is only one point away from technical perfection. PCGS# 393064
- 6014 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** Faint copper toning lines appear on the obverse of this brilliant yellow-gold quarter-ounce eagle. A splendid specimen with satiny luster. PCGS# 393064
- 6015 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** Satiny wheat-gold surfaces show hints of apricot. This sharply struck quarter-ounce gold American Eagle with circulation finish is near-perfect. PCGS# 393064
- 6016 2008-W Quarter-Ounce Gold Eagle MS69 PCGS.** A satin Superb Gem, this nearly perfect quarter-ounce gold eagle has brilliant yellow-gold luster with peripheral lemon overtones. PCGS# 393064
- 6017 2008-W Quarter-Ounce Gold Eagle MS70 PCGS.** From light gold to richer sun-yellow, this satiny quarter-ounce gold American Eagle offers a range of colors in its uncirculated-format perfection. PCGS# 393064
- 6018 2008-W Quarter-Ounce Gold Buffalo MS70 NGC.** A quarter-ounce gold Buffalo with light yellow-gold luster that is largely luminous satin. Tiny evidence of reeding is visible on the rim when the obverse is viewed dead-on. PCGS# 399928
- 6019 2008-W Quarter-Ounce Gold Buffalo, First Strike MS70 PCGS.** Butter-gold and lighter yellow shadings merge seamlessly into one another on this technically marvelous quarter-ounce gold American Buffalo, one of the earliest issued for its series. PCGS# 399929
- 6020 2008-W Quarter-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** A portrait and buffalo like carved butter stand out from the gleaming gold-black background on this fractional proof assigned the ultimate grade by NGC. PCGS# 399934
- 6021 2008-W Quarter-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** A high-purity proof that achieves the technical perfection made possible by the modern Mint. The frost on the portrait is a standout. PCGS# 399934
- 6022 2008-W Quarter-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** Fantastic contrast between the amply frosted, razor-sharp devices and the gleaming, faceted black-gold of the fields. A technical marvel. PCGS# 399934
- 6023 2008-W Quarter-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** Well-frosted devices offer crisp detail surrounded by the delicate, almost organic textures of the reflective fields. Top-notch preservation goes with the contrast. PCGS# 399935
- 6024 2008-W Half-Ounce Gold Eagle MS69 PCGS.** This virtually perfect half-ounce gold eagle has exceptional eye appeal with satiny yellow luster and deeper gold color along the borders. PCGS# 393066
- 6025 2008-W Half-Ounce Gold Eagle MS69 PCGS.** Near-perfect with a mix of butter-yellow and straw-gold hues. Both sides show the satiny rolling luster seen on contemporary Uncirculated coinage. PCGS# 393066
- 6026 2008-W Half-Ounce Gold Eagle MS69 PCGS.** Yellow-gold overall with intensification to orange at the reverse rims. Only a couple of pinpoint faults stand between this satiny example and a perfect grade. PCGS# 393066
- 6027 2008-W Half-Ounce Gold Eagle MS69 PCGS.** More strongly yellow-orange than usually seen with the only light areas at the centers, more visibly the reverse. Excellent detail and all-around eye appeal with just a few tiny faults. PCGS# 393066
- 6028 2008-W Half-Ounce Gold Eagle MS69 PCGS.** Rich peripheral lemon toning appears along the borders of this brilliant and sharply struck Superb Gem. A nearly perfect example with exceptional eye appeal. PCGS# 393066
- 6029 2008-W Half-Ounce Gold Eagle MS70 PCGS.** Light yellow-gold surfaces gain suggestions of apricot when tilted into the light. A well-defined and technically perfect example of this half-ounce gold American Eagle issue. PCGS# 393066
- 6030 2008-W Half-Ounce Gold Buffalo MS70 NGC.** Rich yellow-gold with a circulation finish and the faintest suggestion of peach on the reverse. Great sculptural detail is rewarding on this fractional gold American Buffalo. PCGS# 399930
- 6031 2008-W Half-Ounce Gold Buffalo MS70 NGC.** This half-ounce gold Buffalo has great eye appeal at any level of magnification. The delicate textures of the fields are particularly delightful. PCGS# 399930
- 6032 2008-W Half-Ounce Gold Buffalo MS70 NGC.** A fractional half-ounce Gold Buffalo without post-striking faults. Majority butter-yellow surfaces show a small dot of rose over the O in OF. PCGS# 399930
- 6033 2008-W Half-Ounce Gold Buffalo PR69 Ultra Cameo NGC.** This half-ounce proof American Buffalo gold piece is near-perfect with excellent field-to-device contrast. The subtle textures of the field remain fresh and delightful. PCGS# 399936
- 6034 2008-W Half-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** On the reverse, the gleaming denomination and gold content stand out from the frosted bluff where they appear. Amazing contrast and preservation. PCGS# 399936

- 6035 2008-W Half-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** Gleaming fields have a magnificent mix of reflectivity and texture. Richly frosted devices contribute their share to this specimen's technical perfection. PCGS# 399936
- 6036 2008-W Half-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** Sharply struck devices are heavily frosted, while the textured fields are gleaming gold-black. One of the earliest issues for this half-ounce gold Buffalo proof issue. PCGS# 399937
- 6037 2008-W One-Ounce Gold Buffalo MS70 NGC.** Based on the Type One Buffalo nickels of 1913, this Fraser design is now at a large one-ounce gold size. Wonderfully textured surfaces are free of post-striking flaws of any significance. PCGS# 400037
- 6038 2008-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** This extraordinary gold piece gives a new outlook on the famous James Fraser design originally used on the Buffalo nickel. The enlarged designs and the brilliant yellow surfaces with frosty luster and mirrored fields provide an impressive presentation. PCGS# 393329
- 6039 2008-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** A virtually perfect example of this popular bullion issue, with incredibly frosty design elements that contrast profoundly with the deeply reflective fields. Eye appeal is terrific. PCGS# 393329
- 6040 2008-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** An impressive one-ounce gold American Buffalo, flawlessly contrasted and technically unimpeachable. Great eye appeal. PCGS# 393329
- 6041 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 NGC.** The 21st century execution of the Saint-Gaudens 20th century masterpiece. Gorgeous honey-gold color and shimmering luster are among the attributes of this well struck example. *From The Joan Carroll Collection.* NGC ID# 26S4, PCGS# 407404
- 6042 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** The distinctive Saint-Gaudens High Relief design appears in miniature on this series, much as it appeared on the original small diameter, double thickness pieces that now reside at the Smithsonian. This amazing example is technically perfect and aesthetically unsurpassable. NGC ID# 26S4, PCGS# 407404
- 6043 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike MS70 PCGS.** The 2009 Ultra High Relief coins re-create the extremely rare, double-thick, small diameter patterns that Augustus Saint-Gaudens proposed in 1907 (Judd-1917), now in the National Numismatic Collection of the Smithsonian. This 2009 Ultra High Relief is a fitting tribute, modern perfection in one ounce of pure gold. NGC ID# 26S4, PCGS# 407405
- 6044 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike NGC.** Pale yellow-gold and significantly reflective. The deep relief of the revived Saint-Gaudens design on this modern product approaches pure perfection. PCGS# 24461
- 6045 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** The small diameter Saint-Gaudens design Ultra High Relief gold piece was inspired by the similar 1907 patterns, with only two known and both in the Smithsonian Institution. This perfect prooflike Mint State piece has brilliant yellow surfaces with exceptional eye appeal. PCGS# 24461
- 6046 2011 Silver Eagle 25th Anniversary Set PCGS.** John Mercanti autograph series. Includes the following coins in MS70, the 2011, 2011-S, and 2011-W; the 2011-P Reverse Proof, PR70; and the 2011-W Regular Proof, PR70 Deep Cameo. (Total: 5 coins)
- 6047 2011-W One-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** This technically perfect bullion coin is designated First Strike by PCGS. The fully struck design elements display a rich coat of mint frost that creates dramatic cameo contrast with the deeply reflective fields. Eye appeal is tremendous. PCGS# 506886
- 6048 (2005) "1876" \$100 Gold Union, Gem Uncirculated NGC.** Per the NGC label, contains "one ounce pure gold." This issue was struck in 2005 by the private New York Mint with the Smithsonian Institute receiving a portion of the sales revenue. The designs are based on a drawing by U.S. Mint engraver George T. Morgan that was never struck as a pattern.
- 6049 (2007) "1865" Proposed Motto Double Eagle Ultra Cameo Gem Proof NGC.** A private striking of 2007 in one ounce of .999 fine gold, designed after James B. Longacre's "Proposed Motto" 1865 double eagle design with the words OUR TRUST IS IN GOD.

COINS OF HAWAII

- 6050 1871 Hawaii Wailuku Plantation Token, 12 1/2 Cents VF25 NGC. Large (Broad) Star(fish), Medcalf 2TE-3.** The Wailuku Sugar Company paid out this token as a day's wage to a laborer — and judging by the coin's moderate wear, it did so many times over. Striking softness at the bottom obverse and top reverse is as frequently seen, and aside from a few abrasions the glossy brown surfaces are pleasing. Listed on page 410 of the 2014 *Guide Book*. PCGS# 600503
- 6051 1882 Haiku Plantation One Rial Token AU53 NGC. Medcalf TE-15.** Proof of how pervasive the Spanish monetary system was even into the late 19th century is supplied by this token, denominated "one rial" and equivalent to 12 1/2 cents, judging by nearby Hawaiian plantations' tokens — both clearly derived from the Spanish pillar dollar, or eight *reales*, and its parts. Though lightly worn, this deep brown Haiku Rial is well-defined with cinnamon overtones and few abrasions. PCGS# 600518

GSA DOLLARS

- 6052 1880/79-CC Reverse of 1878 MS65 NGC. VAM-4.** A Top 100 Variety. A crisply struck overdated Carson City Gem that boasts dynamic luster and a glimpse of chestnut-gold toning. The fields are well preserved and the portrait exhibits minor grazes. *Ex: Long Beach Signature (Heritage, 9/2010), lot 4980, which realized \$2,990.* PCGS# 407108
- 6053 1881-CC MS65 NGC.** This better date Carson City Gem possesses vibrant luster and delicate tan toning. The strike is good and the fields are impressively preserved. Liberty's face and neck exhibit wispy contact. PCGS# 407126
- 6054 1881-CC MS65 NGC. VAM-2.** The obverse displays dramatic cherry-red and apple-green toning. The lower reverse has a blush of peach-tan and steel-blue. Well struck and coruscating with clean fields and minor facial marks. A GSA box accompanies the lot, but there is no certificate. PCGS# 407126
- 6055 1882-CC MS66 NGC.** An intricately struck Carson City GSA dollar with lustrous, smooth fields and only a trace of gold toning. Marks are unimportant and confined to the cheek. PCGS# 407134
- 6056 1882-CC MS66 NGC. VAM-3D.** Prominently clashed. Though a majority of this high grade Carson City dollar is brilliant, the left margins exhibit deep blue-green and golden-russet patina. Nicely struck and highly lustrous with smooth surfaces. A GSA box and certificate are included in the lot. PCGS# 407134
- 6057 1884-CC MS65 NGC.** An arc of sea-green and walnut-brown toning endows the obverse. The reverse has only hints of orange and gray patina. Lustrous and nicely struck with an unabraded reverse and minor facial grazes. No box or papers are included. PCGS# 407152
- 6058 1884-CC MS66 NGC.** A magnificent semiprooflike Carson City type coin. Lightly toned, sharply struck, splendidly smooth, and boldly struck. Exceptional quality for the grade. A box and certificate of GSA issue accompany the lot. PCGS# 407152

- 6059 1885-CC MS65 NGC.** Traces of wheat-gold toning adorn this lustrous and low mintage Carson City Gem. The reverse is beautifully preserved, and the obverse displays only minor grazes. The high points exhibit minor roller marks, as coined. PCGS# 407160

1885-CC GSA Dollar, MS66

- 6060 1885-CC MS66 NGC.** The low mintage 1885-CC ranks among the most popular GSA issues. A trace of honey patina graces this lustrous and nicely struck example. Only minor marks, mostly on the face and arrowheads, limit the grade. A box and certificate, both of GSA issue, are included in the lot. PCGS# 407160

U.S. PRESIDENTS & STATESMEN

- 6061 Five Suspendable Items of Political Memorabilia.** Two: small oval portraits of Abraham Lincoln attached to perched eagles, copper alloy; one: Douglas / Johnson two-sided portrait round with pierced suspension hole at top, one candidate on each side date 1860 below; one: similar McClellan / Pendleton two-sided portrait round, narrow extra loop for ribbon at top; one large William Henry Harrison decoration in copper-rimmed glass with two independent panes, considerable scratching to surfaces and edge chipping with significant loss at bottom right of portrait side, though no lettering is missing. (Total: 5 items)

SO-CALLED DOLLAR

- 6062 1892 High Relief Liberty Head, World's Columbian Exposition MS66 Prooflike NGC.** Eglit-51, HK-222. A brilliant and pristine specimen with glassy fields and lightly frosted borders and motifs. Precisely struck and undoubtedly elusive in the present quality. Census: 7 in 66 Prooflike, 3 finer as 67 Deep Prooflike (8/13).

COUNTERSTAMP

- 6063 Four Counterstamped Coins.** Two Dr. Shattuck's Water Cure, Waterford, ME, Brunk S-309, one on an 1834 large cent, the other an 1847 quarter, host coins VF details; one Dr. G.G. Wilkins, Brunk W-610, host 1857 Flying Eagle cent with VG details; and one Oil of Ice, Brunk O-59, host 1864 copper-nickel cent with VG details but significant corrosion. (Total: 4 coins)

CIVIL WAR PATRIOTIC

- 6064 1864 Abraham Lincoln / FREEDOM MS63 NGC.** Fuld-125/294j, R.8. Lincoln patriotic obverse dies Fuld-124 and Fuld-125 are very similar but the former has a beaded border while the latter has a plain rim. Struck in German silver. A satiny cream-gray and olive-gold example with a typical strike and one minor spot on the upper left obverse field.

CONFEDERATE STATES OF AMERICA

- 6065 (1961) Aluminum "1861" Confederate Cent, Bashlow Restrike, Defaced Dies MS67 NGC. Breen-8016.** Though bronze restrikes are common, a stingy 50 pieces were struck in aluminum by Robert Bashlow, who later donated the cancelled Confederate cent dies to the Smithsonian. Brilliant and semi-prooflike with an as-struck appearance. A 1960s vintage Capitol holder is included in the lot.
- 6066 (1961) Copper-Nickel "1861" Confederate Cent, Bashlow Restrike, Defaced Dies MS65 NGC. Breen-8012.** A rare alloy for the Bashlow issue, usually found in bronze format. Just 50 pieces were struck in copper-nickel. The present Gem is satiny and appears pristine, though the dies of course are in dire shape. A specialized Capitol holder from the 1960s accompanies the lot.
- 6067 (1961) Red Fiber "1861" Confederate Cent, Bashlow Restrike, Defaced Dies MS65 NGC. Breen-8019.** Robert Bashlow issued only 50 red fiber examples. Much scarcer than the bronze, silver, or goldine restrikes. An essentially pristine piece that displays consistent brick-red color and the uniform mild granularity characteristic of the fiber composition. A vintage Capitol holder is included in the lot.
- 6068 (1961) Zinc "1861" Confederate Cent, Bashlow Restrike, Defaced Dies — Environmental Damage — NGC Details. Unc. Breen-8018.** Bronze Bashlow restrike Confederate cents are plentiful, but only 50 examples were struck in zinc. The present specimen is void of marks but has a trio of granular streaks on the portrait. A specialized Capital holder, circa 1960s, accompanies the lot.
- 6069 (1961) Zinc "1861" Confederate Cent, Bashlow Restrike, Defaced Dies MS65 NGC. Breen-8018.** The zinc composition has a scant mintage of 50 pieces. Satiny and sharply struck with a hint of tan-gold toning and a couple of small spots near 7:30 on the reverse. A specialized circa-1960s Capitol holder accompanies the lot.

U.S. ENCASED POSTAGE

- 6070 Two Ayer's-Backed Encased Postage Stamps.** Nearly full silvering remains on the back of both John Gault manufactured cases that each contain a Franklin One Cent blue stamp (design A24). One Take / Ayer's / Pills, HB-018, Very Fine, only minor discoloration and good all-around appearance; one Ayer's / Sarsaparilla / To Purify The / Blood, HB-028, Fine to Very Fine, crack in mica at top left but otherwise pleasing. (Total: 2 items)

20TH CENTURY MEDAL

1976 One-Ounce Gold Medal, MS65 Alaska, Sourdough Centennial

- 6071 1976 Alaska Gold Medal, Sourdough Centennial MS65 NGC.** A one troy ounce fine gold medal struck in 1976 to commemorate the centennial of the Sourdough Mine and the mining district in and around the Alaskan city of Nyaac. The medallion is edge-stamped 880/1000 .999 fine gold NYAC C. AWE 1976.
Ex: Long Beach Signature (Heritage, 9/2007), lot 82332.

ERRORS

1943 Lincoln Cent, MS62 on a Silver Dime Planchet Famed Off-Metal Error

- 6072** 1943 Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS. Uncirculated steel cents struck on copper cent planchets are heralded rarities, but steel cents on dime planchets are much more affordable. The present off-metal error shows the incomplete rims typical of the error category. Since a dime planchet is smaller than a cent planchet and cannot completely fill the dies, the strike is soft on Lincoln's forehead and the upper obverse and lower reverse margins. Lightly toned in aqua and tan shades.

Lincoln Cent, MS66, on an Elliptical Clip Clad Dime Blank

- 6073** Undated Lincoln Memorial Cent — Stuck on an Elliptical Clip Clad Dime Blank — MS66 NGC. 0.80 gm. This tiny football-shaped coin is a double mint error. The first mistake occurred when the clad dime planchet strip misfed, and a punching overlap created an undersized elliptical clip. The second mint blunder placed the clipped planchet between cent dies. Lincoln's head is present, as is most of ONE CENT, the lower half of IN GOD WE TRUST, and the steps of the Lincoln Memorial.

From The Strawberry Fields Collection.

1981 Cent on a Struck Dime, MS66 Popular '11 Cents' Error

- 6074** 1981 Lincoln Cent — Struck on a 1981-P Dime — MS66 PCGS. The first three digits of the dime's underlying date are visible but not the last, which could be a zero or (more likely) a one. Toned green-gold with foliage and flame surrounding Lincoln's portrait and Roosevelt's head outlining the Memorial.

From The Strawberry Fields Collection.

1981 Cent on a 1981-P Dime, MS67

- 6075** 1981 Lincoln Cent — Struck on a 1981-P Dime — MS67 NGC. The 198 and the P mintmark for the dime are readable near STATES from the cent striking. The cent date is mostly complete with all digits apparent. Lustrous, pristine, and minimally toned. Roosevelt gazes southeast relative to the Lincoln Memorial.

1985 Cent on a 1985-P Dime, MS66

- 6076** 1985 Lincoln Cent — Struck on a 1985-P Dime — MS66 NGC. The cent strike has nearly ideal alignment with the dime undertype. Roosevelt faces west relative to Lincoln. The dime date and mintmark are bold. The 19 in the cent date is bold, while the 85 is faint but fully readable. Lustrous with peripheral tan toning.

From The Strawberry Fields Collection.

1994 Cent on a 1994-P Dime, MS65

- 6077** 1994 Lincoln Cent — Double Denomination on a 1994-P Dime — MS65 PCGS. By fortuitous chance, the dime and cent strikes are perfectly aligned. The dime date and mintmark, and the cent date, are all clear. Roosevelt gazes due west. On the cent strike, TRUST is partially off the flan. Lustrous and pristine with hints of gray toning.

From The Strawberry Fields Collection.

1996-D Cent on a 1995-D Dime, MS65

- 6078** 1996-D Lincoln Cent — Overstruck on a 1995-D Dime — MS65 NGC. This double denomination mint error shows plentiful evidence of the undertype. Roosevelt's head is well outlined and gazes south relative to Lincoln. The cent mintmark is sharp, as is the 96 in the cent date. The dime date and mintmark are evident near 2:30. A lustrous and untoned 11-cent piece. Probably struck in late 1995, though the dime could have been wedged in a transport bin for months until it came between cent dies.

2000 Lincoln Cent, MS67
Struck on a Roosevelt Dime

- 6079** 2000 Lincoln Cent — Double Denomination on a Struck Dime — MS67 PCGS. The portrait of Roosevelt gazes southwest relative to the Lincoln Memorial. The cent date is fully readable and mostly bold, though the date and mintmark of the dime is effaced by the cent strike. Lustrous and unmarked with light cream-gray toning. From *The Strawberry Fields Collection*.

Buffalo Nickel, MS64
Struck 45% Off Center

- 6080** Undated Philadelphia Mint Buffalo Nickel — Struck 45% Off Center — MS64 NGC. Struck widely off center toward 6 o'clock. The date and UNITED STATES OF AMERICA are off the flan. Due to the off center strike, the hair above the braid has full detail. LIBERTY is partial and stretches toward the rim. A hint of golden-gray toning visits satiny and undisturbed surfaces.

Jefferson Nickel, MS64
Struck on a Dime

- 6081** Undated (1997-P) Jefferson Nickel — Double Denomination on Struck Dime — MS64 PCGS. Roosevelt gazes southeast relative to the portrait of Jefferson. The centering favors the left borders, while the right-side legends are mostly absent, including the nickel date and mintmark. The P mintmark and partial date 199 from the undertype are on the top of Jefferson's head. From *The Strawberry Fields Collection*.

San Francisco War Nickel, AU55
Struck on a Dime Planchet

- 6082** Undated San Francisco War Nickel — Struck on a Dime Planchet — AU55 PCGS. The large S mintmark looms over Monticello, but the date is off the flan. Aligned with the collar at 9 o'clock, this off metal nickel displays most of the design except for the right-side legends. Toned steel-blue and caramel-gold with smooth surfaces and light wear on the cheekbone. From *The Strawberry Fields Collection*.

Jefferson Nickel, 55% Off Center
on a Silver Dime Planchet, MS61

- 6083** Undated Jefferson Nickel — Struck 55% Off Center on a Silver Dime Planchet — MS61 NGC. 2.5 gm. Presumably struck between 1938 and 1964, though both the date and mintmark are off the coin as it is widely struck off center toward 3 o'clock. One horizontal mark is noted beneath Jefferson's chin. Ex: *Orlando FUN Signature (Heritage, 1/2010)*, lot 10083, which realized \$1,150. From *The Strawberry Fields Collection*.

6084 Collection of 64 Roosevelt Dime Errors. A collection too interesting to break up, this group of 64 certified error Roosevelt dimes ranges from 1946 (struck on a quarter-bolivar planchet, AU58 NGC) to 2007-P (a trio struck from the same split obverse die, MS67 NGC), as well as dateless silver and clad examples. Off-center, die adjustment strike, clipped planchet, broadstrike, mated pair, die break — all are represented, and even this is not an exhaustive list of this lot's sheer variety. This lot must be seen to be believed. Most items certified NGC, a few PCGS, one ANACS. Sold as is, with no returns. (Total: 64 coins)

**Uniface Obverse Washington Quarter
65% Off Center on a Cent Planchet
MS64 Brown**

6085 Undated Uniface Washington Quarter — Struck 65% Off Center on a Type One Cent Planchet — MS64 Brown NGC. 3.1 gn. Coined on a pre-1982 bronze cent planchet, this quarter is struck widely off center toward 6 o'clock. A cent planchet and quarter planchet were fed simultaneously between quarter dies, with the present piece struck between the obverse die and the quarter planchet. The planchet is Type One since the diameter was too small to be affected by the upset mill. Deeply toned forest-green and lavender with a granular surface on the struck portion.
From The Strawberry Fields Collection.

**1967 Quarter on a Cent Planchet
MS65 Red and Brown**

6086 1967 Washington Quarter — Struck on a Cent Planchet — MS65 Red and Brown PCGS. Ex: Harrison Phillips Collection. This off metal error was struck aligned with the collar at 9 o'clock. The portrait and eagle are complete. As is the case with the other peripheral legends, the date is partial and heavily distorted from metal flow to the rim. Toned orange-gold and lilac-red.
From The Strawberry Fields Collection.

**1974-D Quarter on a Cent Planchet
MS64 Red and Brown**

6087 1974-D Washington Quarter — Struck on a Cent Planchet — MS64 Red and Brown PCGS. Struck aligned with the collar at 7:30, this off metal quarter has a clear mintmark and nearly a full date. DOLLAR is absent altogether, though QUARTER and UNITED STATES OF AMERICA are partly present. The fields are cherry-red while Washington is toned plum-mauve and the reverse center is apple-green.
From The Strawberry Fields Collection.

**Franklin Half Dollar, MS62
Coined on a Dime Planchet**

6088 Undated Franklin Half — Struck on a Dime Planchet — MS62 PCGS. The date and mintmark areas are off the flan on this charming wrong planchet error. The centering favors Franklin's head, which is complete. Most of the Liberty Bell and eagle are present. Satiny and lightly toned with a mildly granular obverse and a smooth reverse.
From The Strawberry Fields Collection.

**Denver Mint Franklin Half
on a Cent Planchet, MS66 Brown**

6089 Undated Denver Mint Franklin Half — Struck on a Cent Planchet — MS66 Brown NGC. 3.0 gm. The strike was aligned with the collar die at 7:30. The Denver mintmark is clear, but right-side legends are absent, including all but the 1 in the date. Deeply toned olive-green, orange-gold, and lilac-red. One brief thin vertical mark noted on Franklin's shoulder.
From The Strawberry Fields Collection.

**1960-D Franklin Half, MS63
On a Jefferson Nickel Planchet**

- 6090 1960-D Franklin Half — Struck on a Five Cent Planchet — MS63 PCGS.** Both the date and mintmark are intact on this well preserved and coruscating cream-gray off metal error. Aligned with the collar at 3 o'clock, causing left-side peripheral elements such as IN GOD WE and UNITED STATES to be absent from the flan. *From The Strawberry Fields Collection.*

**1961 Franklin Half, MS63
Struck on a Quarter Planchet**

- 6091 1961 Franklin Half — Struck on a Quarter Planchet — MS63 PCGS.** This Philadelphia Mint Franklin half was struck on a Washington quarter planchet. The strike is uncentered toward 10:30 with all of LIBERTY and most of HALF DOLLAR absent. Lustrous with light golden toning and surprisingly few marks for the MS63 level. *From The Strawberry Fields Collection.*

**1963-D Half on a Cent Planchet
MS63 Brown**

- 6092 1963-D Franklin Half — Struck on a Cent Planchet — MS63 Brown PCGS.** Both the date and mintmark are complete on this ideally centered error combination. TRUST and OF AMERICA are also intact, as is the diminutive eagle. About two-thirds of Franklin's bust and the Liberty Bell are present. All of Franklin's face is on the flan. A satiny golden-brown cent without any grade-limiting marks or spots. *Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 2678, which realized \$4,025.*
From The Strawberry Fields Collection.

**Kennedy Half Dollar, MS62 Brown
Struck on a Copper Cent Planchet**

- 6093 Undated Kennedy Half — Struck on a Copper Cent Planchet — MS62 Brown PCGS.** Type Two Reverse. An off metal half dollar that shows most of the eagle and portrait, but the peripheral legends are absent, including the date and any mintmark. Richly patinated fire-red, jade-green, and gunmetal-blue. *From The Strawberry Fields Collection.*

**Kennedy Half, MS62, on a
Jefferson Nickel Planchet**

- 6094 Undated Kennedy Half — Struck on a Five Cent Planchet — MS62 PCGS.** A planchet intended for Jefferson nickel dies was instead struck by Kennedy half dies. Struck flush with the collar at 11 o'clock with the date and STATES OF AMERICA absent. The Type One reverse of the half dollar and the absence of a Denver mintmark by the branch stems suggests a 1964 Philadelphia striking, though selected later issues purportedly are known with a Type One reverse. *From The Strawberry Fields Collection.*

**Undated Kennedy Half, MS63, on a
Clad Type One Quarter Planchet
Struck 80% Off Center**

- 6095 Undated Kennedy Half — Struck 80% Off Center on a Type One Clad Quarter Planchet — MS63 PCGS.** The clad quarter planchet skipped the upset mill, thus lacking a proto-rim, prior to its encounter with Kennedy half dies. Struck widely off center toward 6 o'clock with a couple of minor but interesting strike-throughs on the reverse. *Ex: Columbus Central States Signature (Heritage, 4/2006), lot 5370, which realized \$920.*
From The Strawberry Fields Collection.

Kennedy Half Dollar, MS64
Coined On a Clad Dime Planchet

- 6096** Undated Kennedy Half — Struck on a Clad Dime Planchet — MS64 NGC. Type Two Reverse. This lustrous wrong planchet error has smooth surfaces and light golden patina. IN GOD WE is complete, as is E PLURIBUS UNUM, but all other legends are partial. The 19 in the date is evident but the next two digits are absent. From The Strawberry Fields Collection.

1964-D Half Dollar, MS62
Struck on a Quarter Planchet

- 6097** 1964-D Kennedy Half — Struck on a Quarter Planchet — MS62 PCGS. Type Two Reverse. The centering favors the portrait and eagle, which are fully intact. The peripheral legends, including the date, are partially present. The Denver mintmark near the branch stem confirms status as a 1964-D. Well preserved, since the mostly retained lamination on Kennedy's neck is a secondary mint error. From The Strawberry Fields Collection.

Kennedy Half Dollar, MS63
Uniface Strike on a Clad Dime Planchet

- 6098** Undated Uniface Kennedy Half — Struck on a Clad Dime Planchet — MS63 PCGS. A clad dime planchet was fed between half dollar dies along with a half dollar planchet. The dime planchet was fed between the obverse die and the half dollar planchet, which faced the reverse die. Undoubtedly a nifty dime-indented Kennedy half was struck along with the present piece, but is not included. Most of the portrait is present, but the legends are almost entirely absent. Toned in orange and lilac shades. From The Strawberry Fields Collection.

1979-P Anthony Dollar, MS62
Struck on a Quarter Planchet

- 6099** 1979-P Narrow Rim Anthony Dollar — Struck on a Quarter Planchet — MS62 PCGS. Struck with the coin aligned with the collar at 5:30. LIBERTY is partially off the flan. Lustrous with light gold toning and unmarked surfaces. Littleton, a mail order firm in New Hampshire, purchased many sealed Mint bags of Anthony dollars, and accumulated a number of error coins such as the present lot. From The Strawberry Fields Collection.

1979-P Anthony Dollar, MS63
on a Quarter Planchet

- 6100** 1979-P Narrow Date Anthony Dollar — Struck on a Clad Quarter Planchet — MS63 PCGS. Struck flush with the collar at 9 o'clock, this wrong planchet mint error has full legends but the right-side rim is off the flan. Satiny with steel-blue and caramel-gold toning. From The Strawberry Fields Collection.

CERTIFIED MODERN PROOF SET

- 6101** Five-Piece 1937 Proof Set PR63 to PR65 PCGS. The set includes: cent PR64 Red and Brown, fully struck, orange-gold, distributed minute reverse flecks; nickel PR65, well struck, light golden toning, a few tiny spots; dime PR65, a needle-sharp Gem with attractive peripheral chestnut patina; quarter PR65, light tan and aqua toning, the obverse field exhibits subtle retained laminations; and a half dollar PR63, intricately impressed, flashy fields, dappled caramel-gold toning, the sun's rays are partially lapped. (Total: 5 coins)

MISCELLANEOUS

- 6102** Five Vintage Bank Bags. Five small drawstring canvas bags for money, in various states of use and soiling. \$1000 / Gold / Union National Bank / Union, Oregon; Sacramento / Bank. / \$500 (mfg. Lawrence Maker, Saratoga, NY); The Bank / Of Oregon City, / Oregon City, Oregon. / \$50 (mfg. as above); and two Code 6702 bags for Bank of America / N.T. & S.A., one for P.O. Number 78942 and the other for P.O. Number 88728. (Total: 5 items)

BOOKS

- 6103 B. Max Mehl, Numismatist, Literature and Ephemera.** This mehlighful lot of literature and ephemera contains 28 items including five extremely rare leather-bound and interleaved copies of *The Star Rare Coin Encyclopedia and Premium Catalog*, 36th edition (1932, not interleaved), 37th edition (1933), 38th edition (1933), 43rd edition (1936), and 44th edition (1936); Two standard copies of *The Star Rare Coin Encyclopedia*, 51st edition (1944) and 60th edition (1957); 12 copies of *Mehl's Coin Circular*, Number Three (July 1922), Number Five (January 1923), Number Six (February 1923), Number Nine (October 1924), Number Ten (February 1925, three copies), Number Eleven (March 1927), Number Twelve (December 1927, two copies), and Number Thirteen (April 1928, two copies); *Mehl's Coin Chronicle* (March 1939); "The Romance of Money, A Texas Master of Coins," reprinted from *The Magazine of Texas* (circa 1928); *Modern Numismatic Auction Records* (1912); a postal cover from *Mehl's Numismatic Monthly*; three radio scripts (two different) from January-February 1933 for the National Broadcasting Company; a letter dated February 18, 1909 from an uncertain sender on stationary of The Boston Club, New Orleans; a multipage 1935 correspondence with the *Mickey Mouse Magazine*. (Total: 28 items)
- 6104 Large Lot of B. Max Mehl Coin Image Printing Plates.** B. Max Mehl used these low relief plates of line-drawing coin images to illustrate types in his various publications, especially his long-running flagship *The Star Rare Coin Encyclopedia and Premium Catalog*, an *Elaborate Encyclopedia of the Coins of the World*, better known to numismatic literature collectors simply as the *Star Encyclopedia*. The plates encompass U.S. types, territorials, selected world coins, and images of Mehl and his Fort Worth headquarters. Most of the plates are single, or double to depict both sides of a type, but a few plates contain related multiple images to create full-page sets of images. A unique treasure trove of material from the leading coin dealer and auctioneer of the first half of the 20th century. (Total: 187 items)

COLONIALS

St. Patrick Farthing, AU53
No Sea Beasts, W-11500

- 6201** (1670-75) St. Patrick Farthing AU53 PCGS. CAC. Breen-208, W-11500. No sea beasts or other fauna are present below the king. A high grade example of this New Jersey colonial import, which is usually encountered well worn or corroded. The glossy chocolate-brown surfaces are unabraded. The brass splasher is well centered on the crown. Listed on page 41 of the 2014 *Guide Book*. Population: 7 in 53, 5 finer (8/13). PCGS# 42

1694 Carolina Elephant Token, VF20
PROPRIETORS Reverse, W-12120

- 6202** 1694 Carolina Elephant Token, PROPRIETORS VF20 PCGS. CAC. Hodder 2-F, W-12120, R.6. Ex: Steinberg. A single obverse, unlettered with a simple yet striking depiction of an elephant, gives this class of tokens its name. Only one variety, associated with a London shield reverse, is common, while all reverses linked to American colonies are rare. This Carolina token was struck from a corrected reverse that changed the misspelling PROPRIETERS to PROPRIETORS with an "O" stamped over the erroneous "E." This midrange VF20 piece has the broad details of the elephant remaining, though parts of the ear are weak. Medium-brown surfaces are slightly porous but minimally marked with a hint of violet overtone. Listed on page 47 of the 2014 *Guide Book*. PCGS# 73

1724 Hibernia Halfpenny
MS64+ Red and Brown
M. 4.51-K.4

- 6203 1724 Hibernia Halfpenny MS64+ Red and Brown PCGS. CAC. M. 4.51-K.4, W-13690, R.2. Stop after date. 11 harpstrings. This sharply struck and satiny near-Gem is primarily peach-gold but displays lilac-red and apple-green toning on the high points. Free from contact. The reverse field is lightly freckled, the lower left obverse field exhibits a couple of small gray flecks, and a spot is noted before the G in GRATIA. Listed on page 45 of the 2014 *Guide Book*. PCGS# 191

1776 Continental Dollar, VF Details
CURRENCY Variant, N. 1-C

- 6204 1776 Continental Dollar, CURRENCY, Pewter PCGS Genuine. N. 1-C, W-8445, R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been damaged. The noted “damage” occurs in the form of a few minor rim bumps and small dings, really quite undisturbing for a circulated Colonial coin of such historic value. This is, after all, the only Colonial coin that combines the large size of a “dollar” (although no denomination is noted, but roughly the size of the Spanish pillar dollars or “pieces of eight” that were then ubiquitous in circulation) with the historic 1776 date, the year that the United Colonies — henceforth the United States — declared their independence from the British Empire. This piece shows moderate circulation wear, despite its technical status as a pattern coin — but a successful one, as many of the Continental dollars show such wear. A delightful and affordable midgrade example with a couple of darker toning spots. Listed on page 85 of the 2014 *Guide Book*.
Ex: Central States Signature (Heritage, 5/2007), lot 2003, where it sold for \$12,650. PCGS# 791

1787 Fugio Cent, Choice XF
Scarce Cross After Date Variety
UNITED STATES, N. 1-B

- 6205** 1787 Fugio Cent, UNITED STATES, No Cinquefoils XF45 PCGS. N. 1-B, W-6600, R.4. Ex: Rob Retz Family Collection. The distinctive obverse die, with a cross after the date instead of four cinquefoils, previously struck the non-collectible N. 1-CC pattern. Likely, the obverse die then became part of the regular inventory, and in due course was paired with a generic UNITED STATES reverse to create the present scarce variety. An unabraded walnut-brown example with pleasing detail, a minor reverse flan flaw at 7 o'clock, and a slight reverse rim ding at 4 o'clock. The reverse die is misaligned toward 1 o'clock. Listed on page 87 of the 2014 *Guide Book*. PCGS# 880

Scarce (1785) Bar 'Cent'
AU Details, W-8520

- 6206** (1785) Bar Copper — Scratch — PCGS Genuine. AU Details. Breen-1145, W-8520, R.4. Little is known about the Bar "cent" except that it definitively circulated in New York in 1785, according to a contemporary newspaper article in the *New Jersey Gazette*. The article also noted the cent's design similarity to the buttons on the coats of Yankee Revolutionary War soldiers. The golden-brown obverse is nearly unabraded though the dark brown reverse field has a number of horizontal pinscratches. The bars are toned medium brown and display occasional abrasions. Listed on page 74 of the 2014 *Guide Book*. PCGS# 599

Washington Liberty & Security Penny
Rare Corded Rim Variant, Baker-30E
MS64 Brown

- 6207** Undated Washington Liberty & Security Penny, Corded Rim MS64 Brown PCGS. CAC. Baker-30E, W-11055, R.7. The rare variety with "corded" or engine-turned rims that are far more regular than on the commonly seen Plain Rim variant and also show regular depressions or "teeth." Corded Rim examples seldom come to auction (the last Heritage appearance was in 2010) and when they do, they rarely are so well-preserved as this MS64 Brown representative. A distinct blue-violet overtone graces glossy mushroom-brown surfaces that show few flaws. Detail on Washington's portrait is excellent and the eagle's feathers are clear. Listed on page 84 of the 2014 *Guide Book*. Population: 3 in 64 Brown, 1 finer (8/13). PCGS# 784

HALF CENTS

1793 Liberty Cap Half Cent, AU53
Scarce First-Year Variety, C-1, B-1

6208 1793 AU53 PCGS. C-1, B-1, High R.3. Manley Die State 1.0. Half cents were struck for the first time in 1793, with four die varieties known for the date. This coin represents the least available variety, C-1, B-1, easily recognized by the periods after CENT and AMERICA, and the long 7 in the date. The C-1, B-1 was the first variety struck during the year, making it the most important half cent variety of the initial year of coinage.

The present coin is an attractive AU53 example with glossy medium brown surfaces that show no sign of corrosion. The design elements are well-detailed, with just a trace of wear on the high points. Only a few minor abrasions are evident and they do little to impact the strong visual appeal. Housed in a green label holder. Our EAC grade XF45.

From The Joan Carroll Collection. NGC ID# 2222, PCGS# 1000

1794 C-9, B-9 Half Cent, XF40
High Relief Head

6209 1794 XF40 PCGS. C-9, B-9, R.2. Manley Die State 2.0. Although a few trivial surface marks and rim nicks are present, this is a lovely piece for the grade in an early PCGS small-sized holder. The dark olive-brown surfaces are smooth with traces of luster. The highest hair details are sharp and better detailed than normally encountered on this obverse. Our EAC grade XF40.
From The Joan Carroll Collection. NGC ID# 2223, PCGS# 1003

1794 C-9, B-9 Half Cent, XF40
Early Die State

6210 1794 XF40 PCGS. CAC. C-9, B-9, R.2. Manley Die State 1.0. An important early die state before the die crack formed from the obverse border at 9:30 into the cap. This green-label PCGS specimen has pleasing and mostly mark-free light brown surfaces with two small reverse rim bruises. Our EAC grade VF30.
From The Joan Carroll Collection. NGC ID# 2223, PCGS# 1003

1804 C-12, B-11 Half Cent, MS64 Brown
Crosslet 4, No Stems

6211 1804 Crosslet 4, No Stems MS64 Brown PCGS. CAC. C-12, B-11, R.2. Manley records a single die state for the variety, and this piece appears to be a late stage with heavy clash marks below the hair ribbon and die roughness in the left obverse field. Both sides exhibit full cartwheel luster with frosty mint surfaces. The obverse is dark chocolate while the reverse is mostly light tan with a splash of greenish-steel toning at the upper left. Hints of faded mint red remain on the obverse. Our EAC grade MS60. Population: 8 in 64 Brown, 0 finer (8/13). NGC ID# 222F, PCGS# 1072

PROOF BRAIDED HAIR HALF CENT

1841 Half Cent, PR65 Brown
Breen-1 Original

- 6212** 1841 Original PR65 Brown PCGS. CAC. B-1, R.5. A razor-sharp Gem of this proof-only date. An Original striking with large berries on the wreath. The strike is razor-sharp and the mirrored surfaces exhibit rich cherry-red, olive-green, and cobalt-blue patina. A couple of insignificant pinpoint flecks preclude perfection. Both rare and desirable. Our EAC grade PR60. NGC ID# 26Z6, PCGS# 1254

LARGE CENTS

1793 S-1, B-1 Chain Cent, AG3
AMERI. Reverse

- 6213** 1793 Chain AMERI. AG3 NGC. S-1, B-1, R.4. Despite a few lines of planchet lamination, particularly on the obverse, this well worn Chain AMERI. cent has exceptionally smooth dark olive-brown and steel surfaces. The central devices are outlined and the peripheral lettering is mostly complete. Part of the date is also visible on this example. Our EAC grade AG3. NGC ID# 223G, PCGS# 1340

1793 S-2, B-2 Chain Cent, VG8
AMERICA Reverse

- 6214** 1793 Chain AMERICA VG8 NGC. S-2, B-2, R.4. Although the date is mostly absent, the central devices are fully outlined and all of the lettering, including LIBERTY and the reverse legend, are completely present. Dark brown and lighter tan, the surfaces are smooth and essentially mark-free for the grade. This is a wonderful specimen. Our EAC grade VG8. NGC ID# 223F, PCGS# 1341

1793 Chain Cent, Periods Obverse, S-4
XF Details

- 6215** 1793 Chain Periods — Obverse Graffiti — NGC Details. XF. S-4, B-5, R.3. This Chain cent features the one-use-only obverse die that puts periods at the ends of LIBERTY and the date. It also has a single unfortunate post-striking addition, a large graffiti "X" scratched on Liberty's portrait. The reverse with the famous Chain design, on the other hand, shows no such graffiti, though it does have a number of small rim bumps and marks on still-glossy blue-brown surfaces. Even so, this coin earns its XF Details rating with clear and strong links. The collector who wishes to own a Chain cent for reverse-up display will find this an ideal example. Our EAC grade Fine 12.

From The Joan Carroll Collection. PCGS# 91341

1793 Chain Cent, Periods Obverse
AU Details Example of S-4

6216 1793 Chain Periods — Tooled, Burnished — NGC Details. AU. S-4, B-5, R.3. On the obverse of this 1793 Chain cent, struck from the obverse die that shows periods after the obverse legend and date, several post-striking flaws account for the details grade. Tooling is visible throughout the obverse, and the strange grayish areas at parts of the margins on both sides hint at mischief. The surfaces, brown with blue and green overtones, are too glossy and have been burnished. Even so, of the two sides the one with the chain is far more appealing, and the coin has AU details with only a hint of actual wear to go with assorted rim bumps. For a collector seeking an example of the reverse, taking a look at this piece will be worthwhile. Our EAC grade Fine 15.

From The Joan Carroll Collection. PCGS# 91341

1793 S-10, B-10 Wreath Cent, VF25
Early Die State

6217 1793 Wreath Cent, Vine and Bars VF25 NGC. S-10, B-10, R.4. Breen Die State I, with beading still visible at the obverse rim flaw located about 3 o'clock. Microscopic surface roughness is primarily evident on the reverse of this attractive steel-brown cent, showing lighter brown high points, especially on the obverse. Our EAC grade VF20.

From The Joan Carroll Collection. NGC ID# 223H, PCGS# 1347

1793 S-9, B-12 Wreath Cent, XF40
Early Intermediate Die State

6218 1793 Wreath Cent, Vine and Bars XF40 PCGS. CAC. S-9, B-12, R.2. Breen Die State III. This is an early intermediate die state in Breen's sequence of nine different die states, showing delicate obverse clash marks and two reverse die cracks through RICA. One crack begins at the border over I and angles down through CA to the right stem and ribbon. The other crack begins at the border over R and progress through that letter to a berry spray.

The S-9, B-12 die pairing is the most common Wreath cent variety, although infrequently found in higher grades. This piece has splendid light brown surfaces with trivial marks of no consequence, and some of those marks remain from the planchet before this piece was struck. A delightful representative for a date or type collector. Our EAC grade VF35.

From The Joan Carroll Collection. NGC ID# 223H, PCGS# 1347

**1793 Liberty Cap Cent, VG10
Pleasing S-13, B-20 Example**

- 6219** 1793 Liberty Cap VG10 NGC. S-13, B-20, R.4. Mint Engraver Joseph Wright designed the Liberty Cap motif in the summer of 1793, as an artistic improvement over the earlier Chain and Wreath designs of that date. Four obverse and two reverse dies were completed and combined to produce six different die varieties for the date and type. The present coin represents the S-13 variety, with the L in LIBERTY nearly touching the beaded border and a triple leaf below OF on the reverse. A poll of EAC members voted Sheldon-13 the most beautiful of all the 1793 varieties.

This attractive coin retains all important design detail, at least in outline, with date and legends bold. The slightly granular chocolate-brown surfaces show some minor porosity near OF and some minor abrasions are evident on both sides, but the overall presentation is quite pleasing. Our EAC grade VG7.

From The Joan Carroll Collection. NGC ID# 223L, PCGS# 1359

**1794 S-65, B-51 Cent, AU50
Late Die State
Near Census Level**

- 6220** 1794 Head of 1794 AU50 PCGS. CAC. S-65, B-51, R.1. Breen Die State IX. This is the latest die state recorded in the Breen reverse, and both dies have extensive cracks. That through the final S is heavy from the border to the top of the E in ONE and continues to the T in CENT. The famous Shielded Hair variety, so-called as the left obverse border is heavy and protected the hair strands from wear.

Housed in a green-label PCGS holder, this splendid cent is finer than most survivors. Our EAC grade places this piece among the top 10 known examples. The surfaces are smooth and mark-free dark olive-brown with a few splashes of lighter tan. Our EAC grade XF40.

From The Joan Carroll Collection. NGC ID# 223P, PCGS# 901374

**1794 S-26, B-16 Cent, AU53
Rare Early Intermediate State**

- 6221** 1794 Head of 1794 AU53 NGC. CAC. S-26, B-16, R.2. Breen Die State IV. Die states I through IV form a minority of survivors, as most known examples show a second reverse crack through the first S in STATES that is absent on this example. This pleasing medium olive-brown specimen has slightly reflective fields with splashes of pale blue and iridescent toning. The sharpness is nearly AU based on EAC standards, with a small area of faint hairlines on Liberty's neck. Our EAC grade VF35.

From The Joan Carroll Collection. NGC ID# 223P, PCGS# 901374

1795 S-70, B-62 Cent, AU50
Head of 1795
Late Die State

6222 1794 Head of 1795 AU50 NGC. S-70, B-62, R.2. Breen Die State IV, with a heavy crack between TY to the forehead and cheek, nearly reaching the jaw. The reverse has light clash marks at the fraction and near OF. A few scattered marks are noted on the smooth olive-brown surfaces of this pleasing cent. Our EAC grade XF40. From *The Joan Carroll Collection*. NGC ID# 223R, PCGS# 1365

1795 S-76b, B-4b Cent, AU53
Transitional Variety

6223 1795 Plain Edge AU53 NGC. S-76b, B-4b, R.1. Breen Die State V, with both dies repolished to remove clash marks. This transitional variety is known with Lettered and Plain edges, the latter on thinner, lighter planchets. This is the most common die pair among 1795 cents (S-78 is a close second) and it is an ideal candidate for type collectors. Both sides exhibit pleasing chestnut-brown surfaces with trivial marks and traces of verdigris. Our EAC grade XF40. From *The Strawberry Fields Collection*. NGC ID# 223T, PCGS# 1380

1813 S-292 Cent, AU55, Gold CAC
Late Die State

6224 1813 AU55 PCGS. Gold CAC. S-292, R.2. Breen Die State V. The 1813 is an elusive date in the Classic Head series. The rule for this series is odd-numbered years (1809, 1811, and 1813) are scarce and even-numbered years are common. This late die state example has no evidence of reverse dentils that disappear due to die wear. Housed in a green-label PCGS holder, this Choice AU example is remarkable with medium brown surfaces showing traces of lighter tan at the right obverse and splashes of chestnut-brown on the reverse. Our EAC grade AU50. From *The Joan Carroll Collection*. NGC ID# 224X, PCGS# 1570

1813 S-292, B-2 Cent, MS63 Brown
Condition Census Coin

6225 1813 MS63 Brown NGC. S-292, B-2, R.2. The reverse is slightly off-center on this intermediate die state piece, struck from misaligned dies. Clash marks are mostly polished off the die, while flow lines appear at the right obverse border. Most of the reverse dentils are still visible. A scarce Classic Head cent, 1813 large cents are rarely found in Mint State grades. This example has lovely olive-brown surfaces with considerable cartwheel luster. A splendid specimen, the surfaces are free of marks, exhibiting faint golden overtones. Our EAC grade of AU55 is equal to a fourth-place tie in the Bland census. NGC ID# 224X, PCGS# 1570

FLYING EAGLE CENTS

1856 Flying Eagle Cent, VF30 Snow-9 Dies

- 6226 1856 VF30 PCGS. CAC. Snow-9.** A walnut-brown representative of this historic numismatic issue. The eagle's breast and tail feathers exhibit moderate wear, but substantial plumage detail remains and marks are few, though the obverse field has a few trivial hairlines. The Snow-9 die pair is associated with proofs, and it is likely the present cent was initially purchased by a collector around 1859. It may have then been used as a pocket piece for awhile by the proud owner, or simply spent by an heir who was oblivious of its status as the key date of the small cent denomination. If the latter, the person who removed it from circulation must have been delighted by the remarkable find. Encapsulated in an old green label holder. Ex: Houston Signature (Heritage, 12/2010), lot 3180. PCGS# 2013

1858 Large Letters Cent, MS65 Difficult to Locate Any Finer

- 6227 1858 Large Letters MS65 PCGS.** High Leaves, Closed E in ONE. The AM in AMERICA is joined at the base, confirming the Large Letters variety. The lustrous surfaces of the Gem in this lot exhibit bright reddish-tinged, tan-orange color. The eagle's plumage is sharply defined; only the leaves on the upper part of the wreath are a tad soft. Both sides lack spotting, and the few minor marks in the obverse field are consistent with the designated grade. PCGS and NGC combined have seen only 30 or so specimens finer (8/13). NGC ID# 2277, PCGS# 2019

1858 Large Letters Cent, MS65 Remarkably Well-Preserved

- 6228 1858 Large Letters MS65 PCGS.** High Leaves, Closed E in ONE. The Large Letter variety is affirmed by the AM in AMERICA being joined. Both sides of this Gem are awash in copper-tan luster, and the devices are solidly struck. The surfaces are impeccably preserved. PCGS has graded only 27 examples finer (8/13). NGC ID# 2277, PCGS# 2019

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR63
Snow-9, Reverse Struck Thru

6229 1856 — Reverse Struck Thru — PR63 NGC. Snow-9. A fully struck specimen of this rare and introductory small cent date. The flashy fields are primarily peach-gold though glimpses of lime-green and rose-red are also present. The upper right obverse and the field above the T in CENT display a few tiny lint marks, as made, and a minor retained lamination is west of the O in ONE. A small but interesting and textured strike-through (as coined) is nearly at the reverse center between the CE in CENT. A beautiful representative of this important issue. The Snow-9 proofs were unofficially produced by the Mint in the late 1850s to take advantage of growing collector demand for the famous variety.

1857 Flying Eagle Cent, PR65
Among the Finest Certified

6230 1857 PR65 NGC. The Philadelphia Mint did not begin commercial proof set offerings until 1858, one year after this impressive Gem was struck. The Mint did strike a limited number of proof coins to satisfy the needs of collectors and government officials in earlier years, but no official records were kept and the numbers minted can only be estimated today. As recently as 2012, the *Guide Book* estimated the mintage of the 1857 proof Flying Eagle cent at 485 pieces, but series specialists like Richard Snow argued that the number of survivors was much too small for such a large mintage. The 2014 *Guide Book* has a lower estimate of just 100 pieces struck, but others feel that figure may still be too high.

The present coin is a delightful Gem, with sharply detailed design elements and deeply reflective fields that show a mix of greenish-gold and lilac patina. The well-preserved surfaces are free of mentionable signs of contact and show a few microscopic specks of carbon on both sides. Census: 7 in 65, 0 finer (8/13). NGC ID# 227B, PCGS# 2040

INDIAN CENT

1877 Indian Cent, MS65 Red and Brown
Only Three Finer Coins at PCGS

6231 1877 MS65 Red and Brown PCGS. CAC. Long acknowledged as the key date in the series, the 1877 Indian cent claims a tiny mintage of 852,500 pieces. Even this small production total has been questioned by some numismatists who contend that the small number of survivors may indicate some of the coins in the reported mintage were actually dated 1876. Coins in Gem condition, with any trace of original red color, are elusive and ardently sought after.

This delightful Gem exhibits mostly copper red surfaces, mixed with hints of light brown patina and no trace of carbon. The design elements are well-detailed and the well-preserved surfaces retain much of their original mint luster. Population: 61 in 65 (1 in 65+) Red and Brown, 3 finer (8/13). NGC ID# 2284, PCGS# 2128

PROOF INDIAN CENT

1861 Indian Cent, PR66
Tied for Finest Certified at PCGS

6232 1861 PR66 PCGS. Despite a generous reported mintage of 1,000 pieces, the 1861 proof Indian cent is a key issue in the proof series today. Most of the coins went unsold and were destroyed or perhaps released into circulation after the end of the year. The dies were of poor quality and the hard copper-nickel composition of the planchets made detailed striking problematic. As a result, examples in Premium Gem condition, with a decent strike, are very rare today.

The present coin is a welcome exception to the rule, with sharp definition on most design elements. The pristine fields are deeply mirrored and show a few highlights of jade and lavender toning. Close inspection with a loupe reveals a single minor contact mark near the ear. Eye appeal is outstanding. Population: 2 in 66, 0 finer (8/13). NGC ID# 229B, PCGS# 2256

1864 Indian Cent, PR66 Brown
Rare L On Ribbon Variant
Snow-PR1 Original

6233 1864 L On Ribbon PR66 Brown PCGS Secure. CAC. Snow-PR1. For many years it was thought that just 20 proof 1864-L Indian cents were coined. Today, 20 different examples are identified, causing researchers to believe a few more may have been struck. A roster of 18 pieces appears in *The Flying Eagle & Indian Cent Attribution Guide, 2nd Edition, Volume 2, 1859-1869*, by Richard E. Snow. "The Fly-In Club" published that reference in 2003. In addition to those, Superior offered an example of PR1 in their January 2005 sale. The present piece matches none of the others, bringing the current population to 20 coins.

Remarkably, three different die pairs are known for the 20 coins, a situation akin to three known die pairs for the 1867 With Rays proof nickels. The Snow-PR2 variety, identified by a long die line below the ear, is now considered a restrike and represents about half of the known pieces. They were probably coined in the early 1870s, as the 1864 L On Ribbon cent had become well-known and in demand by 1869. Snow-PR1 (nine known) and Snow PR3 (unique) are now thought to be originals, actually struck in 1864. Perhaps the estimated mintage of 20 proofs in 1864 is still accurate, with an additional 20 or so coins minted a decade later.

An early auction appearance of the 1864 L on Ribbon Indian cent occurred in lot 1141 of the Frederick W. Geiss Sale (B. Max Mehl, 2/1947):

"The Excessively Rare 1864 Bronze Cent with L in PROOF

Lot No. 1142

1864 Bronze Cent with L on ribbon. (The L is for Longacre, the designer). **Brilliant proof.** Excessively rare. Of all the celebrated and valuable collections of United States (coins) which have passed through my hands in the past twenty years, I do not recall a single specimen of this coin being included in any of them. Until a few years ago, this coin in proof condition, was not even listed in the Standard Catalog. I know of only three or four specimens. I consider it by far the rarest of all small cents. Mr. Geiss paid \$225.00.

This seems a high price but considering its rarity, it would not surprise me to see this coin far exceed this price in the near future."

The coin realized \$237.50, successfully improving on the high price Geiss had originally paid for it. No study of die varieties was available at the time and the coin was not plated in the catalog, so it is impossible to say which Snow variety the Geiss coin represented. Recent auction appearances of the Snow-PR1 variety include the prior appearance of the present coin in lot 173 of the Baltimore Auction (Bowers and Merena, 3/2009), which realized \$97,750.

This lovely proof exhibits mostly deep brown surfaces with lilac toning on the obverse and pale emerald toning on the reverse. Both sides retain splashes of original mint red, yet too little for a red and brown designation. The strike is sharp with solid design details through out. An amazing coin, the surfaces are virtually blemish-free, with a tiny impairment on the obverse border at 1 o'clock. looking much like a tiny lamination. An almost indiscernible color spot is located to the left of the date. Listed on page 115 of the 2014 *Guide Book*. Population: 1 in 66 Brown, 0 finer (8/13).

Ex: West Palm Beach Signature (Heritage, 6/2008), lot 210; Baltimore Auction (Bowers and Merena, 3/2009), lot 173, realized \$97,750. From The New York Collection Of 1864-L Indian Cents. NGC ID# 229G, PCGS# 2279

1864 Indian Cent, PR64 Red
Famous L on Ribbon Variant
Unique Snow-PR3

6234 1864 L On Ribbon PR64 Red PCGS. Snow-PR3. The proof 1864 With L Indian cent is a legendary rarity, one that has been well-known and well-respected since shortly after its production. Rick Snow's *The Flying Eagle and Indian Cent Attribution Guide* notes that by 1869, the coin was sufficiently in demand to prompt someone at the Mint to produce restrikes, likely William DuBois, the Mint assayer who also served as curator of the Mint Collection. An added 10 (or possibly more) specimens were struck, using a refurbished obverse die and a regular proof reverse from 1868-1871. Snow designates these restrike pieces as PR2, of which 10 are known today. The obverse of the PR1 variety is remarkably similar to the PR3, except that on the PR1 pairing, the left edge of the 1 is between the denticles, while on the PR3 the left edge is over the left side of a denticle. The reverse of the PR3 marriage uses a reverse from the 1864 No L PR2 variety, with minute die lines in the peripheral field area at 1 o'clock.

There are 20 pieces known between the three varieties: seven PR1s, 10 PR2s, and just this one PR3. Snow's comments regarding this coin were as follows:

"In 1997, a previously unknown example turned up in an old collection called 'The Pennsylvania Estate' which was to be auctioned by Bowers & Merena. This coin did not match the diagnostics for either known die pair. I was asked to confirm its proof status, and was astounded to find it to be a third pair! This new pairing, die pair 3, had the same reverse as the original known die pair, which was also used for some of the 1864 No L proofs, so this new coin was determined to be an original."

Several years later, it is still the only specimen known from this die marriage. Under high magnification, repunching clearly shows on the 4 in the date. The bottom left serif, vertical crossbar, and the front vertex of a 4 are all quite visible northwest of the second, final punching. Similar repunching is noted on the 8 and 6. As a further aid to authentication should any future pieces be discovered, the centers of the loops of the 8, both top and bottom, show a series of near-vertical raised die lines. On the reverse, a tiny apparent die crack runs from the inside right vertex of the N in ONE onto the cross-stroke of that letter.

The obverse is only slightly mellowed brick-red, while the reverse offers light tan hues, and both sides show good contrast between the fields and devices. A few tiny flecks are unworthy of singular mention and visible only under a glass. The only obvious pedigree marker for this coin is a dark spot that is attached to and just to the left of the C in CENT. The strike is expectedly bold and unassailable. For the Indian cent specialist, the rarity of the proof 1864 With L need not be stressed, and the unique die pairing only confirms the illustrious nature of this coin. Listed on page 115 of the 2014 *Guide Book*.

1864 Indian Cent, PR65 Red
L On Ribbon, Snow-PR2
Very Rare Issue, Ex: Norweb

6235 1864 L On Ribbon PR65 Red NGC. Snow-PR2. Ex: Norweb. The 1864 L on Ribbon proof is one of the classic rarities in the U.S. cent series. Only 20-40 examples are believed to have been struck, just 20 pieces of which are traced today. The fascinating history of these pieces was published in Rick Snow's book *The Flying Eagle and Indian Cent Attribution Guide, Vol. 2: 1859-1869*. The die pair of the present coin is listed as Snow-PR2 in that reference. There is an obverse die line (as struck) on Liberty's neck (under the ear) that matches the diagnostics given by Walter Breen in his 1977 book *Walter Breen's Encyclopedia of United States and Colonial Proof Coins: 1722-1977*. Since that time additional discoveries have been made which shed new light on this enigmatic issue.

The initial proof delivery of the 1864 L on Ribbon cent was 10-20 examples. These coins were either held as die trials or sold to collectors in a random manner. Mint officials probably considered the addition of Longacre's initial to be a minor change that was not worthy of special consideration. It was not until a few years later that the existence of these proofs became known, by which time the advanced collectors who desired examples could not locate the coins. When Henry Linderman began his first term as Mint Director in 1867, the proof 1864 L on Ribbon Cent had already become a hotly desired numismatic item. During Linderman's first term (1867-1869), and continuing for a few years thereafter, many numismatic delicacies were restruck at the Mint. Far from being considered pariahs, the coins restruck during the "Linderman" period are some of the most sought-after issues in all of U.S. numismatics!

At least 10 (and perhaps more) additional 1864 L on Ribbon proofs were struck sometime around 1871, including the present coin. Rick Snow is credited with this discovery by matching the reverse die of the present example with the regular issue proof dies of that year. The unique die lines on the reverse are the same as on proofs from 1869 through 1871, although the 1869 and 1870 proofs were from earlier die states.

Virtually nothing was known about the proof 1864 L on Ribbon Cent until Breen published his work in 1977. Breen mistakenly identified the coins with the diagnostics of the present specimen as the only true proofs. This created a dilemma for the owners and sellers of the other proof examples. Most catalogers described the proofs that did not match Breen's diagnostics as copper die trials, or they conveniently overlooked Breen's research. It was not until the Bowers and Merena Higgins Sale of 1984 that Breen relented and proclaimed that there was a second die pair for the proof 1864 L on Ribbon (the original Snow-PR1 dies). Presently nine examples of that die pair are known. In 1997, Rick Snow identified a third die pair (Snow-PR3) when a unique specimen was offered in Bowers and Merena's Halpern and Warner Sale. Only 10 examples of the Snow-PR2 Indian cent are known, bringing the total to 20 specimens known for all three varieties. Recent auction sales of the Snow-PR2 include the PR65 Red and Brown PCGS coin in lot 3146 of the Pittsburgh Signature (Heritage, 10/2011), which realized \$161,000.

The present coin is a spectacular Gem that traces its history to the fabled Norweb Collection. A custom holder from Capital Plastics accompanies the lot, along with a copy of the Norweb catalog by Bowers and Merena (10/1987), where the coin was described in lot 156. It exhibits sharply detailed design elements throughout, with the L on the ribbon boldly delineated. The devices are frosty, creating some elements of contrast with the deeply reflective fields. The well-preserved surfaces retain their original red color with a few highlights of gold. Only a few microscopic specks of carbon are evident. Listed on page 115 of the 2014 *Guide Book*. Census: 1 in 65 Red, 0 finer (8/13). From *The New York Collection Of 1864-L Indian Cents*. NGC ID# 229G, PCGS# 2281

LINCOLN CENTS

1909-S VDB Cent, MS65 Red Uniformly Sharp Strike

- 6236 1909-S VDB MS65 Red PCGS. CAC.** Coppery luster invigorates this key-date representative and the strike is solid over all the design elements. This uniform crispness is significant with regard to this Red Gem offering because one or more elements typically show softness on this issue. Impeccably preserved surfaces stand out on both sides, enhancing the coin's eye appeal, aptly recognized by CAC. NGC ID# 22B2, PCGS# 2428

1909 Lincoln Cent, MS67 Red Bold Color, Vibrant Luster

- 6237 1909 MS67 Red PCGS.** A fantastic example of this first-year issue, elusive as a Red Superb Gem but often overshadowed by its VDB counterpart. Swirling luster dominates subtly textured surfaces that showcase intense orange colors with suggestions of rose. Boldly impressed and delightful in all respects. Population: 68 in 67 (2 in 67+) Red, 0 finer (8/13).
Ex: Long Beach Signature (Heritage, 6/2010), lot 223. NGC ID# 22B3, PCGS# 2431

1914-D Cent, MS65 Brown Blue Overtone

- 6238 1914-D MS65 Brown PCGS.** A bold blue overtone crosses glossy teak-brown surfaces on this Gem example of the 1914-D Lincoln cent key. Both sides show a few scattered spots, yet the overall eye appeal remains pleasing with few abrasions affecting fields or devices. Though the 1914-D has a higher mintage than several of its key-date peers, it was less saved than them and thus a condition rarity in Gem and better grades. Population: 11 in 65 Brown, 0 finer (8/13). NGC ID# 22BH, PCGS# 2471

1914-D Cent, MS64 Red and Brown Key Issue to the Early Lincoln Cents

- 6239 1914-D MS64 Red and Brown PCGS.** This boldly struck tan-gold Choice key date cent displays dynamic luster and is free from post-strike contact. Scattered minute carbon determines the grade. The 1914-D is rarer in Mint State than the only two Lincoln issues with lower mintages, the 1909-S VDB and the 1931-S. Housed in an old green label holder.
From The Joan Carroll Collection. NGC ID# 22BH, PCGS# 2472

1914-D Cent, MS63 Red Pleasing Detail

- 6240 1914-D MS63 Red PCGS.** Primarily light copper-orange with a few patches of sage and scattered flyspecks. A minor streaky pattern is visible in the right obverse field. Unlike the 1909-S VDB cents which were saved at the time of release, the 1914-D cent was more obscure in its time and far more prevalent circulated than not. NGC ID# 22BH, PCGS# 2473

1914-D Cent, MS64 Red Early Key-Date

- 6241 1914-D MS64 Red PCGS.** PCGS-graded as Red, though there is considerable duskiness to both sides, particularly at the deep peach areas on the left obverse and reverse. This near-Gem is minimally abraded with little visible carbon, though a few small areas are visible at the lower and right obverse. NGC ID# 22BH, PCGS# 2473

1914-D Lincoln Cent, MS65 Red
An Important Condition Rarity
Above-Average Eye Appeal

6242 1914-D MS65 Red PCGS. CAC. A key date among early Lincoln cents, the 1914-D is widely recognized as a 20th century rarity. It is a rare and expensive issue in all grades, and in the better Mint State levels it is a highly coveted condition rarity. Gem and finer examples with original color and no flecks or spots are extremely rare. Bowers (2008) writes that: "Nearly all have carbon spots of varying sizes unless they have been dipped or cyanided. A gem with good eye appeal and sharp strike will be a prize when found."

This lustrous coppery-red Gem is just such a coin. Most of the design elements are well-struck, including Lincoln's hair and beard, the mintmark, and the wheat ears except for the lines in the right-most one. Both sides are devoid of mentionable marks or spots, and each exudes above-average eye appeal. Population: 60 in 65 (1 in 65+) Red, 3 finer (8/13). NGC ID# 22BH, PCGS# 2473

1914-S Cent, Red Gem
Great Color and Eye Appeal

6243 1914-S MS65 Red PCGS. Color on this Gem ranges from gold-orange to peach but never falls outside the coveted Red designation. Well-defined with half-gloss luster on the obverse and a more satin appearance on the reverse. Great all-around eye appeal for an issue that is in its Denver cousin's shadow but nevertheless is challenging this fine. Population: 32 in 65 Red, 3 finer (8/13). NGC ID# 22BJ, PCGS# 2476

1915-S Cent, MS66 Red

Ex: Pittman, Jack Lee

6244 1915-S MS66 Red PCGS. The 1915-S Lincoln cent is the last of the “semikey” S-mint early Lincolns with low mintages that span the 1911-S through 1915-S series. (The 1910-S has always been somewhat more available.) Many of the later mintmarked coins from the teens and (especially) the twenties are equally elusive in the higher Mint State grades and with Red surfaces, but they tend to follow less of a pattern. In this respect, the 1911-S through 1915-S issues are among the most “orderly” of the entire series, in their elusive nature and predictably low mintages. Of course, the most “disorderly” single issue in the entire series has proven to be the 1926-S, which in Gem Red condition still has seen but a single example certified at PCGS.

The 1915-S was always challenging after the 1950s even in Very Fine to AU grades, and the few “Mint State” coins that could be found were mostly either dipped to simulate original color, or they had spots or other surface impairments. True Gem coins, when found, often show bold strikes and deep red coloration.

This Premium Gem piece is truly exceptional, with glowing reddish-orange fields and some tinges of dusky lilac on Lincoln’s portrait. The strike is expectedly bold, and the mintmark is well brought up. A tiny diagonal abrasion below the E of AMERICA provides a pedigree marker.

A few years ago we had the privilege of offering The Tom Mershon #2 All-Time PCGS Registry Set of Lincoln Wheat Cents, which also contained a splendid MS66 Red coin that brought a strong \$48,300 (CSNS Signature, 5/2005, lot 5319). This coin, while different, is every bit the equal of that piece in quality and appeal. Expect strong bidding when this piece crosses the auction block. Population: 5 in 66 Red, 0 finer (1/09).

Ex: Pittman I (Akers, 10/1997), lot 310; The Jack Lee Estate Collection / Long Beach Signature (Heritage, 2/2009), lot 431. NGC ID# 22BM, PCGS# 2485

**1918 Cent, MS67 Red
Great Color, Impressive Strike**

- 6245 1918 MS67 Red PCGS.** A beautifully preserved Superb Gem, this coin possesses numerous attributes. Gorgeous apricot-gold color with highlights of yellow-gold and orange-red provide this example with exceptional eye appeal. In addition, this piece exhibits bold design definition. The surfaces of both sides are virtually pristine, with only a couple of tiny marks present. A truly wonderful representative. Population: 16 in 67 Red, 1 finer (8/13). NGC ID# 22BV, PCGS# 2506

**1922 No D Cent, Strong Reverse
Well-Struck MS64 Brown**

- 6246 1922 No D Strong Reverse MS64 Brown PCGS. CAC. FS-401.** Die Pair 2. The weak obverse and strong reverse are characteristic of the "true" 1922 No D cent. All diagnostics of this coveted variety are evident, such as the sharp second 2 in the date and the fully or nearly fully separated lines in the wheat ears. PCGS has graded 35 Mint State Brown examples, two of which are near-Gems and one finer (8/13).

Soft brown patination overlays both sides; even the obverse shows some strong detail, such as the letters in LIBERTY, the date, and to some extent Lincoln's bow tie. The lines and grains in the wheat ears are sharp, as expected. Neither side reveals mentionable marks or spots. Great overall eye appeal. NGC ID# 22C9, PCGS# 3285

**1928-S Cent, MS65 Red
Great Eye Appeal**

- 6247 1928-S MS65 Red PCGS.** Primarily copper-orange surfaces are glossy with touches of peach and rose. Though the upper portrait shows a certain lack of detail common to the issue, the strike elsewhere is decent. A quality example of an underrated Lincoln cent issue seldom seen finer. Population: 41 in 65 (1 in 65+) Red, 5 finer (8/13). NGC ID# 22CT, PCGS# 2593

**1955 Doubled Die Obverse, MS64 Red and Brown
Sharply Struck**

- 6248 1955 Doubled Die Obverse MS64 Red and Brown PCGS. FS-101.** Dave Bowers (2008) estimates that about 3,000 to 4,000 1955 DDO coins exist. However, PCGS has seen only 30 Gems in all color ranges and none are finer. This near-Gem retains considerable red luster on the obverse and the design features are sharply struck. A few minute marks preclude Gem status. PCGS has graded a mere five Red and Brown Gems finer (8/13). NGC ID# 22FG, PCGS# 2826

**1955 Doubled Die Cent, MS64 Red and Brown
Classic Collector Coin**

- 6249 1955 Doubled Die Obverse MS64 Red and Brown PCGS. CAC. FS-101.** Q. David Bowers, in *A Guide Book of Lincoln Cents*, writes that "It is likely that about 3,000 to 4,000 1955 Doubled-Die cents exist." Most Mint State pieces grade between MS60 and MS63. Near-Gems are quite scarce and higher-grade coins are rare. On this Choice coin, lustrous gold-orange surfaces display splashes of blue and purple and are well-defined. NGC ID# 22FG, PCGS# 2826

**1955 Doubled Die Cent, MS64 Red
Very Scarce With Complete Red Color**

6250 1955 Doubled Die Obverse MS64 Red PCGS. CAC. FS-101.

The 1955 Doubled Die cent is one of the most blatant numismatic errors ever to make its way into circulation. One might say that the philatelic equivalent, in terms of blatancy if not rarity, is the illustrious 1918 Inverted Jenny 24 cent air mail stamp. Other stamps have inverted centers or second printings, but the Inverted Jenny is the most famous. There are also many other Doubled Die Lincoln cent varieties but none more obvious, although some are more elusive.

The doubling on the obverse of this variety is of the naked-eye sort, meaning that no magnification is needed to distinguish it from its regular, nonerror brethren. The doubled 1s in the date are almost completely separated, and the 9s and 5s broadly doubled as well. Many of the peripheral letters are separated by more than a half-letter's width.

The 1955 Doubled Die is known for having mostly brown patina or at least Red and Brown surfaces. This remarkable coin displays even red color over both sides. A few tiny marks and flyspecks of carbon can be found, but these are truly minor considerations in light of the rich, original red color. NGC ID# 22FG, PCGS# 2827

**1992-D Cent With Close AM Reverse
MS64 Red**

- 6251 1992-D Close AM MS64 Red PCGS. FS-901.** This transitional issue features a reverse design with close AM in AMERICA, adopted for cents in 1993 but used rarely with 1992-dated obverses at Philadelphia and Denver. Copper-orange and peach hues are prominent on this lightly marked but bright and beautiful example with solid detail. PCGS# 391429

PROOF LINCOLN CENTS

**1909 Lincoln Cent, PR66 Red
Bright, Unmellowed Surfaces**

- 6252 1909 PR66 Red PCGS. CAC.** Proof cents were shipped from the Mint wrapped in tissue paper, which was responsible for the deep toning seen on many matte proofs. Apparently the tissue paper was quickly discarded after this proof was received as the surfaces are bright yellow-tinged red on the obverse and slightly deeper red on the reverse. The strike is, of course, completely struck up in all areas. Only the slightest flyspecks of carbon prevent an even higher grade. Population: 41 in 66 Red, 6 finer (8/13). NGC ID# 22KS, PCGS# 3305

**1936 Lincoln Cent, PR66 Red
Attractive Color**

- 6253 1936 Type Two — Satin Finish PR66 Red NGC.** Pleasing peach-gold color and rich satin luster provide this piece with strong eye appeal. Orange highlights are also present. This Premium Gem exhibits a pleasing degree of design detail. A few tiny alloy spots appear on both sides and an as-made lint mark is present at the top of the T in CENT. Census: 18 in 66 Red, 2 finer (8/13). NGC ID# 22L3, PCGS# 3334

**1936 Lincoln Cent, PR66 Red
Brilliant Finish**

- 6254 1936 Type Two — Brilliant Finish PR66 Red PCGS.** This uniformly mirrored representative displays attractive, original copper-orange color that is imbued with whispers of light green and orange. A powerful strike has left its impression on the design elements, and the surfaces are impeccably preserved. Population: 33 in 66 Red, 2 finer (4/13).
Ex: FUN Signature (Heritage, 1/2007), lot 1885; Dallas Signature (Heritage, 11/2007), lot 179. NGC ID# 22L3, PCGS# 3335

1936 Brilliant Type Two Cent, PR66 Red

- 6255 1936 Type Two — Brilliant Finish PR66 Red PCGS.** The first year of modern proof Lincoln cent mintage, the 1936 was made to the extent of only 5,569 coins. Mellow golden-orange fields contrast with some silver-gray coloration on Lincoln's cheek and neck. This is a fully struck piece with good eye appeal, despite a few minor dark flecks on the reverse that are unobtrusive. Population: 33 in 66 Red, 2 finer (8/13). NGC ID# 22L3, PCGS# 3335

**1937 Lincoln Cent, PR67 Cameo
Tied for Finest at PCGS**

- 6256 1937 PR67 Cameo PCGS. CAC.** Ex: Tom Mershon Collection. Although a handful of 1937 proof Lincolns, with a total mintage of 9,320 coins, are certified at PCGS in grades up to PR67 Red, in PR67 Red Cameo this piece is tied for finest certified with only one other coin—or else this piece has been submitted twice (8/13). Considerable contrast that appears to verge on Deep Cameo appears on each side of this stunning sunset-orange piece, and the effect is especially noticeable on the wheat ears and lettering of the reverse. A likely candidate for acquisition by Registry Set collectors of the popular Lincoln cent series.
Ex: Long Beach Signature (Heritage, 9/2008), lot 496; Long Beach Signature (Heritage, 6/2010), lot 279. NGC ID# 22L4, PCGS# 83338

**1990 No S Cent, PR68 Deep Cameo
Near-Technical Perfection**

- 6257** 1990 No S PR68 Deep Cameo PCGS. FS-101. As the only No S proof variety to appear in the Lincoln Memorial series, the 1990 No S is highly popular with Lincoln cent enthusiasts. PCGS has graded fewer than 140 examples. Both sides of this piece display stunning gold-orange-on-black surfaces. Boldly defined devices enhance the outstanding eye appeal, as do the impeccably preserved surfaces. Population: 73 in 68 (1 in 68+) Deep Cameo, 22 finer (8/13). From The Joan Carroll Collection. NGC ID# 274B, PCGS# 93506

TWO CENT PIECES

**1864 Two Cent Piece, MS64+ Red
Scarce Small Motto Variety**

- 6258** 1864 Small Motto MS64+ Red PCGS. FS-401. Although nearly 20 million two cent pieces were issued in 1864, a sizeable majority were the Large Motto variety. The introductory Small Motto is much rarer, particularly in Red Mint State. This sharply struck and unabraded near-Gem is brick-red and orange-gold overall despite glimpses of navy-blue on the upper half of the reverse. Population: 18 in 64 Red (1 in 64+), 23 finer (8/13). NGC ID# 22N8, PCGS# 3581

**1872 Two Cent, MS65 Red and Brown
Final Circulation Issue**

- 6259** 1872 MS65 Red and Brown NGC. CAC. TRUST is die doubled north. The variety is unlisted on the NGC insert, but likely constitutes much of the low business strike mintage of 65,000 pieces. This well struck and flashy Gem is mostly butter-gold though raised areas are brown. Devoid of contact with scattered minute obverse flecks. NGC ID# 22NG, PCGS# 3613

PROOF TWO CENT PIECE

**1873 Two Cent Piece, PR66 Red and Brown
Richly Toned and Lustrous**

- 6260** 1873 Closed 3 PR66 Red and Brown NGC. Vibrant color and luster, particularly on the obverse, provides this well struck Premium Gem with a strong degree of visual appeal. The coin retains bold copper color overall, with colorful toning on the obverse, including shades of cherry-red, violet, plum, and denim-blue. The reverse displays a large swath of plum and blue. Census: 36 in 66 Red and Brown, 2 finer (8/13). NGC ID# 2753, PCGS# 3652

PROOF THREE CENT SILVER

**1857 Three Cent Silver, Brilliant PR65
Unrecorded but Small Number of Proofs Struck**

- 6261** 1857 PR65 NGC. This year is significant as one of the few of the Type Two design as a proof, and also the final year before proofs were made on a large scale by the U.S. Mint. Estimates vary of the number struck and the number extant, but what is significant to collectors today is how many are actually available. NGC has only certified 15 Gem proofs with seven finer, while PCGS has graded nine in PR65 with only one finer (8/13). This Gem is all-brilliant on each side. Heavy die striations explain the exceptionally bright mirrors in the fields, and also explain thinning of the lower portion of the outline of the star on the obverse. NGC ID# 27C4, PCGS# 3704

PROOF THREE CENT NICKEL

1873 Closed 3 Three Cent Nickel, PR67
Attractive Pastel Toning

6262 1873 Closed 3 PR67 PCGS. Light pastel toning, in several colorful hues, provides this Superb Gem example with lovely eye appeal. The obverse features shades of pink, yellow, blue, and green. The reverse displays bright pastel yellow color at center, with splashes of pink, green, and orange near the rims. The few abrasions present are minor. Population: 0 in 67, 0 finer (8/13). NGC ID# 275U, PCGS# 3769

SHIELD NICKEL

1866 Rays Shield Nickel, MS66
Above-Average Strike and Surfaces

6263 1866 Rays MS66 PCGS. The 1866 has the distinction of being the first cupro-nickel five cent coin struck for regular and proof U.S. coinage. Mushy, poor strikes are typical for the business strikes; Peters and Mohon (1995) state: "Finding a fully struck piece scores a 10 in difficulty." This Premium Gem comes very close to being fully struck. The veins in the leaves stand out, as do most of the horizontal shield lines (some of the vertical lines in the stripes are weak). On the reverse, all star centrils are sharp, as are most of the rays. The lustrous surfaces are devoid of mentionable marks, and carbon spots, common to the issue, are lacking. Only a couple of minor cracks are noted, suggesting that this was likely among the first coins to be struck. Population: 32 in 66, 0 finer (8/13). NGC ID# 22NX, PCGS# 3790

Mint Director Henry Linderman

PROOF SHIELD NICKEL

1867 With Rays Nickel, PR64 Cameo Long-Prized Key to the Series

6264 1867 Rays PR64 Cameo NGC. Dannreuther-2. Time after time the coin market has overreacted to new discoveries. At one time, Lincoln cents with die breaks (particularly around LIBERTY and IN GOD WE TRUST) were popular, to name but one fad. Occasionally, however, the market reacts with excessive disdain rather than exuberance, as is the case with the proof 1867 With Rays nickels.

Even though the work of John Dannreuther has demonstrated that the 1867 With Rays Shield nickels were restruck and more than 25 of the coins released, the issue remains the rarest in the series nonetheless, as no other date falls below a stated mintage of 600 proof specimens. To a certain extent, the market already had "priced in" empirical information about the number of survivors and adopted an informal norm of assuming more than 25 examples were struck, regardless of what the Mint records said. For now, though, the market remains in a state of overreaction to the news Dannreuther confirmed, making the time right to acquire a well-preserved example before the issue takes its next star turn.

This PR64 Cameo specimen is appreciably contrasted through considerable patina, which ranges from light yellow to green-gold. The devices, which are more heavily frosted on the obverse, have decent strikes when allowances are made for the usual places of weakness, such as the bottom of the shield. Wispy hairlines and a few flyspecks contribute to the grade. Census: 4 in 64 Cameo, 8 finer (8/13). PCGS# 83818

LIBERTY NICKELS

1893 Five Cent, Exceptional MS66

- 6265 1893 MS66 PCGS. CAC.** The 1893 five cent, from a huge mintage greater than 13 million circulation strikes, is usually one of the more poorly produced Liberty nickels. It is typically weakly struck on imperfect planchets, and is plagued by carbon specks, spotting, and stains. This Premium Gem does not fit this profile. A solid strike delivers crisp detail to the design features, including the corn ear left of the ribbon bow. The only notable softness is star 6. Strong mint luster covers both sides, each of which is devoid of mentionable contact marks or spots. All in all, this is truly an exceptional representative of this issue. Population: 16 in 66, 1 finer (8/13). NGC ID# 2778, PCGS# 3854

1902 Liberty Nickel, Fully Struck MS67+ Sole Finest at PCGS

- 6266 1902 MS67+ PCGS Secure. CAC.** The 1902 Liberty nickel issue is hands-down one of the most elusive regular issues from the final decade of the series, despite its generous mintage of more than 31 million pieces. This incredible MS67+ example with the CAC endorsement is the *single finest example certified of the issue at PCGS*, a piece notable for nearly mark-free surfaces showing copious luster and a full strike on both sides, even that lower-left ear of corn. Almost imperceptible rose hues on the left obverse complement surfaces that are largely untoned. A tiny tick to the left of the V on the reverse is the only observable mark. A Registry Set essential. Population: 4 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 277D, PCGS# 3863

1912-D Liberty Nickel, MS66 None Finer at PCGS

- 6267 1912-D MS66 PCGS.** Although the obverse holds appeal, the reverse of this Premium Gem is the more attractive side. It features a swath of bright colors at portions of the periphery consisting of lemon-yellow, apple-green, cherry-red, blue-green, orange, and violet. The coin has a light golden-brown appearance overall. A few gray flyspecks are present. Population: 30 in 66, 0 finer (8/13). NGC ID# 277P, PCGS# 3874

1912-S Liberty Nickel, MS65 Last Official Series Date

- 6268 1912-S MS65 PCGS.** The Liberty design was officially retired after 1912, when the San Francisco Mint coined a small mintage of 238,000 pieces. This well-detailed Gem shows just a touch of softness on the lower-right stars, with vibrant mint luster and attractive pale gold toning. A short mark near Liberty's mouth is the only flaw of note. PCGS has graded 10 numerically finer examples (8/13). NGC ID# 277R, PCGS# 3875

1912-S Nickel, Lustrous MS65 A Well-Produced Example of This Key

- 6269 1912-S MS65 PCGS.** While 1912-S nickels are always available for a price, this is one of the very few we have seen that is well-struck and also shows good mint luster. The luster is borderline satiny-frosted, and readily apparent beneath the rose and lilac toning seen over each side. The only mark of any note is an angling abrasion in the right obverse field. NGC ID# 277R, PCGS# 3875

1912-S Liberty Nickel, MS65 Problem-Free Example of This Rare Issue

- 6270 1912-S MS65 PCGS.** This is a lovely Gem example of this key Liberty nickel. The surfaces are satiny and bright, with none of the dullness all too often seen on this issue. The strike is generally well defined, the only exception being the left ear of corn on the reverse wreath. Minimal marks are present, as one would expect from the grade, and combine with pale lilac and rose toning. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1885 Liberty Head Nickel, PR67 Cameo An Exceptional Alternative to the Business Strike

6271 1885 PR67 Cameo PCGS. CAC. The proof Liberty nickels of 1885 take on added importance to collectors due to the rarity of the business strikes. Unfortunately, Liberty nickel proofs, including the 1885, were plagued by production problems, making problem-free specimens difficult to locate. This Superb Gem Cameo is a refreshing exception. The design elements are crisply defined and the planchet lacks the typical problems (flaking, dark streaking, and carbon spots) affecting Liberty proofs. Consequently, this specimen is one of the 22 finest examples certified by PCGS and NGC. The CAC label affirms its exceptional eye appeal. Population: 7 in 67 Cameo, 0 finer (8/13). PCGS# 83883

1898 Cameo PR67 Nickel Very Scarce at This Grade Level

6272 1898 PR67 Cameo PCGS. Only 1,795 proofs were struck of the 1898 nickel, but two sets of dies were used. This piece appears to have been struck from the slightly repunched pairing. The surfaces are brilliant and show definite contrast between the fields and devices on both sides. Fully struck, as expected. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (8/13). PCGS# 83896

BUFFALO NICKELS

1916 Doubled Die Obverse Nickel, Good 4 Final Date Digit Visible

6273 1916 Doubled Die Obverse Good 4 PCGS. FS-101. While this much-desired Doubled Die Obverse Buffalo nickel key issue can be discerned at the AG3 level, due to the doubling of the obverse feathers, here the crucial last digit 6 is clearly visible and just as clearly doubled in the dramatic fashion that marks this variety. The tops of the 191 are visible as well, and this Good 4 coin has no mentionable problems on the steel-gray surfaces, just the extensive wear expected. A single scrape is noted atop the bison's head. Ex: *Long Beach Signature* (Heritage, 6/2010), lot 464. NGC ID# 2TSS, PCGS# 3931

1916 Doubled Die Obverse Nickel, VG8 Ample Design Detail Key to the Series

6274 1916 Doubled Die Obverse VG8 NGC. FS-101. Broad die doubling on the 6 in the date (and other nearby design elements, such as the feather tips) is obvious despite 62 points of wear. The 1916 DDO is more challenging than the 1918/7-D nickel, and is the key to a *Guide Book* collection of the series. Light gray surfaces are accented by deep olive-brown patination in the protected areas. Ample detail is still evident on some of the design elements despite relatively heavy wear. The rims are nearly complete, especially on the reverse. Census: 4 in 8, 86 finer (8/13). From *The Joan Carroll Collection*. NGC ID# 2TSS, PCGS# 3931

1916 Doubled Die Obverse Nickel, VF25
Attractive for the Grade

- 6275** 1916 Doubled Die Obverse VF25 PCGS. FS-101. The key date to the Buffalo nickel series, the 1916 Doubled Die is even more challenging than the 1918/7-D, and is much scarcer than the famous 1937-D Three Legged nickel. Despite 35 points of wear, the widely separated secondary date is obvious to the southeast. Although the pick-up point is the date, die doubling is also noticeable on the feathers and profile. Lilac-gray in color is seen overall with glimpses of russet freckles and a few streaks of olive-brown toning. The wear is even, and no marks distract, particularly when the grade is considered. Perfect for the collector who seeks a collectible but nicely detailed mid-grade example.
Ex: Dallas Signature (Heritage, 11/2005), lot 2030. NGC ID# 2TSS, PCGS# 3931
-

1916 Doubled Die Nickel, AU53
Bold Date Duplication

- 6276** 1916 Doubled Die Obverse AU53 NGC. FS-101. The 1916 nickel with doubled die obverse is among the most dramatic 20th century die errors, once called "1916/1916" for the amount of separation between images seen there. While worn, dateless examples can be identified based on the doubling of the portrait's feathers, there is little finer than a high-grade circulated piece such as this AU53 example. The surfaces are subtly lustrous beneath streaks of steel-gray and reddish-orange, modestly marked with only a few obvious ticks. On the reverse, the bison shows a clear horn. Census: 5 in 53, 34 finer (8/13). NGC ID# 2TSS, PCGS# 3931
-

**1918/7-D Nickel, FS-101, VF30
Doubled Die Variety**

6277 1918/7-D VF30 PCGS Secure. FS-101. Many collectors believe that the 1918/7 overdate nickels and quarters were created when a punch for an 8 was entered in the die on top of the 7, but that is not what happened. These dies, and other 20th century overdates, are actually a form of doubled die as the entire four digit date logotype was part of the hubs used to create the individual coinage dies. A complete 1917 obverse die was created from the hub, then was hubbed again, this time from a complete 1918 hub.

This Choice VF example the previous 7 clearly and completely under the 8. The strike is excellent with virtually full horn details, and the gray surfaces exhibits light gold toning. An attractive middle grade representative. NGC ID# 22RJ, PCGS# 3939

**1918/7-D Nickel, XF40
One of the Keys to the Series**

6278 1918/7-D XF40 PCGS. CAC. FS-101. The sole uncontested overdate of the Buffalo nickel series, and its key date along with the 1916 Doubled Die Obverse. This example is moderately circulated but unabraded aside from a single short slide mark at the obverse center. A late die state with a horizontal crack above the jaw and an orange-peel texture on the fields and eye socket. NGC ID# 22RJ, PCGS# 3939

**1918-D Buffalo Nickel, MS65
Lightly Toned and Well Struck**

6279 1918-D MS65 PCGS. Both sides of this Gem reveal attractive toning in intermingled shades of yellow-gold, peach, rose, red, and ice-blue when examined closely. Lovely frosty luster and beautifully preserved surfaces provide this well struck example with strong visual appeal. A few tiny flyspecks of gray patina appear on portions of the reverse. Population: 71 in 65 (2 in 65+), 23 finer (8/13). NGC ID# 22RH, PCGS# 3938

**1921-S Buffalo Nickel, MS65
Only Three Numerically Finer Examples at NGC**

6280 1921-S MS65 NGC. Rich toning on both sides and bold luster provide this Gem with a strong degree of eye appeal. The toning includes several intermingled hues of yellow-gold and rose-gold, with the reverse also displaying orange. A late die state example, this coin displays a strong degree of detail. A horizontal die crack extends through most of the Indian's nose. A small dark spot is present near the Bison's tail. Census: 35 in 65, 3 finer (8/13). NGC ID# 22RU, PCGS# 3948

**1921-S Buffalo Nickel, MS65
Highly Lustrous and Attractively Toned**

6281 1921-S MS65 PCGS. CAC. Vibrant luster is a major attribute of this attractive Gem. Although the strike is somewhat weak, this well-preserved coin displays great color, including intermingled shades of pastel mint-green, pale gold, and ice-blue on each side, with the reverse also revealing splashes of rose-gold. A small diagonal charcoal-colored planchet flaw appears at the top of the Indian's head, but there are few signs of contact. A key issue in the series, seldom seen technically finer. Population: 60 in 65, 8 finer (8/13). NGC ID# 22RU, PCGS# 3948

1921-S Nickel, MS66
Virtually Full Strike

6282 1921-S MS66 NGC. This is a stunning 1921-S Buffalo nickel, and it is tied for the finest that either NGC or PCGS have certified. The strike is bold, including a full split tail and full head and back details on the bison. The 1921-S is one of the S-Mint keys to the Buffalo nickel series, and rarely found with a full strike. This piece nearly qualifies. Both sides have exquisite luster with satin surfaces beneath amazing toning. The obverse is bright orange and light blue with a trace of iridescence. The reverse is blue-green and delicate gold. Census: 3 in 66, 0 finer (8/13). NGC ID# 22RU, PCGS# 3948

1923-S Nickel, MS65
Softly Rolling Luster

6283 1923-S MS65 PCGS. A golden overtone prevails on this Gem, varying to peach at parts of the margins and nickel-white others. Though the strike shows evidence of typical softness, particularly on the bison's shoulder, the head, though weak, does show a full outline of the horn. The 1923-S nickel enjoyed a generous mintage of more than 6.1 million pieces, but between the well-known striking difficulties encountered by branch mints during the Roaring Twenties and a low savings rate, the issue is very scarce in Gem and rare any finer. Population: 46 in 65 (1 in 65+), 3 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 22RW, PCGS# 3950

1925-S Buffalo Nickel, MS65
Exceptional Technical Quality and Eye Appeal

6284 1925-S MS65 PCGS. CAC. Buffalo nickels were a victim of inadequate quality control at the San Francisco Mint in 1925. The usual problems are eroded dies, weak strikes, subpar luster, and poor planchet quality — frequently seen in combinations — that preclude a Gem grade. While they are frequently found in lower Mint State grades, 1925-S Buffalo nickels in Gem condition are few and far between. PCGS and NGC have seen fewer than 50 pieces in MS65 and just 3 finer, none finer than Premium Gem.

The present MS65 is a refreshing exception. Its surfaces yield vibrant luster, and are toned a soft rose with occasional powder-blue undertones on the obverse and deeper yellow-gold and grayish-blue on the reverse. The date, LIBERTY, and the braid are strong, as are the horn, peripheral lettering, and the mintmark. The hair on the bison's head reveals the usual softness. The rims are full and free of the design elements and the planchet quality is excellent. Both sides are remarkably devoid of mentionable marks. As affirmed by the CAC label, this piece displays exceptional eye appeal. Population: 25 in 65, 1 finer (8/13). NGC ID# 22S4, PCGS# 3956

1926-S Five Cent, MS64
Softly Frosted Luster

6285 1926-S MS64 PCGS. CAC. As the only regular-issue Buffalo nickel with a mintage of fewer than a million dollars and part of a challenging string of 1920s branch mint dates to boot, the 1926-S five cent enjoys perpetual demand from series enthusiasts. While this near-Gem shows some of the issue's most typical characteristics, including soft detail on the portrait's braid and the bison's shoulder, it turns one typical disadvantage, an eroded set of dies, into a beautiful range of softly frosted luster. Surfaces are lavender-gray with touches of gold-orange at the right margins and center obverse. NGC ID# 22S7, PCGS# 3959

1926-S Buffalo Nickel, MS65
Acknowledged Key to the Series
None Certified Finer at PCGS

6286 1926-S MS65 PCGS Secure. CAC. The 1926-S is the scarcest regular issue in the Buffalo nickel series. Only 970,000 pieces were struck, explaining its #1 rarity rating (this, of course, excludes the overdate and 1916 Doubled Die since they were not regular production issues). Examination of the price structure for the 1926-S reveals why it is the undisputed key to the series. Low-grade coins are cheap, under \$50. But in VF the price jumps to the \$400 range. Then it doubles in XF. It triples once the AU level is reached. It doubles again at the threshold of Uncirculated. Want a Gem, such as this coin? Stand in line. Only 17 total pieces have been certified by both services, and over the past five years they have brought between \$50,000 and \$120,000.

A couple of conclusions can be drawn from examining these prices. One is that all collectors of this series know: It takes very little circulation to drop a high-grade Buffalo nickel to a dateless one; thus, the high prices for XF-AU coins. These coins must have been pulled from circulation at just the right time to still retain details and partial luster. A second conclusion is collectors and hoarders were not aware early-on about the significance of the 1926-S. Since they are so cheap in low grades, obviously many were pulled from circulation (probably in the 1950s), but very few were set aside in 1926 or shortly afterward.

The 1926-S is a premier strike rarity from the 1920s. It is believed that the reverse die was left over from a previous year, accounting for the general softness of detail. This piece is better struck than almost any example we have seen. There is some high-point softness on the reverse on the bison's head and tail, but the obverse is remarkably well-defined. The centers are powder-blue and surrounded at the margins by golden-rose and blue iridescence. The mint luster is bright and satiny, glowing beneath the lovely patina. By way of identification, there are two small spots in the lower right obverse field out from the neck of the Indian. This coin should find a home in the finest collection or Registry Set. Population: 13 in 65, 0 finer (8/13). *Ex: Chicago Rarities Sale (Bowers and Merena, 4/2008), lot 218, where it brought \$322,000, which still remains the record price for a 1926-S nickel. NGC ID# 22S7, PCGS# 3959*

**1937-D Three-Legged Nickel, MS63
Famous Die State**

6287 1937-D Three-Legged MS63 PCGS. FS-901. Pink-peach and rose overtones grace olive-gray surfaces that are luminous with wispy abrasions. As usually seen for the Three-Legged variety, overall detail is soft, but the weak areas have the rounding of a Mint State coin. Great arm's-length eye appeal and housed in a green label holder. NGC ID# 22SX, PCGS# 3982

**1937-D Three-Legged Nickel, MS64
Enduringly Popular Series Variant**

6288 1937-D Three-Legged MS64 PCGS. FS-901. The 1937-D Three-Legged Buffalo is probably the sole most popular variety coin of the 20th century, and it certainly is the best-known, even among noncollectors. This near-Gem boasts excellent eye appeal over pinkish-gold surfaces with minimal marks, a good strike, and ample evidence of the many authenticating diagnostics for the issue. PCGS has seen only 59 submissions numerically finer (8/13). NGC ID# 22SX, PCGS# 3982

**1937-D Three-Legged Nickel, MS64
High-End Example of Late Die State**

6289 1937-D Three-Legged MS64 PCGS. FS-901. Rich apricot and gunmetal shades grace this coruscating and unabraded Choice key date nickel. In his 1988 *Encyclopedia*, Walter Breen targeted hapless Mr. Young as the mint worker responsible for abrading away the bison's leftmost foreleg. Young has since been mentioned in so many catalog descriptions over the years that he could sue for libel if he is still with us to this day. MS64 is far superior in grade to the typical example of this famous variety, which is generally encountered in VF through AU.
Ex: *Houston Signature* (Heritage, 12/2010), lot 3374. NGC ID# 22SX, PCGS# 3982

**1937-D Three-Legged Nickel, MS65
Richly Toned, Early State**

6290 1937-D Three-Legged MS65 PCGS. FS-901. While die-state variants seldom achieve the broad-based popularity exhibited by doubled dies and overdates, the 1937-D Three-Legged nickel is one of the rare exceptions. Popularized within months of its discovery by the Bebees and others, the Three-Legged nickel has a range of high-grade survivors, though few can match or exceed the Gem offered here. Gold-orange outer toning gives way to light gray interiors that show touches of sage. Minor striking softness in the centers is typical, while the surfaces show less than the usual level of die erosion. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKELS

1936 Type One Buffalo Nickel, PR67+ Pristine and Fully Struck

- 6291** 1936 Type One — Satin Finish PR67+ PCGS. CAC. To our eyes, the Satin Finish variety of 1936 proof Buffalo nickels is more in keeping with designer James Earle Fraser's original artistic intent than the shiny Brilliant Finish proofs that followed. This pristine, fully struck Satin Finish example is all a picky numismatist could want, pinkish-gray in the centers with glints of gold and jade near the rims. Population: 5 in 67+, 32 finer (8/13). NGC ID# 278X, PCGS# 3994

1936 Nickel, PR67+ Type Two, Brilliant Finish

- 6292** 1936 Type Two — Brilliant Finish PR67+ PCGS. CAC. A magnificently preserved specimen of the first brilliant proof five cent striking in decades, one of just two for the Buffalo nickel series. As indicated by the plus designation, this coin has tremendous eye appeal. The piece displays intense gleaming luster with a chrome finish. Population: 5 in 67+, 6 finer (8/13). NGC ID# 278Y, PCGS# 3995

1936 Type Two Buffalo Nickel, PR68

- 6293** 1936 Type Two — Brilliant Finish PR68 NGC. This is one of the finest 1936 proofs we have encountered, from both a technical viewpoint as well as an aesthetic one. Although the fields are not especially deep, each side displays carbon-free surfaces exhibiting lovely toning in shades of rose and lilac. As expected given the grade level, there are no obvious contact marks or other visual distractions on this magnificent coin. Census: 16 in 68, 0 finer (8/13). Ex: November Signature (Heritage, 11/2003), lot 5880; New York Signature (Heritage, 6/2005), lot 5305; New York Signature (Heritage, 12/2011), lot 3322, which realized \$9,775. NGC ID# 278Y, PCGS# 3995

PROOF JEFFERSON NICKELS

1938 Jefferson Nickel, PR67 Cameo Finest Certified at NGC

- 6294** 1938 PR67 Cameo NGC. A spectacular Superb Gem Cameo proof Jefferson nickel from the first year of the design. The design elements are sharply detailed throughout and the fields are deeply reflective, with delicate shades of champagne-gold toning and no visible distractions. Eye appeal is extraordinary. Census: 1 in 67 Cameo, 0 finer (8/13). PCGS# 84175

1939 Nickel Reverse of 1940, PR66 Cameo One of Only Three PCGS-Graded Examples

- 6295** 1939 Reverse of 1940 PR66 Cameo PCGS. CAC. A pleasing degree of contrast, particularly prominent on the reverse, provides this Premium Gem with wonderful eye appeal. Subtle hints of almond-gold toning are present on this beautifully preserved piece. The PCGS Population stands at 2 in 66 Cameo, 1 finer (8/13). PCGS# 38532

1952 Nickel, PR68 Deep Cameo
Tied for Finest Certified

6296 1952 PR68 Deep Cameo PCGS. Only 81,980 proof Jefferson nickels were struck in 1952. The Philadelphia Mint used an all-brilliant finish on proof coins of this era and few examples show any degree of cameo contrast. In addition, the coins were poorly packaged and often suffered from mishandling. To quote Rick Tomaska in *Cameo and Brilliant Proof Coinage of the 1950 to 1970 Era*, "Well-preserved examples are so scarce with ultra-heavily contrasted devices that few cameo dealers or collectors have ever even seen one."

The present coin is a magnificent PR68 example, with virtually perfect brilliant fields that contrast profoundly with the unusually frosty devices. The design elements show razor-sharp definition throughout and eye appeal is incredible. This coin is tied with one other example for finest Deep Cameo certified at PCGS and is a must-have for Registry Set collectors. Population: 2 in 68 Deep Cameo, 0 finer (7/13). NGC ID# 27A6, PCGS# 94184

1953 Jefferson Nickel, PR68 Deep Cameo
Single Finest Coin at PCGS

6297 1953 PR68 Deep Cameo PCGS. Production of proof sets increased dramatically in 1953 to 128,800 sets. Unlike the practice of recent years, the Mint made no conscious effort to produce cameo finish proofs in that era and, according to David Lange:

"Only the first few hundred proofs from each die could be expected to show any frostiness. Perhaps only the first few dozen impressions would result in coins having deep or ultra cameo contrast, and these are consistently the most desired of Proofs among specialists."

Accordingly, 1953 proof Jefferson nickels are rarely encountered with cameo contrast and Ultra or Deep Cameo specimens are highly prized by collectors.

The present coin is a magnificent PR68 Deep Cameo example, the single finest certified at PCGS. The design elements are razor-sharp throughout and the pristine surfaces show no sign of contact or toning, even on close inspection with a loupe. The frosty design elements contrast profoundly with the deeply mirrored fields and eye appeal is tremendous. Population: 1 in 68 Deep Cameo, 0 finer (8/13). NGC ID# 22YE, PCGS# 94185

EARLY HALF DIMES

1792 Half Disme, Fine Details
Judd-7, Historic Federal Issue

6298 1792 Half Disme, Judd-7, Pollock-7, R.4 — Holed / Plugged — PCGS Genuine. Fine Details. The famous introductory Federal coinage issue, struck in John Harper's cellar since the First Philadelphia Mint was not yet ready for production. George Washington may have provided the silver bullion for the 1792 half disme but they were apparently distributed by Secretary of State Thomas Jefferson, per his July 13 diary entry "rec'd from the mint 1500 half dimes of the new coinage." The present silver-gray example is plugged near 1 o'clock and both sides are whizzed. A pair of dull thin vertical marks are noted near the date, the second S in STATES is strengthened, and the upper reverse field has a tiny dig. These impairments only serve to make the present lot more affordable for those who cannot afford the seven-figure price that high grade pieces have attained.

1796 V-1, LM-1 Half Dime, MS61
LIKERTY Obverse

6299 1796 LIKERTY MS61 NGC. V-1, LM-1, R.3. There are three different listings for 1796 half dimes in the Guide Book, although only two die varieties are known. The V-1, LM-1 die pair has a normally dated obverse die that exists in early states with a perfect B in LIBERTY, and in late states with a broken B, known as the LIKERTY variety. That letter is not entirely open as one would expect, but has extremely thin top and bottom connectors from the curves to the upright. The obverse has prominent clash marks and both sides have minor die cracks. This pleasing Mint State example has sharp details and satin luster that shines through deep gold and iridescent toning. Census: 2 in 61, 12 finer (8/13). NGC ID# 22ZX, PCGS# 94254

1797 15 Stars Half Dime, VF30
V-2, LM-1

6300 1797 15 Stars VF30 PCGS. V-2, LM-1, R.3. A lovely midgrade example of the scarce Draped Bust, Small Eagle type. The minimally abraded surfaces exhibit rich powder-blue fields and chestnut-gold high points. LM-1 is the sole 1797 15 stars variety. The date was presumably added to an otherwise complete standby die made prior to the admission of Tennessee to the Union on June 1, 1796. NGC ID# 22ZZ, PCGS# 4258

PROOF BUST HALF DIME

1830 Half Dime, PR66 ★

First Auction Appearance of This Coin

Only Verified Proof of the V-10, LM-1.1 Variety

6301 1830 PR66 ★ NGC. V-10, LM-1.1, R.4. A large mintage of 1.2 million Capped Bust half dimes was accomplished in 1830, with 14 different die varieties for the date. A very small number of proofs were struck, but no official mintage totals were recorded. NGC and PCGS have combined to certify only five proof examples of this date, with this specimen the finest seen at either service (8/13).

In his *Encyclopedia of United States and Colonial Proof Coins*, Walter Breen enumerated proof examples from three die varieties, LM-1 (V-10), LM-3 (V-8), and LM-9 (V-5). Breen stated that he had owned a proof of the LM-1 variety himself that showed signs of cleaning, and had been showed another example by David Bullowa in 1952. Both coins were reportedly in a private collection in 1975. However, the authors of the standard series reference *Federal Half Dimes 1792-1837* stated they had never seen any true proofs of the LM-1 and LM-3 varieties as of 1998.

In their 65th Anniversary Auction of 10/17-19/2000, Stack's sold a proof specimen of the LM-3 variety, which had previously been owned by Reed Hawn, proving Breen was correct about the LM-3 proofs. We believe the present coin is the first example of an LM-1 proof to appear at auction, validating Breen's assertion that proofs of this variety exist.

The present coin is from an old European collection, acquired by a nobleman who visited this country in the mid-19th century and preserved by his family to the present day. This piece is a magnificent Premium Gem that possesses extraordinary eye appeal to complement its high technical quality. The obverse shows a few diagonal drawing lines across the bust that were not completely eliminated when the coin was struck. This caused a slight softness in the details of the portrait and the corresponding area on the reverse. The peripheral design elements are sharply detailed. The deeply mirrored fields are blanketed in attractive shades of champagne-gold and cerulean-blue toning. No mentionable distractions are evident. As the finest known 1830 proof half dime and the only verified proof example of the LM-1 variety, this coin represents a once-in-a-lifetime opportunity for the advanced specialist.

Obtained by a European noble while visiting this country in the middle 19th century and retained by the same family until the present time.

From The Noblesse Collection. NGC ID# 27CL, PCGS# 4301

SEATED HALF DIME

1844-O Half Dime, MS63
Scarcer Medium O, V-1 Variety

6302 1844-O MS63 PCGS. CAC. Medium O, V-1. The 1844-O Seated Liberty half dime is one of the key issues in the series, from a mintage of 220,000 pieces. Two die varieties are known for the date, with this coin representing the scarcer V-1 variety, with a Medium O mintmark. In his series reference, Al Blythe rates the Medium O variety R.6 in Mint State.

The present coin is a delightful Select example with an unusually sharp strike for a New Orleans issue. All star centrils are complete. Attractive shades of bluish-gray, amber, and champagne-gold patina enhance the outstanding eye appeal. The pleasing surfaces show prooflike reflectivity in many areas, with only minor signs of contact. Population: 1 in 63, 4 finer (8/13). NGC ID# 2336, PCGS# 4334

PROOF SEATED HALF DIME

1858 Seated Half Dime, PR66 Cameo
Tied for Finest Certified

6303 1858 PR66 Cameo NGC. The Mint offered proof sets commercially for the first time in 1858 and approximately 300 Seated Liberty half dimes were struck. This exquisite Premium Gem displays frosty well-detailed design elements and mirrored fields that provide startling cameo contrast when the coin is tilted in the light. Only insignificant signs of contact are evident. Census: 2 in 66 Cameo, 0 finer (8/13). PCGS# 84437

EARLY DIMES

1796 JR-4 Dime, Fine 15
First-Year Dime

6304 1796 Fine 15 PCGS. JR-4, R.4. This Choice Fine 1796 dime is a nice first-year representative for the denomination with fully original blue-gray and gold surfaces showing lighter silver on part of the design motifs. The surfaces are smooth and pleasing with only a few minor circulation marks. NGC ID# 236B, PCGS# 4461

1796 Draped Bust Dime, JR-4, MS61
Sought-After First-Year Issue

6305 1796 MS61 NGC. CAC. JR-4, R.4. The year 1796 saw the first coinage of dimes at the Philadelphia Mint, with a nominal mintage of 22,135 pieces. The 1796 dimes featured a Small Eagle reverse that was replaced by the Heraldic Eagle design in 1798, creating a popular two-year design type. Six die varieties are known for the date, with this coin representing the scarce JR-4 variety identified by the position of TY in LIBERTY touching and the two berries under E in UNITED. The obverse die was previously used to strike the JR-3 variety of 1796 and the reverse was later used to coin the JR-5 variety of this date.

The present coin is an attractive Mint State example, with well-detailed design elements and vibrant mint luster on both sides. The bright silver centers yield to shades of cerulean-blue and green at the peripheries and only minor signs of contact are evident. Traces of prooflike reflectivity are present in recessed areas. Census: 4 in 61, 86 finer (8/13).

From The Joan Carroll Collection. NGC ID# 236B, PCGS# 4461

1800 Draped Bust Dime, XF45
Elusive JR-2 Variety

6306 1800 XF45 NGC. JR-2, R.5. The 1800 Draped Bust dime claims a nominal mintage of 21,760 pieces, with two die varieties known for the date. This coin represents the more elusive JR-2 variety, with a spine extending from the right corner of the shield into the field on the reverse. Light to-moderate wear shows on the design elements and the lightly abraded surfaces show accents of green, blue, and gray toning. Census: 8 in 45, 21 finer (8/13).

From The Joan Carroll Collection. NGC ID# 236H, PCGS# 4470

1802 JR-2 Dime, MS62
The Finest Known Specimen

6307 1802 MS62 PCGS Secure. JR-2, R.5. Four die varieties are known for the 1802 dimes, and two are scarce, one is rare, and another is unique. Likely only about 250 to 300 1802 dimes survive in all grades and most are well worn.

Five years ago when we offered the Ed Price Collection of early dimes and quarter eagles, we described his MS62 NGC example of the 1802 JR-2 dime as the finest known specimen, and wrote that we are unaware of any other Mint State 1802 dimes of any variety except JR-4. Now we have the opportunity to offer an even finer example, a coin that was previously unknown to us and the new finest known specimen.

This piece is a later die state than the Price coin with a small triangular rim break just above the first A in AMERICA, outside the second feather in the right facing wing. The Price coin had a retained cud at that location with the dentil still visible. The weakness of strike on the Price coin is typical of that die state, while earlier and later pieces such as this example always have a better strike.

The forehead and face are weak on this example while on the Price coin it is still flatter at those areas. The same is true of the opposing locations on the reverse. Both sides have satin luster with exceptional patina showing delightful gold and blue toning with extraordinary eye appeal. A few scattered surface marks are consistent with the grade. Population: 3 in 62, 0 finer (8/13). NGC ID# 236K, PCGS# 4472

1807 JR-1 Dime, MS63
Typical Late Die State

- 6308 1807 MS63 PCGS. JR-1, R.1.** A typical 1807 dime, this example shows clash marks, die bulges, and other signs of deterioration on both sides. A single obverse die was used to produce 165,000 dimes in 1807, and the reverse die was also used for quarter eagles. The strike is weak along the left side of the obverse and reverse as nearly always on these coins. Most of the central details are sharper, also typical of this issue. Trivial surface marks are present, with frosty silver luster and no evidence of toning on either side. Population: 34 in 63 (1 in 63+), 27 finer (8/13). NGC ID# 236T, PCGS# 4480

BUST DIME

1836 JR-3 Dime, MS65
Block 8 Date Style

- 6309 1836 MS65 NGC. JR-3, R.3.** Block 8 in date, the M in AMERICA is low, and the second T in STATES is centered perfectly above the I in PLURIBUS, which confirm the variety. The devices are sharply struck, with just a touch of softness in some of Liberty's hair curls. Satiny surfaces reveal rich golden-rose centers that are surrounded by Prussian blue margins. Totally original and problem-free with no mentionable abrasions on either side. NGC and PCGS combined have certified only 15 examples at this grade level, with 10 graded higher (8/13). Census: 7 in 65, 4 finer (8/13). NGC ID# 237G, PCGS# 4528

SEATED DIMES

1837 Large Date Seated Dime, MS67
No Stars, Fortin-101

- 6310 1837 No Stars, Large Date MS67 NGC. Fortin-101.** An early die state business example with prooflike fields and lovely orange-gold and rose-red toning. The diagonal die line of Fortin-101 through the second S in STATES is visible, but the die crack of Fortin-101a through to the U in UNITED is absent. The fully struck surfaces are pristine aside from a few delicate hairlines on the right obverse field. Census: 7 in 67, 1 finer (8/13). NGC ID# 237R, PCGS# 4561

**1867-S Dime, MS64
Condition Rarity S-Mint Issue**

- 6311 1867-S MS64 PCGS. CAC.** Delicate green-to-gold toning is seen over parts of the pale gray obverse, while the reverse has streaks of golden-brown at the upper zones. Detail is above-average for this earlier California issue and semireflective peripheral luster is an eye-catching bonus. As a near-Gem, this is a conditionally rare example of an issue that survived mostly in low grades, if at all, despite a mintage of 140,000 pieces; in the first few decades of the American California economy, production of minor silver seldom met the local demand. Population: 4 in 64, 2 finer (8/13). NGC ID# 239V, PCGS# 4646

**1875 Dime, MS67
Brilliant, Frosted, Nearly Perfect Surfaces**

- 6312 1875 MS67 PCGS. CAC.** More than 10 million dimes were produced in 1875, and yet high-grade pieces are remarkably difficult to locate. Both of the major services have only certified 11 Superb Gems with none finer, and there are surely duplications among those 11 pieces. This is a brilliant coin that shows problem-free surfaces. The mint luster is frosted and the striking definition is strong overall. Population: 4 in 67, 0 finer (8/13). NGC ID# 23AC, PCGS# 4672

**1875-CC Mintmark Below Bow Dime, MS65
Top-Grade Carson City Dime Variety**

- 6313 1875-CC Mintmark Below Bow MS65 PCGS. CAC.** In 1875, Philadelphia Mint officials apparently had a minicrisis trying to decide whether to place mintmarks for the two "mintmark mints" striking dimes — San Francisco and Carson City — within or beneath the bow, producing reverse dies of each sort. These make interesting varieties, but there is not a great deal of market differentiation among them. In any case, this 1875-CC dime is conditionally elusive and aesthetically attractive, showing alternating silver, pink, rose, and ochre areas with generous luster and minimal contact. Population: 8 in 65, 1 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 23AD, PCGS# 4674

**1878 Dime, Superb Gem Example
Conditionally Rare**

- 6314 1878 MS67 PCGS. CAC.** A scarcer issue in all the better grades of Mint State. This piece has thick, intense mint frost that swirls across both sides unimpeded by abrasions. The obverse is largely untuned and silver-white, while the reverse displays a faint coating of pale golden color. This is one of only three MS67 coins of this date certified by PCGS, along with a single MS68 example (8/13). Ex: *Long Beach Signature (Heritage, 6/2006)*, lot 1068. NGC ID# 23AP, PCGS# 4685

**1889-S Dime, Peripherally Toned MS65
Curiously Scarce in Spite of a Large Mintage**

- 6315 1889-S MS65 PCGS. Medium S.** The mintage of the 1889-S dime fell just short of a million pieces, yet high grade examples are seldom seen. The interior portions of each side approach brilliance with lightly toned margins. The strike details are well brought up, but not quite complete on this frosted Gem. Population: 4 in 65, 1 finer (8/13). NGC ID# 23BA, PCGS# 4703

PROOF SEATED DIMES

1855 Arrows Dime, PR63 Rare Pre-1858 Proof Issue

- 6316 1855 Arrows PR63 PCGS.** Gold-to-green on the outer elements with cooler blue-influenced hues on the interiors, the reverse deeper. Between the intricate detail and the mirrors flickering beneath the toning, this piece is clearly a proof, though light hairlines and a few contact marks render the Select proof designation accurate. One great curiosity of the 1855 proof Arrows dime, which has a surviving population estimated at fewer than two dozen pieces, is that while most proofs are made from the most perfect dies available, this issue was struck with an obverse that shows clear doubling on the date and the flanking arrows. NGC ID# 23CG, PCGS# 4744

1859 Seated Dime, PR68 Ultra Cameo Single Finest Certified

- 6317 1859 PR68 Ultra Cameo NGC.** The proof 1859 Seated dime is a genuinely rare issue, as many of the 800 coins originally produced were melted as unsold at year's end. Heritage Auctions has been privileged to offer several examples over the years, but none have possessed the technical merits and eye appeal of the present PR68 specimen. The deeply mirrored fields and razor-sharp design elements leave no doubt about this coin's proof status. In contrast, the devices are richly frosted, producing a dramatic cameo effect. All areas present an essentially untoned appearance with only the slightest hint of golden color at the borders. Census: 1 in 68 Ultra Cameo, 0 finer (8/13).
Ex: Pittsburgh ANA (Heritage, 8/2004), lot 352. PCGS# 94748

1868 Seated Liberty Dime, PR66 Cameo
Only 600 Pieces Struck

- 6318** 1868 PR66 Cameo PCGS. CAC. Blinding silver mirrors are just one half of this Premium Gem's gripping eye appeal. Richly frosted and exquisitely detailed devices dominate the centers, and the coin's impressive contrast is more than the sum of its parts. Population: 3 in 66 Cameo, 1 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2010), lot 5115. PCGS# 84761

1871 Seated Dime, PR67 Cameo
Finest Certified at PCGS

- 6319** 1871 PR67 Cameo PCGS. CAC. The 1871 Seated Liberty proof dime claims a mintage of 960 pieces, but few examples possess the technical quality and eye appeal of this spectacular Superb Gem. The frosty devices contrast delightfully with the deeply reflective fields and attractive shades of emerald-green and cerulean-blue toning blanket the pristine surfaces. Population: 1 in 67 Cameo, 0 finer (8/13). PCGS# 84764

BARBER DIMES

1895-O Dime, AU55
Mintage 440,000 Pieces

- 6320** 1895-O AU55 PCGS. Though a touch of rub crosses the high points, this largely pearl-gray Choice AU piece has considerable luster remaining in the fields. A shallow curving mark on the chin contributes to the grade. For the collector seeking an attractive yet accessible example from this issue of just 440,000 pieces, there are few better choices. NGC ID# 23DW, PCGS# 4807

1895-O Barber Dime, MS63
Low-Mintage Key Issue

- 6321** 1895-O MS63 PCGS. The 1895-O Barber dime claims a low mintage of 440,000 pieces, the lowest production total of the series outside of the non-collectible 1894-S. Mint State examples are seldom encountered in today's market, and the issue is most often seen in the VG-VF grade range.

The present coin is an impressive Select specimen, with lustrous silver-gray surfaces that show a few highlights of champagne-gold toning. The design elements are sharply detailed throughout and visual appeal is quite strong. Only a few minor contact marks are evident. Housed in a green label holder. Population: 9 in 63, 19 finer (7/13). NGC ID# 23DW, PCGS# 4807

1899-S Dime, MS66
Series Condition Rarity

6322 1899-S MS66 PCGS. This sharply struck Premium Gem displays beautiful color in mottled shades, including gray, blue, pink, and gold. The surfaces reveal few marks of any significance. A few diagonal lines on the obverse high points are as-made roller marks. Population: 10 in 66 (1 in 66+), 3 finer (8/13). NGC ID# 23EB, PCGS# 4820

1900-O Dime, MS66
Elusive O-Mint Rarity

6323 1900-O MS66 PCGS. The 1900-O Barber dime issue is an underrated rarity in the series. In Mint State it is more elusive than such noteworthy dates as 1904-S and 1896-S. This Premium Gem is one of only six submissions in this top grade at PCGS, and there are none finer; NGC claims one example in MS67 (8/13). NGC ID# 23ED, PCGS# 4822

1907-S Barber Dime, MS66
Among the Nine Finest Certified
Colorfully Toned

6324 1907-S MS66 PCGS. CAC. The 1907-S is scarce in Mint State through MS64 and rare any finer. PCGS and NGC have graded nine Premium Gems and none finer. Peripheral aqua-blue toning frames soft golden-orange in the centers that are imbued with hints of lavender. The design elements are better struck than sometimes seen, especially at the top of Liberty's portrait and the lower-right wreath. Marks are fewer and less severe than typically seen on the issue. All in all, this piece exudes pleasing eye appeal. NGC ID# 23F6, PCGS# 4845

PROOF BARBER DIMES

1898 Barber Dime, PR67+ Cameo
Colorful Peripheral Toning

6325 1898 PR67+ Cameo PCGS Secure. CAC. The 1898 is one of the most common issues in the proof Barber dime series; a large number of the 735 pieces minted have survived to the present day. Moreover, it is considered by many numismatists to be the best-produced issue in the entire Barber dime series.

The near-white portrait of Liberty stands out against the mirrored fields, as does the slightly darker ONE DIME device on the reverse. Medium-intensity reddish-gold and deep electric-blue clings to the borders, displaying deeper hues on the reverse. The design elements are razor-sharp and the surfaces are immaculately preserved. This piece exudes magnificent eye appeal. Population: 1 in 67+ Cameo, 3 finer (8/13). PCGS# 84882

1900 Dime, PR68
Rich Patina

6326 1900 PR68 NGC. Carefully preserved and colorful, this PR68 piece has gleaming mirrors under rich gold, blue, and green patina that is deeper on the reverse and offers touches of pink on the obverse. Near-perfect surfaces are a true delight. Housed in a prior-generation holder. Census: 6 in 68, 0 finer (8/13). NGC ID# 23GD, PCGS# 4884

1901 Barber Dime, Toned PR67
Excellent for Type

6327 1901 PR67 NGC. This deeply reflective proof displays rich, variegated toning over each side. The toning is multiple colors but not deep enough to subdue the mirrored flash in the fields. The strike details are full throughout, as expected. Only 12 other Superb Gem proofs have been certified by NGC with two finer (8/13). NGC ID# 23GE, PCGS# 4885

MERCURY DIMES

1916-D Mercury Dime, Choice AU
Low-Mintage First-Year Key

6328 1916-D AU55 PCGS. CAC. An attractive Choice AU example of this low-mintage key. The design elements are well-detailed and the pleasing surfaces retain traces of their original mint luster, under delicate shades of ice-blue and pale jade toning. No large or distracting surface flaws are evident. NGC ID# 23GY, PCGS# 4906

1917-D Mercury Dime, MS65
Very Scarce Full Bands Example

6329 1917-D MS65 Full Bands PCGS. CAC. Shades of lavender, gray, russet, and amber toning blanket the surfaces of this impressive early series Gem. The well-detailed design elements show Full Bands definition on the fasces and vibrant mint luster shines through the toning. Population: 37 in 65 Full Bands, 8 finer (8/13). NGC ID# 23H3, PCGS# 4913

1927-S Dime, MS65 Full Bands
A Major Strike Rarity from the 1920s

6330 1927-S MS65 Full Bands PCGS. The 1927-S is a strike rarity and series key. This Full Bands Gem displays intriguing multicolored streaks of toning over each side, while still retaining most of the original brilliance. The strike on the bands is absolutely complete and fully separated. A couple of minor, shallow marks are located on the lower reverse, but they are essentially invisible because of the streaks of toning. Population: 36 in 65 Full Bands, 13 finer (8/13). NGC ID# 23HW, PCGS# 4965

1931 Mercury Dime, MS67 Full Bands
Among the Finest at PCGS

6331 1931 MS67 Full Bands PCGS. CAC. The production of Mercury dimes at Philadelphia in 1931 was less than half that of the previous year, and the denomination was not struck at all in 1932 or 1933. A Full Bands Superb Gem representative of the elusive 1931 issue, this piece displays a strong strike, rich luster, and subtle hints of champagne toning. Population: 13 in 67 Full Bands, 0 finer (8/13). NGC ID# 23J7, PCGS# 4983

PROOF MERCURY DIME

1938 Mercury Dime, Rim-Toned PR68

6332 1938 PR68 PCGS. CAC. A fairly large number of the 8,728 proof dimes struck in 1938 have survived to the present day. PCGS has graded nearly 2,500 pieces, most in the near-Gem to Premium Gem levels of preservation. The population drops significantly at the MS67 level, and finer examples are extremely difficult to locate. Reddish-brown toning surrounds the luminous, pale-blue interiors of this razor-sharp specimen. Both sides have been wonderfully cared for, as might be expected from this lofty grade. The CAC sticker affirms the coin's magnificent eye appeal. Population: 6 in 68 (1 in 68+), 0 finer (8/13). NGC ID# 27DJ, PCGS# 5073

PROOF ROOSEVELT DIME

1968 Roosevelt Dime, PR68
Sought-After No-S Variant

6333 1968 No S PR68 NGC. Proof coinage was traditionally produced at the Philadelphia Mint before 1968, and all dies continued to be prepared there after the San Francisco Mint took over proof coinage that year. The S mintmark was inadvertently left off one die, and the mistake went unnoticed until a small number of coins were struck, resulting in the famous "No S" proof Roosevelt dime of 1968. The same mistake was repeated several times in later years (1970, 1975, and 1983), with similar results.

This incredible PR68 specimen displays razor-sharp definition on all design elements and deeply reflective fields. Close inspection reveals no visible flaws on the mostly brilliant surfaces, with just a wisp of light gold toning on both sides. Exceptional visual appeal complements the lofty technical grade. Census: 3 in 68, 2 finer (8/13).

From The Joan Carroll Collection. NGC ID# 27F3, PCGS# 5245

PROOF TWENTY CENT PIECES

1875 Twenty Cent Piece, PR64 Deep Cameo Extraordinary Field-Device Contrast

- 6334 1875 PR64 Deep Cameo PCGS.** First-year of this short-lived and curious type coin. This will make a wonderful type coin for some lucky collector. The fields are extraordinarily deep, as often found on twenty cent proofs, and the devices are thickly frosted. The result is the Deep Cameo effect that PCGS has recognized. Each side is brilliant except for a light, thin ring of golden around the margins. Population: 2 in 64 (1 in 64+) Deep Cameo, 2 finer (8/13). PCGS# 95303

1877 Twenty Cent Piece, PR63 Cameo Low-Mintage Issue, Sharply Contrasted

- 6335 1877 PR63 Cameo PCGS.** Fully brilliant with a nice cameo effect, this piece exhibits a few minor, scattered hairlines that are typical for the grade and were probably caused by a light "wiping" many years ago. A lovely coin for the grade, and an excellent choice for the type collector who doesn't want to string out a budget on a Gem example. Population: 18 in 63 (2 in 63+) Cameo, 38 finer (8/13). Ex: Long Beach Signature (Heritage, 6/2004), lot 8186. PCGS# 85305

1877 Twenty Cent, PR64 Cameo Moderately Toned

- 6336 1877 PR64 Cameo PCGS. CAC.** Medium-intensity aqua-green toning in the fields serves to further highlight the grayish-tan motifs. Fully struck throughout, even at the top of the eagle's left (facing) wing. A few marks on Liberty precludes a finer numerical grade. Nevertheless, this is a pleasing near-Gem. A scarce, low-mintage twenty cent piece. Population: 29 in 64 (1 in 64+) Cameo, 9 finer (8/13). PCGS# 85305

1877 Twenty Cent Piece, PR65 Cameo Low-Mintage, Proof-Only Issue

- 6337 1877 PR65 Cameo PCGS.** The unpopular twenty cent piece was produced exclusively in proof format in 1877, to satisfy collector demand. The denomination was cancelled the following year, after another small proof-only mintage. As might be expected from the low mintage, examples in Gem condition, with the Cameo designation, are quite rare today.

Like most examples seen, this impressive Gem exhibits some incomplete detail on the eagle's feathers due to excessive die polishing. The frosty design elements contrast boldly with the mirrored fields to create a pleasing cameo effect. The surfaces show only a few minor hairlines and contact marks, with attractive hints of champagne-gold and pink patina. Population: 6 in 65 Cameo, 3 finer (8/13). PCGS# 85305

EARLY QUARTERS

1796 B-2 Quarter, AG Details

- 6338** 1796 — Plugged — PCGS Genuine. AG Details. B-2, R.3. Multiple areas of repair are visible on both sides of this well-worn first-year quarter dollar. The surfaces are light to medium gray with uneven wear. The date and LIBERTY are both fully visible, as are some of the obverse stars. The central device is outlined. Most of the eagle is outlined and about half of the letters are visible. NGC ID# 23RA, PCGS# 5310

1804 Draped Bust Quarter, Fine Details First Heraldic Eagle Quarter, B-1

- 6339** 1804 — Surfaces Tooled — PCGS Genuine. Fine Details. B-1, R.3. Tompkins Die State 3/2. The Draped Bust design was used on quarters for the first time in 1804 as the denomination had not been struck since 1796. Only two die varieties are known, with this coin representing the more available B-1 variety, identified by the low 4 in the date. The 1804 is a key date in the series, prized by collectors in all grades and conditions. This still-attractive specimen retains fine sharpness on the design elements, with pleasing lavender, gray, and gold toning. Some tooling shows in the right obverse field and on Liberty's cheek and jaw. NGC ID# 23RB, PCGS# 5312

1804 B-1 Quarter, VF20 First Heraldic Eagle Quarter

- 6340** 1804 VF20 PCGS. B-1, R.3. This is the first year of the Draped Bust, Heraldic Eagle design for quarters, and was produced for just three additional years. The design made its debut on dimes and silver dollars in 1798. The top of the 4 is distant from the bust with that digit centered between the bust and the border. A prominent die scratch is located between stars 8 and 9, touching one point of star 9. Both dies of this intermediate state show clash marks but no die cracks. An attractive middle grade piece showing deep iridescent toning on both sides. Typical grade-consistent surface marks are evident on both sides. NGC ID# 23RB, PCGS# 5312

**1806 Quarter, AU50
Scarce B-5 Variety**

- 6341** 1806 AU50 NGC. B-5, R.4. The B in LIBERTY is entered lower than the neighboring E, and a die line connects a leaf tip to the I in AMERICA. The borders display blushes of golden-brown, but this better variety quarter is predominantly untoned. The obverse field has a few faded thin marks, and portions of the devices are incompletely brought up, but the extensive bright luster will please the specialist.
Ex: *Central States Signature* (Heritage, 4/2008), lot 777. NGC ID# 23RD, PCGS# 5314

**1806 Draped Bust Quarter, AU53
Interesting B-2 Variety**

- 6342** 1806 AU53 PCGS. B-2, R.2. Tompkins Die State 2/4. A substantial mintage of 206,124 Draped Bust quarters was accomplished in 1806, with 10 die varieties known for the date. This coin represents the B-2 variety, with a broken left foot of T in LIBERTY and the stem pointing to the second A in AMERICA on the reverse. This coin retains much of its original design detail and mint luster and shows many interesting die cracks and clash marks on both sides. The lightly abraded surfaces are visited by attractive shades of pale gold toning. Population: 12 in 53, 75 finer (8/13). NGC ID# 23RD, PCGS# 5314

**1806 Draped Bust Quarter, AU58
B-9, Clashed and Heavily Cracked Die**

- 6343** 1806 AU58 NGC. B-9, R.1. The 1806 Draped Bust quarter claims a mintage of 206,124 pieces, with 10 die varieties known for the date. This coin exhibits the bisecting obverse die crack from the rim above E in Liberty to the rim below 1 in the date, identifying the available B-9 variety. The dies are clashed and the reverse shows several die cuds at the upper rim. This lightly circulated example is well-detailed and lustrous. Census: 21 in 58, 43 finer (8/13). NGC ID# 23RD, PCGS# 5314

BUST QUARTERS

**1818 Quarter, B-2, MS65
Semireflective Obverse**

- 6344** 1818 MS65 NGC. B-2, R.1. After a two-year gap in dates, the quarter dollar series resumed in 1818, beginning a run of consecutive years at that did not end until 1825, the longest streak for the much-neglected denomination to that time. Of the ten distinct die pairs used to strike 1818-dated quarters, the B-2 variant is the most accessible and is represented by this Gem. Radiant silver surfaces are largely semireflective on the obverse with rough patch in back of Liberty's head and a die crack above, indicative of a polished later state. The reverse is similarly untuned but has a more swirling appearance. Minimally abraded and an interesting candidate for a Gem-and-better type set. NGC ID# 23RH, PCGS# 5322

**1831 Quarter, MS64+
Prooflike Surfaces, Small Letters, B-4**

- 6345** 1831 Small Letters MS64+ PCGS. CAC. B-4, R.1. This fully struck near-Gem has prooflike fields and was likely sold as a proof at some point in its past. Undesignated as Prooflike by PCGS as is their policy for the series. Exceptionally preserved and attractively toned in powder-blue, rose-red, sun-gold, and sea-green. Population: 53 in 64 (1 in 64+), 20 finer (8/13). NGC ID# 23RW, PCGS# 5348

**1831 Large Letters Quarter, MS64
Doubled Date, B-5**

- 6346** 1831 Large Letters MS64 PCGS. B-5, R.3. Both 1s in the date have doubled series, i.e. Large over Small 1's. This distinctive obverse appears on the rather plentiful B-5 die pair, and on the rare B-7 marriage. In our opinion, this variety should be recognized in the Guide Book. This Choice Mint State piece has frosty luster with brilliant silver centers and peripheral steel and blue toning. Only a dozen examples are known in MS64 or better grades, with just three finer MS65 examples. Perhaps eight or nine proofs are also known. Population: 8 in 64, 4 finer (8/13), for all 1831 Large Letters varieties. PCGS# 5349

**1835 B-1 Quarter, MS63
Reflective Fields**

- 6347** 1835 MS63 PCGS. B-1, R.1. Business strikes of the Browning-1 die pair are plentiful while proofs are extremely rare with just two confirmed pieces. This Select Mint State specimen is not a proof, but it has reflective fields and is likely one of the earliest pieces struck after the small quantity of proofs were minted. Despite the common nature of the variety, high grade pieces are rarely seen and only half a dozen higher grade examples are known. This piece has sharp design elements with gray-brown surfaces that show hints of pale blue. Population: 19 in 63, 19 finer (8/13), for all 1835 varieties. NGC ID# 23S2, PCGS# 5354

**1837 B-2 Quarter, MS63
Moderately Prooflike**

- 6348** 1837 MS63 NGC. B-2, R.1. An intricately struck and moderately prooflike Capped Bust type coin. The surfaces appear deeply toned olive-gray from certain angles, then transform into brighter lime-green, caramel-gold, and rose-red shades when viewed directly beneath a light. A lens reveals only unimportant contact. NGC ID# 23S4, PCGS# 5356

**1837 Capped Bust Quarter, MS65
Popular B-2 Variety**

- 6349** 1837 MS65 PCGS. B-2, R.1. More than 250,000 Capped Bust quarters were struck in 1837, with six die varieties known for the date. This coin represents the most common B-2 variety, with star 9 recut and the large Curl Base 2 in the denomination lower than the 5. This exquisite dove-gray and almond-gold Gem offers vibrant cartwheel luster and is exceptionally free from contact, but some faint planchet adjustment marks are visible on the lower reverse. Glimpses of prooflike reflectivity are seen around the reverse devices. Sharply struck except for a few left-side star. Population: 10 in 65, 8 finer (8/13). NGC ID# 23S4, PCGS# 5356

PROOF BUST QUARTERS

1831 Capped Bust Quarter, B-5, PR66
Very Rare Early Proof Issue
First Appearance of This Coin

6350 1831 Large Letters PR66 NGC. B-5, R.7 as a proof. The innovative close collar technology was introduced on the quarter denomination in 1831, resulting in coins with beaded borders and a reduced diameter. Because there was no change in weight or composition, the new coins used thicker planchets to compensate for the smaller diameter. This caused some problems with striking quality. Chief Engraver William Kneass adjusted the design in many small ways in order to achieve the best-possible strike, including removing the motto *E PLURIBUS UNUM* from the reverse. Four obverse and five reverse dies were combined to strike the seven known die varieties of the date. Six varieties were classified as B-1 through B-6 by Ard Browning in his early series reference and the rare B-7 variety was discovered by later researchers.

Exactly which dies were used for proof coinage is in some dispute. Walter Breen listed coins of the B-2, B-4 and B-5 varieties which he believed were proof examples in his *Encyclopedia of United States and Colonial Proof Coins*. David Akers challenged this in his description of the 1831 proof quarter in lot 1286 of the Pittman catalog, where he stated:

“Although others feel differently, it is my opinion that the only true Proofs of this date are this B-5 variety. Highly prooflike examples exist of other varieties, mostly B-2, and some of these pieces have incorrectly been called Proofs in the past, but they are very different in appearance from the specimens of this variety which have unquestioned Proof status.”

Akers provided a roster of the seven B-5 proof quarters he was aware of, which we have expanded below. Since the time of the Pittman sale, third party grading services have certified a few specimens of the B-4 variety as proofs, as well as the B-5 coins Akers considered true proofs. Walter Breen noted:

“Mint Director sent 20 ‘specimens’ to President Jackson, who could hardly have appreciated them, and 20 more to Treasury Secretary S.D. Ingham.”

If these “specimens” were actually proofs, and if they were struck at different times, the coins that went to Jackson might have been of one variety and the coins sent to Ingham might be another, accounting for the presence of B-4 and B-5 proofs today. Of course, this is highly speculative. Proof 1831 quarters began appearing at auction as early as the Joseph J. Mickley Collection (W. Elliot Woodward, 10/1867), where lot 1710 was a four-piece silver proof set described as, “1831 Four pieces, Half, Quarter, Dime and Half Dime; *all brilliant, extremely rare.*” The lot realized \$8.50 to J.N.T. Levick. No study of die varieties had been attempted at the time of the Mickley sale, and it is not possible to determine if the coin in Mickley’s set was of the B-4 or B-5 variety. Recent sales of the 1831 B-5 proof quarter include the spectacular PR66 Cameo NGC specimen in lot 3736 of the FUN Signature (Heritage, 1/2009), which realized \$218,500.

The present coin is a fascinating piece that is making its first appearance in an American auction. This magnificent Premium Gem was acquired by a European nobleman during his travels in this country in the mid-19th century. Much like the coins in the famous Lord St. Oswald Collection, this piece has been preserved by the nobleman’s family down to the present time. Delicate shades of cerulean-blue and greenish-gold toning blanket the pristine surfaces of this delightful specimen. The design elements are sharply detailed in most areas, but some stars on the left have incomplete centrils. This same softness is seen on several other examples of the B-5. The fields are deeply reflective, but the toning reduces what would otherwise be bold cameo contrast with the frosty design elements. A long reverse die crack extends from the lower leaves through the eagle’s wing and the letters of UNITED STATES. Eye appeal is terrific. Nothing is more exciting for the advanced collector than finding a previously unknown specimen of such a rare issue to add to his collection. Series specialists should bid accordingly.

Roster of 1831 B-5 Proof Quarters

1. **PR66 NGC.** Obtained by a European noble while visiting this country in the mid-19th century and retained by the same family until the present time; **the present coin.**
2. **PR66 Cameo NGC.** Richard Picker in the late 1950s, Norweb Collection (Bowers and Merena, 3/1988), lot 1548; FUN Signature (Heritage, 1/2009), lot 3736, realized \$218,500.
3. **PR65 Cameo NGC.** Possibly F.C.C. Boyd; World’s Greatest Collection (Numismatic Gallery, 3/1945), lot 105; Jerome Kern; Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 1416; John McNail, who assembled a partial 1831 proof set in a custom holder; ANA Convention Sale (Kagin’s, 8/1977), lot 2185, as part of the assembled set; Frog Run Farm Collection (American Numismatic Rarities, 11/2004), lot 1151; Pre-Long Beach Elite Sale (Superior, 2/2005), lot 4123; Rarities Sale (Bowers and Merena, 7/2005), lot 442; Central States Signature (Heritage, 4/2009), lot 2334.
4. **PR64 NGC.** FUN Signature (Heritage, 1/1998), lot 6760.
5. **Choice Proof.** Numismatic Gallery; John Jay Pittman, purchased 7/15/1947 for \$30; Pittman Collection, Part II (David Akers, 5/1998), lot 1286.
6. **PR62 ANACS.** Dallas Signature (Heritage, 12/2005), lot 606.
7. **Proof-62.** Louis E. Eliasberg, Sr. Collection, Part II (Bowers and Merena, 4/1997), lot 1399.

Other Appearances

- A. **Proof 63 SEGS.** Pre-Long Beach Auction (Ira and Larry Goldberg, 2/2013), lot 1285, listed as “Ex: Mid America Sale # 523 as Proof 64, earlier from Kosoff 1946 ANA Sale Lot 430.” Possibly a prooflike business strike.
- B. **PR62 PCGS.** Club Cal Neva Sale (Superior, 9/1987), lot 1678.
- C. **Brilliant Proof.** Peter Mougey Collection (Thomas Elder, 9/1910), lot 694; Dr. Christian Allenburger; Royal Sale (B. Max Mehl, 3/1948), lot 872; T. James Clarke; Forty-Seventh Catalog (New Netherlands, 4/1956), lot 1577.
- D. **Brilliant Proof.** Davis-Graves Collection (Stack’s, 4/1954), lot 338.
- E. **Brilliant Proof.** Paramount FPL, Winter 1976, as part of a set (possibly the same as number 3 above).
- F. **Proof.** Lorin G. Parmelee Collection (New York Coin & Stamp; 6/1890), lot 1006; Charles Steigerwalt.
- G. **Proof.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 1341.

From The Noblesse Collection. NGC ID# 23SB, PCGS# 5378

SEATED QUARTERS

1840 Seated Liberty Quarter, MS63 Popular Drapery Design

- 6351** 1840 MS63 PCGS. The Seated Liberty quarters of 1840 are known in two design types, the No Drapery type and the present variety with an extra fold of drapery at Liberty's elbow. The Drapery type claims a small mintage of 188,127 pieces, and examples in MS63 condition are very rare. This well-detailed Select example exhibits just a touch of softness on the stars, with bright mint luster and pleasing shades of champagne-gold toning. Population: 8 in 63, 4 finer (8/13).
From The Joan Carroll Collection. NGC ID# 23SH, PCGS# 5397

1840 Quarter, Richly Toned MS63 First Year of the With Drapery Design

- 6352** 1840 MS63 NGC. First year of the new, slightly modified design, easily identified by the addition of flowing drapery below the right (facing) arm of Liberty. This is a sharply struck example and among the finest known of this premier issue. The surfaces are satiny beneath multiple layers of rich blue-gray and rose colored toning. We see no abrasions of note on either side. Census: 2 in 63, 2 finer (8/13). NGC ID# 23SH, PCGS# 5397

1853/53 No Arrows Quarter, MS63 One of the Finest Remaining of Only 44,200 Struck

- 6353** 1853/53 No Arrows, Repunched Date MS63 NGC. FS-301. Old tenor silver coins are very scarce and sometimes overlooked. When this quarter was struck in early 1853, it was worth more melted down than twenty-five cents. And that is just what happened to the majority of the mintage. There are few survivors in Uncirculated grades. All of the mintage appears to have had the date overpunched, and the few remaining pieces show varying degrees of the 1853/53. This high-grade example has bright satiny mint luster that enhances the coin's gray-golden and light blue toning seen over each side. The strike is remarkably strong and there are no abrasions of note. Census: 4 in 63, 15 finer (8/13). NGC ID# 23TA, PCGS# 5421

1853 Arrows and Rays Quarter, MS67
High-End Example of This One-Year Type

6354 1853 Arrows and Rays MS67 NGC. The quarter dollar as a denomination “shrank,” both in diameter and weight, from its statistics for the original strikings in 1796. Those coins weighed 6.74 grams and were roughly 27.5 millimeters in diameter. The Capped Bust quarters tightened this diameter slightly starting in 1815. A diameter (but not weight) reduction followed in 1831, while in 1837, an increase in the coin’s silver purity corresponded to a tiny drop in weight to 6.68 grams. This was the standard until the radical reweighting that affected the minor silver denominations — though not the silver dollar — in 1853.

Starting that year, the weight (though not fineness or diameter) fell to just 6.22 grams, a change that was marked in two ways. On the obverse, arrows flanked the date, a trait shared with the dime and half dollar. On the reverse, the quarter and half dollar, both of which showed a reverse eagle motif, rays surrounded the figure. These rays were dropped the next year, creating a one-off subtype, though the arrows at the date lingered on through 1855.

This MS67 1853 Arrows and Rays quarter ranks among the finest examples known, ideal for type collectors and series enthusiasts at the top of the grading scale. Light cream and rose overtones, the latter mainly on the reverse, rest on softly frosted surfaces that swirl with silver luster. Both sides are boldly detailed with near-impeccable preservation. Census: 5 in 67, 0 finer (8/13). NGC ID# 23U4, PCGS# 5426

**1856 Large Over Small S Quarter, XF40
Finest Certified**

- 6355 1856-S/S Large Over Small S XF40 PCGS. CAC. FS-501.** The smaller S peeks out at lower right from the larger S. Golden-brown overtones grace a range of gray on faintly luminous, lightly worn surfaces that show scattered small marks and a few minor scrapes and pinscratches. A few flecks of deeper color are visible near the liberty cap. This coin previously was listed under PCGS number 5441, the “generic” S/S variety, as XF40, the highest grade known; this is the sole coin and sole holder extant at that grade level for the variant (8/13). NGC ID# 23TD, PCGS# 5441

**1860-O Quarter, Rare MS64
Superior Eye Appeal**

- 6356 1860-O MS64 PCGS. CAC.** The mintage for the 1860-O quarter was a generous 388,000 pieces, and is accessible in all grades through Extremely Fine. About Uncirculated and lower-level Mint State pieces are scarce, while near-Gem and finer examples are rare. Pleasing luster and soft reddish-steel patina graces both sides, and the design elements are sharply struck, including the star centrils that are sometimes weak. A few light obverse marks preclude Gem classification, yet this piece yields superior eye appeal, affirmed by the CAC sticker. Population: 7 in 64, 3 finer (8/13). NGC ID# 23TR, PCGS# 5452

**1860-S Quarter, VF35
Early S-Mint Rarity**

- 6357 1860-S VF35 PCGS.** There's no mistaking the rarity of this 1860-S quarter, given its overlarge mintmark on the lower reverse. Only 56,000 pieces were struck of the issue, and Seated quarter enthusiasts are eager for examples in as high a grade as obtainable; the average certified piece is only VF20. This Choice Very Fine example shows steel-gray surfaces with daubs of charcoal-gray, amid some light planchet porosity but only scattered, minor marks. Population: 2 in 35, 4 finer (8/13). NGC ID# 23TS, PCGS# 5453

**1862 Quarter Dollar, MS65
Well Struck**

- 6358 1862 MS65 PCGS.** It is thought that many of the more than 900,000 quarters produced in 1862 were melted during the turmoil of the Civil War. Although still a common date, it is more difficult to find than the Philadelphia issues of the previous nine years.

This MS65 piece displays soft grayish-tan patination and light blue in the fields. The luster is a bit subdued from the significant presence of the toning, but the design features are well-impressed. A couple of small marks below the knee of Liberty's left (facing) leg and a couple more to the right of the 2 in the date will help identify the coin. Population: 11 in 65, 10 finer (8/13) NGC ID# 23TV, PCGS# 5456

1870-CC Quarter Dollar, Good 6
Exceptional for Grade
Key to the Series

6359 1870-CC Good 6 PCGS. The 1870-CC quarter dollar, from a mintage of 8,340 pieces, is recognized as the key date in the Seated quarter series. PCGS and NGC have certified a total of 74 examples, making it quite rare in any grade. One-third of the certified population grades Poor to Very Good. One Uncirculated coin is known, an NGC MS64.

The surfaces of this Good 6 specimen are richly toned in two natural shades of gray, with the slightly darker fields highlighting the lighter-gray design elements. The rims on both sides are complete, and a modicum of detail is apparent on the central motifs. Both shields stand out within Liberty and the eagle and each exhibit some internal detail. The date is bold, all stars are outlined, and the mintmark is clear, as is most of the reverse peripheral lettering. Almost all of the letters in the motto show. The surfaces are remarkably clean for a coin that saw heavy circulation, save for a few toned-over faint pinscratches on the obverse. This key-date representative presents an infrequent opportunity for the Seated quarter collector to add this elusive issue to his/her collection. NGC ID# 23UL, PCGS# 5477

1877 Quarter Dollar, MS67
Bright Mint Luster

6360 1877 MS67 PCGS. The 1877 Seated Liberty quarter claims a huge mintage approaching 11 million pieces, but many were melted for new silver dollar coinage in 1878. Still, circulated coins are plentiful and Mint State pieces can be located through MS66 with a little searching. Essentially untoned surfaces display bright luster and are nicely preserved. The design elements are generally well-struck save for minor localized softness. Population: 40 in 67 (1 in 67+), 2 finer (8/13). NGC ID# 23V5, PCGS# 5504

1887 Quarter Dollar, MS67
One of the Four Finest at PCGS

6361 1887 MS67 PCGS. Just 10,000 business strike quarter dollars were produced in 1887, and examples are scarce in all grades. Uncirculated coins can be located with diligent searching through the Premium Gem level. The essentially untoned surfaces of this MS67 offering display frosted mint luster and the design elements are typically struck. That is, the stars are weak save for the first two. Both sides are impeccably preserved. The diagnostic die scratch is visible in the lower part of the obverse shield. Population: 4 in 67, 0 finer (8/13). NGC ID# 23VK, PCGS# 5519

1891-O Quarter, Toned MS62
Only 68,000 Pieces Struck

6362 1891-O MS62 NGC. The 1891-O is another scarce issue, a tradition that began in 1879, with the difference here that this is a branch mint issue. Only 68,000 pieces were struck and few are known in Uncirculated grades. This is a solid Mint State piece that shows slight striking softness on the right-side stars on the obverse; otherwise it is well-defined. Variegated blue-gray toning is seen over each side. Census: 4 in 62, 10 finer (8/13). NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

1865 Quarter, PR66 Cameo Boldly Struck

- 6363** 1865 PR66 Cameo PCGS. Only 500 proof Seated Liberty quarters were struck in 1865, the relatively small mintage probably due to the financial uncertainties of the last year of the Civil War. The frosty motifs of this Premium Gem stand out sharply against the fields that display deep russet toning. All devices are razor sharp and neither side reveals mentionable marks. Population: 4 in 66 Cameo, 0 finer (8/13). PCGS# 85561

1872 Seated Quarter, PR65 Deep Cameo One Finer Coin at PCGS

- 6364** 1872 PR65 Deep Cameo PCGS. A fairly generous mintage of 950 proof Seated Liberty quarters was accomplished in 1872, but the issue is seldom encountered with Deep Cameo surfaces. This delightful Gem displays sharply detailed and richly frosted design elements that contrast dramatically with the deeply mirrored fields. Only a few minor signs of contact are evident. Population: 1 in 65 Deep Cameo, 1 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 95571

1873 Seated Quarter, PR65 Cameo Exceptional Arrows Type Coin

- 6365** 1873 Arrows PR65 Cameo NGC. The right arrowhead is slightly tilted upward, and the reverse has minute die scratches below the G in GOD, and within the eagle's neck feathers. The right (facing) border of the shield is doubled. An essentially brilliant Gem that has obvious cameo contrast on both sides. A small strike-thru affects the bottom left portion of the upright of the E in AMERICA, and provides a pedigree marker for this high grade example. Only 540 pieces were struck. Census: 2 in 65 Cameo, 4 finer (8/13).
Ex: *Portland Signature* (Heritage, 3/2004), lot 5669; *Central States Signature* (Heritage, 4/2006), lot 1530.
From *The Strawberry Fields Collection*. PCGS# 85574

1874 Seated Quarter, PR65 Cameo Frosty, Well-Contrasted Devices

- 6366** 1874 Arrows PR65 Cameo PCGS. Bold cameo contrast is evident at a glance as the sharply detailed frosty design elements of this spectacular Gem stand out against the mirrored fields in dramatic fashion. The brilliant surfaces show only a few minor hairlines and contact marks. From a mintage of 700 pieces. Population: 11 in 65 (1 in 65+) Cameo, 7 finer (8/13).
From *The Strawberry Fields Collection*. PCGS# 85575

1884 Quarter, PR67 Cameo One of the Seven Finest at PCGS

- 6367** 1884 PR67 Cameo PCGS. CAC. A nominal mintage of 875 proof Seated Liberty quarters was produced in 1884 but only a handful have survived with the quality and eye appeal of the present coin. Specifically, PCGS has graded just seven Superb Gem Cameos and none finer (8/13). Strong field-device contrast is apparent over both obverse and reverse and all design elements are sharply struck. Save for occasional light planchet flaking the surfaces are impeccably preserved. PCGS# 85585

**1886 Quarter, PR67+ Cameo
Outstanding Contrast**

6368 1886 PR67+ Cameo NGC. CAC. The 1886 is one of the scarcest of the low-mintage series of quarters from the 1880s. Only 5,000 circulation strikes were minted, along with 886 proofs. The scarcity of business strikes has placed considerable date pressure on the few remaining high-grade proof specimens. The frosty devices of this high-end Superb Gem seem to glide over the watery mirrored fields, yielding outstanding contrast. Impeccably preserved surfaces exhibit sharply struck design elements. Census: 3 in 67+ Cameo, 1 finer (8/13). PCGS# 85587

**1889 Seated Liberty Quarter, PR67 Cameo
One Finer Coin at NGC**

6369 1889 PR67 Cameo NGC. Easily one of the finest survivors from a proof issue of just 711 pieces, this late-date Seated quarter retains distinct contrast despite layers of rich powder-blue, champagne, rose, and sage toning. The moderately reflective surfaces are exquisitely preserved beneath the patina. Census: 4 in 67 Cameo, 1 finer (8/13).
Ex: *Milwaukee Signature* (Heritage, 8/2007), lot 697; *Dallas Signature* (Heritage, 11/2007), lot 588.
From *The Strawberry Fields Collection*. PCGS# 85590

**1891 Barber Quarter, PR67
Only 600 Pieces Struck, Ex: Kaufman**

6370 1891 PR67 NGC. Briggs-1A Ex: P. Kaufman. This coin exhibits a far better strike than the typical example of this final-year proof delivery. The obverse stars are all crisp with full centrils, and the letters in the reverse legend do not reveal any evidence of die crumbling. More or less even cobalt-blue rim accents frame richly toned, reddish-copper centers. The central obverse is lighter than that on the reverse with more of an apricot-orange appearance. The fields shimmer with modest, yet appreciable reflectivity as the coin rotates under a lamp, and neither side reveals a single distracting blemish. Perfect for Superb Gem type purposes. Census: 13 in 67, 1 finer (8/13).
Ex: *FUN Signature* (Heritage, 1/2008), lot 1175. NGC ID# 23XP, PCGS# 5592

BARBER QUARTERS

**1895-O Quarter, MS66
Rich Concentric Toning**

6371 1895-O MS66 NGC. CAC. This beautifully patinated high grade New Orleans quarter features concentric bands of navy-blue, peach-gold, cream-gray, and plum-red. The strike is close to full and both sides display vibrant luster. Housed in a prior generation holder. Census: 3 in 66, 4 finer (8/13).
Ex: *Dale Krueger Collection* (Heritage, 6/2000), lot 7270.
From *The Owen Collection, Part II*. NGC ID# 23Y5, PCGS# 5611

**1897-S Quarter Dollar, MS66+
An Important Condition Rarity**

- 6372 1897-S MS66+ PCGS. CAC.** The 1897-S Barber quarter claims a small mintage of just 542,229 pieces, and specimens in Gem and finer condition are rare. This high-end Premium Gem displays radiant luster and exquisitely struck design elements, including the upper-right shield corner and the eagle's plumage and claws and the arrow feathers, areas that are often weak. Russet and electric-blue toning cling to the margins. Population: 1 in 66+, 1 finer (8/13). NGC ID# 23YC, PCGS# 5618

**1900-S Quarter, Semiprooflike MS65
Brilliant and Flashy**

- 6373 1900-S MS65 PCGS.** High-grade examples of the 1900-S quarter are surprisingly scarce when one considers the mintage of 1.8 million pieces. This is a remarkable coin. The surfaces are brilliant throughout with significant semiprooflike flash in the fields. The strike is strong throughout, we are tempted to call it full, and there are no mentionable abrasions. Population: 10 in 65, 16 finer (8/13). NGC ID# 23YM, PCGS# 5627

**1901-S Quarter, Fine 15
Seldom Encountered in This Grade**

- 6374 1901-S Fine 15 PCGS.** It has been stated many times in the past, but always bears repeating, just how scarce the 1901-S quarter is in mid-grades. Specifically, in Fine 15, since 1993 we have only two records of such coins being sold at public auction, not just our company, all auction companies. Each side is light gray with a faint accent of golden around the margins. The only marks of note are a very shallow horizontal line across the upper neck of Liberty, and a couple of minor contact marks on the face of Liberty. This is a rare opportunity for the Barber quarter collector who wants to put together a uniform set in this grade. Population: 11 in 15, 67 finer (8/13). NGC ID# 23YR, PCGS# 5630

1901-S Quarter, AU53
Famous Key Date

6375 1901-S AU53 NGC. While the 1901-S quarter is not the lowest-mintage issue among the triumvirate of San Francisco key dates (the 1913-S saw just 40,000 examples struck), it is the least available in better circulated and Mint State grades, as few 1901-S pieces were saved at the time of release and collectors made an effort to save the 1913-S. This AU53 example has considerable remaining luster on pearl-gray surfaces that have aspects of gold, orange, and near-rose at the margins and in the protected parts of the fields. Light marks are as expected for the amount of commerce seen. Census: 1 in 53, 18 finer (8/13). NGC ID# 23YR, PCGS# 5630

1901-S Barber Quarter, AU55
Elusive Key Date
Unusual Grade

6376 1901-S AU55 PCGS. This Choice AU key-date Barber quarter will improve eight of the top 10 PCGS Registry sets for that series. An impressive example, this issue is rarely seen in AU grades. In fact, it is rarely seen in grades better than VG. PCGS has certified 707 examples of the 1901-S quarter, including 623 pieces that grade from Poor-1 to VG10, and only 84 examples in Fine or better grades.

This splendid example has brilliant and untoned silver surfaces with a few wispy hairlines on the obverse. Both sides are fully lustrous with a trace of high point wear. Population: 4 in 55, 31 finer (8/13). NGC ID# 23YR, PCGS# 5630

1901-S Barber Quarter, MS65
Cornerstone of the Series

6377 1901-S MS65 NGC. Chief Engraver Charles Barber designed four denominations of circulating coins, the nickel through the half dollar. Most issues from his designs have mintages above 1 million pieces, yet every Barber series has one legendary rarity. The Liberty nickel boasts the 1913, of which only five examples are known. The great rarity of the Barber dime series is the 1894-S, with nine known survivors. A Barber half collection is stopped by the 1892-O Micro O, a formidable rarity in any grade, though some half dollar collectors manage to convince themselves it that it can be excluded from a date and mintmark collection; thus, the 1892-O Micro O is valued less than the 1901-S quarter, which Barber specialist David Lawrence referred to as "the king of all Barber coinage."

The mintage of the 1901-S quarter is remarkably low; only 72,664 pieces were struck. This is contrast to the 1900-S and 1902-S productions, which each exceeded 1.5 million pieces. Among the Barber issues struck for circulation, only the 1913-S quarter has a lesser mintage. The 1913-S, however, was saved to a greater extent, possibly due to growth in the number of West Coast collectors between 1901 and 1913, or perhaps due to dealer Wayte Raymond, who was known to hoard high-grade examples of current issues.

Most certified examples are in well-worn grades, Very Good or lower. The condition rarity of the 1901-S, in addition to its overall rarity, confirms the importance of the fully lustrous Gem offered here. It is lightly toned, with hints of gold limited to the rims. The strike is penetrating, and the preservation is impressive. The reverse is near-pristine, while the cheek and obverse field have only minimal marks. A true "cornerstone coin" for the series enthusiast. Census: 3 in 65, 3 finer (8/13).

Ex: The Southwest Collection / Long Beach Signature (Heritage, 2/2008), lot 412.

From The Owen Collection, Part II. NGC ID# 23YR, PCGS# 5630

1902-O Barber Quarter, MS66
One of the Seven Finest at PCGS

6378 1902-O MS66 PCGS. The high mintage, approaching 5 million coins, did little to provide a supply of high-grade pieces for present-day collectors. PCGS has certified 182 submissions of this date with an average grade of just XF49.4. Moreover, of the 63 Mint State examples seen by PCGS only 20 are Gem or finer. This MS66 displays medium-intensity toning clinging to the obverse margin. This color palette is more extensive and slightly deeper on the reverse. The strike is above-average, save for the usual softness in the eagle's claws. Population: 7 in 66, 0 finer (8/13). NGC ID# 23YT, PCGS# 5632

1903 Barber Quarter, MS66+
Finest Seen at PCGS

6379 1903 MS66+ PCGS. The 1903 Barber quarter boasts a generous mintage exceeding 9 million circulation strikes and saw extensive circulation, as it is difficult to locate in the better AU grades and above. This high-end Premium Gem is the single finest graded by PCGS (8/13). It yields pleasing luster that shows through the layer of purple and sky-blue patination on the obverse and aqua-blue and rose on the reverse. The design elements are sharply struck, including the upper-right shield corner and the eagle's claws. This well cared for example displays outstanding eye appeal. NGC ID# 23YV, PCGS# 5634

1903-O Quarter, MS66
Multicolored, Top-Grade Example at NGC

6380 1903-O MS66 NGC. This 1903-O Barber quarter is tied for finest with a handful of others at NGC and PCGS combined, with only one piece at PCGS numerically higher (8/13). Fairly deep, multicolored patina on each side fails to conceal the fact that this attractive piece shows few signs of contact, large or small, and boasts an excellent strike in addition. Census: 2 in 66, 0 finer (8/13). NGC ID# 23YW, PCGS# 5635

1913-S Barber Quarter, AU Details
Low-Mintage Key

6381 1913-S — Repaired — NGC Details. AU. It appears that someone removed some unsightly spots from the obverse of this lightly circulated key-date Barber quarter. The reverse is well-detailed and lustrous, under attractive shades of champagne-gold and lavender patina. From a tiny mintage of 40,000 pieces. NGC ID# 23ZW, PCGS# 5666

1916-D Barber Quarter, MS67
Top-Grade, Untoned Example

6382 1916-D MS67 PCGS. The Denver Mint made more than 6.5 million of the final-year Barber quarter issue, and yet PCGS has seen only six submissions in this top Superb Gem grade (8/13); clearly, the mint's emphasis was on quantity. The present piece is untoned, unmarked, fully struck, and splendid in every way, but it was struck from an obverse die that had numerous tiny peripheral die cracks that do not affect the grade. The reverse die was in better shape. NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

1893 Quarter, PR68
Colorful High-Grade Type Coin

- 6383 1893 PR68 PCGS.** For the connoisseur of toned proof coinage, this amazing quarter is a true prize. The surfaces are as fresh and carefully preserved as a collector could want. Every design element is boldly rendered with full details, without a single indication of weakness on either side. Colorful rainbow toning at the rims shifts to green-gold over the interior mirrors and frosted portrait and eagle. The contrast between the devices and the fields is immediately obvious to the observer, even though PCGS did not label it a Cameo proof. Population: 4 in 68, 0 finer (8/13).
Ex: FUN Signature (Heritage, 1/2008), lot 2793.
From The Owen Collection, Part II. NGC ID# 2428, PCGS# 5679

1894 Barber Quarter, PR68
Tied for Finest Certified

- 6384 1894 PR68 NGC. CAC.** A nominal mintage of 972 proof Barber quarters was achieved in 1894 for inclusion in the proof sets of that year. Almost all 1894 silver proof sets were eventually broken up to provide date collectors with high-quality examples of the silver dollar, which had an unusually low business-strike mintage that year.
- The 1894 proof quarter was a well-produced issue, but few survivors can match the technical quality and eye appeal of the present coin. The design elements exhibit razor-sharp definition throughout and the pristine fields are deeply mirrored. Spectacular shades of cerulean-blue and greenish-gold toning blanket the surfaces, creating a dazzling play of colors when this coin is rotated in the light. Eye appeal is incredible. Census: 5 in 68, 0 finer (8/13). NGC ID# 2429, PCGS# 5680

1896 Quarter, PR68 Ultra Cameo
Exceptional Production and Preservation

- 6385 1896 PR68 Ultra Cameo NGC.** Quality control was notably higher in the Mint in this year, and is responsible for the larger (relatively speaking) numbers of nearly perfect proofs from 1896. From NGC we see that there are 11 coins certified as PR68 Ultra Cameo, and there are even two pieces finer (8/13). This is an all-brilliant example whose devices are covered with a thick layer of mint frost. The mint luster is set against the illimitable depth of mirrored reflectivity in the fields. As one would expect, there are virtually no contact marks present. PCGS# 95682

1897 Quarter, PR67
Rose-Gray and Iridescent Patina

- 6386 1897 PR67 PCGS. CAC.** Certified in an old green-label holder and with the CAC designation, this top-grade 1897 Barber quarter in PR67 is sure to spur considerable collector attention. Rose-gray central color cedes to glimpses of iridescent color near the rims on each side, with no mentionable contact and a proof strike that is all that could be desired. Population: 9 in 67, 2 finer (8/13). NGC ID# 242C, PCGS# 5683

1898 Quarter, PR67 Deep Cameo
Magnificent Contrast

- 6387 1898 PR67 Deep Cameo PCGS.** Frosty motifs appear to glide over the deep watery fields of this Superb Gem, yielding magnificent white-on-black contrast. Fully struck design elements add to the coin's fabulous eye appeal. Neither side reveals mentionable any spots or hairlines. Population: 12 in 67 Deep Cameo, 8 finer (8/13). PCGS# 95684

1903 Barber Quarter, PR67 Cameo
Vivid Contrast and Toning

- 6388 1903 PR67 Cameo PCGS.** Attractive shades of pale blue and champagne-gold toning visit the surfaces of this magnificent Superb Gem, with a thin streak of amber bisecting the obverse. The deeply reflective fields contrast dramatically with the sharply detailed frosty design elements and eye appeal is terrific. Population: 15 in 67 (2 in 67+) Cameo, 4 finer (8/13). PCGS# 85689

1903 Barber Quarter, Superb Gem Proof
Pronounced Cameo Contrast

- 6389 1903 PR67 Cameo PCGS. CAC.** Iridescent rings of champagne-gold, burnt-orange, and cobalt-blue toning surround the brilliant centers of this spectacular Superb Gem. The frosty design elements contrast boldly with the deeply reflective fields. Visual appeal is terrific. From a proof mintage of just 755 pieces. Population: 15 in 67 (2 in 67+) Cameo, 4 finer (8/13). PCGS# 85689

1908 Quarter, PR68 ★
Partial Contrast

- 6390 1908 PR68 ★ NGC.** Though the level of contrast on this post-1901 proof Barber quarter was not enough for a Cameo designation, it did garner a coveted Star from NGC. Silver mirrors have only occasional touches of blue-green and cloud-white, mostly at the margins. Neither NGC nor PCGS has graded a PR69 specimen of this issue (8/13). NGC ID# 242P, PCGS# 5694

1913 Quarter, PR67
Colorful Beauty

- 6391** 1913 PR67 PCGS. CAC. Mildly frosted on generally silver-gray devices with delightful orange, green, and blue toning dancing through the fields. Pleasingly reflective under the patina and all-around appealing, a great Superb Gem specimen of its later issue. PCGS has graded just three coins as PR68 or better (8/13). NGC ID# 242V, PCGS# 5699

1915 Barber Quarter, Toned PR67
Impeccable Strike and Preservation

- 6392** 1915 PR67 PCGS. The 1915 Barber quarter is the last proof entry in the series, as none were struck in 1916. The last-year Barber silver proof sets were produced to the extent of 450 coins each — including the dime, quarter, and half dollar — but this PCGS-certified Superb Gem is one of only 10 so graded by that service with just two finer (4/13). The surfaces show impeccable preservation, as expected, and the moderate patina on each side includes generous gold centers with ice-blue, pink, and violet accents. Fully struck throughout and a marvelous finale for the series enthusiast. NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, Fine 15
Even Wear, Light Patina Overall

- 6393** 1916 Fine 15 PCGS. The first-year 1916 Standing Liberty quarter had a minuscule mintage of just 52,000 pieces. Naturally it has become the series' key date at all grade levels, and even lower-level circulated coins are desirable. This piece is original and unimpaired, with attractive light gray toning on each side. Moderately worn, with slighter better details on the reverse, where a faint pinscratch is noted from the eagle's upper left (facing) wing to PL in PLURIBUS. Ex: *Central States Signature* (Heritage, 4/2006), lot 1593; *Long Beach Signature* (Heritage, 5/2009), lot 670. NGC ID# 242Y, PCGS# 5704

1916 Standing Liberty Quarter, VF25
Great Midrange Key-Date Example

- 6394** 1916 VF25 NGC. A smooth and still-luminous midrange representative of the ever-popular 1916 Standing Liberty quarter. Gold-to-gray toning is light over the interiors with deeper shadings at the protected areas of the peripheries. The date is clear, and the scattered small marks and old scrapes on each side are consistent with moderate circulation. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, MS64
Low-Mintage First-Year Key**

6395 1916 MS64 NGC. In determining the comparative rarity of several key first-year issues from the early 20th century, it may be interesting and fruitful to compare their initial production figures. Among the popular first-year keys introduced in 1916 were the 1916-D Mercury dime, the 1916 Standing Liberty quarter, and the 1916-S Obverse Mintmark half dollar.

At first glance, one notices that the mintage of the half dollar—roughly a half-million coins—is about 10 times that of the 1916 Standing Liberty quarter, making it much more available to contemporary collectors, and it was the first of the three keys issued in 1916. The mintage of the 1916-D dime, the second new design of the year, is about five times as much, and the 1916-D is a rare coin in any grade above Very Good today.

Problems with the half dollar and dime would delay production of the new Standing Liberty quarters until quite near the end of the year. The skimpy 52,500 1916-dated Type One coins were intermingled with the 1917 Type One issues from which they were virtually indistinguishable, diluting their appeal as novelty items and further contributing to their status as notable rarities. For all these reasons, the 1916 Standing Liberty quarter is probably the rarest of the three silver keys introduced in 1916.

The present coin is a charming Choice specimen with well-detailed design elements and especially vibrant mint luster. The well-preserved surfaces are essentially untoned, adding to the outstanding eye appeal. Census: 58 in 64, 30 finer (8/13). NGC ID# 242Y, PCGS# 5704

**1916 Quarter, MS62 Full Head
First-Year Key**

6396 1916 MS62 Full Head NGC. The 1916 and 1917 Type One Standing Liberty quarter issues are lumped together in collectors' minds, but there are many subtle differences between the two, starting with the mintage. The 1916 saw a tiny production of 52,000 pieces, while the 1917-PDS coins (both Type One and Type Two) were all issued in the millions of pieces. Specialist-dealer Jay Cline notes many of the subtle design differences in the fourth edition of his series reference:

"I would like to go on record concerning the 1916/1917 Type I's. Calling them both Type I is an atrocity with complete disregard for the difference in the head design of the two pieces. Perhaps 1916 Type I-A and 1917 Type I-B would be appropriate.

"Firstly, the sash that Miss Liberty holds across her body is incused on the 1916 and raised on the 1917 Type I. The hairstyle on the 1916 slightly overlaps onto her forehead, but does not on the 1917 Type I. The 1917 Type I has several locks of hair down her forehead and to the ear. The 1916 has straighter hair lines with a single lock above the ear that determines whether or not it is a Full Head on the 1916. 1916s are weakly struck and 1917 Type I's are the strongest strikes of the whole series. The 1916 rivets on the shield are weak; 1917 Type I rivets are strong."

Although Full Head 1916s are in the minority, PCGS has certified Full Head coins even in the AU grades, as low as AU55 Full Head. The present coin is a well-detailed MS62 specimen, with Full Head definition and vibrant mint luster. The lightly marked surfaces show a few hints of golden-tan toning, with outstanding eye appeal.

From The Joan Carroll Collection. NGC ID# 242Y, PCGS# 5705

1916 Quarter, MS62 Full Head
Famous Type One Motif

6397 1916 MS62 Full Head NGC. The 1916 Standing Liberty quarter is one of the most popular issues of the 20th century, due to its series-low mintage of 52,000 pieces and its controversial design that was modified to the Type Two motif the following year.

The present coin is an attractive MS62 specimen of this sought-after first-year key, with more detail on the shield rivets than is usually seen and enough definition on Liberty's hairline and facial features to qualify for the Full Head designation. The lightly marked surfaces display accents of golden-brown toning with ample mint luster and eye appeal.

From The Joan Carroll Collection. NGC ID# 242Y, PCGS# 5705

1916 Standing Liberty Quarter, MS64
Elusive Full Head Example

6398 1916 MS64 Full Head NGC. From a tiny mintage of 52,000 pieces, the 1916 Standing Liberty quarter is the most sought-after issue of the series. The design featured a bare-breasted figure of Liberty that proved quite controversial, and the Type One design was modified the following year to include a modest chainmail vest for Miss Liberty, creating a popular short-lived design type for collectors.

In his series reference, J.H. Cline notes that the 1916 is always softly struck on the head and shield, but this impressive Choice specimen shows enough detail to qualify for the Full Head designation. The lightly marked surfaces are blanketed in delicate shades of pale gold and lavender toning, with vibrant mint luster underneath. Census: 49 in 64 Full Head, 65 finer (8/13).

From The Joan Carroll Collection. NGC ID# 242Y, PCGS# 5705

**1916 Standing Liberty Quarter, MS65
Elusive Full Head Specimen**

6399 1916 MS65 Full Head NGC. The Standing Liberty design appeared on the quarter for the first time in 1916. Because the Mint was focused on getting the new designs for the Mercury dime and Walking Liberty half dollar perfected, no quarters were struck until late in the year. Accordingly, only a token mintage of 52,000 quarters was struck at the Philadelphia Mint and no quarters were produced at any of the branch mints in 1916. As a result, the 1916 Standing Liberty quarter is the rarest date of the series and specimens are prized by collectors in all grades and conditions.

This coin is a delightful Gem, with well-detailed design elements and Full Head definition, which is seldom seen on the 1916. Vibrant mint luster is evident on both sides and a few hints of pale gold toning enhance the outstanding eye appeal. Census: 45 in 65 Full Head, 20 finer (8/13). NGC ID# 242Y, PCGS# 5705

**1917-D Type One Quarter, MS67 Full Head
Scarcer Issue Within the Subtype**

6400 1917-D Type One MS67 Full Head PCGS. Whereas most of the 1917-P Type One quarters were struck with Full Head definition, only a minority of the 1917-D Type One issue was produced with the same amount of care. This is a truly gorgeous representative whose smooth, lustrous surfaces leave little doubt about the validity of the MS67 designation. The texture is richly frosted, and the focal features display the sharpness of strike that is necessary to receive a Full Head designation from PCGS. The surfaces are attractively toned in silver-gray shades, with mottled olive-russet accents around the peripheries joined by speckled light blue on the reverse borders. Population: 21 in 67 (1 in 67+) Full Head, 0 finer (8/13). Ex: Long Beach Signature (Heritage, 9/2005), lot 2797; FUN Signature (Heritage, 1/2007), lot 4139. NGC ID# 2432, PCGS# 5709

1917-S Type One Quarter, MS67 Full Head
Stunning and Fully Struck Example

- 6401 1917-S Type One MS67 Full Head PCGS.** The Type One Standing Liberty quarters are a subtype that shows designer Hermon MacNeil's artistry to maximum advantage, and accordingly it is one that dedicated numismatists, including the present cataloger, never tire of viewing. "Full Head" seems so inadequate for a coin such as this, fully struck throughout both sides — full hairline, full shield rivets, full gown details — on and on, the attractions never cease. This Superb Gem Full Head 1917-S is the most difficult of the 1917 issues, one of only 10 in this top PCGS grade including two in 67+ (8/13). Daubs of pinkish-gray on both sides complement some pretty blue rim toning on the reverse margin. A stunning coin for type or Registry Set purposes. NGC ID# 2433, PCGS# 5711

1917 Standing Liberty Quarter, MS67 Full Head
No Finer Coins at Either Service

- 6402 1917 Type Two MS67 Full Head NGC.** A magnificent Superb Gem representative of the first year of the popular Type Two design. This coin displays sharply detailed design elements, with Full Head definition. The pristine surfaces exhibit vibrant mint luster and shades of champagne-gold and ice-blue toning. Census: 12 in 67 Full Head, 0 finer (8/13). NGC ID# 2434, PCGS# 5715

1918-S Quarter, MS65 Full Head
Series Strike Rarity

- 6403 1918-S MS65 Full Head NGC.** It is safe to say that most Mint State examples of the 1918-S quarter have been examined at great length by collectors searching for the elusive 1918/7-S overdate, which this piece is not. It is, however, a mighty fine-looking Gem example of the 1918-S, which is elusive in this Full Head grade despite its large mintage of 11 million-plus coins. A couple of the shield rivets are missing, but overall the strike is satisfyingly bold, including on the head and hairline, the gown and stars, the date, and the eagle feathers on the reverse. The surfaces are silver-gray with pinkish-gold accents. Census: 15 in 65 Full Head, 4 finer (8/13). NGC ID# 2439, PCGS# 5725

1919-D Quarter Dollar, MS65
Vibrant Luster and Impeccably Preserved Surfaces

- 6404 1919-D MS65 PCGS. CAC.** Considerable definition is present on the head of Liberty, even if insufficient for a Full Head designation. In fact, only one percent of this issue is struck with Full Head detailing, according to Cline (2007). The remaining surfaces are well-detailed. Most of the rivets on the left side show; these are usually obliterated completely. The surfaces exhibit vibrant luster and soft purple toning, slightly deeper on the obverse. Both sides are impeccably preserved. Population: 44 in 65 (1 in 65+), 26 finer (8/13). NGC ID# 243C, PCGS# 5730

**1923 Standing Liberty Quarter, MS66
Elusive Issue in Full Head**

6405 1923 MS66 Full Head NGC. Brilliant untoned surfaces and rich satin luster provide this Premium Gem with strong visual appeal. In addition to the Full Head detail, all of the shield rivets are present, with most of them displaying good definition. A few faint milky spots appear on each side. Census: 12 in 66 Full Head, 3 finer (8/13). NGC ID# 243J, PCGS# 5743

**1923-S Quarter Dollar, Highly Lustrous MS66
An Important Semikey Date**

6406 1923-S MS66 NGC. This highly lustrous Premium Gem falls somewhat short of Full Head, which account for only about five percent of known examples. The remaining design elements are sharp, including the chain mail, the vertical stripes of the inner shield, and all but two of the rivets. Speckled reddish-tan patina is scattered over both sides, each of which has been well cared for. An important semikey date in the series. Census: 22 in 66, 4 finer (8/13). NGC ID# 243K, PCGS# 5744

**Gem 1924-S Standing Liberty Quarter
Full Head Details**

6407 1924-S MS65 Full Head PCGS. Rich toning is present on this Full Head Gem. The predominant colors are golden-orange and golden-brown, with splashes of emerald-green also appearing. The upper obverse fields reveal die polish lines and the shield displays a minor incompleteness of strike. Population: 31 in 65 Full Head, 10 finer (8/13). NGC ID# 243N, PCGS# 5751

**1925 Quarter, MS67 Full Head
Lightly Toned**

6408 1925 MS67 Full Head PCGS. The date was recessed in 1925 to solve the problem of excessive wear on the digits that had plagued the series in earlier years. Sharp detail in the chain mail and the outer shield complement Liberty's Full Head. Indistinctness on the inner shield is typical of nearly all 1925 examples, regardless of head detail. Lustrous surfaces show occasional whispers of reddish-gold, electric-blue, and purple. This piece is very well-preserved. Population: 7 in 67 (2 in 67+) Full Head, 0 finer (8/13). NGC ID# 243P, PCGS# 5753

**1926-S Quarter, MS63 Full Head
Highly Lustrous and Minimally Marked**

6409 1926-S MS63 Full Head NGC. One-percent or less of the 1926 Standing Liberty quarters from the San Francisco Mint are struck with full head detail (Cline, 2007). This Select piece is a refreshing exception. The chain mail, date, and mintmark are also bold. Only the inner shield and rivets adjacent to the hip are weak, as is always the case for this issue. Highly lustrous surfaces display occasional hints of reddish-gold and lavender, more so on the reverse. Notable marks are much fewer than expected for this grade level. Census: 8 in 63 Full Head, 29 finer (8/13). NGC ID# 243T, PCGS# 5759

1927-D Quarter Dollar, MS66 Full Head
A Significant Strike Rarity, None Finer at PCGS

6410 1927-D MS66 Full Head PCGS Secure. The 1927-D Standing Liberty quarter, coming from a mintage approaching one million pieces, is a strike rarity and, as might be expected, is seldom seen with full head details. J.H. Cline estimates that only about three percent are struck with Full Heads.

The silvery surfaces display strong mint luster, and except for the Full Head are typically struck. The chain mail, date, and mintmark are strong, as are all rivets except for the 2nd, 3rd, and 4th. The inner shield exhibits the always seen weakness. Both sides are very nicely preserved. An unobtrusive linear mark concealed in the right (facing) wing will help pedigree the coin. Population: 14 in 66 Full Head, 0 finer (8/13). NGC ID# 243V, PCGS# 5763

WASHINGTON QUARTERS

1932-D Quarter, MS65
Lovely Toning

6411 1932-D MS65 PCGS. A frosty and colorful Gem with prevailing lemon-yellow toning across most of each side and small zones of silver and charcoal. While the 1932-D quarter is available for a price in grades through near-Gem, a true MS65 coin such as this is scarce. Population: 66 in 65, 1 finer (8/13). NGC ID# 2448, PCGS# 5791

1946-S Washington Quarter, MS68
Among the Finest Certified Examples

6412 1946-S MS68 PCGS. CAC. The 1946-S Washington quarter has been prized by collectors since its time of issue because of its limited mintage of 4.2 million pieces. Many examples were saved by speculators, resulting in a plentiful supply of Mint State coins today. Of course, the population thins out in higher grades, and the finest examples seen are a handful of MS68-graded coins at both of the leading grading services.

The present coin is a magnificent MS68 specimen, with well-detailed design elements, flawless surfaces, and vibrant mint luster throughout. The obverse is vividly toned in shades of sea-green, lavender-gray, and turquoise, while the reverse is mostly brilliant, with areas of violet, blue, and emerald-green on the left side of the coin. Population: 4 in 68, 0 finer (8/13). NGC ID# 245G, PCGS# 5832

1950-S/D Quarter Dollar, MS67
One of Ten Finest Certified

6413 1950-S/D MS67 PCGS. CAC. FS-601. The 1950-S/D overdate is a popular Washington quarter variety. Mint State examples are usually in the near-Gem to Premium Gem range. PCGS and NGC have certified just 10 pieces in the lofty grade of MS67 and none finer. The underlying D mintmark is clearly visible beneath the primary S. Frosty luster adorns both sides, each of which is essentially color-free. The design elements are well struck on this nicely preserved and attractive specimen. Population: 4 in 67, 0 finer (8/13). NGC ID# 245V, PCGS# 5845

1968 Quarter, MS68
Significant Registry Coin

6414 1968 MS68 PCGS. For the Registry collector of clad Washington quarters, this MS68 example offers an important chance to get a leg up on the competition, as it is one of only two coins so graded by PCGS with none finer (8/13). Toning is minimal, luster strong, and eye appeal high all-around. NGC ID# 246Z, PCGS# 5881

1971-D Washington Quarter, MS68
Among the Finest Certified

6415 1971-D MS68 PCGS. To date, neither PCGS nor NGC has graded any example of this issue in higher numeric grade (8/13). This spectacular MS68 specimen exhibits razor-sharp definition on all design elements and the pristine brilliant surfaces radiate vibrant mint luster on both sides. NGC ID# 2478, PCGS# 5888

EARLY HALF DOLLARS

1794 Half Dollar, O-101, Fine 15
First Year of the Denomination

6416 1794 Fine 15 PCGS. O-101, R.4. Half dollars were produced for the first time in 1794, with a small mintage of 23,464 pieces. Actually, 18,164 of these 1794-dated coins were not delivered until February of 1795. Eleven die varieties are known for the date. This coin represents the scarce O-101 variety, with star 1 piercing the lowest curl and a total of 21 leaves on the reverse wreath.

The present coin is a well-worn Fine 15 example with pleasing gray, blue-steel, and amber patina. All major design elements remain intact in outline, with some interior detail still showing in the eagle's feathers. The legends and date are easily legible. The surfaces are lightly abraded except for a few short scratches hidden in Liberty's hair and the diagnostic die crack is present from the rim to the leaf, near the first S in STATES. Altogether, an attractive specimen of this important first-year issue. PCGS# 6051

1794 Flowing Hair Half, Fine 15
Rare O-104 Variety

- 6417** 1794 Fine 15 PCGS. O-104, R.5. A better but collectible 1794 die variety, distinguished by a rim break at 4 o'clock on the reverse. The present example has clear legends and substantial plumage detail on the right (facing) wing. The right obverse border displays a few faint adjustment marks, as coined, but abrasions are surprisingly absent, though selected areas appear microgranular when studied beneath a lens. The obverse is deeply toned walnut-brown and powder-blue. The reverse has lighter lavender and stone-gray colors. Perhaps half of all 1794 examples are O-101, which makes the appearance of a different variety in problem-free condition all the more desirable. PCGS# 6051

1794 O-104 Half Dollar, VF20
Early Die State

- 6418** 1794 VF20 PCGS. O-104, R.5. Both dies are perfect and uncracked on this early die state specimen. Later states develop a heavy bisecting die crack across the obverse from star 3 to star 11, or from 2:30 to 8 o'clock. Among the 11 die marriages identified for 1794 half dollars, O-101 is the most common, and O-104 and O-105 are scarce. All other varieties are considered R.6 or higher. As one of the more readily available 1794 die varieties, the O-104 is a good choice for date and type collectors.

This attractive light to medium gray example has silver-tan devices and pewter-gray fields that deepen in color closer to the borders. The surfaces show trivial marks. This pleasing piece ranks inside the top 10 for the variety and just misses the condition census. PCGS# 6051

**1794 Flowing Hair Half Dollar, VF30
Late Die State O-101a Variety**

6419 1794 VF30 PCGS. O-101a, R.4. An attractive VF30 example of the first U.S. half dollar issue, from a small mintage of 23,464 pieces. The O-101 variety is recognized by the position of star 1 piercing the lowest curl and the 10x11 berry arrangement on the wreath. In addition to the usual die break near the first S in STATES, this coin exhibits a longer crack through the F in OF, turning upward through the leaves and the final S in STATES, identifying the O-101a late die state.

This coin displays pleasing shades of gray, lavender, and ice-blue toning, with traces of original mint luster in sheltered areas. The design elements are worn on the high points, but much interior detail is still intact. The surfaces are lightly abraded, with no trace of planchet adjustment marks. Population: 21 in 30, 36 finer (8/13). PCGS# 6051

**1795 Flowing Hair Half Dollar, AU50
2 Leaves, O-109 Variety**

6421 1795 2 Leaves AU50 PCGS Secure. O-109, R.4. This very scarce die pair is attributable solely from the reverse, which has inner berries but no outer berries under the eagle's wings and a leaf extending on either side of the stem at the F in OF. This richly toned example is only modestly worn and has considerable remaining luster under waves of blue, violet, pink, peach, and gold-gray toning. The surfaces show several faults that influence the grade, including two sizable scrapes over the 17 in the date and a pinscratch on the eagle's breast, but the overall visual appeal remains strong, especially at arm's length. Population: 19 in 50, 69 finer (8/13). PCGS# 6052

**1795 O-131 Half Dollar, AU Details
Several Reverse Die Cracks**

6420 1795 2 Leaves — Obverse Scratched, Cleaned — NGC Details. AU. O-131, High R.4. The O-131 has a low reported census in the fourth edition of the Overton reference, with the finest listed as just VF35, although some better pieces are known. Both sides show light cleaning lines with minor scratches at the center of the obverse on this sharply detailed example. A splash of cobalt-blue toning appears at the center of the reverse.

**1795 Flowing Hair Half, Fine 15
Date Recut, 3 Leaves Reverse, O-111**

- 6422 1795 3 Leaves Fine 15 PCGS. O-111, High R.4.** A substantial mintage of 299,680 Flowing Hair half dollars was struck in 1795, providing type collectors with a reasonable alternative to the elusive and expensive 1794 half dollar, the only other date of the design. A whopping total of 32 different die varieties are known for the date, with this coin representing the scarce O-111 variety, the only marriage with three leaves under the eagle's wings. The date has been recut north of the original digits, which touch the dentils below. A heavy die break is evident on the reverse, with more detail showing below the break than above. A well-worn, but pleasing specimen with many interesting features.
From The Strawberry Fields Collection. PCGS# 6053

**1806 Draped Bust Half, AU53
Pointed 6, No Stem, O-109 Variety**

- 6423 1806 Pointed 6, No Stem AU53 PCGS. CAC. O-109, R.1.** A landmark mintage of 839,576 Draped Bust half dollars was struck in 1806, with 28 die varieties known for the date. The present coin represents the popular *Guide Book* O-109 variety with a pointed 6 in the date and no stem through the claw on the reverse. This lightly circulated AU53 example retains traces of original mint luster under attractive shades of lavender, gray, and champagne-gold toning. Population: 10 in 53, 53 finer (8/13).
From The Strawberry Fields Collection. PCGS# 6073

**1806 Draped Bust Half, O-112, XF45
6 Over Inverted 6 *Guide Book* Variety**

- 6424 1806 6 Over Inverted 6 XF45 PCGS. CAC. O-112, R.4.** The scarce O-112 variety is easily recognized by the bisecting obverse die crack through 8 and the portrait to the rim between E and R in LIBERTY, and another crack from star 11 to Liberty's neck. Shades of gray, lavender, and sea-green toning enhance the lightly abraded surfaces of this Choice XF specimen.
From The Strawberry Fields Collection. NGC ID# 24EL, PCGS# 6078

BUST HALF DOLLARS

**1807 Capped Bust Half, MS63
O-113a, Small Stars**

- 6425 1807 Capped Bust, Small Stars MS63 NGC. O-113a, R.3.** Moderately toned in splashes of sea-green and steel-gray. This lustrous and clashed half dollar is smooth save for faint grazes on the field beneath the scroll. Well struck except for the eagle's neck and left (facing) shoulder, which always seem to be indistinct on this variety. Among the finest O-113a examples. The top two pieces listed by Herrman are an NGC MS65 and a PCGS MS62. NGC ID# 24EN, PCGS# 6087

**1823 O-105 Half Dollar, MS64
Likely Condition Census Specimen**

- 6426 1823 MS64 PCGS. CAC. O-105, R.1.** The prominent center dot within the shield allows prompt attribution. This lustrous almond-gold and powder-blue half dollar has mark-free fields and only minor contact on the portrait.
Ex: Lewis M. Reagan Collection (Stack's, 1/1996), lot 534. NGC ID# 24FJ, PCGS# 6131

1823 O-110 Half Dollar, MS64
Perfect 3

6427 1823 MS64 PCGS. CAC. O-110, R.2. An early die state before the 3 was strengthened, resulting in the Ugly 3 variety. The reverse has a tiny raised die dot slightly above center between the first two vertical shield stripes. We handled a different MS64 PCGS example of this variety over four years ago, and the two coins are the finest examples of 1823 O-110 that we have ever offered. This piece has excellent design definition with lovely blue and iridescent toning over satin surfaces. Population: 45 in 64 (1 in 64+), 5 finer (8/13), for all 1823 varieties. NGC ID# 24FJ, PCGS# 6131

1826 O-110 Half Dollar, MS66
Census Level Specimen

6428 1826 MS66 NGC. O-110, R.2. The inside left curve of the upper loop in the 8 is recut, and a tiny die dot appears above the eagle's right claw. The finest known examples of the 1826 O-110 include a couple MS67 pieces, and a small number of MS66 examples. This Premium Gem has brilliant gray-gold toning over frosty luster with excellent eye appeal. Census: 18 in 66, 5 finer (8/13), for all 1826 varieties. NGC ID# 24FM, PCGS# 6143

1827 O-131 Half Dollar, MS64
Probably Census Level Specimen

6429 1827 Square Base 2 MS64 PCGS. O-131, R.2. A relatively common variety, but this Choice Mint State piece is likely a condition census example with only two or three finer examples known. This specimen exhibits gray-gold patina with sea-green peripheral toning on both sides. Minor surface marks on the obverse are responsible for limiting the grade of this specimen. NGC ID# 24FN, PCGS# 6144

1828 O-107 Half Dollar, MS63
Curl Base 2, Knob

6430 1828 Curl Base 2, Knob MS63 PCGS. O-107, R.2. The 1828 is a varied date for those who collect by *Guide Book* variety as it merits five separate entries. The Curl Base 2, Knob is represented only by O-107 and the very scarce O-106. The present lustrous example has only a hint of almond-gold patina. Well struck except on the lower left stars, and exceptionally smooth save for a faint thin mark through the chin. Population: 5 in 63, 4 finer (8/13). PCGS# 6149

PROOF BUST HALF DOLLARS

1826 O-101 Half Dollar, PR65+ The Finest Proof 1826 Half Dollar Previously Unrecorded Specimen

6431 1826 PR65+ NGC. O-101, High R.7 as a Proof In our January 2013 FUN Signature sale, we offered two different proof specimens of the 1826 O-101 half dollar, and wrote that we believe only two or three proofs exist. At the time, the present specimen was unknown and recently came to us from a European source where it has been hidden since the middle 19th century.

This impressive Gem is the finest existing 1826 proof half dollar, slightly finer than the Pittman specimen that was the second example in our January sale, and finer than any other known example. We have updated our roster to reflect this additional specimen:

1. O-101 PR65+ NGC. Obtained by a European noble while visiting this country in the middle 19th century and retained by the same family until the present time. **The present specimen.**

2. O-101 PR65 NGC. Thomas Cleneay (Chapman Brothers, 12/1890), lot 1162; Colonel E.H.R. Green; Adolph Freidman Collection of Half Dollars/1946 ANA (Abe Kosoff), lot 786; Gustav Lichtenfels Collection (Kreisberg-Schulman, 2/1961), lot 2763; John Jay Pittman (David Akers, 5/1998), lot 1485; Heritage (1/2006), lot 3187; Heritage (1/2013), lot 5632.

3. O-101 PR64 PCGS. 1997 ANA (Heritage, 8/1997), lot 6351; 2005 ANA Sale (Heritage, 7/2005), lot 10206; 2012 FUN (Heritage, 1/2012), lot 3231; 2013 FUN (Heritage, 1/2013), lot 5631.

4. O-102 PR63 Uncertified. Heritage (9/1996), lot 5600. Believed to be ex: Ira Reed; T. James Clarke (New Netherlands, 47th Sale).

5. O-102 PR60. Gilhousen Collection (Superior, 10/1973), lot 930; Ruby Collection (Superior, 2/1975), lot 696; Hoffecker Collection (Superior, 2/1987), lot 3154; Worrell Collection (Superior (9/1993), lot 1279.

A. Proof. Allenburger Collection (B. Max Mehl, 3/1948); McPherson Collection (Stack's, 2/1953); Empire Collection (Stack's, 11/1957), lot 1320. Unplated in the Empire catalog.

This impressive Gem boasts considerable silver brilliance with splashes of apple-green, cobalt-blue, and orange-gold toning over fully mirrored fields. A bold strike is evident and the surfaces are pristine with only a few trivial contact marks, none sufficient for provenance purposes. A delicate die crack connects all the digits of the date, extending to the left of the 1. Census: 2 in 65 (1 in 65+), 0 finer (8/13).

From The Noblesse Collection. PCGS# 6203

1827 O-121 Half Dollar, PR62
Previously Unrecorded Specimen
From European Nobility

6432 1827 PR62 NGC. O-121, High R.7 as a Proof. The recut A in STATES confirms the variety. A single proof example of O-107 is recorded in the literature, along with five different examples of O-121, including the present specimen. The other four carry higher numerical grades, so the present piece is the most affordable proof 1827 half dollar, and it is a previously unrecorded specimen. A roster of the other proofs is available at lot 5633 of our January 2013 FUN Signature sale. The crisp strike is sufficient to eliminate any doubt about the proof status of this example. Both sides have faintly mirrored fields with myriad hairlines that limit the grade. Light blue and delicate gold peripheral toning frames the devices. *Obtained by a European noble while visiting this country in the middle 19th century and retained by the same family until the present time. From The Noblesse Collection. PCGS# 6205*

1829 O-108 Half Dollar, PR65
Second Finest Proof 1829 Half

6433 1829 PR65 NGC. O-108, R.8 as a Proof. This is the same variety as the first Norweb 1829 proof half dollar. That collection also had a proof example of O-112. Until the present piece made its debut appearance to the numismatic community, five proof examples of the 1829 half dollar were known, and each was a different variety. The present Gem proof is the second proof identified from the O-108 die pair. Only one of the now six known proofs is finer than this piece.

1. **O-106 PR60.** Bowers and Merena (1/1985), lot 2628.
2. **O-107 PR66 NGC.** Thomas Elder's 67th Sale (10/1912); Hillyer Ryder (1945); Wayte Raymond; New Netherlands 50th Sale (12/1957), lot 588; John Jay Pittman (David Akers, 5/1998), lot 1491; FUN Signature (Heritage, 1/1999), lot 6741; American Numismatic Rarities (1/2004), lot 1473; FUN Signature (Heritage, 1/2007), lot 974; Heritage (1/2013), lot 5634.
3. **O-108 PR65 NGC.** Obtained by a European noble while visiting this country in the middle 19th century and retained by the same family until the present time. **The present specimen.**
4. **O-108 PR63.** Norweb Collection (Bowers and Merena, 11/1988), lot 3095.
5. **O-111a PR63 NGC.** Stack's (12/1998), lot 1362; Stack's (10/2006), lot 2755; Heritage (4/2011), lot 5146; Goldberg Coins (2/2013), lot 1321.
6. **O-112 PR63 NGC.** Norweb Collection (Bowers and Merena, 11/1988), lot 3097; Bowers and Merena (11/2002), lot 1463; Heritage (7/2008), lot 1687.

This lovely Gem has mostly brilliant silver surfaces with faint gold toning and light blue concentrated at the right obverse. The fields are fully mirrored and the strike is exceptional. Faint scratches appear on Liberty's face and neck.
From The Noblesse Collection. PCGS# 6208

1831 O-103 Half Dollar, PR64
Only Five Proofs Known

6434 1831 PR64 NGC. O-103, High R.7 as a Proof. Four of the five known proof 1831 half dollars are from the O-103 die pair, and the fifth is an example of O-108. This piece is tied for third best of the five pieces, as shown in the roster below.

1. **O-103 PR65 PCGS.** Heritage (4/2013), lot 4268.
2. **O-103 PR65 NGC.** Samuel H. Chapman, as part of a complete proof set, one of only two complete sets known to him; Dr. C.A. Allenburger (B. Max Mehl, 3/1948), lot 871; John Jay Pittman (David Akers, 5/1998), lot 1495; FUN Signature (Heritage, 1/2006), lot 3188; Greensboro Collection II/FUN Signature (Heritage, 1/2013), lot 5636.
3. **O-103 PR64 PCGS.** Auction '79 (Paramount), lot 155; Sixten Erling, Paramount International Coin Corp.'s Rare Coin List No. 12; private Illinois collector; Rarities Sale (Bowers and Merena, 8/1999), lot 196.
4. **O-103 PR64 NGC.** Obtained by a European noble while visiting this country in the middle 19th century and retained by the same family until the present time. **The present specimen.**
5. **O-108 Proof.** Reed Hawn (Stack's, 8/1973), lot 98; Robison Collection (Stack's, 2/1982), lot 1591; Auction '84 (Stack's, 7/1984), lot 1143; Stack's (12/1998), lot 2244.

This near-Gem proof has a bold strike with fully mirrored fields around lustrous devices that impart a slight cameo appearance. The obverse is mostly toned in pale gold and light green while the reverse is mostly brilliant with delicate gold and blue toning. An exceptional proof for the connoisseur.

From The Noblesse Collection. PCGS# 6210

PROOF REEDED EDGE HALF DOLLAR

1838 Reeded Edge Half, PR64 ★
Only Four Known Proofs
Previously Unrecorded Specimen

6435 1838 PR64 ★ NGC. GR-13. This is only the second proof 1838 half dollar that we have ever offered, and it is from a different die pair than the other example, formerly in the Pittman Collection, which is attributed as GR-1. Attributions are from *A Registry of Die Varieties of Reeded Edge Half Dollars 1836-1839*, published by Dick Graham in July 2012. Only three or four proofs are known, and this example is the second finest of those pieces. One of the four proofs in our roster has not been seen since 1962 and may or may not be a true proof, if it can even be found today. The reverse of this near-Gem proof has a heavy die crack through HAL, the olive leaves and wing tip, continuing through the base of many letters in the legend. For comparison, the Pittman specimen has a perfect reverse and the Reed Hawn specimen is cracked like this piece.

1. GR-1 PR66 PCGS. Howard Newcomb (J.C. Morgenthau, 5/1945), lot 850; Wayte Raymond (5/1946); John Jay Pittman (David Akers, 5/1998), lot 1513; Bowers and Merena (8/2000), lot 4114; Bowers and Merena (7/2002), lot 301.

2. GR-14 PR64 ★ NGC. Obtained by a European noble while visiting this country in the middle 19th century and retained by the same family until the present time. **The present specimen.**

3. GR-14 PR64 NGC. Apparently later recertified as PR64 PCGS. Reed Hawn (Stack's, 8/1973), lot 120; Long Beach Connoisseur (Bowers and Merena, 8/1999), lot 199.

4. GR-13 Proof. Virgil Brand; Kreisberg-Schulman (2/1961); R.E. Cox, Jr. (Stack's, 4/1962), lot 1871. The current location of the Brand-Cox specimen is unknown.

This impressive piece has full brilliance with satin luster on the silver-white devices and deeply mirrored fields on both sides. Only a hint of delicate champagne toning graces the surfaces. Here is a remarkable and rare proof Reeded Edge Capped Bust half dollar for the advanced collector.

From The Noblesse Collection. PCGS# 6225

SEATED HALF DOLLARS

1853 Seated Liberty Half, MS66+ Exceptional Arrows and Rays Type Coin Only Two Finer Coins at PCGS

6436 1853 Arrows and Rays MS66+ PCGS. CAC. The California Gold Rush of 1849 drastically increased the world's supply of gold, making silver relatively scarcer and more valuable on the open market. As a result, all U.S. silver coins saw their intrinsic value rise above their face value, encouraging hoarding and melting on a large scale. To address this problem, the weight of all silver denominations except the dollar was reduced in 1853, with the half dollar's silver content falling from 206.25 grains to 192 grains. To signify this weight change, the design of the half dollar was modified by placing arrows at either side of the date and a glory of rays on the reverse. The arrows were continued on half dollars through 1855, but the rays were dropped after the first year, creating an extremely popular one-year design for type collectors.

A substantial mintage of more than 3.5 million half dollars was accomplished at the Philadelphia Mint in 1853, making the Arrows and Rays design plentiful in today's market. The issue circulated widely, and most examples seen are in circulated grades, with the average coin in the lower AU range. Premium Gem specimens are very rare, and finer coins are virtually unobtainable.

This high-end Premium Gem exhibits sharply detailed design elements in most areas, with just the slightest touch of softness on the right-hand stars. A few interesting clash marks show on both sides, near Liberty's arms on the obverse and below the eagle's wing on the reverse. The well-preserved surfaces are brilliant, aside from two small amber toning spots at the obverse rim near stars 12 and 13 which can serve as pedigree markers. Vibrant satiny mint luster is evident throughout and eye appeal is terrific. This coin should find a home in the finest collection or Registry Set. Population: 5 in 66+, 2 finer (8/13). NGC ID# 24JJ, PCGS# 6275

1861-O Half Dollar CSA Obv, WB-102, AU58
Very Popular Variety
Two Finer at PCGS

- 6437** 1861-O CSA Obverse AU58 PCGS. CAC. WB-102. CSA Die Crack. Confirmed by a die crack from Liberty's nose to the rim slightly to the right of star 7. While the 1861-O is a common date overall, Wiley and Bugert assign an R.5 rarity rating to this variety in XF/AU. PCGS has graded only 54 CSA obverse pieces, of which this near-Mint State coin is the third finest (8/13). Charcoal-gray patina imbued with hints of olive-green bathe both sides, each of which exhibits well-struck design elements and no mentionable marks. A very popular variety.
 From *The Strawberry Fields Collection*. PCGS# 39968

(1879) CSA Restrike Half, AU55
One of 500 Pieces Struck

- 6438** 1861 CSA Restrike AU55 PCGS. In 1879, leading rare coin dealer J.W. Scott purchased the original and lightly rusted C.S.A. half dollar die from Ebenezer Locke Mason, Jr., who in turn had obtained it from B.F. Taylor, a former Chief Coiner of the New Orleans Mint. Scott planed the reverses off of 500 1861-dated halves, then overstruck the blank sides with the Confederate die. This action had the side effect of partially flattening the Federal obverses, as can be seen on the present coin. A smooth sea-green and wheat-gold example with pleasing sharpness on the Confederate side. PCGS# 340402

1861-Dated CSA Restrike Half Dollar, MS62
Only 500 Pieces Struck

- 6439** 1861 CSA Restrike MS62 NGC. B-8002. The New Orleans Mint was seized by the Confederacy in 1861 and plans for a distinctive Southern coinage system were introduced, but the plans proved impractical in the long run. Four half dollars were struck, using the 1861-dated federal obverse die that was captured with the mint and a newly designed Confederate States of America reverse. These coins became famous rarities when the first specimen surfaced in the possession of Chief Coiner B.F. Taylor in 1879.

Taylor also retained the Confederate reverse die, which he sold to coin dealer Ebenezer Locke Mason, who soon passed the die along to dealer and entrepreneur J.W. Scott. Seeking to capitalize on the fame of the ultra-rare Confederate half dollars, Scott obtained 500 regular-issue 1861-O half dollars and planed off the reverse design. He then struck facsimile's of the famous Confederate issue using the Confederate die to strike the reverse of the effaced planchet. Of course, the obverse of each coin was somewhat flattened in the striking process. Scott sold off his stock over a period of years and the scarce Restrikes are prized by collectors today.

The present coin is an attractive MS62 specimen, with a sharply detailed Confederate reverse and the usual flattened federal obverse. Both sides are brightly lustrous and show only minor signs of contact. A few hints of lavender toning enhance the pleasing surfaces. Listed on page 408 of the 2014 *Guide Book*. Census: 16 in 62, 24 finer (8/13).

From *The Strawberry Fields Collection*. PCGS# 340402

**1863 Half Dollar, Brilliant MS65
Seldom Encountered in High Grades**

6440 1863 MS65 PCGS. Even though more than a half million half dollars were struck in 1863, precious few remain today in high grades. Many were exported, most notably to Guatemala. This is a brilliant example that is well-struck throughout, and the fields are subtly reflective from die polish (abundantly evident on each side). Population: 9 in 65, 4 finer (8/13). NGC ID# 24JB, PCGS# 6309

**1871-S Half Dollar, MS65
Remarkably Scarce in High Grades**

6441 1871-S MS65 PCGS. WB-101. Small wide mintmark. It is remarkable how conditionally scarce all dimes, quarters, and halves are from this period. The mintage for the 1871-S half is not inconsiderable with 2.1 million pieces struck. But who saved them? Apparently almost no one. If you want a PCGS Gem, there are two. Want a finer one? There's one. This is an all-brilliant example that is sharply struck in all areas. As one would expect, there are no abrasions worthy of mention. The fields have a rippled effect from metal flow, a common occurrence on overused dies. NGC ID# 24K6, PCGS# 6332

**1872-CC Seated Half, AU53
Surprisingly Difficult to Locate**

6442 1872-CC AU53 PCGS. CAC. Despite its more than adequate mintage of 257,000 pieces, the 1872-CC Seated Liberty half dollar is an elusive issue in high grade. This pleasing AU53 specimen retains much of its original mint luster and design detail and the lightly abraded surfaces are blanketed in shades of sea-green and lavender-gray toning. Population: 5 in 53, 17 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 24K8, PCGS# 6334

**1875-S Half Dollar, MS66
Sharply Struck and Lustrous**

6443 1875-S MS66 PCGS. CAC. Generous luster flows throughout the rose-gray surfaces on each side of this Premium Gem 1875-S, one of the finest survivors of the large mintage of 3.2 million pieces in San Francisco during 1875. These coins were meant to circulate in the hard-money West, and circulate they did. This piece is tied with 12 other submissions in MS66 at PCGS and is bested by a sole example (8/13). Marks are minimal throughout both sides of this piece, and the strike is sharp yet not full, showing near-complete star centrils on the obverse and decent detailing on the eagle feathers. NGC ID# 24KF, PCGS# 6351

1878-S Seated Liberty Half, Fine 15
Only 12,000 Pieces Struck, Fewer Than 50 Extant
Rare Series Key

6444 1878-S Fine 15 PCGS. Only 12,000 Seated Liberty dollars were struck at the San Francisco Mint in 1878, down from a mintage of over 5 million pieces the year before. The reason for this drastic decline was the introduction of the Morgan dollar, mandated by the Bland-Allison Act which required the government to purchase huge amounts of silver for coinage into silver dollars. Nearly 10 million Morgan dollars were struck at San Francisco in 1878, and similar production totals were reported at the other mints over much of the next 15 years.

The 1878-S has been known as a key date in the Seated Liberty half dollar series since Augustus Heaton published his treatise on mint marks in 1893. Heaton called the 1878-S “the *great rarity* of the San Francisco Half Dollar coinage.” Before Heaton published his masterpiece, few collectors considered branch mint coins to be important separate issues. Most numismatists collected date runs of their favorite series, saving a single coin of each date without regard for which mint it represented. Well-financed collectors preferred to order proof sets each year from the Philadelphia Mint to keep their collections current. As a result, few examples of the 1878-S were saved by contemporary collectors. The 1878-S is rare in all grades today, and most examples seen are in low-to-mid circulated grades. Randy Wiley and Bill Bugert rate the 1878-S as High R.6 in F/VE. PCGS and NGC have combined to certify 40 coins in all grades, including an unknown number of resubmissions and crossovers (8/13).

The 1878-S began appearing at auction soon after Heaton’s work was distributed. An early appearance was the New Jersey Collection (Edouard Frossard, 3/1898), lot 568:

“1878 San Francisco mint. Proof surface, field very slightly chafed; sharp, uncirculated, very rare.”

The coin was purchased by John M. Clapp and later passed to Louis Eliasberg. Recent auction records for the 1878-S include the spectacular MS64 PCGS coin in lot 2476 of the Central States Signature (Heritage, 4/2009) which realized \$184,000.

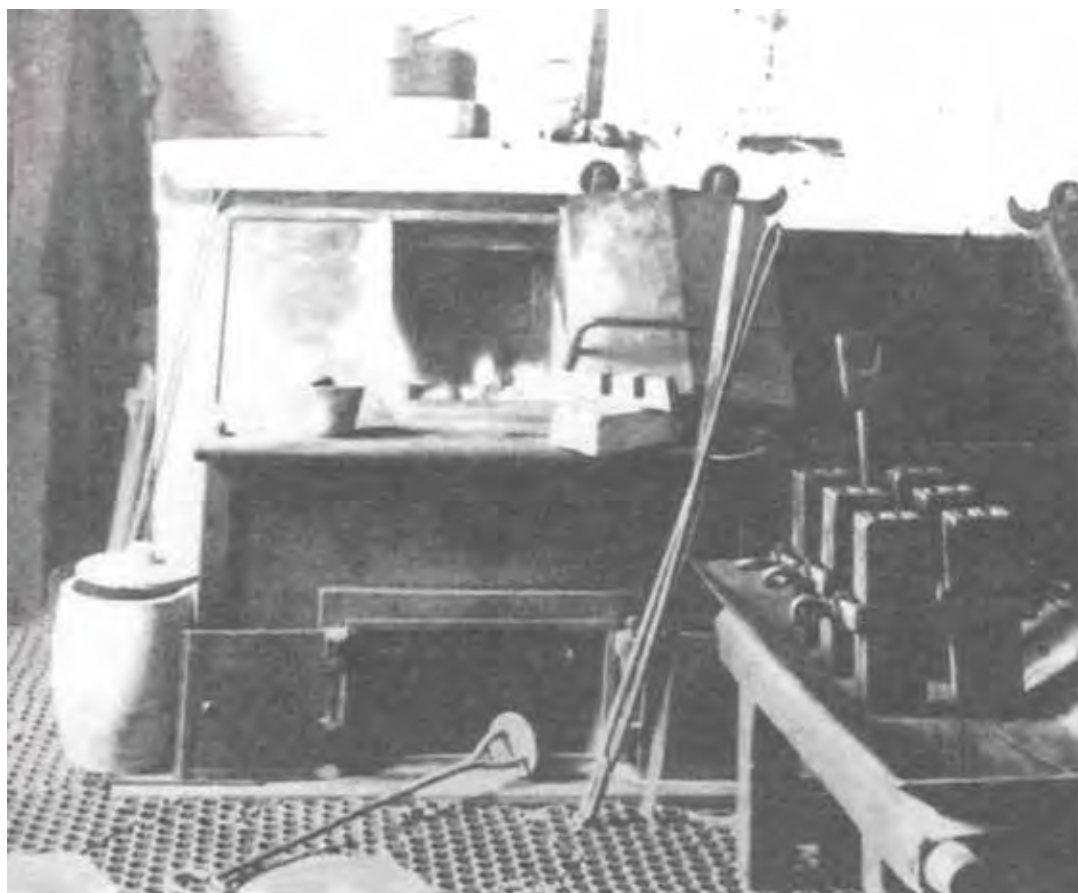

Except for the unique 1866 No Arrows, the seldom encountered 1847/6, and the ultra-rare 1853-O No Arrows issues, the 1878-S is the rarest Seated Liberty half dollar. The present coin is a Choice Fine specimen, with smooth dove-gray and cerulean-blue surfaces that show only minor abrasions. A few traces of prooflike reflectivity are visible in protected areas. The design elements are worn, but they retain a significant amount of interior detail, including the letters L and RTY in LIBERTY. A few obverse planchet flaws on the shield and Liberty’s torso, as struck, can serve as pedigree markers. The diagnostic die chip is visible at the top of the first recessed area in the reverse shield. We expect spirited competition from series specialists when this lot is called. Population: 2 in 15, 18 finer (8/13).

From *The Strawberry Fields Collection*. NGC ID# 24KR, PCGS# 6360

1881 Seated Half, MS66 ★ Prooflike
Sole Finest Prooflike or Deep Mirror Prooflike

6445 1881 MS66 ★ Prooflike NGC. This flashy high grade half dollar is from a low business strike mintage of 10,000 pieces. The obverse is fully brilliant, while the reverse displays peripheral golden-brown and navy-blue patina. Sharply struck and minimally abraded. Census: 1 in 66 ★ Prooflike, 3 finer as 67, none finer as Prooflike or Deep Prooflike, none finer with a Star designation (8/13). PCGS# 86363

PROOF SEATED HALF DOLLARS

1841 Seated Liberty Half, PR64

Possibly Eight Examples Extant

Ex: Eliasberg, Kaufman

6446 1841 PR64 NGC. Our roster suggests that about eight 1841 proof half dollars are known, mostly in the lower numeric range. The present coin is probably second finest. Randy Wiley and Bill Bugert, in the *Complete Guide to Liberty Seated Half Dollars*, write of the 1841 proofs that there are “less than 6 known.” Similarly, in the description of the Louis Eliasberg, Sr. specimen, to which the present NGC-graded PR64 coin is pedigreed, the cataloger writes that about a half dozen are known.

A total of seven 1841 proof half dollars have been certified, five by NGC and two by PCGS:

1841 Proof Half Dollar Roster

1. **Proof.** Smithsonian Institution.
2. **Proof.** American Numismatic Society.
3. **PR65 NGC.** James Kelly (privately, 1946); John Jay Pittman (David Akers, 10/1997), lot 1522, \$44,000; Richmond Collection (David Lawrence, 3/2005), lot 1786, \$47,150; American Numismatic Rarities (9/2005), lot 413; Goldberg Coins (2/2006), lot 1472, \$55,200.
4. **PR64 NGC. The present example.** John G. Mills (S. H. and H. Chapman, 4/1904), lot 896; J.M Clapp; Clapp Estate (1942); Louis Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1919; Phil Kaufman; FUN Signature (Heritage, 1/2008), lot 3021, realized \$46,000.
5. **PR64 NGC.** Superior (5/1990), lot 3803, \$30,800; Long Beach Signature (Heritage, 5/2008), lot 718; realized \$69,000.
6. **PR62.** Charles A. Cass; Empire Collection (Stack's, 11/1957), lot 1352, \$110; Reed Hawn (Stack's 8/1973), lot 137, \$2,100; Auction '81 (RARCOA), lot 137, \$1,550; Auction '90 (Stack's), lot 210, \$8,800; Stack's (3/2007), lot 849.
7. **PR62 PCGS.** Dr. R. H. Wilson; 1952 ANA (New Netherlands), lot 310; Elliot Landau (New Netherlands, 52nd Sale, 12/1958), lot 575; Dr. James O. Sloss (Bowers and Merena, 1/1999), lot 1137.
8. **PR61 PCGS.** Bowers and Merena (7/2005), lot 550, \$16,675; Philadelphia Signature (Heritage, 8/2012), lot 5154.

Additional Appearances

- A. **Proof.** David Golding (Stack's, 6/1952), lot 232.
- B. **Proof.** Gustav Lichtenfels Collection (Kreisberg and Schulman, 2/1961), lot 2806. “Brilliant Proof. Sharp square edge. One of the very few in existence. Rare.” Not plated.
- C. **Proof.** Capitol Collection (Amwest, 7/1981).
- D. **Proof.** George H. Earle Collection (Henry Chapman, 6/1912), lot 2970.

On the reverse, several of the vertical lines in the shield extend entirely through the horizontals to the top of the shield. Complete definition is visible on the design elements of this lovely near-Gem proof example from the Eliasberg and Kaufman collections. Moreover, they are impressively highlighted by the deeply mirrored fields, and stand out as the coin is rotated under a light source. Delicate powder-blue and lilac toning resides on each side, and the well-preserved surfaces reveal just a few faint hairlines interspersed among die polish lines in the fields. The only pedigree marker that we can locate occurs on Liberty's right (left facing) arm above the elbow.

Ex: FUN Signature (Heritage, 1/2008), lot 3021, realized \$46,000. PCGS# 6385

1842 Seated Liberty Half, PR65
Only Seven Proofs Verified
Second-Finest Known, Ex: Norweb

6447 1842 Small Date, Large Letters, PR65 NGC. Ex: Norweb. The obverse is toned in attractive champagne-golden shadings while the reverse is much deeper with mottled blue and gray coloration over that side. A tiny identifying nick is seen in the fields near the drapery; otherwise, the surfaces are exceptionally clean and problem-free. According to Walter Breen, only four proofs exist. However, we have investigated this date and have come to the conclusion that there are seven unquestioned proofs.

1. PR66 NGC. R. Green; John Jay Pittman (David Akers, 5/1998), lot 1524; Philip Kaufman Collection (Heritage, 4/2008), lot 2381.

2. PR65 NGC. The Norweb Specimen. Purchased by Albert Fairchild Holden circa 1908; Norweb III (Bowers and Merena, 11/1988), lot 3131, where it realized \$14,300; Rarities Sale (Bowers and Merena, 8/1999), lot 201; Central States Signature (Heritage, 5/2003), lot 6776, realized \$43,700; FUN Signature (Heritage, 1/2006), lot 3197, where it brought \$43,125; **the present coin.**

3. PR64 PCGS. F.C.C. Boyd; Worlds Greatest Collection (Numismatic Gallery, 4/1945), lot 255; 1946 ANA (Numismatic Gallery, 8/1946), lot 816; Berbert-Roe Collections (Stack's, 3/1965), lot 443; Richmond Collection (David Lawrence, 3/2005), lot 1787; FUN Signature (Heritage, 1/2012), lot 3246.

4. PR64 NGC. Oscar Schilke proof set; Paul Kagin; Central States Signature (Heritage, 4/2012), lot 5002.

5. PR63 NGC. Eliasberg Collection (Bowers and Merena, 4/1997), lot 1922; Chicago Signature (Heritage, 8/2011), lot 7173.

6. Proof. American Numismatic Society.

7. Proof. Smithsonian Institution.

Like the proof quarters of the same date, proof 1842 halves were all struck from Small Date dies. A Large Date variant was reportedly offered in the Brand-Lichtenfels Sale, but this remains unverified. The difference between the Small Date quarters and halves is that the half dollars are known (but scarce) as business strikes with the smaller date variant. Proof 1842 halves are extremely rare, as one can see from the roster above, and the offering of this coin presents a rare opportunity for the specialist to acquire one of only five pieces known outside institutional holdings. Census: 2 in 65, 1 finer (8/13). PCGS# 6386

**1860 Seated Half, PR65
Fully Struck Prewar Issue**

- 6448** 1860 PR65 NGC. Central silver areas are surrounded by charcoal-gray patina on this fully struck Gem proof 1860 Seated half, the counterpart to the 1861, also in PR65 NGC, in this session. The strike is full throughout and the surfaces show only minimal marks consistent with the grade. Much of the 1,000-piece mintage was melted as unsold, perhaps half. Census: 14 in 65, 27 finer (8/13). NGC ID# 27TK, PCGS# 6414

**1860 Seated Half, PR65 Cameo
Strong Contrast on Each Side**

- 6449** 1860 PR65 Cameo PCGS. CAC. An even 1,000 proof half dollars were struck in 1860, many on speculation that collectors would snap them up if they were available. In part this ploy worked as many more proofs were sold in this year than in the lower-mintage, pre-1858 period. Still, the net mintage after melting at year's end was only 525 proofs. This is a lovely Gem Cameo proof with a fully brilliant and untoned obverse, and a subtly toned reverse with just a hint of pale reddish color. Both sides show excellent contrast. The fields show a few minuscule marks that prevent a higher grade. The reverse is rotated about 20 degrees to the left. Population: 2 in 65 Cameo, 7 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2010), lot 5047. PCGS# 86414

**1861 Seated Half, PR65
Low-Survival Issue**

- 6450** 1861 PR65 NGC. Deep purplish patina on each side fails to subdue the excellent eye appeal, the product of a full, razor-sharp proof strike and surfaces that are free of all but the most minor contact. The first year of the Civil War saw a mintage of 1,000 proof Seated halves, but most were likely melted as unsold; Breen suggests a net distribution of 400 or so, with fewer than 100 surviving today. At any rate, Gems are quite elusive: Census: 16 in 65, 8 finer (8/13). NGC ID# 27TL, PCGS# 6415

**1863 Seated Half, PR65 Cameo
Lightly Toned and Boldly Contrasted**

- 6451** 1863 PR65 Cameo PCGS. CAC. The 1863 proof Seated Liberty half dollar was struck at the height of the Civil War. With all the economic stresses that conflict caused only a token mintage of 460 pieces was accomplished. This sharply detailed Gem exhibits bold field-device contrast and the unmarked surfaces are visited by shades of pale jade toning. Population: 5 in 65 (1 in 65+) Cameo, 2 finer (8/13). PCGS# 86417

**1864 Seated Half, PR65 Cameo
Only 470 Pieces Struck**

- 6452** 1864 PR65 Cameo PCGS. In World War II, the Philadelphia Mint stopped producing proofs as part of the overall campaign to overhaul the facility's procedures and compositions. During the Civil War, however, proof coinage continued largely unimpeded, though anxiety over the war's direction and the general economic hardship of the time depressed mintages. In 1864, production of proof halves consisted of just 470 pieces.
A singularly attractive specimen, this is one of only two Cameo examples graded PR65 by PCGS, with none finer (8/13). A thin layer of golden toning with whispers of haze graces gleaming fields, and the ivory-tinged devices offer bold detail and considerable frost. This fantastic Gem is beautifully preserved with eye appeal to match. PCGS# 86418

**1868 Half Dollar, PR66 Cameo
Light Rim Toning**

6453 1868 PR66 Cameo PCGS. CAC. Frost-white devices are ringed with boldly mirrored fields and a thin accent of reddish patina near the margins, creating an attractive “cameo with toning” appearance. The strike is full throughout. The 600 proofs struck of this issue complement a business-strike mintage of 417,000 pieces. Population: 1 in 66 Cameo, 1 finer (8/13). PCGS# 86426

**1869 Seated Liberty Half, PR66 Cameo
Only One Finer Coin at PCGS**

6454 1869 PR66 Cameo PCGS. CAC. The mintage of 600 proofs suggests a greater availability than is actually found for this date, especially among Cameo coins. Only 26 grading events have been recorded by both of the major services from PR61 through PR67 Cameo (the highest grade accorded). No Deep/Ultra coins have been certified. The fields display deeply reflective proof mirrors that provide a “black” backdrop against the frosted devices. Each side has a slight overlay of pinkish-rose patina. An extraordinarily attractive, early With Motto proof half. Population: 3 in 66 Cameo, 1 finer (8/13). PCGS# 86427

**1873 Closed 3, No Arrows Half, PR66
Great Type Coin**

6455 1873 No Arrows PR66 NGC. All of the No Arrows half dollar proofs of 1873 are of the Closed 3 variety, struck to the extent of 600 pieces. This Premium Gem proof example shows dusky copper-rose and silver-gray patina that is somewhat deeper on the reverse, where a hint of blue-green also appears. A great-looking type coin for the No Arrows coinage, with an excellent strike and no mentionable contact. Census: 19 in 66, 3 finer (8/13). NGC ID# 27U8, PCGS# 6431

**1879 Half Dollar, PR67 ★ Cameo
Scarce, Low Total-Mintage Date**

6456 1879 PR67 ★ Cameo NGC. Type Two Reverse. Only 1,100 proofs and 5,900 business strikes were made in this low-mintage year, because of the enormous silver dollar coinage. Curiously for an issue with so few proofs, the drapery at the elbow is nearly absent, due to apparent lapping of the die. Distractions are expectedly lacking as well, save for strike weakness on the eagle's left (facing) claw. Census: 9 in 67 (1 in 67+) Cameo, 1 finer (8/13). PCGS# 86440

**1888 Seated Liberty Half, PR65 Cameo
Frosty, Boldly Contrasted Devices**

6457 1888 PR65 Cameo PCGS. CAC. Exciting cameo contrast is noted on both sides of this Cameo Gem. The centers are very nearly untuned while some light cinnamon coloration clings to the rims. The fields are nearly free of toning, providing stark black and white contrast. A bold strike defines each detail and consistent with the Gem grade, there is nary a mark worthy of individual mention. Population: 12 in 65 Cameo, 2 finer (8/13). Ex: FUN Signature (Heritage, 1/2008), lot 1639. PCGS# 86449

1888 Seated Half, PR67 Cameo
Distinctive Peripheral Toning

6458 1888 PR67 Cameo NGC. Only 832 Seated Liberty half dollars were struck in 1888, and this magnificent Superb Gem is one of the finest survivors. The sharply detailed design elements are richly frosted and contrast boldly with the deeply mirrored fields. Crescents of cobalt-blue and lime-green toning grace the peripheries. Census: 3 in 67 Cameo, 0 finer (8/13). PCGS# 86449

BARBER HALF DOLLARS

1901 Barber Half, MS65
Elusive Gem Issue

6459 1901 MS65 PCGS. CAC. Mottled olive, gold, and pinkish tones grace each side of this well-struck 1901 Barber half. The reverse contributes some smoky hues along with mottled silver areas, but the strike is quite sharp throughout. Despite its status as a relatively high-mintage P-mint issue, the 1901 is elusive in Gem and finer grades. Population: 8 in 65, 6 finer (8/13). NGC ID# 24MC, PCGS# 6489

1904-S Half Dollar, XF45
A Condition Rarity in the Series

6460 1904-S XF45 PCGS. CAC. The medium-intensity tan-gray surfaces of this Choice XF half dollar display relatively strong definition, except for the upper-right shield corner which is nearly always weak. The minute marks scattered about are fewer and less severe than might be expected for the designated grade. This is a difficult date in all grades and a major condition rarity in Mint State. Population: 13 in 45, 64 finer (8/13). NGC ID# 24MP, PCGS# 6500

1904-S Half Dollar, AU53
Well-Preserved Surfaces

6461 1904-S AU53 PCGS. CAC. The 1904-S is widely known as one of the keys to the Barber half series in Uncirculated, making this Almost Uncirculated example a terrific value. The surfaces are light, even gray with brightness in the reverse fields. Significant luster surrounds the devices and there are no obvious or detracting abrasions on either side, making this an especially desirable and well-preserved piece. Population: 12 in 53, 46 finer (8/13). *From The Strawberry Fields Collection.* NGC ID# 24MP, PCGS# 6500

**1904-S Half Dollar, MS63
Regular-Issue Barber Key**

6462 1904-S MS63 NGC. The 1904-S is the undisputed series rarity in Mint State grades, second only to the near-uncollectible 1892-O Micro O, a variety that many collectors exclude from their sets anyway. Ranking the 1904-S an R.6 in Mint State (population of 15-39 coins), David and John Feigenbaum say in *The Complete Guide to Certified Barber Coinage*, "1904-S is not only the scarcest regular issue in the half dollar set, but it also has a far lower population than the 1901-S quarter and 1895-O dime. Its rarity is usually not appreciated until you try to assemble a set and you can't find one, even after years of looking. Trying to purchase one at auction is an eye-opening experience."

This Select example has swirling luster and a delightful peripheral ring of original amber-gold and ice-blue on the obverse that complements the silver surfaces elsewhere. While a couple of slide marks and ticks on Liberty's cheek preclude a finer grade, the strike is bold, just short of full, and the eye appeal is over the top. Expect the bidding to be fierce, and act accordingly. Census: 4 in 63, 7 finer (8/13).

Ex: *The Southwest Collection / Long Beach Signature* (Heritage, 2/2008), lot 684.

From *The Owen Collection, Part II*. NGC ID# 24MP, PCGS# 6500

**1907 Half Dollar, MS66
Lightly Toned**

6463 1907 MS66 PCGS. CAC. Silver interiors give way to delicate apricot overtones at the peripheries on both sides. Only a touch of softness is visible on the eagle's talons, a better state than the norm. This impressively preserved Premium Gem is housed in a green label holder. Population: 3 in 66, 1 finer (8/13). NGC ID# 24MY, PCGS# 6508

**1907-S Barber Half, MS63
With Gold CAC Label, Sharp and Appealing**

6464 1907-S MS63 PCGS. Gold CAC. Certified in an early small-size PCGS holder, this 1907-S Barber half certified MS63 with the Gold CAC label should find a ready audience of willing bidders. The surfaces are silver-white in the centers with a light ring of golden rim toning around each side, a totally original look. The strike is sharp save for on the upper-right shield corner, and marks are minimal throughout. The 1907-S issue is an elusive and underrated issue in the series. Population: 11 in 63, 23 finer (8/13). NGC ID# 24N3, PCGS# 6511

PROOF BARBER HALF DOLLARS

1892 Half Dollar, PR67 Cameo Tied for Finest at PCGS

- 6465 1892 PR67 Cameo PCGS. CAC.** This is a sensational Superb Gem Cameo proof example of the first year of issue for the Charles Barber design that also appeared on dimes and quarters in 1892. Was it just a coincidence that the new design appeared in time for the 1893 Columbian Exposition? The Philadelphia Mint coined 1,245 proofs in 1892, the only four-figure proof mintage of the design. This piece has delightful silver brilliance with frosty devices and deeply mirrored fields that combine to impart an exceptional cameo appearance. Both sides exhibit delicate peripheral gold toning. Population: 4 in 67 Cameo, 0 finer (8/13). PCGS# 86539

1892 Half Dollar, PR65 Deep Cameo Exceptional First-Year Barber Proof

- 6466 1892 PR65 Deep Cameo PCGS.** The Barber design was introduced in 1892 and a generous mintage of 1,245 proof half dollars was accomplished, anticipating strong demand for the new coins. This sharply detailed Gem displays richly frosted devices and deeply mirrored fields that create a profound cameo effect when the coin is tilted in the light. Pleasing shades of pale gold toning blanket the well-preserved surfaces. Population: 2 in 65 (1 in 65+) Deep Cameo, 8 finer (8/13).
From *The Searight Collection*. PCGS# 96539

1893 Half Dollar, Richly Toned PR67

- 6467 1893 PR67 NGC. CAC.** The central obverse is untuned silver-white and well-contrasted, complementing accents of charcoal-gray and pale aqua at the rims. The reverse displays equal contrast but more extensive color, with pastel saffron, jade, pink, and aqua competing for territory. Minor strike weakness appears on the upper-right shield corner, but a loupe reveals essentially no sign of contact and excellent preservation and eye appeal. Census: 18 in 67, 2 finer (8/13).
From *The Strawberry Fields Collection*. NGC ID# 24NV, PCGS# 6540

1893 Half Dollar, PR66+ Cameo All-Brilliant and Deeply Mirrored

- 6468 1893 PR66+ Cameo PCGS. CAC.** The number of proofs produced in the second year of Charles Barber's design dropped significantly to 792 pieces, down from 1,245 pieces the previous year. This is an all-brilliant proof with deep mirroring in the fields. The devices are strongly contrasted with significant mint frost that provides the cameo effect. The surfaces are immaculately preserved, as one would expect from the grade. Population: 21 in 66 (3 in 66+) Cameo, 5 finer (8/13). PCGS# 86540

1894 Barber Half Dollar, PR67 Cameo
Important Condition Rarity, Stunning Contrast

6469 1894 PR67 Cameo NGC. The proof 1894 Barber half dollar is the second most available proof date of the series, but examples in PR67 Cameo are rare. Stunning field-motif contrast invigorates both sides, yielding a white-on-black appearance. The strike is strong throughout, enhancing the coin's magnificent eye appeal even more. Close examination reveals no distracting marks or hairlines. Census: 13 in 67 Cameo, 2 finer (8/13). PCGS# 86541

1900 Half Dollar, PR66+ Cameo
Clear and Convincing Contrast

6472 1900 PR66+ Cameo PCGS. CAC. An amazing Premium Gem Cameo proof, this piece represents the final year of coinage at the second Philadelphia Mint facility, and one of the last years of proof coinage before Mint officials discouraged production of contrasting proofs. Both sides of this borderline Deep Cameo specimen have pristine, nearly flawless surfaces with deeply mirrored fields and highly lustrous devices. Essentially untoned. Population: 16 in 66 (4 in 66+) Cameo, 6 finer (8/13). PCGS# 86547

1900 Barber Half, PR66 Cameo
912 Examples Struck

6470 1900 PR66 Cameo NGC. The sharply detailed design elements of this spectacular Premium Gem exhibit rich mint frost that contrasts boldly with the mirrored fields. The mostly brilliant surfaces show a few hints of champagne-gold and cerulean-blue toning, with no mentionable signs of contact. Eye appeal is terrific. Census: 24 in 66 (1 in 66+) Cameo, 12 finer (8/13). PCGS# 86547

1903 Barber Half, Brightly Mirrored PR67
Colorful Specimen

6473 1903 PR67 NGC. This deeply, distinctly toned Superb Gem proof has primarily blue, green, and violet hues across each side. The obverse has colors blending into each other with a touch of peach toward the right, while the reverse exhibits a more concentric pattern with rose in the middle and orange northeast of that. The mirrored fields flash brightly still and enliven the multiple shades of toning. Census: 23 in 67, 3 finer (8/13). NGC ID# 24P7, PCGS# 6550

1900 Half Dollar, PR66 Cameo
Strong Eye Appeal

6471 1900 PR66 Cameo NGC. Mint records indicate 912 proof half dollars were struck in 1900, but few survivors can match the present coin for eye appeal and cameo contrast. White-on-black field-motif contrast reaches out to the observer and the strike is sold throughout. An occasional hairline in the fields might preclude an even higher numerical grade. Census: 24 in 66 (1 in 66+) Cameo, 12 finer (8/13). PCGS# 86547

1910 Half Dollar, PR67 Cameo
Contrasted and Colorful

- 6474** 1910 PR67 Cameo PCGS. Variegated shades of green, rose, and gold appear over both sides of this beautiful later proof Barber half dollar. The mildly frosted central devices and watery fields are in pleasing contrast, a seldom-seen state for this post-1902 issue of the brilliant era. Razor-sharp design details and impeccable surface preservation round out this Cameo Superb Gem specimen, one of the finest-known survivors from a low mintage of only 551 proof pieces. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (8/13).
Ex: Long Beach Signature (Heritage, 5/2008), lot 797.
From The Owen Collection, Part II. PCGS# 86557

1915 Barber Half, PR66
Brilliant and Close to Cameo Contrast

- 6475** 1915 PR66 PCGS. This is a lovely Premium Gem proof Barber half. The glittering surfaces reveal mildly frosted devices and highly reflective fields; the coin just barely misses qualifying for the coveted Cameo designation. Sharply struck and impressively preserved, with faint slide marks on Liberty's cheek that are noticed only under magnification. Population: 12 in 66, 8 finer (8/13).
Ex: Central States Signature (Heritage, 5/2007), lot 883. NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

1917-S Walking Liberty Half, MS66+
Finest Reverse Mintmark Example at PCGS

- 6476** 1917-S Reverse MS66+ PCGS. CAC. The Walking Liberty half dollar design was modified slightly partway through the year in 1917 by moving the mintmark to the reverse. The 1917-S Reverse claims a substantial mintage of more than 5.5 million pieces, but the majority of the mintage was released into circulation and few high-grade examples were saved by contemporary collectors. Accordingly, the 1917-S Reverse is quite rare in grades above the Gem level.

This spectacular high-end Premium Gem exhibits an unusually sharp strike for an early series issue, with strong emerging detail evident on Liberty's head and wreath hand. The brilliant surfaces radiate vibrant mint luster and no mentionable signs of contact are present. Eye appeal is terrific. Population: 9 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 24PU, PCGS# 6573

1918-D Half Dollar, MS64
Elusive in Finer Grades

6477 1918-D MS64 PCGS. Subtle splashes of gold toning appear on both sides of this predominately brilliant silver-white Choice Mint State half dollar. The strike is typical of the early Denver Mint issues with central weakness. The 1918-D is relatively plentiful at the grade level, but seldom found in higher grades. PCGS has only certified 30 finer examples (8/13). NGC ID# 24PW, PCGS# 6575

1919-D Walking Liberty Half, MS62
Low-Mintage Key Issue

6478 1919-D MS62 PCGS. The 1919-D half dollar is well-known as a condition rarity in Mint State grades. The strike is soft on the higher portions of the central devices, as commonly seen. This example exhibits very few marks, all of them minor. Toning in shades of gold along with accents of rose, appears on both sides. NGC ID# 24PZ, PCGS# 6578

1921-D Half Dollar, Lightly Toned AU53

6479 1921-D AU53 PCGS. Light wear over the high points is to be expected for this mid-grade Walker that displays nice design detail save for the central areas. Faint reddish-tan and powder-blue toning covers the surfaces on both sides of this better-date issue, neither of which reveals singular or heavy marks worthy of mention. A rather attractive piece overall. NGC ID# 24R7, PCGS# 6584

1935 Half Dollar, MS67
Excellent Eye Appeal

6480 1935 MS67 PCGS. CAC. Although the 1935 Walking Liberty half dollar sports a hefty mintage of more than 9 million pieces, very few examples have achieved the Superb Gem level. PCGS has graded just 36 such pieces, including the present offering, and two examples are finer (8/13). While not fully struck, Liberty's thumb displays a modicum of detail, as do the eagle's breast feathers and trailing leg; these areas are invariably weak on most survivors. Additionally, both sides yield bright luster, are nicely preserved, and essentially color free. The CAC label affirms the superior eye appeal. NGC ID# 24RJ, PCGS# 6595

1935 Half Dollar, MS67
Brilliant, Untoned Surfaces

6481 1935 MS67 PCGS. CAC. This Superb Gem is fully brilliant with frosty silver luster and exceptional eye appeal. The surfaces are pristine with no marks of note on either side. Nearly 10 million of these coins were minted, but few survive at this preservation level. Population: 35 in 67 (1 in 67+), 1 finer (8/13). NGC ID# 24RJ, PCGS# 6595

1937-S Half Dollar, MS67
Condition Rarity

6482 1937-S MS67 PCGS. Light chestnut toning graces parts of this lustrous and beautifully preserved Superb Gem. The strike is decidedly above-average for a San Francisco Walker, as the head is needle-sharp and the skirt lines are nearly complete. The thumb is separated, although the branch hand shows the expected blending of detail. Population: 26 in 67 (1 in 67+), 0 finer (8/13). Ex: ANA Signature (Heritage, 8/2007), lot 1097. NGC ID# 24RT, PCGS# 6603

**1938-D Walker, Brilliant MS67
Exceptional Mint Frost**

6483 1938-D MS67 PCGS. Less than half a million 1938-D halves were produced, making it the undisputed key to the late-date Walkers. Superb examples are notably difficult to locate, as series specialists know all too well. This is an all-brilliant piece that shows full definition on the skirt lines. The mint frost is truly exceptional, actually more like an S-mint than a Denver product. Population: 33 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 24RV, PCGS# 6605

**1943-S Walker, Exceptional MS67
Almost Fully Struck**

6486 1943-S MS67 PCGS. For the past 30 years or so the S-mint Walkers from the 1940s have been recognized as the true keys to the Short Set. The 1943-S is one of more difficult issues. This is a highly lustrous example that shows remarkable definition (for an S-mint). A split can be seen between the thumb and forefinger, and just a couple of the skirt lines are incomplete. Population: 30 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 24SB, PCGS# 6620

**1939-S Half Dollar, MS67+
Vibrant Luster and Impeccable Preservation**

6484 1939-S MS67+ PCGS. CAC. The 1939-S Walker claims a mintage exceeding 2.5 million pieces and should prove easy to obtain through Premium Gem. MS67 specimens are scarce and will require more diligent searching. This MS67+ is one of only three so graded at PCGS (8/13). Both sides are awash with vibrant luster and very well-preserved. The design elements are typically struck, showing a modicum of detail in the branch hand and well-struck breast feathers. Great overall eye appeal, affirmed by the CAC sticker. NGC ID# 24RY, PCGS# 6608

**1945-S Half Dollar, MS67
Tied for Finest Certified**

6487 1945-S MS67 PCGS. Knob S. A snow-white Superb Gem that provides dynamic luster and essentially immaculate preservation. The skirt lines are sharply struck, though the fingers of the branch hand are indistinct, as usual for a San Francisco wartime Walker. None are graded higher at either major service. Population: 13 in 67, none finer (8/13). NGC ID# 24SH, PCGS# 6626

**1941-S Walking Liberty Half, MS66+
Condition Rarity, Seven Finer at PCGS**

6485 1941-S MS66+ PCGS. CAC. The 1941-S Walking Liberty half is the foremost condition rarity from the 1940s in the series. This MS66+ PCGS coin is one of only 25 such at PCGS with seven finer in MS67, and those Superb Gems go for five-digit sums on the rare occasions when they appear at auction at all. So this MS66+ example with the CAC sticker offers most of the benefits of an MS67, while avoiding one major drawback. The strike is well brought up on the head and lower skirt lines of Liberty, but softness appears on the central hand and thumb, and oppositely on the lower eagle feathers. The surfaces show excellent preservation overall, mostly brilliant on the reverse with pale golden-brown on the obverse. A great-looking coin. NGC ID# 24S5, PCGS# 6613

**1945-S Half Dollar, MS67
Only Four With CAC Seal**

- 6488 1945-S MS67 PCGS. CAC.** Knob S. Only a trace of golden patina visits this thoroughly lustrous and magnificently preserved World War II Walker. Well struck for the San Francisco facility, since the thumb of the branch hand is distinct, though the other fingers blend together. The cheek and skirt lines are nearly fully defined. The 1945-S is plentiful in typical Mint State but at the MS67 level, NGC and PCGS have combined to certify only 40 pieces with none finer. Among that two score, just four coins possess a CAC seal, including the present Superb Gem. Population: 13 in 67, 0 finer (8/13). NGC ID# 24SH, PCGS# 6626

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Walking Liberty Half, PR65
In-Demand First Proof Issue**

- 6489 1936 PR65 PCGS.** An attractive Gem representative of the first proof Walking Liberty half dollar, with the expected razor-sharp definition on all design elements and somewhat hazy reflective fields. The surfaces show accents of champagne-gold patina on both sides, with a few minor hairlines and contact marks. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR67
Popular First-Year Proof Issue**

- 6490 1936 PR67 NGC. CAC.** A gorgeous, beautifully struck example of the first-year Walking Liberty half proof, this Superb Gem is among the numerically finest graded survivors of the issue at both NGC and PCGS, save for a single PR68 PCGS example (8/13). This lovely piece displays champagne-pink patina in the centers complementing iridescent rim tones that include gold, jade, rose, and cherry. NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLARS

1949-D Franklin Half, MS66 Full Bell Lines Among the Finest Certified

- 6491** 1949-D MS66 Full Bell Lines PCGS. The 1949-D Franklin half dollar tends to be a well-struck issue. Consequently, the certified population in high grades includes several thousand Full Bell Line coins through the Gem level of preservation. The FBL population drops precipitously in the lofty grade of MS66, however. Indeed, PCGS and NGC have graded only 35 such Premium Gems. Lustrous surfaces display accents of forest-green and reddish-gold at the margins. Exceptionally well-preserved. Population: 31 in 66 Full Bell Lines, 0 finer (8/13). NGC ID# 24SU, PCGS# 86654

1949-D Half Dollar, MS66 Full Bell Lines None Certified Finer at PCGS

- 6492** 1949-D MS66 Full Bell Lines PCGS. CAC. The 1949-D Franklin half is well-struck, so that most high-grade examples bear the Full Bell Lines designation, but the Premium Gem level is as good as it gets at both PCGS and NGC. This top-drawer PCGS example shows mottled russet patina throughout the obverse, while the reverse shows a silver center and a tad of grayish and iridescent patina near the rims. Population: 31 in 66 Full Bell Lines, 0 finer (8/13). NGC ID# 24SU, PCGS# 86654

1950-D Half Dollar, MS66+ Full Bell Lines Top-Tier Condition Rarity

- 6493** 1950-D MS66+ Full Bell Lines PCGS. CAC. The obverse is largely silver with a crescent of gold-orange at the bottom and left, while the reverse offers extensive gold-gray, russet, and powder-blue toning with a partial woodgrain pattern. The lines on the Liberty Bell are clear and the surfaces are carefully preserved. The 1950-D half dollar may seem to be only scarce or so in MS66 Full Bell Lines, but this is largely an artifact of numerous resubmissions, and the October 2012 price record of \$17,265 for this issue in MS66+ Full Bell Lines condition proves the demand for examples that tiny bit better. Population: 54 in 66 (3 in 66+) Full Bell Lines, 0 finer (8/13). NGC ID# 24SX, PCGS# 86657

PROOF FRANKLIN HALF DOLLAR

1962 Half Dollar, Stunning PR69 Deep Cameo

6494 1962 PR69 Deep Cameo PCGS. With more than 3 million proof Franklins struck in 1962, a relatively large number of coins are available in the market, including those with a Cameo or Deep Cameo finish. That said, Deep Cameo pieces in the lofty numerical grade of PR69 are highly elusive. Indeed, PCGS and NGC combined have graded fewer than 35 examples at this level. Stunning white-on-black contrast shows over both sides, and each is virtually pristine, as expected. Population: 11 in 69 Deep Cameo, 0 finer (8/13). NGC ID# 27VK, PCGS# 96703

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 12
Three Leaves Reverse, B-5, BB-27

6495 1795 Flowing Hair, Three Leaves Fine 12 PCGS. B-5, BB-27, R.1. Stone-white motifs contrast with dark gray fields. Minor obverse rim nicks are noted at 8 and 12 o'clock, and the portrait has a single thin mark behind the mouth, but the moderately glossy fields are without any reportable abrasions. The Flowing Hair type was coined for just two years. NGC ID# 24WZ, PCGS# 6852

1795 B-5, BB-27 Dollar, Fine 15
Three Leaves Reverse

6496 1795 Flowing Hair, Three Leaves Fine 15 PCGS. B-5, BB-27, R.1. Scattered marks are visible on both sides of this pleasing dollar. Light silver-gray devices rest on pewter-gray fields with exceptional eye appeal. Hints of gold toning at the borders frame the design motifs. A popular variety for date and type collectors. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, VF30
Rare B-12, BB-26 Variety

6497 1795 Flowing Hair, Three Leaves VF30 NGC. B-12, BB-26, R.6. Bowers-Borckardt Die State III. The rare BB-26 variety is recognized by the wide space between I and B in LIBERTY and the die crack through 7 in the date. This was the only use of this obverse die. The BB-26 was designated "excessively rare" by Haseltine, but a few more specimens have surfaced over the years. This pleasing VF30 example displays attractive shades of gray, gold, and lavender patina, with some light adjustment marks on the obverse rim and corresponding areas of weakness on the reverse. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, VF35
Three Leaves Reverse, B-5, BB-27

6498 1795 Flowing Hair, Three Leaves VF35 PCGS. B-5, BB-27, R.1. The diagonal bar behind the top hair curl identifies this plentiful variety that represents about one-third of all 1795 Flowing Hair silver dollars. That fact points to the B-5, BB-27 silver dollar as the ideal type coin to represent the Flowing Hair design, the first design for the denomination. This piece has pewter-gray surfaces with lighter gray devices showing only trivial, grade-consistent marks. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, VF35
Three Leaves Reverse, B-6, BB-25

6499 1795 Flowing Hair, Three Leaves VF35 PCGS. B-6, BB-25, R.3. Identified by the lower curl ending northwest of star 1, and the four leaves below the first S in STATES. Well-centered design elements display nice detail, and the relatively clean gray surfaces are visited by wisps of cobalt-blue, gold, and lavender. Light adjustment marks are noted at the reverse margins. Ex: Long Beach Signature (Heritage, 2/2007), lot 3586. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, AU50
Three Leaves, B-5, BB-27 Variety

6500 1795 Flowing Hair, Three Leaves AU50 ANACS. B-5, BB-27, R.1. Bowers-Borckardt Die State III. The 1795 Flowing Hair dollar is extremely important to type collectors because the 1794 issue, the only other representative of the type, is so rare and expensive. The 1795 claims a substantial mintage of 160,295 pieces, with 17 different die varieties known for the date and type. This coin represents the most common BB-27 variety, with the “bar” in the obverse field near the top curl. The Flowing Hair design was replaced by the Draped Bust motif later in the year.

The present coin is an attractive AU specimen that retains much of its original design detail and displays traces of mint luster in sheltered areas. The BB-27 is almost always softly detailed in the centers, because the portrait was engraved in high relief. This coin shows a better-than-average strike and little actual wear, with highlights of gold, lavender-gray, and blue-steel toning. The pleasing surfaces are lightly abraded and show no sign of planchet adjustment marks.

From *The Joan Carroll Collection*. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, XF40
Two Leaves, B-1, BB-21

6501 1795 Flowing Hair, Two Leaves XF40 PCGS. B-1, BB-21, R.2. Bowers-Borckardt Die State I without clash marks near the profile. Delicate honey-gold and ice-blue toning visits this much better grade Flowing Hair type coin. Luster glimmers from design elements, and only light wear is apparent on the eagle's breast and Liberty's cheek and curls. The fields have a cloudy, semiprooflike quality. The central reverse displays moderate adjustment marks, as issued. Additional adjustment marks at the reverse periphery can hardly be distinguished. Minimally abraded, though a couple of hair-thin lines near the chin and above the eagle's head are noted for pedigree purposes. NGC ID# 24WZ, PCGS# 6853

**1795 Flowing Hair Dollar, XF40
Seldom-Seen B-13, BB-24 Variety**

- 6502** 1795 Flowing Hair, Two Leaves XF40 ANACS. B-13, BB-24, R.5. Bowers-Borckardt Die State I. The very scarce BB-24 variety is identified by the position of the lowest curl just barely missing one point of star 1 and touching a second point, with two berries inside the wreath near the eagle's tail on the reverse. The pleasing surfaces of this lightly worn specimen show a few traces of mint luster in protected areas and some planchet adjustment marks on the upper reverse. NGC ID# 24WZ, PCGS# 6853

**1795 Draped Bust Dollar, AU Details
Off Center, B-14, BB-51**

- 6503** 1795 Draped Bust, Off Center — Polished — NGC Details. AU. B-14, BB-51, R.2. Bowers-Borckardt Die State I. The Draped Bust design was introduced in 1795 and only two die varieties are known for the date and type. This coin represents the Off Center BB-51 variety, with the highest curl of hair under the B in LIBERTY. Almost all original design detail remains intact, but the surfaces have been polished to show an unnaturally bright effect. *From The Joan Carroll Collection.*

**1796 Draped Bust Dollar, VF30
Small Date, Large Letters, B-4, BB-61**

- 6504** 1796 Small Date, Large Letters VF30 PCGS. B-4, BB-61, R.3. Bowers-Borckardt Die State I. A pleasing VF30 specimen of this popular *Guide Book* variety, with well-centered design elements that show moderate wear but retain much of their interior detail. The dark gray surfaces are remarkably free of large abrasions and no adjustment marks are evident. A die dot above the 1 in the date and the Large Letters in the reverse legend identify the BB-61 variety. PCGS# 6860

1796 B-4 Small Date Dollar, Pleasing VF35

- 6505** 1796 Small Date, Large Letters VF35 PCGS. B-4, BB-61, R.3. Die State I. Reiver State a. Serif of 1 far from curl; leaf tip joins left inside base of final A. The upper obverse details are mostly complete, the usual die state for this variety. Later die states have the top hair curls, especially at the forehead, weakened from die lapping. The forehead curl consists of three arcs attached at the top, but isolated in the field. Lovely gray-gold surfaces with a few minor scrapes on each side, not unusual for the grade, and not readily apparent. This variety is easily the most common of the year and is an excellent choice for date or type collectors. Several AU and Mint State examples are known, but like most early dollars, VF and XF are the most regularly seen grades. Despite its status as the most common silver dollar of the date, examples are not easily located. There are six different die varieties known for the 1796 silver dollars, and the current estimated combined population is less than 1,500 coins in all grades, despite higher published figures. Not more than 500 examples of this B-4 die marriage survive. *Ex: Old Roman (eBay, 9/1999); FUN Signature (Heritage, 1/2007), lot 4958. PCGS# 6860*

**1797 10x6 Stars Dollar, B-3, BB-71
Pleasing, Problem-Free VF20**

- 6506** 1797 10x6 Stars, Large Letters VF20 PCGS. B-3, BB-71, R.2. This is the only variety of the three known for the 1797 date that has 10 stars before LIBERTY and six after. Light golden-gray toning evenly covers the surfaces on both sides, and nice definition is apparent on the design elements, including on the dentils. No adjustment marks are visible. *Ex: Long Beach Signature (Heritage, 2/2007), lot 3601. NGC ID# 24X4, PCGS# 6865*

1797 Draped Bust Dollar, XF40
10x6 Stars, B-3, BB-71 Variety

- 6507** 1797 10x6 Stars, Large Letters XF40 NGC. B-3, BB-71, R.2. Bowers-Borckardt Die State III. Ten stars to the left and six to the right is a diagnostic characteristic that identifies the variety. All 1797 silver dollars are elusive, especially in higher circulated grades. Remnants of luster linger on the light silver surfaces, especially on the reverse, with ivory toning on the high points. Central design weakness results from the prominent adjustment marks at the center of the reverse. NGC ID# 24X4, PCGS# 6865

1797 B-1, BB-73 Dollar, XF45
9x7 Stars, Large Letters
Intermediate Die State

- 6508** 1797 9x7 Stars, Large Letters XF45 PCGS. B-1, BB-73, R.3. A delightful early dollar featuring the Draped Bust obverse and Small Eagle reverse design that was introduced in the last quarter of 1795. This Choice XF specimen has deep gray patina with light violet and tan on the devices. Scattered grade-consistent marks are noted on both sides. NGC ID# 24X4, PCGS# 6863

1797 B-1, BB-73 Dollar, XF45
Late Die State

- 6509** 1797 9x7 Stars, Large Letters XF45 NGC. B-1, BB-73, R.3. Die State IV or later, intermediate between B-1b and B-1c. Several die cracks are especially prominent on the obverse with clash marks in the right obverse field. Mostly light silver-gray surfaces exhibit delicate blue-violet toning at the center of the obverse with splashes of darker gray on the reverse. Scattered marks are evident on both sides. NGC ID# 24X4, PCGS# 6863

1797 B-1, BB-73 Dollar, XF45
9x7 Stars, Large Letters

- 6510** 1797 9x7 Stars, Large Letters XF45 PCGS. B-1, BB-73, R.3. Ex: Hesselgesser. Die State II. An early die state with a tiny die flaw in the left obverse field near star 9. There is no evidence of any die cracks on this example. The surfaces of this Choice XF dollar are lightly market, especially before Liberty's profile. Both sides have light gray surfaces with light champagne toning with lighter gold on the devices. NGC ID# 24X4, PCGS# 6863

1797 B-2, BB-72 Dollar, VF20
9x7 Stars, Small Letters

- 6511** 1797 9x7 Stars, Small Letters VF20 PCGS. B-2, BB-72, R.4. Once thought to be a major rarity, this variety is scarce, and it is the most elusive of the three 1797 die marriages. Perhaps as many as 150 to 200 examples survive in all grades, with most falling in the Fine to Very Fine range. Only one die state is recorded in the literature, further pointing to the scarcity of the variety. This splendid example has natural golden-gray and pale blue toning with exceptionally smooth, mark-free surfaces. A few dark toning spots are noted on the reverse. NGC ID# 24X4, PCGS# 6866

1798 Draped Bust Dollar, VF20
Small Eagle, 13 Stars, B-1, BB-82

- 6512** 1798 Small Eagle, 13 Stars VF20 PCGS. B-1, BB-82, R.3. Bowers-Borckardt Die State III. Bolender-1 was likely the final Small Eagle variety struck, since the obverse die was made after the Mint decision to use only 13 stars instead of one for every state. This slightly bright example is mostly pearl-gray with hints of tan, but the obverse border offers sea-green and gold shades. Ex: Long Beach Signature (Heritage, 9/2007), lot 1864. NGC ID# 24X5, PCGS# 6867

1798 Draped Bust Dollar, VF25
Small Eagle, 15 Stars, B-2, BB-81

- 6513** 1798 Small Eagle, 15 Stars VF25 PCGS. CAC. B-2, BB-81, R.3. Bowers-Borckardt Die State II. The only Small Eagle variety of this date with 15 obverse stars. The pleasing gray centers of this evenly worn early dollar yield to darker gray, gold, and blue-steel hues at the peripheries. A few traces of mint luster shine through the patina and only minor abrasions are evident. Population: 15 in 25, 59 finer (8/13). NGC ID# 24X5, PCGS# 6868

1798 B-2, BB-81 Silver Dollar, VF35
Small Eagle, 15 Stars

- 6514** 1798 Small Eagle, 15 Stars VF35 PCGS. B-2, BB-81, R.3. Die State II or slightly later. The second edition of the Bowers Silver Dollar Encyclopedia notes that Die State II has no obverse cracks and that Die State III has "extended obverse cracks," with no further description. This piece has a delicate die crack from the top element of the hair ribbon up to star 7. Faint adjustment marks are evident on the obverse of this pleasing Choice VF specimen. The surfaces are light gray with splashes of deeper gray and pale champagne overtones. NGC ID# 24X5, PCGS# 6868

1798 B-11, BB-111 Silver Dollar, AU53
Middle Die State
Tied for Third Finest Known

- 6515** 1798 Large Eagle, Pointed 9 AU53 PCGS. B-11, BB-111, R.3. Die State V, an intermediate die state with a bulge in the lower right obverse field, with a crack along the bulge, and another crack across the hair above the ear. Eventually these two cracks extend through opposite sides of star 13, providing a dramatic terminal die state.

Although B-11, BB-111 is only moderately scarce, it is rare above VF grades. In fact, the Notable Specimens section of the Bowers *Silver Dollar Encyclopedia* shows no Mint State pieces and only six AU examples. The present piece is unlisted among those specimens and ranks in a third place tie among the best examples of this variety. NGC ID# 24X6, PCGS# 6873

1798 B-17, BB-101 Silver Dollar, AU53
Five Stripes Reverse
Tied for Second Finest Known

- 6516** 1798 Large Eagle, Pointed 9, 5 Stripes, 10 Arrows AU53 PCGS. B-17, BB-101, High R.4. Ex: Cardinal Collection. The Five Stripes reverse was used to coin BB-96 (Knobbed 9) and BB-101 (Pointed 9) silver dollars. The BB-101 is much scarcer of the two, and has a lower census. There are only six AU examples recorded in the second edition of Dave Bowers' *Encyclopedia of United States Silver Dollars 1794-1804*, and only one of those grades finer than this example.

This late die state appears to match Die State V in that reference, the most advanced die state recorded. Die swelling appears in the left obverse and reverse fields with die cracks outside the stars along the left obverse border. Both sides have delicate champagne toning over the silver-gray surfaces with delicate golden peripheries, showing faint splashes of pale blue. The surfaces show minor marks, most notably at the right obverse.

Ex: ANA Signature Sale (Heritage, 8/1995), lot 6511; Cardinal Collection (American Numismatic Rarities, 6/2005), lot 28; Bowers and Merena (10/2005), lot 7008.

From The Joan Carroll Collection. PCGS# 6874

1798 Heraldic Eagle Dollar, Colorful AU53
10 Arrows, Knob 9, B-6, BB-96

- 6517** 1798 Large Eagle, Knob 9, 5 Stripes, 10 Arrows AU53 NGC. B-6, BB-96, R.3. Bowers-Borckardt Die State IV. Vibrant orange-gold, powder-blue, and lime-green toning alternates across this sharply defined Heraldic Eagle dollar. Refreshingly unabraded aside from a couple of minor thin lines on the field near the chin. Luster is prevalent throughout design elements. PCGS# 6876

1798 Heraldic Eagle Dollar, AU53
Pointed 9, Wide Date, B-15, BB-112

- 6518** 1798 Large Eagle, Pointed 9, Wide Date AU53 PCGS. CAC. B-15, BB-112, R.3. Deep gunmetal-gray and walnut-brown toning blankets this minimally abraded and attractive Bust type coin. The strike is incomplete at the centers but luster shimmers from design recesses. No adjustment marks or other planchet imperfections are present. PCGS# 6877

1799/8 15 Stars Reverse Dollar, MS61
Scarce B-3, BB-141 Die Pair

- 6519** 1799/8 15 Stars Reverse MS61 NGC. B-3, BB-141, R.3. [Incorrectly labeled by NGC as a regular 1799, though the overdate is plain.] Bowers-Borckardt Die State IV, advanced deterioration of the die with a flaw from the midpoint of the M in AMERICA down to the eagle's wing. This is the 15 Star Reverse with the leftmost and rightmost clouds extending down to conceal two extraneous stars surrounding the eagle, not entirely successfully in the former's case. Both sides are softly lustrous under deep blue, violet, and rose patina. The obverse has a few old reed marks and a newer staple scratch to the right of Liberty's shoulder, but the reverse presents well and overall the MS61 designation is justified. NGC ID# 24X8, PCGS# 6883

1800 B-12, BB-184 Dollar, XF45
Scarce Late Die State

- 6520** 1800 XF45 NGC. B-12, BB-184, R.3. Die State II with a slight crack from star 7 to L, and a delicate crack through the top of OF to the right wing. Bowers writes that only 20% of BB-184 dollars are in this late die state. The typical survivor grades Fine to VF, with higher grade pieces seldom encountered. This Choice XF specimen is deeply toned in gold and gray with traces of luster on its pleasing surfaces. Trivial marks are consistent with the grade. NGC ID# 24X9, PCGS# 6887

1800 B-13, BB-193 Dollar, XF45
Late Die State
Formerly Known as B-18

- 6521** 1800 XF45 PCGS. CAC. B-13, BB-193, R.2. Die State III. The reverse die is injured from massive clashing, but no obverse die cracks are present. Bolender described this die state as a different variety and assigned his number B-18. We know that his B-13 and B-18 are die states of a single die pair, and they have just one BB number. This Choice XF specimen is deeply toned in violet-gray with gold highlights. An attractive example with exceptional surfaces for the grade. NGC ID# 24X9, PCGS# 6887

1800 B-12, BB-184 Dollar, AU Details

- 6522** 1800 — Improperly Cleaned — NGC Details. AU. B-12, BB-184, R.3. Bowers Die State I. Rich powder-blue borders surround the almond-gold and stone-gray centers. Though slightly bright and glossy from a past wipe, this Draped Bust dollar has splendid definition and exhibits noticeable luster. Faint marks are scattered but none merit individual discussion. NGC ID# 24X9, PCGS# 6887

1800 Dotted Date Dollar, AU53, B-14, BB-194
Scarce *Guide Book* Variety

- 6523** 1800 Dotted Date AU53 NGC. B-14, BB-194, R.3. Bowers-Borckardt Die State III. The Dotted Date variety is undesignated on the insert. The present sharply defined example displays deep lime-green and cream-gray toning. Luster brightens design elements and is especially plentiful on the reverse. Marks are absent save for a small obverse rim nick at 12:30. A scarce and distinctive *Guide Book* variety. PCGS# 6889

1800 12 Arrows Bust Dollar, AU50
B-17, BB-196

- 6524** 1800 12 Arrows AU50 PCGS. B-17, BB-196, R.1. Struck from clashed and cracked dies, as usual for this die pairing. BB-196 receives its own *Guide Book* listing, as the sole 1800 variety with 12 arrows. Golden-brown fields and devices are bordered by aquamarine. A loupe and careful scrutiny reveals a few inconspicuous thin marks on each side. Population: 6 in 50, 9 finer (8/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 2416. PCGS# 6890

1802 Bust Dollar, XF40
Narrow Date, B-6, BB-241

- 6525** 1802 Narrow Date XF40 PCGS. B-6, BB-241, R.1. Bowers-Borckardt Die State III. A popular *Guide Book* variety, the BB-241 is easily identified by the Narrow Date and the broken right foot of T in LIBERTY. The BB-241 is one of the most available varieties in the Draped Bust, Heraldic Eagle series and is a favorite choice of type collectors. This attractive XF specimen shows a few adjustment marks on the lower reverse and the lightly abraded surfaces retain traces of original mint luster, under delicate shades of pale gold toning. NGC ID# 24XB, PCGS# 6895

1802 Draped Bust Dollar, XF45
Narrow Date, B-6, BB-241

- 6526** 1802 Narrow Date XF45 PCGS. CAC. B-6, BB-241, R.1. Bowers-Borckardt Die State III. The broken right foot of T in LIBERTY identifies the popular BB-241 variety. Attractive shades of lavender, gray, green, and blue toning mingle in a dazzling play of colors on the lightly abraded surfaces of this Choice XF specimen. The design elements retain much original detail and eye appeal is quite strong. NGC ID# 24XB, PCGS# 6895

1803 Small 3 Dollar, AU53
B-4, BB-254, Partial Luster

- 6527** 1803 Small 3 AU53 PCGS. B-4, BB-254, R.3. This scarcer variety 1803 dollar provides impressive definition and partial luster. The golden-brown toning deepens near the rims. Generally smooth, though Liberty's neck and the left obverse field display a few minor marks. Tiny gray flan flaws on the right obverse field are of mint origin. The reverse die is clashed near the left shield tip, unmentioned in the recently published Bowers Encyclopedia. NGC ID# 24XD, PCGS# 6900

GOBRECHT DOLLARS

1836 Judd-60, Die Alignment I Gobrecht Dollar
PR4, Problem-Free for the Grade

- 6528** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR4 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the DO in DOLLAR). With the heavy wear on this coin, it is not possible to determine the striking period; if there ever was an angling die clash mark on the reverse it disappeared 100+ years ago. This is actually quite a pleasing dollar for the grade. The surfaces are light gray with a trace of charcoal around the devices. There are no large abrasions present. The coin has the appearance of a pocket piece with smooth, even wear over each side. PCGS# 11225

**1836 Judd-60 Original Gobrecht Dollar
Die Alignment IV, Good Details**

- 6529 1836 Name on Base, Judd-60 Original, Medal Alignment Genuine PCGS. Good Details.** The PCGS number ending in .84 suggests Holed and/or Plugged as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Good 4 specimen that has been holed and plugged. Silver. Plain Edge. Die Alignment IV (head of Liberty opposite the space between F and A). This piece is termed an Original striking. The determination of its Original status would be made by the lack of any die cracks on the reverse. None are seen, but that also may be because of the heavy wear. The hole and plug are apparent above the head of Liberty and in the space between OF and AMERICA. Several small to medium-sized planchet voids are scattered over each side and light pin scratches can be made out with a magnifier. Otherwise, the surfaces are light gray with darker charcoal accents surrounding the devices. PCGS# 11226

SEATED DOLLARS

**1850-O Dollar, AU58
Scarcest O-Mint Seated Dollar**

- 6530 1850-O AU58 PCGS.** There are only four New Orleans Seated dollar issues, and while two of them (the 1859-O and 1860-O) are comparatively common, the other two dates (the 1846-O and 1850-O) are very scarce. The 1850-O is the most challenging O-mint issue, which is not surprising since its mintage of 40,000 pieces is a nearly one-third less than the introductory 1846-O. This sharp and lightly toned example has extensive luster throughout the borders and devices, and is likely kept from a higher AU grade only by a couple of minor contact marks on the upper obverse. Faint die cracks connect the letters of the reverse legends, and slender vertical die crack bisects the left side of the 0 in the date. Ex: *FUN Signature* (Heritage, 1/2004), lot 7183. NGC ID# 24YN, PCGS# 6938

**1861 Seated Dollar, MS63
Satin and Sharply Struck**

- 6531 1861 MS63 PCGS.** This Select Mint State Seated Liberty dollar from the first year of the Civil War saw a small original mintage of 77,500 coins and subsequent melting of many pieces that same year. The 1861 is seldom seen in Mint State, nor even in the higher circulated grades. Satiny luster runs over pinkish-golden surfaces on both sides of this piece. A few light abrasions account for the grade, but the sharp strike and excellent eye appeal are noteworthy. Population: 13 in 63, 28 finer (8/13). NGC ID# 24Z4, PCGS# 6951

**1870-CC Dollar, AU53
The First Carson City Issue**

- 6532 1870-CC AU53 NGC.** The 1870-CC Seated dollar was the first issue struck at the Carson City Mint, resulting in a mintage of 11,758 pieces. Quite a few of these were plucked from circulation in the late 1800s, probably resulting from the publication of Augustus G. Heaton's *Mint Marks* study in 1893. Most surviving specimens are in the VF to AU grade range. Charcoal-gray toning covers this well defined AU53 example. The few scattered marks are consistent with a briefly circulated coin. Census: 17 in 53, 60 finer (8/13). NGC ID# 24ZE, PCGS# 6964

**1873-CC Silver Dollar, VF30
Rare Seated Liberty Issue**

6533 1873-CC VF30 PCGS. The 1873-CC is the rarest Carson City Seated dollar, and the second rarest branch mint issue of the entire design behind the nearly impossible 1870-S. The mintage of 2,300 coins was higher than the 1871-CC, but fewer examples survive. For all four years of issue, the Carson City Mint produced less than 20,000 Seated dollars, and more than half of those were coined in 1870.

This Choice VF example has pleasing light gray surfaces with the usual trivial surface marks. The only imperfection of any consequence is a small rim bruise at 6:30 on the reverse and a minor planchet lamination below the right facing claw. Population: 5 in 30, 46 finer (8/13). NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLARS

**1859 Seated Dollar, PR63 Cameo
Well-Struck and Attractive**

6534 1859 PR63 Cameo PCGS. This silver-white Select proof 1859 Seated dollar is a well-contrasted example of the issue, struck in the amount of 850 pieces, of which only 450 were distributed. Certified in an early blue-label PCGS holder, this well-struck piece shows a few minor field contact marks consistent with the grade over surfaces that are largely untuned and quite attractive. This coin is one of only eight submissions in PR63 Cameo, and 13 are finer from PR63+ to PR67 Cameo (8/13).
From *The Searight Collection*. PCGS# 87002

**1865 Seated Dollar, PR64 Cameo
Only 500 Examples Struck**

6535 1865 PR64 Cameo PCGS. Satiny devices appear to be suspended above the deep watery fields of this near-Gem Cameo proof. An attentive strike delivers bold delineation to the design features, with the sole exception of minor softness on the eagles neck feathers and the upper border of the left (facing) wing. A hair-thin mark is noted near star 1. From a tiny mintage of just 500 pieces. Population: 14 in 64 (1 in 64+) Cameo, 9 finer (8/13). PCGS# 87008

1867 Seated Liberty Dollar, PR65
Only 625 Examples Struck

6536 1867 PR65 PCGS. CAC. The 1867 is not the rarest of Seated Liberty dollar proofs, but does come under pressure from date collectors owing to the relatively low 49,900 circulation strike mintage. Proofs can be located with minimal difficulty through near-Gem. Gems, however, are quite scarce and finer examples are nearly unavailable.

Frosty devices appear to float over the deep watery fields of this PR65 offering. The essentially untuned surfaces exhibit sharply struck design elements. This nicely preserved coin reveals just a couple of lint marks. Encapsulated in a green insert holder. Population: 17 in 65, 1 finer (8/13).

Ex: FUN Signature (Heritage, 1/2010), lot 2606. NGC ID# 252N, PCGS# 7015

1869 Seated Liberty Dollar, PR64
Rare Cameo Example

6537 1869 PR64 Cameo PCGS. An amazing Cameo proof, this Choice quality piece has few peers certified by PCGS. Both sides are brilliant with glittering silver surfaces splashed by traces of gold and darker speckles. The surfaces are nicely preserved with only a few blemishes that are consistent with the grade. Population: 14 in 64 Cameo, 4 finer (8/13).

Ex: Long Beach Signature (Heritage, 9/2007), lot 1949. PCGS# 87017

1870 Seated Dollar, PR67 ★ Ultra Cameo
Single Finest Certified Example

6538 1870 PR67 ★ Ultra Cameo NGC. The 1870 proof Seated Liberty dollar claims a generous mintage of 1,000 pieces, but the issue is much more difficult to locate than that figure suggests. The coins were issued with the proof sets, and Q. David Bowers speculates that a number of sets may have gone unsold, and were melted after the end of the year. It is certain that many silver coins were melted after July 10, 1873, when the weight of subsidiary silver coinage was adjusted, but since the silver dollar's composition remained unchanged this may not have been a factor. For whatever reason, proof silver dollars of 1870 are definitely scarcer than proofs of some other dates from that era, some with considerably lower production totals.

The present coin is almost certainly the finest known specimen of this elusive date. For pedigree purposes, we note a small patch of obverse planchet roughness in the field between stars 1 and 2, and a single dark fleck on Liberty's neck. The surfaces are remarkably free of even the smallest signs of post-strike contact, although a few lint marks appear to be remnants of the original proof production. The fields are radiantly mirrored, and liberal, thick mint frost coats the devices front and back. The strike is exacting even if we cannot call it quite full, as we note a small weak area on the eagle's left (facing) leg and claw. But the feathers elsewhere, fletchings, star points, and other details, are articulated in a sculptural way that few Seated dollar proofs demonstrate.

The NGC Star designation is reserved for only the finest, most eye-appealing examples, an appellation that this piece richly deserves. A fine coin for the finest collection, and one that we suspect will see spirited bidding. Coins with Deep or Ultra Cameo surfaces are very rare. The NGC *Census Report* shows two PR65 Ultra Cameo examples, a single PR66 Ultra Cameo piece, with this PR67 ★ Ultra Cameo as the finest. PCGS shows seven Deep Cameo certification events, with a single PR66 Deep Cameo as their finest certified specimen (8/13). PCGS# 97018

1872 Dollar, Richly Toned PR64

- 6539 1872 PR64 NGC.** The penultimate proof Seated Liberty dollar issue saw a mintage of 950 pieces that were mostly sold with minor and silver proof sets. Some were probably unsold at the end of the year and melted in 1873. Medium-intensity grayish-tan toning bathes both sides of this near-Gem and the design elements are fully defined. Just a few light marks and faint hairlines are noted. Census: 45 in 64, 23 finer (8/13). NGC ID# 252U, PCGS# 7020

**1872 Silver Dollar, PR63 Cameo
Attractive Peripheral Toning**

- 6540 1872 PR63 Cameo PCGS.** Darker toning at the peripheries provides additional accents to the central devices on this well struck Select example displaying a pleasing level of cameo contrast. The rich toning includes shades of orange, cherry-red, fuchsia, and bright blue. Moderate hairlines are present in the reverse fields. Population: 9 in 63 (1 in 63+) Cameo, 19 finer (8/13). PCGS# 87020

**1873 Seated Dollar, PR64
Borderline Cameo Proof**

- 6541 1873 PR64 NGC.** The final Seated dollar issue with brilliant silver surfaces. Wispy violet toning is evident exclusively on the reverse rim of this otherwise untuned Choice proof. Both sides have light cameo contrast, nearly sufficient for the Cameo designation. Census: 44 in 64, 22 finer (8/13). NGC ID# 252V, PCGS# 7021

**1873 Seated Dollar, PR64 Cameo
Well-Contrasted Example**

- 6542 1873 PR64 Cameo PCGS.** This 1873 Seated dollar proof is virtually untuned and quite reflective in the fields, complementing a goodly amount of mint frost on the devices. A shallow planchet lamination across the thigh and left (facing) arm of Liberty and the left field nearby has toned a light orange color, not at all overt and scarcely distracting. Population: 24 in 64 Cameo, 5 finer (8/13). The 1873 Seated dollar proof is a popular one, due to the large number of coinage issues struck during the year. From *The Searight Collection*. PCGS# 87021

TRADE DOLLARS

**1877-CC Trade Dollar, MS62+
Only 534,000 Minted**

- 6543 1877-CC MS62+ PCGS. CAC.** In the 20 years that we have tracked auction appearances in our Permanent Auction Archives, we have only offered 22 examples of the 1877-CC Trade dollar in higher grades than the present specimen. This beautiful Mint State example has brilliant silver surfaces with satin luster, strong design definition, and a delicate splash of gold toning at the right obverse border. Otherwise, both sides are brilliant and untuned. Population: 31 in 62+, 40 finer (8/13). NGC ID# 253D, PCGS# 7045

**1877-CC Trade Dollar, MS63
Conditionally Rare Any Finer**

- 6544 1877-CC MS63 NGC.** Despite its substantial mintage of 534,000 pieces, the 1877-CC Trade dollar is extremely difficult to locate in high grade. This attractive Select specimen offers well-detailed design elements and satiny mint luster under pleasing shades of champagne-gold and lavender patina. A few minor signs of contact are scattered about the reverse, with a minor rim bruise at 3:30. Census: 20 in 63, 7 finer (8/13). NGC ID# 253D, PCGS# 7045

1878-CC Trade Dollar, AU58
Famous Melt Rarity

- 6545 1878-CC AU58 PCGS.** The mintage for the 1878-CC Trade dollar was a mere 97,000 pieces, and many of these were part of the 44,148 pieces that were melted on July 19 of this year, further reducing the net availability of this key issue. Mint State coins are rare, and this near-Mint example represents excellent value for the collector. Some of the original luster still remains and the striking details are sharp overall. Gray-toned with touches of lilac and gold. Identifiable by a three-reed nick in the field between the left wing of the eagle and the back of his neck. Population: 14 in 58, 29 finer (8/13).
Ex: Long Beach Signature (Heritage, 2/2010), lot 1327. NGC ID# 253E, PCGS# 7047

PROOF TRADE DOLLARS

1874 Trade Dollar, PR64
Vivid Multicolor Toning

- 6546 1874 PR64 PCGS. CAC.** A dark patina of golden-brown, cobalt-blue, and violet hues blankets the deeply reflective surfaces of this impressive Choice Trade dollar. The design elements are sharply rendered in most areas, with just a touch of softness on the eagle's right (facing) leg. Population: 42 in 64, 11 finer (8/13). NGC ID# 27YK, PCGS# 7054

1879 Trade Dollar, PR65+
Great Toning Over Mirrors

- 6547 1879 PR65+ NGC.** A carefully preserved and attractive specimen from the first year that all Trade dollars struck were proofs. The gleaming obverse has green fringe toning around a blue and orange core, while the reverse has similar shadings in a more jumbled order. Census: 44 in 65 (1 in 65+), 36 finer (8/13). NGC ID# 27YR, PCGS# 7059

1880 Trade Dollar, PR64
Colorfully Toned

- 6548 1880 PR64 PCGS.** A medley of sky-blue, cobalt-blue, lavender, orange-gold, and reddish-gold patination cascades over both sides of this near-Gem. The design elements are for the most part sharply struck, except for softness in Liberty's hair curls and the stars along the lower-right obverse border. Neither side reveals significant marks. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR64
Proof-Only Issue

- 6549 1880 PR64 PCGS. CAC.** The toning on this pleasing near-Gem representative accentuates the well struck design elements. The surfaces reveal a mix of pearl-gray, green-gray, and tan-gray colors at a glance, however closer examination reveals areas of copper, sea-green, teal, and yellow-gold hues. Reflectivity remains beneath the patina. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR67+
The Second Finest Certified

- 6550 1880 PR67+ NGC. CAC.** Trade dollars were made only in proof format from 1879 to 1885. The year 1880 set a record for proof Trade dollar coinage with 1,987 pieces. Dave Bowers (1993) contends that most of these, perhaps 1,300 to 1,700 pieces, still exist and are readily available from PR60 to PR65. Indeed, NGC has graded nearly 700 examples and PCGS nearly 800 specimens.

This high-end Superb Gem is the second finest certified by either service (8/13). It presents a fair amount of field-motif contrast, more so on the obverse. Most of each side is toned in purple hues with a rose-tinted central area on the reverse. The design elements are boldly defined, and neither side reveals significant marks. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR64 Cameo
Nicely Contrasted and Lightly Toned

- 6551 1880 PR64 Cameo PCGS.** Attractive orange-pink color is present on this lovely near-Gem example. Appreciable contrast exists between the frosted devices and reflective fields. The coin is well struck overall, with areas of incompleteness noted at Liberty's head, the upper obverse stars, and the eagle's feet. Population: 55 in 64 (2 in 64+) Cameo, 39 finer (8/13).
From The Strawberry Fields Collection. PCGS# 87060

1881 Trade Dollar, PR64 Cameo
Pleasing Contrast

- 6552 1881 PR64 Cameo PCGS. CAC.** This near-Gem representative is brilliant overall, with small scattered toning spots appearing on both sides, primarily the reverse. The degree of cameo contrast is pleasing. A tiny spot appears to the left of Liberty's chin. Population: 30 in 64 (3 in 64+) Cameo, 36 finer (8/13). PCGS# 87061

1882 Trade Dollar, Deeply Toned PR66

- 6553 1882 PR66 PCGS.** The relatively large mintage of proofs ensures that an 1882 Trade dollar can easily be found in lower grades. That is not, however, true in higher grades, as seen here. Only 19 coins have been certified by PCGS with six finer (8/13). The centers of each side are rust-colored and surrounded by deep blue at the margins with a curious, speckled area of brilliance next to the wheat sheaves on the obverse. When held beneath a light the proof mirrors still flash brightly through the considerable toning. NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR66
Strong Unacknowledged Contrast

6554 1882 PR66 NGC. CAC. The holder with its external hologram predates the use of Cameo designations by NGC, but the contrast between distinctly frosted fields and nearby reflective devices is far clearer than on many examples certified as Cameo by major services today. Dotted blue-green and golden-brown toning along parts of the margins adds color to the pleasingly preserved surfaces. Though 1,097 specimens were struck for this proof-only issue, examples in better-than-Gem condition are scarce. For non-Cameo representatives, as this coin is certified: Census: 29 in 66, 6 finer (8/13). NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR65 ★ Cameo
Colorful Toning

6555 1882 PR65 ★ Cameo NGC. The 1882 Trade dollar was produced exclusively in proof format, with a limited mintage of 1,097 pieces. This spectacular Gem is sharply detailed in most areas, with the upper stars showing just a touch of flatness. The surfaces are patinated in spectacular shades of champagne-gold, cerulean-blue, pink, and orange. The reflective fields contrast sharply with the frosted devices. Moderately hairlined with a few spots present. Census: 28 in 65 Cameo, 14 finer (8/13). PCGS# 87062

MORGAN DOLLARS

1878 Morgan Dollar, MS66
First-Year 8 Tailfeathers Example

6556 1878 8TF MS66 NGC. This impressive Premium Gem is sharply detailed in most areas, but a touch of softness is evident on the eagle's claws. The pleasing surfaces exhibit a combination of cartwheel mint luster and prooflike reflectivity, with an occasional hint of golden-tan toning and only minor signs of contact. A popular one-year subtype from the first year of the design. Census: 19 in 66, 0 finer (8/13). NGC ID# 253H, PCGS# 7072

1878 Morgan Dollar, MS66
Important 8 Tailfeathers Type

6557 1878 8TF MS66 PCGS. An impressive Premium Gem representative of the 8 Tailfeathers Morgan dollar, a reverse design only seen during the first year of the series on Philadelphia Mint specimens. This sharply detailed example displays vibrant mint luster and well-preserved creamy surfaces with no mentionable signs of contact. Population: 35 in 66 (1 in 66+), 2 finer (8/13). NGC ID# 253H, PCGS# 7072

1878 7/8TF Tripled Blossoms Dollar, AU58
VAM-44A, 'Number One Morgan Dollar Variety'

6558 1878 7/8F Tripled Blossoms AU58 PCGS. CAC. VAM-44. A Top 100 Variety. The Top 100 Guide refers to VAM-44 as "the Number One Morgan dollar variety." The cotton bolls are prominently die tripled, and the eagle's legs are doubled. VAM-44A is the later die state of VAM-44 with a bold clashed N (from IN) in front of Liberty's neck. Designated as VAM-44 on the PCGS insert. Toned medium silver-gray, though glimpses of olive-gold toning adorn portions of the reverse border. Lightly abraded and highly collectible. Population: 8 in 58, 5 finer (8/13). PCGS# 133829

**1878 Tripled Blossoms Dollar, MS61
Dramatic VAM-44 Variety**

- 6559 1878 Tripled Blossoms MS61 PCGS. CAC. VAM-44.** A Top 100 Variety. Not only is this first-year die pair with a Seven over Eight Tailfeathers (weak) reverse on the pursued Top 100 list of Morgan dollar varieties, thanks to its dramatic tripled die reverse most visible on the blossoms at Liberty's hair, it is arguably the most prized variety within the Top 100! The triple outline at the bottom of each flower is clear when the features are examined beneath a glass. At arm's length, this is a semireflective, moderately abraded example with gently frosted fields and a soft strike on the hair over Liberty's ear, but the all-around eye appeal is strong for an MS61 coin. PCGS# 133829

**1878 Reverse of 1878 Dollar, MS66
Interesting VAM-114 Variety**

- 6560 1878 7TF Reverse of 1878 MS66 PCGS. VAM-114.** This dollar variety shows prominent die doubling on the R in PLURIBUS. This brilliant Premium Gem displays booming luster and a full strike. Splendidly preserved and conditionally rare. The obverse fields are notably free from contact. Population: 27 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 253K, PCGS# 7074

**1878 7 Tailfeathers, Reverse of 1879, MS66
Among the Finest Certified**

- 6561 1878 7TF Reverse of 1879 MS66 PCGS.** The reverse of the eagle is rounded and the top arrow feather is slanted, characteristics of the Reverse of 1879. This lustrous surfaces are essentially untuned and the design elements are well-impressed; most of the hair above Liberty's ear shows. Minor obverse scuffs are consistent with the designated grade. PCGS and NGC have seen fewer than 30 specimens and none finer (8/13). NGC ID# 253L, PCGS# 7076

**1878-CC Silver Dollar, MS66
VAM-11, Top 100, Lines in Wings**

- 6562 1878-CC MS66 PCGS. VAM-11.** A Top 100 Variety. A number of bold die lines are concealed within the eagle's wings. LIBERTY is also lightly die doubled west. A well struck, highly lustrous, and lightly toned Premium Gem with virtually pristine fields and only incidental grazes on Liberty's face and neck. Only a handful of examples have been graded finer by PCGS. NGC ID# 253M, PCGS# 7080

**1878-CC Dollar, MS66
First-Year Branch-Mint Morgan**

- 6563 1878-CC MS66 PCGS.** Always in demand because of the charismatic CC mintmark, this spectacular Premium Gem also represents the first year of the Morgan design. The design elements display razor-sharp definition, even on the hair strands above Liberty's ear. Vibrant cartwheel mint luster adds to the excellent eye appeal. PCGS has graded only five numerically finer examples (8/13). NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
Brilliant, Problem-Free Surfaces

- 6564 1878-CC MS66 PCGS.** This first-year issue is popular from all the mints that produced Morgan dollars, but an extra premium is always seen for this popular western mint. This all-brilliant dollar is fully struck throughout and there are no obvious abrasions present. Bright cartwheel luster is present, as expected. NGC ID# 253M, PCGS# 7080

1878-CC Dollar, Semireflective MS66
Ex: R. Dier Collection

- 6565 1878-CC MS66 PCGS.** Ex: R. Dier Collection. The sparkling, untuned surfaces are refreshingly clean for this first-year Carson City issue. Each side displays a significant amount of mint frost over the central devices, which contrast against the bright semireflective fields. Additionally, the strike details are fully brought up in the centers of each side.
Ex: Long Beach Signature (Heritage, 1/2004), lot 7814. NGC ID# 253M, PCGS# 7080

1878-CC Dollar, MS66
A Splendid, Highly Lustrous Early CC

- 6566 1878-CC MS66 PCGS.** CAC. All the components of a great type coin are exhibited by this visually alluring Premium Gem. From the first year of issue for the immensely popular Morgan dollar series, this piece is fully struck and displays intense, coruscating mint frost over both sides. Vivid red-gold and cobalt-blue obverse peripheral toning greatly increases the eye appeal of the coin. A few wispy field marks preclude an even loftier grade assessment.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2324; Long Beach Signature (Heritage, 5/2008), lot 2429. NGC ID# 253M, PCGS# 7080

1878-S Long Nock, MS62
One of Three Finest at PCGS
Sharply Struck

- 6567 1878-S Long Nock MS62 PCGS.** VAM-57. The center arrow shaft is longer than most 1878-S coins with the normalnock. The design elements are sharply struck, including virtually full detail in the hair above Liberty's ear. Both sides retain ample luster and display traces of light brown, russet, and grayish-tan toning in the recessed areas. Several marks on Liberty's face and neck may help identify the coin. Population: 3 in 62, 0 finer (8/13). PCGS# 133848

1879-CC Morgan Dollar, MS62
Delicately Toned

- 6568 1879-CC MS62 PCGS.** Normal Mintmark. The 1879-CC claims a mintage of 756,000 pieces. This MS62 specimen is fairly well struck, with partial detail showing in the hair over Liberty's ear and the eagle's breast feathers. Delicate aqua-green and reddish-gold patina makes occasional visits to both sides, being slightly more extensive and deeper on the obverse. A few light marks are scattered about, especially on Liberty's cheek. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS64
Deeply Toned CC-Mint Key

- 6569 1879-CC MS64 PCGS.** The 1879-CC is the second-rarest Morgan dollar from the Carson City Mint, with a low reported mintage of 756,000 pieces. This attractive Choice specimen is darkly toned in shades of sea-green and lavender-gray, with deeper color on the obverse. The design elements are well-detailed and strong mint luster is evident beneath the patina. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar, MS64+
Low Representation in GSA Holdings**

- 6570 1879-CC MS64+ PCGS. CAC.** The survival of the various Carson City Morgan dollar issues has far more to do with where they spent their time rather than their original mintages. Under more adverse circumstances the 1885-CC dollar (mintage 228,000 pieces) would be considered a great rarity, while the 1879-CC (mintage 756,000 pieces) would be more accessible. As it is, the 1879-CC dollar is challenging in most Mint State grades and scarce in Gem and above. This MS64+ example offers a good "look" for its date, silver overall with well-defined, lightly frosted devices and just a hint of patina set against the pale gray of the fields. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar, Brilliant Prooflike MS64
Pleasing Cameo Contrast**

- 6571 1879-CC MS64 Prooflike NGC.** In the decades prior to third party certification, a piece such as the present coin could have traded hands as a branch mint proof. The fields are exceptionally mirrored and exhibit blatant contrast with the icy motifs. There are surprisingly few ticks on the fields, though the portrait displays wispy grazes. A much better Carson City issue. NGC ID# 253T, PCGS# 7087

**1879-CC Dollar, Nearly Brilliant MS61
Capped Die Variant, VAM-3**

- 6572 1879-CC Capped Die MS61 NGC. VAM-3.** A Top 100 Variety. Satiny-white centers are lightly framed in attractive golden-rose toning. We could easily see this crisp Uncirculated 1879-CC in an MS63 holder if not for a couple of deeper reeding marks on Liberty's cheek. The 1879-CC ranks as the second scarcest Carson City dollar, only trailing the 1889-CC. NGC ID# 253T, PCGS# 7088

**1879-CC Dollar, VAM-3, MS63+
Among the Six Finest at NGC**

- 6573 1879-CC Capped Die MS63+ NGC. VAM-3.** A Top 100 Variety. The late die state with a filled G in GOD. The obverse displays whispers of varying intensity reddish-gold and sky-blue around the rims, while soft reddish-gold clings to the reverse margin. Lustrous surfaces are well struck, though light diagonal roller marks partially obliterate the hair above Liberty's ear. Scattered marks, especially on the reverse, determine the grade. Census: 6 in 63+, 0 finer (8/13). NGC ID# 253T, PCGS# 7088

**1879-CC Morgan Dollar, MS64
Popular Capped Die Variety**

- 6574 1879-CC Capped Die MS64 PCGS. VAM-3.** A Top 100 Variety. The undertype of a smaller CC is evident beneath the primary mintmark on this variety, which has become more popular with collectors in recent years. A well-detailed and lustrous Choice example of this low-mintage key, with creamy surfaces that show few signs of contact. PCGS has graded 11 numerically finer examples (8/13). NGC ID# 253T, PCGS# 7088

**1880 Morgan Dollar, MS66+
None Finer at PCGS or NGC**

6575 1880 MS66+ PCGS. CAC. The 1880 Morgan dollar claims a huge mintage of 12.6 million pieces, but neither PCGS nor NGC has graded any survivors in higher numeric grades than the present coin (8/13). This spectacular high-end Premium Gem displays well-detailed design elements and vibrant mint luster, with a few wisps of lavender and tan toning. NGC ID# 253Y, PCGS# 7096

**1880 Morgan Dollar
MS65 Deep Mirror Prooflike**

6576 1880 MS65 Deep Mirror Prooflike PCGS. Amply reflective with considerable frost over Liberty's portrait and the eagle. The surfaces are mainly silver, though touches of gold are visible at parts of the margins, most prominently the lower left obverse. Modestly abraded but still a generally pleasing example. Population: 30 in 65 Deep Mirror Prooflike, 1 finer (8/13). NGC ID# 253Y, PCGS# 97097

**1880-CC 8 Over High 7 Morgan, VAM-5
Deep Mirror Prooflike Gem**

6577 1880-CC 8 Over High 7 MS65 Deep Mirror Prooflike PCGS. VAM-5. A Top 100 Variety. A brilliant Gem with deeply mirrored fields on each side. The obverse and reverse devices are nicely frosted. Few Deep Mirror Prooflike examples of this variety appear on the market, and when they do, Morgan dollar collectors delight at the opportunity. Population: 6 in 65 (1 in 65+) Deep Mirror Prooflike, 1 finer (8/13).

Ex: Long Beach Signature (Heritage, 2/2008), lot 1126; Central States Signature (Heritage, 4-5/2009), lot 2971; Summer FUN Signature (Heritage, 7/2009), lot 836. PCGS# 97103

**1880/79-CC Reverse of 1878 Dollar, MS66+
Scarce in High Grades**

6578 1880/79-CC Reverse of 1878 MS66+ PCGS. CAC. Struck from a leftover reverse die from 1878 that shows the flattened breast feathers on the eagle, and an obverse leftover from 1879 with the 79 clearly showing. The Reverse of 1878 coins are usually found bagmarked, and a high-grade example such as this one is worthy of consideration. The surfaces are brilliant and show thick mint frost one would expect from a Carson City product. The luster is also unbroken by the abrasions usually found on this issue, atypical of a CC dollar. Fully struck. Population: 62 in 66 (2 in 66+), 0 finer (8/13). NGC ID# 253Z, PCGS# 7108

**1880-S Silver Dollar, MS68
Always 'Just Right' for Type Purposes**

6579 1880-S MS68 PCGS. Large S. This flashy and semiprooflike Superb Gem silver dollar has a precise strike and exemplary luster. Although an inordinate number of San Francisco Morgans coined between 1878 and 1882 have survived in high grade, type demand for examples of the present quality will always exceed the supply. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68
Exceptional Type Coin**

6580 1880-S MS68 PCGS. Medium S. Light golden patina graces the obverse, while the reverse has only minimal rose-gold toning. The booming luster and sharp strike are consistent with the lofty MS68 grade, and surface imperfections require both a loupe and patience to locate. A desirable representative of this perennially popular 19th century silver type. PCGS has graded five numerically finer examples (8/13).

Ex: *Summer FUN Signature* (Heritage, 7/2010), lot 4093. NGC ID# 2544, PCGS# 7118

**1881-CC Morgan Dollar, MS67
Only Three Finer PCGS Coins**

6581 1881-CC MS67 PCGS. Always popular due to its low mintage of 296,000 pieces and its romantic mintmark, the 1881-CC Morgan dollar was heavily represented in the GSA sales. This magnificent Superb Gem exhibits sharply detailed design elements with rich mint frost on the devices and vibrant luster in the pristine fields. PCGS has graded only three numerically finer examples (8/13). NGC ID# 2547, PCGS# 7126

**1881-CC Morgan Dollar, MS67+
Lightly Toned and Well-Preserved**

6582 1881-CC MS67+ NGC. A wisp of golden toning precludes full brilliance. Booming luster sweeps this well-struck and low-mintage Carson City Morgan. The reverse field is essentially pristine, and the remainder of the coin shows only infrequent delicate grazes. NGC has graded only two numerically finer examples (8/13). NGC ID# 2547, PCGS# 7126

**1881-CC Dollar, MS67+
Just Three Finer at PCGS**

6583 1881-CC MS67+ PCGS. Lovely cartwheel luster meets near-impeccable preservation. The obverse is lightly gray-toned with just a hint of gold at the top, while the reverse offers a a rainbow-arc from gold to orange, rose, and violet at bottom and right. PCGS has graded only three pieces as MS68 or finer (8/13). NGC ID# 2547, PCGS# 7126

**1881-CC Morgan Dollar, MS67
Low Mintage, High Survival Rate**

6584 1881-CC MS67 PCGS. CAC. The 1881-CC Morgan dollar Boasts a low mintage of 296,000 pieces, but the issue enjoys a surprisingly high survival rate due to its presence in the GSA Hoard. This sharply detailed Superb Gem possesses intense eye appeal to complement its high technical quality, with vibrant mint luster and accents of gold and lavender toning. PCGS has graded three numerically finer examples (8/13). NGC ID# 2547, PCGS# 7126

**1881-CC Dollar, VAM-2
MS66 Deep Mirror Prooflike**

6585 1881-CC MS66 Deep Mirror Prooflike PCGS. VAM-2. The second 8 in the date "has die chips in a band across middle inside of upper loop," per VAMworld.com. Bill Fivaz is credited with the 1972 VAM discovery. A prominently mirrored high grade Carson City dollar with minimal toning and only inconsequential contact. Population: 50 in 66 Deep Mirror Prooflike, 1 finer (8/13). NGC ID# 2547, PCGS# 97127

**1881-O Dollar, MS65 Deep Mirror Prooflike
Untoned, Lightly Marked, Deeply Mirrored**

6586 1881-O MS65 Deep Mirror Prooflike NGC. Q. David Bowers writes in his *A Guide Book of Morgan Silver Dollars*: "Many 1881-O dollars have one or both dies with a prooflike surface. However, bagmarks are endemic among these coins, and finding a truly choice example can be a real challenge." Gem Deep Prooflike coins, such as this example, prove fiendishly elusive. A strongly reflective coin with essentially untuned mirrors, this sharp example also has considerable contrast thanks to the moderate frost across the devices. Tied for numerically finest among Deep Prooflike or Deep Mirror Prooflike pieces known to NGC or PCGS (8/13). Ex: *Fort Worth Signature* (Heritage, 3/2010), lot 1370. NGC ID# 2548, PCGS# 97129

**1881-S Morgan Dollar, MS68
Virtually Perfect Type Coin**

6587 1881-S MS68 PCGS. CAC. This incredible Morgan dollar exhibits razor-sharp definition on all design elements and close inspection with a loupe reveals no mentionable distractions. Speckled accents of greenish-gold toning visit the pristine surfaces and vibrant mint luster mixes with areas of prooflike reflectivity. PCGS has graded two numerically finer examples (8/13). NGC ID# 2549, PCGS# 7130

**1882 Morgan Dollar, MS66+
Attractive Multicolor Toning**

6588 1882 MS66+ PCGS. CAC. The 1882 Morgan dollar is a plentiful date in grades up to the MS66 level, but examples in finer grades are very rare, making this high-end Premium Gem a good balance of quality and value. Attractive shades of emerald-green and lavender-gray toning grace the well-preserved surfaces and the design elements are sharply detailed throughout. PCGS has graded six numerically finer examples (8/13). NGC ID# 254A, PCGS# 7132

**1882-CC Dollar, Blazing MS67
Nearly Untoned**

6589 1882-CC MS67 NGC. Frosty motifs stand out against the semimirrored fields, giving each side a slightly contrasted appearance. The design elements are sharply struck, including nice detail in the hair above Liberty's ear and the eagle's breast feathers. A whisper of very light gold-tan color rests on portions of Liberty's portrait and faint hints of lavender are visible in the left reverse field. As expected, both sides are wonderfully preserved. This magnificent Superb Gem will elicit spirited bids from Morgan dollar enthusiasts. Census: 50 in 67, 0 finer (8/13). NGC ID# 254B, PCGS# 7134

1882-CC Morgan Dollar, MS67
Only One Finer Coin at PCGS

- 6590 1882-CC MS67 PCGS.** This stunning Superb Gem exhibits well-preserved creamy surfaces that show a few hints of golden-tan and lavender toning. The design elements are well-detailed, with the slightest touch of softness on the hair strands above Liberty's ear. Eye appeal is tremendous. Population: 61 in 67, 1 finer (8/13). NGC ID# 254B, PCGS# 7134

1882-CC Morgan Dollar, MS67
No Finer Coins at NGC

- 6591 1882-CC MS67 NGC.** The obverse features variegated toning ranging from a light silver-gold quadrant to one with light iridescent blue, amber, and copper hues. The reverse boasts just a few hints of copper and peach color, these mostly at the rim. Excellent luster and preservation. Although many thousands of this issue were released through the GSA sales in the 1960s, few are so well-preserved as this Superb Gem. Census: 50 in 67, 0 finer (8/13). Ex: Long Beach Signature (Heritage, 9/2006), lot 5079; FUN Signature (Heritage, 1/2007), lot 6990; Central States Signature (Heritage, 4/2009), lot 3004. NGC ID# 254B, PCGS# 7134

1882-O Dollar, MS66
Modestly Toned

- 6592 1882-O MS66 NGC.** Predominantly silver luster with only the faintest suggestions of gold and blue. Detail is good on the hair over the ear and the eagle's breast. Only a few small and shallow marks affect Liberty's cheek. Die polishing lines in the field around the eagle's head are as struck and do not affect the grade. Census: 11 in 66, 2 finer (8/13). NGC ID# 254C, PCGS# 7136

1883 Silver Dollar, MS67+
Only Two Finer at PCGS

- 6593 1883 MS67+ PCGS. CAC.** The 1883 is frequently encountered in MS62 through MS65, but at the MS67+ level there are very few rivals. This is a virtually pristine Superb Gem displaying a bold strike, with only minor incompleteness at the extreme centers, and rich frosty satin luster. This piece has strong eye appeal as the plus designation indicates. Struck from rusted dies. Population: 6 in 67+, 2 finer (8/13). NGC ID# 254G, PCGS# 7142

1883-S Morgan Dollar, MS64+
Rare Issue in Higher Grades

- 6594 1883-S MS64+ PCGS. CAC.** A visually appealing piece as the plus designation denotes, this near-Gem exhibits a sharp strike, with only minor incompleteness present at the extreme centers. Vibrant luster and virtually untuned surfaces are among the attributes this coin possesses. Population: 9 in 64+, 17 finer (8/13). NGC ID# 254K, PCGS# 7148

1884 Morgan Dollar, MS67
Splendid, Shimmering Mint Brilliance

- 6595 1884 MS67 PCGS. CAC.** Not only is this shimmering, untuned Superb Gem meticulously preserved, but unlike many of the more than 14 million pieces struck, it was meticulously produced as well. The strike is razor-sharp and the cartwheel sheen in the fields is more reminiscent of an 1881-S dollar. Add to this equation an almost total lack of abrasions and the result is simply spectacular. Population: 38 in 67 (2 in 67+), 2 finer (8/13). NGC ID# 254L, PCGS# 7150

**1884 Dollar, MS67+
Colorfully Toned Obverse**

6596 1884 MS67+ PCGS. CAC. The 1884 Morgan dollar is a common issue from a generous mintage that exceeded 14 million coins throughout the year. Few survivors, however, achieve the MS67 level or higher. The present high-end Superb Gem yields intense luster and shows well-struck design features, including partial definition in the hair over Liberty's ear and the eagle's breast feathers. Swaths of medium-intensity yellow-gold and aqua-green visit the upper-right third of the obverse, ceding to soft grayish-lavender. The reverse is essentially brilliant save for soft russet at the rims. As expected, both sides have been well cared for. Population: 2 in 67+, 2 finer (8/13). NGC ID# 254L, PCGS# 7150

**1884-CC Morgan Dollar, MS67
Vivid Multicolor Toning**

6597 1884-CC MS67 PCGS. Carefully preserved with magnificent patina, a remarkable Superb Gem survivor from the popular 1884-CC Morgan dollar issue. Gold-orange toning runs diagonally from the upper right to the lower left, shading off into blues and greens. The reverse is minimally toned save for echoes of color near the rims. Population: 73 in 67, 3 finer (8/13). NGC ID# 254M, PCGS# 7152

**1884-S Morgan Dollar, MS61
Challenging Issue in High Grade**

6598 1884-S MS61 PCGS. The 1884-S Morgan dollar claims a substantial mintage of 3.2 million pieces, but most of the mintage was released into circulation near the time of issue and few high-grade specimens have survived for present-day collectors. This attractive Mint State example is well-detailed and brightly lustrous, with accents of pale gold toning and a scattering of minor contact marks that explain the grade. NGC ID# 254P, PCGS# 7156

**1885-CC Dollar, MS67
Snow-White and Remarkably Clean**

6599 1885-CC MS67 NGC. A pristine Gem that shows boldly struck devices and gleaming luster. The eye appeal is greatly enhanced by the gorgeous quality of the surfaces, which show nary a nick or mark even with the assistance of a strong glass. Precious few are found so well-preserved, and this one is calculated to impress. Census: 71 in 67, 5 finer (8/13).
Ex: FUN Signature (Heritage, 1/2005), lot 11329. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, Exceptional MS67
Among the Finest of This Low-Mintage Issue**

6600 1885-CC MS67 PCGS. Very few of the 228,000 1885-CC dollars were apparently placed into circulation. Indeed, David Bowers, in his book *Silver Dollars and Trade Dollars of the U.S.*, indicates that this issue is the rarest of all Morgan dollars in circulated grades. He estimates that 175,000 or so remain in Mint State. More than 16,000 coins have been certified by PCGS as MS63, MS64, MS65, and MS66. The population decreases drastically at the MS67 level, the grade of the example in the present lot; only about 52 of these have been seen, with a only five grading higher (8/13).

Silver-gray surfaces radiate pleasing luster, and display sharply impressed design elements, including fairly nice definition in the hair over Liberty's ear and on the eagle's breast feathers. Some minor luster grazes on Liberty's cheek and neck and in the left (facing) obverse field are mentioned for accuracy. Population: 53 in 67 (1 in 67+), 1 finer (8/13).

Ex: Central States Signature (Heritage, 5/2000), lot 5224; Michael Casper Collection / Palm Beach Signature (Heritage, 3/2006), lot 1122, unsold. NGC ID# 254S, PCGS# 7160

1886 VAM-20 Silver Dollar, MS64
Doubled Date
Tied for Finest Certified

- 6601 1886 Doubled Date MS64 PCGS. VAM 20.** A Hot 50 Variety. The doubling is best seen beneath the 1 and inside the 6 on this rare variety. Only 10 examples are certified in Mint State grades by the top three grading companies, including two MS64 examples that PCGS has graded. The others include six MS63 coins and two MS61 specimens. This brilliant Choice Mint State example has hints of peripheral gold on otherwise untuned and frosty silver surfaces. PCGS# 134000

1886-O Morgan Dollar, MS64
Remarkably Well Struck

- 6602 1886-O MS64 PCGS.** An important condition rarity in the Morgan dollar series from a mintage that exceeded 10 million coins. However, the vast majority of those coins entered circulation at the time they were minted. The typical survivor grades XF or AU, though Mint State specimens can be located through MS63 with patience and searching. MS64s are scarce and finer pieces are virtually unobtainable. Both sides display strong luster and well-struck devices, including the hair over Liberty's ear and the eagle's breast feathers. Moderate marks limit the grade. PCGS has seen a mere three finer and NGC none higher (8/13). NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS64
Extremely Rare in Finer Grades

- 6603 1886-O MS64 PCGS.** The strike is considerably above-average on this notable condition rarity. Both the hair above Liberty's ear and particularly the eagle's breast show a wealth of pleasing detail. The luster is also superior, with radiant cartwheels showing over the untuned, brilliant surfaces. Bowers' *Guide Book of Morgan Silver Dollars* advises cherrypicking, and forthright collectors would be well advised to cherrypick this example. PCGS has certified only three Gems of this issue as of (8/13) and it is likely that those pieces rest in strong hands, making this piece essentially among the finest obtainable.
Ex: Central States Signature (Heritage, 4/2007), lot 4742. NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS64
Conditionally Rare in Finer Grades

- 6604 1886-O MS64 PCGS.** The lustrous surfaces of this attractive Choice example show delicate shades of pink and golden-tan toning and a few minor signs of contact. The design elements are sharply detailed in most areas, with just a touch of softness on the hair above Liberty's ear. PCGS has graded only three numerically finer examples (8/13). NGC ID# 254W, PCGS# 7168

1887 Silver Dollar, MS61
Rare 'Donkey Tail' VAM-1A

- 6605 1887 Donkey Tail MS61 PCGS Secure. VAM-25A, R.6.** A Top 100 Variety. PCGS holder references the variety's former VAM-1A designation. VAMworld.com exclaims "Mint State Donkey Tails are truly ultra rare!" Michael S. Fey writes in his Top 100 reference, "occurring at the end of the die's production run, the VAM-1A is ultra-rare." The break from the lower right corner of the D provides the variety moniker. A satiny powder-blue and autumn-gold example that has a number of marks on the portrait consistent with the grade. Population: 3 in 61, 4 finer (8/13). PCGS# 133907

**1887-S/S Dollar, Lustrous MS66
VAM-2, Top 100 Variety**

6606 1887-S/S MS66 PCGS Secure. VAM-2. Ex: Bella. A Top 100 Variety. The serif of a second mintmark is visible within the upper loop of the prominent S. A sizeable percentage of Uncirculated examples are VAM-2, but any 1887-S dollar in MS66 is highly desirable due to the issue's conditional rarity. This lovely Premium Gem has booming luster and peripheral golden-tan toning. Crisply struck and nicely preserved. PCGS# 133915

**1888-S Morgan Dollar, MS66
Underrated Condition Rarity**

6607 1888-S MS66 NGC. The 1888-S Morgan dollar is an underrated date in the series from a small mintage of 657,000 pieces. This delightful Premium Gem displays sharply detailed design elements and vibrant mint luster throughout. The mostly brilliant surfaces show a few traces of pale gold toning and a couple of insignificant contact marks under the eagle's left (facing) wing. Census: 11 in 66, 1 finer (8/13). NGC ID# 2557, PCGS# 7186

**1889 Dollar, MS66+
Well-Struck and Lustrous**

6608 1889 MS66+ PCGS. CAC. The 1889 dollar, sporting a generous mintage approaching 22 million pieces, is readily available through MS65. MS66 pieces are scarce, however. The present high-end Premium Gem is one of just nine so-graded by PCGS, with a mere five coins finer (8/13). The silvery surfaces display pleasing luster and well-struck design elements, including nearly full detail in the hair above Liberty's ear. These attributes are significant to the present coin as most survivors are "indifferently struck and have miserable luster" (Bowers, 2007). The overall eye appeal is exceptional. NGC ID# 2558, PCGS# 7188

**1889 Morgan Dollar, MS66+
Sharply Detailed, Lustrous Specimen**

6609 1889 MS66+ PCGS. CAC. This high-end Premium Gem displays razor-sharp definition on all design elements. Even the hair strands above Liberty's ear are crisply delineated. The well-preserved surfaces are essentially brilliant, with just a few wisps of golden-tan and lavender toning. Vibrant mint luster adds to the terrific eye appeal. PCGS has graded only five numerically finer examples (8/13). NGC ID# 2558, PCGS# 7188

**1889-CC Morgan Dollar, AU50
Key Carson City Issue**

6610 1889-CC AU50 PCGS. The 1889-CC is the scarcest Morgan dollar from the Carson City Mint and collectors prize the issue in all grades. This lightly worn AU example retains most of its original design detail and the lightly abraded surfaces display mottled shades of sea-green and cerulean-blue toning. Prooflike reflectivity is evident in many areas. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, AU53
Noticeable Mint Luster Remains**

6611 1889-CC AU53 NGC. Like the 1893-S, and also a key to the Morgan series, the 1889-CC is widely sought after in all grades by collectors. However, it is seldom found in such a high grade as this coin. The surfaces are nearly brilliant with just a hint of peripheral color around each side, and there is a noticeable portion of mint luster remaining around the devices. Lightly abraded; in fact, there are no mentionable marks on either side.
Ex: Dallas Signature (Heritage, 4/2007), lot 1149. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Choice AU
Lightly Toned, Traces of Luster

- 6612 1889-CC AU55 NGC.** Staff writer Paul Green, writing about the 1889-CC Morgan dollar in *Numismatic News*, said: "Some Carson City Morgan dollars are not that tough, as they were found in original bags in the Treasury vaults in the mid 1960s and sold to collectors. The 1889-CC, however, was one example not found in those bags." A narrow ribbon of orange-gold toning rings portions of the borders on both sides of this Choice AU specimen, and is joined on the obverse by whispers of cobalt-blue and lavender. Traces of luster are visible in the protected areas, and nice detail characterizes the design elements. Some small contact marks are noted on the obverse.
Ex: ANA Signature (Heritage, 8/2007), lot 2318. NGC ID# 2559, PCGS# 7190

1889-O Morgan Dollar, MS65
Above-Average Strike
Rare Any Finer

- 6613 1889-O MS65 PCGS. CAC.** The 1889-O Morgan was struck in huge quantities, approaching 12 million pieces, many of which were released into the channels of commerce. Mint State coins are common through the MS64 level of preservation. PCGS and NGC have graded about 200 coins as MS65 and fewer than 20 examples finer (8/13). The lustrous surfaces of this Gem are essentially color-free save for a sliver of reddish-gold along the upper-left reverse rim. While the vast majority of surviving coins are flatly struck in the centers this piece exhibits partial definition in the hair at Liberty's ear and the eagle's breast feathers. A few light marks and scuffs are in concert with the designated grade. Housed in a prior generation holder. NGC ID# 255A, PCGS# 7192

1890-CC Morgan Dollar, MS65
Extremely Difficult Any Finer
Well-Struck and Lustrous

- 6614 1890-CC MS65 PCGS. CAC.** The 1890-CC Morgan has a mintage of 2,309,041 pieces, the largest in the Carson City series. Examples can be located through near-Gem without too much difficulty. Gems, on the other hand, are elusive, and finer pieces are nearly impossible to obtain. Solidly struck, including the hair at Liberty's ear and the eagle's breast feathers. Attractive luster emanates from the essentially untoned surfaces that reveal just a few unobtrusive marks. Housed in a prior generation holder. PCGS has certified just 10 finer examples and NGC two finer. (8/13). NGC ID# 255D, PCGS# 7198

1890-CC Morgan Dollar, MS65 Prooflike
No Finer Prooflike Coins at PCGS

- 6615 1890-CC MS65 Prooflike PCGS.** Sharply detailed, with none of the softness often seen on prooflike examples, this delightful Gem displays brightly reflective fields with just a few minor contact marks on both sides. Eye appeal is extraordinary. Population: 14 in 65 Prooflike, 0 finer (8/13). NGC ID# 255D, PCGS# 7199

1890-S Dollar, MS66
Spectacularly Toned

- 6616 1890-S MS66 PCGS. CAC.** The 1890-S Morgan dollar was produced in large numbers, but the issue is quite scarce in Premium Gem condition. The present coin displays powdery lavender and gold patina over both sides, creating a fascinating play of colors. Sharply detailed devices and frosty mint luster are evident beneath the toning. Housed in a green label holder. Only six coins have been certified in higher numeric grades at PCGS (8/13).
From The Strawberry Fields Collection. NGC ID# 255F, PCGS# 7202

**1890-S Morgan Dollar, MS66+
Only Six Finer PCGS Coins**

- 6617 1890-S MS66+ PCGS. CAC.** Cartwheel luster and a swath of rich colors along the left portion of the obverse provide this well struck Premium Gem with strong visual appeal. The colors include hues of green, blue, copper, and wine. Other than that crescent shape, the rest of the obverse is virtually untoned. A patina of gold, golden-brown, orange, teal, and rose covers the reverse. Population: 2 in 66+, 6 finer (8/13).
From The Strawberry Fields Collection. NGC ID# 255F, PCGS# 7202

**1891 Morgan Dollar, MS65
Extremely Rare in Finer Grades**

- 6618 1891 MS65 PCGS.** Nearly 8.7 million Morgan dollars were struck at the Philadelphia Mint in 1891. Despite the substantial mintage, the 1891 is seldom encountered in Gem condition, and finer examples are prohibitively rare. This well-detailed Gem displays slightly subdued, but unbroken cartwheel mint luster and few signs of contact. PCGS has graded only three numerically finer examples (8/13). NGC ID# 255G, PCGS# 7204

**1891 Morgan Dollar, MS65
Natural Multicolor Toning**

- 6619 1891 MS65 PCGS.** The 1891 Morgan dollar is more difficult to locate in MS65 condition than its large mintage of nearly 8.7 million pieces would suggest, and finer examples are virtually unobtainable. This well-detailed Gem displays vibrant mint luster under shades of gray, blue, and sea-green patina. PCGS has graded only three numerically finer specimens (8/13). NGC ID# 255G, PCGS# 7204

**1891 Morgan Dollar, MS65
Conditionally Rare in Finer Grades**

- 6620 1891 MS65 PCGS.** The 1891 Morgan dollar is a scarce issue in MS65 condition, and this date is a prime condition rarity any finer. This attractive Gem displays well-detailed design elements and cartwheel mint luster throughout. The smooth creamy surfaces show delicate shades of golden-tan toning. PCGS has graded only three numerically finer examples (8/13). NGC ID# 255G, PCGS# 7204

**1891 Morgan Dollar, MS65
Extremely Elusive in Finer Grades**

- 6621 1891 MS65 PCGS.** The 1891 Morgan dollar was produced in large numbers, but the date is seldom encountered in MS65 condition and finer grades are extremely rare. This attractive Gem exhibits well-detailed design elements and vibrant mint luster under a patina of silver-gray and violet-pink hues. PCGS has graded three numerically finer examples (8/13). NGC ID# 255G, PCGS# 7204

**1891-CC Morgan Dollar, MS65
Elusive Issue in Finer Grades**

- 6622 1891-CC MS65 PCGS. CAC.** From a mintage of more than 1.6 million pieces, the 1891-CC Morgan dollar is surprisingly difficult to locate in grades above the Gem level. This impressive MS65 specimen displays vibrant mint luster and sharply detailed design elements throughout. PCGS has graded 29 numerically finer examples (8/13). NGC ID# 255H, PCGS# 7206

1891-O Morgan Dollar, MS65
Seldom Encountered in High Grade

- 6623 1891-O MS65 NGC.** The 1891-O Morgan dollar was produced in large numbers, but most examples seen are softly struck and suffer from excessive bagmarks. This attractive Gem is well-detailed in most areas, but a touch of the typical softness shows on the hair above the ears and the eagle's claws. Vibrant mint luster adds to the considerable eye appeal of this piece, and only minor signs of contact are present. Census: 66 in 65 (1 in 65+), 2 finer (8/13). NGC ID# 255J, PCGS# 7208

1891-O Morgan Dollar, MS65
Extremely Rare in Finer Grades

- 6624 1891-O MS65 NGC.** The surfaces of this well-preserved Gem have a lovely soft appearance. They exhibit cartwheel luster, yet appear satiny as well as frosty, as light rolls over the features of their famous, elegant design. Some gentle golden-russet patina gradually deepens toward the borders. Any grazes or blemishes are minor, and do little to detract from the delightful eye appeal of this specimen. NGC has only certified two numerically finer examples (8/13). NGC ID# 255J, PCGS# 7208

1892 Dollar, MS65+
Bold Cartwheel Luster

- 6625 1892 MS65+ PCGS. CAC.** Strong cartwheel luster is largely silver with a faint rose blush to the centers. Both sides are generally smooth with few abrasions, though a small scrape is noted at the lower part of Liberty's neck and a handful of other marks are scattered. PCGS has graded only four examples as MS66 or finer (8/13). NGC ID# 255L, PCGS# 7212

1892-CC Dollar, MS64+
Dazzling Cartwheel Luster

- 6626 1892-CC MS64+ PCGS. CAC.** When tilted in the light, this coin's cartwheel luster rolls and rolls. The well-struck obverse has a profusion of gray, gold, green, and blue hues, while on the reverse, those are mostly border hues around a faintly toned silver core. The portrait side is striking, the eagle's even more so. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, Highly Lustrous MS65

- 6627 1892-CC MS65 PCGS.** The mintage of 1.3 million pieces ensures the 1892-CC dollar will be available in most grades. Gems are moderately available, but this issue is very seldom available any finer. The mint luster seen here is of special note and thoroughly consistent with most other Carson City dates. The interior of each side is brilliant and surrounded by golden-rose at the margins. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS65
Elusive Issue in Higher Grades

- 6628 1892-CC MS65 PCGS.** This impressive Gem Morgan dollar displays well-detailed design elements, with a touch of softness evident on the hair strands above Liberty's ear. The pleasing surfaces offer vibrant mint luster and a few traces of light gold toning. PCGS has certified only 26 coins in higher numeric grades (8/13). NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS65
Better Date in High Grade**

6629 1892-CC MS65 PCGS. CAC. Unlike some other issues from the Carson City Mint, the 1892-CC Morgan dollar was not heavily represented in the Treasury releases of the 1960s. As a result, the 1892-CC is an elusive date in high grade. This well-detailed Gem exhibits vibrant cartwheel mint luster and lightly marked surfaces, with a few hints of golden-tan toning. PCGS has graded 26 numerically finer examples (8/13). NGC ID# 255M, PCGS# 7214

**1892-O Silver Dollar, MS65
Multicolor Patina**

6630 1892-O MS65 NGC. Attractive apple-green, autumn-brown, plum-red, and olive-gold toning invigorates this lustrous and exceptionally unabraded example. The strike shows merging of detail at the centers, usual for the New Orleans facility. The 1892-O is common in circulated grades and fairly plentiful in Choice Mint State, but Gems are surprisingly scarce. Certified in an old pre-hologram holder. NGC ID# 255N, PCGS# 7216

**1893 Morgan Dollar, MS65
Bright and Lustrous**

6631 1893 MS65 PCGS. VAM-2. The 3 in the date is doubled low on this gorgeous Gem. The piece is well struck and boasts rich luster along with brilliant surfaces that reveal only small areas of light toning. Roller marks are present on the obverse. The 1893 Philadelphia issue is a well-known low-mintage issue within the Morgan dollar series, struck to the extent of 378,000 strikes plus a handful of proofs. PCGS has awarded higher numeric grades to only 3 examples (8/13). NGC ID# 255R, PCGS# 7220

**1893 Dollar, Brilliant MS65
Remarkably Clean Surfaces**

6632 1893 MS65 PCGS. This amazing Gem has brilliant silver surfaces with exceptional luster. The surfaces are smooth and frosty, with only a few marks, none of significance. Like many issues in the 1890s, this is an important condition rarity. PCGS has only certified three finer examples (8/13).
From The Jack Lee Estate, Inventory/Dallas Signature (Heritage, 10/2008), lot 1387. NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS65
Extremely Rare Any Finer**

6633 1893 MS65 PCGS. The 1893 Philadelphia issue is a well-known low-mintage issue within the Morgan dollar series, struck to the extent of 378,000 circulation strikes. The highly lustrous surfaces of this Gem display occasional whispers of light tan color, more so on the reverse. The design elements are generally well struck, including nearly full detail in the hair above Liberty's ear. A few minute marks are within the parameters of the designated grade. This issue is very difficult to locate any finer; PCGS and NGC have seen only seven coins grading higher (8/13). NGC ID# 255R, PCGS# 7220

**1893-CC Morgan Dollar, MS61
Vibrant Mint Luster, Few Marks on Reverse**

6634 1893-CC MS61 NGC. The Carson City Mint produced a modest mintage of 677,000 Morgan dollars in 1893, its final year of operations. This flashy Mint State specimen is sharply detailed, with brilliant surfaces that radiate vibrant mint luster and show a scattering of minor contact marks, mostly on the obverse. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Final Carson City Issue

- 6635** 1893-CC MS63 PCGS. An attractive Select Morgan dollar from the final year of the Carson City Mint, this coin exhibits sharply detailed design elements and vibrant mint luster on both sides. A few minor contact marks do little to detract from the strong visual appeal, while wisps of golden-tan toning enhance the pleasing surfaces. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS64
Flashy Cartwheel Luster

- 6636** 1893-CC MS64 NGC. Flashy cartwheel luster shines through silver fields. The well-frosted devices show a degree of softness, most notably at the hair over Liberty's ear, but the all-around eye appeal is solid. Hints of golden color visit the rims, while the upper right reverse has a tiny dot of charcoal near the eagle's head. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS64+
Last Year for the Mint

- 6637** 1893-CC MS64+ PCGS. CAC. The Carson City Mint was shuttered in 1885 after Grover Cleveland took office as President, revived in 1889 when Benjamin Harrison began his term, and finally closed for good once Cleveland returned to the White House. In just a few months, Carson City put out more than two-thirds of a million Morgan dollars for its final issue of the denomination, among them this MS64+ example on the cusp of condition rarity. Well-defined and lightly abraded, the piece is largely silver with cartwheel luster and a small but strong area of reddish-orange just below the eagle's arrows. PCGS has graded only 11 survivors as MS65 or better (8/13). NGC ID# 255S, PCGS# 7222

**1893-S Morgan Dollar, VF20
Remarkably Clean Surfaces**

6638 1893-S VF20 NGC. The majority of known pieces are in the grade categories of Very Fine. Bowers (2007) writes that: "Most such pieces circulated in the American West, and for an appropriate but apparently restricted time, to bring them to this grade." Charcoal-gray toning runs over both sides, each of which is remarkably devoid of serious marks after having seen moderate circulation. Moreover, the design elements display nice detail. This will be a welcome addition to a mid-grade Morgan dollar collection. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF Details
Low-Mintage Key Date**

6639 1893-S —Improperly Cleaned — NGC Details. XF. The 1893-S is the low-mintage (100,000 pieces), business strike "king of the Morgan dollar" series. Examples are prized by collectors in all grades, even those with minor impairments. The majority of 1893-S coins are in the Fine to Very Fine grade range. Extremely Fine pieces are difficult to come by. This XF Details example presents an important opportunity for the Morgan dollar specialist, or for those who simply want to include a key date coin in their collection. Soft golden patina covers both sides of this well-defined specimen. Light marks do not disturb. Prospective bidders should not be dissuaded by the NGC disclaimer as the cleaning is not all that apparent.

**1893-S Morgan Dollar, XF Details
Lightly Worn Key**

6640 1893-S — Improperly Cleaned — NGC Details. XF. Mottled shades of pale green, lavender, and powder-blue toning blanket the surfaces of this important key date. The design elements are lightly worn for an 1893-S, which is seldom encountered in grades above VF. A lightly abraded and still-attractive specimen, despite the noted cleaning. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, XF40
Series Key**

6641 1893-S XF40 NGC. Traces of luster reside in the protected areas of this key-date Morgan. Bright silver surfaces exhibit whispers of light gray. The design elements retain good detail, despite high-point wear. There are a few small marks, as expected for the grade designation.
Ex: Auction '86 (RARCOA, 7/1986), lot 806; FUN Signature (Heritage, 1/2009), lot 4719. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, MS65
Low-Mintage Philadelphia Key**

6642 1894 MS65 PCGS. Silver dollar mintages dropped precipitously after the repeal of the silver purchasing legislation in 1893 and the financial panic that preceded it. Only 110,000 Morgan dollars were struck in 1894, the second-lowest business-strike mintage of the series. Few coins were needed in those hard economic times and most of the mintage was stored in Treasury vaults in the late 19th and early 20th centuries. Undoubtedly, a number were melted under the provisions of the Pittman Act in 1918. Although a few bags were released in the 1950s, the 1894 was not well-represented in the great Treasury releases of the 1960s, with just a few scattered examples surfacing in that holding. Accordingly, the 1894 is an elusive date in all grades today.

The present coin is a delightful Gem, with sharply detailed design elements and vibrant cartwheel mint luster throughout. The brilliant surfaces show just a few hints of golden-tan toning and only a few minor contact marks are evident. Eye appeal is tremendous. Population: 20 in 65, 4 finer (8/13). NGC ID# 255V, PCGS# 7228

**1894-O Morgan Dollar, MS64
Challenging Issue in High Grade**

6643 1894-O MS64 NGC. The 1894-O is an issue that was struck at the height (or would that be nadir?) of the low mintage years in the mid-1890s. A large percentage of 1894-O Dollars entered circulation and many apparently stayed there. Uncirculated coins seem to have two characteristics in common: poor striking quality and indifferent luster. The central details on this piece do show some striking softness, as one would expect. However, the luster characteristics are exceptional, being bright and satiny with a hard metallic gleam that is most appealing. Very lightly abraded, the surfaces are brilliant throughout except for a slight accent of golden patina over the denticles. NGC has graded only six numerically finer examples (8/13).

Ex: FUN Signature (*Heritage*, 1/2003), lot 8148. NGC ID# 255W, PCGS# 7230

**1894-O Dollar, Exceptional MS64+
Only Six Finer at NGC**

6644 1894-O MS64+ NGC. The Morgan dollars of 1894 from New Orleans saw a mintage of 1.7 million pieces. Quality control was apparently not a first priority as the issue was poorly struck and exhibited dull luster. Additionally, the majority of 1894-Os are heavily bagmarked. Consequently, locating an example that is decent or above average is a matter of luck. This high-end near-Gem is much better-defined than most examples, showing about one-third of the detail in the hair over Liberty's ear and a modicum of definition in the eagle's breast feathers (most survivors are totally flat in these areas). The luster is also attractive. The mostly brilliant surfaces display whispers of electric-blue and russet at the obverse margins. The reverse is impeccably preserved and the few minute marks on the obverse are well within the parameters of the grade designation. Truly an exceptional piece for this poorly produced issue. Census: 8 in 64+, 6 finer (8/13). NGC ID# 255W, PCGS# 7230

**1894-O Morgan Dollar, MS64
Strong Eye Appeal**

6645 1894-O MS64 PCGS. CAC. The 1894-O Morgan is available in circulated grades, as evident from the population reports. Mint State coins are another story, being very scarce through near-Gem and nearly impossible to locate any finer. For this reason it is likely that the certified population of near-Gems is inflated by resubmissions in the hope of attaining Gem classification.

The silver-white surfaces display pleasing luster, an unusual attribute of this issue that is often found dull. Whispers of ocean-blue and purple cling to the left obverse margin. The strike is weak in the centers, another characteristic of the date, but we hasten to add that slight definition is visible in the hair above Liberty's ear. Both sides are minimally marked, indeed less so than what would be expected for the designated grade. The eye appeal is above average, affirmed by the CAC label. PCGS and NGC combined have seen fewer than 20 pieces finer (8/13). NGC ID# 255W, PCGS# 7230

**1895-O Morgan Dollar, AU58
Second-Lowest New Orleans Mintage**

6646 1895-O AU58 NGC. Probably more than 100,000 of the original 450,000 1895-O Morgan dollars were melted. Soft violet and orange patination resides on this near-Mint State specimen that retains a considerable amount of luster. The design elements are well defined, and both sides are quite clean for a coin having experienced brief circulation. This coin exhibits nice eye appeal. NGC ID# 255Y, PCGS# 7236

**1895-S Silver Dollar, MS63
Old Green Label Holder**

6647 1895-S MS63 PCGS. Dazzling luster, smooth fields, and a bold strike combine to ensure the eye appeal of this Select Mint State better date Morgan dollar. Light rose-gold toning adorns the borders and cheek. The eagle's breast has one small mark and the portrait displays distributed delicate grazes. Housed in an old green label holder. NGC ID# 255Z, PCGS# 7238

**1895-S Dollar, MS64+
High-End Semikey**

6648 1895-S MS64+ PCGS. A lightly frosted and partly reflective example of this semikey issue that is oh-so-close to a far more expensive Gem grade. Minor white and gray toning-dots appear in the obverse fields, but the remainder of the coin is silver. PCGS has graded only 36 pieces as MS65 or better (8/13). NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS62 Prooflike
Bright Mirrors and Frosty Devices**

6649 1895-S MS62 Prooflike NGC. The 1895-S Morgan dollar boasts a low mintage of just 400,000 pieces. Prooflike examples are definitely in the minority and many survivors exhibit excessive bag marks. This attractive MS62 specimen displays sharply detailed design elements and brightly reflective surfaces, with significant contrast and only scattered signs of contact. Census: 21 in 62 Prooflike, 58 finer (8/13). NGC ID# 255Z, PCGS# 7239

**1896 Silver Dollar, MS67
Delicate Gold Toning**

6650 1896 MS67 PCGS. A delicate crescent of light gold toning appears at the lower left obverse, covering most of the field from below the neck to eye level. The left reverse has a thin crescent of dusky gray toning. The balance of this Superb Gem has frosty silver luster. A highly appealing piece that is tied for the finest certified. Population: 36 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 2562, PCGS# 7240

1896 Morgan Dollar, MS67
No Numerically Finer Coins at PCGS

6651 1896 MS67 PCGS. Potent luster and brilliant, untoned surfaces provide this Superb Gem representative with a strong degree of eye appeal. The coin exhibits a sharp strike, even at the centers. A rim tick is present near 7 o'clock on the obverse. Population: 36 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 2562, PCGS# 7240

1896 Morgan Dollar, MS67+
Prime Registry Set Candidate

6652 1896 MS67+ PCGS. CAC. The 1896 Morgan dollar has a reported mintage of nearly 10 million pieces, making the date one of the most available P-mint issues of the decade. Unlike many dates with large mintages, the 1896 is known as a well-produced issue, easily located in all grades up to the Gem level. Of course, the population does thin out in higher grades, and few survivors can match the quality and eye appeal of the coin offered here.

The present coin is a spectacular high-end Superb Gem, with sharply detailed design elements and vibrant cartwheel mint luster. The virtually pristine surfaces are mostly brilliant, with a few hints of golden-tan toning. This coin is a "must Have" for Registry Set collectors and we expect spirited competition when this lot is called. Population: 36 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 2562, PCGS# 7240

1896-O Morgan Dollar, MS64
Rarely Seen This Fine

6653 1896-O MS64 NGC. The 1896-O Morgan dollar was not a well-produced issue, as the New Orleans Mint was concentrating on quantity rather than quality in the 1890s. A substantial mintage of 4.9 million pieces was achieved, but mint personnel spaced the dies too far apart in the presses in an effort to extend die life, and the typical example was softly struck with insipid mint luster. The majority of the mintage was released into circulation, and worn circulated examples are easy to locate today. The coins that were saved in Treasury vaults were roughly handled in storage, and excessive bagmarks are also a problem. Altogether, the 1896-O Morgan dollar is one of the most challenging issues of the series in high grade.

This attractive Choice specimen exhibits a better-than-average strike, with sharp details in many areas and just a touch of softness in isolated spots, like the eagle's claws. The mostly brilliant surfaces are brightly lustrous, and show only minor signs of contact. A few hints of golden-tan and pink patina add to the strong visual appeal. Census: 10 in 64, 3 finer (8/13). NGC ID# 2563, PCGS# 7242

1896-O Dollar, MS64
Well-Known Condition Rarity

6654 1896-O MS64 PCGS. Ex: Bella. Mint State 1896-O dollars are readily available through the MS62 level of preservation. Above the MS62 level, the supply drops precipitously. Select coins are scarce, near-Gems are rare, and anything finer is extremely rare.

Nearly all examples are poorly struck. The present MS64 coin reveals the typical weakness in the centers, but the intensely lustrous surfaces help make up for this. Wisps of light tan-gray color make occasional visits to both sides, each of which possesses just a few minor marks. The most obvious mark is a shallow, diagonal abrasion on the neck of Liberty which provides a ready pedigree identifier. Population: 26 in 64, 3 finer (8/13). NGC ID# 2563, PCGS# 7242

1896-S Dollar, Lightly Toned MS65

6655 1896-S MS65 PCGS. With a mintage of precisely 5 million pieces, the 1896-S is available for a price in lesser Mint State grades but is genuinely scarce as a Gem and extremely rare any finer; PCGS has certified only four examples as MS66 or better (8/13). This MS65 coin has a light golden cast overall with strong silver underlying luster. A few small depressed areas on the obverse are as-struck, and the pattern of marks on each side is consistent with the Gem designation. Generally well-defined with only a touch of the usual softness noted at the hair over Liberty's ear. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS65+
Late-Series Condition Rarity**

6656 1896-S MS65+ PCGS. CAC. The 1896-S Morgan dollar has a reported mintage of exactly 5 million pieces, making the issue easy to locate in lower Mint State grades. The 1896-S is very scarce at the Gem level, however, and a prime condition rarity in finer grades, making this high-end Gem an especially attractive combination of quality and value.

The present coin offers well-detailed design elements, with just a touch of the usual softness on the hair above Liberty's ear. The creamy surfaces radiate vibrant cartwheel mint luster, with no mentionable signs of contact. Population: 66 in 65 (3 in 65+), 4 finer (8/13). NGC ID# 2564, PCGS# 7244

**1898 Morgan Dollar, MS67
None Numerically Finer at PCGS**

6657 1898 MS67 PCGS. A magnificent Superb Gem, with pinpoint definition on all design elements and unbroken cartwheel mint luster. Close inspection with a loupe reveals no mentionable distractions and the surfaces display delicate shades of tan and lavender toning. Population: 41 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 2568, PCGS# 7252

**1898 Morgan Dollar, MS67
Among the Finest Certified**

6658 1898 MS67 PCGS. CAC. This spectacular Superb Gem exhibits sharply detailed design elements with just the slightest trace of softness on the hair strands above Liberty's ear. The well-preserved surfaces are graced by attractive hints of golden-tan toning and vibrant mint luster is evident on both sides. Population: 41 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 2568, PCGS# 7252

**1898 Morgan Dollar, MS66 Deep Mirror Prooflike
Conditionally Rare**

6659 1898 MS66 Deep Mirror Prooflike PCGS. Deep Mirror Prooflike examples from this date are extremely elusive, especially at the upper mint state levels. The fields are flashy and brightly reflective on this Premium Gem representative exhibiting a sharp strike. A bit of haziness is present in the fields. Population: 12 in 66 Deep Mirror Prooflike, 1 finer (8/13). NGC ID# 2568, PCGS# 97253

**1899-S Morgan Dollar, MS66
Conditionally Rare Any Finer**

6660 1899-S MS66 PCGS. A superlative example of this date, with exceptionally clean surfaces, dazzling cartwheel luster, and superb eye appeal. This Premium Gem example is crisply struck save for some softness above Liberty's ear. A mere whisper of champagne patina has begun to form on both sides. This is an important condition in which to find this date, as PCGS has graded only eight pieces finer (8/13).
Ex: FUN Signature (Heritage, 1/2007), lot 7397. NGC ID# 256D, PCGS# 7262

1900-O/CC Dollar, MS66
Colorful Example of VAM-8

6661 1900-O/CC MS66 PCGS. VAM-8. A Top 100 Variety. The 1900-O/CC dollars are the last coins to bear Carson City's mintmark, albeit in a semi-effaced form. This colorful and pleasingly lustrous example has waves of red-to-gold toning with blue-violet hues on the obverse and windows of silver on the reverse. For the collected 1900-O/CC varieties, Population: 86 in 66, 2 finer (8/13). NGC ID# 256G, PCGS# 7268

1900-O/CC Morgan Dollar, MS66
Popular VAM-8

6662 1900-O/CC MS66 PCGS. CAC. VAM-8. A Top 100 Variety. A delightful Premium Gem example of this popular variety, with the primary mintmark centered and the remains of the undertype CC shifted to the left. The design elements are sharply detailed and the surfaces radiate vibrant mint luster. Population: 86 in 66, 2 finer (8/13). NGC ID# 256G, PCGS# 7268

1901 Morgan Dollar, Rim-Toned MS63
Conditional Series Rarity

6663 1901 MS63 PCGS. The 1901 Philadelphia Mint Morgan dollar issue is a notable rarity in the upper reaches of Mint State, where near-Gems are the highest grade level practically obtainable. While PCGS has seen slightly more than 100 pieces in the MS63 grade of this coin, it has seen 10 in MS63+, 28 in MS64 (none in MS64+), and three in MS65, the top grade (8/13). This example offers softly lustrous pinkish-gray central areas with glints of pale aqua near the obverse rims and russet-gold ringing the reverse. A few scattered nicks and marks account for the grade but are not overly bothersome. A prize acquisition for the many collectors putting together a set of Morgan dollars. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS63
Challenging Issue in High Grade

6664 1901 MS63 PCGS. CAC. Despite a mintage of 6,962,000 pieces, the 1901 Morgan dollar is one of the most challenging issues of the series in high grade. Most of the mintage was released into circulation near the time of issue, and the majority of the coins that were stored in Treasury vaults were melted under the provisions of the Pittman Act in 1918. As a result, the 1901 was not well-represented in the releases of the 1960s and the issue is a prime condition rarity today.

This attractive Select specimen exhibits a better-than-average strike, with just a touch of softness on the hair above the ear. The surfaces show only minor signs of contact and vibrant mint luster radiates from both sides. PCGS has graded 31 numerically finer examples (8/13). NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS64
Prime Condition Rarity in the Series

6665 1901 MS64 PCGS Secure. Ex: Bella. Only a trace of pale champagne toning is present on each side of this satiny near-Gem. It is a sharply struck piece with excellent detail on both sides. The typical 1901 has unusual texturing on the reverse, caused by abnormal metal flow that resulted from improper striking pressure. Seen on some other dates, the resulting rippled surfaces are more pronounced on this date than any other in the series. Collectors are advised to seek an example such as this piece, where the unusual textured appearance is minimal.

For the serious collector of Morgan dollars, this date is one of the biggest challenges in the series, and is usually found in circulated or low-end Mint State grades. Choice and Gem pieces are extremely rare. Like certain other dates, nearly all of the production of 1901 Morgan dollars was placed in circulation. Even AU coins are common, although a shortage of true Mint State pieces keeps the price of AU coins at strong levels. For the advanced collector, Choice and Gem pieces appear on the market infrequently, but are well worth the wait.

The year 1901 was a transitional one in the Philadelphia Mint. The new Spring Garden Street facility was occupied in June, and ready to begin coinage production in October. It seems that nearly the entire Morgan dollar production was accomplished at the old facility on Chestnut Street. Official Mint records indicate that 6,842,000 coins were produced from January through September, and only 120,000 pieces during the remaining three months at the new Mint building.

Ex: Dallas Signature (Heritage, 11/2007), lot 103, where it brought \$37,350. NGC ID# 256J, PCGS# 7272

1902-O Dollar, Lightly Toned MS67

6666 1902-O MS67 PCGS Secure. Ex: Bella. Cream and gold patina subtly embraces each side of this New Orleans Superb Gem. Though a touch of striking softness is noted on the hair over Liberty's ear, both sides are remarkably well-preserved with only a few tiny faults noted at places such as the bottom of Liberty's nose. Despite a generous mintage of more than 8.6 million pieces, the 1902-O dollar was little-saved at the time of release and seldom is encountered in top-shelf grades such as MS67. PCGS has certified only nine coins at that level and none in MS67+, MS68, or finer grades (8/13). NGC ID# 256N, PCGS# 7280

1903-S Morgan Dollar, AU55
Rare VAM-2, Small S Variety

6667 1903-S Small S. AU55 NGC. VAM-2. A Top 100 Variety. The 1903-S Morgan dollar with a small S mintmark is a rare issue, discovered by Melvin Carmichael in 1951. A popular theory is that the tiny mintmark on the 1903-S Morgan dollar was created by using the S punch designed for the Barber quarters of that date. Examples are quite elusive in grades above XF and auction offerings always bring a strong premium over the already better prices realized by ordinary 1903-S dollars.

This attractive Choice AU example shows just the slightest trace of wear on the sharply detailed design elements. The lightly abraded brilliant surfaces retain most of their original frosty mint luster. We expect intense competition from VAM specialists when this lot is called. Census for VAM-2: 4 in 55, 4 finer (8/13). NGC ID# 256T, PCGS# 7288

**1904-S Morgan Dollar, MS64
Vivid Multicolor Toning**

6668 1904-S MS64 PCGS. CAC. Attractive shades of greenish-gold and lavender-gray toning blanket the surfaces of this attractive Choice example, with more color on the obverse. The well-detailed design elements show a touch of the usual softness on the hair strands above Liberty's ear. Few signs of contact are evident. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS65
Well-Struck and Lustrous**

6669 1904-S MS65 PCGS. CAC. The 1904-S Morgan dollar claims a mintage of 2.3 million pieces. Examples can be acquired in circulated grades of Very Fine and Extremely Fine without too much trouble, but About Uncirculated specimens become somewhat scarce. Mint State coins are elusive, especially in the higher levels. This Gem has received a better strike than ordinarily seen on this issue. Specifically, a fair amount of detail is evident in the hair above Liberty's ear. Bright mint luster adorns the untuned surfaces, and the few marks present are well within the parameters of the designated grade. PCGS has seen just 11 pieces finer and NGC five better (8/13). NGC ID# 256W, PCGS# 7294

1904-S Dollar, Colorful MS65

6670 1904-S MS65 PCGS. CAC. A colorful Gem with dappled blue, green, and gold shadings across the majority of the obverse and broader swaths of similar hues around a small silver core on the reverse. A small amount of striking softness on the hair over Liberty's ear is no obstacle to the MS65 designation. NGC ID# 256W, PCGS# 7294

**1921-S Silver Dollar, MS66
Final Morgan Issue**

6671 1921-S MS66 PCGS. The well-preserved surfaces of this delightful Premium Gem exhibit unbroken cartwheel mint luster under attractive shades of greenish-gold and lavender-gray toning. The well-detailed design elements show just a touch of the typical softness on the eagle's feathers. Population: 37 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 256Z, PCGS# 7300

**1921-S Morgan Dollar, MS66
None Numerically Finer at PCGS**

6672 1921-S MS66 PCGS. Although the 1921-S Morgan dollar claims a huge mintage of nearly 21.7 million pieces, the issue is rare in MS66 condition, and finer examples are virtually unobtainable. This sharply detailed Premium Gem exhibits vibrant mint luster and well-preserved surfaces with a few hints of golden-tan toning. Population: 37 in 66 (1 in 66+), 0 finer (8/13). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1880 Morgan Dollar, PR66 Cameo
Rich Patina**

6673 1880 PR66 Cameo PCGS. Well-contrasted through considerable patina, which ranges from near-invisible in silver or white-frosted areas to substantial gold-gray that is at its thickest at the upper reverse. The 1880 proof Morgan dollar enjoys one of the higher mintages of the series, making it ideal for type collectors. Population: 19 in 66 (2 in 66+) Cameo, 12 finer (8/13). PCGS# 87315

1884 Morgan Dollar, PR65
Unacknowledged Cameo Contrast

6674 1884 PR65 NGC. Although NGC did not designate this piece Cameo, the lightly frosted devices create moderate contrast against the watery, deeply mirrored fields, especially on the reverse. This boldly struck specimen has only a couple of light hairlines in the fields but is otherwise flawless. Only 875 proofs were struck. Census: 27 in 65, 21 finer (8/13).

Ex: *Baltimore Signature* (Heritage, 7/2008), lot 2455; *Baltimore Signature* (Heritage, 3/2009), lot 1546. NGC ID# 27ZB, PCGS# 7319

1890 Silver Dollar, PR67
Undesignated Cameo Contrast

6675 1890 PR67 PCGS. This Superb Gem proof Morgan dollar is certified in an old green-label PCGS holder, and presents amazing eye appeal. Cameo contrast is visible beneath the deep sea-green and iridescent toning on this undesignated specimen. Myriad bright silver specks shine through the lovely toning. A rare opportunity to acquire a top-grade Superb Gem proof. Population: 10 in 67, 0 finer (8/13). NGC ID# 27ZK, PCGS# 7325

1896 Morgan Dollar, PR66 Cameo
Well-Contrasted and Lightly Toned

6676 1896 PR66 Cameo PCGS. Under even the narrowest definitions of the "golden age" of U.S. classic Cameo coinage, 1896 is a high mark for the popular proof effect. This is a clearly contrasted Premium Gem specimen, firmly at the Cameo level despite areas of light cloudy toning over parts of each side and a faint golden aura. Frost over well-defined devices is ample, though not thick, and close inspection of Liberty's cheek shows a few parallel roller marks, present on the planchet at the time of striking, survived the multiple impressions given to the coin. Population: 7 in 66 (1 in 66+) Cameo, 4 finer (7/13). PCGS# 87331

1896 Dollar, PR61 Deep Cameo
Sharply Struck

6677 1896 PR61 Deep Cameo PCGS. The silver proofs of the late 1890s rank among the best produced and most attractive coins of the 19th century. The present example is a case in point. All design elements are sharply struck, including the hair over Liberty's ear and the eagle's breast feathers. Both sides display excellent field-motif contrast. Post-strike marks, however, limit the coin's grade, showing several marks on the lower obverse portrait. PCGS# 97331

1901 Morgan Dollar, PR66 Cameo
Brilliant Fields and Frosty Devices

- 6678** 1901 PR66 Cameo NGC. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the frosty devices contrast boldly with the deeply mirrored fields. The brilliant surfaces show no mentionable distractions and eye appeal is tremendous. From a nominal proof mintage of 813 pieces. Census: 6 in 66 Cameo, 4 finer (8/13). PCGS# 87336

1902 Morgan Dollar, PR67
Interesting Toning on Each Side

- 6679** 1902 PR67 NGC. Struck at the beginning of the “no-contrast” era of proofing, proofs from 1902 were intentionally produced with bright fields and equally bright devices (usually). This proof dollar is just such a proof. It is almost perfectly preserved and displays rich deep patina that surrounds an oval-shaped area of brilliance on the obverse; the reverse is uniformly slate-blue. Sharply defined. Census: 9 in 67, 4 finer (8/13). NGC ID# 2822, PCGS# 7337

1903 Dollar, PR65
Colorful Patina

- 6680** 1903 PR65 PCGS. The last three regular proof issues of Morgan dollars were struck during the time of brilliant finishes, when cameo effects were rare. Fortunately for this Gem, its bold blue, plum, and orange patina over strong mirrors more than makes up for any lack of contrast. Tremendous eye appeal. Population: 30 in 65 (1 in 65+), 36 finer (8/13). NGC ID# 2823, PCGS# 7338

PEACE DOLLARS

1921 Peace Dollar, Lustrous MS66
The Sole Silver Dollar Struck in High Relief

- 6681** 1921 MS66 PCGS. The 1921 Peace dollar remains a collector favorite in good markets and bad ones. It is distinctive as it was struck in high relief, the only silver dollar to have been so produced. Plus, just over a million pieces were produced. This high-grade representative shows the thick, coruscating mint frost associated with the 1921. The centers of each side are better struck than normally seen also, and the coin is brilliant throughout. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, MS66
High-Relief Issue, Pale ‘Target’ Toning

- 6682** 1921 MS66 PCGS. A thin coating of rose patina accents the obverse. The reverse displays similar colors in a circular “target” fashion. Each side presents a good strike although the reverse is slightly lacking at the central point. There are no singularly mentionable marks on the satiny surfaces.
Ex: Long Beach Signature (Heritage, 9/2004), lot 8961. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, MS66
Better-Than-Average Strike

- 6683** 1921 MS66 NGC. CAC. An attractive Premium Gem from the first year of the Peace dollar design, this coin exhibits well-detailed design elements, with more complete definition on Liberty’s hair than usually seen on this high-relief issue. Delicate shades of champagne-gold toning enhance the well-preserved surfaces and satiny mint luster adds to the outstanding eye appeal. NGC has graded six numerically finer examples (8/13). NGC ID# 2U4E, PCGS# 7356

1923 Peace Dollar, MS67
None Numerically Finer at Either Service

6684 1923 MS67 PCGS. CAC. Brilliant untoned surfaces and rich satin luster provide this Superb Gem with tremendous visual appeal. This pleasing representative exhibits remarkably clean surfaces on each side that are largely devoid of abrasions. Population: 46 in 67, 0 finer (8/13). NGC ID# 257F, PCGS# 7360

1923-S Silver Dollar, MS65
Highest Attainable Grade

6685 1923-S MS65 PCGS. Both sides of this satin Gem have brilliant silver luster beneath champagne toning with deeper gold near the borders. This lovely piece represents the highest attainable grade for most collectors. Only four finer pieces have been certified by PCGS and NGC combined (8/13). NGC ID# 257H, PCGS# 7362

1924 Peace Dollar, MS66+
Magnificent Eye Appeal

6686 1924 MS66+ PCGS. CAC. The 1924 is one of the more common dates in Mint State in the Peace dollar series. PCGS has certified several thousand pieces through MS65, and even its population of Premium Gems approaches 600 coins. Only 29 of the latter are given the MS66+ designation, however, including the present offering. Both sides display soft brassy-gold patina, attractive luster, and well struck devices. Nicely preserved surfaces further enhance the coin's magnificent eye appeal. Population: 29 in 66+, 25 finer (8/13). NGC ID# 257J, PCGS# 7363

1924 Peace Dollar, MS67
Thick, Frosted Mint Luster

6687 1924 MS67 PCGS. CAC. For a 20th century type coin that was made in substantial numbers (as a rule), Peace dollars are remarkably difficult to locate in Superb condition. The mint luster on this piece is its main attraction. It is thick and frosted, rolling around each side unimpeded by the usually seen abrasions. The strike is strong throughout. All-in-all this is just a wonderful coin for type purposes. Population: 23 in 67, 1 finer (8/13). NGC ID# 257J, PCGS# 7363

1924-S Peace Dollar, MS65
Exceptional Quality for the Issue

6688 1924-S MS65 PCGS. The 1924-S Peace dollar shows a mintage exceeding 1.7 million pieces. Roger Burdette (2008) contends that this is one of the poorer issues in the series due to weak strikes, dull luster, and heavy bagmarks. This Gem displays pleasing luster and the soft gold surfaces are imbued with wisps of pale aqua-green around the margins. The strike, while not quite full, is certainly above average, and the few minuscule marks that are present are not severe. Population: 75 in 65 (1 in 65+), 5 finer (8/13). NGC ID# 257K, PCGS# 7364

1925 Peace Dollar, MS67
Only One Finer Coin at PCGS

- 6689 1925 MS67 PCGS. CAC.** The 1925 Peace dollar was produced in large numbers, but the population thins out considerably at the MS67 grade level, and finer coins are virtually unobtainable. This well-detailed Superb Gem exhibits vibrant mint luster throughout and the well-preserved surfaces show just a trace of golden-tan toning. Eye appeal is terrific. Population: 84 in 67, 1 finer (8/13). NGC ID# 257L, PCGS# 7365

1934-S Peace Dollar, MS64+
Strong Mint Luster

- 6690 1934-S MS64+ PCGS. CAC.** In addition to having a relatively small mintage (a little more than 1 million pieces), a number of 1934-S Peace dollars entered the channels of commerce. Moreover, no significant hoards of this issue have surfaced. A veneer of soft gold color does not inhibit the underling strong luster on this high-end near-Gem. The design elements are fairly well-impressed, except for the usual softness in the hair over Liberty's ear. A few unobtrusive marks are unimportant. While more than 600 coins are graded MS64 by PCGS, only 24 are designated MS64+ (8/13). NGC ID# 257Z, PCGS# 7377

ERRORS

Mint Error 1943 Cent, AU55
Struck on a Silver Dime Planchet

- 6691 1943 Lincoln Cent — Struck on a Silver Dime Planchet — AU55 PCGS.** The sea-green, stone-gray, and russet-gold toning provides the first indication that the present cent was struck off-metal. The diameter is slightly smaller than normal, causing the rim to blend into IN GOD WE TRUST. The rim is also weak to absent on the lower reverse, and the strike is soft on the O in ONE. The surfaces are lustrous and unmarked. A desirable date, the same as the famous off-metal bronze pieces.

1936 Buffalo Nickel, MS62 Brown
Struck on Nicaraguan One Centavo Flan

- 6692 1936 Buffalo Nickel — Struck on a Nicaragua One Centavo Planchet — MS62 Brown PCGS.** 3.88 grams. This seemingly impossible error is indeed possible as the Philadelphia Mint was producing coinage for Nicaragua in 1936. A copper planchet for a one centavo piece of that country found its way to a coinage press striking Buffalo nickels, and then made its way out of the Mint through the normal channels. Slight weakness is evident on the high points of this remarkable piece, with olive-brown surfaces showing traces of original mint color.

GOLD DOLLARS

1849-C Dollar, MS60
Closed Wreath Reverse

- 6693 1849-C Closed Wreath MS60 NGC.** Only one die pairing is known. This first collectible Charlotte gold dollar issue is nonetheless very scarce. A meager mintage of 11,634 pieces ensures a paucity of Mint State survivors. The present yellow-gold representative is well-defined aside from softness on the hair near the ear. Luster is ample and the few faded obverse field marks do not challenge the grade. NGC ID# 25BC, PCGS# 7505

**1849-C Closed Wreath Gold Dollar, MS62
Above-Average Strike**

6694 1849-C Closed Wreath MS62 PCGS. CAC. Variety 1. One die pair is known. The 1849-C Closed Wreath comes from a mintage of 11,634 pieces. While it does not approach the extreme rarity of its Open Wreath counterpart, it is a scarce issue in its own right with only 113 examples graded by PCGS. Just 20 of these are in Mint State, none of which are finer than MS63.

Both sides of this MS62 offering display a considerable amount of luster on the bright yellow-gold surfaces. Sharper struck than usually seen, especially on Liberty's hair below the coronet, the leaves on the left side of the wreath, and the dentilation, areas that are sometimes weak. The tiny marks scattered about are characteristic of the issue, helping to account for the lack of higher-grade specimens. Population: 5 in 62, 5 finer (8/13). NGC ID# 25BC, PCGS# 7505

**1849-O Gold Dollar, Open Wreath, MS64
Sharply Struck and Semiprooflike**

6695 1849-O Open Wreath MS64 NGC. Variety 1. The obverse stars are heavier at the top than bottom, and some are repunched. The 1849-O is popular as the first gold dollar from the New Orleans Mint. It is more available than once believed and can be found with little difficulty through MS62. Select and near-Gem pieces are scarce and higher-grade specimens are rare. Pleasing luster adorns the yellow-gold surfaces with bright semireflectivity in the fields on each side. The devices are solidly struck, including the 8 in the date and the LL in DOLLAR, areas that are often weak. Both sides are minimally marked. Census: 23 in 64, 9 finer (8/13). NGC ID# 25BE, PCGS# 7508

**1849-O Open Wreath Gold Dollar, MS64
Outstanding Eye Appeal**

6696 1849-O Open Wreath MS64 NGC. Variety 1. This variety is most easily attributed by the double-punched R in DOLLAR. Near-Gem examples of the 1849-O gold dollar are very scarce, and Gem and finer coins are rare. Apricot-gold patina is imbued with light green, and ebullient luster exudes from both sides. The design elements are sharply struck throughout and no marks of consequence are visible on either side. The eye appeal is outstanding for the designated grade. Census: 23 in 64, 9 finer (8/13). NGC ID# 25BE, PCGS# 7508

**1852-D Gold Dollar, Well-Struck AU58
Scarce in All Grades**

6697 1852-D AU58 NGC. The 1852-D gold dollar claims a mintage of 6,360 pieces. NGC and PCGS have graded fewer than 180 pieces in all grades including about 35 in Mint State, none of which are above MS63. The higher grade categories appear to be inflated by resubmissions. This near-Mint State example displays luster in the recessed areas of its yellow-gold, semiprooflike surfaces and is well struck. Just a few tiny marks are visible. Census: 32 in 58, 25 finer (8/13). NGC ID# 25BS, PCGS# 7519

1853-C Gold Dollar, MS62
Type One Charlotte Type Representative

- 6698 1853-C MS62 PCGS. Variety 1.** Sole die combination known for this issue. The 1853-C is relatively available in most grades and is often used for a Type One Charlotte type representative. However, of the 200-300 pieces known, only 15-25 are believed extant in Uncirculated condition. The centers on this piece are softly struck, more so on the obverse than the reverse. The bright yellow-gold color shows tinges of reddish patina, and the fields are peppered with numerous, small marks that explain the grade. Population: 14 in 62, 5 finer (8/13). NGC ID# 25BV, PCGS# 7522

1854-D Gold Dollar, AU58
Boldly Clashed Obverse

- 6699 1854-D AU58 NGC.** Uncommonly well-struck for this rare low-mintage Dahlonega issue, struck in the amount of only 2,935 coins. The wheat-gold surfaces show only inconsequential marks save for a single thin vertical line near the ear. Minor retained laminations are on the central reverse and the F in OF. Though the obverse field displays overlapping sets of prominent clash marks, as coined, the reverse is only minimally clashed. Census: 24 in 58, 24 finer (8/13). NGC ID# 25BZ, PCGS# 7526

1855 Gold Dollar, MS63
Popular Type Two Representative

- 6700 1855 MS63 PCGS.** From a large mintage of 758,269 pieces, the 1855 gold dollar is a favorite choice of type collectors seeking an example of the short-lived Type Two design. This brightly lustrous Select specimen exhibits well detailed design elements with a touch of softness on the wreath. The lustrous orange-gold surfaces show a few highlights of lilac and only minor signs of contact. NGC ID# 25C4, PCGS# 7532

1855-C Gold Dollar, Almost Uncirculated
The Sole C-Mint Type Two Issue

- 6701 1855-C AU50 PCGS. Variety 2.** Only 9,803 pieces were struck for the 1855-C gold dollar, which is under tremendous demand from collectors as it is the only Type Two issue from the Charlotte Mint. Surprisingly, two die marriages are known for the 1855-C, the final 5 in the date is centered to the right below the A in DOLLAR on the present piece; a different variety has the final 5 centered further left beneath the A. This attractively detailed example has chestnut-gold color and an occasional shallow planchet flaw or clash mark, as made. A brief pinscratch near 3 o'clock on the reverse is of no significance. An important opportunity for the alert specialist. Ex: *Palm Beach Signature (Heritage, 11/2004)*, lot 8042. NGC ID# 25C5, PCGS# 7533

1856-D Gold Dollar, XF40
Key D-Mint Issue

- 6702 1856-D XF40 PCGS. Variety 8-K.** The only known variety. The 1856-D gold dollar is a key date in the series with perhaps fewer than 100 coins known in all grades. The present XF specimen displays deep orange-gold patina. The design elements exhibit somewhat better definition than usually seen. All of LIBERTY shows and the obverse peripheral lettering is sharp except for the U in UNITED. On the reverse, the O in DOLLAR is filled as usual and the 5 in the date is somewhat soft, also typical. Most of the remaining reverse elements are nicely defined. The surfaces on both sides are quite clean. Housed in a green label holder. NGC ID# 25CC, PCGS# 7543

1856-D Gold Dollar, AU58
Challenging Low-Mintage Issue

6703 1856-D AU58 PCGS. Variety 8-K. The 1856-D gold dollar was the first Type Three issue from the Dahlonega Mint. A tiny mintage of just 1,460 pieces was accomplished, making the 1856-D one of the rarest issues of the series. A single pair of dies was sufficient to strike the entire production total in May of 1856. Probably no more than 75-100 examples survive today in all grades, and specimens in AU58 condition are very rare.

The design elements of this attractive near-Mint piece show the typical softness always seen on this issue, with the U in UNITED, the O in DOLLAR, and the 5 in the date all faintly impressed. The pleasing yellow-gold surfaces are lightly abraded and display traces of prooflike reflectivity in sheltered areas. Population: 14 in 58, 7 finer (8/13). NGC ID# 25CC, PCGS# 7543

1866 Gold Dollar, MS67 ★ Prooflike
Deeply Mirrored, Strong Die Clashing

6704 1866 MS67 ★ Prooflike NGC. Production rose to 7,130 pieces after dipping to almost half that amount during the Civil War. Several high-grade Prooflike examples are known, and Garrett-Guth comment that, "The 1866 gold dollar was often struck with fully mirrored prooflike surfaces and can be easily confused with Proofs." This example shows the depth of mirroring they refer to; however, the fields are heavily die clashed which would preclude any confusion with proofs. The strike details are strong overall, and the light reddish-gold surfaces display thick mint frost over the devices. Census: 1 in 67 ★, one piece finer (8/13). PCGS# 77565

1875 Gold Dollar, Semiprooflike AU58
Low-Mintage Date

6705 1875 AU58 PCGS. CAC. The 1875 gold dollar has one of the lowest mintages (400 circulation strikes) of the entire United States coinage series. PCGS has graded slightly more than 60 coins, about one-half of which are in mint condition. Shades of apricot- and yellow-gold color reside over this well-struck, semiprooflike, near-Mint State example. Light circulation marks are not detractive. Population: 10 in 58, 38 finer (8/13). NGC ID# 25DD, PCGS# 7576

PROOF GOLD DOLLARS

1858 Gold Dollar, PR64 Cameo Rarely Seen Early Proof Date

6706 1858 PR64 Cameo PCGS. The number of proof gold dollars minted in 1858 is unknown. Jeff Garrett and Ron Guth (2006) estimate the mintage to be “around 25 or so coins,” with “probably 15 to 20 coins still in collectors’ hands.” David Bowers (2008) estimates the same number of extant specimens. PCGS and NGC have graded a total of 32 pieces, a number of which are undoubtedly resubmissions or crossovers.

The present near-Gem Cameo displays yellow-gold surfaces splashed with whispers of apricot on the obverse. A full strike is seen over all the design features, which stand out against the mirrored fields. A few trivial handling marks barely prevent the attainment of Gem status. This is a super coin for the proof gold specialist, as it is hard to imagine locating a specimen with the superior technical quality and aesthetic appeal possessed by this example. Population: 1 in 64 Cameo, 2 finer (8/13).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 1200, where it brought a surprisingly low \$14,375. NGC ID# 25DZ, PCGS# 87608

1881 Gold Dollar, PR64 Undesignated Cameo Contrast

6707 1881 PR64 PCGS. CAC. An exceptionally low output of proof gold dollars was achieved in 1881 with only 87 pieces struck. This piece is not designated as Cameo or Deep Cameo, and we have to wonder why. Each side displays extraordinarily deep mirrors. Contrasted against the mirroring are the thickly frosted devices. The fields show the often-seen orange-peel texture of proof gold from this era. We see no contact marks that are worthy of mention. This piece represents an excellent value if it can be purchased as a non-Cameo. Population: 4 in 64, 1 finer (8/13). NGC ID# 25ER, PCGS# 7631

1887 Gold Dollar, PR65 Deep Cameo Top-Shelf Contrast

6708 1887 PR65 Deep Cameo PCGS. CAC. Near the end of the gold dollar’s generation-long life, it became a quiet favorite of sorts among the upper crust of the Eastern Seaboard, some of who favored the diminutive but expensive denomination as a glittering gift for Christmas. Perhaps this Gem beauty with its stunning Deep Cameo contrast was bought for just such a purpose, though it may well have gone to a dedicated collector instead. Amply frosted devices created black-and-gold contrast with the fields when tilted out of the light, while the whole lights up pale yellow when dipped into a beam. Population: 1 in 65 Deep Cameo, 2 finer (8/13). NGC ID# 25EX, PCGS# 97637

1888 Gold Dollar, PR65
Great Introduction to the Field

6709 1888 PR65 PCGS. The later 1880s proof gold dollar issues are popular entry-points for collectors of the broader classic proof gold series, as they enjoy the highest mintages by far. This Gem proof is gleaming orange-gold, lightly patinated on a low-contrast obverse but with more of a cameo effect on the reverse. Pleasingly preserved with subtle "orange-peel" texture to the fields and strong all-around appeal. Population: 30 in 65, 10 finer (8/13). NGC ID# 25EY, PCGS# 7638

EARLY QUARTER EAGLES

1807 Quarter Eagle, AU58
Final Capped Bust Right Issue, BD-1

6710 1807 AU58 PCGS. BD-1, R.3. Bass-Dannreuther Die State a/b. The only dies for the date. The Capped Bust Right design was discontinued after 1807, making this date an important one for type collectors. Approximately 250-350 examples survive today in all grades, making the 1807 a reasonably available issue for an early quarter eagle. Of course this was the only use of the obverse die, but the reverse had been used in 1805 to strike the only quarter eagle variety of that year and again in 1806 to strike both overdate varieties of that date.

The present coin is an attractive near-Mint specimen, with well-detailed design elements and lightly abraded antique-gold surfaces that retain considerable amounts of mint luster. No planchet adjustment marks are present. Population: 19 in 58, 28 finer (7/13).
From *The Searight Collection*. NGC ID# 25FC, PCGS# 7656

1825 Quarter Eagle, AU Details
Well Struck

6711 1825 — Damaged — NGC Details. AU. BD-2, High R.4.

The BD-2, with an estimated population of 80 to 100 coins, is the most available of three die pairs for the 1825 quarter eagle, though still very scarce regardless of grade. The recut 5 in the date which is lower than the 2, 1 and 2 away from fraction bar, and a large D in the denomination confirm the variety.

The yellow-gold surfaces display traces of luster in the recessed areas. The design elements are well-impressed, especially in the star centrils and Liberty's hair and cap. The devices are well-centered on the planchet and all dentilation is strong. Some small, shallow round digs are not all that detracting. The interested bidder should not be dissuaded by the NGC disclaimer as the damage is not that serious.

1826 Quarter Eagle, AU55
Traditional Overdate Nomenclature

6712 1826 AU55 PCGS. BD-1, High R.5. Bass-Dannreuther Die State b/b, with both dies showing light clash marks. Only this one die pair is known for the 1826 quarter eagles, and the obverse has traditionally been described as an overdate. There is certainly something under the 6, but its identification remains unknown. John Dannreuther describes the variety as an 1826 over 6, and we tend to agree with his observation. The 1826 and 1827 quarter eagles have much larger stars than any previous year, and that fact provides strong evidence to rule out the overdate status of the obverse die.

Dannreuther suggests that 30 to 35 examples of this variety survive in all grades, although the actual number may be somewhat smaller, perhaps closer to two dozen. We have only offered this issue 12 times in the last 20 years, representing less than 10 distinctly different examples. The Choice AU example offered here is different from any of the others, and it is likely one of the five or six finest known examples.

A lovely 1826 quarter eagle, this specimen has distinct green color with hints of pale blue and tiny orange spots on its lemon-yellow surfaces. Both sides have satin luster with brilliant surfaces beneath the light patina. A few scattered surface marks are consistent with the grade. Here is an extremely important opportunity for the advanced early quarter eagle specialist. Population: 4 in 55, 6 finer (8/13). NGC ID# 25FH, PCGS# 7665

1832 Quarter Eagle, BD-1, AU55
Very Scarce in All Grades

- 6713** 1832 AU55 ANACS. BD-1, R.4. Bass-Dannreuther Die State a/c, sole pair and state reported. This issue is very scarce regardless of condition. John Dannreuther advances a theory in the reference that the 1832 quarter eagle with its obverse tweaked from the 1831 design represents the work of Christian Gobrecht, not William Kneass as has traditionally been held. This Choice AU example is surprisingly bright with ample luster through the pale yellow fields. Both sides show the small, scattered marks commonly associated with modest wear, as well as a handful of digs in the right obverse and upper and right reverse fields. NGC ID# 25FN, PCGS# 7672

1833 Quarter Eagle, AU Details
BD-1, Only Dies for This Date

- 6714** 1833 — Filed Rims — PCGS Genuine. AU Details. BD-1, R.5. Upon initial inspection, this rare date early quarter eagle appears to be a problem-free example with partial mint luster and attractive lime-green and apricot-gold toning. Marks are moderate overall and mostly confined to the field beneath the scroll. Thorough evaluation locates light obverse rim filing, most apparent between 5 and 11 o'clock.

PROOF EARLY QUARTER EAGLE

1831 Quarter Eagle, Proof Pleasing Obverse

6715 1831 — Reverse Damage — NGC Details. Proof. BD-1, R.7 as a Proof. Sole die pair for the year. In *Early U.S. Gold Coin Varieties*, Dannreuther provides a corollary to the usual approach to the proof-business strike divide, that proof is not so much about “method of manufacture” (the *Guide Book’s* definition) but state of mind. The same applies to almost any possible early gold proof. Instead, the process for weighing the “proofness” of an early gold coin runs on two scales, the judgments of individual collectors who stack up small details in their minds and the macro-level consensus of those judgments, whether of the marketplace as a whole or the graders at a major service.

On the micro-level, this coin has numerous characteristics pointing to true proof status, rather than it being merely a prooflike business strike, and the graders at NGC concur that this coin is a no-doubt proof. Both sides show contrast, the obverse more so, with distinct reflectivity in all fields despite the numerous small contact marks that add up to the “Reverse Damage” designation on this coin’s NGC holder. A strike-through thread between stars 1 and 2 suggests recently polished dies, while the uncommonly bold detail on an eagle underlined by a partial wire rim is further testimony. Though impaired, this remains an important proof representative of the Capped Head to Left, Reduced Diameter quarter eagle, which is very rare as a type, i.e. with all dates aggregated.

CLASSIC QUARTER EAGLE

1839-D Quarter Eagle, XF40 Rare Dahlonge Type Coin

- 6716 1839-D XF40 PCGS. Winter 1-A, Variety 26, R.3.** A high A in STATES identifies the die variety, as does the faint branch stem, lightly punched by the engraver into the reverse die. The present chestnut-gold quarter eagle exhibits wear but has only a single remotely mentionable field mark, found between the chin and star 1. The sole Dahlonge issue of the Classic quarter eagle type. From *The Searight Collection*. NGC ID# 25G6, PCGS# 7700

LIBERTY QUARTER EAGLES

1842-D Quarter Eagle, XF45 Sought-After Low-Mintage Issue

- 6717 1842-D XF45 NGC. Variety 3-F.** The 1842-D liberty quarter eagle is an elusive issue from a tiny mintage of 4,643 pieces. Probably no more than 85-105 examples survive in all grades today and high grade specimens are very rare. This well-detailed Choice XF piece is lightly abraded for the grade and the light orange-gold surfaces retain traces of original mint luster. Census: 15 in 45, 31 finer (8/13). NGC ID# 25GJ, PCGS# 7725

1852-C Quarter Eagle, AU55 Scarce Low-Mintage Issue

- 6718 1852-C AU55 NGC. Variety 1.** From a mintage of just 9,772 pieces, the 1852-C quarter eagle is a scarce issue in all grades and examples in AU55 condition are rare. This attractive Choice AU example exhibits a touch of wear on the design elements and the central devices show the softness always seen on this issue. The light greenish-gold surfaces display a few highlights of lilac, with traces of prooflike reflectivity in sheltered areas. Census: 24 in 55, 25 finer (8/13). From *The Joan Carroll Collection*. NGC ID# 25HS, PCGS# 7764

1875-S Quarter Eagle, MS62 Only 11,600 Pieces Struck

- 6719 1875-S MS62 PCGS.** The 1875-S Liberty quarter eagle claims a mintage of only 11,600 pieces and examples in Mint State condition are very rare in today's market. This well-detailed MS62 specimen shows a touch of softness on the central reverse, with lustrous yellow and greenish-gold surfaces that show only scattered signs of contact. Population: 3 in 62, 5 finer (8/13). NGC ID# 25KT, PCGS# 7823

1897 Quarter Eagle, MS67 Far Above Average

- 6720 1897 MS67 NGC.** One finer coin has been certified at each grading service. This Superb Gem has extraordinary orange-gold surfaces with brilliant and frosty mint luster. A crisp strike is noted with bold design motifs on both sides of this pristine specimen. The average certified grade of the 1897 quarter eagle is less than 63. Census: 16 in 67, 1 finer (8/13). NGC ID# 25LM, PCGS# 7849

1902 Quarter Eagle, MS67 None Finer at PCGS

- 6721 1902 MS67 PCGS.** Splashes of peach and green are present on this pleasing Superb Gem displaying attractive yellow-gold color overall. Rich luster emanates from both sides of this piece. Adding to the appeal, the coin exhibits a strong level of design detail. Population: 38 in 67, 0 finer (8/13). NGC ID# 25LT, PCGS# 7854

1903 Liberty Quarter Eagle, MS67
Ideal Type Coin

6722 1903 MS67 PCGS. The 1903 Liberty quarter eagle is an available date from a large mintage of 201,000 pieces. The issue is a favorite choice of type collectors. This delightful Superb Gem offers sharply detailed design elements and satiny mint luster, with orange-gold surfaces that show no mentionable signs of contact. Population: 54 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 25LU, PCGS# 7855

1907 Liberty Quarter Eagle, MS67
Popular Final-Year Type Issue

6723 1907 MS67 PCGS. The 1907 Liberty quarter eagle claims a substantial mintage of 336,294 pieces, making it a plentiful issue in all grades. The design was retired after the end of the year, making the date an important one for type collectors. This spectacular Super Gem is sharply detailed, with vibrant satiny mint luster and outstanding eye appeal. Population: 72 in 67 (2 in 67+), 1 finer (8/13). NGC ID# 25LY, PCGS# 7859

PROOF LIBERTY QUARTER EAGLES

1870 Quarter Eagle, PR66 Ultra Cameo
One of Two Finest Certified
Magnificent Eye Appeal

6724 1870 PR66 Ultra Cameo NGC. The 1870 proof quarter eagle mintage was just 35 pieces. Many were apparently unsold and likely melted, others probably entered circulation as a result of uncertain economic times in subsequent years. Whatever the case, only 12 to 15 proofs are known. NGC has graded five pieces, two in PR66 Ultra Cameo, the finest known. PCGS has seen six specimens, none finer than Gem Deep Cameo (8/13).

Deeply mirrored fields accentuate the frosty motifs, resulting in breathtaking orange-gold-on-black contrast. All design elements exhibit razor-sharp definition, and close inspection reveals exquisitely preserved surfaces. These attributes synergistically yield magnificent eye appeal. PCGS# 97896

**1894 Proof Quarter Eagle, Unc Details
Only 122 Pieces Struck**

6725 1894 — Altered Surfaces — PCGS Proof Genuine. Unc Details. The 1894 proof Liberty quarter eagle claims a mintage of 122 pieces, up slightly from the previous year but smaller than any issue of the type after 1896. Approximately 50-70 examples survive today in all grades, with a surprising number of mishandled specimens in that total. Jeff Garrett and Ron Guth estimate 25% of the coins seen at auction are impaired to some degree.

The present coin has been certified as “Altered Surfaces” by PCGS, possibly because of some slight roughness in the reverse field near the eagle’s left (facing) leg. The design elements are sharply detailed and the fields are deeply mirrored, providing bold, if unacknowledged, cameo contrast. A few minor hairlines are evident, but eye appeal is quite strong. NGC ID# 288H, PCGS# 7920

**1906 Quarter Eagle, PR62 Cameo
Only 160 Examples Struck**

6726 1906 PR62 Cameo PCGS. From a mintage of 160 pieces, the 1906 proof Liberty quarter eagle is a relatively available issue in the context of proof gold coinage. This sharply detailed PR62 example displays bold cameo contrast between the frosty devices and the deeply mirrored fields. The attractive lemon-yellow surfaces show the expected number of minor contact marks and hairlines for the grade. Population: 5 in 62 Cameo, 26 finer (8/13).
From The Searight Collection. NGC ID# 288W, PCGS# 87932

INDIAN QUARTER EAGLES

**1909 Quarter Eagle, MS65
Challenging Any Finer**

6727 1909 MS65 NGC. The 1909 quarter eagle is relatively available through the Gem level of preservation but becomes challenging to locate any finer. The apricot-gold surfaces of this MS65 specimen exhibit pleasing luster and sharply struck design elements, including the Indian’s headdress and hair and the eagle’s shoulder. A couple of minute copper spots and a faint pinscratch in the upper left reverse field do not overly detract. NGC ID# 288Z, PCGS# 7940

**1909 Indian Quarter Eagle, MS66
Unknown in Finer Grades**

6728 1909 MS66 PCGS. From a nominal mintage of 441,760 pieces the 1909 Indian quarter eagle is one of the better dates in the series. The 1909 is underappreciated by nonspecialists, but only the famous 1911-D and the low-mintage 1914 issues are seen less often in today's market. Lower Mint State examples can be found with some patience, but specimens in MS66 condition are rare, and the date is unknown in higher numeric grades.

The present coin is a spectacular Premium Gem with sharply detailed design elements that show pinpoint definition on the headdress feathers. The pristine orange-gold surfaces display hints of red and lilac, with bright mint luster and terrific eye appeal throughout. Housed in a green label holder. Population: 17 in 66, 0 finer (8/13). NGC ID# 288Z, PCGS# 7940

**1910 Indian Quarter Eagle, MS65
Exceptional Surfaces**

6729 1910 MS65 PCGS. CAC. The 1910 Indian Head quarter eagle is scarce in the MS65 level of preservation and rare any finer. The lustrous surfaces of the present offering displays even orange-gold coloration over each side. The design elements are sharply defined, including fullness in the eagle's shoulder and breast feathers. Both sides are devoid of the "mint-made spots or small planchet problems" that plague many examples of this issue (Fuljenz, 2010). A few light contact marks are consistent with the designated grade. Housed in a prior generation holder. Population: 95 in 65 (2 in 65+), 9 finer (8/13). NGC ID# 2892, PCGS# 7941

**1911 Quarter Eagle, MS65
Almost Never Located Finer**

6730 1911 MS65 NGC. The 1911 quarter eagle is readily available through MS63, but becomes rare in higher grades, particularly at the MS65 level. Examples finer than Gem are virtually unobtainable. The lustrous surfaces yield yellow-gold patina tinged with light green. The design elements exhibit better definition than sometimes seen on this issue, including the headdress feathers and the eagle's shoulder plumage. A few grade-consistent marks do not detract. NGC and PCGS combined have seen a mere seven pieces finer (8/13) NGC ID# 2893, PCGS# 7942

**1911 Quarter Eagle, MS65+
Superior Eye Appeal**

6731 1911 MS65+ NGC. CAC. The 1911 Indian quarter eagle is much easier to locate than its Denver Mint counterpart, making it an important issue for date and type set collectors. This high-end Gem is sharply detailed throughout, with vibrant mint luster and well-preserved greenish-gold surfaces, all of which add up to superior eye appeal. NGC has certified only six numerically finer examples (8/13). NGC ID# 2893, PCGS# 7942

1911-D Two and a Half Dollar
Uncirculated Details

6732 1911-D — Improperly Cleaned — NGC Details. Unc. The low mintage 1911-D has always been the key to the Indian quarter eagle series. Since all other issues of the type are readily acquired, collector pressure is focused on the '11-D stopper. The present example is bright from a wipe and has a coin counter mark on the obverse border. We also note a small recessed area below the R in AMERICA.

1911-D Two and a Half, MS62
Sharply Defined Throughout

6733 1911-D MS62 NGC. One of several Uncirculated 1911-D quarter eagles offered, this uncommonly attractive coin exhibits crisp striking detail with a bright, minimally granular texture. Importantly, the mintmark is quite bold. The color is honey-gold in shade and there are no sizeable abrasions.
Ex: FUN Signature (Heritage, 1/2005), lot 8687. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, MS62
Well-Defined Mintmark

6734 1911-D MS62 NGC. The 1911-D is a popular issue in MS62, as once it is acquired it is relatively easy to assemble the rest of the set of Indian quarter eagles. This is a bright, satiny example that shows a pronounced wire rim on the right side of the obverse, one of the diagnostics for genuine coins. The mintmark is well-formed, and there are no large or detracting abrasions, just the small marks one would expect from this grade. NGC ID# 2894, PCGS# 7943

1914 Quarter Eagle, MS64+
Great Eye Appeal

6735 1914 MS64+ PCGS. CAC. Subtly frosted on the fields with a range of colors from pale yellow to near-apricot. Detail is unusually crisp, especially as seen on the headdress and necklace. While the 1914 quarter eagle has its low mintage overshadowed by the 1911-D, it is a very scarce issue in Gem and better grades. NGC ID# 2898, PCGS# 7946

1915 Quarter Eagle, MS65+
Excellent Color

6736 1915 MS65+ PCGS. CAC. From light apricot to a richer peach that appears at parts of the margins, this is a colorful and captivating quarter eagle. Softly rolling luster has occasional hints of satin, while the well-preserved devices are strong at the interiors. PCGS has certified only four MS66 and better coins (8/13). NGC ID# 289A, PCGS# 7948

PROOF INDIAN QUARTER EAGLES

1910 Quarter Eagle, PR66
Bright 'Roman Gold' Finish

6737 1910 PR66 NGC. Among proof Indian quarter eagles, the 1909 and 1910 attract many collectors thanks to the so-called "Roman gold" finish, a satin-bright texture that offers a more eye-catching experience than the intentional dullness of the matte proofs produced in other years. This Premium Gem proof representative of the second "Roman gold" year in quarter eagles has sharp interior detail and primarily yellow-orange surfaces that pale at the top of the obverse and bottom of the reverse. An attractive and impressively preserved specimen of an issue that is far scarcer than the reported mintage of 682 proofs would suggest. NGC ID# 289J, PCGS# 7959

1912 Quarter Eagle, PR66+
Magnificent Matte Proof

6738 1912 PR66+ PCGS Secure. CAC. Quarter eagles are the smallest gold denomination regularly issued as matte proofs, for the gold dollar last was struck in 1889, well before the intentionally dulled surfaces and razor-sharp detail "look" came into vogue. This impressively preserved example of the 1912 matte proof two and a half has a rich orange-gold character and crisp all-around detail. Remarkably undisturbed fields show only a few tiny suggestions of coppery alloy and the all-around eye appeal is excellent. A wonderful coin to own, albeit difficult to pedigree. Population: 7 in 66+, 3 finer (8/13).

From A 1912 Gold Proof Set Acquired Directly from the Mint. NGC ID# 289L, PCGS# 7961

THREE DOLLAR GOLD PIECES

1861 Three Dollar, AU55 Popular Low-Mintage Type Coin

- 6739 1861 AU55 NGC. This popular date has a low mintage of 5,959 circulation strikes. Bowers (2005) writes that, with the exception of the West Coast, \$3 coins did not circulate after this date, but small supplies were held by bullion dealers, banks, and exchange offices. Traces of luster reside in the recesses of this apricot-gold specimen and the design features are well-defined save for high-point wear. Light scattered marks are in concert with the grade designation. NGC ID# 25MG, PCGS# 7982

1878 Three Dollar Gold, MS64 Favorite Type Issue

- 6740 1878 MS64 PCGS. CAC. The 1878 three dollar gold piece is one of the most available dates of the series and probably the favorite choice of type collectors seeking an example of this odd denomination. This well-detailed Choice example displays vibrant satiny mint luster and the light orange-gold surfaces are free of mentionable distractions. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS64+ Great Type Coin

- 6741 1878 MS64+ PCGS. CAC. With the second-highest mintage in the three dollar series and one of the highest savings rates, the 1878 three dollar is an ideal choice for the type collector. This MS64+ example has rolling luster in apricot and peach shades. The eye appeal rivals a Gem, and only a meandering wispy abrasion to the left of the portrait precludes such a grade. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold Piece, MS65 Outstanding Type Coin

- 6742 1878 MS65 PCGS. The U.S. government decreed that gold coins could be exchanged at par with paper money for the first time since the start of the Civil War, beginning on January 1, 1879. Anticipating a significant demand for small denomination gold coins when this measure took effect, the Mint produced a large mintage of 82,304 three dollar gold pieces in 1878. Unfortunately, no such demand developed, as people had become accustomed to the convenience of paper bills during the long period from 1861 to 1878. Once they were assured that paper could be exchanged for hard money at an even rate, few people felt inclined to do so. As a result, few coins were released into circulation and the 1878 is easy to locate in high grade today. This issue is a favorite choice of type collectors.

This delightful Gem displays well-detailed design elements and vibrant satiny mint luster on both sides. The light orange-gold surfaces are free of mentionable defects and traces of prooflike reflectivity are evident in sheltered areas. Eye appeal is terrific. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS65+
Exceptional Luster

6743 1878 MS65+ PCGS. The 1878 had the second highest circulation-strike mintage of the denomination (after the 1854) with a little over 80,000 coins produced. Mint State coins are common through near-Gem. Even MS65 pieces can be located with patience and searching.

Both sides of this high-end Gem are awash with strong mint luster, and each displays a medley of apricot- and yellow-gold coloration. The design elements are generally well-struck, though the bow knot is weak. A few light marks do not distract. All in all, this piece yields pleasing eye appeal. Population: 3 in 65+, 66 finer (8/13). NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar, MS64+
Pleasing Eye Appeal

6744 1879 MS64+ PCGS. CAC. Despite the relatively low mintage of 3,000 business strikes the 1879 shows a fairly large number of Mint State examples, mostly falling into the MS63 to MS64 range. Gems are very scarce and higher-grade examples are extremely rare.

A melange of reddish- and yellow-gold with blushes of rose cascade over the brightly lustrous surfaces of this high-end near-Gem, displaying somewhat deeper shades on the obverse. The design elements are sharply struck, enhancing the coin's excellent eye appeal. A few minute marks are consistent with the designated grade. Population: 6 in 64+, 45 finer (8/13). NGC ID# 25N2, PCGS# 8001

**1881 Three Dollar, MS61
Only 500 Pieces Struck**

6745 1881 MS61 NGC. The 1881 three dollar gold piece claims a minuscule business-strike mintage of just 500 pieces. This small production total has always fascinated collectors and makes the 1881 one of the most sought-after issues of the series. Possibly 80-120 examples survive in all grades, with 20-30 specimens in Mint State. Population data for the issue is somewhat inflated by resubmissions and crossovers.

The present coin is a rare MS61 example, with well-detailed design elements and partially prooflike greenish-gold surfaces. A scattering of minor contact marks on both sides, none worthy of individual mention, explains the grade. Census: 18 in 61, 20 finer (8/13).

From The Joan Carroll Collection. NGC ID# 25N4, PCGS# 8003

**1883 Three Dollar Gold, MS63
Low-Mintage Collector Favorite**

6746 1883 MS63 PCGS. Well known for its low mintage of just 900 pieces, the 1883 three dollar gold piece is a scarce date, but not as rare as the tiny production figure would indicate. This lovely Select survivor displays rich pumpkin-gold color along with hints of peach. The strike is pleasing and there are no marks worthy of mention. Population: 27 in 63, 31 finer (8/13). NGC ID# 25N6, PCGS# 8005

**1883 Three Dollar, MS63
Mintage 900 Pieces**

6747 1883 MS63 PCGS. With a business strike mintage of just 900 pieces, the 1883 three dollar gold piece is one of several challenging late dates for collectors looking to put together a date set of the series. This Select example has a mix of light yellow and deeper sun-gold shadings on half-reflective, half-swirling surfaces that show scattered small to moderate abrasions.

From The Strawberry Fields Collection. NGC ID# 25N6, PCGS# 8005

**1887 Select Three Dollar
Above-Average Strike**

6748 1887 MS63 PCGS. Three dollar gold pieces were popular when issued, by collectors and speculators alike. The obverse of this Select example reveals a light yellow center, with pale orange-gold toning present at the peripheries. The reverse reveals darker hues of orange and gold along with a couple of tiny copper spots. A pleasing strike and rich luster add to the eye appeal of this coin. NGC ID# 25NA, PCGS# 8009

1888 Three Dollar, MS63
Only 5,000 Pieces Struck

6749 1888 MS63 PCGS. The 1888 three dollar gold piece claims a mintage of only 5,000 pieces, but a significant number of high-grade pieces were saved by contemporary collectors and Philadelphia jewelers. Gleaming yellow-gold surfaces provide this Select example with a strong degree of visual appeal. A lack of any significant surface marks as well as a pleasing strike are additional attributes. NGC ID# 25NB, PCGS# 8010

Mint Director Daniel M. Fox, 1888

PROOF THREE DOLLAR GOLD PIECE

1888 Three Dollar Gold , PR63 Cameo
291 Pieces Struck, Many Not Distributed

6750 1888 PR63 Cameo PCGS. The *Guide Book* lists a mintage figure of 291 pieces for the 1888 proof three dollar gold piece, but the issue is more difficult to locate than that generous total suggests. Perhaps a larger-than-average number of coins went unsold and were melted after the end of the year. Only 5,000 business-strike examples were produced in 1888, as the coins were not needed in the national economy, and the denomination was discontinued after the following year.

The present coin is a delightful Select specimen with well-detailed design elements that show just a touch of softness on the wreath. The frosty devices stand out boldly against the reflective fields with a pleasing cameo appearance. The lemon-yellow surfaces show a few minor hairlines and contact marks, none worthy of individual mention. Population: 7 in 63 Cameo, 16 finer (7/13).
From *The Searight Collection*. NGC ID# 28AX, PCGS# 88052

PROOF FOUR DOLLAR GOLD PIECES

1879 Flowing Hair Stella, Proof Planchet Striations are Still Evident, As Always

6751 1879 Flowing Hair, Judd-1635, Pollock-1832, R.3 — PCGS Genuine. Proof. The 1879 Flowing Hair stellas produced in gold were distributed to Congressmen in three-piece sets that also included the Judd-1617 and Judd-1626 silver dollars, a.k.a. the “Goloid Metric Dollar” and the “Silver Metric Dollar,” as Philadelphia numismatist Samuel K. Harzfeld called them in a June 30, 1880 offering through Messrs. Bangs & Co. of New York City, lots 393-395. The pieces were offered separately with an option for all three to be bought together; they apparently sold as a group for \$50. Harzfeld wrote a tantalizing beginning to the lot description: “This is one of the *original 15 sets*, submitted to Congress.”

We have written of this offering before. The “original stellas” would have been produced in a true metric alloy totaling 7 gm net weight, which is six-sevenths gold, with the remaining one-seventh composed of a 30:70 silver-copper alloy. (This works out to 85.7142% gold, with the remaining one-seventh [14.2857%] silver 4.2857% and copper 10.0000%.) Such an awkward alloy would surely *not* have been produced by the U.S. Mint for a *pattern coinage* that had a next-to-nothing chance of becoming a commercial coin. The traditional alloy for federal gold was 90% gold and 10% copper, and it has long been our belief that the stellas were produced on normal .900 fine half eagle planchets shaved down to 80% of their normal thickness to produce the four dollar coins; this accounts for the planchet striations seen on all known pieces.

The “original” stellas were supposed to have been produced in the true metric alloy to the extent of 10 or 15 pieces, with the few hundred restrikes produced in the standard gold alloy. As time passes and every known example of the stella shows similar die striations, it reinforces our belief that *no original 1879 Flowing Hair stellas exist*. Unfortunately, Harzfeld provides no mention of the physical appearance of the stella beyond “brilliant gold proof” and certainly mentions no die striations or lack thereof.

This is certainly a “brilliant gold proof” but in a different sense than Harzfeld intended the phrase. Each side shows evidence of vigorous cleaning, and as a result the surfaces are unnaturally bright. Even so, close examination with a loupe reveals the striations on the central devices that are seen on all stellas. There are no detracting contact marks on either side. NGC ID# 28AZ, PCGS# 8057

1879 Stella, PR65 Cameo
Starkly Contrasted With a Distinctive Appearance

6752 1879 Flowing Hair, Judd-1635, Pollock-1832, R.3, PR65 Cameo PCGS Secure. The 1879 Flowing Hair stella may be considered the “type coin” to the stella series, as the other three variants dated 1879 and 1880 are all fabulously rare. No one knows exactly how many 1879 Flowing Hair stellas survive, but it is certainly an order of magnitude (and likely more) larger than the number that survive of the 1879 or 1880 Coiled Hair or the 1880 Flowing Hair.

The closest parallel in American coinage history to the 1879 Flowing Hair stella is the 1856 Flying Eagle cent. Both are technically patterns, but both were produced in substantially larger numbers than most pattern issues. And both are actively collected right alongside their counterparts in the Flying Eagle/Indian cent and U.S. gold type series.

The 1879 Flowing Hair stellas were the brainchild of the John A. Kasson, who in 1866 was chairman of the House Committee on Coinage, Weights, and Measures when the so-called Metric Act was passed, legalizing the use of the metric system, a mostly European convention, for American contracts. He later held several Iowa state posts in the 1860s and 1870s, and from 1877 to 1881 he was named “envoy extraordinary and minister plenipotentiary” to Austria-Hungary under President Rutherford B. Hayes.

The stellas were one of several attempts in the 19th century to create an internationally convenient coinage — the 1874 Bickford eagle, Judd-1373, was another — but this was a time of Mint shenanigans of the lowest order, and the stellas were the height of impracticality.

Kasson was, from all appearances, a high-minded man who merely wanted to simplify international transactions. He was well-traveled — one of his trips was as assistant postmaster general of the United States under the Lincoln administration, an 1863 sortie to Paris for the International Postal Convention. But the stellas could not successfully compete with established European or American coins such as the half eagle, and their cumbersome purported metric alloy would have made their striking at the Mint a nightmare. We believe that all surviving stellas are struck on shaved-down .900 fine half eagle planchets that resulted in the die striations seen on each side, rather than the nominal metric composition of six-sevenths gold, one-seventh copper-silver alloy.

This is a distinctive and unmistakable stella. The fields are deeply reflective, as one would expect, and the devices are heavily frosted. The combination of each gives the coin a stark cameo appearance. Additionally, there are two depressed alloy spots on the obverse, one behind the mouth of Liberty and the other behind the eye. These planchet flaws give this Gem stella a one-of-a-kind appearance. As with all 1879 Flowing Hair four dollar gold pieces we have seen, each side has roller marks, and the strike details are slightly soft on the hair of Liberty. Rich orange-gold color completes the picture of this remarkable Gem. Population: 12 in 65 (1 in 65+) Cameo, 14 finer (8/13). NGC ID# 28AZ, PCGS# 88057

EARLY HALF EAGLES

1795 Small Eagle Five Dollar
Fine Details, BD-3

6753 1795 Small Eagle — Repaired — NGC Details. Fine. BD-3, High R.3. The obverse field is smoothed near 5 o'clock and the luminous wheat-gold surfaces are whizzed. Nonetheless, the present lot will provide an important opportunity for middle class gold type collectors, who would otherwise be left behind during bidding. All legends are sharp and the eagle's wings are nicely defined. NGC ID# 25ND, PCGS# 8066

1795 BD-3 Half Eagle, AU Details
Small Eagle Reverse

6754 1795 Small Eagle — Improperly Cleaned — NGC Details. AU. BD-3, High R.3. Bass-Dannreuther Die State b/a, the usual die state for this die marriage. The BD-3 is the most plentiful variety of 1795 half eagles, coined early in the production of that denomination in the late summer of 1795. The first half eagles were delivered from the coiner to the Mint treasurer on July 31, 1795. Production of the 12 known Small Eagle die varieties continued through the end of the year and well into 1796.

This pleasing piece has light yellow surfaces with faint cleaning lines, most noticeably at the bottom of the reverse. The surfaces have the usual trivial marks associated with the grade. An excellent candidate for an 18th century gold type set.

1800 Half Eagle, BD-2, MS61
Near-Terminal Die State

6755 1800 MS61 NGC. BD-2, High R.3. Bass-Dannreuther Die State c/d, with the obverse showing a die crack through the IB of LIBERTY and the reverse terminal or nearly so. The latter side has a semireflective character like the obverse, but it also includes two specific faults not mentioned by the Bass-Dannreuther reference: a wedge clash off the interior of the eagle's left (facing) wing and a die crack between STATES and OF. (The exact nature of these faults and their implication is left to the specialist.) Overall the piece is of a well-defined character and bright yellow-gold, though parts of the obverse fields show cloudiness. NGC ID# 25NW, PCGS# 8082

**1802/1 Half Eagle, AU58
Very Scarce BD-1 Variety**

6756 1802/1 AU58 PCGS. BD-1, High R.4. Bass-Dannreuther Die State a/b. A substantial mintage of 53,176 Capped Bust Right half eagles was accomplished in 1802, with eight die varieties known for the date. All the varieties are overdates. The present coin represents the very scarce BD-1 variety, with the 2 free of the bust and the leaf pointing to I in AMERICA on the reverse. Only 75-100 examples of the BD-1 survive in all grades today, and the variety probably accounted for 5,000-7,500 pieces of the reported mintage. This was the only use of the reverse die, seen here in a late die state with extensive die cracks. The obverse was used on four other varieties of this date.

This coin is an attractive near-Mint specimen with just a touch of wear on the high points of the design elements. The lightly abraded antique-gold surfaces retain traces of original mint luster in sheltered areas. Overall visual appeal is quite strong. NGC ID# 25NX, PCGS# 8083

**1803/2 Capped Bust Right Half Eagle, AU55
BD-3 Overdate Variety**

6757 1803/2 AU55 PCGS. BD-3, R.4. The first of two overdate obverse dies for the year is identified by the flawed T and Y in LIBERTY, each missing their adjacent base, the T missing its right base and the Y missing its left base. Both sides of this deeply toned piece have rich green surfaces with attractive light russet peripheries. NGC ID# 25NY, PCGS# 8084

**1806 Round Top 6 Half Eagle, BD-6
Select Example of This Popular Type Coin**

6758 1806 Round Top 6, 7x6 Stars MS63 PCGS. CAC. BD-6, R.2. The sole use of the Knobbed (or Round Top) 6 obverse with 7x6 star arrangement on left and right, yet still more accessible than the five Pointed 6 half eagle die pairs for the same year. As a type coin the 1806 half eagle with Knobbed 6 is particularly prized, as the vast majority of Heraldic Eagle five dollar die pairs are scarce or rarer regardless of condition. This Select example has distinctly patinated orange-gold surfaces and generally strong interior detail save for weakness at the left side of the shield on the reverse. Scattered small abrasions do little to impede the rolling luster. NGC ID# 25P5, PCGS# 8089

**1807 BD-8 Half Eagle, AU58
Capped Bust Facing Left**

- 6759** 1807 Bust Left AU58 NGC. BD-8, R.2. The 1807 half eagle coinage consisted of six Draped Bust (right) varieties and two Capped Bust (left) varieties. The BD-8 is more plentiful than BD-7 among the John Reich designed Capped Bust half eagles. A trace of wear appears on the high points of this lemon-yellow example with a copper spot at the front of the cap and a tiny rim bump below the 1 in the date. NGC ID# 25P9, PCGS# 8101

**1809/8 Half Eagle, XF45
Popular Overdate, BD-1**

- 6760** 1809/8 XF45 PCGS. Gold CAC. BD-1, High R.3. Bass-Dannreuther Die State b/b. The only dies for the date. This attractive Choice XF specimen retains much of its original design detail and the pleasing orange-gold surfaces are lightly abraded for the grade. A faint die crack is evident through the first stars on the left. Housed in a green label holder with the coveted gold CAC sticker. NGC ID# 25PC, PCGS# 8104

**1811 Half Eagle, Near-Mint
Small 5, BD-3**

- 6761** 1811 Small 5 AU58 PCGS. BD-2, R.3. Bass-Dannreuther Die State d/a. All dates (though not all varieties) of John Reich's Capped Bust Left design are collectible. The 1811 is no exception, though it is certainly scarcer than the 1807 or 1810. The 1811 has two die marriages, and each are separately listed in the Guide Book due to different sized punches used to form the 5 in the denomination. This butter-gold representative displays ample luster and is refreshingly void of abrasions. Light rub on the claws and chin confirms momentary circulation. *From The Searight Collection.* NGC ID# 25PH, PCGS# 8109

**1811 Half Eagle, Unc Details
BD-2, Small 5**

- 6762** 1811 Small 5 — Tooled — PCGS Genuine. Unc Details. BD-2, R.3. The obverse shows no signs of clash marks but has a delicate die crack connecting stars 8, 9, and 10. The reverse exhibits faint clash marks. The Small 5 in the denomination is distinctive, as it is centered between the arrow feather and the border, and tilts sharply to the right. A few smooth, shiny areas in the luster on the reverse suggest minor tooling on this otherwise lovely half eagle, with frosty lemon-yellow luster and sharp details. NGC ID# 25PH, PCGS# 8109

**1813 Five Dollar, Choice AU
BD-2, Scarcer of Two Varieties**

- 6763** 1813 AU55 PCGS. BD-2, R.4. Bass-Dannreuther Die State d/b. The more challenging of the two die varieties for this introductory Capped Head Left date, which ranks among the rarest gold types. Approximately three times scarcer than BD-1, BD-2 shares the same obverse but has a different reverse, best distinguished by the location of the ST in STATES relative to E PL on the banner below. The present canary-gold piece is minimally abraded and mildly luminous. The strike is crisp aside from the plumage near the left shield border. *From The Searight Collection.* NGC ID# 25PM, PCGS# 8116

1813 BD-1 Half Eagle, MS62
Early Die State
First Variety of the Design

6764 1813 MS62 PCGS. BD-1, R.2. There are no clash marks or other signs of die deterioration on this early die state half eagle. The 1813 is the first year of a new design type, the Capped Head, that continued through 1829 when the diameter was slightly reduced, and remained in use until the summer of 1834 when the first Classic Head gold coins were minted.

The 1813 BD-1 is important as the first variety of the year and of the new type, and also the only readily available date of the design. The early die state means that this specimen is one of the very first examples of the new design that can be acquired. First year of issue type collectors should always seek the earliest possible variety in the earliest possible die state.

This pleasing Mint State piece shows a few of the expected marks and blemishes, with lustrous yellow-gold surfaces and hints of green color. The strike is bold with excellent eye appeal. NGC ID# 25PM, PCGS# 8116

1813 Half Eagle, MS63
Popular BD-1 Variety

6765 1813 MS63 NGC. CAC. BD-1, R.2. Bass-Dannreuther Die State b/b. The 1813 Capped Bust Left half eagle claims a substantial mintage of 95,428 pieces, with two die varieties known for the date. This coin represents the more available BD-1 variety, with the first S in STATES positioned over the right side of E on the ribbon. The BD-1 has a surviving population of 450-650 examples in all grades, and probably accounted for 60,000-75,000 pieces of the reported mintage. The obverse die was used to strike both varieties of this date, while this was the only use of the reverse. The 1813 BD-1 has sometimes been altered to counterfeit the rare and valuable 1815 half eagle, a prime example being the coin in the Mitchelson Collection at the Connecticut State Library.

This coin is a delightful Select specimen with well-detailed design elements that show just a few areas of incomplete detail due to die lapping. The light orange-gold surfaces retain much of their original mint luster and only minor signs of contact are evident. Census: 36 in 63 (2 in 63+), 24 finer (8/13). NGC ID# 25PM, PCGS# 8116

**1814/3 BD-1 Five, Choice AU
Ample Remaining Luster**

- 6766** 1814/3 AU55 NGC. BD-1, High R.4. The sole 1814-dated gold die variety. From the reported delivery of 15,454 pieces, Dannreuther estimates that 80 to 100 examples have survived. The present yellow-gold half eagle displays light wear on the curls and claws but retains a pleasing amount of mint luster. The mildly bright surfaces are free from remotely relevant marks. NGC ID# 25PN, PCGS# 8117

**1818 BD-1 Half Eagle, AU50
Normal Reverse**

- 6767** 1818 AU50 PCGS. CAC. BD-1, R.5. Bass-Dannreuther Die State b with a perfect obverse and cracked reverse. Three distinctive varieties are known for the 1818 half eagles, each about equal in rarity. Those varieties are the 5D over 50, the STATESOF, and the Normal Reverse as offered here. Attractive pale blue toning highlights the devices on this pleasing lemon-yellow specimen. The satin surfaces retain traces of luster. Scattered marks are evident but of no consequence. NGC ID# 25PR, PCGS# 8119

CLASSIC HALF EAGLES

**1834 Crosslet 4 Half Eagle, AU55
Philadelphia Key Issue**

- 6768** 1834 Crosslet 4 AU55 NGC. Breen-6503, McCloskey 5-D, R.4. Although nine die varieties of 1834 Classic half eagles have been identified, only one, the very scarce McCloskey 5-D, bears a Crosslet 4 instead of a Plain 4. The present richly detailed representative displays clash marks from LIBERTY within the shield. The sun-gold surfaces are moderately abraded though we note a couple of thin marks on the portrait. PCGS# 8172

**1838 Half Eagle, MS61
Large 5, Small Arrows**

- 6769** 1838 MS61 PCGS. Breen-6515, McCloskey 2-B, R.1. The Small Arrows, Large 5 variety of this final Philadelphia Classic five issue. A well struck honey-gold example with smooth surfaces save for a faded thin mark beneath Liberty's nose. Luster brightens the devices and margins. Though the 1838 is fairly plentiful in XF, Uncirculated pieces are elusive. From The Searight Collection. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

**1839-D Half Eagle, AU53
Sharply Struck**

- 6770** 1839-D AU53 PCGS. Variety 2-A. On this variety, the mintmark is over the 39 of the date and centered in the field with the left edge of the D over the center of the 3. The mintmark is found on the obverse, making the 1839 type different from the later issues of the Liberty Head half eagles. Winter estimates 46 to 49 pieces are known in AU. The present AU53 example displays traces of luster in the recessed areas of its yellow-gold surfaces. Solidly struck. NGC ID# 25S9, PCGS# 8193

**1842 Small Letters Half Eagle, AU55
Rare in All Grades**

- 6771** 1842 Small Letters AU55 PCGS. CAC. The Small Letters five dollar of 1842, showing a wide space between FIVE and D, is more available than the rare Large Letters; PCGS has seen 14 of the former and 33 of the latter. Both are rare in all grades. Traces of luster are found in the protected areas of this apricot-gold Choice AU specimen, and the design elements are nicely defined. A linear mark to the left of Liberty's forehead and a rim mark at 4 o'clock might help pedigree the coin. Population: 1 in 55, 2 finer (8/13). NGC ID# 28BE, PCGS# 8207

**1842-C Half Eagle, MS63
Popular Large Date Variety**

6772 1842-C Large Date MS63 NGC. Variety 1. The 1842-C Large Date half eagle is more available than its Small Date counterpart, but it is still a scarce issue, underappreciated by non-specialists. Probably no more than 110-140 examples survive in all grades today. Mint State coins are elusive and specimens in Select Mint State condition are very rare.

The present coin features a date that fills much more of the exergue than that on the rarer Small Date variety. Luster swirls softly on the obverse, more strongly on the reverse, with a few shiny spots surrounding Liberty's portrait that imply a frosty character where this texture is not disturbed. Definition is strong on the hair over Liberty's ear and the eagle's leg feathers, not always a guarantee. Mint State examples of this issue are offered only occasionally, Select and better coins generally come on the market less than once per year. For the Large Date variety, Census: 2 in 62, 3 finer (8/13). NGC ID# 25SW, PCGS# 8209

**1847-O Half Eagle, AU53
Rarest New Orleans Five**

6773 1847-O AU53 NGC. From a tiny mintage of just 12,000 pieces, the 1847-O is the rarest half eagle from the New Orleans Mint, both in terms of absolute and high-grade rarity. Probably no more than 40-50 examples survive today in all grades and the issue is certainly rare at the AU53 level. Still, the elusive nature of the 1847-O is not widely recognized outside of series specialists.

The present coin displays well-detailed design elements with just a touch of wear on the high points. The bright greenish-gold surfaces show highlights of rose and traces of prooflike reflectivity cling to the devices. The surfaces are lightly abraded for the grade. Census: 5 in 53, 14 finer (8/13). NGC ID# 25TR, PCGS# 8235

**1850-D Five Dollar, AU55
Bright Yellow-Gold Surfaces**

6774 1850-D AU55 NGC. Variety 28-S (formerly 24-P). An untoned representative of a scarce Dahlonega issue. The strike is generally crisp for the facility, though the first three stars and the eagle's extremities show minor incompleteness. The untoned surfaces show minor marks including a line on Liberty's jaw. Census: 26 in 55, 20 finer (8/13). NGC ID# 25U3, PCGS# 8245

1851-D Five Dollar, MS60
Very Rare in Mint State

6775 1851-D MS60 NGC. Variety 31-W. The first 1 in the date joins a denticle and the second 1 is close to the neck. The base of the first 1 is repunched. The upright of the mintmark is over the left serif of the E in FIVE, and is away from both the stem and the feather.

The yellow-gold surfaces of this MS60 specimen exhibit strong definition in the stars, the hair atop Liberty's head, and the bun. The mintmark is bold and the eagle's wing feathers are stronger than usually seen on this issue. Liberty's curls around the face and the eagle's legs show the typical weakness. Both sides reveal fewer marks than might be expected for the designated grade. Census: 3 in 60, 9 finer (8/13). NGC ID# 25U7, PCGS# 8248

1852 Half Eagle, MS63
Elusive in Mint Condition

6776 1852 MS63 PCGS. Mint State half eagles of the Liberty No Motto type are elusive, regardless of the date. In fact, even the most common dates of the type have low populations. This frosty and highly lustrous Select piece has bright reddish-tinged surfaces with a splash of pale green on the reverse. Most of the design features are well-struck, and each side has fewer and less severe marks than what might be expected for the designated grade. Population: 18 in 63, 11 finer (8/13).

Ex: *Central States Signature* (Heritage, 4/2008), lot 3456. NGC ID# 25UA, PCGS# 8250

1852-C Five Dollar, MS61
Popular Charlotte Type Coin

6777 1852-C MS61 NGC. Variety 1. A clean wheat-gold piece without any marks worthy of elaboration. The strike is sharp save for moderate softness on the eagle's neck and Liberty's lovelock. Luster is particularly evident on the reverse. Mint State Charlotte half eagles are subject to ceaseless specialist demand. Census: 10 in 61, 25 finer (8/13).

Ex: *Dallas Signature* (Heritage, 7/2006), lot 1214. NGC ID# 25UB, PCGS# 8251

1853 Half Eagle, MS63
Only One Finer Example at PCGS

6778 1853 MS63 PCGS. From a mintage of 305,770 pieces, the 1853 Liberty half eagle is not difficult to locate in circulated grades, but Mint State examples are scarce, and most Uncirculated pieces are in the MS61-MS62 grade range. This well-detailed Select specimen retains traces of original mint luster and the pleasing yellow and rose-gold surfaces show a few minor contact marks on both sides. Population: 9 in 63, 1 finer (8/13). NGC ID# 25UD, PCGS# 8253

1860-C Half Eagle, AU55
Low-Mintage Charlotte Issue

6779 1860-C AU55 PCGS. Variety 1. This scarce Charlotte half eagle date has the third-lowest mintage of the series, with just 14,813 coins originally produced. This piece is better-than-average for the issue, with pleasing lime-gold coloration and an attractive overall appearance. Both sides show wispy field hairlines and a few minor abrasions. The reverse is ill-defined, having been struck from an improperly annealed die. Population: 13 in 55, 24 finer (8/13).

Ex: *FUN Signature* (Heritage, 1/2008), lot 4273. NGC ID# 25VG, PCGS# 8285

1861-C Half Eagle, XF45
Late Die State, Possible Confederate Issue

6780 1861-C XF45 PCGS. The only variety known. Die State II, as evidenced by a die crack that contacts the rim and the left serif of the M in AMERICA. Charming orange-gold patina covers the surfaces, which show scattered yet minor abrasions. The strike is slightly irregular, with the right stars significantly more detailed than the left. The centers are somewhat soft, as typically seen, and there is significant luster present in the fields. A delightful example from the final year of the Charlotte Mint. Only 6,879 half eagles were minted. Of that number it is believed that 887 examples were struck under the supervision of the Confederacy, and this later die state 1861-C could be one of those pieces. Population: 19 in 45, 55 finer (8/13). Ex: *FUN Signature* (Heritage, 1/2005), lot 9036; *Baltimore Signature* (Heritage, 7/2008), lot 3032. NGC ID# 25VL, PCGS# 8289

1871 Half Eagle, MS61
Mintage 3,200 Pieces

- 6781 1871 MS61 PCGS.** The surfaces are semireflective, a frequent state for higher-end half eagles from this issue of just 3,200 business strikes, and Liberty's well-defined portrait even shows a hint of frost. Pale yellow-gold surfaces show a scattering of small to moderate abrasions, but the devices are generally clean and overall eye appeal is pleasing for an MS61 coin. The 1871 half eagle's circulation strikes were not saved in any great quantity and Mint State examples such as this are great rarities. PCGS has certified only two examples as MS61 with none in MS61+ or finer grades (8/13). NGC ID# 25WC, PCGS# 8322

1873 Liberty Five, MS64
Open 3, Rare in High Grade

- 6782 1873 Open 3 MS64 PCGS. CAC.** From a mintage of 112,505 pieces, the 1873 Open 3 half eagle is surprisingly difficult to locate in high grade. This well-detailed Choice specimen displays satiny mint luster on both sides and the pleasing yellow and rose-gold surfaces show only minor signs of contact. Population: 6 in 64, 3 finer (8/13). From *The Strawberry Fields Collection*. NGC ID# 25WK, PCGS# 8328

1874-S Five Dollar, Appealing AU55
An Important Condition Rarity

- 6783 1874-S AU55 NGC. CAC.** Most 1874-S half eagles appearing at auction grade VF or XF. The issue is rare in the higher AU levels and Mint State examples are currently unknown. This Choice AU displays reddish-gold patination, and traces of luster are present in the protected areas. The design elements are well-defined except for the typical softness in the hair atop Liberty's head and on the eagle's neck feathers. The mintmark shows clearly, but is weakly impressed in the dies for this issue. Light circulation marks do not impede. All in all, very nice eye appeal. Census: 11 in 55, 7 finer (8/13). NGC ID# 25WR, PCGS# 8335

**1878 Half Eagle, MS65
Prime Condition Rarity**

6784 1878 MS65 NGC. Mintage of half eagles increased dramatically at the Philadelphia Mint in 1878 with a reported production total of 131,720 pieces. The date is not difficult to locate in circulated grades today, but only a handful of specimens have been certified at the Gem level. The last auction record we can find for an MS65 coin was lot 1350 of the Dallas Signature (Heritage, 12/2005), which realized \$11,500.

The present coin is a delightful Gem, with sharply detailed design elements and vibrant satiny mint luster throughout. The pleasing yellow gold surfaces show a few minor contact marks, none worthy of individual mention, and a small alloy spot above the F in FIVE that can serve as a pedigree marker. Census: 3 in 65, 1 finer (8/13). NGC ID# 25X4, PCGS# 8345

**1878-S Half Eagle, MS64+
Prime Condition Rarity**

6785 1878-S MS64+ PCGS. CAC. The 1878-S Liberty half eagle claims a nominal mintage of 144,700 pieces, but the issue circulated heavily in the 19th century and few high-grade examples have survived. This high-end Choice specimen features well-detailed design elements and lustrous yellow and rose-gold surfaces. A couple of minor contact marks in the lower-left obverse field are the only flaws of note. Population: 5 in 64+, 1 finer (8/13). NGC ID# 25X6, PCGS# 8347

**1891 Five Dollar, MS64
Extremely Rare Any Finer**

6786 1891 MS64 NGC. A scarce half eagle, from a mintage of 61,300 circulation strikes. This issue can be obtained through MS62 with diligent searching. Select coins are more challenging, and near-Gems are the finest most collectors can hope to acquire. Lustrous surfaces display reddish-gold patination and a solid strike emboldens the design features. A couple of minute toning spots are visible on the obverse, but both sides reveal fewer marks than what might be expected for the grade designation. Census: 12 in 64, 3 finer (8/13). NGC ID# 25Y4, PCGS# 8377

**1892-CC Half Eagle, Well-Struck MS63
Extremely Rare Any Finer**

6787 1892-CC MS63 PCGS. Variety 1-A. Only one variety known, but there are at least die states recorded. This piece is intermediate between Die States II and III, attributed by the partial break in the scroll below WE and the die crack from D in the value to the second A in AMERICA. This issue is very scarce in MS63 and extremely rare any finer. Strongly struck throughout, including Liberty's hair and the eagle's legs, areas frequently weak. Pleasing luster emanates from copper-gold surfaces that reveal fewer and less severe marks than what might be expected for the Select level. Population: 13 in 63, 1 finer (8/13). NGC ID# 25Y7, PCGS# 8380

1893-O Half Eagle, MS63
Nearly Unobtainable Any Finer

6788 1893-O MS63 PCGS. Variety 1. A single variety is known. The 1893-O five dollar has the second highest mintage (110,000 pieces) of any half eagle from this mint, and is the most common five in Uncirculated grades from New Orleans. That said, MS63 examples are challenging. PCGS and NGC have graded a total of 33 Select coins and a mere three pieces finer. Lustrous surfaces exhibit soft rose-gold color and the design elements are well-struck. Fewer marks are seen than is typically seen on Uncirculated survivors. Population: 17 in 63 (2 in 63+), 1 finer (8/13). NGC ID# 25YC, PCGS# 8385

1899 Half Eagle, MS67
Only One Certified Finer

6789 1899 MS67 NGC. The 1899 half eagle is the first of a run of common dates, but it still ranks as one of many condition rarities in the Liberty series. The average certified grade for the 1899 half eagle is MS62, and only one coin has been graded finer than this example.

This piece is an amazing representative that survives from a mintage of 1.7 million coins. Both sides have boldly defined design motifs with frosty light yellow surfaces that exhibit a hint of light green color near the borders. The surfaces show only a few trivial marks. Census: 8 in 67, 1 finer (8/13). NGC ID# 25YS, PCGS# 8398

1900 Half Eagle, MS66
Only Two Finer at PCGS

6790 1900 MS66 PCGS. CAC. This Premium Gem exhibits brilliant yellow luster with hints of pink overtones and bold design motifs. An exceptional example that is rarely encountered in such fine quality despite a mintage well over 1 million coins. Population: 6 in 66, 2 finer (8/13). NGC ID# 25YU, PCGS# 8400

1902 Liberty Five, MS66
Only One Finer Coin at NGC

6791 1902 MS66 NGC. CAC. The 1902 Liberty half eagle is one of the more elusive issues of the 20th century series, from a mintage of 172,400 pieces. This spectacular Premium Gem displays sharply detailed design elements and vibrant mint luster, with pristine peach-gold surfaces. Census: 3 in 66, 1 finer (8/13). NGC ID# 25YY, PCGS# 8405

**1903-S Half Eagle, MS67
Tied for Finest Certified**

6792 1903-S MS67 NGC. The 1903-S is one of the most common dates in the Liberty series, and certainly ranks among the easily obtainable S-Mint issues. Examples are readily available up to MS65, and even MS66 specimens can be found with little difficulty. However, Superb Gems like this piece remain important rarities with only a few certified by NGC, and none finer. The best that PCGS has examined is MS66. This lovely specimen has a bold strike with pristine surfaces and faint orange toning over its frosty yellow surfaces. Census: 8 in 67, 0 finer (8/13). NGC ID# 25Z3, PCGS# 8408

PROOF LIBERTY HALF EAGLE

**1900 Half Eagle, PR65 Deep Cameo
Gorgeous Turn-of-the-Century Proof**

6793 1900 PR65 Deep Cameo PCGS. At the turn of the 20th century, time was running out for the much-loved contrasted or "Cameo" appearance on classic proof gold coins. A change for the 1902 proofs would reduce the frostiness of the devices, replacing it largely with mirror-finish, while the matte proofs of 1908 and their experimental permutations were the nail in the proverbial coffin. While there was time, though, the Mint released this Gem 1900 half dollar with Deep Cameo proof contrast, fortunately for today's collectors. Though a few tiny planchet flaws are visible in the fields, the surfaces are generally well-preserved and the eye appeal is fantastic. Fields are "black" when tilted out of the light and pale gold tilted into it. Population: 2 in 65 Deep Cameo, 1 finer (8/13). NGC ID# 28D6, PCGS# 98495

INDIAN HALF EAGLES

1908 Indian Half Eagle, MS67 Important First-Year Issue Only One Finer Certified

6794 1908 MS67 NGC. The initial-year mintage for the new Bela Lyon Pratt-designed half eagle was a generous production exceeding 577,000 examples, although the Philadelphia Mint in the following year would produce an even larger emission. Dr. William Sturgis Bigelow had suggested the original design idea for the Indian Head half eagle to President Theodore Roosevelt, and Pratt had made the models. As usual, Mint personnel, in this case mint engraver Charles Barber, modified the final design for coinage production. Pratt was clearly uninvolved with the last step. In writing to his mother Sarah Pratt after being shown a sample half eagle by Bigelow, Bela Lyon Pratt wrote, as taken from Roger W. Burdette's important work *Renaissance of American Coinage 1905-1908*:

"After the first of November you can [get] all you want of my coins at any bank, but that is still a secret. They have 'knocked spots' out of my design at the mint. They let their die cutter spoil it, which he did most thoroughly, so try not to be too disappointed when you see the coins.. The little \$2-1/2 coins don't look so badly but the \$5 is a sight! I could not sleep for a night or two after I saw it. The first impression, which Dr. Bigelow showed me at the Symphony two weeks ago, looked quite well. But they tried to retouch it and gee! They made a mess of it! With a few deft touches the butcher or blacksmith, who is at the head of things there, changed it from a thing I was proud of, to one [of which] I am ashamed! Still it is the best coin the U.S. has ever had ..."

Things went from bad to worse when Pratt even failed to get credit for the design. Many newspapers of the time, although mentioning that Pratt had "made the models," credited Bigelow with the design.

Although the designs were greeted with distaste in some quarters fortunately, like many first-year issues, the coins were both well-produced and saved in considerable numbers. The 1908 is an available issue in all grades up to the Gem level but, like all Indian half eagles, it is conditionally rare in any finer grade.

The present example is characterized by deep reddish-gold surfaces with a considerable amount of subtle luster underneath. The strike is bold, and even under a loupe, only a few minuscule marks appear. One of the finest, and a major opportunity for the Registry Set enthusiast. Census: 4 in 67, 1 finer (8/13). NGC ID# 28DE, PCGS# 8510

1908-S Half Eagle, MS64+
Five-Figure Mintage

6795 1908-S MS64+ PCGS. CAC. Ordinarily the first year of a new design is saved, if not by numismatists than curious members of the general public. The 1908-S half eagle, however, owing to its high relative value and West Coast placement (where few collectors were), did not receive much benefit. Add a starting mintage of only 82,000 pieces and all the elements are in place for a challenging issue. This light yellow-gold and apricot piece on the cusp of Gem status is well-defined on the portrait's bonnet, if a trifle less so on the necklace. A few luster scrapes are noted behind the eagle's head. NGC ID# 28DG, PCGS# 8512

1909 Indian Five, MS65
Very Rare in Higher Grades

6796 1909 MS65 PCGS. With a reported mintage of 627,060 pieces, the 1909 Indian half eagle is a plentiful issue in all grades up to the MS65 level. Examples in Gem condition are scarce, however, and the date is a prime condition rarity in finer grades. This delightful Gem exhibits sharply detailed design elements throughout and the well-preserved reddish-gold surfaces radiate vibrant mint luster on both sides. Bagmarks are a problem for the typical 1909 Indian five, but this coin is remarkably free of significant surface flaws. Eye appeal is outstanding. Housed in a green label holder. Population: 92 in 65 (3 in 65+), 7 finer (8/13). NGC ID# 28DH, PCGS# 8513

**1909-O Five Dollar, Unc Sharpness
Well-Defined Mintmark**

6797 1909-O PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Unc specimen that has been cleaned. The mintmark is especially well brought up on this key five dollar. Each side also displays roller marks, a curious feature that we do not recall seeing on a 1909-O previously. The surfaces are free from any large or objectionable marks and the orange-gold color is just a tad too bright, but overall this is an attractive example of this highly regarded five dollar Indian. NGC ID# 25ZK, PCGS# 8515

**1909-O Half Eagle, XF45
Evenly Worn Key Issue**

6798 1909-O XF45 PCGS. This rarity should appeal to several advanced collectors. The surfaces are evenly worn on each side, and there are no obvious or detracting abrasions. The mintmark is slightly weak, as often seen, but it can clearly be seen that it is an O. Subdued yellow-gold color is well-balanced from side to side. NGC ID# 25ZK, PCGS# 8515

**1915-S Half Eagle, MS63
Impressive Eye Appeal
Conditionally Rare**

6799 1915-S MS63 PCGS. CAC. The 1915-S is one of the major rarities in the Indian half eagle series. In fact, it is one of the rarest of 20th century U.S. gold coins. It is scarce through MS62, while MS63 and MS64 specimens are rare. Only one finer coin is known, an NGC MS65. Also, it is quite possible that the 49 Select examples certified by the two services are inflated by a significant number of resubmissions.

Both sides of this MS63 display vibrant luster and coppery-gold color, and the design elements are typically struck; that is, softness in the lowermost headdress feathers and indistinctness in the mintmark. The remaining features are sharply struck, including the eagle's shoulder feathers. The surfaces are well-preserved for the grade and the issue, which is usually noticeably abraded, often quite heavily so. Light marks are seen around the reverse motto. Impressive overall eye appeal. Population: 37 in 63, 10 finer (8/13). NGC ID# 25ZR, PCGS# 8531

PROOF INDIAN HALF EAGLES

1912 Half Eagle, PR66 Rare Matte Proof

6800 1912 PR66 PCGS Secure. CAC. Among pre-1950 coinages, few runs of dates are so consistently well-preserved as the matte proofs from 1911 through 1915. When the gold matte proofs made their debut in 1908, reaction was split. A “hard core” of dedicated numismatists, likely aware of the European trends toward matte finishes that focused attention on the design by eliminating such “distractions” as mirrored fields, praised this change in finish, while another cadre of the Mint’s regular proof customers, used to the gleam of silver and gold, found the matte proofs a dull and inexplicable change of direction.

Two years of experimentation with a half-bright, half-satin finish called “Roman gold” pleased neither side in the debate, and from 1911 on the Mint stuck to a sandblast finish, sometimes fine-grained, sometimes coarse, but always sticking to the theory of avoiding distractions and focusing on the design itself. The mirror-proof-loving crowd had fallen away by this point, and only the aforementioned “hard core” of collectors were left, who by-and-large took great care of their coins. This explains the relatively high proportion of Gem-and-better survivors for the matte proofs in that five-year span.

This 1912 half eagle was kept carefully for the first century of its existence, today residing in PCGS plastic that labels it a Premium Gem. The striking qualities and the yellow-orange surfaces both are remarkable, though the latter shows a few lighter, shinier areas. A tiny copper spot to the right of star 3 on the obverse may serve as a future pedigree marker. *From A 1912 Gold Proof Set Acquired Directly From The Mint.* PCGS# 8543

1914 Indian Half Eagle, PR66
No Numerically Finer Coins at PCGS
Only 125 Pieces Struck

6801 1914 PR66 PCGS. CAC. The Mint experimented with the matte proof or sandblast surface for gold proofs for the last time in 1914, increasing the size of the microscopic particles and imparting a darker finish to the coins. Unfortunately, the public had lost interest in proof gold by this time, due to the unpopularity of the various European-style finishes of earlier years. A small mintage of 125 proof half eagles was accomplished in 1914, but even this production total proved overly optimistic and many of the coins failed to sell, with the remainder destroyed after the end of the year. Probably no more than 60-75 examples survive today in all grades.

The 1914 proof Indian half eagle began appearing at auction at least as early as the Dr. G.F.E. Wilharm Collection (B. Max Mehl, 2/1921), where lot 304 in the half eagle section was tersely described as, "1914 Sand blast proof. Scarce." Specimens appear at auction about once per year in recent times, with this particular coin setting the record for a price realized at auction (\$74,750) when it was recently offered as lot 5105 of the Long Beach Signature (Heritage, 5/2012).

This spectacular Premium Gem is a deep mustard color, with the only minuscule disruptions in the fabric a tiny "dot" in the obverse field before the Indian's neck, and one on the reverse above the last T in TRUST. The incuse design elements exhibit razor-sharp definition throughout, as expected from a proof of this era. Eye appeal is outstanding. This coin will be a welcome addition to the finest collection or Registry Set. Population: 4 in 66 (1 in 66+), 0 finer (8/13).

Ex: Long Beach Signature (Heritage, 5/2012), lot 5105, realized \$74,750. PCGS# 8545

EARLY EAGLES

1797 Capped Bust Right Eagle, AU Details Heraldic Eagle, Elusive BD-3 Variety

6802 1797 Large Eagle — Scratched — NCS. AU Details. BD-3, R.5. Bass-Dannreuther Die State c/b. The Heraldic Eagle reverse replaced the Small Eagle design part way through the year in 1797. An estimated mintage of 10,940 pieces was accomplished, with three die varieties known for the date and type. The coin offered here represents the rare BD-3 variety, with the reverse stars arranged in an irregular cross pattern and a short thin neck on the eagle. The BD-3 probably accounted for 1,750-2,500 pieces of the reported mintage and no more than 40-50 examples survive in all grades. This same obverse die was used on all three varieties of the 1797 Heraldic Eagle ten, while the reverse was also used to coin both varieties of the 1798/7 eagle.

This still-attractive specimen shows AU sharpness on the design elements and the surfaces retain much original mint luster. A few cross-hatched scratches on the portrait constitute the damage noted on the holder, mostly hidden in the hair. Otherwise the fields are lightly abraded, with a few faint planchet adjustment marks at the upper reverse rim. NGC ID# 25ZY, PCGS# 8559

1801 BD-2 Ten Dollar, VF Details

6803 1801 — Mount Removed — NGC Details. VF. BD-2, R.2. The usually seen die state with vertical die lines in the cap. This canary-gold example likely served as jewelry during the 19th century. The surfaces are moderately bright and glossy but no abrasions are worthy of individual description. The edge and rim near 12 o'clock show traces of solder. An opportunity to acquire an affordable representative of the rare ten dollar Heraldic Eagle type.

1801 Ten Dollar, BD-2, AU58 Early Die State

6804 1801 AU58 NGC. BD-2, R.2. Bass-Dannreuther Die State a/a. This example is notable in that it lacks the nine mysterious vertical lines or "spines" usually embedded in Liberty's cap. The BD-2 is by far the more common of two die pairs for this issue, distinguished by a star 1 on the obverse that is well away from Liberty's lowest curl, and is a popular type issue for the early eagles with Heraldic reverse. This near-Mint example retains generous orange-kissed luster with only minor wear. The strike is blunt, most visibly on the obverse stars, while a few pin scratches appear near the eagle's head, but the arm's-length eye appeal is excellent. NGC ID# 2627, PCGS# 8564

1801 Eagle, BD-2, MS63
Ideal Early Type Coin

6805 1801 MS63 PCGS. BD-2, R.2. Bass-Dannreuther Die State a/a. A substantial mintage of 44,344 Capped Bust Right eagles was accomplished in 1801, with just two die varieties known for the date. This coin represents the more available BD-2 variety, with two points of star 8 directed toward the cap and star 13 near the bust. The BD-2 has a surviving population in the range of 600-800 pieces in all grades, making it a favorite choice of type collectors seeking an example of this early design. The BD-2 variety probably accounted for 30,000-40,000 pieces of the reported mintage, as the other variety of this date is quite elusive.

This was the only use of the obverse die, but the reverse was later used to strike the BD-3 variety of 1803. Later die states of the BD-2 show a dramatic series of nine vertical spines in Liberty's cap. The most obvious cause of this feature would be clashing with the shield on the reverse, but the spines are not exactly aligned with that device. This coin is from an early die state that does not show the spines.

The early eagles have been avidly collected since the earliest days of the hobby in this country. Examples of the 1801 began appearing at auction as early as lot 175 of the A.C. Kline Sale (Moses Thomas & Sons, 6/1855). Recent sales records include the extraordinary MS65 PCGS coin in lot 4969 of the FUN Signature (Heritage, 1/2012), which realized \$207,000.

The present coin is a delightful Select specimen, with vivid orange-gold surfaces that show traces of prooflike reflectivity in many areas. Some faint planchet adjustment marks are evident on the reverse rim at 3 o'clock, but the fields show only scattered minor contact marks. The design elements are sharply rendered and eye appeal is outstanding. Population: 37 in 63, 37 finer (8/13). NGC ID# 2627, PCGS# 8564

LIBERTY EAGLES

1839 Liberty Eagle, XF45 Type of 1838, Large Letters

- 6806 1839 Type of 1838, Large Letters XF45 PCGS.** The Type of 1838 is easily distinguished by the sharply curved truncation of the bust. This pleasing Choice XF example is lightly worn and moderately abraded for the grade. The vivid orange-gold surfaces show a few highlights of turquoise and traces of mint luster cling to protected areas. Population: 23 in 45, 48 finer (8/13).
From The Searight Collection. NGC ID# 262E, PCGS# 8576

1843-O Ten Dollar, AU58 Rare Any Finer

- 6807 1843-O AU58 NGC. Variety 2.** The date is relatively thick, and the reverse shows advanced die cracking through STATES. This issue is the second most available New Orleans eagle from the 1840s, trailing the 1847-O. It is mostly seen in the VF to XF grade range. AU examples are scarce (the NGC AU figures, however, appear to be inflated by resubmissions), and Mint State coins are extremely rare. Both sides display orange-gold color and the design elements are generally well struck, save for the usual softness in the hair above Liberty's ear. Numerous minute marks are seen on each side, with two or three larger ones on the obverse. Census: 55 in 58 (1 in 58+), 8 finer (8/13). NGC ID# 262R, PCGS# 8589

1846 Ten Dollar, Pleasing AU53 Much Semiprooflikeness in the Fields

- 6808 1846 AU53 NGC.** Seldom seen finer, this is a pleasing AU example that retains a surprising amount of reflectivity in the fields. Each side is peppered with numerous small to medium-sized abrasions, many of which are magnified in importance by the brightness in the fields. Only 20,095 pieces were struck. NGC ID# 262W, PCGS# 8594

1851 Liberty Ten, MS61 Rare Issue in Mint State

- 6809 1851 MS61 PCGS.** This is a richly patinated coin with deep, orange-gold surfaces and bright luster that is suggestive of a finer grade. A few small field marks visible on each side seem to limit the grade, however. Still, an important coin, especially as a true Mint State example. Population: 5 in 61, 5 finer (8/13).
Ex: Baltimore Signature (Heritage, 7/2003), lot 10428.
From The Searight Collection. NGC ID# 263A, PCGS# 8606

1865 Liberty Ten, XF45 Only 3,980 Pieces Struck

- 6810 1865 XF45 NGC.** From a low mintage of 3,980 pieces, the 1865 Liberty eagle is an elusive date in the series, and high-grade examples are rare. This attractive Choice XF specimen shows light-to-moderate wear on the design elements and the orange-gold surfaces display a few traces of mint luster in sheltered areas. Census: 4 in 45, 21 finer (8/13). NGC ID# 264F, PCGS# 8641

1866 Ten Dollar, Very Rare AU55 Only 3,780 Pieces Minted

- 6811 1866 AU55 NGC.** The design of the Liberty eagle was modified in 1866 to include the motto IN GOD WE TRUST on the reverse. XF and AU coins are very rare, and Mint State examples are extremely difficult to locate. This Choice AU piece displays orange-gold surfaces and luster in the protected areas. Distributed small marks are visible on each side, but are in concert with a gold coin having seen some circulation. Census: 12 in 55, 6 finer (8/13). NGC ID# 264J, PCGS# 8649

**1868 Liberty Ten, AU58
Rare Low-Mintage Date**

- 6812 1868 AU58 NGC. CAC.** The 1868 Liberty eagle claims a tiny mintage of 10,655 pieces, making the date scarce-to-rare in all grades and extremely rare in Mint State. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements and the pleasing greenish-gold surfaces retain much of their original mint luster. Census: 27 in 58, 2 finer (8/13). NGC ID# 264N, PCGS# 8653

**1871 Ten Dollar, Well-Defined AU58
One of 11 Certified, One Finer**

- 6813 1871 AU58 NGC.** Just 1,790 business strikes were produced for the 1871 eagle, most of which entered the channels of commerce. NGC and PCGS have graded only 75 examples, some of which are likely resubmissions. Only one Mint State coin (a PCGS MS60) appears in the combined certified population, and even near-Mint coins are rarities. Medium-intensity yellow-gold color covers both sides with bright semireflectivity in the fields. Each side exhibits well-defined design features. Scattered minuscule marks are in concert with a briefly circulated coin. A few small darker speckles on the front of the bust truncation are mentioned solely for identification purposes. Census: 9 in 58, 0 finer (8/13). NGC ID# 264W, PCGS# 8660

**1872-CC Liberty Eagle, VF25
Elusive Issue in All Grades**

- 6814 1872-CC VF25 PCGS. Variety 1-B.** Only 4,600 Liberty eagles were struck at the Carson City Mint in 1872, making the issue one of the most challenging of the series, especially in high grade. Probably no more than 60-70 examples survive today in all grades. This well-worn VF25 example shows all major design elements intact in outline, with a good deal of interior detail still present. The orange-gold surfaces are moderately abraded for the grade. Population: 2 in 25, 49 finer (8/13). NGC ID# 2652, PCGS# 8664

**1874-S Eagle, AU58
Among the Six Finest Known**

- 6815 1874-S AU58 NGC.** Like most other S-mint tens from its pre-1878 era, the 1874-S is low mintage and unknown in Uncirculated grades. This near-Mint example is tied with five others as finest known at NGC and PCGS combined (8/13). Attractive yellow-gold color and a pleasing strike provide this piece with nice eye appeal. As expected at this grade level, numerous surface marks are present. NGC ID# 2659, PCGS# 8671

**1882-CC Ten Dollar, AU55
Exceptional Surfaces**

- 6816 1882-CC AU55 NGC. Variety 1-A.** The 6,764 pieces struck for this Carson City issue was a considerable drop from the mintage of the previous year. Mint State examples are virtually unknown; NGC records just two pieces, an MS61 and MS62. The present Choice AU displays wheat-gold color as well as luster in the recesses. An above-average strike shows strong definition on the stars and eagle's neck feathers, areas that are often weak. A few minute marks do not disturb. This is a significant attribute as most survivors show deep abrasions. Doug Winter (2001) states: "This is true for both well-worn and higher-grade pieces. Any example that has minimal marks is rare and desirable." Census: 37 in 55, 29 finer (8/13). NGC ID# 2663, PCGS# 8696

1890-CC Ten Dollar, MS62
Above-Average Strike
Rare Any Finer

- 6817 1890-CC MS62 PCGS. Variety 1-A.** The 1890-CC comes from a paltry mintage of 17,500 pieces, and is usually seen in Extremely Fine to MS61. MS62s are scarce and higher-grade examples are rare. The PCGS population of 40 MS62s is probably inflated due to resubmissions. The reddish-gold surfaces of the present offering display luster at the obverse and reverse margins. The design elements are better struck than ordinarily seen on this issue, particularly the star centrils and Liberty's hair, areas that are often weak. Scattered marks determine the grade, but it should be noted that these are less severe than the typically seen heavy abrasions. Moreover, both sides lack the copper spots often seen on surviving examples. The only spot is visible below the left upright in the N of TEN. Population: 40 in 62, 6 finer (8/13). NGC ID# 266S, PCGS# 8718

1890-CC Ten, MS62
Lower Mintage CC Date

- 6818 1890-CC MS62 PCGS. Variety 1-A.** A crisply struck example that has good luster and warm honey-gold patina. Although the left obverse field has a few luster grazes, there are no heavy abrasions. The portrait is clean and has impressive eye appeal. A low-mintage issue from a popular mint, and seen far less often than the ubiquitous 1891-CC. Population: 40 in 62, 6 finer (8/13).
Ex: *Long Beach Signature* (Heritage, 9/2002), lot 8468; *FUN Signature* (Heritage, 1/2003), lot 8838. NGC ID# 266S, PCGS# 8718

1892-CC Ten Dollar, MS61
Low Mintage Carson City Issue

- 6819 1892-CC MS61 PCGS. CAC. FS-501, Variety 1-A.** IN GOD WE TRUST is die tripled, as seen on all 1892-CC eagles. The present crisply struck representative has orange-gold luster and a few moderate field marks, though only those above star 1 are of any import. A scant 40,000 pieces were issued. Population: 9 in 61, 21 finer (8/13). NGC ID# 266W, PCGS# 8722

1893-O Ten Dollar Error, AU58
Broadstruck Out of Collar

- 6820 1893-O — Broadstruck Out of Collar — AU58 PCGS.** The collar die was obstructed when the present piece was coined. The rim is exceptionally wide between 6 and 9 o'clock. The reverse displays a thick wire rim between 9 and 12 o'clock. Sharply struck with a considerable portion of the original, flashy mint luster still present, this example lacks the bagmarks that often plague later-dated O-mint varieties. Federal gold coins are much rarer broadstruck than their silver and copper counterparts. The New Orleans mintmark, associated with low mintages, adds considerably to the desirability of this rarity.
Ex: *FUN Signature* (Heritage, 1/2002), lot 8305, which realized \$7,475; *Henderson Collection of U.S. Gold Errors* (Heritage, 8/2006), lot 2483, which realized \$8,625.

1893-O Ten Dollar, Well-Struck MS63
Fewer Marks Than Usual
None Certified Finer

- 6821 1893-O MS63 NGC.** A single die variety is known. This low-mintage New Orleans issue (17,000 pieces) is rarely encountered above the MS62 level. NGC and PCGS have certified only 23 Select examples and none finer (some of these may be resubmissions). Lustrous surfaces exhibit even copper-gold patina. The design elements are better struck than sometimes seen, including the curls around Liberty's face that are sometimes weak. Some of the star centrils reveal the usual softness. Scattered minute marks determine the grade, but these are fewer and less severe than typically seen on Mint State survivors. Census: 11 in 63, 0 finer (8/13). NGC ID# 2673, PCGS# 8727

**1900-S Select Eagle
Conditionally Rare**

- 6822 1900-S MS63 PCGS.** The 1900-S ten dollar, from a mintage of 81,000 pieces, is a scarce and underrated date. A fair number of circulated coins are known, but Mint State examples are scarce and very difficult to locate above MS62. Attractive luster resides on the copper-gold surfaces of this Select piece and a solid strike characterizes the devices. A few light marks are consistent with the grade. Population: 18 in 63, 3 finer (8/13). NGC ID# 267N, PCGS# 8746

**1900-S Ten Dollar, MS63
Surprisingly Scarce in Uncirculated**

- 6823 1900-S MS63 PCGS.** Despite its proximity to the common 1901-S, the 1900-S is scarce in Uncirculated grades, and an important rarity at the Select level. Only 81,000 pieces were struck, and given the number of pieces certified in XF and AU, it seems obvious that most examples were placed in West Coast circulation rather than set aside as bank reserves. The present lustrous and sharply struck representative is refreshingly smooth aside from a couple of minor marks on the shield. Population: 18 in 63, 3 finer (8/13).
Ex: *Dallas Signature* (Heritage, 10/2006), lot 3003; *FUN Signature* (Heritage, 1/2008), lot 4473. NGC ID# 267N, PCGS# 8746

INDIAN EAGLES

**1907 Indian Eagle, MS64
Famous No Periods Design**

- 6824 1907 No Periods MS64 PCGS.** After a limited mintage of Wire Rim and Rolled Edge coins that are often collected with the pattern series, the Mint introduced the No Periods motif, the first version of Saint-Gaudens beautiful Indian eagle design to reach the general public. This well-detailed Choice example displays lustrous orange-gold surfaces with few signs of contact.
From *The Searight Collection*. NGC ID# 28GF, PCGS# 8852

**1908 Motto Ten Dollar, MS64+
Exceptionally Well Preserved**

- 6825 1908 Motto MS64+ PCGS. CAC.** The motto IN GOD WE TRUST was added to the design of the Indian eagle in 1908, despite the opinion of President Theodore Roosevelt that this constituted blasphemy. Examples are readily available through MS64. Gems and Premium Gems are scarce and finer pieces are quite rare. The reddish-gold surfaces of this high-end MS64 are satiny, sharply struck, and exceptionally well-preserved. PCGS has seen just four pieces in MS64+ (8/13). NGC ID# 28GJ, PCGS# 8859

**1909 Indian Eagle, MS64
Better Early Series Date**

- 6826 1909 MS64 NGC.** The 1909 Indian eagle is a scarcer date in the series, from a mintage of 184,789 pieces. This well-detailed near-Gem specimen displays attractive lustrous surfaces and relatively few contact marks on each side. A small alloy spot appears near 9 o'clock on the obverse. Census: 56 in 64, 30 finer (8/13). NGC ID# 28GM, PCGS# 8862

**1909 Ten Dollar, MS64
Scarce Early Issue**

- 6827 1909 MS64 NGC. CAC.** Frosty lemon-gold luster is accented by splashes of rich orange toning. This is a highly appealing example of the date, and seldom encountered in such nice condition. Even in MS63 grade this issue is highly regarded. Mintage for the year was a modest 184,789 coins. Census: 56 in 64, 30 finer (8/13).
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 4896. NGC ID# 28GM, PCGS# 8862

1912 Eagle, MS65
Conditionally Scarce

6828 1912 MS65 PCGS. Intermingled shades of yellow-gold and orange-gold colors add to the visual appeal of this lustrous, attractive Gem example. The design elements display a bold level of detail. Very few marks are present and they are all extremely minor. Population: 27 in 65, 11 finer (8/13). NGC ID# 28GW, PCGS# 8871

1913 Indian Eagle, MS64+
Sharply Detailed and Lustrous

6829 1913 MS64+ PCGS. This high-end Choice specimen is sharply detailed throughout, with crisp definition on the hair and headdress feathers. The bright orange-gold surfaces display frosty mint luster and a few minor contact marks in the reverse field do little to detract from the outstanding visual appeal. NGC ID# 28GY, PCGS# 8873

1914 Indian Ten, MS64
Underrated Issue in High Grade

6830 1914 MS64 NGC. A smallish mintage of 151,000 Indian eagles was accomplished at the Philadelphia Mint in 1914, and the issue is very scarce in grades above the MS64 level. This attractive Choice example is sharply detailed and brightly lustrous, with lightly marked greenish-gold surfaces. NGC has graded 52 numerically finer examples (8/13). NGC ID# 28H2, PCGS# 8875

1914-D Eagle, MS64
Bold Luster

6831 1914-D MS64 NGC. Lustrous yellow-gold with a faint suggestion of satin and subtle texture. The obverse has a shallow long mark on Liberty's cheek that precludes Gem status, but the reverse is pleasingly preserved. The 1914-D is available for a price in MS64 but is decidedly scarce any finer. NGC ID# 28H3, PCGS# 8876

1914-S Ten Dollar, MS64
Rare Any Finer

6832 1914-S MS64 PCGS. CAC. Similar to other S-mint Indian tens, the 1914-S is a significant condition rarity. This issue saw a mintage of 208,000 pieces and is relatively easy to obtain in circulated grades. Most Mint State examples grade MS60 to MS63, and are obtainable with patience and searching. Near-Gems are scarce and MS65 and finer pieces are rare.

Both sides of this near-Gem are awash with vibrant luster and display light reddish-gold coloration. The design elements are sharply struck, though the eagle's shoulder feathers are soft, a usual characteristic of the issue. A few unobtrusive marks preclude Gem classification. Population: 64 in 64 (2 in 64+), 11 finer (8/13). NGC ID# 28H4, PCGS# 8877

1915-S Ten Dollar, Select Mint State
Mintage 59,000 Pieces

6833 1915-S MS63 PCGS. A Select example from an issue of just 59,000 pieces, sun-yellow around much of the outside with paler interiors and coppery areas just off the tip of Liberty's nose and at the back of her neck. Wispy marks through the fields, a couple of reed marks to the left of her eye, and another on the eagle's rear leg contribute to the grade. Despite these minor faults, this is among the better examples of an issue most frequently found in the AU55 to MS62 range; unlike on the East Coast, the West Coast continued to use gold coinage to a limited extent in the early 20th century. Population: 29 in 63, 29 finer (8/13). NGC ID# 28H6, PCGS# 8879

1915-S Ten Dollar, MS64
Elusive Any Finer

6834 1915-S MS64 PCGS. CAC. The 1915-S ten dollar has the second lowest mintage (59,000 pieces) of all Indian eagles struck at the San Francisco Mint. Most examples are seen through the AU55 grade level. Uncirculated coins through MS62 can be found with patience and searching while Select and near-Gem pieces are scarce. MS65 and finer specimens are highly elusive. PCGS and NGC have graded a little more than 30 coins in MS64 and fewer than 15 pieces finer.

Radiant luster emanates from both sides of this yellow-gold near-Gem and a solid strike leaves excellent definition on the design features, though the eagle's shoulder shows some softness. A few light marks and scuffs are visible, more so on the reverse. All in all, this piece yields pleasing eye appeal. Population: 21 in 64 (1 in 64+), 8 finer (8/13). NGC ID# 28H6, PCGS# 8879

PROOF INDIAN EAGLE

1912 Ten Dollar Indian, PR66 Fine Sandblast Finish

6835 1912 PR66 PCGS. CAC. Though the proof Saint-Gaudens eagle series is a brief one — just eight issues from 1908 to 1915 in the main series, plus a handful of extreme rarities — it has a plainly visible history of Mint tinkering and experimentation. The idea of matte proofs did not originate in the United States but Europe, where it became a popular choice for medals among artists who preferred to keep the focus on the design rather than the shine of reflectivity, and the Mint made several adjustments to try to balance technical concerns with customers' demands.

The first official issue of 1908 is described by Garrett and Guth as “a very complex year, with possibly three Proof finishes used for coinage.” They cite a “dark matte” finish as the most common, the others falling into the extreme rarities category above. In 1909 and 1910, satin-bright “Roman Gold” variants prevailed as the Mint tried to win back collectors who complained about the dark and dull appearance of the 1908 coins. The 1911 matte proofs are split between 1908's dark matte and a fine sandblast finish that carried through to 1912 and 1913. The last two years brought a coarser grain to the sandblast effect, concluding a widely variable series of finishes and approaches.

This 1912 fine-finish proof eagle has deep orange-gold color and a dusky, faintly luminous aura. Both sides are pleasingly preserved and generally undisturbed. A small coppery area at the obverse rim between 7 and 8 o'clock may serve as a future pedigree marker. One of just 83 specimens minted. Population: 4 in 66, 4 finer (8/13). *From A 1912 Gold Proof Set Acquired Directly From The Mint.* NGC ID# 26YD, PCGS# 8894

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU53 Popular First-Year Type Coin

- 6836 1850 AU53 PCGS.** Splendid olive-gold patina covers the lightly abraded surfaces of this lustrous coin. The details are boldly defined and there are no mentionable marks on either side. Despite a high mintage, the 1850 had a lower survival rate than many of the later issues. These pieces are now extremely popular as a type coins because of their status as the first regular-issue double eagles.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4014. NGC ID# 268F, PCGS# 8902

1850-O Twenty, XF40 Low Mintmark Variety 2

- 6837 1850-O XF40 NGC. Variety 2.** A majority of the first-year 1850-O twenties are Variety 3 with the mintmark touching the tail feathers. Varieties 1 and 2 share the same low mintmark reverse but have different obverses, with a rust lump beneath the R in LIBERTY confirming the scarce Variety 2. The present representative shows wear on the curls and wingtips but also offers pockets of luster. Two thin marks are noted near the RICA in AMERICA.
Ex: Dallas Signature (Heritage, 11/2005), lot 4448. NGC ID# 268G, PCGS# 8903

1851-O Double Eagle, AU53 A Logical Choice for an O-Mint Type One

- 6838 1851-O AU53 NGC. Variety 1.** The 1851-O double eagle has an ample mintage of 315,000 pieces, and is the most frequently seen New Orleans twenty in terms of overall rarity. It can be located with little difficulty through Choice About Uncirculated condition. It is quite scarce in AU58 and Mint State coins are rare. Traces of luster reside in the protected areas of this greenish-gold example with subdued reddish accents. The devices are generally well struck except for weakness is obverse stars 6 and 7. Scattered marks are consistent with the grade. NGC ID# 268J, PCGS# 8905

1851-O Variety 2 Twenty, AU53 Early Type One O-Mint

- 6839 1851-O AU53 NGC. Variety 2.** The mintmark is positioned slightly right of the usually seen Variety 1 coins, and the obverse dentils are long. The generous mintage ensures the availability of the 1851-O as a Type One twenty. This piece is slightly above average in grade with the average coin grading XF47.7. Reddish-gold color is seen over most of each side with yellow-gold accents surrounding the devices. A few marks are located on the face of Liberty. NGC ID# 268J, PCGS# 8905

1852-O Liberty Twenty, XF45 Partially Prooflike Surfaces

- 6840 1852-O XF45 PCGS.** Bright yellow-gold surfaces laced with light green tints display traces of prooflike luster in the recessed areas of this Choice XF O-mint specimen. A well directed strike brings out sharp definition on most of the design elements, and minute marks scattered about are not worthy of individual mention.
Ex: FUN Signature (Heritage, 1/2008), lot 4577. NGC ID# 268L, PCGS# 8907

1852-O Liberty Twenty, AU55 Scarce Issue in Finer Grades

- 6841 1852-O AU55 NGC.** From a substantial mintage of 190,000 pieces, the 1852-O Liberty double eagle is still a scarce issue in AU55 condition. This lightly worn Choice AU example displays vivid greenish-gold surfaces with traces of prooflike reflectivity in sheltered areas. A scattering of minor contact marks on both sides is consistent with the grade. NGC ID# 268L, PCGS# 8907

**1852-O Liberty Twenty, MS61
Ideal Mintmark Type Coin**

6842 1852-O MS61 NGC. Variety 1. The 1852-O claims a large mintage of 190,000 pieces, making it the second most available double eagle from the New Orleans Mint and the issue most often found in high grade. Mintmark type collectors are particularly fond of the 1852-O because its surviving population of 900-1,100 examples includes a number of Mint State specimens, like the present coin.

This attractive MS61 piece displays vivid orange-gold surfaces with vibrant mint luster and traces of prooflike reflectivity in sheltered areas. The design elements are well-detailed and eye appeal is quite strong. A scattering of minor contact marks on both sides explain the grade. Census: 8 in 61, 4 finer (8/13). NGC ID# 268L, PCGS# 8907

**1853/2' Double Eagle, AU53
A Controversial Issue**

6843 1853/2' AU53 NGC. FS-301. Listed as a "3 Over 2" in the *Guide Book* due to its contested nature (remnants of a 2 or a die break in the lower loop of the 3?). A small die dot is located below the R in LIBERTY. About 100 pieces were found on the wrecks of the *S.S. Republic* and the *S.S. Central America*. The majority of examples are found in XF and AU grades. Mint State pieces are rare. Traces of luster reside in the recesses of the this wheat-gold AU53 specimen. The design elements are fairly well-defined and each side is minimally marked. NGC ID# 268M, PCGS# 8909

1853-O Twenty Dollar, AU50

6844 1853-O AU50 PCGS. CAC. Variety 1. Five different U.S. Mints struck Liberty double eagles, and New Orleans is the scarcest facility. Most O-mint twenties are dated between 1850 and 1853, since mintages plunged in 1854, the first year that West Coast bullion could be coined at the San Francisco Mint. The present yellow-gold 1853-O displays luster near the stars, legends, and motifs. Abrasions are minor for the grade aside from two slender diagonal marks on the shield. NGC ID# 268N, PCGS# 8910

**1856 Double Eagle, AU58
Scarce Philadelphia Issue**

6845 1856 AU58 NGC. This elusive date is considered among the scarcest Philadelphia Mint issues of the 1850s, behind only the 1858 and 1859, and even discovery of the *S.S. Republic* treasure did little to increase its availability. Study of dates and quantities in the treasure give us an excellent snapshot of coins in circulation in the mid-1860s. Only 1855, 1856, 1858, and 1859 were represented by fewer than 20 coins in that treasure. From an earlier source, this example is attractive with strong details, pleasing surfaces, and attractive yellow and green-gold luster. Census: 47 in 58, 17 finer (8/13). *Ex: Dallas Signature (Heritage, 10/2008), lot 3017.* NGC ID# 268Y, PCGS# 8917

**1856-S Double Eagle, Near-Mint
Variety 17D, Full Serif, S Tilted Right**

- 6846** 1856-S AU58 NGC. CAC. We suspect that the present double eagle originated from the S.S. *Central America* treasure ship, since it is an example of Variety 17D (Full Serif, S Tilted Right) as designated by SSCA numismatist Robert Evans. The honey-gold surfaces display ample bright luster along with the expected number of small abrasions. NGC ID# 2692, PCGS# 8919

**1857-S Double Eagle, Spiked Shield, MS64
Legendary Find From the S.S. *Central America***

- 6847** 1857-S Spiked Shield MS64 PCGS. Variety 20A. Ex: S.S. *Central America*. SSCA 4757. This near-Gem has the S.S. *Central America* signature look of deep yellow-gold margins and pale wheat-like interiors. The highly lustrous surfaces are sharply struck and reveal a few scattered marks consistent with the designated grade. Prior to 1989, the 1857-S was mostly available in grades Very Fine to Extremely Fine. The S.S. *Central America* discovery found more than 5,000 '57-S double eagles aboard when the ship sunk. Many were in the same state of preservation as the day they left the Mint. PCGS# 70000

**1857-S Spiked Shield Twenty, MS64
Ex: S.S. *Central America***

- 6848** 1857-S Spiked Shield MS64 PCGS. Variety 20A. Ex: S.S. *Central America*. SSCA 0601. A great near-Gem example of the S.S. *Central America*'s most popular treasure, rich yellow irregularly at the margins with pale but broadly lustrous centers. Well-defined with only a few shallow marks and scrapes. Housed in a faux-book holder with certificate of authenticity. PCGS# 70000

**1857-S Spiked Shield Twenty, MS65
An S.S. *Central America* Type Coin**

- 6849** 1857-S Spiked Shield MS65 PCGS. Variety 20A. Ex: S.S. *Central America*. SSCA 0353. For collectors seeking a Gem or better Type One Liberty double eagle, the most populous issue incidentally has one of the best stories, as the vast majority of high-grade 1857-S double eagles were recovered from the shipwreck of the S.S. *Central America* that same year. This MS65 example has broad, pale yellow interiors with deeper color on the rims. A few scattered marks on each side are no obstacle to the grade, nor to high all-around eye appeal. Comes with certificate of authenticity and faux-book case (no outer box). PCGS# 70000

1857-S Double Eagle, MS65
An S.S. Central America Treasure

6850 1857-S Spiked Shield MS65 PCGS. CAC. Variety 20A. Ex: S.S. Central America. SSCA 3651. What should have been an ordinary sailing, Havana to New York City, took a terribly wrong turn when the *Central America* encountered a hurricane off the Carolina coast. The ship sank, taking millions of dollars in gold to the bottom of the sea — millions in 1857 terms, when a troy ounce of gold was valued at \$20.67. This Gem 1857-S double eagle is a tiny but beautiful part of that treasure, bright with cartwheel luster and showing the *Central America* double eagles' signature look of deep sun-orange rims and pale interiors. PCGS# 70000

1857-S Bold S Twenty, MS64
An S.S. Central America Coin

6851 1857-S Bold S MS64 PCGS. CAC. Variety 20B. Ex: S.S. Central America. SSCA 2844. A classic near-Gem example of this popular shipwreck issue with typical yellow margins and pale yet brightly lustrous interiors. Strongly struck devices are just a few shallow marks away from warranting an even finer grade. Housed in a gold-label holder and offered with faux-book case and slipcover, though the usual paper certificate of authenticity is absent. PCGS# 70001

1857-S Narrow Serif Twenty, MS61
Ex: S.S. Central America

6852 1857-S Narrow Serif MS61 PCGS. Variety 20C. Ex: S.S. Central America. SSCA 2552. The *Central America* treasure has changed the way collectors approach Type One double eagles, among other collecting specialties. While this MS61 example is more abraded than many of its peers, particularly in the form of portrait marks and obverse field scrapes, its all-around appeal is strong thanks to a muted version of the “deep-yellow margin, pale interior” color scheme so often found on the *Central America*'s 1857-S twenties. Comes with certificate of authenticity, faux-book case, and outer box. PCGS# 70002

1858-S Double Eagle, AU58
High Mintage, Low Survival

6853 1858-S AU58 NGC. The 1858-S Liberty double eagle was widely circulated at the time of issue and high-grade examples are seldom encountered today. This impressive near-Mint specimen exhibits the usual number of minor abrasions for the grade, but the surfaces retain most of their original luster and the design elements display only a trace of actual wear. NGC has awarded higher numeric grades to 17 examples (8/13). NGC ID# 2699, PCGS# 8925

**1859 Double Eagle, AU55
Rare Any Finer**

- 6854 1859 AU55 NGC. CAC.** This low-mintage issue (43,597 circulation strikes) was apparently ignored by early collectors who preferred proof examples of Philadelphia coinage. Consequently, the 1859 twenty is very scarce in any grade and extremely rare in Mint State, with no pieces certified finer than MS62. Traces of luster are visible in the recesses of this reddish-gold Choice AU example. The design elements are generally well struck, including most of the obverse stars, the beads on Liberty's crown, and the majority of the eagle's plumage. A few circulation marks are more prevalent on the obverse, the most prominent being a milling mark at Liberty's eye brow. Census: 26 in 55, 31 finer (8/13). NGC ID# 269A, PCGS# 8926

**1859-S Twenty Dollar, AU58
Die Doubled Variant**

- 6855 1859-S AU58 NGC. FS-101.** LIBERTY is strongly die doubled south. The variety is currently unlisted in the *Guide Book* but certainly merits addition. The median certified grade for the 1859-S is AU50, and NGC has certified a mere 20 pieces as Mint State. This sun-gold Borderline Uncirculated example has considerable luster along with moderate field marks near the forehead and obverse star 12. Ex: FUN Signature (*Heritage*, 1/2008), lot 4644, which realized \$3,450. NGC ID# 269C, PCGS# 8928

**1860 Twenty Dollar, Mint State
From the S.S. Republic**

- 6856 1860 MS60 NGC.** Ex: S.S. Republic. This impressive Type One twenty has unbroken cartwheel sheen across both sides. The reverse is surprisingly unabraded, and its luster is undiminished. Moderate obverse marks are fewer than expected of the grade. The 1860 is scarce in Mint State despite a small quantity of the date recovered from the 1865 S.S. Republic shipwreck. Ex: Orlando FUN Signature (*Heritage*, 1/2008), lot 4647, which realized \$6,325. NGC ID# 269D, PCGS# 8929

**1860-S Liberty Double Eagle, AU55
Nice Color and Luster**

- 6857 1860-S AU55 PCGS.** Demand for double eagles was high in 1860 and the 1860-S claims a substantial mintage of 554,950 pieces. Most examples circulated widely in the channels of commerce, and high-grade specimens are seldom encountered in today's market. This brightly lustrous Choice AU example exhibits pleasing orange-gold surfaces with a few highlights of rose. Population: 39 in 55, 62 finer (8/13). NGC ID# 269F, PCGS# 8931

1860-S Liberty Twenty, AU58
Rarely Seen Finer

6858 1860-S AU58 PCGS. Most 1860-S twenties saw extensive circulation and today examples are surprisingly scarce in high grades. Numerous abrasions cover both sides, which is typical of the issue, but none merit specific mention. This piece is sharply struck with lovely yellow-gold patina. Plenty of luster throughout enhances the eye appeal. Population: 34 in 58, 28 finer (8/13).
Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4067. NGC ID# 269F, PCGS# 8931

1860-S Liberty Double Eagle, AU58
Challenging Type One Issue in High Grade

6859 1860-S AU58 NGC. The 1860-S is one of the scarcer Type One S-mint twenties and is quite challenging in grades that approach Mint State. This piece retains almost complete mint luster with only slight evidence of rub over the highpoints. The surfaces are generally quite smooth, the only exception being an ill-placed milling mark to the right of Liberty's upper lip. NGC has only certified 21 numerically finer examples (8/13).
Ex: *Central States Signature* (Heritage, 5/2004), lot 9977; *Dallas Signature* (Heritage, 10/2008), lot 3031. NGC ID# 269F, PCGS# 8931

1861 Liberty Twenty, MS61
Lustrous, Colorful Specimen

6860 1861 MS61 NGC. With the highest production figure of any double eagle until the 1904 (and 1904-S) issues, the 1861 is nonetheless available in Mint State grades for a price, up through the MS65 level—and PCGS has certified a single, incredible MS67 example! This example has much appeal and exuberant luster for the MS61 grade, with beautiful, mellow red-orange patina deepening to amber near the obverse rim. A couple of tinges of ice-blue appear around the stars, and the reverse has a similar palette. The abrasions on Liberty's cheek preclude a finer grade, but this is a spectacular coin nonetheless in aesthetic terms.
Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4076. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, MS63
Type Collection Candidate

6861 1861 MS63 PCGS. Once-upon-a-time, the 1861 double eagle was considered the single common date for the Type One design. However, its status changed when the S.S. *Central America* and other treasures were discovered late in the 20th century. Today, the 1861 is still a plentiful issue, but the 1857-S is considered the common date of the series. With a mintage of just under 3 million coins, the 1861 had the ninth highest production of any double eagle issue from 1850 through 1933, and the third highest mintage of the Liberty Head design. This Select Mint State specimen has a few trivial marks with frosty yellow gold luster, bold design elements, and faint traces of light blue toning. Population: 32 in 63 (2 in 63+), 15 finer (8/13). NGC ID# 269G, PCGS# 8932

1861-O Liberty Double Eagle, AU55
Partially Prooflike Surfaces
Challenging Issue

6862 1861-O AU55 NGC. In terms of history, they say that some coins can talk. And, while that may be true with many issues, the 1861-O double eagle guards her secrets well. For years researchers have put forth notions regarding when the 1861-O twenties were struck and by whom, yet such suggestions will likely never rise above the status of theory. Fortunately — owing to a well publicized 1887 Mint report — we do know that the mintage of 1861-O double eagles was accomplished by three different authorities: The Federal government, the State of Louisiana, and the Confederate States of America. The same report opines that much of this issue was probably melted before entering the channels of American commerce; a suggestion that seems likely based on the minuscule extant population.

A total of 17,741 pieces were reportedly struck at the New Orleans Mint in early 1861, yet it is clear that fewer than 200 examples have survived, regardless of condition. Unsurprisingly, a few noted specialists feel the extant population is lower. Doug Winter, in his *Gold Coins of the New Orleans Mint* (2006), puts the figure at between 135 and 165 coins, while Dave Bower's (2004) suggests no more than 133 survivors. Pragmatists tend to look at hard numbers, such as certified population data, when trying to determine a coin's true rarity. NGC and PCGS have documented a combined total of 214 pieces as of (7/13), although that number is most certainly inflated due to duplicate submissions. The 1861-O double eagle is a challenging issue—a point few would argue. But what about the Condition Census? While an official census has not been established, experts agree that no more than 4-6 Mint State specimens exist and that the majority of survivors reside in the VF to XF range. The finest certified as of (7/13) at either service is a lone MS61 NGC coin, thus making the offering of an AU55 example a notable event.

The present coin is sure to elicit bidding fervor as it crosses the auction block. Rich luster, light green-gold coloration, and minimally abraded surfaces make this an above average offering for the issue and assigned grade. And while virtually all known 1861-O double eagles come with poorly defined details, the current coin displays a respectable strike. Furthermore, we find no individual flaws or distractions that warrant individual mention. Census: 9 in 55, 13 finer (7/13).

Ex: Dallas Signature (Heritage, 10/2008), lot 3033. NGC ID# 269J, PCGS# 8934

**1861-S Paquet Twenty, AU Details
Key San Francisco Date**

- 6863 1861-S Paquet — Improperly Cleaned — NGC Details. AU.** Assistant Engraver Anthony C. Paquet was born in Germany in 1814 and emigrated to the United States in October 1848. He began employment at the U.S. Mint in 1857 but most of his coin designs never left the pattern stage. The most important exception was the Paquet Reverse double eagle, noted for its tall, thin letters in the reverse legends. Unfortunately, the rim was too narrow relative to the unchanged Longacre obverse, and the discrepancy led to coinage problems that caused the ephemeral type to be abandoned. None were struck at New Orleans, just two are known from Philadelphia, but the 1861-S is collectible, though rare. The present lightly circulated almond-gold example is subdued and faintly hairlined but circulation marks are relatively minor. NGC ID# 269L, PCGS# 8936

**1862 Liberty Twenty, AU58
Rarest P-Mint Type One Issue**

- 6864 1862 AU58 NGC.** The 1862 is the rarest Type One double eagle produced at the Philadelphia Mint (Douglas Winter and Adam Crum, *Type One Double Eagles*, 2002). When available, examples tend to grade Very Fine to Extremely Fine. It is rare in About Uncirculated, and very rare in Mint State.
- The design elements of this pleasing AU58 example display better than average strike definition, evidenced by crispness on the star centers and the eagle's plumage. Liberty's hair, though not full, still reveals decent detail. Brass-gold surfaces exhibit a good amount of luster, and reveal fewer marks than ordinarily seen. Census: 18 in 58, 11 finer (7/13).
- Ex: *Dallas Signature (Heritage, 10/2008)*, lot 3036. NGC ID# 269M, PCGS# 8937

**1863 Double Eagle, Choice XF
Lower Production Issue**

- 6865 1863 XF45 PCGS.** Unlike earlier double eagle issues with multi-million mintages, the 1863 twenty saw production only in the low six figures during this Civil War year. This lightly worn wheat-gold example has luster remaining in the protected areas of otherwise moderately abraded surfaces. Softly struck, as often seen. NGC ID# 269P, PCGS# 8939

1863 Liberty Double Eagle, AU50
Heavily Exported Issue

6866 1863 AU50 NGC. This Civil War double eagle was struck primarily for export, since foreign governments and businesses preferred bullion payments. Most survivors are in XF to AU with few remaining in Mint State. This moderately abraded example has glimmers of luster across the stars, while the legends and eagle are lustrous. NGC ID# 269P, PCGS# 8939

1864 Double Eagle, AU55
Scarce in All Grades

6867 1864 AU55 NGC. CAC. The 1864 double eagle is scarce in all grades, evidenced by the fewer than 500 examples graded by NGC and PCGS. The vast majority of survivors are in the XF to AU grade range. Apricot- and yellow-gold patination covers both sides of this Choice AU example, and mint luster resides in the recessed areas. The design elements are well-defined, and each side reveals the scattered minute marks associated with a briefly circulated large gold coin. Census: 40 in 55, 82 finer (8/13). NGC ID# 269S, PCGS# 8941

1864 Double Eagle, AU58
Elusive Date in Higher Grades

6868 1864 AU58 NGC. This is a pretty olive-gold coin with ample remaining luster in the recesses. Well struck for a coin produced from the obverse hub of 1859, with better than average detail on Liberty's hair. Although a few examples of this date were recovered from the *SS Republic* wreck, this issue remains rare in Mint State today. Census: 74 in 58 (2 in 58+), 8 finer (8/13). Ex: *Dallas Signature* (Heritage, 10/2008), lot 3040. NGC ID# 269S, PCGS# 8941

1866-S Motto Twenty Dollar, AU53
Rarely Seen Finer

6869 1866-S Motto AU53 PCGS. CAC. This issue is not difficult to locate in Very Fine or Extremely Fine. About Uncirculated pieces are seen but usually at the low end of that scale, and Uncirculated coins are rare. When seen, Mint State examples are in the lower levels thereof. Traces of luster reside in the recesses of this reddish-gold piece and the devices are for the most part nicely defined. The few circulation marks scattered about are not serious. NGC ID# 269Y, PCGS# 8950

1866-S Double Eagle, Motto, MS62
Elusive Type Two Twenty in High Grade
None Certified Finer, Ex: Pittman

6870 1866-S Motto MS62 NGC. The design of the double eagle was modified in 1866 to include the motto IN GOD WE TRUST on the reverse. The San Francisco Mint struck the old Type One double eagles during the first part of the year, but switched over to the Type Two reverse in March. As transitional issues, both varieties of the 1866-S are always in demand from type collectors and series specialists alike.

Despite a large mintage of 698,745 pieces, the 1866-S is quite elusive in Mint State grades today. The majority of the coins circulated heavily in the regional economy, and most examples seen are in the VF-XF grade range. The coin offered here is one of the finest examples certified at either of the leading grading services, as PCGS has graded seven coins in MS62, with none finer, and NGC has certified only three specimens in MS62, again with none finer (8/13).

The present coin traces its history to the famous John Jay Pittman Collection. Pittman was a connoisseur who placed a high value on technical quality and eye appeal. When he sold the first part of Pittman's collection in 1997, David Akers described this coin as:

"Well struck and lustrous with beautiful medium orange gold color. The surfaces have a number of light hairlines and bagmarks, as well as some carbon streaks ... this coin is an unusually high grade example of this rare date. Nearly all known specimens grade only VF or XF, and the only other Uncirculated 1866-S I have seen is in the Harry W. Bass, Jr. Collection."

In the interest of transparency, we note that Akers mentioned several rim bruises in his description, which are well-hidden by the NGC holder and impossible to evaluate today. This coin is the first NGC-graded MS62 coin to appear at auction, since it was not certified at the time of the Pittman sale. A PCGS-graded MS62 specimen realized \$39,100 when it was offered in 2006. We expect intense competition from advanced type collectors and Registry Set enthusiasts when this lot is called.

Ex: Hans M.F. Schulman; purchased privately by John Jay Pittman in March 1961 for \$240; John Jay Pittman Collection, Part I (David Akers, 10/1997), lot 1145. NGC ID# 269Y, PCGS# 8950

**1869 Double Eagle, MS61
Vivid Color and Vibrant Mint Luster**

6871 1869 MS61 PCGS. For much of the 19th century, the San Francisco Mint handled the bulk of double eagle production for circulation purposes, because of its proximity to the gold fields and the preference for hard money in the Western economy. Philadelphia mintages were generally much smaller and the coins were mostly used as currency reserves. A modest mintage of 175,130 double eagles was accomplished at the Eastern mint in 1869, and most examples seen today show the extensive bag marks associated with long-term storage in government vaults.

The present coin displays a minimum number of minor contact marks for the grade and the vivid greenish-gold surfaces display vibrant mint luster that maximizes the coin's visual appeal. The design elements are sharply detailed throughout. Housed in a green label holder. Population: 9 in 61, 15 finer (8/13). NGC ID# 26A5, PCGS# 8955

**1870 Liberty Twenty, AU58+
Significant Remaining Luster**

6872 1870 AU58+ NGC. This high-end near-Mint specimen display light orange and rose-gold surfaces that retain most of their original mint luster. The design elements show just a trace of wear on the high points and some chatter is present on both sides, with a few minor abrasions on Liberty's cheek. Excellent eye appeal for the grade. Census: 67 in 58 (3 in 58+), 36 finer (8/13). NGC ID# 26A7, PCGS# 8957

**1870 Liberty Twenty, MS60
Elusive Philadelphia Issue**

6873 1870 MS60 PCGS. A nominal mintage of 155,150 Liberty double eagles was achieved at the Philadelphia Mint in 1870, as the San Francisco facility handled the majority of double eagle production in that era. The Philadelphia issue is actually even more difficult to locate in all grades than its modest production total suggests. Mint State specimens are particularly elusive and most auction offerings grade no better than AU53.

The present coin is an attractive MS60 example with well-detailed design elements and vibrant mint luster on both sides. The vivid orange-gold surfaces are lightly abraded for the grade and eye appeal is especially strong. Housed in a green label holder. Population: 5 in 60, 36 finer (8/13). NGC ID# 26A7, PCGS# 8957

**1871-CC Twenty, AU Details
Very Scarce Carson City Issue**

6874 1871-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-A. From a small mintage of 17,387 pieces, the 1871-CC is the second-rarest Carson City twenty. Probably no more than 200-250 examples survive today in all grades and conditions. This lightly worn greenish-gold specimen shows a scattering of minor abrasions on both sides and the still-attractive surfaces have an unnatural sheen due to a previous cleaning. NGC ID# 26AB, PCGS# 8961

**1873-S Closed 3 Double Eagle, Pleasing MS62
Finest Seen at NGC**

6877 1873-S Closed 3 MS62 NGC. CAC. The 1873-S Liberty double eagle with a Closed 3 in the date is seen more often than its Open 3 counterpart. This issue is fairly common through About Uncirculated grades. Mint State pieces are rare. The lightly marked, orange-gold surfaces retain ample luster in the recessed areas. Pleasing overall eye appeal. Census: 16 in 62, 0 finer (8/13). NGC ID# 26AL, PCGS# 8969

**1873 Open 3 Twenty Dollar, MS63
The Most Frequently Encountered Type Two**

6875 1873 Open 3 MS63 PCGS. The Open 3 1873 is the most frequently encountered Type Two twenty. That being said, it is also a coin that is seldom seen above MS62. Even in MS62 the Open 3 is a valuable type coin, but in MS63 it is many times scarcer more valuable than its Closed 3 counterpart. The value of the Open 3, of course, is as a representative of the short-lived Type Two series. This is a remarkable, upper-end MS63 coin. The surfaces are much cleaner than one would expect for the grade, and the mint luster is soft and frosted. Sharply defined throughout.
Ex: *Dallas Signature* (Heritage, 10/2006), lot 3253. NGC ID# 26AH, PCGS# 8967

**1873 Open 3 Double Eagle, MS63
Extremely Rare Any Finer**

6876 1873 Open 3 MS63 PCGS. The 1873 Open 3 twenty dollar is very scarce in the Select level of preservation and exceedingly rare any finer. Both sides of this MS63 display pleasing luster. Orange-gold patina on the obverse border cedes to more yellowish-gold in the center, while the reverse exhibits deeper copper-gold hues. The design elements are well brought up and a few light scuffs and marks are consistent with the grade. Nice eye appeal for the Select level. NGC ID# 26AH, PCGS# 8967

**1873-S Open 3 Twenty, MS62
None Certified Finer**

6878 1873-S Open 3 MS62 NGC. CAC. The Type Two Liberty double eagles are conditionally rare, a comment that pertains to both common dates and rarer dates. For example, the total mintage of the 1873-S (Closed 3 and Open 3 varieties) was 1,040,600 coins, and yet only 257 pieces are NGC certified as Mint State coins, and just 19 of those are graded MS62, with none finer for either variety. The Open 3 is seen less often than the Closed 3 in all grades.
Both sides of this pleasing Mint State piece show typical surface marks that are expected for the grade. This brilliant yellow surfaces exhibit frosty luster with hints of mint green color. An attractive representative. Census: 3 in 62, 0 finer (8/13). NGC ID# 26AM, PCGS# 8979

1875-CC Double Eagle, MS63
Exceptional Luster and Color

6879 1875-CC MS63 PCGS. From a substantial mintage of 111,151 pieces, the 1875-CC is the most available Carson City double eagle of the decade. It is also the easiest-to-locate Type Two twenty from the famous Western mint, an important consideration for mintmark type collectors. Although the surviving population might exceed 3,000 examples in all grades, the issue is rare at the MS63 level, and finer coins are virtually unobtainable.

The present coin is an attractive Select specimen, with well-detailed design elements and unusually vibrant mint luster on both sides. The pleasing yellow and greenish-gold surfaces show a scattering of grade-consistent minor contact marks that do little to affect the outstanding eye appeal. Housed in a green label holder. Population: 27 in 63, 1 finer (8/13). NGC ID# 26AT, PCGS# 8974

1876 Double Eagle, MS64
Unknown in Gem Condition

6880 1876 MS64 PCGS. CAC. Of the three major designs for the Liberty double eagle, the shortest-lived was the Type Two struck between 1866 and 1876. The Type Two added the motto IN GOD WE TRUST to the oval glory of stars above the eagle on the reverse; later, the Type Two's denomination would be expanded from TWENTY D. to TWENTY DOLLARS, creating the Type Three design that would carry the Liberty double eagle from 1877 to its end three decades later.

The Type Two twenties are the most elusive of the three in high grades. The Type One double eagles have benefited from the treasures of several ships — the S.S. *Central America*, S.S. *Republic*, and S.S. *Brother Jonathan*, among others — that sank while carrying large quantities of Type One double eagles that since have been recovered. Type Three double eagles were sent *en masse* overseas for international transactions, particularly to Europe, and type issues such as the 1904 are abundant even in Gem condition. Type Two issues fell through the cracks, though, and only a few dates, such as 1873, 1875, 1876, and 1876-S, are suitable for Mint State type purposes.

Even the 1876, though, is a condition rarity in MS64, the grade seen here, and unknown in Gem condition. The obverse presents even better than near-Gem with its broad cartwheel luster, pale yellow interiors, and sun-gold margins. The reverse, however, has two significant digs to the right of the eagle accounting for the grade. Overall the piece displays beautifully, though, and as a “double-green” coin (green PCGS and CAC labels), this high-end example is sure to attract serious bidding attention. Population: 14 in 64 (1 in 64+), 0 finer (8/13). NGC ID# 26AV, PCGS# 8976

**1878-S Twenty, MS62
Conditionally Rare**

- 6881 1878-S MS62 PCGS. CAC.** Issued in the second year of production for the modified Type Three design, this lovely Mint State piece represents one of many conditionally rare issues. A hint of green appears on the brilliant yellow surfaces of this satiny specimen. A hint of surface reflectivity adheres to the fields around the devices. A marvelous example for the advanced collector, as PCGS has only certified nine examples finer, all graded MS63 (8/13). NGC ID# 26B5, PCGS# 8987

**1880-S Double Eagle, MS62
Green-Label Holder**

- 6882 1880-S MS62 PCGS. CAC.** The PCGS *Population Report* indicates that only six examples of the 1880-S double eagle are graded higher than this green-label example. Brilliant and satiny yellow-gold surfaces have faint greenish tendencies. The surfaces are lustrous with only a few grade-consistent marks on each side. Population: 83 in 62 (2 in 62+), 6 finer (8/13). NGC ID# 26BB, PCGS# 8993

**1882-CC Double Eagle, AU55
Popular Mintmark Type Coin**

- 6883 1882-CC AU55 NGC. Variety 1-B.** The Carson City Mint resumed coinage of double eagles in 1882 with a mintage of 39,140 pieces, making the issue reasonably available in most grades. This attractive Choice AU specimen exhibits well-detailed design elements and the bright orange-gold surfaces show traces of prooflike reflectivity around the devices. NGC ID# 26BF, PCGS# 8997

**1882-S Double Eagle, MS62
Tall S Mintmark**

- 6884 1882-S MS62 PCGS. Breen-7284.** Tall S. The typical 1882-S twenty displays a number of abrasions from having been shipped and stored around the world in bags; consequently, the most certified examples grade between AU55 and MS62. The present lustrous example has apricot-gold centers and olive-green margins. Obverse marks are surprisingly minimal though the right reverse field is abraded.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 4817, which realized \$3,450. NGC ID# 26BG, PCGS# 8998

**1889-CC Double Eagle, AU55
Low Mintage Issue**

- 6885 1889-CC AU55 PCGS. Variety 1-A.** A lovely Choice AU sun-gold example of this low mintage Carson City issue. Abrasions are relatively minor for the grade, though we note a few hairlines on the lower obverse field, and marks near obverse star 2 and the IBE in LIBERTY merit passing mention. A scant 30,945 pieces were coined. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, Appealing AU58

- 6886 1889-CC AU58 NGC. CAC. Variety 1-A.** Nearly 31,000 Carson City double eagles were coined in 1889, all from a single die pair. NGC and PCGS have graded more than 1,400 pieces, making circulated coins plentiful. It is scarce in MS60 to MS62, extremely rare in MS63 and virtually unobtainable any finer. The brassy-gold surfaces of this near-Mint State specimen retain considerable luster, and the strike is solid throughout. Scattered marks are not serious. All in all, very nice eye appeal. NGC has seen fewer than 60 finer (8/13). NGC ID# 26BV, PCGS# 9011

**1889-S Double Eagle, MS63
Rare Any Finer**

6887 1889-S MS63 NGC. Well-defined on Liberty's hair and the eagle's plumage, far from a guarantee for this San Francisco issue. Rolling cartwheel luster with a faintly frosty sheen has a yellow-gold base with lighter and deeper variations. Assorted light abrasions and a few rim bumps combine to account for the grade. Rare any finer. NGC ID# 26BW, PCGS# 9012

**1890-CC Double Eagle, AU58
Above-Average Strike and Surface Condition**

6888 1890-CC AU58 NGC. Variety 1-A. The orange-gold surfaces of this near-Mint State twenty dollar retain luster in the recessed areas, and the design elements are better struck than often seen on the issue. Specifically, the date, star centrils, and lower obverse dentils, areas that are sometimes weak, are quite strong. Moreover, both sides lack the heavy abrasions, copper spots, and grease stains that are common to this issue. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, MS61
Very Scarce Variety**

6889 1890-CC MS61 PCGS. Variety 2-B. This attractive Mint State double eagle shows the mintmark located with the second C over the upright of D in DOLLARS, identifying the very scarce Variety 2-B discovered by Heritage cataloger Brian Koller after Doug Winter published his excellent reference on Carson City gold coins in 2001. This well-detailed greenish-gold specimen is brightly lustrous, with a scattering of minor contact marks that define the grade. Population: 82 in 61, 78 finer (8/13). NGC ID# 26BY, PCGS# 9014

**1892-CC Double Eagle, AU58
An Available Carson City Issue**

6890 1892-CC AU58 NGC. CAC. From a mintage exceeding 27,000 pieces, the 1892-CC Liberty double eagle is one of the more available Carson City issues, its population increased by hoards discovered since the publication of *Gold Coins of the Old West*. Strong field-device contrast is evident on each side. The design elements are well struck, save for weakness in the left-obverse stars. The few scattered marks do not distract. Nice overall eye appeal. NGC ID# 26C6, PCGS# 9020

**1898-S Double Eagle, MS65+
Vibrant Luster and Sharply Struck**

6891 1898-S MS65+ PCGS. CAC. The 1898-S double eagle saw a production exceeding 2.5 million pieces, many of which were shipped overseas. In recent years a number of high-quality examples have surfaced. Third-party grading surfaces have seen thousands of examples through near-Gem, but the population decreases significantly at the MS65 level; PCGS and NGC have graded fewer than 200 Gems, and less than 10 specimens finer, of which this high-end Gem is one. It displays vibrant luster over reddish-gold surfaces that exhibit razor-sharp devices. A few light scuffs do not detract, and a few minute marks on Liberty's cheek likely preclude an even finer grade. NGC ID# 26CL, PCGS# 9034

**1902 Twenty Dollar, MS62+
Lowest-Mintage Twenty of 20th Century**

- 6892 1902 MS62+ PCGS. CAC.** The 1902 double eagle has an amazingly low mintage of 31,140 circulation strikes, the lowest number of any twenty dollar struck in the 20th century. As shown in the certified population data the issue is scarce in all grades. The date becomes very rare in MS64. In fact, we might speculate that the issue is rarer even in lower Mint State grades, based on what appears to be inordinately high numbers of MS61 and MS62 examples (resubmissions?) in both the PCGS and NGC reports. Exquisite detail is seen on the orange-gold, lustrous surfaces of this MS62+ specimen. Some obverse scuffs and contacts probably preclude MS63. Population (3 in 62+, 81 finer (8/13) NGC ID# 26CU, PCGS# 9041

**1904 Liberty Double Eagle, MS66
Excellent Color and Luster**

- 6893 1904 MS66 PCGS.** The 1904 Liberty double eagle was produced in large numbers and many high-quality examples have survived to satisfy the demands of both date and type collectors today. This stunning Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. The vivid green and orange-gold surfaces display few signs of contact. PCGS has graded two numerically finer examples (8/13). NGC ID# 26CY, PCGS# 9045

**1904 Liberty Double Eagle, Gorgeous MS66
Only Three Numerically Finer at Both Services**

- 6894 1904 MS66 NGC.** It is believed that a large percentage of the over 6 million 1904 double eagles minted were sent overseas to European countries as part of financial transactions. Although these coins are plentiful through the Gem level, the population drops off dramatically at the Premium Gem level and they are downright scarce any finer. NGC and PCGS combined have awarded higher numeric grades to only 3 examples (8/13). This Premium Gem example displays rich golden-orange color, strong luster, and a pleasing strike. There are relatively few marks and they are minor, with the only possible distraction being a small mark underneath the IB in LIBERTY. A small light gray spot is present on the reverse near 9 o'clock. NGC ID# 26CY, PCGS# 9045

1904 Twenty Dollar, Lustrous MS66

- 6895 1904 MS66 NGC.** With thousands of coins certified by NGC and PCGS, the 1904 double eagle is readily located through the Gem level of preservation, making it a favorite choice for high-grade type collections. Ebullient luster emanates from each side. Apricot-gold fields on the obverse highlights the more yellow-gold central motif, while a couple shades of apricot and yellow-gold cascade over the reverse. The design elements are sharply struck, including Liberty's hair, obverse stars, shield, and eagle's plumage. Both sides are very well preserved. A mere three finer pieces have been graded by NGC and PCGS (8/13). NGC ID# 26CY, PCGS# 9045

**1904 Liberty Double Eagle, Gorgeous MS66
An Excellent Type Coin**

6896 1904 MS66 NGC. The 1904 twenty dollar saw a hefty mintage exceeding 6 million circulation strikes, making it the most common date of the series. NGC has graded tens of thousands of Uncirculated coins through MS65, but the number drops precipitously in Premium Gem to about 260 examples, with a mere one coin finer (8/13). Its large number in high grades makes it an excellent type coin. Blazing luster and two shades of orange-gold color adorn this Premium Gem and a solid strike results in crisp design detail. An occasional faint mark detracts nothing from the gorgeous eye appeal. NGC ID# 26CY, PCGS# 9045

**1905-S Twenty, MS64
Green-Label PCGS Holder**

6897 1905-S MS64 PCGS. CAC. Certified several years ago, this Choice Mint State double eagle remains in a green-label PCGS holder. Both sides have exceptional satin luster with brilliant orange-gold surfaces, a few trivial copper spots and surface marks, and delightful mint-green traces near the border. PCGS has only certified nine finer examples (8/13). NGC ID# 26D3, PCGS# 9048

HIGH RELIEF DOUBLE EAGLES

**1907 High Relief, Wire Rim Twenty
Accessible XF Details Representative**

6898 1907 High Relief, Wire Rim — Mount Removed — PCGS Genuine. XF Details. This High Relief double eagle, with its too-glossy yellow-gold surfaces that show clear rub on the devices and a since-removed mount, has seen better days. Even so, it retains a great deal of the majesty Saint-Gaudens intended and Theodore Roosevelt sought when they had their meeting of the minds that revolutionized U.S. coinage. NGC ID# 26F2, PCGS# 9135

**1907 High Relief, AU58 Details
Wire Rim Variety**

6899 1907 High Relief, Wire Rim — Repaired — ANACS. AU58 Details. This will be a highly prized High Relief for some lucky collector. The surfaces show just the slightest hint of high-point friction and the repair is only faintly visible, apparently the lower right reverse rim has had some metal moved. A few small contact marks are scattered over each side, but none are large enough to merit individual mention. Bright, reddish-gold color. NGC ID# 26F2, PCGS# 9135

**1907 High Relief, Wire Rim Double Eagle
Attractive Near-Mint Example**

6900 1907 High Relief, Wire Rim AU58 PCGS. Though a small amount of wear scarcely dims the majesty of the High Relief design for the Saint-Gaudens double eagle, it does make an example significantly more affordable than it might be otherwise. The obverse is medium-yellow with a touch of orange in the patina, well-defined with a clear wire rim most of the way around and a tiny area of distinct flatness on Liberty's raised knee. The reverse shows less evidence of rub, though a few long abrasions are visible in the field below the eagle. All in all, a wonderful representative of this popular collector coin. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Wire Rim Double Eagle
Near-Mint Example of Famous Issue

- 6901** 1907 High Relief, Wire Rim AU58 PCGS. Most 1907 High Relief twenties display a partial or complete wire rim, a result of the immense striking pressure required to bring out the design by Augustus Saint-Gaudens. On this lightly rubbed example the narrow protrusion of metal is visible around the vast majority of the obverse and a significant part of the reverse. Much original luster remains in lightly patinated yellow-orange fields and there are few abrasions seen, making this a pleasing yet relatively accessible example of one of the most famous issues in the history of U.S. coinage. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, AU58
Popular Wire Rim Variant

- 6902** 1907 High Relief, Wire Rim AU58 PCGS. Augustus Saint-Gaudens remains one of the greatest American sculptors, even more than a century after his death. He labored for years on major monumental sculptural works, always striving for a perfection that only he could understand. He held his work up to comparison not just among other American sculptors, but European masters as well, including Rodin and his longtime friend Paul Dubois. In his *Reminiscences*, Saint-Gaudens comments on Dubois' famous statue Joan of Arc: "... to my thinking, one of the greatest statues in the world. I know of but one or two that I would rank higher. For elevation, distinction, and nervousness of style it is extraordinary. It is one of the works that makes a man wish to strive higher and higher, and to criticize his own results to a degree which would not be possible if Dubois and his productions did not exist." The elevation and distinction he refers to in Joan of Arc reveals much about what Saint-Gaudens ideal was in his own sculptural works, and by extension what he sought to translate in his work on the High Relief twenty dollar of 1907.

This attractive near-Mint specimen shows the prominent Wire Rim that distinguishes the coins struck during the first coining period. Just a trace of wear appears on the sharply impressed design elements, but the vivid orange-gold surfaces are free of significant abrasions and vibrant mint luster is present on both sides. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Wire Rim Double Eagle, XF40
Possibly Carried as a Pocket Piece

- 6903 1907 High Relief, Flat Rim XF40 NGC. It seems improbable that very many High Relief twenties actually escaped into circulation since they were worth a premium to collectors just after striking. More than likely this piece was carried as a pocket piece for several years until its owner realized what a valuable (and heavy) coin he was carrying around on a daily basis. The high points of the design show even wear, and there are just a few small marks on either side. The surfaces are slightly bright with a slight reddish tinge. PCGS# 9136
-

PROOF HIGH RELIEF DOUBLE EAGLE

MCMVII High Relief Twenty, PR63
Subdued Satiny Surfaces

- 6904 1907 High Relief PR63 NGC. Proof High Relief twenties remain a controversial issue; NGC recognizes them, PCGS does not. The main criteria used by NGC for determination of proof status is listed on page 77 of Robert Loewinger's reference *Proof Gold Coinage of the United States*. This piece displays uncommon sharpness of details when compared to other High Relief twenties, absence of die erosion or distortion, and uniform satiny surfaces. The satin finish on this particular piece is slightly subdued, unlike the brightness seen on other pieces, especially non-proof strikings. A few contact marks distinguish this example from others, including: a couple of near-horizontal contact marks below the torch on the obverse, and three short, parallel marks above the sun on the reverse. The surfaces show a light green-gold color with just a hint of reddish patina. PCGS# 9132
-

SAINT-GAUDENS DOUBLE EAGLES

1907 Saint-Gaudens Double Eagle, MS66 Arabic Numerals

- 6905** 1907 Arabic Numerals MS66 PCGS. This amazing Premium Gem has extraordinary eye appeal with vivid blue-green color on the pale orange-gold surfaces. Frosty luster accompanies a sharp strike. Housed in a green-label holder, and PCGS has only certified 16 finer examples in more than a quarter-century of grading (8/13) NGC ID# 26F5, PCGS# 9141

1908 No Motto Double Eagle, MS67 Wells Fargo Nevada Gold

- 6906** 1908 No Motto, Wells Fargo Nevada MS67 PCGS. Short Rays obverse. A large hoard consisting solely of No Motto 1908 double eagles reposed for nearly a century prior to its late 20th century distribution. Dealers, collectors, and graders alike were amazed by the high quality of the hoard, which for marketing purposes was named after its tenuous Wells Fargo ties. The present lustrous butter-gold Superb Gem is intricately struck and essentially immaculate. PCGS# 99142

1908 No Motto Double Eagle, MS67 Boldly Struck

- 6907** 1908 No Motto, Wells Fargo Nevada MS67 NGC. Ex: Wells Fargo Nevada Gold. The 1908 No Motto, claiming a hefty mintage exceeding 4 million pieces, is one of the most common issues in the Saint-Gaudens double eagle series. Thousands of Mint State coins existed prior to that time, but the "Wells Fargo Hoard" purchased by dealer Ron Gillio made the issue even more obtainable. The hoard contained 19,900 specimens that had been kept in sealed bags stored in the vault of a Wells Fargo bank since 1917.

The radiantly lustrous surfaces of this Superb Gem display attractive yellow-gold color imbued with blushes of rose. The design elements are boldly struck, including sharp detail in both of Liberty's hands, the facial features, panes of the Capitol building, and the eagle's feathers. The surfaces are of superb quality. PCGS# 99142

1908-D No Motto Twenty, Crisp MS65

6908 1908-D No Motto MS65 PCGS. Rich orange-gold patina on this D-mint Gem displays tints of mint-green. Both sides are awash in pleasing luster and each exhibit sharply struck design features, including the Capitol building and the upper portions of Liberty, areas that are often weak on this issue. Nicely preserved throughout. PCGS has graded only 10 pieces finer and NGC five higher (8/13).

Ex: *Long Beach Signature* (Heritage, 9/2009), lot 1902. NGC ID# 26F7, PCGS# 9143

**1908-D Twenty, MS65+
With Motto**

6909 1908-D Motto MS65+ PCGS. While PCGS has certified more than 300 examples of this issue as MS65, only three are awarded the Plus designation, and that service has only graded 29 finer pieces (8/13). This Gem has brilliant orange surfaces with frosty gold luster and excellent design definition. NGC ID# 26F9, PCGS# 9148

Augustus Saint-Gaudens in his Paris studio, 1898

1909 Twenty Dollar, MS65
Scarce Issue, Excellent Eye Appeal

6910 1909 MS65 PCGS. The 1909 Saint-Gaudens double eagle splits a reported mintage of 161,282 pieces with its 1909/8 counterpart. Based on research by Roger Burdette, seven obverse and twelve reverse dies were created for 1909 twenty dollar production. Two reverse dies were not used, however.

The 1909 has never been fully appreciated for the conditionally scarce coin that it truly is, despite the hoard of a few hundred pieces discovered in the early 1980s that made lower Mint State coins more available. This issue can be located through MS63 with patience and searching, but near-Gems are scarce and higher-grade examples are very difficult to come by. Indeed, PCGS and NGC have certified just 22 examples in MS65, and 11 specimens finer. A number of these are undoubtedly resubmitted coins in the hope of achieving a higher grade. It is instructive to note that our auction archives indicate that the major auction houses have offered only eight MS65 specimens and eight Premium Gems in the last five years, and none finer.

The lustrous, yellow-gold surfaces of this Gem exhibit sharply-struck design elements. Liberty's facial features, fingers on both hands, and toes are bold, as are the panes of the Capitol building and the eagle's plumage. A few minute marks are consistent with the designated grade, and the only alloy spot is light in hue and located just below the CA in AMERICA. This is a very pleasing specimen that will capture the attention of collectors of Saint-Gaudens coinage. Population: 18 in 65, 7 finer (8/13). NGC ID# 26FB, PCGS# 9150

1909 Double Eagle, MS66
Tied for Finest at PCGS

6911 1909 MS66 PCGS. Surrounded as it is by lower-mintage issues such as the 1908-S and 1909-D, the 1909 double eagle historically has not attracted substantial attention from collectors despite production in the low six figures. The presence of the 1909/8 overdate, too, distracts attention from the “plain” version. Yet the overdate is more relevant than many think; the surviving populations of regular and overdate 1909 double eagles are near-identical, which, if the original mintages were roughly corresponding, would make both five-figure issues as well.

In 2006, when the first edition of the *Encyclopedia of U.S. Gold Coins* came out, Garrett and Guth noted that “The regular-date coins have just started to be recognized for their rarity in MS-64 or higher grades, and none have been graded finer than MS-66 by the major grading services.” While collectors have had a few years since to catch up on the coins’ rarity, it still holds true that there are no Superb Gems in the combined certified population (8/13) and just seven MS66 examples graded by PCGS.

This Premium Gem has rewarding luster, apricot-gold in places with zones of lighter yellow. As was sometimes the case, flatness comes out in the strike, particularly on Liberty’s knee and the top of the torch. Even so, both areas are lustrous (no wear), and rolling satin luster graces surfaces that are remarkably smooth. An ideal choice for the series enthusiast who insists on nothing but the best. NGC ID# 26FB, PCGS# 9150

**1910 Twenty Dollar, MS65
Scarcer Issue in Gem Condition**

- 6912 1910 MS65 PCGS.** Well struck with rich reddish-tinged gold surfaces and slightly frosted mint luster. The fields show only a slight orange-peel texture, a feature that gives this piece an attractive overall appearance. The 1910 is one of the scarcer P-mint twenties from this decade in Gem condition. NGC ID# 26FF, PCGS# 9154

**1911 Saint-Gaudens Twenty, MS64+
Scarce Any Finer**

- 6913 1911 MS64+ PCGS.** From a mintage of 197,250 pieces, the 1911 Saint-Gaudens double eagle is a very scarce issue in Gem condition. This high-end Choice example is an attractive alternative, with sharply detailed design elements, vibrant mint luster, and just one or two minor contact marks in the left obverse field that prevent the Gem designation. NGC ID# 26FJ, PCGS# 9157

**1912 Saint-Gaudens Twenty, MS64
Conditionally Rare Any Finer**

- 6914 1912 MS64 PCGS.** From a smallish mintage of 149,700 pieces, the 1912 Saint-Gaudens double eagle is very scarce in grades above the MS64 level. This impressive Choice example is well-detailed and lustrous, with reddish-gold surfaces that radiate frosty mint luster and show just a few minor contact marks. NGC ID# 26FM, PCGS# 9160

**1915-S Double Eagle, MS66
Vibrant Mint Luster, Outstanding Eye Appeal**

- 6915 1915-S MS66 PCGS Secure.** The 1915-S double eagle is a relatively plentiful issue in lower grades, but examples in MS66 condition are scarce and the issue is virtually unobtainable any finer. This spectacular Premium Gem is sharply detailed throughout and the well-preserved orange-gold surfaces show a few hints of rose, with especially vibrant mint luster. PCGS has graded no coins in numerically finer grades (8/13). NGC ID# 26FW, PCGS# 9168

**1920 Saint-Gaudens Twenty, MS64+
Conditionally Rare in Finer Grades**

- 6916 1920 MS64+ PCGS.** From a mintage of 228,250 pieces, the 1920 Saint-Gaudens double eagle is not difficult to locate in MS64 condition, but the issue is a prime condition rarity in finer grades, making this high-end Choice example an attractive balance of quality and availability. The design elements are well-detailed and the pleasing yellow and rose-gold surfaces are brightly lustrous. PCGS has graded only one numerically finer example (8/13). NGC ID# 26FY, PCGS# 9170

**1922-S Double Eagle, MS64
Elusive Issue in Finer Grades**

- 6917 1922-S MS64 PCGS.** A large percentage of the over 2.5 million 1922 double eagles produced in San Francisco were melted in 1937. Fortunately, many coins were held in foreign bank vaults and made their way into the hands of collectors. Areas of bright yellow-gold color and hints of peach add to the attractiveness of this lovely near-Gem representative. PCGS has awarded higher numeric grades to only 15 examples (8/13). NGC ID# 26G4, PCGS# 9174

**1924 Double Eagle, MS66+
Superior Eye Appeal**

6918 1924 MS66+ PCGS. CAC. The 1924 double eagle, sporting a hefty mintage of 4.3 million pieces, is believed to be the most common date of the series. PCGS and NGC have certified tens of thousands of coins in Mint State. PCGS alone has seen more than 8,000 Premium Gems. The ensuing certified population declines precipitously. The present MS66+ offering is one of just 43 examples so graded by PCGS. Ebullient luster adorns the yellow-gold surfaces on both obverse and reverse, and the strike is solid throughout. The superior eye appeal is confirmed by the CAC sticker. NGC ID# 26G7, PCGS# 9177

*Augustus and Hector Saint-Gaudens in Aspet, France 1898.
Aspet is located in the Pyrennes, and is the ancestral home of his father.
Augustus named his New Hampshire home Aspet, in honor of his father*

1924-D Saint-Gaudens Twenty, MS65
Heavily Melted Issue
Prized Condition Rarity

6919 1924-D MS65 PCGS Secure. Although minted in large numbers (over 3 million pieces), the 1924-D Saint-Gaudens double eagle was considered a major rarity in the 1940s. Q. David Bowers, in his *Guide Book of Double Eagle Gold Coins*, (2004) writes that: "Most were probably retained in the United States and melted in the mid-1930s. However, at least a couple thousand were exported." The expatriated coins began to surface in European holdings in the 1950s, but only in small numbers. The 1924-D is still a very scarce issue today.

The typical survivor is rather heavily abraded and most often grades from high-end AU through mid-grade Uncirculated. A coin grading MS64 is about as nice as a collector can hope to acquire, as examples in better condition are far and few between (PCGS and NGC have to date certified 18 Gems, and only four pieces finer). Moreover, the issue varies in striking quality, perhaps because of what Bowers suggests: "The dies seem to have been kept in service for a long time during the production runs for this high-mintage date."

The MS65 example being offered here displays an above-average strike, particularly in the peripheral areas, and on the fingers of Liberty's left (right-facing) hand, on her toes, and on the eagle's breast feathers. Intense luster and apricot-gold patina accented with traces of lime-green adorns the surfaces on both sides. A few very minor marks scattered about do not distract and are mentioned solely for the sake of accuracy. A minute mark on the sun beneath the N of IN will help to pedigree the piece. Population: 8 in 65, 3 finer (8/13).

Ex: Kutasi Collection (Heritage, 1/2007), lot 3294, realized \$63,250. NGC ID# 26G8, PCGS# 9178

1924-S Twenty, Reddish Tinted MS63
One of the Great Melt Rarities From the 1920s

6920 1924-S MS63 PCGS. CAC. This issue was so extensively melted that more than 99% of the original mintage was converted to gold bullion in the mid-1930s and is resting today in Fort Knox. Probably no more than a thousand coins exist today in all grades. The MS63 level gives the collector an opportunity to acquire this scarce issue at a still relatively affordable price level. The softly frosted mint luster on this piece displays an even reddish patina, and there are a number of small abrasions on each side, none of which are of singular note. NGC ID# 26G9, PCGS# 9179

1924-S Double Eagle, MS64
Most Examples Melted

6921 1924-S MS64 PCGS. In the early coin-collecting going after the Franklin Delano Roosevelt Administration, picking the true rarities from among recent double eagle issues was a mystery. Which dates had been all but destroyed? Which were waiting in Central American or European banks, ready to be unleashed on collectors when the time was right? At one point the 1924-S was thought to be a top-tier rarity, but time has settled it into a mass-melted yet available-for-a-price issue ... except in grades finer than the MS64 example offered here, where PCGS has certified just three such coins (8/13). Light yellow-gold surfaces are softly lustrous with scattered marks but few significant abrasions. NGC ID# 26G9, PCGS# 9179

1924-S Saint-Gaudens Double Eagle, MS64+
Historically Elusive Issue

6922 1924-S MS64+ PCGS. The 1924-S Saint-Gaudens double eagle was considered the rarest issue of the series in the 1940s, before a small number of coins surfaced in European holdings and altered the rarity rankings. The first auction appearance of the 1924-S was probably in lot 369 of Sale Number 397 (Morgenthau, 4/1939), "1924 S. Uncirculated." This tersely worded description escaped the notice of most numismatists, and both Abe Kosoff and B. Max Mehl later claimed they were offering the 1924-S for the first time, in the 1947 ANA Sale and the Dr. Charles W. Green Collection (4/1949) respectively. The 1924-S remains a scarce issue in all grades today, and examples in Gem condition are very rare, making this high-end Choice specimen an attractive balance of quality and value.

This coin offers well-detailed design elements and vibrant mint luster on both sides. The pleasing yellow and rose-gold surfaces show only minor signs of contact and eye appeal is outstanding. PCGS has graded only three numerically finer examples (8/13). NGC ID# 26G9, PCGS# 9179

PROOF SAINT-GAUDENS DOUBLE EAGLE

1912 Saint-Gaudens Double Eagle, PR66+
Only 74 Pieces Struck
One Finer Example at PCGS

6923 1912 PR66+ PCGS Secure. CAC. As the various proof finishes offered by the Mint in the early 20th century became increasingly unpopular with the public, production totals dropped accordingly. Only 74 proof Saint-Gaudens double eagles were struck in 1912, using an innovative sandblast process in place of the earlier matte and Roman finishes. The sandblast finish created an even mustard coloration over both sides of the coin, with tiny sparkling facets that can be observed with magnification. This sparkle gives the surfaces a vibrant “life” to balance the deep monochromatic coloration. The design was slightly modified in 1912, adding two stars to the obverse to signify the admission of Arizona and New Mexico to the Union. Unfortunately, the sandblast finish proved just as unpopular as the matte and Roman proofs of earlier years. It is likely that some of the coins went unsold and were melted after the end of the year.

The 1912 proof double eagle was especially elusive in the first half of the 20th century. There was no example of this issue in the exceptional collection of B.W. Smith when that gathering was offered by B. Max Mehl in 1915, even though he had a specimen of both the 1911 and 1913 proofs. When he offered a 1912 proof in lot 2359 of the William Forrester Dunham Collection in June of 1941, Mehl noted:

“1912 Sandblast proof. Rare. For some reason this date seems to be more scarce and difficult to obtain than any of the other dates of this series.”

The lot realized \$75, considerably more than any of the other proof Saints in the sale (Dunham had a complete run of these from 1908 to 1914). When David Akers did his seminal work on gold coins in the 1970s he studied 443 auction catalogs for his book on double eagles, going back to the John Story Jenks Collection (Henry Chapman, 12/1921). Akers found only 17 appearances of the 1912 proof in all those catalogs, which were deliberately selected for their extensive gold coin offerings, with the Dunham coin being the earliest citation in his survey.

Although the 1912 proof is definitely a rare coin in an absolute sense, with an estimated surviving population of 45-55 examples in all grades, present-day numismatists do not believe it is any more difficult to locate than the other proof Saints, except the 1908, which is the most common issue. Apparently, many examples of the 1912 were impounded in long-term collections like those of Virgil Brand, Colonel E.H.R. Green, and John M. Clapp, and did not surface until much later, accounting for their elusive nature in pre-1940 offerings. The 1912 appears at auction two or three times per year in recent times. Recent sales include the magnificent PR67 PCGS coin in lot 5936 of the Chicago Signature (Heritage, 8/2013), which realized \$211,500.

The present coin is a spectacular high-end Premium Gem, with razor-sharp definition on all design elements and virtually pristine mustard colored surfaces. A tiny alloy spot inside the loop of the D in DOLLAR is the only pedigree marker we can find. The artistic sandblast finish gives the coin a classic medallion appearance and the CAC certification confirms the quality and appeal of this specimen. Only one finer example has been certified at PCGS so Registry Set enthusiasts should bid accordingly. Population: 8 in 66 (1 in 66+), 1 finer (8/13). *From A 1912 Gold Proof Set Acquired Directly From The Mint.* NGC ID# 26GZ, PCGS# 9209

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66 Patinated and Nearly Pristine

- 6924 1893 Isabella Quarter MS66 PCGS. CAC.** The Isabella quarter commemorative is unique in several regards, including the fact that it is the only US coin depicting a foreign monarch. Rich luster remains visible on this toned Premium Gem example. The colors include shades of gray, gold, red, and orange. The coin is well struck and the surfaces are virtually pristine. PCGS has awarded higher numeric grades to only 38 examples (8/13). NGC ID# 28HR, PCGS# 9220

1936 Cincinnati Half Dollar, MS67 Attractive Design, Low-Mintage Issue

- 6925 1936 Cincinnati MS67 PCGS.** The Cincinnati commemorative half dollars were produced in approximately even numbers at all three mints in 1936, with the Philadelphia issue claiming a mintage of 5,005 pieces including assay coins. Officially, the coins were supposed to commemorate the 50th anniversary of Cincinnati as a center of music, but no such tradition of musical achievement exists. The coins were actually made for profit by sale to collectors by their sponsor, Thomas G. Melish. Most of the coins were roughly handled at the Mint, accounting for the extensive contact marks observed on many specimens. The issue was distributed to collectors, however, and most of the coins were carefully preserved over the years.

This marvelous Superb Gem displays well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces exhibit attractive shades of champagne-gold and lavender patina, with exceptional eye appeal. Population: 5 in 67 (1 in 67+), 0 finer (8/13). NGC ID# 28JZ, PCGS# 9283

**1936-S Cincinnati Half Dollar, MS67
Single-Finest Certified at PCGS**

6926 1936-S Cincinnati MS67 PCGS. Ostensibly struck to commemorate a fifty-year history of Cincinnati, Ohio as a center of music, the 1936 Cincinnati half dollars were actually made for the financial profit of their sponsor, Thomas G. Melish. Only 5,006 coins were struck, with the odd six pieces reserved for the Assay Commission. Nearly all the coins were distributed to collectors, and the issue enjoys a high survival rate.

The present coin is a spectacular Superb Gem, the single-finest certified example at PCGS (8/13). The design elements are sharply detailed and both sides radiate bright satiny mint luster. The well-preserved surfaces show traces of pink, bronze, and amber patina, with outstanding eye appeal. NGC ID# 28K3, PCGS# 9285

**1936-D Columbia Half Dollar, MS68
Tied for the Finest Certified**

6927 1936-D Columbia MS68 PCGS. The Columbia half dollar commemorates the 150th anniversary of the designation of Columbia as the capital of the state of South Carolina. Examples of the 1936-D are widely available today, most in the MS64 to MS66 range. Reddish-gold and yellow toning gravitate to the margins of this lustrous MS68 specimen, and each side is sharply struck. Population: 21 in 68 (3 in 68+), 0 finer (8/13). NGC ID# 28K6, PCGS# 9292

**1936-S Columbia Half, MS68
Pastel-Toned and Brightly Lustrous**

6928 1936-S Columbia MS68 NGC. Though the Commission of Fine Arts, perhaps reeling from the deluge of designs in 1936, panned the design for the Columbia halves, few numismatists were critical of its simple, yet effective design. The obverse of this piece has pale greenish-gold at the rims and in tiny specks at the center, while the fields are sky-blue. Slight amounts of violet and teal patina decorate the reverse periphery. NGC recognizes just six other coins in MS68, while PCGS has seen six, with none any finer at either service (8/13). NGC ID# 28K7, PCGS# 9293

**1922 Grant Half Dollar, MS65
Scarce With Star Variant**

6929 1922 Grant With Star MS65 NGC. A brilliant Gem, this Grant With Star half dollar has brilliant silver-white surfaces with satiny luster that is the result of extensive die polishing, especially on the obverse. This pleasing piece has a typical strike that is flat on Grant's head behind the forehead. NGC has only certified 54 finer examples (8/13). NGC ID# 28KC, PCGS# 9307

**1928 Hawaiian Half, MS65+
Untoned and Lustrous**

6930 1928 Hawaiian MS65+ PCGS. These coins were struck to commemorate the 150th anniversary of the 1778 arrival of Captain James Cook at the Hawaiian Islands and the issue quickly sold out despite the fact that the \$2 cost was the highest for any commemorative up to that time. The Philadelphia Mint produced only 10,008 coins. This Gem, as the plus designation indicates, displays a strong degree of visual appeal. The surfaces are brilliant, untuned, and lustrous, revealing only a few minor abrasions. Population: 2 in 65+, 88 finer (8/13). NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half, MS66
Multicolor Toning**

6931 1928 Hawaiian MS66 PCGS. The notable lack of visible contact marks competes with the multicolor surfaces on this Premium Gem Hawaiian for the prime attraction. Most of the obverse and about half of the reverse is pale bluish-gray, but then the reverse blooms out into gorgeous saffron and cinnamon hues. A stellar example of this key commemorative half. Population: 86 in 66 (5 in 66+), 2 finer (8/13). NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS66
Only Two Numerically Finer Coins at PCGS**

6932 1928 Hawaiian MS66 PCGS. Mingled shades of greenish-gold and violet-blue toning enhance the outstanding eye appeal of this spectacular Premium Gem. The design elements are sharply detailed throughout and vibrant mint luster shines through the patina. The 1928 Hawaiian half dollar is the key to the silver commemorative series. Population: 86 in 66 (5 in 66+), 2 finer (8/13). NGC ID# 28KE, PCGS# 9309

**1935 Hudson Half, MS67
Impressively Preserved**

6933 1935 Hudson MS67 PCGS. Yellow-gold and silver-blue shadings compete for space on the reverse, while the obverse has more muted colors save for patches of reddish-orange at the rim. Though the strike is typically soft, the surface preservation is extraordinary on this Hudson half, an issue which had a mintage of just 10,000 pieces (plus assay coins) and was lost in the great mass of silver commemorative coins released in the mid-1930s. PCGS has graded only 10 examples of this issue in MS67 and none in MS67+ or finer (8/13), confirming this Superb Gem's status as a condition rarity. NGC ID# 28KE, PCGS# 9312

**1936 Long Island Half Dollar, MS67
Vivid Tab Toning**

6934 1936 Long Island MS67 PCGS. CAC. The obverse of this delightful Premium Gem shows dark tab toning, while the reverse is completely blanketed in shades of lavender-gray and sea-green. The design elements are well-detailed and vibrant mint luster shines beneath the toning. Visual appeal is quite strong. Population: 41 in 67 (2 in 67+), 0 finer (8/13). NGC ID# 28KL, PCGS# 9322

**1936 Lynchburg Commemorative Half, MS67+
One of the Six Finest at PCGS**

- 6935** 1936 Lynchburg MS67+ PCGS. CAC. PCGS has graded nearly 4,000 Lynchburg commemorative half dollars, more than 2,500 of which fall into the near-Gem to Gem range. The Premium Gem population decreases markedly, and Superb Gems are scarce. This MS67+ is one of just six seen by PCGS, with none finer (8/13). Occasional splashes of reddish-gold visit the obverse margin and become more extensive and deeper in shade at the reverse periphery. Lustrous surfaces are minimally marked and exhibit well-struck design elements. NGC ID# 28KM, PCGS# 9324

**1938 New Rochelle, MS67 Prooflike
An Impressive, Well-Produced Commemorative**

- 6936** 1938 New Rochelle MS67 Prooflike NGC. CAC. Silver-white fields are semireflective with numerous die polishing lines, though a glance at the softly struck midrib on the flower shows slight striking softness, indicating this is a prooflike business strike. This high-grade New Rochelle is a commemorative that holds great appeal. PCGS# 89335

**1926-S Oregon Trail Half, MS68
Tied for Finest**

- 6937** 1926-S Oregon MS68 NGC. Lovely powder-blue, plum-mauve, and golden-brown invigorates the margins of this lustrous MS68 Oregon half. The strike is crisp save for the back of the wagon and the second T in STATES. A loupe is required to locate a couple of trivial abrasions. Census: 7 in 68, 0 finer (8/13).
Ex: *Central States Signature* (Heritage, 4/2008), lot 1682. NGC ID# 28KX, PCGS# 9341

**1936 Oregon Trail Half Dollar, MS68
Gorgeous Condition Rarity**

- 6938** 1936 Oregon MS68 PCGS. CAC. Out of 14 issues for the Oregon Trail half dollar commemorative, only four — the 1926, 1926-S, 1936, and 1937-D — had mintages reach the five-figure mark. Unlike later dates that were saved specifically by collectors of three-coin sets, the 1936 saw limited survival in the tip-top grades; PCGS has certified only two examples in MS68 and none finer (8/13). This CAC-validated example has lemon-gold peripheral toning, far more prominent on the reverse, with shining silver centers. Both sides are near-perfect to the unaided eye with only the tiniest of marks. NGC ID# 28L3, PCGS# 9345

**1921 Pilgrim Half Dollar, Satiny MS67
Scarce and Undervalued**

6939 1921 Pilgrim MS67 PCGS. Swiatek suggests that the 1921 Pilgrims are quite undervalued and underrated in MS65 and higher grades. A light overlay of lilac and grayish-gold covers the surfaces of this phenomenal Superb Gem, one of only 24 of this issue so graded at PCGS (8/13). The satiny luster complements a full strike and a near-total absence of abrasions. For the collector who demands only the finest.

Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1428. NGC ID# 28LD, PCGS# 9360

**1926 Sesquicentennial Half, MS65+
Lustrous, Lightly Toned Specimen**

6940 1926 Sesquicentennial MS65+ PCGS. CAC. A high-end Gem representative of the popular Sesquicentennial half dollar, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show no mentionable distractions and highlights of champagne-gold and amber toning enhance the considerable eye appeal. PCGS has graded eight numerically finer examples (8/13). NGC ID# 28LM, PCGS# 9374

**1926 Sesquicentennial Half, MS66
Only One Finer PCGS Coin**

6941 1926 Sesquicentennial MS66 PCGS. Both the low-relief design and the subsequent preservation of the 1926 Sesquicentennial half dollar issue are largely to blame for the paucity of survivors today at this Premium Gem level, where PCGS has seen only eight submissions with none finer (8/13). Mint chief engraver John Sinnock created designs for the half dollar which were deemed unsatisfactory, and a committee ended up specifying that the final coins be struck in low relief. Predictably, they struck up poorly. This piece shows beautiful color, gold and amber tinges with deeper copper hues on both sides. Marks are minimal and mostly confined to the lower portrait areas. Eye appeal is outstanding. NGC ID# 28LM, PCGS# 9374

1935 Texas Half Dollar, MS68
None Finer at PCGS

6942 1935 Texas MS68 PCGS. Ex: Richard Jewell. From a small distribution of less than 10,000 pieces, the 1935 Texas commemorative half dollar is seldom encountered with such high technical quality and terrific eye appeal. This magnificent MS68 example is sharply detailed and brightly lustrous, with a few hints of golden-tan and powder-blue toning. Population: 5 in 68, 0 finer (8/13). NGC ID# 28LR, PCGS# 9382

1935-D Texas Half Dollar, MS68
Tied for Finest Certified

6943 1935-D Texas MS68 PCGS. The 1935-D Texas commemorative half dollar claims a low distribution total of 10,007 pieces. This spectacular MS68 example exhibits sharply detailed design elements throughout and the well-preserved lustrous surfaces display hints of ice-blue, champagne-gold, and amber toning. Population: 4 in 68, 0 finer (8/13). NGC ID# 28LS, PCGS# 9383

1936-D Texas Half Dollar, MS68
Conditionally Rare at This Level

6944 1936-D Texas MS68 PCGS. Just over 9,000 specimens of the 1936-D Texas half dollar were distributed and few survivors can match the quality and eye appeal of the coin offered here. This magnificent MS68 example is sharply detailed throughout, with vibrant mint luster and a few highlights of champagne-gold and amber toning. Population: 14 in 68 (1 in 68+), 0 finer (8/13). NGC ID# 28LV, PCGS# 9387

1937-D Texas Half Dollar, MS68
Only One Other So Graded

6945 1937-D Texas MS68 PCGS. Just two examples of this commemorative issue have attained the MS68 grade by PCGS, while 39 other examples of the Texas design in all years and mintmark combinations have been similarly graded. The 1935, 1936, and 1936-D issues are the most plentiful in this grade, representing 26 of the 41 total MS68 examples. This is a glorious specimen with highly lustrous surfaces accented by wisps of heather color and vivid peripheral gold and iridescent toning. At this grade level, this 1937-D represents a seldom-offered opportunity for the collector. Ex: Palm Beach Signature (Heritage, 11/2004), lot 7892. NGC ID# 28LY, PCGS# 9391

**1953 Washington-Carver Half Dollar, MS67
Tied for Finest Certified at PCGS**

6946 1953 Washington-Carver MS67 PCGS. The 1953 Washington-Carver commemorative half dollar has a reported distribution figure of just 8,003 pieces, far less than the 108,020 examples struck at the San Francisco Mint that year. The coins were not well-received by the numismatic community, and complaints about the issue influenced the Treasury Department to oppose any commemorative issues for years to come. On the plus side, these coins have always been extremely inexpensive for such a low-mintage issue.

The present coin is a spectacular Superb Gem, with an unusually sharp strike for this issue and vibrant mint luster on both sides. A few hints of pale gold toning adds to the considerable eye appeal. Population: 2 in 67, 0 finer (8/13). NGC ID# 28MY, PCGS# 9438

**1953-D Washington-Carver, MS67
Superior Quality and Eye Appeal
One of the Two Finest Certified**

6947 1953-D Washington-Carver MS67 PCGS. CAC. This issue has a mintage of only 8,003 pieces, with relatively few having been certified in better Mint State grades. This Superb Gem is the single finest seen at PCGS. NGC has also graded an MS67 and none are finer (8/13). Light tan peripheral toning cedes to soft powder-blue in the centers, and the design elements are well-struck. Highly lustrous surfaces reveal a few insignificant light ticks. As affirmed by CAC, this piece is vastly superior in technical quality and aesthetic appeal to the majority of this issue which were poorly struck on imperfect planchets and mishandled during the distribution process. NGC ID# 28MZ, PCGS# 9439

COMMEMORATIVE GOLD

**1915-S Panama-Pacific Quarter Eagle, MS65
With Original Envelope**

6948 1915-S Panama-Pacific Quarter Eagle MS65 NGC. This Gem Panama-Pacific quarter eagle has frosty light yellow mint luster with brilliant surfaces. Both sides are pristine with no copper spots or other blemishes. This example comes with its original envelope from the Official Coin & Medal Department of the Panama-Pacific International Exposition. NGC ID# 26HK, PCGS# 7450

**1915-S Quarter Eagle, MS66
Panama-Pacific Commemorative**

6949 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. A lovely Premium Gem, this Panama-Pacific quarter eagle exhibits brilliant butter-yellow surfaces with frosty mint luster and bold design motifs. Both sides are pristine with no mentionable abrasions. PCGS has only certified 27 finer examples of this issue (8/13). NGC ID# 26HK, PCGS# 7450

1915-S Panama-Pacific Fifty, MS64
Scarcer Round Variety
Only 483 Pieces Distributed

6950 1915-S Panama-Pacific 50 Dollar Round, MS64 NGC. The Panama-Pacific International Exposition was held in San Francisco in 1915 to commemorate the opening of the Panama Canal and to celebrate the recovery of the city after the great earthquake of 1906. Farran Zerbe proposed an ambitious program of five commemorative coins, ranging from 50 cents to fifty dollars in denomination, to be sold at the exposition. The fifty dollar denomination was produced in both octagonal and round versions, featuring a symbolic design by New York artist Robert Aitken. The design for both fifty dollar formats was identical, except the octagonal pieces had dolphins in the angles of the coin, outside the inscriptions.

A total of 1,510 round fifties were struck, including 10 assay coins. Unfortunately, the selling price of \$100 per coin was too high for most collectors to afford, and only 483 coins were actually distributed, with the remainder being melted sometime after the exposition closed. The unusual octagonal design of the other fifty dollar commemorative proved slightly more popular, but the same economic considerations limited the sale of that issue to a meager 645 pieces. Both varieties are very scarce today and, as might be expected, the round issue is harder to locate than its octagonal counterpart.

The coin offered here is an attractive Choice example, with sharply detailed design elements throughout. The pleasing lemon-yellow surfaces show a few accents of orange and rose, with a rough granular texture that induces memories of the old Wass-Molitor fifties of the Gold Rush days. Vibrant mint luster adds to the outstanding eye appeal.

From The Joan Carroll Collection. NGC ID# 26HM, PCGS# 7451

1915-S Panama-Pacific Gold Fifty, MS64
Popular Octagonal Design
645 Examples Distributed

6951 1915-S Panama-Pacific 50 Dollar Octagonal, MS64 NGC. Five different commemorative coins were designed in conjunction with the Panama-Pacific International Exposition in 1915, including two versions of the fifty dollar gold piece. The exposition was an ambitious world's fair held to commemorate the opening of the Panama Canal and the rebuilding of San Francisco after the earthquake of 1906. Numismatic entrepreneur Farran Zerbe was in charge of distribution and the coins were sold both singly and in sets.

New York artist Robert I. Aitken designed both octagonal and round versions of the fifty dollar gold piece. The octagonal pieces were reminiscent of the old fifty dollar slugs of the Gold Rush days and the design was universally acclaimed for its beauty and symbolic appeal. According to Dave Bowers' *Guide Book of United States Commemorative Coins*, the obverse portrays the Greek goddess Minerva, who is "The Goddess of Wisdom, Skill, Contemplation, Spinning, Weaving and of Agriculture and Horticulture." The reverse depicts an owl, "sacred to Minerva, the accepted symbol of wisdom, perched upon a branch of western pine." The dolphins at the peripheries of the octagonal issue "suggesting as they encircle the central field, the uninterrupted water route made possible by the Panama Canal." A total of 1,509 octagonal fifties were minted, but only 645 were actually distributed because the purchase price of \$100 per coin was too high for most collectors to afford. Accordingly, the coins are very scarce in all grades today, with the average specimen grading between AU58 and MS63.

The present coin is a delightful Choice specimen with sharply detailed design elements throughout and well-preserved yellow-gold surfaces that show a few highlights of green and orange. Both sides radiate vibrant mint luster, with terrific eye appeal. NGC has graded 57 numerically finer examples (7/13). From The Joan Carroll Collection. NGC ID# 26HN, PCGS# 7452

1915-S Octagonal Pan-Pac Fifty, MS64
Only 645 Pieces Struck

6952 1915-S Panama-Pacific 50 Dollar Octagonal MS64 NGC. CAC. The Panama-Pacific International Exposition in San Francisco was not the only major California fair to celebrate the opening of the Panama Canal in 1915. The story of a rival event, the Panama-California Exposition held in San Diego, brings to mind an apocryphal Mark Twain quote: “History does not repeat itself, but it does rhyme.”

While many present-day observers believe the Panama-Pacific International Exposition’s name was a fig-leaf for San Francisco’s actual ambition to show its recovery from the devastating 1906 earthquake, San Diego, being the closest (by sea) major California city to the Panama Canal, was more directly connected to its Latin American namesake. Even so, the federal government’s support went to San Francisco, leaving city and state to cover the costs of San Diego’s Panama-California Exposition.

Like many expositions of the time, the Panama-California constructed many temporary buildings, but a few were permanent. Among them were the California Building and accompanying California Tower, key parts of the architectural layout for a 1935 fair, the California Pacific International Exposition, held at the same site. The commemorative coins for that event, more popularly known as the “San Diego” half dollars, show the two buildings on the reverse and so pay indirect tribute to the Panama-Pacific International Exposition’s rival.

In the commemorative coin sense, of course, San Francisco trumps San Diego. The Panama-Pacific International Exposition not only had silver half dollars struck for sale but also gold dollars, quarter eagles, and most famously of all the fifty dollar gold coins in round and octagonal formats. As most collectors are aware, the Round fifties are scarcer but the Octagonals are more popular because of their distinctive shape. This is an impressive near-Gem, underscored by the CAC sticker, that displays rich reddish-tinted surfaces and bright, underlying satin-like mint luster. Magnification will be required to find any contact marks. NGC ID# 26HN, PCGS# 7452

1922 Grant With Star, MS67+
Strong Eye Appeal

6953 1922 Grant With Star MS67+ NGC. CAC. An incredible high-end Superb Gem, this coin features highly lustrous yellow-gold surfaces and orange highlights. The piece displays fully detailed design motifs on both sides. When examined closely, the obverse reveals a few tiny alloy spots. Census: 4 in 67+, 8 finer (8/13). NGC ID# 26HH, PCGS# 7459

PROOF COMMEMORATIVE GOLD

1903 Jefferson Gold Dollar, PR65 Cameo
Only 100 Pieces Struck

6954 1903 Louisiana Purchase/Jefferson PR65 Cameo NGC. The 1903 Louisiana Purchase gold dollars were produced in two varieties, one with a portrait of Thomas Jefferson on the obverse and the other bearing the likeness of William McKinley. A small proof mintage of 100 pieces of each design was struck and the coins were presented to Mint officials, political insiders, and officials of the Louisiana Purchase Exposition, rather than to contemporary collectors. Proofs were accompanied by a card that read:

"This is to certify that the accompanying Louisiana Purchase Exposition gold dollar struck at the Mint of the United States, Philadelphia, in accordance with an Act of Congress approved June 28, 1902, is one of the first one hundred impressions from the Jefferson dies."

Because the proofs were primarily distributed outside of numismatic channels the survival rate for this issue was quite low. Walter Breen knew of 16 examples extant in 1989 and Q. David Bowers notes, "Proofs come on the market only at widely separated intervals." The record price for this issue seems to be the \$37,375 realized by the magnificent PR67 ★ Ultra Cameo NGC coin in lot 5138 of the Jim O'Neal Gold Type Collection (Heritage, 1/2012).

The present coin is a spectacular Gem, with squared edges and razor-sharp design elements that establish it as a proof, rather than a prooflike business-strike. The deeply mirrored fields contrast boldly with the frosty devices to create a startling cameo effect. Eye appeal is terrific. Census: 3 in 65 Cameo, 3 finer (8/13). PCGS# 87482

1903 McKinley Gold Dollar, PR63
Only 100 Examples Struck

6955 1903 Louisiana Purchase/McKinley PR63 PCGS. The Louisiana Purchase gold dollars were struck to commemorate the 100th anniversary of the Louisiana Purchase in 1903. Two varieties were produced, one with a portrait of Thomas Jefferson on the obverse and the other with a bust of William McKinley. A special proof issue was produced, with 100 specimens of each design struck and affixed to cards that certified their authenticity and stated the circumstances of their manufacture. Because these proofs were distributed to officials of the Louisiana Purchase Exposition and government insiders, rather than the collecting community, few examples have survived in unimpaired condition.

The present coin is an attractive Select specimen with well-detailed design elements and vibrant mint luster. The vivid orange-gold surfaces display highlights of lilac and show only minor signs of contact. Visual appeal is quite strong. Housed in a green label holder. Population: 6 in 63, 27 finer (8/13). PCGS# 7483

1903 McKinley Gold Dollar, PR66 Cameo

6956 1903 Louisiana Purchase/McKinley PR66 Cameo NGC. CAC. Much as the Columbian half dollars and Isabella quarters saw limited proof mintages, the 1903 gold dollars honoring the Louisiana Purchase also had proofs struck, 100 apiece for the Jefferson and McKinley designs. The coins were sold in frames and mounted behind wax paper, which caused many of the proofs to lose their beautiful cameo effects, but this gleaming specimen has no such issues. Surfaces are pale yellow with a hint of green when tilted into the light and "black" at other times. The devices, though not heavily frosted, offer a clear contrast to the fields, particularly on the obverse with its large portrait. Census: 2 in 66 Cameo, 2 finer (8/13). PCGS# 87483

MODERN BULLION COIN

2000 Silver Eagle, MS70
Remarkable, Brilliant Surfaces

6957 2000 Silver Eagle MS70 NGC. NGC has certified nearly 85,000 silver eagles dated 2000, the vast majority of which grade MS69. Only 205, a little more than 0.2 of one percent, have been given a perfect grade. Close examination reveals this flawless example to be a legitimate representative of this lofty grade. Its brilliant, pure-white silver surfaces yield exceptional frosty mint luster and a bold strike. NGC ID# 26JZ, PCGS# 9949

TERRITORIAL GOLD

August Bechtler Gold Dollar, MS61
27G., 21C., K-24

6958 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS61 NGC. K-24, R.3. A beautiful Bechtler Family type coin with exceptionally mark-free surfaces. The strike is even, there are no planchet detractions, and luster outlines all letters and numerals. Many antebellum contracts in the South required payment in Bechtler gold. Listed on page 378 of the 2014 *Guide Book*. PCGS# 10040

C. Bechtler Dollar, Reversed N, AU50
Interesting K-4 Variety

6959 (1837-42) C. Bechtler Dollar, N Reversed AU50 PCGS. K-4, R.4. The Bechtler family of North Carolina in the 1830s got many things right that the U.S. Mint and later private gold coiners in California and Utah would not sort out for decades. The K-4 Reversed N gold dollar variety is especially popular with collectors due to its quaint handmade character. This nice Almost Uncirculated example shows original "crusty gold" surfaces, mostly yellow-gold with flashes of copper-gold near the rims. The centers are well-struck and about half of the peripheral legend, with the remaining legends somewhat soft. Marks are minimal throughout, and light circulation wear is consistent with the grade level. Listed on page 376 of the 2014 *Guide Book*. Population: 14 in 50, 59 finer (8/13). From *The Strawberry Fields Collection*. PCGS# 10055

C. Bechtler Gold Dollar, AU58
Kagin-3, Normal N, 28G Centered

6960 (1834-37) C. Bechtler Dollar, 28G. Centered, Normal N AU58 PCGS. CAC. K-3, R.6. The Bechtler family was well known in the southeastern U.S. during the gold rush of the early 1800s. From the earliest discovery of gold in the Piedmont region in 1799, the Carolinas and Georgia were the principal suppliers of gold in America until the California gold rust that began in 1848. The local citizens hesitated to send their gold to far away Philadelphia, and relied on Christopher and August Bechtler to turn the gold into coins. Even after the Charlotte and Dahlonega Mints opened in 1838, the Bechtler's continued a thriving business. This near-Mint example has pleasing green-gold surfaces with deep blue and pale orange peripheries. Population: 4 in 58, 1 finer (8/13). Listed on page 376 of the 2014 *Guide Book*. PCGS# 10058

C. Bechtler 30-Grain Gold Dollar, MS61
K-1 Die Pair, the First Gold Dollar Type

- 6961** (1831-34) C. Bechtler Dollar, 30G. MS61 PCGS. K-1, R.4. At 30 grains this very scarce variety is the heaviest of three standards at which the various Bechtler men produced their eponymous gold dollars. The 30-grain gold dollars, struck in the early 1830s, predated the first federal issue of that metal and value by more than a decade, setting an important precedent for private gold issues as pioneers of various innovations. This semireflective example struck to the heaviest standard has yellow-gold surfaces touched with orange. There are few sizable abrasions, though numerous wispy flaws run through the fields. Listed on page 376 of the 2014 *Guide Book*. PCGS# 10064

1860 Clark, Gruber Five, K-2, MS61
Scarce Colorado Pioneer Gold

- 6962** 1860 Clark, Gruber & Co. Five Dollar MS61 PCGS. K-2, R.4. Clark, Gruber & Company successfully operated as a private mint in Colorado during the early part of the 1860s, until their operations were purchased by the federal government in April of 1863. Initially used as an assay office, the facilities became a full-fledged branch mint in 1906. The Clark, Gruber five dollar gold pieces of 1860 closely resemble their federal counterparts in design, aside from the PIKES PEAK GOLD DENVER legend on the reverse. The issue is not difficult to locate in lower circulated grades, but Mint State examples are elusive.

This well-detailed MS61 example retains much of its original mint luster and eye appeal. The bright canary-gold surfaces show a scattering of minor contact marks on both sides, all consistent with the grade. Listed on page 394 of the 2014 *Guide Book*. Population: 4 in 61, 17 finer (8/13). PCGS# 10136

**1861 Clark, Gruber Five, Kagin-6
Best Known Colorado Private Coiner**

- 6963** 1861 Clark, Gruber & Co. Five Dollar AU50 PCGS. CAC. K-6, R.4. Originally toned in rich jade-green, golden-brown, and sun-gold shades. A minimally abraded example with a moderately prooflike appearance. As is customary for the issue, the strike is somewhat soft at the centers. The design imitates Federal types of the day, unlike the volcano-shaped Pikes Peak found on the prior year's ten and twenty. The Clark, Gruber operations were purchased by the Federal government and evolved into the 1906 Denver Mint. Listed on page 395 of the 2014 *Guide Book*. PCGS# 10140

**1861 Clark, Gruber Ten, Choice XF
Rich, Original Patina, K-7**

- 6964** 1861 Clark, Gruber & Co. Ten Dollar XF45 PCGS. K-7, R.4. The firm of Clark, Gruber & Co. operated on a 24-hour per day schedule for two years. Their reputation was impeccable and they acted as a bank and a private mint, and the company was eventually purchased by the U.S. government in 1863. An assay report from July 1861, issued by the Philadelphia Mint stated the Clark, Gruber coins "to be of professed value, or slightly over." This is a wholly original ten dollar, whose surfaces are richly toned in shades of reddish-orange and blue. We sold a similar piece, an AU50, in October 2012. There are no large or detracting marks on either side, just the small abrasions one would expect from a short stay in circulation. Listed on page 394 of the 2014 *Guide Book*. PCGS# 10141

**1852 Assay Office Ten Dollar, XF45
Ex: S.S. Central America
Very Rare Kagin-12**

- 6965** 1852 Assay Office Ten Dollar XF45 PCGS. K-12, R.7. Ex: S.S. Central America. SSCA 7216. The rare K-12 is distinguished from the R.4 K-12a by the layout of the reverse legend. For example, the O in OFFICE is beneath the I in UNITED, instead of the letter N. The surfaces are much less abraded than the typical XF45 Assay Office ten, though we note a delicate and diagonal flan crack on the reverse between 2 o'clock and 8:30. Luster glints from the legends and plumage. Housed in a gold label holder, and listed on page 383 of the 2014 *Guide Book*. PCGS# 10001

1849 Mormon Quarter Eagle, K-1, AU55
Seldom Encountered in Higher Grades

6966 1849 Mormon Quarter Eagle AU55 PCGS. K-1, High R.5. The Mormon quarter eagles were struck from gold dust collected along the American River in California by members of the Mormon Battalion returning from the Mexican War, soon after the Gold Rush began in 1848-49. There was almost no circulating coinage in the Mormon settlement at the time, causing great difficulties in the local economy. A mint was established in Salt Lake City under the direction of Brigham Young, with all the equipment being manufactured there by Mormon craftsmen and blacksmiths.

Unfortunately, no trained assayer was available, leading to well-publicized problems with the fineness of the issue. Although produced from the native California gold, additional alloys were present which brought the fineness below the stated value on the coins. Lightweight specimens were also reported. The coinage was a local success, as merchants of the Mormon church would accept the coins at face value, but outside the settlement they were only accepted at a steep discount. Still, the coins enabled the Mormons to purchase needed goods from neighboring communities until an adequate supply of U.S. coinage reached the area in the early 1860s.

The present chestnut-gold example has pleasing sharpness on the clasped hands, and the minutely grainy surfaces exhibit only a few faint slide marks. The obverse die is buckled through the lower portion of the all seeing eye, which weakens that area, and is diagnostic for this issue. Listed on page 393 of the 2014 *Guide Book*. Population: 8 in 55, 3 finer (8/13).

Ex: Long Beach Signature (Heritage, 2/2006), lot 3769. PCGS# 10259

S.S. CENTRAL AMERICA GOLD BAR

Kellogg & Humbert S.S. *Central America*
17.12-Ounce Gold Ingot, CAGB-410

6967 Kellogg & Humbert 17.12-Ounce Gold Ingot Recovered from the S.S. *Central America*. CAGB-410. Front face: "No. 249 / 17.12 Oz. / 881 FINE / \$311.78." Top part of Kellogg & Humbert logotype on narrow right face, serial number 249 (in different font with straight base of 2) at top of back. Light golden-yellow color overall except on the back face, which has areas of reddish-brown. A small-to-medium-size ingot, easily held in one hand, yet heavy with history. Like many of its larger fellows, it was onboard the S.S. *Central America* and headed for New York when a hurricane sent the ship and its cargo to the bottom of the Atlantic, where this ingot remained for more than a century. A notable and tangible artifact from the California Gold Rush.

CALIFORNIA FRACTIONAL GOLD

1875 Indian Round 50 Cents, MS64
Extremely Rare BG-1036 Variety

6968 1875 Indian Round 50 Cents, BG-1036, Borderline R.8, MS64 NGC. A well-detailed Choice example of this extremely rare variety, first discovered by Kenneth Lee in the 1970s. This piece shows incomplete detail on the denomination and the obverse stars blend into the dentils. The prooflike lemon-yellow surfaces show few signs of contact. Census: 1 in 64, 0 finer (8/13). PCGS# 10865

COINS OF HAWAII

1847 Hawaii Cent, MS65 Brown
Among the Finest Certified

6969 1847 Hawaii Cent MS65 Brown NGC. Medcalf 2CC-2. Crosslet 4, 15 berries. The obverse displays olive-green, chestnut-gold, and powder-blue toning. The reverse is sea-green and lilac. The satiny surfaces are exceptionally devoid of contact or carbon. The strike is generally sharp. An unusually high grade example of the first official Hawaiian medallion currency, manufactured in Attleboro, Massachusetts for King Kamehameha III. HAPA HANERI translates loosely as ONE CENT. The sole Brown Gem at NGC, and none are known in higher grades, though that service has graded a single cent as MS65 Red and Brown, as has PCGS. PCGS# 10965

1880 Wailuku Plantation Token, AU50
1 Real, M. 2TE-6

6970 1880 Wailuku Plantation 1 Real AU50 PCGS Secure. Medcalf 2TE-6. A splendid chocolate-brown example of this rare Hawaiian merchant token. Unabraded though parallel roller marks (as coined) are evident. Unevenly struck (likely by a local blacksmith) with uncommonly well-defined stars for the variety. The Wailuku Plantation was an early cane sugar farm controlled by American businessmen. One real, a Mexican silver denomination, was roughly equivalent to 12 1/2 cents in U.S. money. Population: 2 in 50, 1 finer (8/13). Listed on page 410 of the 2014 *Guide Book*. PCGS# 600512

PATTERNS

1864 L on Ribbon Indian Cent in Aluminum
Judd-361, PR65 Cameo
The Finest of Only Two Believed Known

6971 1864-L One Cent, Judd-361, Pollock-432, R.8, PR65 Cameo PCGS. Eagle Eye Photo Seal accompanies. This 1864-L Indian cent is struck in aluminum with a plain edge. Referring to the nickel, oriole, and aluminum strikings, the USPatterns.com website states: "It is unclear if these are die trials, regular issues or mint errors struck on leftover copper-nickel planchets." Only two pieces are believed known in aluminum, and this is not the Stack's 9/1989 coin (a cleaned example). The surfaces are bright and highly reflective. As with most aluminum patterns, the devices are thickly frosted and each side is notably contrasted.
Ex: *Elite Coin Auction (Superior, 7/2003)*, lot 474. PCGS# 60530
From *The New York Collection Of 1864-L Indian Cents*.

1865 Transitional Quarter in Silver
Judd-425, Lightly Toned PR65

6972 1865 Quarter Dollar, Judd-425, Pollock-497, High R.6, PR65 NGC. The obverse die is the familiar Liberty Seated design used for regular-issue coinage in 1865. The reverse die incorporates the scroll with motto that was not used on regular-issue strikes until 1866. Struck in silver with a reeded edge.

The transitional pieces of 1865 and related issues have long been viewed as restrikes, created at a later date to meet collector demand. The basis for this view was the apparent discovery of an 1865 transitional pattern dollar overstruck on a regular silver dollar dated 1866. Recent discovery of a transitional quarter overstruck on a regular 1842-O quarter has caused this supposition to be reexamined. Careful evaluation reveals that the supposed overstruck 1866 dollar is actually dated 1853. While this does not prove that the transitional issues were produced as legitimate patterns, it does remove much of the reason for doubting them. USPatterns.com believes that approximately one dozen examples of the issue are extant.

Strongly impressed devices, with crisp detail on Liberty's head and star centers. Golden-brown toning, with more color on the reverse. The presence of this color cannot subdue the significant field-device contrast on each side.

Ex: Stack's private treaty transaction; Lemus Collection, Queller Family Collection Part Two (Heritage, 1/2009), lot 1634. PCGS# 60610

1866 Washington Five Cent Muling
Judd-479, PR63
'Struck on Crude Planchet'

6973 1866 Five Cents, Judd-479, Pollock-569, R.8, PR63 PCGS. This unusual muling has a Washington obverse with the motto IN GOD WE TRUST paired with a regular With Rays nickel reverse. Struck in white metal with a plain edge. The interesting story of these pieces, which were also struck in nickel, copper, and brass is related on the USPatterns.com website: "This muling is believed to have been struck outside the mint from dies sold as scrap metal which were purchased by Joseph Mickley. Many of these coins ended up in the Crosby collection. It is not known if Mickley or Crosby was the actual minter of these coins." The piece resembles a splasher, only thicker. There appears to have been no collar used, and the planchet split in several areas around the rim. Each side shows varying areas of light and dark gray patina. PCGS# 60675

**1867 With Rays Shield Nickel in Copper
Judd-572, PR65 Brown**

- 6974 1867 Shield Five Cents, Judd-572, Pollock-648, Low R.7, PR65 Brown PCGS.** The regular issue With Rays dies, struck in copper with a plain edge. The rays between the reverse stars were short-lived on the Shield nickel and disappeared during 1867, creating a second subtype for the design. This copper impression of the With Rays Shield nickel has far better detail than seen on copper-nickel examples, owing to the softer metal. The obverse has dusky blue, violet, and orange overtones against a brown backdrop, while the reverse is surprisingly orange for a "Brown" coin with similar colors to the obverse forming a minority on the opposite side. Modest spotting does not infringe upon the Gem grade. PCGS# 60782

**1868 Five Cents in Copper, PR64 Red
Judd-627, Struck on a Broad Planchet**

- 6975 1868 Five Cents, Judd-627, Pollock-696, R.7, PR64 Red PCGS.** The obverse closely resembles the contemporary three cent nickel. The reverse is a pattern design, and has a laurel branch with ribbon framing a large 5 and CENTS in curved letters. IN GOD WE TRUST is at the the upper border. Struck in copper with a plain edge. The planchet has the diameter of a silver quarter and the rims are very broad, usual for Judd-627. A well-struck, rose-red near-Gem with scattered minor obverse carbon. Though designated as Low R.7 in the 10th edition of Judd, we feel more comfortable with the USPatterns.com estimate of "about a half dozen known." PCGS# 80844

**1868 Aluminum Ten Dollar, PR64
Judd-663, Probable Longacre Design**

- 6976 1868 Ten Dollar, Judd-663, Pollock-736, Low R.6, PR64 PCGS.** Believed to be a Longacre design, the obverse has a large bust of Liberty facing left with thirteen stars around and the date below. The reverse has a small eagle with upraised wings as the central motif, the motto on a scroll in the field above, and UNITED STATES OF AMERICA/TEN D. at the margin. Struck in aluminum with a reeded edge. This pattern was also struck in gold and copper. It is estimated that approximately a dozen aluminum pieces are known. This is a lovely aluminum pattern. The surfaces are unoxidized and the fields are deeply reflective, as usually seen. The devices are moderately frosted and present a mild contrast against the mirrored fields, but not quite stark enough for Cameo designation. A distinctive planchet lamination on the cheek of Liberty. PCGS# 60881

**1869 Judd-688 Nickel Pattern, PR67 Cameo
Aluminum Regular Dies Strike**

6977 1869 Five Cents, Judd-688, Pollock-769, High R.7, PR67 Cameo NGC. CAC. The regular Shield nickel design without rays. Magnification reveals nearly imperceptible date repunching, especially inside the tops of 869. Struck in aluminum with a plain edge. Heavy reverse die polishing matches the reverse of the 1865 Judd-418 from the Newman Collection. Only five pieces are certified, and the Newman specimen is the finest of those. It is likely that only four or five pieces exist.

This boldly defined Superb Gem is fully brilliant with white surfaces characteristic of the aluminum composition. The fields are deeply mirrored around lustrous devices, resulting in a distinct cameo appearance.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$25; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 3972. PCGS# 60913

**1869 Aluminum Half Dime, Judd-693
Finest Certified PR67 Ultra Cameo
Dramatic Rotated Double Strike**

6978 1869 Half Dime, Judd-693, Pollock-772, High R.7, PR67 Ultra Cameo NGC. An impression from the regular issues dies in aluminum with a reeded edge. This piece is dramatically double struck with about 10 degrees of separation. Only five or six examples of this pattern variety are known, and it is doubtful that any others are double struck like this piece. NGC has certified only one other example, a PR63 Cameo, and PCGS has graded three non-Cameo pieces as PR63, PR65, and PR66. The Newman example is double struck, numerically the finest, and the only certified Ultra Cameo specimen: an unbeatable combination.

The rotated double strike is dramatic and is equaled by the quality of this Superb Gem. Both sides have heavy field-to-device contrast on the light gray aluminum surfaces with deeply mirrored fields. A few lint marks and other Mint-made imperfections on each side are entirely as struck; otherwise, pristine surfaces and exceptional eye appeal.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$20; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 3973. PCGS# 60918

**1870 Standard Silver Half Dime
Judd-809, PR67
The Finest Certified**

6979 1870 Standard Silver Half Dime, Judd-809, Pollock-897, Low R.7, PR67 NGC. CAC. William Barber's Seated Liberty design is paired with a familiar Standard Silver reverse motif, a wreath of corn and cotton and 5 CENTS in the center. Struck in silver with a reeded edge. The small physical size of the five cent pattern resulted in slight differences in the design. The cap on the pole resembles a large number 2, for example. The ribbon ends in a single tail distant from the U in UNITED, rather than the double tail below UN on the larger denomination patterns. The Newman specimen is the only certified PR67 example from a combined NGC and PCGS population of 10 submissions.

Blue, magenta, and gold toning appears on both sides of this Superb Gem proof. The fields are fully mirrored with lustrous devices, resulting in light cameo contrast that is visible through the toning. All design elements are boldly impressed.

Ex: Newman Collection / Central States Signature (Heritage, 4/2013), lot 3979. PCGS# 61053

**1870 Copper Standard Silver Half
Judd-960, PR65 Red and Brown**

- 6980** 1870 Standard Silver Half Dollar, Judd-960, Pollock-1112, R.7, PR65 Red and Brown PCGS. CAC. Standard Silver design showing Liberty wearing a coronet inscribed LIBERTY in raised letters. The reverse reads 50 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. These pieces were sold with the other denominations for \$15 at the time of issue. Fewer than a dozen examples are believed known today. Struck in copper with a plain edge. Faint glimmers of original red luster is still apparent on each side through the mellowed and mostly brown patina. From *The Strawberry Fields Collection*. PCGS# 71206

**1870 Standard Silver Half Dollar, PR64
Judd-988, Rarity-7 Issue**

- 6981** 1870 Standard Silver Half Dollar, Judd-988, Pollock-1117, High R.7, PR64 PCGS. The obverse features a bust of Liberty facing right. Liberty wears a headband inscribed LIBERTY, which is decorated in the center with a star. Her hair is tied up in a bun. IN GOD WE TRUST is beneath within a scroll, UNITED STATES OF AMERICA is centered above. The reverse exhibits a wreath of cotton and corn, with 50 CENTS crowded inside the wreath. STANDARD SILVER is centered above the wreath, and 1870 is beneath the wreath. Struck in silver with a plain edge. The mirrored flash in the fields is still readily apparent through the deep, variegated rose and blue toning that covers most of each side. PCGS# 61234

**1870 Gold Dollar in Copper
Judd-1023, PR65 Red and Brown**

- 6982** 1870 Gold Dollar, Judd-1023, Pollock-1158, R.7, PR65 Red and Brown NGC. Struck from regular issue gold dollar dies, but in copper with a reeded edge. These curious pieces were most likely struck for sale to collectors as part of complete off-metal sets as there was no obvious reason for their production. Examples are also known in aluminum and nickel. Only four or five copper strikings are believed known today.

While designated as Red and Brown, the surfaces are more of an evenly and slightly mellowed red, yielding a rich cherry-red color overall with blue tints interspersed. The strike details are complete over each side. The only surface flaws are Mint-made, a couple of thin lint marks located around the 1 in the denomination.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$50; Eric P. Newman Numismatic Education Society; Newman / Central States Signature (Heritage, 4/2013), lot 3989. PCGS# 71271

**1871 Indian Princess Half in Aluminum
Judd-1116, PR67 Cameo
The Finest of Three Certified**

6983 1871 Half Dollar, Judd-1116, Pollock-1252, R.8, PR67 Cameo NGC. CAC. A Seated Liberty faces left, wearing an Indian princess headdress and a flowing robe. Her left hand rests atop a globe wrapped with a scroll bearing the word LIBERTY in raised letters, while holding a Liberty pole and cap in her right hand. Two flags, one bearing 13 stars, are in the background, with the date 1871 in exergue. Thirteen stars fill the periphery. A regular half dollar reverse die was used to produce Judd-1116. Struck in aluminum with a reeded edge.

Andrew Pollock rated this pattern variety as R.7 in his reference, although it is clearly R.8 with only two or three examples known. Only one piece is recorded in Pollock's census, and we handled that example in January 2004. That coin is PR66 PCGS and the only one that grading service has seen. NGC has certified the Newman example; the other one they graded is PR66 Cameo. The population data suggests that three examples exist today.

Both sides show faint evidence of a double strike on this Superb Gem Cameo proof. Some natural flakes and rifts appear in the light gray surfaces as struck. The fields are deeply mirrored and provide a wonderful background for the lustrous devices of this gorgeous piece. It is virtually as struck, an amazing example and certainly the finest of just two or three known specimens.

Ex: *Newman Collection / Central States Signature (Heritage, 4/2013)*, lot 3996. PCGS# 61375

**1875 Nickel, PR66 Red and Brown
Judd-1387, Regular Dies Strike in Copper
Numerically the Finest Certified**

6984 1875 Five Cents, Judd-1387, Pollock-1531, R.8, PR66 Red and Brown NGC. CAC. The regular Shield nickel design, struck in copper with a plain edge. Only three or four examples of this pattern variety are known, and this is only the second piece we have handled; only one example other than the Newman piece in 16 years. NGC has certified this piece and one they described as PR64 Red. PCGS has certified two examples graded PR64 Red and PR65 Red. The Newman specimen is numerically the finest Judd-1387 certified.

The extraordinarily bold strike and high wire rim around both sides gives the appearance of a thick planchet. Subdued mirrors display rich orange mint color blended with delicate bluish-brown patina. Both sides exhibit trivial carbon flecks evidencing the originality of its surfaces.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$35; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 4004. PCGS# 71694

1875 'Sailor Head' Twenty Cent Pattern in Copper
Judd-1393, PR65 Red and Brown

- 6985** 1875 Sailor Head Twenty Cents, Judd-1393, Pollock-1536, R.7, PR65 Red and Brown PCGS. William Barber's "Sailor Head" obverse design that shows Liberty facing left, wearing a coronet, her hair tied in the back with two ribbons trailing, thus resembling a sailor's cap. The reverse has a three-pointed shield as the central motif with 20 sunken in the middle, and UNITED STATES OF AMERICA / CENTS around the margins. Struck in copper with a plain edge. About a dozen pieces are known of this design and struck in copper. Pieces were also struck in silver, aluminum, and nickel. This is a very attractive coin. Rather than showing patches of red here and brown there, this piece is evenly (and slightly) mellowed from full Red over each side. A problem-free example and well worth serious consideration. PCGS# 71700

1879 Half Dollar Pattern, PR65
Popular Morgan Design, Judd-1599

- 6986** 1879 Morgan Half Dollar, Judd-1599, Pollock-1794, High R.6, PR65 NGC. The obverse is dominated by a portrait of Liberty nearly identical to that on the Morgan dollar, but appropriately reduced in size for the half dollar denomination. The peripheral inscription E PLURIBUS UNUM and the accompanying stars differ in placement from the Morgan dollar. The reverse features an eagle with partially spread wings, holding an olive branch in the right talon and a trio of arrows in its left claws. IN GOD WE TRUST is widely spaced below, along with the denomination and UNITED STATES OF AMERICA. Struck in silver with a reeded edge.

Morgan's famous profile of Liberty was also used on quarter and dime patterns in 1879. Judd-1599 is a rare issue in an absolute sense, but just of average rarity in the context of the pattern series. Possibly as many as 12-15 specimens remain. The design was also struck in copper in 1879 (Judd-1600). An early auction appearance was lot 362 of the Woodside Collection (New York Coin & Stamp, 4/1892):

"1879 Half Dollar: similar to last, but E PLURIBUS l., UNUM r. separated by 8 stars at top: silver: proof: not sharp in centers; equally rare."

This is a delightful Gem, with shades of champagne-gold and lavender-gray patina on both sides. Like the coin in the Woodside sale above, and every other example of Judd-1599 we have seen, the central design elements are a little soft. The peripheral devices are more strongly impressed. The reflective proof surfaces shine through the toning at irregular intervals, especially on the reverse and on the obverse peripheries. No mentionable distractions are evident. Census: 1 in 65, 0 finer (8/13).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$60; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 4018. PCGS# 61977

1884 'Holey' Cent Pattern in Nickel
Designed by Eastman Johnson, PR68 Cameo
Judd-1721, The Finest Known

- 6987** 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR68 Cameo PCGS. Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. A curious feature of these patterns is that the hole in the center appears to be hand-cut. On this piece it is almost perfectly done. A nice complement to the near-perfect preservation of this pattern's surfaces. Each side is mostly brilliant, but there are just the faintest milky flecks and dabs of golden color evident when closely examined. This piece is the finest certified at both of the major services (8/13). PCGS# 62150

1867 Five Cent Obverse Die Trial
J-A1867-10, Uncertified MS62

- 6988** 1867 Five Cent Obverse Die Trial, J-A1867-10, R.8, MS62 Uncertified. Uniface obverse die trial used on the five cent patterns, Judd-561 through 565. The design features an Indian princess central motif, 1867 below, UNITED STATES OF AMERICA around the top margin. Differing from the patterns as it lacks LONGACRE F. below the truncation. Struck in lead. Diagonally cracked from northwest to southeast. As a result, the piece now has cardboard backing to reinforce it. The surface is mostly light gray with slightly darker color over the devices. According to USPatterns.com only two pieces are known.
Ex: Dr. Hewitt Judd; Abe Kosoff Estate (Bowers and Merena, 11/1985), lot 1143; plate coin in the Judd pattern reference, 1st through 7th editions.

INGOTS

27.37-Ounce San Francisco Mint Silver Ingot
Ex: Harmer Rooke

- 6989** Undated San Francisco Mint Silver Ingot. 27.37 Ounces. This hefty ingot bears the oval imprint of the San Francisco Mint. Several small gas bubbles are scattered over the top side, but do not interfere with the legends. The top side has the mint's oval imprint deeply impressed at the top, followed by 1345, the weight is next at 27.37 OZS, and then the fineness expressed as 999.75 FINE. The number 164 is seen on the lower short side. The only other item of numismatic interest is an old Harmer Rooke Galleries sticker on the back. The top side is bluish-silver, the back side barely toned. The ingot measures 57 x 89 x 13 mm

Large 1957 New York Assay Office Silver Ingot
48.09 Ounces

- 6990** 1957 New York Assay Office Silver Ingot. 48.09 Ounces. This brick of silver weighs in at 48.09 ounces, as indicated on the right side. Ingots from the New York Assay Office are significantly scarcer than the ones usually seen from San Francisco. The top side has the expected circular imprint: ASSAY OFFICE NEW YORK. Some of the eagle's right (facing) wing detail is lost from a gas bubble in that area. The bottom of the top side reads: FINE/999 3/4. The short bottom side has R93 in huge type. The short top side has 49 in much smaller type. The ingot is bright and deeply toned with a bluish cast. It measures 45 x 93 x 30 mm.

End of Premier Session

SESSION SEVEN

HERITAGE Live!®, Internet, Fax, and Mail Only Session

Saturday, September 28, 2013 | 1:00 PM CT | Dallas, Texas | Lots 7001 - 8588

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

To view full descriptions, enlargeable images and bid online, visit HA.com/1189

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

8065 1948-S MS67 PCGS. PCGS Population (54/1). NGC Census: (281/1). Mintage: 15,960,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$320. NGC ID# 245N, PCGS# 5838

8066 1950 MS67 PCGS. PCGS Population (40/0). NGC Census: (201/0). Mintage: 24,971,512. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$360. NGC ID# 245S, PCGS# 5841

8067 1950-S MS67 PCGS. PCGS Population (68/0). NGC Census: (222/2). Mintage: 10,284,004. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$360. NGC ID# 245V, PCGS# 5844

8068 1950-S MS67 PCGS. CAC. PCGS Population (68/0). NGC Census: (222/2). Mintage: 10,284,004. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$360. NGC ID# 245V, PCGS# 5844

8069 1950-S MS67 PCGS. CAC. PCGS Population (68/0). NGC Census: (222/2). Mintage: 10,284,004. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$360. NGC ID# 245V, PCGS# 5844

8070 1951 MS67 PCGS. CAC. PCGS Population (46/0). NGC Census: (203/0). Mintage: 43,505,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$300. NGC ID# 245W, PCGS# 5846

8071 1951-S MS67 PCGS. PCGS Population (104/1). NGC Census: (313/5). Mintage: 9,048,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$300. NGC ID# 245Y, PCGS# 5848

8072 1951-S MS67 PCGS. CAC. PCGS Population (104/1). NGC Census: (313/5). Mintage: 9,048,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$300. NGC ID# 245Y, PCGS# 5848

8073 1951-S MS67 PCGS. CAC. PCGS Population (104/1). NGC Census: (313/5). Mintage: 9,048,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$300. NGC ID# 245Y, PCGS# 5848

8074 1953 MS67 NGC. CAC. NGC Census: (93/1). PCGS Population (53/0). Mintage: 18,500,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$320. NGC ID# 2464, PCGS# 5852

8075 1954 MS67 PCGS. PCGS Population (39/0). NGC Census: (174/0). Mintage: 54,400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 2467, PCGS# 5855

8076 1954-S MS67 NGC. NGC Census: (277/2). PCGS Population (33/1). Mintage: 11,834,722. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$275. (#5857) NGC ID# 22FU, PCGS# 5857

8077 1955 MS67 PCGS. PCGS Population (27/0). NGC Census: (133/0). Mintage: 18,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$380. NGC ID# 2469, PCGS# 5858

8078 1955-D MS66 PCGS. CAC. PCGS Population (170/1). NGC Census: (478/29). Mintage: 3,182,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$135. NGC ID# 246A, PCGS# 5859

8079 1958-D MS67 PCGS. CAC. PCGS Population (121/0). NGC Census: (253/1). Mintage: 78,124,896. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$180. NGC ID# 246G, PCGS# 5865

8080 1959 MS66+ PCGS. CAC. PCGS Population (662/4). NGC Census: (869/67). Mintage: 24,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$40. NGC ID# 246H, PCGS# 5866

PROOF WASHINGTON QUARTERS

8081 1965 MS67 PCGS. PCGS Population (20/0). NGC Census: (72/1). Mintage: 1,819,717,504. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$340. NGC ID# 246W, PCGS# 5878

8082 1973-D MS67 PCGS. PCGS Population (17/0). NGC Census: (11/0). Mintage: 232,977,408. NGC ID# 247C, PCGS# 5892

8083 1974-D MS67 PCGS. PCGS Population (37/0). NGC Census: (20/0). Mintage: 353,160,288. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$140. NGC ID# 247E, PCGS# 5894

8084 1979-D MS67 PCGS. PCGS Population (20/0). NGC Census: (26/0). Mintage: 489,789,792. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$300. NGC ID# 247N, PCGS# 5907

8085 1980-P MS67 PCGS. PCGS Population (35/0). NGC Census: (43/3). Mintage: 635,832,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$185. NGC ID# 247P, PCGS# 5908

8086 1981-D MS67 PCGS. PCGS Population (23/0). NGC Census: (32/0). Mintage: 575,722,816. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$225. NGC ID# 247T, PCGS# 5911

8087 1984-P MS67 PCGS. PCGS Population (10/0). NGC Census: (26/1). Mintage: 676,545,024. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$170. NGC ID# 247Y, PCGS# 5916

8088 1984-D MS67 PCGS. PCGS Population (8/0). NGC Census: (5/0). Mintage: 546,483,072. NGC ID# 247Z, PCGS# 5917

8089 1936 PR61 PCGS. PCGS Population (21/1150). NGC Census: (12/917). Mintage: 3,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR61: \$475. NGC ID# 27HN, PCGS# 5975

8090 1937 PR66 PCGS. PCGS Population (344/88). NGC Census: (260/107). Mintage: 5,542. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$420. NGC ID# 27HP, PCGS# 5976

8091 1937 PR66 PCGS. CAC. PCGS Population (344/88). NGC Census: (260/107). Mintage: 5,542. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$420. NGC ID# 27HP, PCGS# 5976

8092 1938 PR66 PCGS. PCGS Population (388/79). NGC Census: (368/101). Mintage: 8,045. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$240. NGC ID# 27HR, PCGS# 5977

8093 1941 PR67 NGC. NGC Census: (225/25). PCGS Population (149/1). Mintage: 15,287. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$270. NGC ID# 27HU, PCGS# 5980

8094 1941 PR67 PCGS. PCGS Population (149/1). NGC Census: (224/25). Mintage: 15,287. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$270. NGC ID# 27HU, PCGS# 5980

8095 1942 PR67 PCGS. PCGS Population (156/6). NGC Census: (214/16). Mintage: 21,123. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$250. NGC ID# 27HV, PCGS# 5981

8096 1954 PR67 Deep Cameo PCGS. PCGS Population (29/16). NGC Census: (23/23). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$380. NGC ID# 27HY, PCGS# 95986

8097 1955 PR67 Deep Cameo PCGS. PCGS Population (39/22). NGC Census: (17/41). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$440. NGC ID# 27HZ, PCGS# 95987

8098 1958 PR67 Ultra Cameo NGC. NGC Census: (22/11). PCGS Population (38/28). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$360. NGC ID# 27J4, PCGS# 95990

8099 1959 PR68 Deep Cameo PCGS. Ex: Michael Fuller Collection. PCGS Population (38/0). NGC Census: (23/6). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$650. NGC ID# 248Z, PCGS# 95991

8100 1962 PR69 Ultra Cameo NGC. NGC Census: (43/0). PCGS Population (51/1). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$600. NGC ID# 27J5, PCGS# 95994

8101 1969-S PR69 Ultra Cameo NGC. NGC Census: (70/0). PCGS Population (45/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$520. NGC ID# 2496, PCGS# 96001

STATEHOOD QUARTERS

8102 2004 Wisconsin Statehood Quarter Set NGC. This set includes: 2004-P MS67; 2004-D MS67; 2004-D Extra Leaf High MS66; 2004-D Extra Leaf Low MS66; 2004-S Clad PR70 Ultra Cameo; 2004-S Silver PR70 Ultra Cameo. All coins housed in a single NGC presentation holder. (Total: 5 coins)

EARLY HALF DOLLARS

8103 1803 Large 3 PCGS Genuine. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 188,234.

8104 1803 Large 3 — Improperly Cleaned — NGC Details. VF. NGC Census: (19/1021). PCGS Population (36/303). Mintage: 188,234. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$675.

8105 1803 Large 3, 12 Arrows, O-101, R.3 — Cleaned — PCGS Genuine. Fine Details. NGC Census: (0/0). PCGS Population (0/6). PCGS# 39270

8106 1805 Fine 12 NGC. NGC Census: (15/307). PCGS Population (30/391). Mintage: 211,722. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$390. NGC ID# 24EG, PCGS# 6069

8107 1805 O-111, R.2 — Improperly Cleaned, Plugged — NCS. VF Details. NGC Census: (0/0). PCGS Population (0/4). PCGS# 39285

8108 1805 O-112, R.2 Fine 12 PCGS. PCGS Population (1/6). NGC Census: (0/0). PCGS# 39286

8109 1806 6 Over Inverted 6 Fine 12 PCGS. CAC. PCGS Population (16/83). NGC Census: (6/1761). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$750. NGC ID# 24EL, PCGS# 6078

- 8110 1806 6 Over Inverted 6 — Harshly Cleaned — NGC Details. XF.** NGC Census: (6/1724). PCGS Population (11/14). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$3,250.
- 8111 1806 Pointed 6, Stem Fine 12 PCGS. CAC.** PCGS Population (76/891). NGC Census: (65/1737). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$375. *From The Strawberry Fields Collection.* NGC ID# 24EJ, PCGS# 6071
- 8112 1806 Pointed 6, Stem VF20 PCGS.** PCGS Population (91/722). NGC Census: (77/1599). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$600. NGC ID# 24EJ, PCGS# 6071
- 8113 1806 Pointed 6, Stem VF25 PCGS.** PCGS Population (94/628). NGC Census: (66/1533). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$723. NGC ID# 24EJ, PCGS# 6071
- 8114 1806 Pointed 6, Stem VF25 PCGS. CAC.** PCGS Population (94/628). NGC Census: (66/1534). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$723. *From The Strawberry Fields Collection.* NGC ID# 24EJ, PCGS# 6071
- 8115 1806 Pointed 6, Stem, O-115a, R.2 VG10 PCGS.** PCGS Population (1/5). NGC Census: (0/0). PCGS# 39318
- 8116 1807 Draped Bust Fine 12 PCGS. CAC.** PCGS Population (82/1062). NGC Census: (71/1568). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$325. *From The Strawberry Fields Collection.* NGC ID# 24EM, PCGS# 6079

- 8117 1807 Draped Bust Fine 15 PCGS.** PCGS Population (117/945). NGC Census: (55/1504). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$414. NGC ID# 24EM, PCGS# 6079
- 8118 1807 Draped Bust — Cleaned, Damaged, Graffiti — ANACS. VF20 Details.** NGC Census: (49/1463). PCGS Population (115/830). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$580.
- 8119 1807 Draped Bust VF25 PCGS.** PCGS Population (111/719). NGC Census: (58/1405). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$705. NGC ID# 24EM, PCGS# 6079
- 8120 1807 Draped Bust VF25 PCGS. CAC.** PCGS Population (111/719). NGC Census: (58/1405). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$705. *From The Strawberry Fields Collection.* NGC ID# 24EM, PCGS# 6079
- 8121 1807 O-105, R.1 — Bent — PCGS Genuine. VF Details.** NGC Census: (0/0). PCGS Population (2/7). PCGS# 39343

BUST HALF DOLLARS

- 8122 1807 Large Stars, 50 Over 20 VF30 PCGS.** PCGS Population (40/259). NGC Census: (34/1155). Mintage: 750,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$870. *From The Strawberry Fields Collection.* NGC ID# 24EN, PCGS# 6086
- 8123 1808/7 XF40 PCGS.** PCGS Population (37/93). NGC Census: (25/106). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$560. *From The Strawberry Fields Collection.* NGC ID# 24EP, PCGS# 6091
- 8124 1808/7 XF40 PCGS. CAC.** PCGS Population (37/93). NGC Census: (25/106). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$560. NGC ID# 24EP, PCGS# 6091
- 8125 1808 VF30 PCGS.** PCGS Population (39/480). NGC Census: (22/383). Mintage: 1,368,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$299. NGC ID# 24EP, PCGS# 6090
- 8126 1808 XF40 PCGS.** PCGS Population (83/334). NGC Census: (44/315). Mintage: 1,368,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$425. NGC ID# 24EP, PCGS# 6090
- 8127 1808 O-107a, R.2 XF40 ANACS.** NGC Census: (44/315). PCGS Population (83/334). Mintage: 1,368,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$425. NGC ID# 24EP, PCGS# 6090

- 8128 1808 O-105, R.3 XF45 NGC.** NGC Census: (60/255). PCGS Population (65/269). Mintage: 1,368,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$530. NGC ID# 24EP, PCGS# 6090
- 8129 1809 Normal Edge, O-105, R.3 — Cleaned, Obverse Scratched — NGC Details. AU.** NGC Census: (31/490). PCGS Population (54/223). Mintage: 1,405,810. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$525.
- 8130 1810 XF40 NGC.** NGC Census: (46/512). PCGS Population (103/391). Mintage: 1,276,276. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$360. NGC ID# 24ET, PCGS# 6095
- 8131 1810 XF45 PCGS.** PCGS Population (83/308). NGC Census: (72/440). Mintage: 1,276,276. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$432. NGC ID# 24ET, PCGS# 6095
- 8132 1810 — Improperly Cleaned — NGC Details. AU.** NGC Census: (46/394). PCGS Population (59/249). Mintage: 1,276,276. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$565.

- 8133 1810 — Graffiti — ANACS. AU58 Details.** NGC Census: (71/219). PCGS Population (66/64). Mintage: 1,276,276. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,425.
- 8134 1810 O-108, R.3, VF25 NGC. CAC.** NGC Census: (0/0). PCGS Population (0/0). PCGS# 39416
- 8135 1811/10 — Cleaned — PCGS Genuine. XF Details.** NGC Census: (8/332). PCGS Population (23/81). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700. NGC ID# 24EV, PCGS# 6099

- 8136 1811 Large 8 — Obverse Graffiti — NGC Details. AU.** NGC Census: (32/690). PCGS Population (37/216). Mintage: 1,203,644. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$475.
- 8137 1811 Small 8 — Scratched — PCGS Genuine. AU Details.** NGC Census: (0/0). PCGS Population (34/207). PCGS# 6097
- 8138 1811 Small 8, O-110a, R.2 — Reverse Scratched — NGC Details. AU.** NGC Census: (0/0). PCGS Population (0/0).
- 8139 1812/1 Large 8 XF40 NGC.** NGC Census: (3/223). PCGS Population (0/9). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$500. NGC ID# 24EX, PCGS# 6102
- 8140 1812 AU53 ANACS.** NGC Census: (52/469). PCGS Population (76/372). Mintage: 1,628,059. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$585. NGC ID# 24EW, PCGS# 6100

8564 1942 PR67 PCGS. PCGS Population (761/39). NGC Census: (827/160). Mintage: 21,120. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$700. NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

8565 1948 MS64 Full Bell Lines PCGS; 1948-D MS64 Full Bell Lines PCGS; 1948-D MS64 Full Bell Lines PCGS; 1949 MS64 Full Bell Lines PCGS; 1950-D Full Bell Lines PCGS; 1951 MS64 Full Bell Lines PCGS; 1952 MS64 Full Bell Lines PCGS; 1952-D MS64 Full Bell Lines PCGS; 1954-D MS64 Full Bell Lines PCGS; 1958-D MS64 Full Bell Lines PCGS; 1959 MS64 Full Bell Lines PCGS; 1960 MS64 Full Bell Lines PCGS; 1960-D MS64 Full Bell Lines PCGS; 1961-D MS64 Full Bell Lines PCGS; 1962-D MS64 Full Bell Lines PCGS; and a 1963-D MS64 Full Bell Lines. (Total: 15 coins)

8566 1949 MS66 Full Bell Lines PCGS. CAC. PCGS Population (198/0). NGC Census: (56/1). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$460. NGC ID# 24ST, PCGS# 86653

8567 1949 MS66 Full Bell Lines PCGS. CAC. PCGS Population (198/0). NGC Census: (56/1). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$460. NGC ID# 24ST, PCGS# 86653

8568 1949-D MS65 Full Bell Lines NGC. NGC Census: (160/4). PCGS Population (557/31). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$440. NGC ID# 24SU, PCGS# 86654

8569 1949-S MS66+ PCGS. CAC. PCGS Population (229/3). NGC Census: (190/7). Mintage: 3,744,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$180. NGC ID# 24SV, PCGS# 6655

8570 1949-S MS65 Full Bell Lines PCGS. PCGS Population (505/151). NGC Census: (113/26). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$320. NGC ID# 24SV, PCGS# 86655

8571 1949-S MS66 Full Bell Lines NGC. NGC Census: (25/1). PCGS Population (148/3). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$650. NGC ID# 24SV, PCGS# 86655

8572 1950 MS66 Full Bell Lines PCGS. PCGS Population (186/6). NGC Census: (37/2). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$565. NGC ID# 24SW, PCGS# 86656

8573 1950 MS66 Full Bell Lines PCGS. CAC. PCGS Population (186/6). NGC Census: (36/2). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$565. NGC ID# 24SW, PCGS# 86656

8574 1952 MS66 Full Bell Lines PCGS. CAC. PCGS Population (260/8). NGC Census: (91/4). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$300. NGC ID# 24T3, PCGS# 86661

8575 1952-D MS66 NGC. CAC. NGC Census: (14/2). PCGS Population (0/0). Mintage: 25,395,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$600. NGC ID# 24T4, PCGS# 6662

8576 1952-S MS64 Full Bell Lines PCGS. PCGS Population (330/283). NGC Census: (40/21). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. NGC ID# 24T5, PCGS# 86663

8577 1953-S "Bugs Bunny" MS65 PCGS. FS-401. PCGS Population (4525/574). NGC Census: (2758/535). Mintage: 4,148,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$68. NGC ID# 24T8, PCGS# 6666

8578 1953-S MS66+ PCGS. CAC. PCGS Population (572/2). NGC Census: (527/8). Mintage: 4,148,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$240. NGC ID# 24T8, PCGS# 6666

8586 1957 PR68 Deep Cameo PCGS. CAC. PCGS Population (63/2). NGC Census: (39/5). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$1,375. NGC ID# 24TX, PCGS# 96698

8587 1963 PR68 Deep Cameo PCGS. PCGS Population (228/16). NGC Census: (171/6). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$460. NGC ID# 27VL, PCGS# 96704

PROOF KENNEDY HALF DOLLARS

8588 1964 Accented Hair PR67 Cameo PCGS. PCGS Population (219/104). NGC Census: (349/214). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$280.
From The Searight Collection. NGC ID# 24WG, PCGS# 86801

8579 1957 MS67 NGC. CAC. NGC Census: (27/1). PCGS Population (13/0). Mintage: 5,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$525. NGC ID# 24TE, PCGS# 6672

8580 1961-D MS65 Full Bell Lines PCGS. PCGS Population (282/13). NGC Census: (78/2). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$400. NGC ID# 24TP, PCGS# 86681

8581 1963 MS66 PCGS. PCGS Population (26/0). NGC Census: (58/4). Mintage: 22,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$550. NGC ID# 24TT, PCGS# 6684

PROOF FRANKLIN HALF DOLLARS

8582 1950 PR65 NGC. NGC Census: (673/662). PCGS Population (1166/466). Mintage: 51,386. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$365.
From The Joan Carroll Collection. NGC ID# 27VA, PCGS# 6691

8583 1950 PR65 NGC. NGC Census: (673/662). PCGS Population (1166/466). Mintage: 51,386. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$365.
From The Joan Carroll Collection. NGC ID# 27VA, PCGS# 6691

8584 1951 PR66 NGC. NGC Census: (543/224). PCGS Population (514/131). Mintage: 57,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$340.
From The Joan Carroll Collection. NGC ID# 27VB, PCGS# 6692

8585 1952 PR67 NGC. NGC Census: (360/21). PCGS Population (115/2). Mintage: 81,980. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$480. NGC ID# 27VC, PCGS# 6693

End of Session Seven

SESSION EIGHT

Sunday, September 29, 2013 | 12:00 PM CT | Dallas, Texas | Lots 8589 - 10269

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1189

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

EARLY DOLLARS

- 8589** 1798 Large Eagle, Pointed 9 — Holed — NGC Details. XF. NGC Census: (177/532). PCGS Population (208/358). Mintage: 327,536. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$3,500. NGC ID# 24X6, PCGS# 6873
- 8590** 1798 Large Eagle, Knob 9, 4 Stripes, B-3, BB-94, R.5 — Graffiti — ANACS. Fine 12 Details. NGC Census: (0/0). PCGS Population (0/2).
- 8591** 1798 Large Eagle, Pointed 9, 5 Vertical Lines, 10 Arrows, B-17, BB-101, R.5 — Cleaned, Damaged, Scratched — ANACS. Fine 12 Details. NGC Census: (0/0). PCGS Population (0/2). PCGS# 40017
- 8592** 1799 7x6 Stars — Cleaned, Damaged — NGC Details. Fine. NGC Census: (80/1544). PCGS Population (130/2408). Mintage: 423,515. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$1,400.
- 8593** 1799 7x6 Stars — Polished, Repaired — NCS. VF Details. NGC Census: (99/1386). PCGS Population (241/1965). Mintage: 423,515. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$2,000. NGC ID# 24X7, PCGS# 6878
- 8594** 1799 7x6 Stars, B-14, BB-167, R.3 — Scratched — ANACS. Fine Details, Net VG8. NGC Census: (0/0). PCGS Population (0/4). PCGS# 40058
- 8595** 1800 — Damaged — ANACS. Fine Details, Net VG8. NGC Census: (19/830). PCGS Population (21/1017). Mintage: 220,920. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$1,075. NGC ID# 24X9, PCGS# 6887

SEATED DOLLARS

- 8596** 1840 — Cleaned, Rev Scratched — NGC Details. Fine. NGC Census: (2/242). PCGS Population (4/300). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$275.
- 8597** 1840 Fine 15 NGC. NGC Census: (2/240). PCGS Population (2/298). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$301. NGC ID# 24YA, PCGS# 6926
- 8598** 1840 — Obverse Damage — NGC Details. VF. NGC Census: (1/239). PCGS Population (6/292). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350.
- 8599** 1840 XF40 PCGS. PCGS Population (49/192). NGC Census: (17/199). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.
From The Strawberry Fields Collection. NGC ID# 24YA, PCGS# 6926
- 8600** 1840 — Whizzed, Repaired — NGC Details. AU. NGC Census: (15/155). PCGS Population (41/102). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,050.
- 8601** 1841 — Cleaned — PCGS Genuine Secure. AU Details. NGC Census: (14/140). PCGS Population (37/139). Mintage: 173,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$800. NGC ID# 24YB, PCGS# 6927
- 8602** 1842 VF35 PCGS. PCGS Population (43/503). NGC Census: (20/429). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$487. NGC ID# 24YC, PCGS# 6928

- 8603** 1842 — Cleaned — ANACS. VF35 Details. NGC Census: (20/430). PCGS Population (43/503). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$487.

- 8604** 1842 XF45 PCGS. PCGS Population (128/296). NGC Census: (74/325). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$636. NGC ID# 24YC, PCGS# 6928

- 8605** 1842 — Harshly Cleaned — NGC Details. AU. NGC Census: (46/280). PCGS Population (78/218). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$750.

- 8606** 1842 — Improperly Cleaned — NGC Details. AU. NGC Census: (46/280). PCGS Population (78/218). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$750.

- 8607 1843 — Cleaned — PCGS Genuine Secure. VF Details.** NGC Census: (1/393). PCGS Population (5/477). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$335. NGC ID# 24YD, PCGS# 6929
- 8608 1843 XF40 ANACS.** NGC Census: (25/333). PCGS Population (71/348). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$540. NGC ID# 24YD, PCGS# 6929
- 8609 1843 — Improperly Cleaned — NGC Details. XF.** NGC Census: (25/333). PCGS Population (71/348). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$540.
- 8610 1843 — Improperly Cleaned — NGC Details. AU.** NGC Census: (47/218). PCGS Population (67/173). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$785. NGC ID# 24YD, PCGS# 6929
- 8611 1843 — Cleaned — ANACS. AU50 Details.** NGC Census: (47/218). PCGS Population (67/173). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$785.
- 8612 1844 — Improperly Cleaned — NGC Details. AU.** NGC Census: (11/100). PCGS Population (31/107). Mintage: 20,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,050.
- 8613 1845 — Damaged, Tooled, Cleaned — ANACS. XF40 Details.** NGC Census: (10/131). PCGS Population (32/162). Mintage: 24,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$875.
- 8614 1846 — Environmental Damage — NGC Details. VF.** NGC Census: (4/408). PCGS Population (8/549). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350.
- 8615 1846 XF45 PCGS.** PCGS Population (105/311). NGC Census: (64/302). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$646.
From The Strawberry Fields Collection. NGC ID# 24YG, PCGS# 6932
- 8616 1846 — Corroded, Cleaned — ANACS. XF45 Details.** NGC Census: (64/302). PCGS Population (105/311). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$646.
- 8617 1846 — Cleaned — PCGS Genuine Secure. AU Details.** NGC Census: (32/270). PCGS Population (84/227). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$825. NGC ID# 24YG, PCGS# 6932
- 8618 1846-O — Cleaned — PCGS Genuine. XF Details.** NGC Census: (12/116). PCGS Population (38/148). Mintage: 59,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$800. NGC ID# 24YH, PCGS# 6933
- 8619 1847 XF40 ANACS.** NGC Census: (23/375). PCGS Population (60/422). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$560. NGC ID# 24YJ, PCGS# 6934
- 8620 1847 — Improperly Cleaned — NGC Details. XF.** NGC Census: (23/377). PCGS Population (60/422). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$560.
- 8621 1847 XF45 NGC.** NGC Census: (57/317). PCGS Population (108/314). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$639. NGC ID# 24YJ, PCGS# 6934
- 8622 1847 XF45 PCGS.** PCGS Population (108/314). NGC Census: (58/317). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$639. NGC ID# 24YJ, PCGS# 6934
- 8623 1847 — Improperly Cleaned — NGC Details. AU.** NGC Census: (39/280). PCGS Population (82/232). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$785.
- 8624 1849 — Improperly Cleaned — NGC Details. VF.** NGC Census: (0/256). PCGS Population (4/341). Mintage: 62,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350.
- 8625 1849 — Tooled — PCGS Genuine Secure. AU Details.** NGC Census: (17/194). PCGS Population (35/186). Mintage: 62,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$785. NGC ID# 24YL, PCGS# 6936
- 8626 1850-O — Cleaned — PCGS Genuine Secure. VF Details.** PCGS Population (5/139). NGC Census: (0/115). Mintage: 40,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$850. NGC ID# 24YN, PCGS# 6938
- 8627 1850-O — Plugged, Repaired, Whizzed — ANACS. XF45 Details.** NGC Census: (16/75). PCGS Population (24/62). Mintage: 40,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,791. NGC ID# 24YN, PCGS# 6938
- 8628 1857 — Environmental Damage — PCGS Genuine. XF Details.** NGC Census: (1/70). PCGS Population (8/106). Mintage: 94,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,225. NGC ID# 24YW, PCGS# 6945
- 8629 1857 — Cleaned — PCGS Genuine. XF Details.** NGC Census: (1/70). PCGS Population (8/106). Mintage: 94,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,225. NGC ID# 24YW, PCGS# 6945
- 8630 1859-O VF35 PCGS.** PCGS Population (23/720). NGC Census: (7/496). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$435. NGC ID# 24YY, PCGS# 6947
- 8631 1859-O — Cleaned — PCGS Genuine. XF Details.** NGC Census: (18/479). PCGS Population (43/677). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$480. NGC ID# 24YY, PCGS# 6947
- 8632 1859-O XF40 PCGS.** PCGS Population (43/677). NGC Census: (18/478). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$480. NGC ID# 24YY, PCGS# 6947
- 8633 1859-O XF45 NGC.** NGC Census: (27/451). PCGS Population (71/606). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$552. NGC ID# 24YY, PCGS# 6947
- 8634 1859-O XF45 PCGS.** PCGS Population (71/606). NGC Census: (27/452). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$552. NGC ID# 24YY, PCGS# 6947
- 8635 1859-O XF45 NGC. CAC.** NGC Census: (27/451). PCGS Population (71/606). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$552. NGC ID# 24YY, PCGS# 6947
- 8636 1859-O — Improperly Cleaned — NGC Details. AU.** NGC Census: (20/431). PCGS Population (43/563). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$685. NGC ID# 24YY, PCGS# 6947
- 8637 1859-O — Improperly Cleaned — NCS. AU Details.** NGC Census: (20/431). PCGS Population (43/563). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$685. NGC ID# 24YY, PCGS# 6947
- 8638 1859-O — Rim Filed — PCGS Genuine. AU Details.** NGC Census: (20/431). PCGS Population (43/563). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$685. NGC ID# 24YY, PCGS# 6947

- 8639 1859-O — Cleaned — ANACS. AU55 Details.** NGC Census: (41/357). PCGS Population (55/478). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$865.
- 8640 1859-S — Improperly Cleaned — NGC Details. VF.** NGC Census: (1/118). PCGS Population (9/182). Mintage: 20,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$950.
- 8641 1860-O PCGS Genuine.** The PCGS number ending in .91 suggests Artificial Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 515,000.
- 8642 1860-O VF25 NGC.** NGC Census: (10/754). PCGS Population (13/1179). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$347. NGC ID# 24Z3, PCGS# 6950
- 8643 1860-O VF30 NGC.** NGC Census: (12/742). PCGS Population (26/1153). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$387. NGC ID# 24Z3, PCGS# 6950

- 10226** (1835) Taunton MA, John J. Adams, MS63 Brown NGC. Low-300, HT-181, R.1.

SO-CALLED DOLLAR

- 10227** 1916 Panama-California Exposition Official Medal MS62 Brown NGC. HK-430, R.6. Bronze. CA.

PROOF SETS

- 10228** 1970 No S Proof Set Uncertified. This complete 1970 proof set contains the elusive No-S dime of which only 2,200 pieces were struck. The sharply detailed design elements have an all-brilliant finish, limiting the field-device contrast. The coins are housed in the government plastic container, but the blue cardboard box is missing.
From The Joan Carroll Collection. (Total: 5 coins)
- 10229** 1970 No S Proof Set Uncertified. A sharply detailed, mildly contrasted complete 1970 proof set, including the famous mint error No-S dime. The cent shows just a hint of light brown patina on the mostly red surfaces. Housed in the original plastic holder and box.
From The Joan Carroll Collection. (Total: 5 coins)
- 10230** 1970 No S Proof Set Uncertified. A complete 1970 proof set in the government plastic holder and blue cardboard box, including the elusive No-S dime. Only 2,200 No-S dimes were struck before the missing mintmark was noticed. The coins are untuned with brilliant, rather than frosty, design elements.
From The Joan Carroll Collection. (Total: 5 coins)
- 10231** 1970 No S Proof Set Uncertified. This complete 1970 proof set in government packaging contains an example of the elusive 1970 proof Roosevelt dime with no mintmark. Only 2,200 No S dimes were struck and this pleasing example is sharply detailed, with deeply reflective fields and outstanding eye appeal. The other coins are high-quality examples and the cent displays original red surfaces. (Total: 5 coins)
- 10232** 1970 No S Proof Set Uncertified. Mintage: 2,200. This 1970 proof set is well-preserved and the coins show some elements of contrast. The dime is the sought-after No-S variety. Housed in the government plastic packaging with the blue box. (Total: 5 coins)

- 10233** 1983 No S Proof Set Uncertified. A complete 1983 proof set, including the famous No-S dime, housed in the original plastic case and blue box. All pieces display lovely cameo contrast with razor-sharp details and richly frosted devices. An accompanying ANACS certificate rates the No-S dime as a Proof 67.
From The Joan Carroll Collection. (Total: 5 coins)

MISCELLANEOUS

- 10234** Private Striking of the 1849 Double Eagle (2009), "Ultra Cameo Gem Proof" NGC. "Smithsonian Collection," one ounce .999 fine gold. Presentation box included.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, twenty-five percent (25%) on the first \$100,000 (minimum \$14), twenty percent (20%) of any amount between \$100,000 and \$1,000,000, and twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< - \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$29	\$2	\$20,000 - \$29,999	\$2,000
\$30 - \$49	\$3	\$30,000 - \$49,999	\$2,500
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$299	\$20	\$200,000 - \$299,999	\$20,000
\$300 - \$499	\$25	\$300,000 - \$499,999	\$25,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$2,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$3,000 - \$4,999	\$250	>\$10,000,000	\$500,000
\$5,000 - \$9,999	\$500		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is

an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: <http://coins.ha.com/c/ref/sales-tax.zx> for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

Terms and Conditions of Auction

- under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.
- Delivery; Shipping; and Handling Charges:**
32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.
- Cataloging, Warranties and Disclaimers:**
38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.
- Release:**
43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.
- Dispute Resolution and Arbitration Provision:**
45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.
- Miscellaneous:**
52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.
- State Notices:**
- Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.
- Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.
- Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.
- Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold

"as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 11-19-12

Feeling pressured to continually lower your list price?

Maybe it's time to move beyond the conventional real estate model to solve your selling dilemma.

Heritage Auctions is now the only top-tier auction house that holds luxury real estate auctions. We offer a powerful platform that reaches a client base of more than 750,000 members worldwide.

Benefits of selling at auction include:

- Your property is guaranteed to be sold within 60-90 days
- High carrying costs such as mortgage payments, insurance, taxes, utilities, HOA dues, membership fees and upkeep will stop
- Selling at auction creates a competitive bidding environment in which fully qualified and motivated buyers participate in a transparent, non-contingent sale

To learn how Heritage Auctions can help you realize the highest attainable selling price for your property listed at \$2.5 million or above, email LuxuryEstates@HA.com or call 855-261-0573.

THE WORLD'S THIRD LARGEST AUCTION HOUSE

HERITAGE HA.com
AUCTIONS

It Starts with the Right Web Address

Like beach-front properties, premium domain names are the most desirable pieces of Internet real estate. Accordingly, the world's largest marketers and corporations regularly compete to acquire highly sought after web addresses. Addressing this considerable demand, Heritage Auctions is launching its first Domain Name and Intellectual Property auction.

- A domain name is a company's Internet identity, shaping its brand and bestowing instant credibility.
- Premium domain names help businesses rank higher on search engines.
- The right URL has unmatched advertising potential, conveying exactly what kind of business you operate.
- Domain names are unique alternative investments for individuals seeking to diversify their holdings. Premium names — such as Pizza.com, CreditCards.com, Shop.com and Hotels.com — have each sold for well over \$1 million. Visit HA.com/Domains or call us today to learn more about owning or consigning digital real estate.
